

### About the Company

We are a leading metals service center focused on the direct sale and value-added processing of carbon and coated sheet, plate and coil products; stainless steel sheet, plate, bar and coil; aluminum sheet, plate and coil; pipe, tube bar, valves and fittings, tin plate and metal-intensive end-use products. We provide metals processing and distribution services for a wide range of customers. We operate in three reportable segments: specialty metals flat products, carbon flat products, and tubular and pipe products. Our specialty metals flat products segment's focus is on the direct sale and distribution of processed aluminum and stainless flat-rolled sheet and coil products, flat bar products, prime tin mill products and fabricated parts. Through acquisitions, our specialty metals flat products segment has expanded its geographical footprint and enhanced its product offerings in stainless steel and aluminum plate, sheet, angles, rounds, flat bar, tube and pipe and the manufacturing and distribution of stainless steel bollards and water treatment systems. Our carbon flat products segment's focus is on the direct sale and distribution of large volumes of processed carbon and coated flat-rolled sheet, coil and plate products and fabricated parts. Through acquisitions, our carbon flat products segment has expanded its product offerings to include self-dumping metal hoppers and steel and stainless-steel dump inserts for pickup truck and service truck beds. Through the acquisition of Metal-Fab on January 3, 2023, the carbon flat products segment further expanded its product offerings to include venting, micro air and clean air products for residential, commercial and industrial applications. Through the recent acquisition of Metal Works on November 11, 2024, the carbon flat products segment further expanded its product offerings to include the manufacturing of service station canopies, deck clips, long gutters, trim, boat docks and solar canopy and ground racking components. Our tubular and pipe products segment's focus is on the distribution of metal tubing, pipe, bar, valves and fittings and the fabrication of parts supplied to various industrial markets. Through the acquisition of Central Tube and Bar on October 2, 2023, the tubular and pipe products segment further expanded its geographic footprint and extended its valueadded contract manufacturing capabilities. We also perform toll processing of customer-owned metals.

### **Financial Information**

#### DEAR SHAREHOLDERS,

2024 was an important year for Olympic Steel, as we celebrated our 70<sup>th</sup> anniversary and our 30<sup>th</sup> year as a publicly traded company. These milestones provide us with a wonderful opportunity to reflect on and celebrate our proud history and journey to become a leading national metals service center.

We have evolved into a stronger, more resilient company, which helped us successfully navigate a difficult year for the metals industry that included lower industry shipments and pricing, higher interest rates and uncertainty around the 2024 elections.

Despite these headwinds, all three of our segments achieved positive EBITDA in every quarter of 2024, which is a testament to the success of our diversification strategy and our team's commitment to operational discipline. It also reflects our dedication to make the right investments in our business, including both organic growth and acquisitions that further our strategy to drive profitable, sustainable growth in all market conditions.

We are proud of our ability to continue to deliver long-term value for our shareholders.

### 2024 HIGHLIGHTS

Olympic Steel finished 2024 with \$1.9 billion in sales, \$47.9 million in operating income, and net income of \$23.0 million. All three business segments contributed positively to our results.

Our Carbon segment's product mix, including counter-cyclical manufactured products, enabled us to maintain our sales volumes despite lower industry-wide shipments and lower demand from our contractual OEM customers. We gained market share by winning business from new and existing accounts, especially in the value-add fabrication sector. In addition, our coated product sales increased more than 20% compared with 2023.

By focusing on fabrication, our Pipe and Tube segment had a strong year while navigating industry-wide headwinds. This strategy of providing additional fabrication services yields higher margins compared with our standard products and further entrenches our offering of ready-for-assembly products for OEM accounts. In addition, our acquisition of Central Tube and Bar, a producer of fabricated tube and bar products, in late 2023 further supported these gains. Our continued drive for improved profitability revolves around a combination of sales growth, more fabrication and cost containment.

The Specialty Metals segment remained resilient and profitable in 2024, continuing to outpace market shipments in both the stainless and aluminum markets, which helped overcome soft end-user demand and compressed commodity prices. The segment grew its market share and made a meaningful contribution to profitability despite lackluster market conditions under which nickel prices hit a four-year low, negatively impacting stainless steel surcharges.

We have continued to make investments in higher-margin opportunities to accelerate growth. During 2024, many of these investments were related to automation and capacity expansion, which enable us to enhance throughput, safety and productivity. You can see this reflected in our capital spending, which was \$29.5 million in 2024.

### **PROFITABLE GROWTH THROUGH ACQUISITIONS**

Olympic Steel has a strong track record of profitable growth through acquisitions. We have successfully completed eight acquisitions during the past seven years, leveraging our ability to identify targets that are the right cultural, operational and strategic fit. Furthermore, we have built a customized approach to integration and have proven that we can drive synergies by effectively applying our operational discipline, aligning our administrative support functions and integrating our acquired companies into the Olympic Steel supply chain.

Our latest acquisition was completed in November 2024. We acquired Metal Works, a leading manufacturer of components for service station and drive-through canopies and boat docks, as well as solar canopy and ground racking components. These products are primarily made from coated carbon steel and aluminum, which creates an excellent strategic and synergistic fit with our service center business. Metal Works is also a natural culture fit, with a strong team known for exceptional customer service and a well-respected brand. The addition of Metal Works has enabled us to further advance our position in manufactured metal products and, importantly, was immediately accretive to our business.

With borrowing availability of more than \$200 million under our revolving credit facility, we are well-positioned to continue to execute additional acquisitions.

## INVESTING IN HIGHER-MARGIN OPPORTUNITIES TO ACCELERATE GROWTH

Strategic capital investments in 2024 included:

- The relocation of our Action Stainless Houston facility to a 100,000-square-foot building with additional equipment to support our growing white metals distribution and fabrication business in the South and West;
- A new six-axis tube laser at our CTI operation in Romeoville, Illinois, and a new tube laser at Central Tube and Bar to enhance production operations that support our value-added fabrication business; and
- Automation and fabrication equipment to support our growing value-add processing capabilities, while simultaneously enhancing safety.

We have several additional projects expected to become operational in late 2025 or early 2026 including:

- A new cut-to-length line at our Minneapolis coil facility to support our growing galvanized business;
- A new high-speed specialty metal slitter to expand our Berlin Metals' capacity near Gary, Indiana;
- A new white metals cut-to-length line in Schaumburg, Illinois; and
- The automation of our Chambersburg, Pennsylvania, fabrication operation to improve safety, efficiency and expand capacity by more than 30%.

#### LEADERSHIP UPDATES

We believe that Olympic Steel's ability to succeed in all market conditions is directly attributed to the dedication and expertise of our team. I greatly appreciate the hard work, guidance and insight our people bring to their work every day, which they did exceptionally well in 2024.

We have formalized leadership development and succession strategies in place, and our approach to talent attraction and retention has helped ensure our continued resilience and growth. In 2024, key appointments and additions to our leadership team included:

- Zach Siegal was promoted to President of Manufactured Metal Products, a newly created business group in one of our most promising growth areas. Mr. Siegal will also continue to play a key role in our acquisition strategy.
- Eric Stuart was named President of Central Tube and Bar (CTB). Prior to his promotion, Mr. Stuart served as CTB's Chief Financial Officer/Vice President of Sales and Marketing.
- George Frost was promoted to Vice President of Aluminum, another strategic growth product for Olympic Steel.
- Anthony Dominic was promoted to Vice President Safety, Health and Environment (SH&E). Mr. Dominic joined Olympic Steel in 2018 and has more than 30 years of experience in SH&E.

We also want to recognize the many contributions of the Executive Chairman of our Board of Directors, *Michael Siegal*, who celebrated his 50<sup>th</sup> year with Olympic Steel. Mr. Siegal joined the company in 1974 and assumed the role of Chief Executive Officer in 1984 and was named Executive Chairman in 2019. Mr. Siegal has been instrumental in shaping our company over the past 50 years, and we continue to benefit from his guidance.

#### COMMITTED TO CONTINUOUS IMPROVEMENT IN SAFETY

Our commitment to operating safely and responsibly is unwavering. Our goal is always zero accidents and our mindset is focused on continuous improvement.

We are reinforcing and expanding our safety efforts to increase employee engagement, identify and act upon areas of highest risk and invest in safety improvements, with a focus on automation. We are expanding our safety team and enhancing our training and safety analysis programs. Safety is a primary consideration in our capital investments in new equipment and automation.

#### LOOKING AHEAD

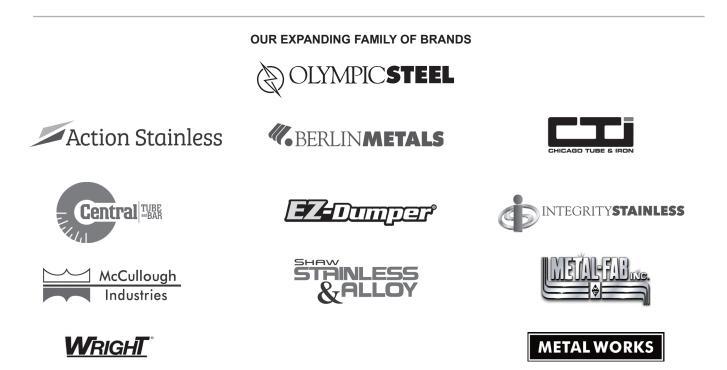

As Olympic Steel closes the books on 2024, we are confident we have the strength and resilience to produce profitable results regardless of market conditions. Even in a recessionary climate, we delivered on what has proven to be a successful strategy to diversify into higher-margin products and services, apply operational discipline across our business to remain profitable in all market conditions, and build on our legacy.

We continue to deliver long-term value for our shareholders with Olympic Steel's three-year total return of 44.4%, well above the NASDAQ composite average. In addition, in early 2025, our Board of Directors approved a 7% increase to our quarterly dividend. This is our fourth dividend increase since 2022, cumulatively raising our quarterly dividend from \$0.02 per share to \$0.16 per share – further reinforcing our commitment to create value for our shareholders.

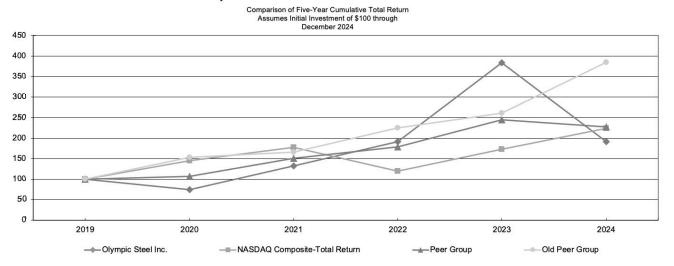

In closing, I would like to thank and congratulate the entire Olympic Steel team and alumni network on 70 years in business. Your hard work and dedication helped to build the company we are today, a company that is proving its ability to succeed in all market conditions. And, to my fellow shareholders, thank you for your ongoing trust and support. I believe our future is bright and the best is yet to come for Olympic Steel.

Sincerely,

Richard T. Marabito Chief Executive Officer March 28, 2025

#### **ITEM 1. BUSINESS**

#### The Company

We are a leading metals service center focused on the direct sale and value-added processing of carbon and coated sheet, plate and coil products; stainless steel sheet, plate, bar and coil; aluminum sheet, plate and coil; pipe, tube, bar, valves and fittings, tin plate and metal-intensive end-use products. We provide metals processing and distribution services for a wide range of customers. We operate in three reportable segments: specialty metals flat products, carbon flat products, and tubular and pipe products. Our specialty metals flat products segment's focus is on the direct sale and distribution of processed aluminum and stainless flat-rolled sheet and coil products, flat bar products, prime tin mill products and fabricated parts. Through acquisitions, our specialty metals flat products segment has expanded its geographical footprint and enhanced its product offerings in stainless steel and aluminum plate, sheet, angles, rounds, flat bar, tube and pipe and the manufacturing and distribution of stainless steel bollards and water treatment systems. Our carbon flat products segment's focus is on the direct sale and distribution of large volumes of processed carbon and coated flat-rolled sheet, coil and plate products and fabricated parts. Through acquisitions, our carbon flat products segment has expanded its product offerings to include selfdumping metal hoppers and steel and stainless-steel dump inserts for pickup truck and service bed trucks. Through the acquisition of Metal-Fab, Inc., or Metal-Fab, on January 3, 2023, the carbon flat products segment further expanded its product offerings to include venting, micro air and clean air products for residential, commercial and industrial applications. Through the recent acquisition of Metal Works, LLC, or Metal Works, on November 11, 2024, the carbon flat products segment further expanded its product offerings to include the manufacturing of service station canopies, deck clips, long gutters, trim, boat docks and solar canopy and ground racking components. Our tubular and pipe products segment's focus is on the distribution of metal tubing, pipe, bar, valves and fittings and the fabrication of parts supplied to various industrial markets. Through the acquisition of Central Tube and Bar, Inc., or CTB, on October 2, 2023, the tubular and pipe products segment further expanded its geographic footprint and extended its value-added contract manufacturing capabilities. We also perform toll processing of customer-owned metals. We sell certain products internationally, primarily in Canada and Mexico. International sales are immaterial to our consolidated financial results and to the individual segments' results.

We are incorporated under the laws of the State of Ohio. Our executive offices are located at 22901 Millcreek Boulevard, Suite 650, Highland Hills, Ohio 44122. Our telephone number is (216) 292-3800, and our website address is www.olysteel.com. We are not including the information on our website as a part of, or incorporating it by reference into, this Annual Report on Form 10-K.

### **Industry Overview**

The metals industry is comprised of three types of entities: metals producers, intermediate metals processors and metals service centers. Metals producers have historically emphasized the sale of metals to volume purchasers and have generally viewed intermediate metals processors and metals service centers as part of their customer base. However, all three types of entities can compete for certain customers who purchase large quantities of metals. Intermediate metals processors tend to serve as processors in large quantities for metals producers and major industrial consumers of processed metals.

Services provided by metals service centers can range from storage and distribution of unprocessed metal products to complex, precision value-added metals processing. Metals service centers respond directly to customer needs and emphasize value-added processing of metals pursuant to specific customer demands, such as cutting-to-length, slitting, shearing, roll forming, shape correction and surface improvement, blanking, tempering, plate burning, stamping, bending and welding. These processes produce metals to specified lengths, widths, shapes and surface characteristics through the use of specialized equipment. Metals service centers typically have lower cost structures than and provide services and value-added processing not otherwise available from, metals producers.

End product manufacturers and other metals users seek to purchase metals on shorter lead times and with more frequent and reliable deliveries than can normally be provided by metals producers. Metals service centers generally have lower labor costs than metals producers and consequently process metals on a more cost-effective basis. In addition, due to this lower cost structure, metals service centers are able to handle orders in quantities smaller than would be economical for metals producers. The benefits to customers purchasing products from metals service centers include lower inventory levels, lower overall cost of raw materials, more timely response and decreased manufacturing investment, time and expense. Customers also benefit from a lower investment in production labor, buildings and equipment, which allows them to focus on the engineering, assembly and marketing of their products. We believe that customers' demands for just-in-time delivery and their desires to outsource metal processing have made the value-added inventory, processing and delivery functions performed by metals service centers increasingly important.

### **Corporate History**

Our company was founded in 1954 as a general steel service center. In the late 1980s, our business strategy changed from a focus on warehousing and distributing steel from a single facility with no major processing equipment to a focus on geographic and product growth, customer diversity and value-added processing. An integral part of our growth has been the acquisition and start-up of processing and sales operations, and the investment in processing equipment. In 1994, we completed an initial public offering and, in 1996, we completed a follow-on offering of our common stock.

Over the years, our company has expanded into new product offerings through multiple acquisitions as well as expanding our fabricating an manufacturing capabilities. Our specialty metals flat products segment was established in 2015 and has expanded since its creation, with the acquisitions of Shaw Stainless & Alloy, Inc., or Shaw, Action Stainless & Alloys, Inc., or Action Stainless, and Berlin Metals, LLC. Our carbon flat products segment expanded into manufacturing metal intensive branded products with the acquisitions of Metal Works in 2024, Metal-Fab in 2023, McCullough Industries, or McCullough, and certain assets related to the manufacturing of the EZ Dumper® hydraulic dump inserts, or EZ Dumper. Our tubular and pipe products segment was established in 2011 and has expanded since its creation, most recently with the acquisition of CTB in 2023.

Michael D. Siegal began his career with us in the early 1970s and serves as our Executive Chairman of the Board of Directors. Mr. Siegal served as our Chief Executive Officer from 1984 through 2018. Richard T. Marabito has served as our Chief Executive Officer since January 2019. Mr. Marabito joined us in 1994 and served as our Chief Financial Officer from 2000 through 2018. Richard A. Manson has served as our Chief Financial Officer since January 2019. Mr. Marabito joined us in 1994 and served as our Chief Financial Officer from 2000 through 2018. Richard A. Manson has served as our Chief Financial Officer since January 2019. Mr. Manson has served in various capacities at our company since 1996, and previously served as our Vice President and Treasurer. Andrew S. Greiff has served as our President and Chief Operating Officer since January 2020. Mr. Greiff joined us in 2009 to lead our specialty metals business and has previously served as our Executive Vice President and Chief Operating Officer.

### **Business Strategy and Objectives**

We believe that the metals service center and processing industry is driven by the following primary trends: (i) shift by customers to fewer suppliers that are larger and financially strong; (ii) increased customer demand for more frequent deliveries, more value-added processing, higher quality products and services; (iii) localization of metals industry participants; and (iv) simplified supply chains.

In recognition of these industry trends, our focus has been on achieving profitable geographic and product growth through the start-up and acquisition of service centers, processors, fabricators and related businesses, increased diversification in higher-return opportunities to reduce the cyclicality inherent in our industry and investments in people, information systems, higher value-added processing equipment and services, while continuing our commitment to expanding and improving our operating efficiencies, sales and servicing efforts.

We are focused on specific operating objectives including: (i) improving safety performance; (ii) managing inventory turnover; (iii) managing operating expenses; (iv) providing on-time delivery and quality performance for our customers; (v) diversifying product offerings; (vi) profitably growing our market share; (vii) increasing and providing more consistent returns; (viii) maintaining targeted cash turnover rates and (ix) investing in technology and business information systems.

These operating objectives are supported by:

- A set of core values, which are communicated, practiced, measured and rewarded throughout the Company.
- Our commitment to providing a safe work environment and promoting employee health and well-being through automation, continuous improvement activities, education and communication.
- An internal communications program designed to engage and motivate employees to support our strategy, values and culture.
- Our "flawless execution" program, or Fe program, an internal continuous improvement program that rewards employees who achieve profitable growth by delivering superior customer service and exceeding customer expectations.
- Operational initiatives designed to improve efficiencies and reduce costs by improving and automating processes and creating an environment to facilitate change and improve the way we work and create value.
- Information systems and key metric reporting to focus managers on achieving specific operating objectives.
- Alignment of compensation with the financial objectives and performance of the Company and the achievement of specific financial and operating objectives.

We believe our depth of management experiences, facilities, locations, processing capabilities, inventory, focus on safety, quality and customer service, extensive and experienced sales force, and the strength of our customer and supplier relationships provide a strong foundation for implementation of our strategy and achievement of our objectives. Certain elements of our strategy are set forth in more detail below.

*Investments and Acquisitions*. During the past three years, we have accelerated our growth through acquisitions and capital investments in facilities and processing equipment.

On November 11, 2024, we acquired substantially all of the net assets of Metal Works, based in Oakwood, Georgia. Metal Works is a manufacturer of service station canopies and the business also manufactures deck clips, long gutters, trim and boat docks, as well as solar canopy and ground racking components. The acquisition expanded our carbon flat products segment's product offerings.

On October 2, 2023, we acquired all membership interest of CTB, headquartered in Conway, Arkansas with operations also located in Tulsa, Oklahoma. CTB offers a range of value-added fabrication services, including tube laser cutting, tube bending, robotic welding, flat laser burning and brake press forming. The acquisition expanded our tubular and pipe products segment's fabrication capabilities for the transportation, agricultural, commercial furniture and data center construction industries.

On January 3, 2023, we acquired all of the outstanding shares of capital stock of Metal-Fab, headquartered in Wichita, Kansas. Metal-Fab is a manufacturer of venting, micro air and clean air products for residential, commercial and industrial applications. The acquisition expanded our portfolio of metal-intensive end-use products and widened our product offerings, manufacturing capabilities and geographic reach.

On June 1, 2022, we began operating an 81,400 square-foot metal fabrication facility, located in Bartlett, Illinois. This new facility is fabrication focused with an emphasis on specialty metals flat-rolled products and downstream value-added services. The transfer of the fabrication business to Bartlett, Illinois also supports our growth plans for the cut-to-length and distribution business out of the Schaumburg, Illinois facility. To support the growth of our fabrication services, the new Bartlett facility houses lasers and press brakes.

In addition to the acquisitions noted above, our capital investments during the past three years have primarily consisted of additional processing and automation equipment for all three of our segments.

When the results of sales and marketing efforts and our financial justifications indicate that there is sufficient customer demand for a particular product, process or service, we may purchase equipment to satisfy that demand. We also evaluate our existing equipment to ensure that it remains productive, and we upgrade, replace, redeploy or dispose of equipment when necessary. We invest in processing equipment to support customer demand and to respond to the growing trend among OEMs (our customers) to outsource non-core production processes, such as plate processing, machining, welding and fabrication, in order to concentrate on engineering, design and assembly.

*Sales and Marketing.* We believe that our commitments to quality, service, just-in-time delivery and field sales personnel have enabled us to build and maintain strong customer relationships. We continuously analyze our customer base to ensure that strategic customers are properly targeted and serviced, while focusing our efforts to supply and successfully service multi-location customers from multiple Olympic Steel facilities. We service certain customers with carbon and specialty metals flat products and tubular and pipe products through cross-stocking of products in certain facilities.

We offer business solutions to our customers through value-added and value-engineered services. We also provide inventory stocking programs and in-plant Olympic Steel employees located at certain customer facilities to help reduce customers' costs. Our dedicated carrier fleet further enhances our just-in-time deliveries based on our customers' requirements.

Our Fe program is a commitment to provide superior customer service while striving to exceed customer expectations. This program includes tracking on-time delivery and quality performance against objectives, and recognition of employee initiatives to improve efficiencies, streamline processes or reduce operating expenses at each operation.

We believe our large and experienced sales force provides strategic advantages. Our sales force makes direct daily sales calls to customers throughout the continental United States, and parts of Canada and Mexico. The continuous interaction between our sales force and active and prospective customers provides us with valuable market information and sales opportunities, including opportunities for outsourcing, improving customer service and increasing sales.

Our sales efforts are further supported by a customer relationship management system, metallurgists, engineers, technical and quality service personnel and product specialists who have specific expertise in carbon and stainless steel, aluminum, alloy plate and steel fabrication as well as tubular and pipe products. Our services for certain customers also include integration into our internal business systems to provide cost efficiencies for both us and our customers.

*Management.* We believe one of our strengths is the depth, knowledge and experience of our management team. In addition to our executive officers, members of our senior management team have a diversity of backgrounds within the metals industry, including management positions at metals producers and other metals service centers. They average 27 years of experience in the metals industry and 17 years with our company. We have a succession planning and leadership development process in place, which allows us to further enhance our management team by the promotions of employees to senior management positions within the organization.

### Products, Processing Services and Quality Standards

We carry a wide selection of metals products and grades, ranging from commercial quality to ultra-high strength steel and specialty metals including;

- Stainless steel and aluminum coil and sheet products, angles, rounds and flat bar;
- Alloy, heat treated and abrasion resistant coil, sheet and plate;
- Tin mill products including electrolytic tinplate, electrolytic chromium coated steel and black plate;
- Coated metals including galvanized, galvannealed, electro galvanized, advanced high strength steels, aluminized, and automotive grades of steel;
- Cold rolled carbon including commercial quality, advanced high strength steel, drawing steel and automotive grades, cold rolled steel coil and sheet products;
- Hot rolled carbon including hot rolled coil, sheet and plate steel products including pickled and oiled, automotive grades, advanced high strength steels, and high strength low alloys; and
- Tube, pipe & bar products including round, square, and rectangular mechanical and structural tubing; hydraulic and stainless tubing; boiler tubing; carbon, stainless, and aluminum pipe; and valves and fittings.

With the acquisitions of EZ Dumper and McCullough, we manufacture hydraulic dump inserts and self-dumping hoppers. With the acquisition of Shaw, we manufacture and distribute stainless steel bollards and water treatment systems. With the acquisition of Metal-Fab, we manufacture venting, micro air and clean air products for residential, commercial and industrial applications. With the acquisition of Metal Works, we manufacture service station canopies, deck clips, long gutters, trim and boat docks, as well as solar canopy and ground racking components.

Customer orders are entered or electronically transmitted into computerized order entry systems, and appropriate inventory is selected and scheduled for processing in accordance with the customer's specified delivery date. We attempt to maximize yield and equipment efficiency through the use of computer software and by combining customer orders for processing each coil, plate, tube or pipe to the fullest extent practicable.

Our traditional service center and higher value-added processes include;

- Cut-to-length cutting metal along the width of the coil, or to desired lengths;
- Slitting cutting metal to specified widths along the length of the coil;
- Shearing the process of cutting sheet metal;
- Blanking cutting metal into specific shapes with close tolerances;
- Tempering cold rolling process that improves the uniformity of the thickness and flatness of the metals;
- Stretcher-leveling stretching process that improves the uniformity of the thickness and flatness of the metals;
- Plate and laser processing cutting metal into specific shapes and sizes via laser, plasma and flame cutting;
- Forming and machining bending, drilling, milling, tapping, boring and sawing metal;
- Tube processing tube bending and end finishing;
- Finishing shot blasting, grinding, edging, threading and grooving, beveling and polishing;
- Fabrication machining, welding, assembly, painting and kitting of component parts; and
- Value added services, including saw cutting, laser cutting, beveling, threading and grooving.

The flat products segment is separated into two reportable segments; specialty metals flat products and carbon flat products. The flat products segments' assets and resources are shared by the specialty metals and carbon flat products segments and both segments' products are, in some instances, stored in shared facilities and processed on shared equipment.

The following table sets forth, as of December 31, 2024, the major pieces of processing equipment in operation by segment:

|                      | Consolidated  | Tubular and   |       |
|----------------------|---------------|---------------|-------|
| Processing Equipment | Flat Products | Pipe Products | Total |
| Cut-to-length        | 26            | 18            | 44    |
| Slitting             | 13            | -             | 13    |
| Shearing             | 10            | -             | 10    |
| Blanking             | 3             | -             | 3     |
| Tempering            | 3             | -             | 3     |
| Stretcher-leveling   | 2             | -             | 2     |
| Plate processing     | 29            | -             | 29    |
| Laser processing     | 31            | 24            | 55    |
| Forming              | 38            | -             | 38    |
| Machining            | 39            | 67            | 106   |
| Tube processing      | -             | 40            | 40    |
| Finishing            | 45            | 5             | 50    |
| Painting             | 3             | 1             | 4     |
| Total                | 242           | 155           | 397   |

Our quality assurance system, led by certified specialists and engineers, establishes controls and procedures covering all aspects of our products from the time the material is ordered through receipt, processing and shipment to the customer. These controls and procedures encompass periodic supplier and customer audits, workshops with customers, inspection equipment and criteria, preventative actions, material traceability and certification. We have quality labs for tensile testing at several of our facilities, including at our facilities in Cleveland, Ohio, Minneapolis, Minnesota, Buford, Georgia and Bettendorf, Iowa and an Underwriters Laboratory (UL) for electrical products testing at our facility in Wichita, Kansas.

In addition, 32 of our facilities have earned International Organization for Standardization (ISO) 9001:2015 certifications. Our office building in Winder, Georgia has received the Leadership in Energy and Environmental Design (LEED) certification.

#### **Customers and Distribution**

We have a diverse customer and geographic base, which helps to reduce the inherent risk and cyclicality of our business. Net sales to our top three customers, in the aggregate, approximated 9%, 8% and 7% of our consolidated net sales in 2024, 2023 and 2022, respectively. We serve customers in metals consuming industries, including manufacturers and fabricators of transportation and material handling lift equipment, construction, mining and farm equipment, storage tanks, environmental and energy generation equipment, automobiles, food service and electrical equipment, as well as general and plate fabricators and metals service centers.

The table below shows the percentage of our consolidated net sales to the largest industries for the past three years.

| Industry                                                               | 2024 | 2023 | 2022 |
|------------------------------------------------------------------------|------|------|------|
| Industrial machinery and equipment manufacturers and their fabricators | 49%  | 48%  | 52%  |
| Metals service centers                                                 | 7%   | 9%   | 9%   |
| Transportation equipment manufacturers                                 | 7%   | 8%   | 8%   |
| Residential and commercial construction                                | 7%   | 6%   | 7%   |
| Agricultural and farm equipment                                        | 6%   | 6%   | 5%   |
| End use products                                                       | 6%   | 6%   | 1%   |
| All others <5%                                                         | 18%  | 17%  | 18%  |

While we ship products throughout the United States, most of our customers are located in the Midwest, South and Northeast regions of the United States. Most customers are located within a 250-mile radius of one of our processing facilities, thus enabling an efficient delivery system capable of handling a high frequency of short lead time orders. We transport our products directly to customers via a dedicated carrier fleet, which further supports the just-in-time delivery requirements of our customers, and third-party trucking firms.

We process our metals to specific customer orders as well as for stocking programs. Many of our larger customers commit to purchase on a regular basis at agreed upon or indexed prices for periods ranging from three to twelve months. To help mitigate price volatility risks, these price commitments are generally matched with corresponding supply arrangements, or to a lesser degree by commodities hedging. Customers notify us of specific release dates as processed products are required. Customers typically notify us of release dates anywhere from a just-in-time basis to one month before the release date. Therefore, we are required to carry sufficient inventory to meet the short lead time and just-in-time delivery requirements of our customers.

### **Raw Materials**

Our principal raw materials are carbon, coated, and stainless steel and aluminum, in the forms of pipe, tube, flat-rolled sheet, coil and plate that we typically purchase from multiple primary metals producers. The metals industry as a whole is cyclical and at times pricing and availability of material can be volatile due to numerous factors beyond our control, including general domestic and global economic conditions; domestic and global supply and demand imbalance; competition; quickly changing lead times and late deliveries from metals producers; fluctuations in the costs of raw materials necessary to produce metals; import duties; tariffs and quotas; and currency exchange rates. This volatility can significantly affect the availability and cost of raw materials to us.

Inventory management is a key profitability driver in the metals service center industry. Similar to many other metals service centers, we maintain substantial inventories of metals to accommodate the short lead times and just-in-time delivery requirements of our customers. Accordingly, we purchase metals in an effort to maintain our inventory at levels that we believe to be appropriate to satisfy the anticipated needs of our customers based upon historic buying practices, purchase forecasts and commitments with customers, supplier lead times and market conditions.

Our commitments to purchase metals are generally at prevailing market prices in effect at the time we place our orders, with some fixed-price purchase agreements that support fixed-price sales agreements. We enter into pass through nickel swaps at the request of our customers in order to mitigate our customers' risk of volatility in the price of metals. The swaps are settled with the brokers at maturity and the economic benefit or loss arising from the changes in fair value of the swaps is contractually passed through to the customer. When metals prices decline, customer demands for lower prices and our competitors' responses to those demands could result in lower sale prices and, consequently, lower gross profits and earnings as we use existing metals inventory. When metals prices increase, competitive conditions will influence how much of the price increase we can pass on to our customers.

### Suppliers

We concentrate on developing supply relationships with reliable high-quality domestic and international metals producers, using a coordinated effort to be the customer of choice for business critical suppliers. We employ sourcing strategies that maximize the quality, production lead times and transportation economies of a global supply base. As a result of our sourcing strategies, approximately 90% of the steel we purchase is from domestic suppliers; thus, limiting our exposure to the inherent risk of foreign supply chains, such as the lead time, valuation and foreign policy risk. We are an important customer of flat-rolled coil and plate, pipe and tube for many of our principal suppliers, but we are not dependent on any one supplier. We purchase in bulk from metals producers in quantities that are efficient for such producers. This enables us to maintain a continued source of supply that we believe is competitively priced. We believe the access to our facilities and equipment, and our high quality customer services and solutions, combined with our long-standing prompt pay practices, will continue to be important factors in maintaining strong relationships with metals suppliers.

The metals producing supply base has experienced significant consolidation, with a few suppliers accounting for a majority of the domestic carbon flat-rolled steel market. We purchased approximately 38% and 40% of our total metals requirements from our three largest suppliers in 2024 and 2023, respectively. Although we have no long-term supply commitments, we have a long history with many mills and believe we have good relationships with our metals suppliers, resulting in competitively priced materials and timely deliveries. If, in the future, we are unable to obtain sufficient amounts of metals on a timely basis, we can also look to alternative sources but these may be at less competitive prices. In addition, extreme material interruptions or reductions in our supply of metals could impede our customers' just-in-time delivery requirements, which could have a material adverse effect on our business; however, this risk is mitigated through the vast network of suppliers that provide us metal today.

### Competition

Our principal markets are highly competitive. We compete with other public and private regional and national metals service centers, single location service centers and, to a certain degree, metals producers and intermediate metals processors on a regional basis. We have different competitors for each of our products and within each region. We compete on the basis of price, product selection and availability, customer service, value-added capabilities, quality, financial strength and geographic proximity. Certain of our competitors have greater financial and operating resources than we have.

With the exception of certain Canadian or Mexican operations, foreign-located metals service centers are generally not a material competitive factor in our principal domestic markets.

### Management Information Systems

Information systems and technology are important components of our strategy. We have invested in technologies and related personnel as a foundation for growth. We depend on our Enterprise Resource Planning, or ERP, systems for financial reporting, management decision-making, inventory management, order tracking and fulfillment and production optimization. We continue to upgrade and consolidate our systems for optimal use of resources and to assure we are taking advantage of appropriate technology offerings.

Our information systems focus on the following core application areas:

*Inventory Management.* Our information systems track the status, quantity and cost of inventories by product, location and process in real time. This information is essential to optimize inventory management.

*Differentiated Services To Customers.* Our information systems support value-added services to customers, including quality control and on-time delivery monitoring and reporting, just-in-time inventory management and shipping services.

*E-Commerce and Advanced Customer Interaction*. We are actively participating in electronic commerce initiatives to reduce processing cost and time. In addition to full electronic data interchange, or EDI, capabilities with our customers and vendors, we also have implemented extranet sites for specific customers.

*System and Process Enhancements.* We continue to implement ERP systems to provide standardized business processes, enhanced inventory management, production cost, sales administrative controls and reduced technical support requirements. Our business analysts work with our quality team to identify opportunities for efficiency and improved customer service. We collaborate across the metal supply chain, working with metals producers, service providers, customers, and industry-sponsored organizations to develop industry processing standards to drive cost out of the supply chain.

Information security and continuous availability of information processing are of highest priority. Our information professionals employ security and monitoring practices, controls, education and tools to mitigate cybersecurity risks and threats. In case of physical emergency or threat, our ERP systems, accounting systems, internet and communications systems are duplicated at an off-site computing facility or through, multi-site cloud providers.

### **Automation Initiatives**

We believe that investing in processing automation solutions is an important component in realizing our profitable growth strategy. We have made investments in automated packaging, material handling and welding, among other solutions, to gain production efficiencies, decrease production costs, improve safety conditions for our employees and to ease labor shortage risks.

### Human Capital Management

Our employees are our most valued resource. The unique insights and experiences of our team are what fuel our safe, profitable growth. We want our teams to actively participate in the communities where we live and work. We have a focus on inclusion, with a culture committed to cultivating leaders who value, support and celebrate different thoughts and perspectives. We work to attract a qualified workforce through an inclusive and accessible recruiting process that utilizes online recruiting, campus outreach, internships and job fairs. We seek to retain and develop employees by offering competitive wages, benefits and training opportunities, as well as promoting a safe and healthy workplace culture.

Our safety motto is, "Safety first. Always. And, it starts with me!". We are relentlessly focused on safety. Through best practice sharing and an emphasis on leading indicators, we are strengthening our safety culture of learning and building a safer work environment. We believe that engagement from every employee is critical. Our Safety Committees at each division help us increase engagement, while emphasizing our proactive commitment to safety. Near-miss reports, safety improvement actions, risk assessments, job safety analyses and weekly safety audits/walks are some of the ways we contribute to our safety culture of learning and growth. While we diligently manage safety policies, programs, and training on an ongoing basis, we believe our employee-driven safety culture has the biggest impact.

We strive to comply with all applicable state, local and international laws governing nondiscrimination in employment in every location in which we operate. All applicants and employees are treated with the same high level of respect regardless of their gender, ethnicity, religion, national origin, age, marital status, political affiliation, sexual orientation, gender identity, disability, veteran or other protected status. Our core values (Accountability, Corporate Citizenship, Customer Satisfaction, Employee Development, Financial Stability, Integrity, Respect, Safety and Teamwork) guide our decisions and behavior and set a standard of excellence that rewards our employees.

At December 31, 2024, we employed approximately 2,163 people. Approximately 229 of the hourly plant personnel are represented by seven separate collective bargaining units. The table below shows the expiration dates of the collective bargaining agreements.

| Facility                       | Expiration date    |
|--------------------------------|--------------------|
| Locust, North Carolina         | March 4, 2025      |
| St. Paul, Minnesota            | May 25, 2025       |
| Romeoville, Illinois           | May 31, 2025       |
| Minneapolis (coil), Minnesota  | September 30, 2025 |
| Indianapolis, Indiana          | January 29, 2026   |
| Minneapolis (plate), Minnesota | March 31, 2027     |
| Hammond, Indiana               | November 30, 2029  |

The Locust, North Carolina union agreement is set to expire on March 4, 2025. The employees covered by this union agreement continue to work as the new contract is negotiated. We have historically been successful in negotiating renewals to expiring agreements without any material disruptions of operating activities and we do not anticipate any material disruptions prior to ratification of the new agreement.

We have never experienced a work stoppage and we believe that our relationship with employees is strong. However, any prolonged work stoppages by our personnel represented by collective bargaining units could have a material adverse impact on our business, financial condition, results of operations and cash flows.

### Environmental

Olympic Steel is a metals service center. We warehouse, process, and distribute metal products; however, we are not a metals producer (steel mill). As such, we do not have the same potential to introduce pollutants into the water or the air that occur during some other metals manufacturing processes. Instead, we are part of the supply chain that makes products out of metal. We buy metal products in bulk from metal producers. Then, our role as a metals service center is to break that bulk supply into smaller quantities to sell to our customers. We also support OEMs and other customers by cutting, shaping, and otherwise processing carbon steel, stainless steel and aluminum.

While we do not make metals, we do recycle scrap material that mills re-use in their process to make raw materials. The work we do to process metals for our customers does not distribute pollutants into the water supply, nor do we do any mining or extract materials from the ground. While we believe our carbon footprint is small, we are still taking steps to further reduce our overall environmental impact.

We are committed to responsible environmental management practices and attempt to prevent pollution by identifying opportunities and improving environmental performance in all aspects of our business. Our facilities are subject to certain federal, state and local requirements relating to the protection of the environment. We believe that we are in material compliance with all environmental laws, do not anticipate any material expenditure to meet environmental requirements and do not believe that compliance with such laws and regulations will have a material adverse effect on our business, financial condition, results of operations and cash flows.

### Service Marks, Trade Names and Patents

We conduct our business under the name "Olympic Steel." A provision of federal law grants exclusive rights to the word "Olympic" to the U.S. Olympic Committee. The U.S. Supreme Court has recognized, however, that certain users may continue to use the word based on long-term and continuous use. We have used the name Olympic Steel since 1954, but are prevented from registering the name "Olympic" and from being qualified to do business as a foreign corporation under that name in certain states. In such states, we have registered under different names, including "Oly Steel" and "Olympia Steel." Our wholly-owned subsidiary, Olympic Steel Iowa, Inc., does business in certain states under the name "Oly Steel Iowa, Inc." Our wholly owned subsidiary, IS Acquisition, Inc., does business under the name "Integrity Stainless." Our CTI operation conducts business under the name "CTI Power." Our operation in Monterrey, Mexico operates under the name "Metales de Olympic S. de R.L. de C.V." Our wholly owned subsidiary, B Metals, Inc., does business under the name "Berlin Metals." Our wholly owned subsidiary, MCI, Inc., does business under the name "McCullough Industries" and we conduct business under the name "EZ Dumper" for certain of our products. Our wholly owned subsidiary, ACT Acquisition, Inc., does business under the name "Shaw Stainless & Alloys".

The registered trademarks "DYNAGUARD", "DG", "MF", "METAL-FAB", "METAL-FAB INC.", "TEMP/GUARD", "MICRO AIR", "CORR/GUARD", "ROTO-PULSE", "MISTMAX", "HYDROMAX", and "FORCE" were acquired in conjunction with the acquisition of Metal-Fab.

We hold a trademark for our stainless steel sheet and plate product "OLY-FLATBRITE", which has a unique combination of surface finish and flatness and for our "WRIGHT" self-dumping metal hoppers produced by McCullough. The registered trademark "ACTION STAINLESS" was acquired in conjunction with the asset acquisition of Action Stainless.

The "MetalWorks" tradename was acquired by us in conjunction with the asset acquisition of Metal Works.

The "EZ DUMPER®" tradename was acquired by us in conjunction with the acquisition of certain assets related to the manufacturing of the EZ Dumper hydraulic dump inserts.

The registered tradenames "SHAW STAINLESS" and "SHAW STAINLESS & ALLOY" were acquired by us in conjunction with the asset acquisition of Shaw Stainless.

We hold a patent for a certain welding fume collector, the apparatus and associated methodology, used during the process of welding which was acquired in conjunction with the acquisition of Metal-Fab. We also hold patents for certain bollard coverings and methods of manufacturing and use thereof which were acquired in conjunction with the asset acquisition of Shaw Stainless.

### **Government Regulation**

Our operations are governed by many laws and regulations, including those relating to workplace safety and worker health, principally the Occupational Safety and Health Act and regulations thereunder. We believe that we are in material compliance with these laws and regulations and do not believe that future compliance with such laws and regulations will have a material adverse effect on our business, financial condition, results of operations and cash flows.

### Seasonality

Seasonal factors may cause demand fluctuations within the year, which could impact our results of operations. Typically, demand in the first half of the year is stronger than the second half of the year, as it contains more ship days and is not impacted by the seasonal customer shut-downs in July, November and December due to holidays.

### **Effects of Inflation**

Inflation generally affects us by increasing the cost of employee wages and benefits, transportation services, energy, borrowings under our credit facility, processing equipment, and purchased metals. Although general inflation, excluding increases in the price of metals and increased labor expense, has increased during 2024, it has not had a material effect on our financial results during the past three years, but may have a significant impact in future years.

### **Available Information**

We file annual, quarterly, and current reports, proxy statements, and other documents with the Securities and Exchange Commission, or SEC, under the Securities Exchange Act of 1934, or the Exchange Act. The SEC maintains an Internet website that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The public can obtain any documents that are filed by the Company at http://www.sec.gov.

In addition, our annual reports on Form 10-K, as well as our quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to all of the foregoing reports, are made available free of charge on or through the "Investors" section of our website at www.olysteel.com as soon as reasonably practicable after such reports are electronically filed with or furnished to the SEC.

Information relating to our corporate governance at Olympic Steel, including our commitments to operating responsibly, our Business Ethics Policy, information concerning our executive officers, directors and Board committees (including committee charters), and transactions in our securities by directors and officers, is available free of charge on or through the "Investors" section of our website at www.olysteel.com. We are not including the information on our website as a part of, or incorporating it by reference into, this Annual Report on Form 10-K.

### **Forward-Looking Information**

This Annual Report on Form 10-K and other documents we file with the SEC contain various forward-looking statements that are based on current expectations, estimates, forecasts and projections about our future performance, business, our beliefs and our management's assumptions. In addition, we, or others on our behalf, may make forward-looking statements in press releases or written statements, or in our communications and discussions with investors and analysts in the normal course of business through meetings, conferences, webcasts, phone calls and conference calls. Words such as "may," "will," "anticipate," "should," "intend," "expect," "believe," "estimate," "project," "plan," "potential," and "continue," as well as the negative of these terms or similar expressions are intended to identify forward-looking statements, which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to certain risks and uncertainties that could cause our actual results to differ materially from those implied by such statements including, but not limited to, those set forth in Item 1A (Risk Factors) below and the following:

- supply disruptions and inflationary pressures, including the availability and rising costs of labor and energy;
- risks associated with shortages of skilled labor, increased labor costs and our ability to attract and retain qualified personnel;
- risks of volatile metals prices and inventory devaluation;
- rising interest rates and their impacts on our variable interest rate debt;
- supplier consolidation or addition of new capacity;
- the levels of imported steel in the United States, imposed tariffs and duties on imported and exported steel or other products, U.S. trade policy and its impact on the U.S. manufacturing industry;
- risks associated with economic sanctions, and current global conflicts, or additional war, military conflict, or hostilities could adversely affect global metals supply and pricing;
- general and global business, economic, financial and political conditions, including, but not limited to, recessionary conditions and legislation passed under the current administration;
- reduced production schedules, layoffs or work stoppages by our own, our suppliers' or customers' personnel;
- our ability to successfully integrate recent acquisitions, including CTB, Metal-Fab and Metal Works, into our business and risks inherent with the acquisitions in the achievement of expected results, including whether the acquisition will be accretive and within the expected timeframe;
- the adequacy of our existing information technology and business system software, including duplication and security processes;
- the inflation or deflation existing within the metals industry, as well as product mix and inventory levels on hand, which can impact our cost of materials sold as a result of the fluctuations in the last-in, first-out, or LIFO, inventory valuation;
- competitive factors such as the availability, and global pricing of metals and production levels, industry shipping and inventory levels and rapid fluctuations in customer demand and metals pricing;
- risks associated with the infectious disease outbreaks, including, but not limited to customer closures, reduced sales and profit levels, slower payment of accounts receivable and potential increases in uncollectible accounts receivable, falling metals prices that could lead to lower of cost or net realizable value inventory adjustments and the impairment of intangible and long-lived assets, negative impacts on our liquidity position, inability to access our traditional financing sources and increased costs associated with and less ability to access funds under our assetbased credit facility, or ABL Credit Facility, and the capital markets;
- increased customer demand without corresponding increase in metal supply could lead to an inability to meet customer demand and result in lower sales and profits;
- cyclicality and volatility within the metals industry;
- customer, supplier and competitor consolidation, bankruptcy or insolvency;
- the timing and outcomes of inventory lower of cost or net realizable value adjustments and LIFO income or expense;
- fluctuations in the value of the U.S. dollar and the related impact on foreign steel pricing, U.S. exports, and foreign imports to the United States;
- reduced availability and productivity of our employees, increased operational risks as a result of remote work arrangements, including the potential effects on internal controls, as well as cybersecurity risks and increased vulnerability to security breaches, information technology disruptions and other similar events;
- the successes of our efforts and initiatives to improve working capital turnover and cash flows, and achieve cost savings;

- risks and uncertainties associated with intangible assets, including impairment charges related to indefinite lived intangible assets;
- our ability to generate free cash flow through operations and repay debt;
- the impacts of union organizing activities and the success of union contract renewals;
- the amounts, successes and our ability to continue our capital investments and strategic growth initiatives, including acquisitions and our business information system implementations;
- events or circumstances that could adversely impact the successful operation of our processing equipment and operations;
- changes in laws or regulations or the manner of their interpretation or enforcement could impact our financial performance and restrict our ability to operate our business or execute our strategies;
- events or circumstances that could impair or adversely impact the carrying value of any of our assets;
- our ability to pay regular quarterly cash dividends and the amounts and timing of any future dividends;
- our ability to repurchase shares of our common stock and the amounts and timing of repurchases, if any;
- our ability to sell shares of our common stock under the at-the-market equity program; and
- unanticipated developments that could occur with respect to contingencies such as litigation, arbitration and environmental matters, including any developments that would require any increase in our costs for such contingencies.

Should one or more of these or other risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, intended, expected, believed, estimated, projected or planned. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. We undertake no obligation to republish revised forward-looking statements to reflect the occurrence of unanticipated events or circumstances after the date hereof, except as otherwise required by law.

### **ITEM 1A. RISK FACTORS**

In addition to the other information in this Annual Report on Form 10-K and our other filings with the SEC, the following risk factors should be carefully considered in evaluating us and our business before investing in our common stock. The risks and uncertainties described below are not the only ones facing us. Additional risks and uncertainties, not presently known to us or otherwise, may also impair our business. Although the risks are organized by headings, and each risk is discussed separately, many are interrelated. If any of the risks actually occur, our business, financial condition or results of operations could be materially and adversely affected. In that case, the trading price of our common stock could decline, and investors may lose all or part of their investment.

### **Risks Related to our Business**

## Quotas and tariffs imposed or removed as a result of government actions can cause significant fluctuations in our operating results.

Global demand and global metals pricing, supply and demand are impacted by quotas and tariffs imposed as a result of government actions. The tariffs initiated by the U.S. government in 2018 under Section 232 of the Trade Expansion Act of 1962 (section 232 tariffs) resulted in increased metals prices in the United States. Effective January 1, 2022, the United States and the European Union replaced the existing 25 percent tariff on EU steel products and 10 percent tariff on EU aluminum products with a tariff-rate quota, or TRQ. Under the TRQ arrangement, historically based volumes of EU steel and aluminum products will enter the U.S. without application of Section 232 duties subject to certain conditions. The removal and addition of country-specific tariffs has caused uncertainty in the metals marketplace. Recently, in February 2025, the U.S. government announced the reinstatement of a 25 percent tariff on all steel imports and an increase in aluminum tariffs from 10 percent to 25 percent. The proposed tariffs would apply to goods entered into the U.S. for consumption or withdrawn from a warehouse for consumption on or after March 12, 2025. These recently announced or any additional future tariffs or quotas imposed on steel and aluminum imports may increase the price of metal, which may impact our sales, gross margin and profitability if we are unable to pass the increased prices onto our customers. The prolonged imposition of tariffs could also lead to additional trade disputes that could impact the global demand for metals and impact our sales, gross margin and profitability. Conversely, the removal of existing tariffs could cause the price of metal to decline, which may impact our sales, gross margin and profitability.

### Volatile metals prices can cause significant fluctuations in our operating results. Our sales and operating income could decrease if we are unable to pass producer price increases on to our customers or if metals prices decline.

Our principal raw materials are carbon and stainless steel and aluminum flat-rolled coil, sheet, plate, prime tin mill, pipe and tube that we typically purchase from multiple primary metals producers. The metals industry as a whole is cyclical and, at times, pricing and availability of metals can be volatile due to numerous factors beyond our control, including general domestic and international economic conditions, sales levels, competition, levels of inventory held by other metals service centers, producer lead times, higher raw material costs for the producers of metals, imports, import duties and tariffs and currency exchange rates. This volatility can significantly affect the availability and cost of raw materials to us. For example, during 2022, metals prices decreased 57% throughout the year, whereas during 2023, metals prices decreased 45% from April to September and increased 66% from October to December and then metals prices decreased 40.3% from December 2023 to July 2024.

Similar to many other metals service centers, we maintain substantial inventories of metals to accommodate the short lead times and just-in-time delivery requirements of our customers. Accordingly, we purchase metals in an effort to maintain our inventory at levels that we believe to be appropriate to satisfy the anticipated needs of our customers based upon historic buying practices, supply agreements with customers and market conditions. Our commitments to purchase metals are generally at prevailing market prices in effect at the time we place our orders. We have no long-term, fixed-price metals purchase contracts. When metals prices increase, competitive conditions will influence how much of the price increase we can pass on to our customers. To the extent we are unable to pass on future price increases in our raw materials to our customers, the net sales and profitability of our business could be adversely affected. Declining metals prices, customer demand for lower prices and our competitors' responses to those demands could result in lower sale prices and, consequently, lower gross profits as we use existing inventory. Significant or rapid declines in metals prices or reductions in sales volumes could adversely impact our ability to remain in compliance with certain financial covenants in our credit facility, as well as result in us incurring inventory or asset impairment charges. Changing metals prices therefore could significantly impact our net sales, gross profit, operating income and net income, and could impair or adversely impact the carrying value of any of our assets.

#### An interruption in the sources of our metals supply could have a material adverse effect on our results of operations.

We purchased approximately 38% and 40% of our total metals requirements from our three largest suppliers in 2024 and 2023, respectively. Over the past years, supplier consolidation, decreased mill production due to the pandemic and import tariffs decreased steel availability and increased mill lead times and steel prices. Fewer available suppliers increases the risk of supply disruption through both scheduled and unscheduled supplier outages. Conversely, the addition of new mill production and decreased domestic demand could lead to domestic over capacity, which could lead to a decrease in steel prices, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We have no long-term supply commitments with our metals suppliers. If, in the future, we are unable to obtain sufficient amounts of metals on a timely basis, we may not be able to obtain metals from alternate sources at competitive prices. In addition, late deliveries, interruptions or reductions in our supply of metals could make it difficult to satisfy our customers' just-in-time delivery requirements, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

### We service industries that are highly cyclical, and any fluctuation in our customers' demand could impact our sales, gross profits and profitability.

We sell our products in a variety of industries, including capital equipment manufacturers for industrial, agricultural and construction use, the automotive industry, the utilities industry, and manufacturers of fabricated metals products. Numerous factors, such as general economic conditions, fluctuations in the U.S. dollar, government stimulus or regulation, availability of adequate credit and financing, interest rates, consumer confidence, significant business interruptions, labor shortages or work stoppages, energy prices, seasonality, customer inventory levels and other factors beyond our control, may cause significant demand fluctuations from one or more of these industries. Any fluctuation in demand within one or more of these industries may be significant and may last for a lengthy period of time. In periods of economic slowdown or recession in the United States, excess customer or service center inventory or a decrease in the prices that we can realize from sales of our products to customers in any of these industries could result in lower sales, gross profits and profitability.

Approximately 49% and 48% of our 2024 and 2023 consolidated net sales, respectively, were to industrial machinery and equipment manufacturers and their fabricators. Due to the concentration of customers in the industrial machinery and equipment industry, a decline in production levels in that industry could result in lower sales, gross profits and profitability.

### Our business is dependent on transportation and labor. Increases in the cost or availability of transportation or labor could adversely affect our business and operations, as we may be unable to pass cost increases on to our customers.

We ship products throughout the United States via a dedicated carrier fleet or by third-party trucking firms. Our business depends on the daily transportation of a large number of products. We depend to a certain extent on third parties for transportation of our products to customers as well as inbound delivery of our raw materials.

If any of these providers were to fail to deliver materials to us in a timely manner, we may be unable to process and deliver our products in response to customer demand. If any of these third parties were to cease operations or cease doing business with us, we may be unable to replace them at a reasonable cost. Failure of a third-party transportation provider to provide transportation services could harm our reputation, negatively affect our customer relationships and have a material adverse effect on our financial position and results of operations.

The continued demand for skilled labor has resulted in the need to increase pay rates in certain markets. Our operations are dependent on the labor used to operate our equipment and deliver products to our customers. Decreased availability of labor could harm our reputation, negatively affect our customer relationships and have a material adverse effect on our financial position and results of operations.

The availability of transportation and labor is integral to our operations, and increases in our cost of transportation or labor may have a material adverse effect on our financial position and results of operations.

### Labor disruptions at any of our facilities or those of major customers could adversely affect our business, results of operations and financial condition.

At December 31, 2024, we employed approximately 2,163 people. Approximately 229 of the hourly plant personnel are represented by seven separate collective bargaining units. Any prolonged work stoppages by our personnel represented by collective bargaining units could have a material adverse impact on our business, financial condition, results of operations and cash flows.

In addition, many of our larger customers have unionized workforces and some have experienced significant labor disruptions in the past such as work stoppages, slow-downs and strikes. A labor disruption at one or more of our major customers could interrupt production or sales by that customer and cause that customer to halt or limit orders for our products. Any such reduction in the demand for our products could have a material adverse effect on our business, financial condition, results of operations and cash flows.

### Our success is dependent upon our relationships with certain key customers.

We have derived and expect to continue to derive a significant portion of our revenues from a relatively limited number of customers. Collectively, our top three customers accounted for approximately 9% and 8% of our consolidated net sales in 2024 and 2023, respectively. Approximately 49% and 48% of our consolidated net sales during 2024 and 2023, respectively, were directly related to industrial machinery and equipment manufacturers and their fabricators. Due to the large concentration of customers in few segments, changes to demand of product by customers in the industrial machinery and equipment manufactures and their fabricators. Our results of operations and our cash flows. Many of our larger customers commit to purchase on a regular basis at agreed upon prices over periods from three to twelve months. We generally do not have long-term contracts with our customers. As a result, the relationship, as well as particular orders, can generally be terminated with relatively little advance notice. The loss of any one of our major customers or decrease in demand by those customers or credit constraints placed on them could have a material adverse effect on our business, our results of operations and our cash flows.

### Our information technology systems and those of our third party providers, as well as our data, could be negatively affected by cybersecurity threats, attacks, disruptions and failures, and cybersecurity incidents.

Increased global information technology security requirements, vulnerabilities, threats and a rise in sophisticated and targeted cybercrime and ongoing attacks and recurring threats of all kinds pose a risk to the security of our systems, networks and the confidentiality, availability and integrity of our data and systems. The risk has been further enhanced with an increased remote workforce. Cybersecurity threat actors also may attempt to exploit vulnerabilities through software that is commonly used by companies in cloud-based services and bundled software. Despite our efforts to protect information, our facilities and systems and those of our third-party service providers may be vulnerable to cybersecurity threats, failures, attacks, and cybersecurity incidents. This could lead to disclosure, modification or destruction of proprietary and other key information, ransom payments, production downtimes, lost cash or other assets and operational disruptions, regulatory investigations, fines, and lawsuits, which in turn could adversely affect our business, financial condition, results of operations and cash flows.

### The failure of our key computer-based systems could have a material adverse effect on our business.

We maintain ERP and legacy computer-based systems in the operation of our business and we depend on these systems to a significant degree, particularly for inventory management. These systems are vulnerable to, among other things, damage or interruption from fire, flood, tornado and other natural disasters, power loss, computer system and network failures, operator negligence, physical and electronic loss of data or security breaches and computer viruses. Although we have secure back-up systems off-site, the destruction or failure of any one of our computer-based systems for any significant period of time could materially adversely affect our business, financial condition, results of operations and cash flows.

### Supply chain disruptions and inflationary pressures, increases in energy prices, and other factors, has had, and could continue to have an adverse effect on our business, financial condition and liquidity.

We are dependent on our suppliers to provide us with metal. During 2022, we experienced increased supply chain disruptions resulting from the imbalance of metal supply and end-user demands as customer demand increased without a corresponding increase in metal supply, as businesses reopened after the pandemic. Our inability to meet customer demand as a result of supply disruptions and inflationary pressures could result in lower sales and profits.

Although it is not possible to predict the ultimate impact of future worldwide health emergencies, including another pandemic, on our business, financial position or liquidity, such impacts that may be material include, but are not limited to: (i) reduced sales and profit levels, (ii) the slower payment of accounts receivable and potential increases in uncollectible accounts receivable, (iii) falling metals prices that could lead to lower of cost or market inventory adjustments and the impairment of intangible and long-lived assets, (v) reduced availability and productivity of our employees, (vi) increased operational risks as a result of remote work arrangements, including the potential effects on internal controls, as well as cybersecurity risks

and increased vulnerability to security breaches, information technology disruptions and other similar events, (vii) negative impacts on our liquidity position, (viii) inability to access our traditional financing sources on the same or reasonably similar terms as were available before the pandemic, and (ix) increased costs and less ability to access funds under our ABL Credit Facility and the capital markets. To the extent the duration of any of these conditions extends for a longer period of time, the impact will generally be a more severe adverse impact.

If our energy costs increase disproportionately to our revenues, our earnings could be reduced. We use energy to process and transport our products. Our operating costs increase if energy costs, including electricity, diesel fuel and natural gas, rise. During periods of higher energy costs, we may not be able to recover our operating cost increases through price increases without reducing demand for our products. In addition, we generally do not hedge our exposure to higher prices via energy futures contracts. Increases in energy and fuel prices will increase our operating costs and may reduce our profitability if we are unable to pass all of the increases on to our customers.

### Impairment in the carrying value of intangible assets could result in the incurrence of impairment charges and negatively impact our results of operations.

The net carrying value of intangibles represents non-amortizable goodwill and trade names, covenant not to compete, technology and know-how and customer relationships, net of accumulated amortization, related to recent acquisitions. Indefinitely lived assets are evaluated for impairment annually or whenever events or changes in circumstance indicate that the carrying amounts of these assets may not be recoverable. Amortizable intangible assets are evaluated for impairment whenever events or changes in circumstance indicate that the carrying amounts of these assets may not be recoverable. Impairments to intangible assets may be caused by factors outside our control, such as increased competitive pricing pressures, lower than expected revenue and profit growth rates, changes in discount rates based on changes in the cost of capital (interest rates, etc.), or the loss of a significant customer and could result in the incurrence of impairment charges and negatively impact our results of operations.

# Capital deployed for acquisitions and capital investments at our existing locations may be unable to achieve expected results, or sustain our growth and events or circumstances that could adversely impact operations could have a material adverse effect on our results of operations.

We have grown through acquisitions and by increasing sales and services to our existing customers, aggressively pursuing new customers and services, building or purchasing new facilities, acquiring and upgrading processing equipment and expanding our product mix in order to expand the range of customer services and products that we offer. We intend to actively pursue our growth strategy in the future.

Future expansion or construction projects, could have adverse effects on our results of operations due to the impact of the associated start-up costs and the potential for underutilization in the start-up phase of a facility. We continue to pursue potential acquisition targets; however, we are unable to predict whether or when any prospective acquisition candidate will become available, the likelihood that any acquisition will be completed or the ability to successfully integrate acquisitions into our business. Moreover, in pursuing acquisition opportunities, we may compete for acquisition targets with other companies with similar growth strategies that may be larger and have greater financial and other resources than we have. Competition among potential acquirers could result in increased prices for acquisition targets. As a result, we may not be able to consummate acquisitions on terms satisfactory to us, or at all.

The pursuit of acquisitions and other growth initiatives may divert management's time and attention away from day-to-day operations. In order to achieve growth through acquisitions, expansion of current facilities, greenfield construction or otherwise, additional funding sources may be needed and we may not be able to obtain the additional capital necessary to pursue our growth strategy on terms that are satisfactory to us, or at all.

We continue to invest in processing equipment to support customer demand. Although we have successfully installed new and used processing equipment in the past, we can provide no assurance that future installations will be successful, or achieve expected results. Risks associated with the installations include, but are not limited to:

- a significant use of management and employee time;
- the possibility that the performance of the equipment does not meet expectations; and
- the possibility that delays from the installations may make it difficult for us to maintain relationships with our customers, employees or suppliers.

Difficulties and delays associated with the installation of new processing equipment could adversely affect our business, our customer service, our results of operations and our cash flows.

## Customer and third-party credit constraints and credit losses could have a material adverse effect on our results of operations.

Some of our customers may experience difficulty obtaining and/or maintaining credit availability. In particular, certain customers that are highly leveraged represent an increased credit risk. Interest rate volatility may further amplify this credit risk. Some customers have reduced their purchases because of these credit constraints. Moreover, our disciplined credit policies have, in some instances, resulted in lost sales. If we have misjudged our credit estimations and they result in future credit losses, lost sales or lost customers, there could be a material adverse effect on our business, financial condition, results of operations, cash flows and our allowance for credit losses.

### Our implementation of information systems and software as service could adversely affect our results of operations and cash flows.

As we implement information systems and cloud-based software as a service agreements, the objective is to standardize and streamline business processes and improve support, reporting capabilities and functionality for our employees and sales and administrative management teams. Risks associated with the phased implementation include, but are not limited to:

- a significant deployment of capital and a significant use of management and employee time;
- the possibility that the timelines, costs or complexities related to the new system implementation will be greater than expected;
- limitations on the availability and adequacy of proprietary software or consulting, training and project management services, as well as our ability to retain key personnel;
- the possibility that the software, once fully implemented, does not function as planned;
- the possibility that software and implementation vendors may not be able to support the project as planned;
- the possibility that benefits from the systems may be less or take longer to realize than expected; and
- the possibility that disruptions from the implementation may make it difficult for us to maintain relationships with our customers, employees or suppliers.

Although we have successfully initiated use of the systems at most of our locations, we can provide no assurance that the rollout to the remaining locations will be successful or will occur as planned and without disruption to operations. Difficulties associated with the design and implementation of new information systems could adversely affect our business, our customer service, our results of operations and our cash flows.

## We depend on our senior management team and the loss of any member could prevent us from implementing our business strategy.

Our success is dependent upon the management and leadership skills of our senior management team. Michael D. Siegal has served as our Executive Chairman of the Board since January 1, 2019, after serving as our Chief Executive Officer since 1984. Richard T. Marabito has served as our Chief Executive Officer since January 1, 2019, after serving as our Chief Financial Officer since 2010, and Richard A. Manson has served as our Chief Financial Officer since January 1, 2019, after serving as our Vice President and Treasurer since 2013. Andrew S. Greiff has served as our President and Chief Operating Officer since January 1, 2020 after serving as our Executive Vice President and Chief Operating Officer since 2016. The loss of any member of our senior management team or the failure to attract and retain additional qualified personnel could prevent us from implementing our business strategy.

### Participation in multiemployer pension plans carry withdrawal liability risks, which could impact our results of operations and financial condition.

Through our Chicago Tube and Iron, or CTI, subsidiary, we contribute to one multiemployer pension plan. The risks of participating in the multiemployer plan are different from a single-employer plan in that (i) assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers, (ii) if a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers, and (iii) if CTI chooses to stop participating in the multiemployer plan, CTI may be required to pay the plan an amount based on the unfunded status of the plan, referred to as a withdrawal liability. Any future withdrawal liability could adversely affect our business, financial condition, results of operations and cash flows.

### Our insurance coverage, customer indemnifications or other liability protections may be unavailable or inadequate to cover all of our significant risks, which could have a material adverse effect on our results of operations.

From time to time, we may be subject to litigation incidental to our businesses, including claims for damages arising out of use of our products, claims involving employment matters, cyber security claims and commercial disputes.

We currently carry insurance from financially strong, highly rated counterparties in established markets to cover significant risks and liabilities. However, our insurance coverage may be inadequate if such claims do arise and any liability not covered by insurance could have a material adverse effect on our business. Disputes with insurance carriers, including over policy terms, reservation of rights, the applicability of coverage (including exclusions), compliance with provisions (including notice) and/or the insolvency of one or more of our insurers may significantly affect the amount or timing of recovery. Although we have been able to obtain insurance in amounts we believe to be appropriate to cover such liability to date, our insurance premiums may increase in the future as a consequence of conditions in the insurance business generally or our situation in particular. Any such increase could result in lower net income or cause the need to reduce our insurance coverage. In addition, a future claim may be brought against us that could have a material adverse impact on us.

In some circumstances, we may be entitled to certain legal protections or indemnifications from our customers through contractual provisions, laws, regulations or otherwise. However, these protections are not always available, are typically subject to certain terms or limitations, including the availability of funds, and may not be sufficient to cover all losses or liabilities incurred.

If insurance coverage, customer indemnifications and/or other legal protections are not available or are not sufficient to cover our risks or losses, it could have a material adverse effect on our results of operations.

### **Risks Related to Our Industry**

### Our business is highly competitive, and increased competition could reduce our market share and harm our financial performance.

Our business is highly competitive. We compete with metals service centers and, to a certain degree, metals producers and intermediate metals processors, on a regular basis, primarily on quality, price, inventory availability and the ability to meet the delivery schedules and service requirements of our customers. We have different competitors for each of our products and within each region. Certain of these competitors have financial and operating resources in excess of ours. Increased competition could lower our gross profits or reduce our market share and have a material adverse effect on our financial performance.

#### **Risks Related to Our Debt**

# Although we expect to finance our growth initiatives through borrowings under our ABL Credit Facility, we may have to find additional sources of funding, which could be difficult. Additionally, increased leverage and borrowing rates could adversely impact our business and results of operations.

We expect to finance our growth initiatives through borrowings under our ABL Credit Facility, which matures on June 16, 2026. However, our ABL Credit Facility may not be sufficient or available to finance our growth initiatives, and we may have to find additional sources of financing. It may be difficult for us in the future to obtain the necessary funds and liquidity on terms acceptable to us, or at all, to run and expand our business.

The borrowings under our ABL Credit Facility are primarily at variable interest rates. If interest rates, which may be highly volatile, were to increase 100 basis points (1.0%) from December 31, 2024 rates and, assuming no change in total debt from December 31, 2024 levels, the additional annual interest expense to us would be approximately \$2.0 million.

### **Regulatory and Environmental Risks**

# Changes in laws or regulations, including tax reform legislation, or the manner of their interpretation or enforcement could adversely impact our financial performance and restrict our ability to operate our business or execute our strategies.

New laws or regulations, or changes in existing laws or regulations, or the manner of their interpretation or enforcement, could increase our cost of doing business and restrict our ability to operate our business or execute our strategies. In particular, there may be significant changes in U.S. laws and regulations and existing international trade agreements by the current U.S. presidential administration that could affect a wide variety of industries and businesses, including those businesses we own and operate. If the U.S. presidential administration materially modifies U.S. laws and regulations and international trade agreements, our business, financial condition, and results of operations could be affected.

### We are subject to significant environmental, health and safety laws and regulations and related compliance expenditures and liabilities.

Our businesses are subject to many federal, state and local environmental, health and safety laws and regulations, particularly with respect to the use, handling, treatment, and disposal of substances and waste used or generated in our manufacturing processes. We have incurred and expect to continue to incur expenditures to comply with applicable environmental laws and regulations. Our failure to comply with applicable environmental laws and regulations and permit requirements could result in civil or criminal fines or penalties or enforcement actions, including regulatory or judicial orders enjoining or curtailing operations or requiring corrective measures, installation of pollution control equipment or remedial actions.

We may in the future be required to incur costs relating to the investigation or remediation of property, and for addressing environmental conditions. Some environmental laws and regulations impose liability and responsibility on present and former owners, operators or users of facilities and sites for contamination at such facilities and sites without regard to causation or knowledge of contamination. Consequently, we cannot assure you that existing or future circumstances, the development of new facts or the failure of third parties to address contamination at current or former facilities or properties will not require significant expenditures by us.

We expect to continue to be subject to environmental and health and safety laws and regulations. It is difficult to predict the future interpretation and development of environmental and health and safety laws and regulations or their impact on our future earnings and operations. We anticipate that compliance will continue to require increased capital expenditures and operating costs. Any increase in these costs, or unanticipated liabilities arising for example, out of discovery of previously unknown conditions or more aggressive enforcement actions, could have a material adverse effect on our business, financial condition, results of operations and cash flows.

### We may be exposed to certain regulatory and financial risks related to climate change.

Growing concerns about climate change may result in the imposition of additional regulations or restrictions to which we may become subject. A number of governments or governmental bodies have introduced or are contemplating regulatory changes in response to climate change, including regulating greenhouse gas emissions. The outcome of new legislation or regulation in the United States may result in new or additional requirements, additional charges to fund energy efficient activities, and fees or restrictions on certain activities. Compliance with these climate change initiatives may also result in additional costs to us, including, among other things, increased production costs, additional taxes, reduced emission allowances or additional restrictions on production or operations. Any adopted future climate change regulations could also negatively impact our ability to compete with companies situated in areas not subject to such limitations. Even without such regulation, increased public awareness and adverse publicity about potential impacts on climate change emanating from us or our industry could harm us. We may not be able to recover the cost of compliance with new or more stringent laws and regulations, which could adversely affect our results of operations, cash flow or financial condition.

### Expectations relating to environmental, social and governance considerations expose us to potential liabilities, increased costs, reputational harm and other adverse effects on our business.

Many governments, regulators, investors, employees, customers and other stakeholders are increasingly focused on environmental, social and governance and sustainability considerations relating to businesses, including climate change and greenhouse gas emissions, data privacy, artificial intelligence, human capital and diversity, equity and inclusion. We make statements about our environmental, social and governance targets, goals and initiatives through information provided on our website, press statements and other communications. Responding to these environmental, social and governance considerations and implementation of these goals and initiatives, including those described in our Corporate Responsibility Report, involves risks and uncertainties, requires investments, which could be material, and are impacted by factors that may be outside of our control. In addition, some stakeholders may disagree with our goals and initiatives and the focus of stakeholders may change and evolve over time. We may also amend, abandon or replace our targets, goals and initiatives due to a change in strategy, reduced relevance of such targets, goal and initiatives or changing market conditions, and we may take certain actions that stakeholders or regulators view as contrary to such targets, goals and initiatives. Stakeholders also may have very different views on where our focus on environmental, social and governance and sustainability issues should be placed, including differing views of regulators in various jurisdictions in which we operate. Any failure, or perceived failure, by us to achieve our targets or goals, further our initiatives, adhere to our public statements, comply with federal, state or international environmental, social and governance laws and regulations, or meet evolving and varied stakeholder expectations and standards could result in legal and regulatory proceedings against us and materially adversely affect our business, reputation, results of operations, financial condition and stock price.

### **Risks Related to Our Common Stock**

### The market price for our common stock may be volatile.

Historically, there has been volatility in the market price for our common stock. Furthermore, the market price of our common stock could fluctuate substantially in the future in response to a number of factors, including, but not limited to, the risk factors described herein. Examples include:

- changes in commodity prices, especially metals;
- changes in financial estimates or recommendations by stock market analysts regarding us or our competitors;
- the operating and stock performance of other companies that investors may deem comparable;
- developments affecting us, our customers or our suppliers;
- press releases, earnings releases or publicity relating to us or our competitors or relating to trends in the metals service center industry;
- inability to meet securities analysts' and investors' quarterly or annual estimates or targets of our performance;
- sales of our common stock by large shareholders;
- the amount of shares acquired for short-term investments;
- general domestic or international economic, market and political conditions;
- fluctuations in the value of the U.S. dollar;
- changes in (or changes in expectation) related to interest rates and the Federal Funds Rates;
- changes in the legal or regulatory environment affecting our business; and
- announcements by us or our competitors of significant acquisitions, dispositions or joint ventures, or other material events impacting the domestic or global metals industry.

In the past, the stock market has experienced significant price and volume fluctuations. This volatility has had a significant effect on the market prices of securities issued by many companies for reasons unrelated to their specific operating performance. These factors may adversely affect the trading price of our common stock, regardless of actual operating performance.

In addition, stock markets from time to time experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of companies. In the past, some shareholders have brought securities class action lawsuits against companies following periods of volatility in the market price of their securities. We may in the future be the target of similar litigation. Securities litigation, regardless of whether our defense is ultimately successful, could result in substantial costs and divert management's attention and resources.

#### Our quarterly results may be volatile.

Our operating results have varied on a quarterly basis during our operating history and are likely to fluctuate significantly in the future. Our operating results may be below the expectations of our investors or stock market analysts as a result of a variety of factors, including the impact of LIFO estimates, many of which are outside of our control. Factors that may affect our quarterly operating results include, but are not limited to, the risk factors listed above.

Many factors could cause our revenues and operating results to vary significantly in the future. Accordingly, we believe that quarter-to-quarter comparisons of our operating results are not necessarily meaningful. Investors should not rely on the results of one quarter as an indication of our future performance. Further, it is our practice not to provide forward-looking sales or earnings guidance and not to endorse any analyst's sales or earnings estimates. Nonetheless, if our results of operations in any quarter do not meet analysts' expectations, our stock price could materially decrease.

### Certain provisions in our charter documents and Ohio law could delay or prevent a change in management or a takeover attempt that you may consider to be in your best interest.

We are subject to Chapter 1704 of the Ohio Revised Code, which prohibits certain business combinations and transactions between an "issuing public corporation" and an "Ohio law interested shareholder" for at least three years after the Ohio law interested shareholder attains 10% ownership, unless the Board of Directors of the issuing public corporation approves the transaction before the Ohio law interest shareholder attains 10% ownership. We are also subject to Section 1701.831 of the Ohio Revised Code, which provides that certain notice and informational filings and special shareholder meeting and voting procedures must be followed prior to consummation of a proposed "control share acquisition." Assuming compliance with the notice and information filings prescribed by the statute, a proposed control share acquisition may be made only if the acquisition is approved by a majority of the voting power of the issuer represented at the meeting and at least a majority of the voting power remaining after excluding the combined voting power of the "interested shares."

Certain provisions contained in our Amended and Restated Articles of Incorporation and Amended and Restated Code of Regulations and Ohio law could delay or prevent the removal of directors and other management and could make a merger, tender offer or proxy contest involving us that you may consider to be in your best interest more difficult. For example, these provisions:

- allow our Board of Directors to issue preferred stock without shareholder approval;
- provide for our Board of Directors to be divided into two classes of directors serving staggered terms;
- limit who can call a special meeting of shareholders; and
- establish advance notice requirements for nomination for election to the Board of Directors or for proposing matters to be acted upon at shareholder meetings.

These provisions may discourage potential takeover attempts, discourage bids for our common stock at a premium over market price or adversely affect the market price of, and the voting and other rights of the holders of our common stock. These provisions could also discourage proxy contests and make it more difficult for you and other shareholders to elect directors other than the candidates nominated by our Board of Directors.

### Principal shareholders who own a significant number of shares of our common stock may have interests that conflict with yours.

Michael D. Siegal, our Executive Chairman of the Board and one of our largest shareholders, owned approximately 9.6% of our outstanding common stock as of December 31, 2024. Mr. Siegal may have the ability to significantly influence matters requiring shareholder approval. In deciding how to vote on such matters, Mr. Siegal may be influenced by interests that conflict with yours.

### **General Risks**

### Climate change may cause changes in weather patterns and increase the frequency or severity of weather events and flooding.

An increase in severe weather events, including those caused by climate change, may adversely impact us, our operations, and our ability to procure raw materials and process and transport our products and could result in an adverse effect on our business, financial condition and results of operations. Extreme weather conditions may increase our costs, temporarily impact our production capabilities or cause damage to our facilities. Severe weather may also adversely impact our suppliers and our customers and their ability to deliver and/or purchase and transport our products.

### ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

### **ITEM 1C. CYBERSECURITY**

### **Cybersecurity Risk Management**

Cybersecurity risk management is an integral part of our overall enterprise risk management program. Our cybersecurity risk management program is designed to provide a framework for handling cybersecurity threats and incidents, including threats and incidents associated with the use of services provided by third-party service providers, and to facilitate coordination across different departments of our company. Our processes include steps for assessing the severity of a cybersecurity threat, identifying the source of a cybersecurity threat including whether the cybersecurity threat is associated with a third-party service provider, implementing cybersecurity threats and mitigation strategies and informing management and our board of directors of material cybersecurity threats and incidents. Our cybersecurity team also engages third-party security experts for risk assessment and system enhancements. In addition, our cybersecurity team provides training to employees, based on their role.

Our board of directors has overall oversight responsibility for our risk management, and delegates cybersecurity risk management oversight to the audit committee of the board of directors. The audit committee is responsible for ensuring that management has processes in place designed to identify and evaluate cybersecurity risks to which the company is exposed and implement processes and programs to manage cybersecurity risks and mitigate cybersecurity incidents. The audit committee also reports material cybersecurity risks to our full board of directors. Management is responsible for identifying, considering and assessing material cybersecurity risks on an ongoing basis, establishing processes designed to ensure that such potential cybersecurity programs are under the direction of our Vice President of Information Services (VP-IS) who receives reports from our cybersecurity team and monitors the prevention, detection, mitigation, and remediation of cybersecurity managers with many years of experience. Management, including the VP-IS and our cybersecurity team, regularly update the audit committee on the company's cybersecurity programs, material cybersecurity risks and mitigation strategies and provide cybersecurity reports annually that cover, among other topics, third-party assessments of the company's cybersecurity programs and mitigation strategies.

In 2024, we did not identify any cybersecurity incidents that have materially affected or are reasonably likely to materially affect our business strategy, results of operations, or financial condition. However, despite our efforts, we cannot eliminate all risks from cybersecurity threats, or provide assurances that we have not experienced an undetected cybersecurity incident. For more information about these risks, please see "Risk Factors - Risks Related to our Business" in this Annual Report on Form 10-k.

### **ITEM 2. PROPERTIES**

We believe that our properties are strategically situated relative to our domestic suppliers, our customers and each other, allowing us to support customers from multiple locations. Product is shipped from the most advantageous facility, regardless of where the customer order is taken. The facilities are located in the hubs of major metals consumption markets, and within a 250-mile radius of most of our customers, a distance approximating the one-day driving and delivery limit for truck shipments.

The following table sets forth certain information concerning our principal properties including which segment's products are serviced out of each location:

|                       |                            |                |                                                                                     |                    |                | Segment                     |                     |
|-----------------------|----------------------------|----------------|-------------------------------------------------------------------------------------|--------------------|----------------|-----------------------------|---------------------|

In addition to the facilities listed above, our executive office is leased and located in Highland Hills, Ohio and we have leased offices located in Bonita Springs, Florida; San Antonio, Texas and Monterrey, Mexico. Management believes we will be able to accommodate our capacity needs for the immediate future at our existing facilities.

### **ITEM 3. LEGAL PROCEEDINGS**

We are party to various legal actions that we believe are ordinary in nature and incidental to the operation of our business. In the opinion of management, the outcome of the proceedings to which we are currently a party will not have a material adverse effect upon our results of operations, financial condition or cash flows.

### ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

### INFORMATION ABOUT OUR EXECUTIVE OFFICERS

This information is included in this Annual Report on Form 10-K pursuant to Instruction 3 of Item 401(b) of Regulation S-K. The following is a list of our executive officers and a brief description of their business experience. Each executive officer will hold office until his or her successor is chosen and qualified.

Michael D. Siegal, age 72, joined the Board in 1984. He has served as the Executive Chairman of our Board of Directors since January 2019 after serving as our Chief Executive Officer of the Company from 1984 until December 2018 and in the role of Chairman of our Board of Directors since 1994. Since 2018, Mr. Siegal serves on the Board of Directors of Twin City Fan. He also serves on the board of directors of the Development Corporation for Israel and is the immediate past Chair of the Board of Trustees of the Jewish Agency for Israel. Mr. Siegal has previously served on the board of directors of the Metals Service Center Institute (MSCI), a North American metal industry trade association, Cleveland-Cliffs, Inc., University Hospitals of Cleveland and the Rock & Roll Hall of Fame. He also previously served as the Board Chair of the Jewish Federation of North America and the Jewish Federation of Cleveland. With over 30 years of executive experience at the Company, Mr. Siegal possesses proven managerial skills and firsthand knowledge of nearly every aspect of the Company's business operations. Mr. Siegal is a substantial long-term shareholder and a member of the founding family of the Company.

Richard T. Marabito, age 61, has served as our Chief Executive Officer since January 2019. From March 2000 through December 2018, he served as our Chief Financial Officer. He joined us in 1994 as Corporate Controller and served in this capacity until March 2000. He also served as Treasurer from 1994 through 2002 and again from 2010 through 2012. Prior to joining us, Mr. Marabito served as Corporate Controller for a publicly traded wholesale distribution company and was employed by a national accounting firm in its audit department. Mr. Marabito is a Board Member and the past Chair of the MSCI, a North American metals industry trade association. He serves on the Board of Trustees for the University of Mount Union and has been a Board Member of CBIZ, Inc. (CBZ: NYSE), one of the nation's top providers of accounting, tax and advisory services, since August 2021 and currently serves as its Audit Committee Chair. He also serves on the Board of Directors for the Greater Cleveland Partnership, the largest metropolitan chamber of commerce in the United States. He served as a Board Member of the Make-A-Wish Foundation of Ohio, Kentucky and Indiana and was past Chair of its Northeast Ohio regional board.

Richard A. Manson, age 56, has served as our Chief Financial Officer since January 2019, and has been employed by us since 1996. From January 2013 through December 2018, he served as our Vice President and Treasurer. From March 2010 through December 2012, he served as our Vice President of Human Resources and Administration. From January 2003 through March 2010, he served as our Treasurer and Corporate Controller. From 1996 through 2002, he served as our Director of Taxes and Risk Management. Prior to joining us, Mr. Manson was employed for seven years by a national accounting firm in its tax department. Mr. Manson is a member of the Board of Directors of Catholic Charities, Diocese of Cleveland and the Advisory Board of Seeds of Literacy. Mr. Manson is a certified public accountant and member of the Ohio Society of Certified Public Accountants and the American Institute of Certified Public Accountants.

Andrew S. Greiff, age 63, has served as our President and Chief Operating Officer since January 2020. From August 2016 through December 2019, he served as Executive Vice President and Chief Operating Officer. He previously served as President, Specialty Metals from 2011 to 2016 after having joined us in 2009 as Vice President of Specialty Metals. Prior thereto, Mr. Greiff spent 24 years in various positions within the steel industry and served as the President and CEO of his own steel trading company. Mr. Greiff served as a Board Member of the MSCI and a past director of Jewish Big Brother Big Sister and the Anti-Defamation League.

Lisa K. Christen, age 48, has served as our Vice President & Treasurer since January 2023. From January 2019 through December 2022, she served as our Corporate Controller & Treasurer. From March 2010 through December 2018, she served as our Corporate Controller. From 1999 through 2010 she served in various positions within the accounting department. Ms. Christen served as the Treasurer and as a Board Member of Seton Catholic School in Hudson, Ohio and serves on the finance committee of Walsh Jesuit High School, in Cuyahoga Falls, Ohio. Ms. Christen is a certified public accountant and member of the Ohio Society of Certified Public Accountants and the American Institute of Certified Public Accountants.

### PART II

## ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

### **Common Stock**

Our common stock trades on the Nasdaq Global Select Market under the symbol "ZEUS."

### **Holders of Record**

As of January 31, 2025, there were approximately 106 holders of record of our common stock.

### Dividends

We expect to continue to make regular quarterly dividend distributions in the future, subject to the continuing determination by our Board of Directors that the dividend remains in the best interest of our shareholders. Our ABL Credit Facility restricts the aggregate amount of dividends and common stock repurchases that we can pay to \$15.0 million annually without limitations. Dividend distributions in excess of \$15.0 million require us to (i) maintain availability in excess of 20.0% of the aggregate revolver commitments or (ii) to maintain availability equal to or greater than 15.0% of the aggregate revolver commitments, and we must maintain a pro-forma ratio of EBITDA, minus certain capital expenditures and cash taxes paid to fixed charges of at least 1.00 to 1.00. Any determinations by the Board of Directors to pay cash dividends in the future will take into account various factors, including our financial condition, results of operations, current and anticipated cash needs, plans for expansion and restrictions under our credit agreement and any agreements governing our future debt. We cannot assure you that dividends will be paid in the future or that, if paid, the dividends will be at the same amount or frequency.

### **Issuer Purchases of Equity Securities**

We did not purchase any of our equity securities during the quarter ended December 31, 2024.

On October 2, 2015, we announced that our Board of Directors authorized a stock repurchase program of up to 550,000 shares of the Company's issued and outstanding common stock, which could include open market repurchases, negotiated block transactions, accelerated stock repurchases or open market solicitations for shares, all or some of which may be effected through Rule 10b5-1 plans. Any of the repurchased shares will be held in our treasury, or canceled and retired as our Board may determine from time to time. Any repurchases of common stock are subject to the covenants contained in the ABL Credit Facility. Our ABL Credit Facility restricts the aggregate amount of dividends and common stock repurchases that we can pay to \$15.0 million annually without limitations. Purchases in excess of \$15.0 million require us to (i) maintain availability in excess of 20.0% of the aggregate revolver commitments or (ii) to maintain availability equal to or greater than 15.0% of the aggregate revolver commitments and we must maintain a pro-forma ratio of EBITDA minus certain capital expenditures and cash taxes paid to fixed charges of at least 1.00 to 1.00. The timing and amount of any repurchases under the stock repurchase program will depend upon several factors, including market and business conditions, and limitations under the ABL Credit Facility. Repurchases may be discontinued at any time. As of December 31, 2024, 360,212 shares remain authorized for repurchase under the program.

### **Recent Sales of Unregistered Securities**

We did not have any unregistered sales of equity securities during the quarter ended December 31, 2024.

ITEM 6. [RESERVED]

# ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations contains forwardlooking statements that involve risks and uncertainties. Our actual results may differ materially from the results discussed in the forward-looking statements. Factors that might cause a difference include, but are not limited to, those discussed under Item 1A, Risk Factors in this Annual Report on Form 10-K. The following section is qualified in its entirety by the more detailed information, including our financial statements and the notes thereto, which appears elsewhere in this Annual Report.

# Overview

We are a leading metals service center focused on the direct sale and value-added processing of carbon and coated sheet, plate and coil products; stainless steel sheet, plate, bar and coil; aluminum sheet, plate and coil; pipe, tube bar, valves and fittings, tin plate and metal-intensive end-use products. We provide metals processing and distribution services for a wide range of customers. We operate in three reportable segments: specialty metals flat products, carbon flat products, and tubular and pipe products. Our specialty metals flat products segment's focus is on the direct sale and distribution of processed aluminum and stainless flat-rolled sheet and coil products, flat bar products, prime tin mill products and fabricated parts. Through acquisitions, our specialty metals flat products segment has expanded its geographical footprint and enhanced its product offerings in stainless steel and aluminum plate, sheet, angles, rounds, flat bar, tube and pipe and the manufacturing and distribution of stainless steel bollards and water treatment systems. Our carbon flat products segment's focus is on the direct sale and distribution of large volumes of processed carbon and coated flat-rolled sheet, coil and plate products and fabricated parts. Through acquisitions, our carbon flat products segment has expanded its product offerings to include selfdumping metal hoppers and steel and stainless-steel dump inserts for pickup truck and service bed trucks. Through the acquisition of Metal-Fab, Inc., or Metal-Fab, on January 3, 2023, the carbon flat products segment further expanded its product offerings to include venting, micro air and clean air products for residential, commercial and industrial applications. Through the recent acquisition of Metal Works, LLC, or Metal Works, on November 11, 2024, the carbon flat products segment further expanded its product offerings to include the manufacturing of service station canopies, deck clips, long gutters, trim, boat docks and solar canopy and ground racking components. Our tubular and pipe products segment's focus is on the distribution of metal tubing, pipe, bar, valves and fittings and the fabrication of parts supplied to various industrial markets. Through the acquisition of Central Tube and Bar, Inc., or CTB, on October 2, 2023, the tubular and pipe products segment further expanded its geographic footprint and extended its value-added contract manufacturing capabilities. We also perform toll processing of customer-owned metals. We sell certain products internationally, primarily in Canada and Mexico. International sales are immaterial to our consolidated financial results and to the individual segments' results.

Our results of operations are affected by numerous external factors including, but not limited to: metals pricing, demand and availability; the availability, and increased costs of labor; global supply, the level of metals imported into the United States, tariffs, and inventory held in the supply chain; general and global business, economic, financial, banking and political conditions; competition; layoffs or work stoppages by our own, our suppliers' or our customers' personnel; fluctuations in the value of the U.S. dollar to foreign currencies; transportation and energy costs; pricing and availability of raw materials used in the production of metals and customers' ability to manage their credit line availability. The metals industry also continues to be affected by the global consolidation of our suppliers, competitors and end-use customers.

Like other metals service centers, we maintain substantial inventories of metals to accommodate the short lead times and justin-time delivery requirements of our customers. Accordingly, we purchase metals in an effort to maintain our inventory at levels that we believe to be appropriate to satisfy the anticipated needs of our customers based upon customer forecasts, historic buying practices, supply agreements with customers and market conditions. Our commitments to purchase metals are generally at prevailing market prices in effect at the time we place our orders. From time to time, we have entered into passthrough nickel swaps at the request of our customers in order to mitigate our customers' risk of volatility in the price of metals. We have no long-term, fixed-price metals purchase contracts. When metals prices decline, customer demands for lower prices and our competitors' responses to those demands could result in lower sale prices and, consequently, lower gross profits and earnings as we use existing metals inventory. When metals prices increase, competitive conditions will influence how much of the price increase we can pass on to our customers. To the extent we are unable to pass on future price increases in our raw materials to our customers, the net sales and gross profits of our business could be adversely affected.

# **Reportable Segments**

We operate in three reportable segments: specialty metals flat products, carbon flat products and tubular and pipe products. The specialty metals flat products segment and the carbon flat products segment are at times consolidated and referred to as the flat products segment. Some of the flat products segment's assets and resources are shared by the specialty metals and carbon flat products segments and both segments' products are stored in the shared facilities and, in some locations, processed on shared equipment. As such, total assets and capital expenditures are reported in the aggregate for the flat products segments. Due to the shared assets and resources, certain of the flat products segment expenses are allocated between the specialty metals flat products segment and the carbon flat products segment based upon an established allocation methodology.

We follow the accounting guidance that requires the utilization of a "management approach" to define and report the financial results of operating segments. The management approach defines operating segments along the lines used by the chief operating decision maker, or CODM, to assess performance and make operating and resource allocation decisions. Our CODM, who is our Chief Executive Officer, evaluates performance and allocates resources based primarily on operating income. Our operating segments are based primarily on internal management reporting.

Due to the nature of the products sold in each segment, there are significant differences in the segments' average selling price and the cost of materials sold. The specialty metals flat products segment generally has the highest average selling price among the three segments followed by the tubular and pipe products segment and carbon flat products segment. Due to the nature of the tubular and pipe products, we do not report tons sold or per ton information. Gross profit per ton is generally higher in the specialty metals flat products segment than the carbon flat products segment. Gross profit as a percentage of net sales is generally higher in the specialty metals flat products and tubular and pipe products segments than the carbon flat products segment. Due to the differences in average selling prices, gross profit and gross profit percentage among the segments, a change in the mix of sales could impact total net sales, gross profit, and gross profit percentage. In addition, certain inventory in the tubular and pipe products segment is valued under the LIFO method. Adjustments to the LIFO inventory value are recorded to cost of materials sold and may impact the gross margin and gross margin percentage at the consolidated Company and tubular and pipe products segment levels.

# Specialty metals flat products

The primary focus of our specialty metals flat products segment is on the direct sale and distribution of processed aluminum and stainless flat-rolled sheet and coil products, flat bar products, prime tin mill products and fabricated parts. Through acquisitions, our specialty metals flat products segment has expanded its geographical footprint and enhanced its product offerings in stainless steel and aluminum plate, sheet, angles, rounds, flat bar, tube and pipe and the manufacturing and distribution of stainless steel bollards and water treatment systems. We act as an intermediary between metals producers and manufacturers that require processed metals for their operations. We serve customers in various industries, including manufacturers of food service and commercial appliances, agriculture equipment, transportation and automotive equipment. We distribute these products primarily through a direct sales force.

# Carbon flat products

The primary focus of our carbon flat products segment is on the direct sale and distribution of large volumes of processed carbon and coated flat-rolled sheet, coil and plate products and fabricated parts. Through acquisitions, our carbon flat products segment has expanded its product offerings to self-dumping metal hoppers and steel and stainless-steel dump inserts for pickup truck and service truck beds. Through the acquisition of Metal-Fab, the carbon flat products segment further expanded its product offerings to include venting, micro air and clean air products for residential, commercial and industrial applications. Through the recent acquisition of Metal Works, the carbon flat products segment further expanded its product offerings to include the manufacturing of service station canopies, deck clips, long gutters, trim, boat docks and solar canopy and ground racking components. We act as an intermediary between metals producers and manufacturers that require processed metals for their operations. We serve customers in most metals consuming industries, including manufacturers and fabricators of transportation and material handling equipment, construction and farm machinery, storage tanks, environmental and energy generation equipment, automobiles, military vehicles and equipment, as well as general and plate fabricators and metals service centers. We distribute these products primarily through a direct sales force.

Combined, the carbon and specialty metals flat products segments have 37 strategically-located processing and distribution facilities in the United States and one in Monterrey, Mexico. Many of our facilities service both the carbon and the specialty metals flat products segments, and certain assets and resources are shared by the segments. Our geographic footprint allows us to focus on regional customers and larger national and multi-national accounts, primarily located throughout the midwestern, eastern and southern United States.

## Tubular and pipe products

The primary focus of our tubular and pipe products segment is on the distribution of metal tubing, pipe, bar, valve and fittings and the fabrication of pressure parts supplied to various industrial markets. Through the acquisition of CTB, the tubular and pipe products segment further expanded its geographic footprint and extended its value-added contract manufacturing capabilities. The tubular and pipe products segment operates from ten locations in the Midwestern and Southern United States. The tubular and pipe products segment distributes its products primarily through a direct sales force.

#### Corporate expenses

Corporate expenses are reported as a separate line item for segment reporting purposes. Corporate expenses include the unallocated expenses related to managing the entire Company (i.e., all three segments), including compensation for certain personnel, expenses related to being a publicly traded entity such as board of directors' expenses, audit expenses, and various other professional fees.

#### **Results of Operations**

This section of this Annual Report on Form 10-K generally discusses 2024 and 2023 items and year-to-year comparisons between 2024 and 2023. Discussions of 2022 items and year-to-year comparisons between 2023 and 2022 that are not included in this Annual Report on Form 10-K can be found in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2023.

# 2024 Compared to 2023

Our results of operations are impacted by the market price of metals. Metals prices fluctuate significantly and changes to our net sales, cost of materials sold, gross profit, cost of inventory and profitability, are all impacted by industry metals pricing.

Metals prices in our specialty metals products segment decreased during 2024 compared to 2023 due to decreases in metal surcharges experienced during 2024. The average price of stainless surcharges decreased 24.2% during 2024 compared to 2023. Metals index pricing for our carbon flat products segment decreased 40.3% between December 2023 and July 2024, with index prices remaining within a \$40 per ton range during the second half of 2024. The decrease in year-over-year industry metals pricing reduced both our average selling prices and average cost of materials sold in each operating segment in 2024 when compared to 2023. Metals pricing for the tubular and pipe products segment lags behind the carbon flat products segment by several months. Industry shipments overall were down over 2% in 2024 when compared to 2023.

Transactional or "spot" selling prices generally move in tandem with market price changes, while fixed selling prices typically lag and reset quarterly. Similarly, inventory costs (and, therefore, cost of materials sold) tend to move slower than market selling price changes due to mill lead times and inventory turnover impacting the rate of change in average cost. When average selling prices increase, and net sales increase, gross profit and operating expenses as a percentage of net sales will generally decrease.

# **Consolidated Operations**

The following table sets forth certain consolidated income statement data for the years ended December 31, 2024 and 2023 (dollars shown in thousands):

|                                       | 2024 |           |                |    | 2023      |                |  |  |  |
|---------------------------------------|------|-----------|----------------|----|-----------|----------------|--|--|--|
|                                       |      |           | % of net sales |    |           | % of net sales |  |  |  |
| Net sales                             | \$   | 1,941,672 | 100.0          | \$ | 2,158,163 | 100.0          |  |  |  |
| Cost of materials sold <sup>(a)</sup> |      | 1,490,491 | 76.8           |    | 1,684,663 | 78.1           |  |  |  |
| Gross profit <sup>(b)</sup>           |      | 451,181   | 23.2           |    | 473,500   | 21.9           |  |  |  |
| Operating expenses <sup>(c)</sup>     |      | 403,322   | 20.7           |    | 395,829   | 18.3           |  |  |  |
| Operating income                      |      | 47,859    | 2.5            |    | 77,671    | 3.6            |  |  |  |
| Other loss, net                       |      | 93        | 0.0            |    | 78        | 0.0            |  |  |  |
| Interest and other expense on debt    |      | 16,461    | 0.9            |    | 16,006    | 0.7            |  |  |  |
| Income before income taxes            |      | 31,305    | 1.6            |    | 61,587    | 2.9            |  |  |  |
| Income taxes                          |      | 8,325     | 0.4            |    | 17,058    | 0.8            |  |  |  |
| Net income                            | \$   | 22,980    | 1.2            | \$ | 44,529    | 2.1            |  |  |  |

(a) Includes \$5,702 and \$8,258 of LIFO income in 2024 and 2023, respectively.

(b) Gross profit is calculated as net sales less the cost of materials sold.

(c) Operating expenses are calculated as total costs and expenses less the cost of materials sold.

Net sales decreased \$216.5 million, or 10.0%, to \$1.9 billion in 2024 from \$2.2 billion in 2023. Specialty metals flat products net sales decreased \$70.9 million, or 12.5%, to \$496.9 million in 2024 compared to \$567.7 million in 2023 and were 25.6% of total net sales in 2024 compared to 26.3% of total net sales in 2023. Carbon flat products net sales decreased \$112.0 million, or 9.2%, to \$1.1 billion in 2024 compared to \$1.2 billion in 2023 and were 57.1% of total net sales in 2024 compared to 56.6% of total net sales in 2023. Tubular and pipe products net sales decreased \$33.6 million, or 9.1%, to \$335.7 million in 2023 and were 17.3% of total net sales in 2024 compared to 17.1% of total net sales in 2023. The decrease in net sales was due to a 9.2% decrease in consolidated average selling prices during 2024 compared to 2023 and a 0.9% decrease in consolidated volume. Average selling prices in 2024 were \$1,837 per ton, compared to \$2,023 per ton in 2023. The decrease in the average selling price is a result of the market pricing dynamics discussed above in Results of Operations.

Cost of materials sold decreased \$194.2 million, or 11.5%, to \$1.5 billion in 2024 from \$1.7 billion in 2023. During 2024, we recorded LIFO income of \$5.7 million compared to LIFO income of \$8.3 million in 2023. The decrease in cost of materials sold in 2024 is primarily related to decreased average metals pricing in 2024 compared to 2023.

As a percentage of net sales, gross profit (as defined in footnote (b) in the table above) increased to 23.2% in 2024 from 21.9% in 2023. The increase in the gross profit as a percentage of net sales is due to the average costs of inventory decreasing more quickly than the average selling prices as discussed above in Results of Operations, as well as to the value-added acquisitions from 2023 having a continued positive impact on gross profit.

Operating expenses (as defined in footnote (c) in the table above) increased \$7.5 million, or 1.9%, to \$403.3 million in 2024 from \$395.8 million in 2023. As a percentage of net sales, operating expenses increased to 20.7% in 2024 from 18.3% in 2023. Operating expenses in the specialty metals flat products segment decreased \$0.2 million, operating expenses in the carbon flat products segment increased \$5.3 million, operating expenses in the tubular and pipe products segment increased \$5.8 million, and corporate expenses decreased \$3.4 million. Operating expenses increased during 2024 as a result of the inclusion of operating expenses related to the November 2024 acquisition of Metal Works for the carbon flat products segment, the October 2023 acquisition of CTB in the tubular and pipe products segment and the absence of year-over-year employee retention credits, or ERCs, provided through CARES Act in 2023, partially offset by lower year-over-year acquisition-related fees and variable performance-based incentive compensation.

Interest and other expense on debt totaled \$16.5 million in 2024 compared to \$16.0 million in 2023. Our effective borrowing rate, exclusive of deferred financing fees and commitment fees, was 6.7% in 2024 compared to 5.9% in 2023. The increased effective borrowing rate is due to higher market interest rates in 2024 when compared to 2023. Total average borrowings decreased \$21.0 million, or 8.8%, to \$218.4 million in 2024 from \$239.4 million in 2023.

Income before income taxes totaled \$31.3 million, or 1.6% of net sales, in 2024, compared to income before taxes of \$61.6 million, or 2.9% of net sales, in 2023.

An income tax provision of 26.6% was recorded in 2024, compared to an income tax provision of 27.7% in 2023.

Net income in 2024 totaled \$23.0 million, or \$ 1.97 per basic and diluted share, compared to net income of \$44.5 million, or \$ 3.85 per basic and diluted share, in 2023.

# **Segment Results of Operations**

## Specialty metals flat products

The following table sets forth certain income statement data for the specialty metals flat products segment for the years ended December 31, 2024 and 2023 (dollars shown in thousands, except per ton data):

|                                   | 2024 |         |                   |    | 2023    |                |  |  |
|-----------------------------------|------|---------|-------------------|----|---------|----------------|--|--|
|                                   |      |         | % of net<br>sales |    |         | % of net sales |  |  |
| Direct tons sold                  |      | 113,046 |                   |    | 112,412 |                |  |  |
| Toll tons sold                    |      | 4,462   |                   |    | 3,175   |                |  |  |
| Total tons sold                   |      | 117,508 |                   |    | 115,587 |                |  |  |
| Net sales                         | \$   | 496,854 | 100.0             | \$ | 567,728 | 100.0          |  |  |
| Average selling price per ton     |      | 4,228   |                   |    | 4,912   |                |  |  |
| Cost of materials sold            |      | 406,229 | 81.8              |    | 473,784 | 83.5           |  |  |
| Gross profit <sup>(a)</sup>       |      | 90,625  | 18.2              |    | 93,944  | 16.5           |  |  |
| Operating expenses <sup>(b)</sup> |      | 70,897  | 14.2              |    | 71,060  | 12.5           |  |  |
| Operating income                  | \$   | 19,728  | 4.0               | \$ | 22,884  | 4.0            |  |  |

(a) Gross profit is calculated as net sales less the cost of materials sold.

(b) Operating expenses are calculated as total costs and expenses less the cost of materials sold.

Tons sold in our specialty metals flat product segment increased 2 thousand tons, or 1.7%, to 118 thousand tons in 2024 from 116 thousand tons in 2023. We do not report tons sold for our end-use products.

Net sales in our specialty metals flat products segment decreased \$70.9 million, or 12.5%, to \$496.9 million in 2024 from \$567.7 million in 2023. The decrease in sales was due to a 13.9% decrease in average selling prices partially offset by a 1.7% increase in sales volume during 2024 compared to 2023. Average selling prices in 2024 decreased to \$4,228 per ton, compared to \$4,912 per ton in 2023. The decrease in the year-over-year average selling price per ton is a result of the decreased industry metals pricing discussed above in Results of Operations.

Cost of materials sold decreased \$67.6 million, or 14.3%, to \$406.2 million in 2024 from \$473.8 million in 2023. The decrease in cost of materials sold was due to the decrease in industry metals pricing discussed above in Results of Operations.

As a percentage of net sales, gross profit (as defined in footnote (a) in the table above) increased to 18.2% in 2024 from 16.5% in 2023. The average gross profit per ton sold totaled \$771 in 2024 compared to \$813 in 2023. The increase in the gross profit as a percentage of net sales is due to the average cost of inventory decreasing more quickly than the average selling prices as discussed above in Results of Operations.

Operating expenses (as defined in footnote (b) in the table above) decreased \$0.2 million, or 0.2%, to \$70.9 million in 2024 from \$71.1 million in 2023. As a percentage of net sales, operating expenses increased to 14.2% of net sales in 2024 from 12.5% in 2023. The decrease in operating expenses was primarily attributable to lower year-over-year variable performance-based incentive compensation.

Operating income for 2024 totaled \$19.7 million, or 4.0% of net sales, compared to \$22.9 million, or 4.0% of net sales, in 2023.

# Carbon flat products

The following table sets forth certain income statement data for the carbon flat products segment for the years ended December 31, 2024 and 2023 (dollars shown in thousands, except per ton data):

|                               |    | 202       | 24             | <br>20          | 23             |
|-------------------------------|----|-----------|----------------|-----------------|----------------|
|                               | -  |           | % of net sales |                 | % of net sales |
| Direct tons sold              | -  | 811,023   |                | <br>820,144     |                |
| Toll tons sold                |    | 28,676    |                | 34,048          |                |
| Total tons sold               |    | 839,699   |                | <br>854,192     |                |
| Net sales                     | \$ | 1,109,100 | 100.0          | \$<br>1,221,093 | 100.0          |
| Average selling price per ton |    | 1,321     |                | 1,430           |                |
| Cost of materials sold        |    | 864,590   | 78.0           | <br>963,667     | 78.9           |
| Gross profit (a)              |    | 244,510   | 22.0           | 257,426         | 21.1           |
| Operating expenses (b)        |    | 228,095   | 20.5           | 222,844         | 18.3           |
| Operating income              | \$ | 16,415    | 1.5            | \$<br>34,582    | 2.8            |

(a) Gross profit is calculated as net sales less the cost of materials sold.

(b) Operating expenses are calculated as total costs and expenses less the cost of materials sold.

Tons sold decreased 14 thousand tons, or 1.7%, to 840 thousand tons in 2024 from 854 thousand tons in 2023. Toll tons sold decreased 5 thousand tons, or 15.8%, to 29 thousand tons in 2024 from 34 thousand tons in 2023. We do not report tons sold for our end-use products.

Net sales decreased \$112.0 million, or 9.2%, to \$1.1 billion in 2024 from \$1.2 billion in 2023. The decrease in sales was due to a 7.6% decrease in average selling prices and a 1.7% decrease in sales volume. Average selling prices in 2024 decreased to \$1,321 per ton, compared to \$1,430 per ton in 2023.

Cost of materials sold decreased \$99.1 million, or 10.3%, to \$864.6 million in 2024 from \$963.7 million in 2023. The decrease in cost of materials sold was due to decreased industry metals pricing discussed above in Results of Operations.

As a percentage of net sales, gross profit (as defined in footnote (a) in the table above) increased to 22.0% in 2024 from 21.1% in 2023. The average gross profit per ton sold decreased \$10 per ton, or 3.3%, to \$291 in 2024 from \$301 in 2023. The increase in gross profit as a percentage of net sales is a result of the average cost of inventory decreasing more quickly than the average selling prices as discussed above in Results of Operations, to the value-added acquisitions from 2023 having a continued positive impact on gross profit as well as the November 11, 2024 acquisition of Metal Works.

Operating expenses in 2024 increased \$5.3 million, or 2.4%, to \$228.1 million from \$222.8 million in 2023. As a percentage of net sales, operating expenses increased to 20.5% in 2024 from 18.3% in 2023. Operating expenses increased primarily due to the November 11, 2024 acquisition of Metal Works, increased operating costs related to distribution and depreciation and the absence of year-over-year ERCs provided through CARES Act in 2023.

Operating income totaled \$16.4 million, or 1.5% of net sales, in 2024 compared to operating income of \$34.6 million, or 2.8% of net sales, in 2023.

#### Tubular and pipe products

The following table sets forth certain income statement data for the tubular and pipe products segment for the years ended December 31, 2024 and 2023 (dollars shown in thousands).

|                                   | 2024 |         |                |    | 2023    |                |  |  |  |  |  |  |
|-----------------------------------|------|---------|----------------|----|---------|----------------|--|--|--|--|--|--|
|                                   |      |         | % of net sales |    |         | % of net sales |  |  |  |  |  |  |
| Net sales                         | \$   | 335,718 | 100.0          | \$ | 369,342 | 100.0          |  |  |  |  |  |  |
| Cost of materials sold (a)        |      | 219,672 | 65.4           |    | 247,212 | 66.9           |  |  |  |  |  |  |
| Gross profit <sup>(b)</sup>       |      | 116,046 | 34.6           |    | 122,130 | 33.1           |  |  |  |  |  |  |
| Operating expenses <sup>(c)</sup> |      | 87,237  | 26.0           |    | 81,438  | 22.1           |  |  |  |  |  |  |
| Operating income                  | \$   | 28,809  | 8.6            | \$ | 40,692  | 11.0           |  |  |  |  |  |  |

(a) Includes \$5,702 and \$8,258 of LIFO income in 2024 and 2023, respectively.

(b) Gross profit is calculated as net sales less the cost of materials sold.

(c) Operating expenses are calculated as total costs and expenses less the cost of materials sold.

Net sales decreased \$33.6 million, or 9.1%, to \$335.7 million in 2024 from \$369.3 million in 2023. The decrease in net sales was due to a 11.4% decrease in average selling prices partially offset by a 2.6% increase in sales volume during 2024 due, in part to the CTB acquisition.

Cost of materials sold decreased \$27.5 million, or 11.1%, to \$219.7 million in 2024 from \$247.2 million in 2023. The decrease in cost of materials sold is due to decreased metals pricing discussed above in Results of Operations. As a result of continued decreasing prices, during 2024, our tubular and pipe products segment recorded \$5.7 million of LIFO income, compared to \$8.3 million of LIFO income recorded in 2023.

As a percentage of net sales, gross profit (as defined in footnote (b) in the table above) increased to 34.6% in 2024 compared to 33.1% in 2023. As a percentage of net sales, the LIFO income recorded in 2024 increased gross profit by 1.7% compared to the LIFO income recorded in 2023, which increased gross profit by 2.2%.

Operating expenses (as defined in footnote (c) in the table above) increased \$5.8 million, or 7.1%, to \$87.2 million in 2024 from \$81.4 million in 2023. As a percentage of net sales, operating expenses increased to 26.0% in 2024 compared to 22.1% in 2023. Operating expenses increased primarily due to the October 2, 2023 acquisition of CTB, partially offset by lower year-over-year variable performance based compensation.

Operating income for 2024 totaled \$28.8 million, or 8.6% of net sales, compared to \$40.7 million, or 11.0% of net sales, in 2023.

# Corporate expenses

Corporate expenses decreased \$3.4 million, or 16.6%, to \$17.1 million in 2024 compared to \$20.5 million in 2023. Corporate expense decreased primarily due to the absence of \$3.5 million of fees related to the 2023 acquisitions of Metal-Fab and CTB and lower variable performance-based incentive compensation.

#### Liquidity, Capital Resources and Cash Flows

Our principal capital requirements include funding working capital needs, purchasing, upgrading and acquiring processing equipment and facilities, making acquisitions and paying dividends. We use cash generated from operations and borrowings under our asset-based credit facility, or ABL Credit Facility, to fund these requirements.

We believe that funds available under our ABL Credit Facility, together with funds generated from operations, will be sufficient to provide us with the liquidity necessary to fund anticipated working capital requirements, capital expenditure requirements, our dividend payments and any share repurchases and business acquisitions over at least the next 12 months and for the foreseeable future thereafter. In the future, we may as part of our business strategy, acquire and dispose of assets or other companies in the same or complementary lines of business, or enter into or exit strategic alliances and joint ventures. Accordingly, the timing and size of our capital requirements are subject to change as business conditions warrant and opportunities arise.

# 2024 Compared to 2023

# **Operating** Activities

During 2024, we generated \$33.7 million of cash from operations, of which \$53.9 million was generated from operating activities and \$20.2 million was used for working capital requirements. Net cash from operations during 2024 was primarily comprised of net income of \$23.0 million and the \$30.9 million addback of non-cash depreciation and amortization expense. During 2023, we generated \$175.2 million of net cash from operations, of which \$94.1 million was generated from working capital and \$81.1 million was generated from operating activities. Net cash from operations during 2023 was primarily comprised of net income of \$44.5 million and the \$27.2 million addback of non-cash depreciation and amortization expense.

Working capital at December 31, 2024 totaled \$448.0 million, a \$25.0 million increase from December 31, 2023. The increase was primarily attributable to a \$39.1 million decrease in accounts payable and outstanding checks, a \$8.0 million decrease in accrued payroll and other accrued liabilities and a \$0.6 million increase in inventory, offset by a \$27.2 million decrease in accounts receivable and a \$0.4 million decrease in prepaid expenses and other.

#### **Investing** Activities

Net cash used for investing activities was \$109.4 million during 2024, compared to \$190.8 million during 2023. Investment activities in 2024 included \$80.0 million for the acquisition of Metal Works on November 11, 2024 and \$29.5 million of capital expenditures, primarily attributable to processing equipment and automation equipment at our existing facilities. Investment activities in 2023 included \$169.8 million for the acquisitions of Metal-Fab in January 2023 and CTB in October 2023 and \$21.3 million of capital expenditures, primarily attributable to processing equipment at our existing facilities.

#### **Financing** Activities

During 2024, \$74.4 million of cash was generated from financing activities, which primarily consisted of \$82.3 million of net borrowings under our ABL Credit Facility, offset by \$6.7 million of dividends paid, \$1.0 million of principal payments for financing lease obligations and \$0.2 million of payments for credit facility fees and expenses. During 2023, \$16.7 million of cash was generated from financing activities, which primarily consisted of \$24.5 million of net borrowings under our ABL Credit Facility, offset by \$5.6 million of dividends paid, \$1.2 million of credit facility fees and expenses and \$1.0 million of principal payments for credit facility fees and expenses and \$1.0 million of principal payments for financing lease obligations.

In February 2025, our Board of Directors approved a regular quarterly dividend of \$0.16 per share, which is payable on March 17, 2025 to shareholders of record as of March 3, 2025. Our Board previously approved 2024 and 2023 regular quarterly dividends of \$0.150 per share and \$0.125 per share, respectively, which were paid in March, June, September and December of 2024 and 2023. Dividend distributions in the future are subject to the availability of cash, limitations on cash dividends under our ABL Credit Facility and continuing determination by our Board of Directors that the payment of dividends remains in the best interest of our shareholders.

#### Stock Repurchase Program

In 2015, our Board of Directors authorized a stock repurchase program of up to 550,000 shares of our issued and outstanding common stock, which could include open market repurchases, negotiated block transactions, accelerated stock repurchases or open market solicitations for shares, all or some of which may be effected through Rule 10b5-1 plans. Repurchased shares will be held in our treasury, or canceled and retired as our Board of Directors may determine from time to time. Any repurchases of common stock are subject to the covenants contained in the ABL Credit Facility. Under the ABL Credit Facility, we may repurchase common stock and pay dividends up to \$15.0 million in the aggregate during any trailing twelve months without restrictions. Purchases in excess of \$15.0 million require us to (i) maintain availability equal to or greater than \$15.0 of the aggregate revolver commitments (\$93.8 million at December 31, 2024) or (ii) to maintain availability equal to or greater than \$15.0 of earnings before interest, taxes, depreciation and amortization, or EBITDA, minus certain capital expenditures and cash taxes paid to fixed charges of at least 1.00 to 1.00. The timing and amount of any repurchases under the ABL Credit Facility, and repurchases may be discontinued at any time. As of December 31, 2024, 360,212 shares remain authorized for repurchase under the program. There were no shares repurchased during 2024 or 2023.

#### At- the-Market Equity Program

On September 3, 2021, we commenced an at-the-market, or ATM, equity program under our shelf registration statement, which allows us to sell and issue up to \$50 million in shares of our common stock from time to time. We entered into an Equity Distribution Agreement on September 3, 2021 with KeyBanc Capital Markets Inc., or KeyBanc, relating to the issuance and sale of shares of common stock pursuant to the program. KeyBanc is not required to sell any specific amount of securities but will act as our sales agent using commercially reasonable efforts consistent with its normal trading and sales practices, on mutually agreed terms between KeyBanc and us. KeyBanc will be entitled to compensation for shares sold pursuant to the program of 2.0% of the gross proceeds of any shares of common stock sold under the Equity Distribution Agreement. No shares were sold under the ATM program during 2024 or 2023.

# **Debt** Arrangements

We are parties to a Third Amended and Restated Loan and Security Agreement, as amended, which provides for a \$625 million ABL Credit Facility consisting of: (i) a revolving credit facility of up to \$595 million, including a \$20 million sublimit for letters of credit, and (ii) a first in, last out revolving credit facility of up to \$30 million. Under the terms of the ABL Credit Facility, we may, subject to the satisfaction of certain conditions, request additional commitments under the revolving credit facility in the aggregate principal amount of up to \$200 million to the extent that existing or new lenders agree to provide such additional commitments and add real estate as collateral at our discretion. The ABL Credit Facility matures on June 16, 2026.

The ABL Credit Facility contains customary representations and warranties and certain covenants that limit our ability to, among other things: (i) incur or guarantee additional indebtedness; (ii) pay distributions on, redeem or repurchase capital stock or redeem or repurchase subordinated debt; (iii) make investments; (iv) sell assets; (v) enter into agreements that restrict distributions or other payments from restricted subsidiaries to us; (vi) incur or suffer to exist liens securing indebtedness; (vii) consolidate, merge or transfer all or substantially all of their assets; and (viii) engage in transactions with affiliates. In addition, the ABL Credit Facility contains a financial covenant which provides that: (i) if any commitments or obligations are outstanding and our availability is less than the greater of \$30 million or 10.0% of the aggregate amount of revolver commitments (\$62.5 million at December 31, 2024) or 10.0% of the aggregate borrowing base (\$47.0 million at December 31, 2024), then we must maintain a ratio of EBITDA minus certain capital expenditures and cash taxes paid to fixed charges of at least 1.00 to 1.00 for the most recent twelve fiscal month period.

We have the option to borrow under its revolver based on the agent's base rate plus a premium ranging from 0.00% to 0.25% or the Secured Overnight Financing Rate, or SOFR, plus a premium ranging from 1.25% to 2.75%.

As of December 31, 2024, we were in compliance with our covenants and had approximately \$192.8 million of availability under the ABL Credit Facility.

As of December 31, 2024, \$1.1 million of bank financing fees were included in "Prepaid expenses and other" and "Other long-term assets" on the accompanying Consolidated Balance Sheets. The financing fees are being amortized over the five-year term of the ABL Credit Facility and are included in "Interest and other expense on debt" on the accompanying Consolidated Statements of Comprehensive Income.

On August 15, 2024, we entered into a two-year forward starting fixed rate interest rate hedge in order to eliminate the variability of cash interest payments on \$75 million of the outstanding SOFR based borrowings under the ABL Credit Facility. The interest rate hedge fixed the rate at 3.82%. Although we are exposed to credit losses in the event of nonperformance by the other party to the interest rate hedge agreement, we anticipate performance by the counterparty.

#### **Contractual and Other Obligations**

The following table reflects the material cash requirements for our contractual and other obligations as of December 31, 2024. We believe that funds available under our ABL Credit Facility, together with funds generated from operations, will be sufficient to provide us with the liquidity necessary to satisfy these obligations in the short term over the next 12 months and also in the long term beyond the next 12 months.

| Contractual and Other Obligations (amounts in thousands) |     | Total         | Ι  | less than<br>1 year | 1  | -3 years | 3-5 | 5 years | <br>lore than<br>5 years |
|----------------------------------------------------------|-----|---------------|----|---------------------|----|----------|-----|---------|--------------------------|
| Long-term debt obligations                               | (a) | <br>272,456   | \$ | -                   | \$ | 272,456  | \$  | -       | \$<br>-                  |
| Interest obligations                                     | (b) | 22,950        |    | 15,697              |    | 7,253    |     | -       | -                        |
| Finance lease obligations                                | (c) | 2,821         |    | 976                 |    | 1,313    |     | 524     | 8                        |
| Unrecognized tax positions                               | (d) | 293           |    | 111                 |    | 182      |     | -       | -                        |
| Other long-term liabilities                              | (e) | 22,857        |    | 3,944               |    | 11,432   |     | 5,253   | 2,228                    |
| Total contractual and other obligations                  |     | \$<br>321,377 | \$ | 20,728              | \$ | 292,636  | \$  | 5,777   | \$<br>2,236              |

(a) See Note 9 to the Consolidated Financial Statements.

(b) Future interest obligations are calculated using the debt balances and interest rates in effect on December 31, 2024.

- (c) See Note 8 to the Consolidated Financial Statements.
- (d) See Note 14 to the Consolidated Financial Statements. Classification is based on expected settlement dates and the expiration of certain statutes of limitations.
- (e) Consists of retirement liabilities, long-term cash incentives and deferred compensation payable in future years.

# **Off-Balance Sheet Arrangements**

An off-balance sheet arrangement is any contractual arrangement involving an unconsolidated entity under which a company has (a) made guarantees, (b) a retained or a contingent interest in transferred assets, (c) any obligation under certain derivative instruments or (d) any obligation under a material variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to a company, or engages in leasing, hedging, or research and development services within a company.

Other than derivative instruments discussed in Note 10 to the Consolidated Financial Statements, as of December 31, 2024, we had no material off-balance sheet arrangements.

# **Effects of Inflation**

Inflation generally affects us by increasing the cost of employee wages and benefits, transportation services, energy, borrowings under our credit facility, processing equipment, and purchased metals. Although general inflation, excluding increases in the price of metals, increased labor and interest rates, has increased during 2024, it has not had a material effect on our financial results during the past three years, but may have a significant impact in future years.

#### **Critical Accounting Estimates**

This discussion and analysis of financial condition and results of operations is based on our consolidated financial statements, which have been prepared in conformity with accounting principles generally accepted in the United States. The preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements. Actual results could differ from these estimates under different assumptions or conditions. On an on-going basis, we monitor and evaluate our estimates and assumptions.

We believe the accounting estimates employed are appropriate and the resulting balances are reasonable; however, due to the inherent uncertainties in developing estimates, actual results could differ from the original estimates, requiring adjustments to these balances in future periods. See Note 1 to our consolidated financial statements for our significant accounting policies related to our critical accounting estimates.

#### Allowance for Credit Losses

The allowance for credit losses is maintained at a level considered appropriate based on historical experience and specific customer collection issues that we have identified. Estimations are based upon the application of a historical collection rate to the outstanding accounts receivable balance, which remains fairly level from year to year, and judgments about the probable effects of economic conditions on certain customers, which can fluctuate significantly from year to year. We cannot be certain that the rate of future credit losses will be similar to past experience. We consider all available information when assessing the adequacy of our allowance for credit losses each quarter.

## Valuation of Inventory

Non-LIFO inventories are stated at the lower of its cost or net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. LIFO inventories are stated at the lower of cost or market. Market is the estimated selling price in the ordinary course of business, less reasonable predictable costs of completion. Inventory costs include the costs of purchased metal, inbound freight, external and internal processing and applicable labor and overhead costs.

The cost of our specialty metals and carbon flat products segments' inventories, including flat-rolled sheet, coil and plate products are determined using the specific identification method.

Certain inventoried products of our tubular and pipe segment are stated under the LIFO method. At December 31, 2024, and December 31, 2023, approximately \$31.3 million, or 8.0% of consolidated inventory, and \$38.2 million, or 9.9% of consolidated inventory, respectively, was reported under the LIFO method of accounting. The cost of the remainder of our tubular and pipe product segment's inventory is determined using a weighted average rolling first-in, first-out (FIFO) method.

On the Consolidated Statements of Comprehensive Income, "Costs of materials sold" consists of the cost of purchased metals, inbound and internal transfer freight, external processing costs, and LIFO income or expense.

#### Valuation of Deferred Tax Assets

The ability to realize deferred tax assets depends on the ability to generate sufficient taxable income within the carryback or carryforward periods provided for in the tax law for each applicable tax jurisdiction. The assessment regarding whether a valuation allowance is required or should be adjusted is based on an evaluation of possible sources of taxable income and also considers all available positive and negative evidence factors. Deferred income taxes on the consolidated balance sheet include, as an offset to the estimated temporary differences between the tax basis of assets and liabilities and the reported amounts on the consolidated balance sheets, the tax effect of operating loss and tax credit carryforwards. If we determine that we will not be able to fully realize a deferred tax asset, we will record a valuation allowance to reduce such deferred tax asset to its net realizable value. We recognize the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority.

#### **Impact of Recently Issued Accounting Pronouncements**

In November 2024, the Financial Accounting Standards Board, or FASB, issued Accounting Standards Update, or ASU, No. 2024-03 "Income Statement-Reporting Comprehensive Income (Topic 220): Disaggregation of Income Statement Expenses". The objective of this ASU is to enhance transparency into the nature and function of income statement expenses. The amendments require that, on an annual and interim basis, entities disclose disaggregated operating expense information about specific categories, including purchases of inventory, employee compensation, depreciation and amortization. This ASU is effective for annual periods beginning after December 15, 2026 and interim periods beginning after December 15, 2027, with early adoption permitted. We are in the process of evaluating the effect of this new guidance on the related disclosures.

In December 2023, the FASB issued ASU No. 2023-09, "Income Taxes (Topic 740): Improvements to Income Tax Disclosures". The objective of this ASU is to improve the information a reporting entity provides to users of financials statements about the entity's operations and the effects of related tax risks and tax planning on the entity's tax rate and potential future cash flows. This ASU enhances disclosures regarding the rate reconciliation, income taxes paid and other items. This ASU is effective for annual periods beginning after December 15, 2024 for public business entities. We are not an early adopter of this guidance and its impacts are not included prospectively or retrospectively on our Consolidated Financial Statements included in this Annual Report on Form 10-K.

In November 2023, FASB issued ASU No. 2023-07, "Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosure". The objective of this ASU is to enhance the disclosures a public entity provides about their reportable segments. The ASU does not amend any of the existing guidance or requirements in Topic 280, Segment Reporting. Under this ASU, public entities must disclose incremental segment information on both an annual and interim basis. This ASU is effective for annual periods beginning after December 15, 2023 and interim periods beginning after December 15, 2024, applied retroactively. The adoptions of this ASU in this Annual Report on Form 10-K did not have a material impact on our Consolidated Financial Statements.

In March 2020, the FASB issued ASU No. 2020-04, "Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting". The objective of this ASU is to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. The amendments in this ASU are elective and apply to all entities, subject to meeting certain criteria, that have contracts, hedging relationships and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. Then in December 2022, the FASB issued ASU No. 2022-06, "Deferral of the Sunset Date of Topic 848," which amends and extends the sunset date to December 31, 2024. We adopted this ASU in the first quarter of 2024 for the modification of the ABL Credit Facility and the corresponding interest rate hedge, which did not have a material impact on our Consolidated Financial Statements.

# ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our principal raw materials are carbon, coated and stainless steel, and aluminum, pipe and tube, flat rolled coil, sheet and plate that we typically purchase from multiple primary metals producers. The metals industry as a whole is cyclical and, at times, pricing and availability of metals can be volatile due to numerous factors beyond our control, including general domestic and international economic conditions, the levels of metals imported into the United States, labor costs, sales levels, competition, levels of inventory held by other metals service centers, consolidation of metals producers, new global capacity by metals producers, higher raw material costs for the producers of metals, import duties and tariffs, including the proposed reinstatement of tariffs on steel and increases to aluminum announced in February 2025, and currency exchange rates. This volatility can significantly affect the availability and cost of raw materials for us.

Like many other metals service centers, we maintain substantial inventories of metals to accommodate the short lead times and just-in-time delivery requirements of our customers. Accordingly, we purchase metals in an effort to maintain our inventory at levels that we believe to be appropriate to satisfy the anticipated needs of our customers based upon historic buying practices, supply agreements with customers and market conditions. Our commitments to purchase metals are generally at prevailing market prices in effect at the time we place our orders. We have no long-term, fixed-price metals purchase contracts. When metals prices increase, competitive conditions will influence how much of the price increase we can pass on to our customers. To the extent we are unable to pass on future price increases in our raw materials to our customers, the net sales and profitability of our business could be adversely affected. When metals prices and, consequently, lower gross profits and inventory lower of cost or market adjustments as we sell existing inventory. Significant or rapid declines in metals prices or reductions in sales volumes could adversely impact our ability to remain in compliance with certain financial covenants in our credit facility, as well as result in us incurring inventory or intangible asset impairment charges. Changing metals prices therefore could significantly impact our net sales, gross profits, operating income and net income.

Rising metals prices result in higher working capital requirements for us and our customers. Some customers may not have sufficient credit lines or liquidity to absorb significant increases in the price of metals. While we have generally been successful in the past in passing on producers' price increases and surcharges to our customers, there is no guarantee that we will be able to pass on price increases to our customers in the future. Declining metals prices have generally adversely affected our net sales and net income, while increasing metals prices have generally favorably affected our net sales and net income.

Approximately 49%, 48% and 52% of our consolidated net sales in 2024, 2023 and 2022, respectively, were directly related to industrial machinery and equipment manufacturers and their fabricators.

Inflation generally affects us by increasing the cost of employee wages and benefits, transportation services, energy, borrowings under our credit facility, processing equipment, and purchased metals. Although general inflation, excluding increases in the price of metals and increased labor and distribution expense, has increased during 2024, it has not had a material effect on our financial results during the past three years, but may have a significant impact in future years.

We are exposed to the impact of fluctuating metals prices and interest rate changes. During 2024, 2023 and 2022, we entered into metals swaps at the request of customers. These derivatives have not been designated as hedging instruments. For certain customers, we enter into contractual relationships that entitle us to pass-through the economic effect of trading positions that we take with other third parties on our customers' behalf.

Our primary interest rate risk exposure results from variable rate debt. If interest rates in the future were to increase 100 basis points (1.0%) from December 31, 2024 rates and, assuming no change in total debt from December 31, 2024 levels, the additional annual interest expense to us would be approximately \$2.0 million. We have the option to enter into 30- to 180-day fixed base rate SOFR loans under the revolving credit facility provided by our ABL Credit Facility.

On August 15, 2024, we entered into a two-year interest rate swap that locked the interest rate at 3.82% on \$75 million of our revolving debt. The interest rate swap expires on August 15, 2026.

#### **Report of Independent Registered Public Accounting Firm**

Board of Directors and Shareholders Olympic Steel, Inc.

# **Opinion on the financial statements**

We have audited the accompanying consolidated balance sheets of Olympic Steel, Inc. (an Ohio corporation) and subsidiaries (the "Company") as of December 31, 2024 and 2023, the related consolidated statements of comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2024, and the related notes and financial statement schedule included under Item 15(a) (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"), and our report dated February 21, 2025, expressed an unqualified opinion.

#### **Basis for opinion**

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

# Critical audit matter

Critical audit matters are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. We determined that there are no critical audit matters.

We have served as the Company's auditor since 2019.

Cleveland, Ohio February 21, 2025

#### **Report of Independent Registered Public Accounting Firm**

Board of Directors and Shareholders Olympic Steel, Inc.

## Opinion on internal control over financial reporting

We have audited the internal control over financial reporting of Olympic Steel, Inc. (an Ohio corporation) and subsidiaries (the "Company") as of December 31, 2024, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the COSO").

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated financial statements of the Company as of and for the year ended December 31, 2024, and our report dated February 21, 2025 expressed an unqualified opinion on those financial statements.

#### **Basis for opinion**

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Our audit of, and opinion on, the Company's internal control over financial reporting does not include the internal control over financial reporting of Metal Works, LLC, a wholly-owned subsidiary, whose financial statements reflect total assets and revenues constituting 7.9 and 0.2 percent, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2024. As indicated in Management's Report, Metal Works, LLC was acquired during 2024. Management's assertion on the effectiveness of the Company's internal control over financial reporting excluded internal control over financial reporting of Metal Works, LLC.

# Definition and limitations of internal control over financial reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Cleveland, Ohio February 21, 2025

#### Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2024. In making this assessment, our management used the criteria established in *Internal Control - Integrated Framework (2013)*, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Our management's assessment of and conclusion on the effectiveness of its internal control over financial reporting did not include the internal controls of the company it acquired during the fiscal 2024 which were included in the 2024 consolidated financial statements. The acquired company constituted \$80.3 million, or 7.9%, of our total assets as of December 31, 2024, and \$4.7 million, or 0.2%, of net sales for the year ended December 31, 2024.

Based on our assessment, we concluded that, as of December 31, 2024, our internal control over financial reporting was effective based on those criteria.

The effectiveness of our internal control over financial reporting as of December 31, 2024 has been audited by Grant Thornton LLP, an independent registered public accounting firm, as stated in their report, which appears herein.

#### Olympic Steel, Inc. Notes to Consolidated Financial Statements For The Years Ended December 31, 2024, 2023 and 2022

# 1. <u>Summary of Significant Accounting Policies:</u>

#### **Nature of Business**

The Company operates in three reportable segments: specialty metals flat products, carbon flat products, and tubular and pipe products. The specialty metals flat products segment and the carbon flat products segment are at times consolidated and referred to as the flat products segments. Certain of the flat products segments' assets and resources are shared by the specialty metals and carbon flat products segments, and both segments' products are stored in the shared facilities and, in some locations, processed on shared equipment. As such, total assets and capital expenditures are reported in the aggregate for the flat products segment. Due to the shared assets and resources, certain of the flat products segment expenses are allocated between the specialty metals flat products segment and the carbon flat products segment based upon an established allocation methodology. The Company is a leading metals service center focused on the direct sale and value-added processing of carbon and coated steel, plate and coil products; stainless steel sheet, plate, bar and coil; aluminum sheet, plate and coil; pipe, tube bar, valves and fittings, tin plate and metal-intensive end-use products. The specialty metals flat products segment sells and distributes processed aluminum and stainless flat-rolled sheet and coil products, flat bar products, prime tin mill products and fabricated parts. Through acquisitions, the specialty metals flat products segment has expanded its geographic footprint and enhanced its product offerings in stainless steel and aluminum plate, sheet, angles, rounds, flat bar, tubing and pipe, stainless steel bollards and water treatment systems. The carbon flat products segment sells and distributes large volumes of processed carbon and coated flat-rolled sheet, coil and plate products and fabricated parts. Through acquisitions, our carbon flat products segment has expanded its product offerings to include self-dumping metal hoppers and steel and stainless-steel dump inserts for pickup truck and service truck beds. Through the acquisition of Metal-Fab, Inc. (Metal-Fab) on January 3, 2023, the carbon flat products segment further expanded its product offerings to include venting, micro air and clean air products for residential, commercial and industrial applications. With the recent acquisition of Metal Works, LLC (Metal Works) on November 11, 2024, the carbon flat products segment further expanded its product offerings to include the manufacture of service station canopies, deck clips, long gutters, trim and boat docks, as well as solar canopy and ground racking components. The tubular and pipe product segment distributes metal tubing, pipe, bar, valves and fittings and the fabrication of parts, tube and bar products, including round, square, rectangular and special shaped tubes supplied to various industrial markets. Through the acquisition of Central Tube and Bar, Inc. (CTB) on October 2, 2023, the tubular and pipe products segment further expanded its geographic footprint and extended its value-added contract manufacturing capabilities.

Corporate expenses are reported as a separate line item for segment reporting purposes. Corporate expenses include the unallocated expenses related to managing the entire Company (i.e., all three segments), including payroll expenses for certain personnel, expenses related to being a publicly traded entity such as board of directors' expenses, audit expenses, and various other professional fees.

# Principles of Consolidation and Basis of Presentation

The accompanying consolidated financial statements have been prepared from the financial records of Olympic Steel, Inc. and its wholly-owned subsidiaries (collectively, Olympic or the Company), after elimination of intercompany accounts and transactions.

#### **Accounting Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

# **Concentration Risks**

The Company is a major customer of flat-rolled coil and plate and tubular and pipe steel for many of its principal suppliers, but is not dependent on any one supplier. The Company purchased approximately 38%, 40% and 39% of its total steel tonnage requirements from its three largest suppliers in 2024, 2023 and 2022, respectively.

The Company has a diversified customer and geographic base, which reduces the inherent risk and cyclicality of its business. The concentration of net sales to the Company's top 20 customers approximated 28%, 29% and 26% of consolidated net sales in 2024, 2023 and 2022, respectively. In addition, the Company's largest customer accounted for approximately 3% of consolidated net sales in each of 2024, 2023 and 2022. Sales to industrial machinery and equipment manufacturers and their fabricators accounted for 49%, 48% and 52% of consolidated net sales in 2024, 2023 and 2022, respectively.

# Cash and Cash Equivalents

Cash equivalents consist of short-term highly liquid investments, with a three month or less maturity, which are readily convertible into cash. The Company maintains cash levels in bank accounts that, at times, may exceed federally-insured limits. The Company has not experienced significant loss, and believe we are not exposed to significant risk of loss, in these accounts.

# Fair Market Value

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the liability in an orderly transaction between market participants on the measurement date. Valuation techniques must maximize the use of observable inputs and minimize the use of unobservable inputs. To measure fair value, the Company applies a fair value hierarchy that is based on three levels of inputs, of which the first two are considered observable and the last unobservable, as follows:

Level 1 – Quoted prices in active markets for identical assets or liabilities.

*Level* 2 – Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

*Level* 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Financial instruments, such as cash and cash equivalents, accounts receivable, accounts payable and the credit facility, are stated at their carrying value, which is a reasonable estimate of fair value. The fair value of marketable securities is based on quoted market prices.

# Allowance for Credit Losses

The Company's allowance for credit losses is maintained at a level considered appropriate based on historical experience and specific customer collection issues that the Company has identified. Estimations are based upon the application of a historical collection rate to the outstanding accounts receivable balance, which remains fairly level from year to year, and judgments about the probable effects of economic conditions on certain customers, which can fluctuate significantly from year to year. The Company cannot guarantee that the rate of future credit losses will be similar to past experience. The Company considers all available information when assessing the adequacy of the allowance for credit losses each quarter.

# **Inventory Valuation**

Non-LIFO inventories are stated at the lower of its cost or net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. LIFO inventories are stated at the lower of cost or market. Market is the estimated selling price in the ordinary course of business, less reasonable predictable costs of the purchased metals, inbound freight, external and internal processing and applicable labor and overhead costs.

Substantially all of the costs of the Company's specialty metals and carbon flat products segments' inventories, including flat-rolled sheet, coil and plate products are determined using the specific identification method.

Certain of the Company's tubular and pipe products inventory is stated under the LIFO method. At December 31, 2024 and December 31, 2023, approximately \$31.3 million, or 8.0% of consolidated inventory, and \$38.2 million, or 9.9% of consolidated inventory, respectively, was reported under the LIFO method of accounting. The cost of the remainder of tubular and pipe product segment's inventory is determined using a weighted average rolling first-in, first-out (FIFO) method.

On the Consolidated Statements of Comprehensive Income, "Cost of materials sold (exclusive of items shown separately below)" consists of the cost of purchased metals, inbound and internal transfer freight, external processing costs, and LIFO income or expense.

# Property and Equipment, and Depreciation

Property and equipment are stated at cost. Depreciation is provided using the straight-line method over the estimated useful lives of the assets ranging from two to 30 years. The Company capitalizes the costs of obtaining or developing internal-use software, including directly related payroll costs. The Company amortizes those costs over five years, beginning when the software is ready for its intended use.

# Intangible Assets and Recoverability of Long-lived Assets

The Company performs an annual impairment test of indefinite-lived intangible assets in the fourth quarter, or more frequently if changes in circumstances or the occurrence of events indicate potential impairment. Events or changes in circumstances that could trigger an impairment review include significant nonperformance relative to the expected historical or projected future operating results, significant changes in the manner of the use of the acquired assets or the strategy for the overall business or significant negative industry or economic trends. Management uses judgment to determine whether to use a qualitative analysis or a quantitative fair value measurement for each of the Company's reporting units that carry intangible assets.

If a quantitative fair value measurement is used, the fair value of each indefinite-lived intangible asset is compared to its carrying value and an impairment charge is recorded if the carrying value exceeds the fair value. The Company estimates the fair value of indefinite-lived intangible assets using a discounted cash flow methodology. Management's assumptions used for the calculations are based on historical results, projected financial information and recent economic events. Actual results could differ from these estimates under different assumptions or conditions, which could adversely affect the reported value of intangible assets.

The Company evaluates the recoverability of long-lived assets and the related estimated remaining lives whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Events or changes in circumstances that could trigger an impairment review include significant underperformance relative to the expected historical or projected future operating results, significant changes in the manner of the use of the acquired assets or the strategy for the overall business or significant negative industry or economic trends. The Company records an impairment or change in useful life whenever events or changes in circumstances indicate that the carrying amount may not be recoverable or the useful life has changed.

# **Income Taxes**

The Company records, as an offset to the estimated effect of temporary differences between the tax basis of assets and liabilities and the reported amounts in its consolidated balance sheets, the tax effect of operating loss and tax credit carryforwards. If the Company determines that it will not be able to fully realize a deferred tax asset, it will record a valuation allowance to reduce such deferred tax asset to its realizable value. The Company recognizes interest accrued related to unrecognized tax benefits in income tax expense. Penalties, if incurred, would be recognized as a component of administrative and general expense.

The Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority.

The Company had no material unrecognized tax benefits as of or during the year ended December 31, 2024. The Company expects no significant increases or decrease in unrecognized tax benefits due to changes in tax positions within one year of December 31, 2024.

#### **Revenue Recognition**

The Company's contracts with customers are comprised of purchase orders with standard terms and conditions. Occasionally, the Company may also have longer-term agreements with customers. Substantially all of the contracts with customers require the delivery of metals, which represent single performance obligations that are satisfied upon transfer of control of the product to the customer.

Transfer of control is assessed based on the use of the product distributed and rights to payment for performance under the contract terms. Transfer of control and revenue recognition for substantially all of the Company's sales occur upon shipment or delivery of the product, which is when title, ownership and risk of loss pass to the customer and is based on the applicable shipping terms. The shipping terms depend on the customer contract. An invoice for payment is issued at time of shipment and terms are generally net 30 days.

Sales returns and allowances are treated as reductions to sales and are provided for based on historical experience and current estimates and are immaterial to the consolidated financial statements.

# Shipping and Handling Fees and Costs

Amounts charged to customers for shipping and other transportation services are included in net sales. The distribution expense line on the accompanying Consolidated Statements of Comprehensive Income is entirely comprised of all shipping and other transportation costs incurred by the Company in shipping goods to its customers.

#### **Stock-Based Compensation**

The Company records compensation expense for stock awards issued to employees and directors. For additional information, see Note 12, Equity Plans.

#### **Impact of Recently Issued Accounting Pronouncements**

In November 2024, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2024-03, "Income Statement-Reporting Comprehensive Income (Topic 220): Disaggregation of Income Statement Expenses". The objective of this ASU is to enhance transparency into the nature and function of income statement expenses. The amendments require that, on an annual and interim basis, entities disclose disaggregated operating expense information about specific categories, including purchases of inventory, employee compensation, depreciation and amortization. This ASU is effective for annual periods beginning after December 15, 2026 and interim periods beginning after December 15, 2027, with early adoption permitted. The Company in the process of evaluating the effect of this new guidance on the related disclosures.

In December 2023, the FASB issued ASU No. 2023-09, "Income Taxes (Topic 740): Improvements to Income Tax Disclosures". The objective of this ASU is to improve the information a reporting entity provides to users of financials statements about the entity's operations and the effects of related tax risks and tax planning on the entity's tax rate and potential future cash flows. This ASU enhances disclosures regarding the rate reconciliation, income taxes paid and other items. This ASU is effective for annual periods beginning after December 15, 2024 for public business entities. The Company is not an early adopter of this guidance and its impacts are not included prospectively or retrospectively in the Company's Consolidated Financial Statements included in this Annual Report on Form 10-K.

In November 2023, the FASB issued ASU No. 2023-07, "Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosure". The objective of this ASU is to enhance the disclosures a public entity provides about their reportable segments. The ASU does not amend any of the existing guidance or requirements in Topic 280, Segment Reporting. Under this ASU, public entities must disclose incremental segment information on both an annual and interim basis. This ASU is effective for annual periods beginning after December 15, 2023 and interim periods beginning after December 15, 2024, applied retroactively. The adoption of this ASU in this Annual Report on Form 10-K did not have a material impact on the Company's Consolidated Financial Statements.

In March 2020, the FASB issued ASU No. 2020-04, "Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting". The objective of this ASU is to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. The amendments in this ASU are elective and apply to all entities, subject to meeting certain criteria, that have contracts, hedging relationships and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. Then in December 2022, the FASB issued ASU No. 2022-06, "Deferral of the Sunset Date of Topic 848," which amends and extends the sunset

date to December 31, 2024. We adopted this ASU in the first quarter of 2023 for the modification of the asset-based credit facility (the ABL Credit Facility) and the corresponding interest rate hedge. The adoption of the standard did not have a material impact on the Company's Consolidated Financial Statements.

# 2. <u>Acquisitions</u>

On November 11, 2024, the Company acquired substantially all of the net assets of Metal Works for a cash purchase price of \$80.0 million. Metal Works, headquartered in Oakwood, Georgia, is a manufacturer of service station canopies and the business also manufactures deck clips, long gutters, trim and boat docks, as well as solar canopy and ground racking components. During 2024, the Company incurred \$0.2 million of direct acquisition-related costs, which are included in "Administrative and general" in the Consolidated Statements of Comprehensive Income.

On October 2, 2023, the Company acquired all membership interest of CTB. CTB, headquartered in Conway, Arkansas, is a fabricator of tube and bar products which services the transportation, agricultural, commercial furniture and data center construction industries. The Company paid total cash consideration of \$40.3 million, consisting of a base purchase price of \$37.8 million and a working capital adjustment of \$2.5 million. During 2023, the Company incurred \$0.9 million of direct acquisition-related costs, which are included in "Administrative and general" in the Consolidated Statements of Comprehensive Income.

On January 3, 2023, the Company acquired all the outstanding shares of capital stock of Metal-Fab. Metal-Fab, headquartered in Wichita, Kansas, is a manufacturer of venting, micro air and clean air products for residential and industrial applications. The Company paid total cash consideration of \$131.2 million, consisting of a base purchase price of \$131.0 million and a cash adjustment of \$0.2 million. During 2023, the Company incurred \$2.6 million of direct acquisition-related costs, which are included in "Administrative and general" in the Consolidated Statements of Comprehensive Income, and \$2.1 million of non-recurring amortization of inventory fair market value adjustments, which are included in "Cost of materials sold" in the Consolidated Statements of Comprehensive Income.

Each acquisition was funded with borrowings under the ABL Credit Facility.

#### **Purchase Price Allocation**

The acquisitions were accounted for as business combinations and the assets and liabilities were valued at fair market value on the date of acquisition.

The final purchase price allocations presented below are based upon management's estimate of the fair value of the acquired assets and assumed liabilities using Level 3 valuation techniques including income, cost and market approaches. The fair value estimates involve the use of estimates and assumptions, including, but not limited to, the timing and amounts of future cash flows, revenue growth rates, discount rates, and royalty rates. The table below summarizes the final purchase price allocations of the fair market values of the assets acquired and the liabilities assumed.

| Details of Acquisition (in thousands)   | Metal Works As o<br>November 11, 2024 |        | <br>of October<br>2023 | l-Fab As of<br>ary 3, 2023 |

| Cash paid                               | \$                                    | 80,000 | \$<br>40,292           | \$<br>131,204              |

The accompanying Consolidated Statements of Comprehensive Income include the revenues and expenses of Metal Works, CTB and Metal-Fab since November 11, 2024, October 2, 2023 and January 3, 2023, respectively. Metal Work's and Metal-Fab's operations are included within the carbon flat-rolled segment and CTB's operations are included within the tubular and pipe segment. The combined net sales for the 2024 and 2023 acquisitions totaled \$4.7 million and \$110.3 million, respectively.

In connection with the acquisition of Metal Works, the Company identified and valued certain intangible assets, including the Metal Works trade name, internally developed technology and know-how, restrictive covenants and customer relationships. The intangible assets were valued on the premise of highest and best use to a market participant, primarily utilizing the income approach valuation methodology. The trade name intangible asset was valued at \$5.2 million, and the useful life was determined to be indefinite primarily due to their history, reputation in the marketplace, the Company's expectation that the trade name will continue to be used, and the conclusion that there are currently no other factors identified that would limit their useful life. The internally developed technology and know-how intangible assets was valued at \$1.9 million, and the useful life was determined to be 10 years. The non-compete agreements intangible assets were valued at \$0.9 million, and the useful life was determined to be the length of the non-compete agreements, or five years. The customer relationships intangible assets were valued at \$21.9 million, and the useful life was determined to be the length of the set useful life was determined to be 15 years, based primarily on the consistent and predictable revenue source associated with the existing customer base, the present value of which extends through the 15-year amortization period.

In connection with the acquisition of CTB, the Company identified and valued certain intangible assets, including the CTB trade name, internally developed technology and know-how, restrictive covenants and customer relationships. The intangible assets were valued on the premise of highest and best use to a market participant, primarily utilizing the income approach valuation methodology. The trade name intangible asset was valued at \$4.0 million, and the useful life was determined to be indefinite primarily due to their history, reputation in the marketplace, the Company's expectation that the trade name will continue to be used, and the conclusion that there are currently no other factors identified that would limit their useful life. The internally developed technology and know-how intangible asset was valued at \$1.7 million, and the useful life was determined to be 10 years. The non-compete agreements intangible asset was valued at \$0.4 million, and the useful life was determined to be the length of the non-compete agreements, or five years. The customer relationships intangible asset was valued at \$3.5 million, and the useful life was determined to be 10 years determined to be 10 years determined to be 10 years, based primarily on the consistent and predictable revenue source associated with the existing customer base, the present value of which extends through the 10-year amortization period.

In connection with the acquisition of Metal-Fab, the Company identified and valued certain intangible assets, including the Metal-Fab trade name, internally developed technology and know-how, restrictive covenants and customer relationships. The intangible assets were valued on the premise of highest and best use to a market participant, primarily utilizing the income approach valuation methodology. The trade name intangible asset was valued at \$11.5 million, and the useful life was determined to be indefinite primarily due to their history and reputation in the marketplace, the Company's expectation that the trade name will continue to be used, and the conclusion that there are currently no other factors identified that would limit their useful life. The internally developed technology and know-how intangible asset was valued at \$5.3 million, and the useful life was determined to be 15 years. The non-compete agreements intangible asset was valued at \$1.4 million, and the useful life was determined to be the length of the non-compete agreements, which range from two to five years. The customer relationships intangible asset was valued at \$36.5 million, and the useful life was determined to be 26 years, based primarily on the consistent and predictable revenue source associated with the existing customer base, the present value of which extends through the 26-year amortization period.

#### Pro Forma Financial Information

The following pro forma summary of financial results presents the consolidated results of operations as if the Metal-Fab acquisition had occurred on January 1, 2022, after the effect of certain adjustments. The historical consolidated financial information has been adjusted to give effect of the impact of the consideration issued by the Company to Metal-Fab's stockholders in connection with the acquisition and the effect of debt refinancing necessary to complete the transaction. The pro forma summary also includes certain purchase price accounting adjustments, including the items expected to have a continuing impact on combined results, such as depreciation and amortization expense on acquired assets. The pro forma combined financial information does not reflect the cost of any integration activities or benefits that may result from synergies that may be derived from integration activities.

The pro forma results have been presented for comparative purposed only and are not indicative of what would have occurred had the acquisition been made on January 1, 2022, or of any potential results that may occur in the future. The Metal Works and CTB acquisitions were not considered to be material for a pro forma historical analysis.

# 3. <u>Revenue Recognition</u>

The Company provides metals processing, distribution and delivery of large volumes of processed carbon, coated flat-rolled sheet, coil and plate products, aluminum, and stainless flat-rolled products, prime tin mill products, flat bar products, metal tubing, pipe, bar, valves, fittings, fabricated parts and metal-intensive end-use products. The Company's contracts with customers are comprised of purchase orders with standard terms and conditions. Occasionally the Company may also have longer-term agreements with customers. Substantially all of the contracts with customers require the delivery of metals, which represent single performance obligations that are satisfied at a point in time upon transfer of control of the product to the customer.

Transfer of control is assessed based on the use of the product distributed and rights to payment for performance under the contract terms. Transfer of control and revenue recognition for substantially all of the Company's sales occur upon shipment or delivery of the product, which is when title, ownership and risk of loss pass to the customer and is based on the applicable shipping terms. The shipping terms depend on the customer contract. An invoice for payment is issued at time of shipment and terms are generally net 30 days.

Within the metals industry, revenue is frequently disaggregated by products sold. The tables below disaggregates the Company's revenues by segment and products sold for the year ended December 31, 2024, 2023 and 2022, respectively.

|             | Disaggregated Revenue by Products Sold                                |       |                                 |        |  |  |  |  |  |  |  |  |

## 4. Accounts Receivable:

Accounts receivable are presented net of allowances for credit losses and unissued credits of \$3.7 million and \$4.2 million as of December 31, 2024 and 2023, respectively. Credit loss expense totaled \$0.3 million and \$2.2 million in 2024 and 2022 respectively, and credit loss income totaled \$0.4 million in 2023. The allowance for credit losses is maintained at a level considered appropriate based on historical experience, specific customer collection issues that have been identified, current market conditions and estimates for supportable forecasts when appropriate. Estimations are based upon a calculated percentage of accounts receivable, which remains fairly level from year to year, and judgments about the probable effects of economic conditions on certain customers, which can fluctuate significantly from year to year. The Company cannot guarantee that the rate of future credit losses will be similar to past experience. The Company considers all available information when assessing the adequacy of its allowance for credit losses and unissued credits.

# 5. Inventories:

Inventories consisted of the following:

|                        | As of December 31, |         |    |         |  |  |  |
|------------------------|--------------------|---------|----|---------|--|--|--|
| (in thousands)         |                    | 2024    |    | 2023    |  |  |  |
| Unprocessed            | \$                 | 273,668 | \$ | 282,565 |  |  |  |
| Processed and finished |                    | 116,958 |    | 103,970 |  |  |  |
| Total                  | \$                 | 390,626 | \$ | 386,535 |  |  |  |

At December 31, 2024 and December 31, 2023, approximately \$31.3 million, or 8.0% of consolidated inventory, and \$38.2, or 9.9% of consolidated inventory, respectively, was reported under the LIFO method of accounting.

During 2024, the Company recorded \$5.7 million of LIFO income as a result of decreased metals pricing during 2024. The LIFO income increased the Company's inventory balance and decreased its cost of materials sold. During 2023, the Company recorded \$8.3 million of LIFO income as a result of decreased metals pricing during 2023. The LIFO income increased the Company's inventory balance and decreased metals pricing during 2023. The LIFO income increased the Company's inventory balance and decreased is cost of materials sold.

The Company's tubular and pipe inventory quantities were reduced during 2024 and 2023, resulting in a liquidation of LIFO inventory layers (a LIFO decrement). A LIFO decrement results in the erosion of layers created in earlier years, and, therefore, a LIFO layer is not created for years that have decrements. For the years ended December 31, 2024 and 2023, the effect of the LIFO decrement impacted cost of materials sold by an immaterial amount.

If the FIFO method had been in use, inventories would have been \$6.3 million and \$12.0 million higher than reported at December 31, 2024 and 2023, respectively.

# 6. <u>Property and Equipment:</u>

Property and equipment consists of the following:

| (in thousands)                                                | Depreciable<br>Lives | nher 31, 2024 | December 31, 2023 |

Leasehold improvements are included with buildings and improvements and are depreciated over the life of the lease or seven years, whichever is less.

Construction in progress as of December 31, 2024 and 2023 primarily consisted of payments for additional processing equipment, equipment and building upgrades to our existing facilities that were not yet placed into service.

## 7. Goodwill and Intangible Assets:

The Company's intangible assets were recorded in connection with its acquisitions of Metal Works in 2024, CTB and Metal-Fab in 2023, Shaw Stainless & Alloy, Inc. in 2021, Action Stainless & Alloys, Inc. in 2020, EZ Dumper® hydraulic dump inserts and McCullough Industries in 2019, Berlin Metals, LLC in 2018 and Chicago Tube and Iron (CTI) in 2011. The intangible assets were evaluated on the premise of highest and best use to a market participant, primarily utilizing the income approach valuation methodology.

Goodwill, by reportable unit, was as follows as of December 31, 2024 and December 31, 2023, respectively. The goodwill is deductible for tax purposes.

|                                 |                    | Specialty          |                      |           |

| Customer relationships - subject to amortization<br>Covenant not to compete - subject to amortization<br>Technology and know-how - subject to amortization<br>Trade name - not subject to amortization | \$                                 | 62,559<br>2,339<br>7,000<br>36,868            | \$                       | (15,084)<br>(679)<br>(382)               | \$ | 47,475<br>1,660<br>6,618<br>36,868            |  |  |  |

The useful life of the customer relationships was determined to be ten to 26 years, based primarily on the consistent and predictable revenue source associated with the existing customer base, the present value of which extends through the amortization period. The useful life of the non-compete agreements was determined to be the length of the non-compete agreements, which range from two to five years. The useful life of the technology and know-how was determined to be 10 to 15 years. The useful life of the trade names was determined to be indefinite primarily due to their history and reputation in the marketplace, the Company's expectation that the trade names will continue to be used, and the conclusion that there are currently no other factors identified that would limit their useful life. The Company will continue to evaluate the useful life assigned to its amortizable customer relationships and noncompete agreements in future periods.

During 2024, a qualitative test was performed for goodwill and the other indefinitely lived intangible assets and no indication of impairment was identified. During 2023, a quantitative test was performed for goodwill and the other indefinitely lived intangible assets and no indication of impairment was identified.

The Company estimates that amortization expense for its intangible assets subject to amortization will be approximately \$6.1 million per year for the next year, \$5.6 million for the next year, \$5.1 million for the next year, \$4.8 million for the next year, \$4.7 million for the next year and then \$3.9 million per year thereafter.

# 8. <u>Leases</u>:

The Company leases warehouses and office space, industrial equipment, office equipment, vehicles, industrial gas tanks and forklifts from other parties. The Company determines if a contract contains a lease when the contract conveys the right to control the use of identified assets for a period of time in exchange for consideration. Upon identification and commencement of a lease, the Company establishes a right-of-use (ROU) asset and a lease liability. Operating leases are included in ROU assets, current portion of lease liabilities, and lease liabilities on the accompanying Consolidated Balance Sheets. Financing leases are included in property and equipment, other accrued liabilities and other long-term liabilities.

The Company has remaining lease terms ranging from one year to 16 years, some of these include options to renew the lease for up to five years. The total lease term is determined by considering the initial term per the lease agreement, which is adjusted to include any renewal options that the Company is reasonably certain to exercise as well as any period that the Company has control over the space before the stated initial term of the agreement. If the Company determines a reasonable certainty of exercising termination or early buyout options, then the lease terms are adjusted to account for these facts.

The Company leases one warehouse from a related party. The Company's Executive Chairman of the Board owns 50% of an entity that owns one of the Cleveland warehouses and leases it to the Company at a fair market value annual rental of \$0.2 million. The lease expires on December 31, 2028 with two five-year renewal options.

ROU assets and lease liabilities are recognized based on the present value of the future minimum lease payments over the lease term at commencement date. As most of the leases do not provide an implicit rate, the Company uses its incremental borrowing rate based on the information available at commencement date in determining the present value of future payments. Lease expense is recognized on a straight-line basis over the lease term.

The components of lease expense were as follows for the years ended December 31, 2024, 2023 and 2022:

| (in thousands)                | 2024 |       | 2023 |       | 2022 |       |

# 9. <u>Debt:</u>

The Company's debt is comprised of the following components:

|                                                         | As of December 31, |         |    |         |  |  |
|---------------------------------------------------------|--------------------|---------|----|---------|--|--|
| (in thousands)                                          |                    | 2024    |    | 2023    |  |  |
| Asset-based revolving credit facility due June 16, 2026 | \$                 | 272,456 | \$ | 190,198 |  |  |
| Total debt                                              |                    | 272,456 |    | 190,198 |  |  |
| Less current amount                                     |                    | -       |    | -       |  |  |
| Total long-term debt                                    | \$                 | 272,456 | \$ | 190,198 |  |  |

The Company's ABL Credit Facility is collateralized by the Company's accounts receivable, inventory, personal property and certain real estate. The \$625 million ABL Credit Facility consists of: (i) a revolving credit facility of up to \$595 million, including a \$20 million sub-limit for letters of credit, and (ii) a first in, last out revolving credit facility of up to \$30 million. Under the terms of the ABL Credit Facility, the Company may, subject to the satisfaction of certain conditions, request additional commitments under the revolving credit facility in the aggregate principal amount of up to \$200 million to the extent that existing or new lenders agree to provide such additional commitments, and add real estate as collateral at the Company's discretion. The ABL Credit Facility matures on June 16, 2026.

The ABL Credit Facility contains customary representations and warranties and certain covenants that limit the ability of the Company to, among other things: (i) incur or guarantee additional indebtedness; (ii) pay distributions on, redeem or repurchase capital stock or redeem or repurchase subordinated debt; (iii) make investments; (iv) sell assets; (v) enter into agreements that restrict distributions or other payments from restricted subsidiaries to the Company; (vi) incur or suffer to exist liens securing indebtedness; (vii) consolidate, merge or transfer all or substantially all of their assets; and (viii) engage in transactions with affiliates. In addition, the ABL Credit Facility contains a financial covenant which provides that: (i) if any commitments or obligations are outstanding and the Company's availability is less than the greater of \$30 million or 10.0% of the aggregate amount of revolver commitments (\$62.5 million at December 31, 2024) or 10.0% of the aggregate borrowing base (\$47.0 million at December 31, 2024), then the Company must maintain a ratio of Earnings before Interest, Taxes, Depreciation and Amortization (EBITDA) minus certain capital expenditures and cash taxes paid to fixed charges of at least 1.00 to 1.00 for the most recent twelve fiscal month period.

As of December 31, 2024, the Company was in compliance with its covenants and had approximately \$192.8 million of availability under the ABL Credit Facility.

The Company has the option to borrow under its revolver based on the agent's base rate plus a premium ranging from 0.00% to 0.25% or the Secured Overnight Financing Rate (SOFR) plus a premium ranging from 1.25% to 2.75%.

On August 15, 2024, the Company entered into a two-year forward starting fixed rate interest rate hedge in order to eliminate the variability of cash interest payments on \$75 million of the outstanding SOFR based borrowings under the ABL Credit Facility. The interest rate hedge fixed the rate at 3.82%. Although the Company is exposed to credit loss in the event of nonperformance by the other party to the interest rate hedge agreement, the Company anticipates performance by the counterparty.

On January 10, 2019, the Company entered into a five-year forward starting fixed rate interest rate hedge in order to eliminate the variability of cash interest payments on \$75 million of the outstanding London Interbank Offered Rate (LIBOR) based borrowings under the ABL Credit Facility. On January 3, 2023, the Company amended the interest rate hedge agreement to use SOFR as the reference rate and updated the fixed rate to 2.42% from 2.57%. Although the Company is exposed to credit loss in the event of nonperformance by the other party to the interest rate hedge agreement, the Company anticipates performance by the counterparty. The interest rate swap expired on January 10, 2024.

As of December 31, 2024 and December 31, 2023, \$1.1 million and \$1.7 million, respectively, of bank financing fees were included in "Prepaid expenses and other" and "Other long-term assets" on the accompanying Consolidated Balance Sheets. The financing fees are being amortized over the five-year term of the ABL Credit Facility and are included in "Interest and other expense on debt" on the accompanying Consolidated Statements of Comprehensive Income.

#### Scheduled Debt Maturities, Interest, Debt Carrying Values

The Company's principal payments over the next five years, as of December 31, 2024, are detailed in the table below:

| (in thousands)           | 2025 |   | 2026          | 2027    | 2028    | 202 | 9 | Total         |
|--------------------------|------|---|---------------|---------|---------|-----|---|---------------|
| ABL Credit Facility      | \$   | - | \$<br>272,456 | \$<br>- | \$<br>- | \$  | _ | \$<br>272,456 |
| Total principal payments | \$   | _ | \$<br>272,456 | \$<br>- | \$<br>- | \$  |   | \$<br>272,456 |

The overall effective interest rate for all debt, exclusive of deferred financing fees and deferred commitment fees, amounted to 6.7%, 5.9% and 3.2% in 2024, 2023 and 2022, respectively. Interest paid totaled \$15.3 million, \$15.0 million and \$9.6 million for the years ended December 31, 2024, 2023 and 2022, respectively. Average total debt outstanding was \$218.4 million, \$239.4 million and \$280.4 million in 2024, 2023 and 2022, respectively.

#### 10. <u>Derivative Instruments:</u>

#### Metals swaps

During 2024, 2023 and 2022, the Company entered into nickel swaps indexed to the London Metal Exchange (LME) price of nickel with third-party brokers. The nickel swaps are treated as derivatives for accounting purposes and were included in "Other accrued liabilities" and "Prepaid expenses and other" on the Consolidated Balance Sheets at December 31, 2024. There were \$3.5 million and \$5.2 million of outstanding outstanding metals swaps at December 31, 2024 and December 31, 2023, respectively. The Company entered into the swaps to mitigate its customers' risk of volatility in the price of metals. The swaps are settled with the brokers at maturity. The economic benefit or loss arising from the changes in fair value of the swaps is contractually passed through to the customer. The primary risk associated with the metals swaps is the ability of customers or third-party brokers to honor their agreements with the Company related to derivative instruments. If the customer or third-party brokers are unable to honor their agreements, the Company's risk of loss is the fair value of the metals swaps.

While these derivatives are intended to help the Company manage risk, they have not been designated as hedging instruments. The periodic changes in fair value of the metals and embedded customer derivative instruments are included in "Cost of materials sold" in the Consolidated Statements of Comprehensive Income. The Company recognizes derivative positions with both the customer and the third party for the derivatives and classifies cash settlement amounts associated with them as part of "Cost of materials sold" in the Consolidated Statements of Comprehensive Income. The cumulative change in fair value of the metals swaps that had not yet settled as of December 31, 2024 were included in "Accounts Receivable, net" and the embedded customer derivatives are included in "Other accrued liabilities" on the Consolidated Balance Sheets.

#### Fixed rate interest rate hedge

On August 15, 2024, the Company entered into a two-year forward starting fixed rate interest rate hedge in order to eliminate the variability of cash interest payments on \$75 million of the outstanding SOFR based borrowings under the ABL Credit Facility. The interest rate hedge fixed the rate at 3.82%. The interest rate hedge is included in "Prepaid expenses and other" on the Consolidated Balance Sheets and had a fair value of \$0.3 million and \$0.1 million as of December 31, 2024 and December 31, 2023, respectively. The mark-to-market adjustment of the fair value of the hedge is recorded to "Accumulated other comprehensive income" on the Company's Consolidated Balance Sheets. Although the Company is exposed to credit loss in the event of nonperformance by the other party to the interest rate hedge agreement, the Company anticipates performance by the counterparty.

There was no net impact from the nickel swaps or embedded customer derivative agreements to the Company's Consolidated Statements of Comprehensive Income for the years ended December 31, 2024, 2023 and 2022. The table below shows the total impact to the Company's Consolidated Statements of Comprehensive Income through "Net income" of the derivatives for the years ended December 31, 2024, 2023 and 2022.

|                               | Net Gain (Loss) Recognized |       |    |         |    |       |  |  |
|-------------------------------|----------------------------|-------|----|---------|----|-------|--|--|
| (in thousands)                |                            | 2024  |    | 2023    |    | 2022  |  |  |
| Fixed interest rate hedge     | \$                         | 365   | \$ | 1,906   | \$ | (664) |  |  |
| Metals swaps                  |                            | (424) |    | (1,903) |    | 633   |  |  |
| Embedded customer derivatives |                            | 424   |    | 1,903   |    | (633) |  |  |
| Total income (loss)           | \$                         | 365   | \$ | 1,906   | \$ | (664) |  |  |

#### 11. Fair Value of Assets and Liabilities:

The Company's financial instruments include cash and cash equivalents, short-term trade receivables, derivative instruments, accounts payable, debt instruments and finance type leases. For short-term instruments, other than those required to be reported at fair value on a recurring basis and for which additional disclosures are included below, management concluded the historical carrying value is a reasonable estimate of fair value because of the short period of time between the origination of such instruments and their expected realization.

During 2024 and 2023, there were no transfers of financial assets between Levels 1, 2 or 3 fair value measurements. There have been no changes in the methodologies used at December 31, 2024. Following is a description of the valuation methodologies used for assets and liabilities measured at fair value as of December 31, 2024 and 2023:

*Metals swaps and embedded customer derivatives* – Determined by using Level 2 inputs that include the price of nickel indexed to the LME. The fair value is determined based on quoted market prices and reflects the estimated amounts the Company would pay or receive to terminate the nickel swaps.

*Fixed rate interest rate hedge* – Based on the present value of the expected future cash flows, considering the risks involved, and using discount rates appropriate for the maturity date. Market observable Level 2 inputs are used to determine the present value of future cash flows.

Supplemental executive retirement plan - Determined by the Level 1 inputs that include the readily determinable and available fair value of the mutual funds that comprise the plan assets.

The following tables present information about the Company's assets and liabilities that were measured at fair value on a recurring basis and indicates the fair value hierarchy of the valuation techniques utilized by the Company:

|                                                                                                                                                                              |                                       | Va            |                      | of Items Reco<br>As of Decem                               |                                 |          | lue                  | <b>Total</b><br>\$ 3,055<br>\$ 402<br>\$ 254  |  |  |  |  |  |  |

| Assets:<br>Metal swaps<br>Embedded customer derivatives<br>Fixed interest rate hedge<br>Supplemental executive retirement plan<br>Total assets at fair value<br>Liabilities: | \$<br>\$<br>\$<br>\$                  |               | \$<br>\$<br>\$<br>\$ | As of Decem<br>Level 2<br>4,458<br>766<br>55<br>-<br>5,279 | s<br>\$<br>\$<br>\$<br>\$<br>\$ | 31, 2023 | \$<br>\$<br>\$<br>\$ | 4,458<br>766<br>55<br>11,617<br><b>16,896</b> |  |  |  |  |  |  |

The value of the items not recorded at fair value represent the carrying value of the liabilities.

The carrying value of the ABL Credit Facility was \$272.5 million and \$190.2 million at December 31, 2024 and 2023, respectively. Management believes that the ABL Credit Facility's carrying value approximates its fair value due to the variable interest rate on the ABL Credit Facility and the recent amendments.

#### 12. Equity Plans:

#### **Restricted Stock Units and Performance Share Units**

Pursuant to the Amended and Restated Olympic Steel 2007 Omnibus Incentive Plan (the Incentive Plan), the Company may grant stock options, stock appreciation rights, restricted shares (RSs), restricted share units (RSUs), performance shares, and other stock- and cash-based awards to employees and directors of, and consultants to, the Company and its affiliates. Since adoption of the Incentive Plan, 1,400,000 shares of common stock have been authorized for equity grants. On an annual basis, the compensation committee of the Company's Board of Directors awards RSs or RSUs to each non-employee director as part of their annual compensation.

The annual award for 2024 per director was \$110,000 of RSs. Subject to the terms of the Incentive Plan and the RS agreement, one-third of the RSs vest on each December 31, 2024, December 31, 2025 and December 31, 2026. The grantee will not be entitled to vote on the RSs or receive dividends with respect to RSs until they vest.

The annual award for 2023 per director was \$80,000 of RSUs. Subject to the terms of the Incentive Plan and the RSU agreement, the 2023 RSUs vest after one year of service (from the date of the grant). The RSUs are not converted into shares of common stock until the director either resigns or is terminated from the Company's Board of Directors.

In January 2022, the Company adopted a new C-Suite Long-Term Incentive Plan (the C-Suite Plan) that operates under the Senior Manager Stock Incentive Plan. Under the C-Suite Plan, the Chief Executive Officer, the Chief Financial Officer and the President and Chief Operating Officer are eligible for participation. In each calendar year, the Committee may award eligible participants a long-term incentive of both a RSU grant and a performance stock unit (PSU) grant. Additionally, the Committee may offer a long-term cash incentive (split equally between service and performance-based portions) to supplement both the RSU and PSU grants in order to arrive at the total long-term award target. For 2024, the total long-term award target is \$1.1 million for the Chief Executive Officer, \$0.8 million for the President and Chief Operating Officer and \$0.5 million for the Chief Financial Officer. For 2023 and 2022, the total long-term award target was \$1.1 million for the Chief Executive Officer, \$0.6 million for the President and Chief Operating Officer and \$0.3 million for the Chief Financial Officer. The PSUs will vest if the return on net assets, calculated as EBITDA divided by Average Accounts Receivable, Inventory and Property and Equipment, exceeds 5 percent. Each RSU and service-based cash incentive vests three years after the grant date. Each vested RSU will convert into the right to receive one share of common stock. During 2024, a total of 17,243 RUSs and 17,243 PSUs were granted to the participants under the C-Suite Plan, and \$37,400 and \$37,400, respectively, were granted in serviced-based and performance-based cash awards. During 2023, a total of 20,000 RSUs and 20,000 PSUs were granted to the participants under the C-Suite Plan, and \$0.3 million and \$0.3 million, respectively, were granted in service-based and performance-based cash awards. During 2022, a total of 20,000 RSUs and 20,000 PSUs were granted to the participants under the C-Suite Plan, and \$0.5 million and \$0.5 million, respectively, were granted in servicebased and performance-based cash awards. If the return on net assets falls below 5 percent, no performance-based incentive will be awarded. The maximum performance-based award is achieved if return on net assets exceeds ten percent, and is capped at 150% of the grant.

The performance-based awards granted in 2024 are expected to vest at 100% of the grant and the performance-based awards granted in 2023 and 2022 are expected to vest at 150% of the grant. All pre-tax charges related to the long-term cash incentives were included in the caption "Administrative and general" on the accompanying Consolidated Statements of Comprehensive Income. The total remaining estimated compensation cost of non-vested awards total \$2.4 million and the weighted average remaining vesting period is 1.5 years as of December 31, 2024.

Stock-based compensation expense recognized on RSs and RSUs for the years ended December 31, 2024, 2023 and 2022, respectively, is summarized in the following table:

|                                             | For the years ended December 31, |       |    |       |    |       |  |  |  |
|---------------------------------------------|----------------------------------|-------|----|-------|----|-------|--|--|--|
| (in thousands)                              | 2024                             |       |    | 2023  |    | 2022  |  |  |  |
| RS and RSU expense before taxes of the Plan | \$                               | 1,998 | \$ | 1,817 | \$ | 1,297 |  |  |  |
| RS and RSU expense after taxes              |                                  | 1,466 |    | 1,314 |    | 954   |  |  |  |

All pre-tax charges related to RSUs and PSUs were included in the caption "Administrative and general" on the accompanying Consolidated Statements of Comprehensive Income. The total compensation cost of non-vested awards totaled \$3.2 million and the weighted average remaining vesting period is 1.7 years as of December 31, 2024.

The following table summarizes the activity related to RSUs and PSUs for the year ended December 31, 2024, 2023 and 2022:

|                            | 20                  | 24        |                                        | 20                  | 23      |                                          | 202                 | 22       |                                         |

#### **Phantom Stock Units**

In January 2022, the Company adopted the Senior Manager Phantom Stock Plan (Phantom Stock Plan) that operates under the Senior Manager Stock Incentive Plan. Under the Phantom Stock Plan, certain senior managers are eligible to participate in the plan. The Phantom Stock Plan supersedes any previous stock incentive programs offered to the eligible participants. Each year, eligible participants will receive an award of Phantom Stock Units (Phantom Units) of up to \$150 thousand. The number of Phantom Units granted on the grant date is determined by dividing the amount of the Phantom Units granted by the closing price of a share of the Company's common stock on the grant date. Each Phantom Unit Award under this plan shall vest three years after the grant date (Vesting Date). Upon vesting, the Company will pay the Participant in cash, the value of the vested Phantom Units multiplied by the closing price of a share of the Company's common stock on the Vesting Date.

Pre-tax charges related to Phantom Stock Units for the year ended December 31, 2024 totaled \$0.1 million and were included in the caption "Administrative and general" on the accompanying Consolidated Statements of Comprehensive Income. The total estimated remaining compensation cost of non-vested awards total \$0.8 million and the weighted average remaining vesting period is 1.6 years as of December 31, 2024. Pre-tax charges related to Phantom Stock Units for the year ended December 31, 2023, totaled \$1.5 million and were included in the caption "Administrative and general" on the accompanying Consolidated Statements of Comprehensive Income. The total estimated remaining compensation cost of non-vested awards totale statements of comprehensive Income. The total estimated remaining compensation cost of non-vested awards totaled \$1.6 million and the weighted average remaining vesting period was 1.5 years as of December 31, 2023. Accrued liability balances related to Phantom Stock Units for the year ended December 31, 2024 totaled \$1.6 million and were included in "Other long-term liabilities" on the accompanying Consolidated Balance Sheets. Accrued liability balances related to Phantom Stock Units for the year ended December 31, 2023 totaled \$1.8 million and were included in "Other long-term liabilities" on the accompanying Consolidated Balance Sheets.

#### 13. Commitments and Contingencies:

The Company is party to various legal actions that it believes are ordinary in nature and incidental to the operation of its business. In the opinion of management, the outcome of the proceedings to which the Company is currently a party will not have a material adverse effect upon its results of operations, financial condition or cash flows.

In the normal course of business, the Company periodically enters into agreements that incorporate indemnification provisions. While the maximum amount to which the Company may be exposed under such agreements cannot be estimated, it is the opinion of management that these indemnifications are not expected to have a material adverse effect on the Company's results of operations or financial condition.

At December 31, 2024, approximately 229 of the hourly plant personnel are represented by seven separate collective bargaining units. The table below shows the expiration dates of the collective bargaining agreements.

| Facility                       | Expiration date    |
|--------------------------------|--------------------|
| Locust, North Carolina         | March 4, 2025      |
| St. Paul, Minnesota            | May 25, 2025       |
| Romeoville, Illinois           | May 31, 2025       |
| Minneapolis (coil), Minnesota  | September 30, 2025 |
| Indianapolis, Indiana          | January 29, 2026   |
| Minneapolis (plate), Minnesota | April 1, 2027      |
| Hammond, Indiana               | November 30, 2029  |

#### 14. Income Taxes:

The components of the Company's provision (benefit) for income taxes from continuing operations were as follows:

|                      | As             | of December 31 | l, |        |  |  |  |  |  |

It is expected that the amount of unrecognized tax benefits will not materially change in the next twelve months. The tax years 2021 through 2023 remain open to examination by major taxing jurisdictions to which the Company is subject.

The Company recognized interest related to uncertain tax positions in the income tax provision.

The following table reconciles the U.S. federal statutory rate to the Company's effective tax rate:

|                                               | 2024   | 2023   | 2022   |
|-----------------------------------------------|--------|--------|--------|
| U.S. federal statutory rate in effect         | 21.0%  | 21.0%  | 21.0%  |
| State and local taxes, net of federal benefit | 4.3%   | 4.4%   | 4.5%   |
| Foreign                                       | 0.1%   | 1.7%   | 0.1%   |
| Meals and entertainment                       | 1.5%   | 0.7%   | 0.2%   |
| Tax credits                                   | (0.8)% | (0.4)% | (0.1)% |
| All other, net                                | 0.5%   | 0.3%   | 0.7%   |
| Effective income tax rate                     | 26.6%  | 27.7%  | 26.4%  |

Income taxes paid in 2024, 2023 and 2022 totaled \$10.0 million, \$13.6 million and \$33.4 million, respectively. Some subsidiaries of the Company's consolidated group file state tax returns on a separate company basis and have state net operating loss carryforwards expiring over the next 15 to 20 years. A valuation allowance is recorded to reduce certain deferred tax assets to the amount that is more likely than not to be realized. The valuation allowances recorded as of December 31, 2024 and 2023 were related to certain state net operating losses and totaled \$0.4 million and \$0.5 million, respectively.

#### 15. Shares Outstanding and Earnings Per Share:

Earnings per share have been calculated based on the weighted average number of shares outstanding as set forth below:

|                                                                                                             | For the years ended December 31, |        |    |             |                                                        |             |  |  |  |  |

#### 16. Equity Programs:

#### **Stock Repurchase Program**

On October 2, 2015, the Company announced that its Board of Directors authorized a stock repurchase program of up to 550,000 shares of the Company's issued and outstanding common stock, which could include open market repurchases, negotiated block transactions, accelerated stock repurchases or open market solicitations for shares, all or some of which may be affected through Rule 10b5-1 plans. Any of the repurchased shares are held in the Company's treasury, or canceled and retired as the Board of Directors may determine from time to time. Any repurchases of common stock are subject to the covenants contained in the ABL Credit Facility. Under the ABL Credit Facility, the Company may repurchase common stock and pay dividends up to \$15.0 million in the aggregate during any trailing twelve months without restrictions. Purchases of common stock or dividend payments in excess of \$15.0 million in the aggregate require the Company to (i) maintain availability equal to or greater than 15.0% of the aggregate revolver commitments (\$93.8 million at December 31, 2024) or (ii) to maintain availability equal to or greater than 15.0% of the aggregate revolver commitments (\$93.8 million at December 31, 2024) and the Company must maintain a pro-forma ratio of EBITDA minus certain capital expenditures and cash taxes paid to fixed charges of at least 1.00 to 1.00.

As of December 31, 2024, 360,212 shares remain authorized for repurchase under the program.

There were no shares repurchased during 2024 or 2023.

#### **At-the-Market Equity Program**

On September 3, 2021, the Company commenced an at-the-market (ATM) equity program under its shelf registration statement, which allows it to sell and issue up to \$50 million in shares of its common stock from time to time. The Company entered into an Equity Distribution Agreement on September 3, 2021 with KeyBanc Capital Markets Inc. (KeyBanc) relating to the issuance and sale of shares of common stock pursuant to the program. KeyBanc is not required to sell any specific amount of securities but will act as the Company's sales agent using commercially reasonable efforts consistent with its normal trading and sales practices, on mutually agreed terms between KeyBanc and the Company. KeyBanc will be entitled to compensation for shares sold pursuant to the program of 2.0% of the gross proceeds of any shares of common stock sold under the Equity Distribution Agreement. No shares were sold under the ATM program during 2024 or 2023.

#### 17. Segment Information:

The Company follows the accounting guidance that requires the utilization of a "management approach" to define and report the financial results of reporting segments. The management approach defines operating segments along the lines used by the Company's chief operating decision maker (CODM) to assess performance and make operating and resource allocation decisions. The Company's Chief Executive Officer serves as the CODM and evaluates performance and allocates resources based on segment operating income. The CODM uses operating income to evaluate the income generated and overall profitability created from segment assets. These financial metrics are used to make key operating decisions, such as the determinations of how capital spending is deployed between organic growth, automation and defensive projects and investment through acquisition.

The Company operates in three reportable segments; specialty metals flat products, carbon flat products, and tubular and pipe products. The specialty metals flat products segment and the carbon flat products segment are at times consolidated and referred to as the flat products segments, as certain of the flat products segments' assets and resources are shared by the specialty metals and carbon flat products segments and both segments' products are stored in the shared facilities and, in some locations, processed on shared equipment. Since the November 11, 2024 and January 3, 2023 acquisitions, Metal Work's and Metal-Fab's financial results are included in the carbon flat products segment. Since the October 2, 2023 acquisition, CTB's financial results are included in the tubular and pipe products segment. The reportable segments are defined based on the products they sell as each segment requires unique purchasing and marketing strategies. In addition, capital equipment requirements differ between segments.

The Company uses segment operating income as the measure of segment income or loss. The Company believes that segment operating income is most reflective of the operational profitability or loss of its reportable segments.

Segment operating income excludes certain Corporate expenses. These Corporate expenses include the unallocated expenses related to managing the entire Company (i.e., all three segments), including compensation for certain personnel, expenses related to being a publicly traded entity such as board of directors' expenses, audit expenses, and various other professional fees.

The following tables provide financial information frequently shared with our CODM for the Company's reportable segments for the years ended December 31, 2024, 2023 and 2022.

|                                    |          |                        |          | For the Yea | ar En    | ded Decem  | ber 3    | 31, 2024 |                 |              |

There were no material revenue transactions between the carbon flat products, specialty metals flat products and tubular and pipe products segments for the years ended December 31, 2024, 2023 and 2022.

The Company sells certain products internationally, primarily in Canada and Mexico. International sales are immaterial to the consolidated financial results and to the individual segments' results.

#### 18. <u>Retirement Plans</u>:

The Company's retirement plans consist of 401(k) plans covering union and non-union employees, a multi-employer pension plan covering certain CTI employees and a SERP covering certain executive officers of the Company.

The 401(k) retirement plans allow eligible employees to contribute up to the statutory maximum. The Company's non-union 401(k) matching contribution is determined annually by the Board of Directors and is based on a percentage of eligible employees' earnings and contributions. For the 401(k) retirement plans, the Company matched one-half of each eligible employee's contribution, limited to the first 6% of eligible compensation. For the Metal-Fab 401(k) retirement plans, the Company matched 50% of the first 5% of eligible compensation. For the Action Stainless 401(k) retirement plans, the Company matched 100% of the first 3% of eligible compensation and one-half of the next 2% of each eligible employee's contribution, limited to 4% of eligible compensation.

In 2006, the Board of Directors adopted a SERP, which has been amended from time to time. Contributions to the SERP are based on: (i) a portion of the participants' compensation multiplied by a factor of 13%; and (ii) a portion of the participants' compensation multiplied by a factor, which is contingent upon the Company's return on invested capital. Benefits are subject to a vesting schedule of up to seven years.

The Company, through its CTI subsidiary, contributes to a multiemployer pension plan. CTI contributes to the Multiemployer Plan under the terms of a collective bargaining agreement that covers certain of its union employees, and which expires May 31, 2025. CTI contributions to the Multiemployer Plan were immaterial for the years ended December 31, 2024, 2023 and 2022.

Retirement plan expense, which includes all Company 401(k), SERP defined contributions and the Multiemployer Plan, amounted to \$4.6 million, \$4.7 million and \$4.1 million for the years ended December 31, 2024, 2023 and 2022, respectively.

The fair values of the Company's SERP assets as of December 31, 2024 and 2023 were \$15.1 million and \$11.6 million, respectively, and are measured at Net Asset Value (NAV). The fair value of the SERP assets are included in Other Long Term Assets on the Consolidated Balance Sheets.

#### 19. <u>Related-Party Transactions:</u>

The Company's Executive Chairman of the Board owns 50% of an entity that owns one of the Cleveland warehouses and leases it to the Company at a fair market value annual rental of \$0.2 million. The lease expires on December 31, 2028 with two five-year renewal options.

## ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

#### **ITEM 9A. CONTROLS AND PROCEDURES**

#### **Disclosure Controls and Procedures**

Evaluations required by Rule 13a-15 of the Securities Exchange Act of 1934, or Exchange Act, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of the end of the period covered by this Annual Report have been carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer. Based upon such evaluations, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2024 in providing reasonable assurance that information required to be disclosed by us in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to allow timely decisions regarding required disclosure.

#### Management's Report on Internal Control Over Financial Reporting

Management's Report on Internal Control Over Financial Reporting is set forth in Part II, Item 8 of this Annual Report on Form 10-K and is incorporated herein. Grant Thornton LLP, our independent registered public accounting firm, has audited the effectiveness of our internal control over financial reporting as of December 31, 2024, as stated in their report, which appears in Part II, Item 8 of this Annual Report.

#### **Changes in Internal Control Over Financial Reporting**

There have been no changes in our internal control over financial reporting during the quarter ended December 31, 2024 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

#### **ITEM 9B. OTHER INFORMATION**

#### Trading Arrangement

During the quarter ended December 31, 2024, no director or officer (as defined in Rule 16a-1(f) promulgated under the Exchange Act) of the Company adopted or terminated a "Rule 10b5-1 trading arrangement" or "non-Rule 10b5-1 trading arrangement" (as each term is defined in Item 408 of Regulation S-K).

#### ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

#### PART III

#### ITEM 10. DIRECTORS, EXECUTIVE OFFICERS OF THE REGISTRANT AND CORPORATE GOVERNANCE

Information required by Item 10 as to the executive officers is provided in Part I of this Annual Report on Form 10-K and is incorporated by reference into this section. Other information required by Item 10 will be incorporated herein by reference to the information set forth in our definitive proxy statement for our 2025 Annual Meeting of Shareholders.

The Company has adopted an insider trading policy applicable to its directors, officers and employees, and has implemented procedures for the Company governing the purchase, sale and other disposition of the Company's securities. The Company believes its insider trading policy and procedures are reasonably designed to promote compliance with insider trading laws, rules, and regulations and listing standards applicable to Roper. A copy of the Company's insider trading policy is filed as Exhibit 19 to this Annual Report on Form 10-K.

#### **ITEM 11. EXECUTIVE COMPENSATION**

Information required by Item 11 will be incorporated herein by reference to the information set forth in our definitive proxy statement for our 2025 Annual Meeting of Shareholders.

## ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information required by Item 12 will be incorporated herein by reference to the information set forth in our definitive proxy statement for our 2025 Annual Meeting of Shareholders.

## ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information required by Item 13 will be incorporated herein by reference to the information set forth in our definitive proxy statement for our 2025 Annual Meeting of Shareholders.

#### ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Information required by Item 14 will be incorporated herein by reference to the information set forth in our definitive proxy statement for our 2025 Annual Meeting of Shareholders.

#### PART IV

#### ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

#### (a)(1) The following financial statements are included in Part II, Item 8:

Report of Independent Registered Public Accounting Firm Management's Report on Internal Control Over Financial Reporting Consolidated Statements of Comprehensive Income for the Years Ended December 31, 2024, 2023 and 2022 Consolidated Balance Sheets as of December 31, 2024 and 2023 Consolidated Statements of Cash Flows for the Years Ended December 31, 2024, 2023 and 2022 Supplemental Disclosures of Cash Flow Information for the Years Ended December 31, 2024, 2023 and 2022 Consolidated Statements of Shareholders' Equity for the Years Ended December 31, 2024, 2023 and 2022 Notes to Consolidated Financial Statements for the Years Ended December 31, 2024, 2023 and 2022

#### (a)(2) Financial Statement Schedules.

Schedule II - Valuation and Qualifying Accounts for the Years Ended December 31, 2023, 2022 and 2021

(a)(3) Exhibits. The Exhibits filed herewith are set forth on the Index to Exhibits filed as part of this Annual Report and incorporated herein by reference.

| <u>Exhibit</u> | Description                                                                                                                                                                                                                                                                                                                                                                     | Reference                                                                                                                                                                 |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
