

2024 Annual Report

GENERAL DYNAMICS

Dear Fellow Shareholder

2024 was a year marked by significant growth and strong demand across the business. All four segments posted higher revenue and operating earnings, resulting in double-digit top- and bottom-line growth for the company. For the full year, revenue increased 12.9% to \$47.7 billion, and net earnings increased 14.1% to \$3.8 billion, driving \$13.63 of diluted earnings per share, up 13.4% over the prior year.

Aerospace revenues increased 30.5% to \$11.2 billion, and operating earnings increased 23.9% to \$1.5 billion, driven by the certification and entry into service of the G700 aircraft at the end of the first quarter. Gulfstream delivered 30 G700s last year in the first nine months after certification, more than any plane in its history over the same time period. While we planned to deliver more, supply chain challenges impacted both schedule and cost. We believe these issues are largely behind us.

With the G700 now in the hands of customers, we are seeing even better than expected demonstrated performance. As we look ahead, the G800 is on track to receive certification and start deliveries later this year. In the same time frame, the last G650 will be completed and delivered, marking the end to this iconic program.

As we continue to introduce new models into service, the demand for the portfolio of Gulfstream aircraft and aircraft services remains strong. Aerospace backlog ended the year at a robust \$19.7 billion, with a 1-to-1 book-to-bill on a significant increase in revenue.

At Combat Systems, revenue was up 8.8% to \$9 billion and operating earnings up by 11.2% to \$1.3 billion. The segment demonstrated strong operating performance, expanding margins year over year. We saw solid demand for our tracked and wheeled combat vehicles, and the newest tracked platform, M10 Booker, received a third low-rate initial production (LRIP) award.

We continued to build out capacity for 155mm production for the Army customer and received over \$1.2 billion in munitions production awards. We also continue to see a strong opportunity pipeline for international demand through both direct awards and Foreign Military Sales (FMS). Backlog ended the year at \$17 billion, driven by strong orders and a book-to-bill of 1.3-to-1. Looking ahead, the current geopolitical threat environment supports a strong demand outlook for the segment's products and services.

At Marine Systems, revenue also continued its strong growth trajectory, up 15.1% to \$14.3 billion, following 13% growth in the prior year, as the Virginia-class and Columbia-class submarine programs continue to ramp. While operating earnings grew year over year, results remain challenged due to impacts from cost inflation, ongoing supply chain quality issues and delays.

Congress awarded an additional \$14.7 billion of funding in a continuing resolution in December for the Columbia-class program to continue work and for the Virginia-class program to address inflationary cost increases on the next three boats, workforce development and specific areas of supply chain productivity.

We are working closely with the customer in their efforts to stabilize the submarine industrial base and we see some areas of improvement, but there is more to do. We remain focused on controlling what we can control — improving our productivity and reducing costs. This will help us to improve margins and drive earnings over time as growth continues.

The outlook is solid as current backlog for the segment stands at \$39.8 billion, and total estimated contract value is just under \$50 billion. On the horizon, the next block of Virginia-class (Block VI) and Columbia-class submarines will further secure the long-term trajectory.

At Technologies, segment revenue was up 1.6% to \$13.1 billion, and earnings up 4.8% to \$1.3 billion. GDIT delivered its fourth year of revenue and earnings growth, offsetting a slight decline in revenue at Mission Systems as it transitions from legacy work to new growth lines of business. They will be largely through this transition this year.

Together, the businesses achieved a 1.1 times book-to-bill and received over \$14.7 billion in awards during the year, a 13.5% increase over the prior year. The group's strategic investments in innovative technologies, in digital accelerators at GDIT and in Space at Mission Systems, for example, drove significant awards for both businesses. Total estimated contract value ended the year at a record of \$48.1 billion, supportive of an improved growth outlook for the segment.

In total, backlog at year-end was \$90.6 billion on a companywide book-to-bill of 1-to-1. The company generated free cash flow of \$3.2 billion. We paid down outstanding debt by \$500 million and returned \$3 billion, or 95% of free cash flow, to shareholders through dividends and share repurchase. In March 2025, the board of directors raised the dividend by 5.6% to a quarterly rate of \$1.50 per share. This marks the 28th consecutive year of dividend increases.

As we look to the remainder of 2025, we are committed to executing on our robust backlog through strong operating performance. We are focused on maintaining a strong balance sheet and managing capital allocation to create long-term value.

PHEBE N. NOVAKOVIC

Aerospace

Our Aerospace segment designs, manufactures and services the most advanced and reliable family of business jets in the world through our Gulfstream and Jet Aviation business units. We believe the key to long-term value creation in the business jet industry is steady investment in new aircraft models and technologies, as well as a relentless focus on customer service.

Since acquiring Gulfstream in 1999 and Jet Aviation in 2008, we have made significant investments in research and development, state-of-the-art manufacturing facilities, and growing our global support network. Since 2018, we have been delivering an all-new family of aircraft from the G500, G600 and G700, with the G400 and G800 to follow.

HIGHLIGHTS

The Gulfstream G700 was certified by the FAA in March 2024, and 30 were delivered by the end of the year.

Revenue from aircraft services grew more than 18% in 2024 to \$3.4 billion.

Jet Aviation maintenance facility in Basel, Switzerland. Gulfstream and Jet Aviation have a combined network, including authorized service centers, of more than 80 locations worldwide.

Delivered 118 large cabin aircraft for the year, a 32.6% increase from 2023.

Continued development of a new 225,000-square-foot customer support service center at Mesa Gateway Airport in Arizona.

Manufactured our 1,000th aircraft wing at Gulfstream's Savannah-based manufacturing facility.

Achieved a book-to-bill ratio of 1-to-1 for the year, even as revenue grew by more than 30% year over year.

Marine Systems

Our Marine Systems segment is the leading designer and builder of nuclear-powered submarines and the nation's center of excellence for submarine technology. We are also a leader in surface combatant and auxiliary ship design and construction for the U.S. Navy. In addition, the segment provides maintenance, modernization and lifecycle support services for Navy ships and maintains the most sophisticated marine engineering expertise in the world to support future capabilities. We operate through three business units: Electric Boat, headquartered in Groton, Connecticut; NASSCO in San Diego, California; and Bath Iron Works in Bath, Maine. Each has outlying facilities spanning the East and West Coasts of the United States.

Electric Boat is the prime contractor and lead shipyard for all Navy nuclear-powered submarine programs, including the Virginia-class attack submarine and the Columbia-class ballistic-missile submarine.

Bath Iron Works builds the Arleigh Burke-class (DDG-51) guided-missile destroyer and manages modernization and lifecycle support for all Navy destroyers.

NASSCO currently builds the John Lewis-class (T-AO-205) fleet replenishment oiler and the Expeditionary Sea Base (ESB) auxiliary support ship and is capable of building Jones Act ships for commercial customers. NASSCO also provides maintenance and modernization services for all classes of U.S. Navy surface ships.

HIGHLIGHTS

The Arleigh Burke-class guided-missile destroyer USS Patrick Gallagher was christened in July. It is the 77th ship in its class.

The amphibious transport dock USS Anchorage undergoing major lifecycle maintenance at NASSCO in San Diego. Ship repair and other services accounted for \$1.1 billion of the Marine segment's revenue in 2024.

The Virginia-class submarine USS Iowa during sea trials before it was delivered to the Navy in December.

Delivered six new ships in 2024, including two Virginia-class submarines, one Arleigh Burke-class guided-missile destroyer, two John Lewis-class fleet replenishment oilers and one Expeditionary Sea Base.

Exceeded 50% completion of the lead Columbia-class ballistic-missile submarine, with delivery expected in 2028. The total 12-boat program is valued in excess of \$125 billion over two decades.

Awarded a contract for the 10th John Lewis-class fleet replenishment oiler, with options to build up to seven additional ships.

Continued executing Arleigh Burke-class guided-missile destroyer program, with 11 ships in backlog for delivery through 2032.

Combat Systems

Our Combat Systems segment is a premier manufacturer and integrator of land combat solutions worldwide, including wheeled and tracked combat vehicles, weapons systems and munitions. The segment consists of three business units: Land Systems, European Land Systems and Ordnance and Tactical Systems.

Land Systems is the sole producer of two products that are foundational to the U.S. Army's warfighting capabilities: the Abrams main battle tank and the Stryker wheeled combat vehicle. In addition, Land Systems is delivering the M10 Booker vehicle, the Army's first new land combat platform in more than four decades. Land Systems also produces the light armored vehicle (LAV) for the Canadian army and the Ajax and Foxhound vehicles for the British army.

European Land Systems produces the Piranha 8x8 armored combat vehicle, the ASCOD tracked combat vehicle, the Duro and Eagle tactical vehicles, and a variety of mobile bridge systems capable of payloads up to 100 tons.

Ordnance and Tactical Systems designs, develops and produces a comprehensive array of weapons systems, such as Gatling guns for fighter aircraft and combat vehicle active protection systems, and a breadth of munitions, including Hydra-70 rockets, bomb bodies, and large-caliber tank and artillery ammunition.

HIGHLIGHTS

The Pandur combat vehicle, available in 6x6 or 8x8 configurations, serves as a common platform for various armament and equipment systems. European Land Systems maintains more than 3,000 Pandur platforms worldwide, more than 1,000 of which are operated by NATO member countries.

Army troops conduct live-fire training with 155mm artillery rounds. In response to growing demand for munitions, Ordnance and Tactical Systems is expanding metal parts production capacity and throughput.

An Army Abrams main battle tank during training at Fort Irwin, California. There are more than 4,300 Abrams tanks currently in service across 10 countries.

Awarded \$1.3 billion from Austria for production of Pandur 6x6 wheeled combat vehicles. With options, the contract has a maximum potential value of \$2 billion.

Secured a contract from the Army for continued low-rate initial production (LRIP) of the M10 Booker, the first newly developed Army combat vehicle to transition from prototype to production in 45 years.

Expanded several key Ordnance and Tactical Systems facilities to increase production, including more than \$1.2 billion in awards for 155mm artillery production.

Technologies

Our Technologies segment provides a full spectrum of services, technologies and products to an expanding market that increasingly seeks solutions combining leading-edge electronic hardware with specialized software. The segment is organized into two business units: Information Technology (GDIT) and Mission Systems. Together, they serve a wide range of military, intelligence, federal civilian, state and commercial customers.

The Technologies portfolio includes technology solutions and mission-critical services; mobile communication, computers, command-and-control and cyber (C5) mission systems; and intelligence, surveillance and reconnaissance (ISR) solutions. GDIT and Mission Systems share many of the same customers and increasingly go to market together to offer complementary offerings and solution sets.

The segment's highly skilled workforce is a key differentiator, comprising nearly 40,000 employees, including technologists, engineers and mission experts, many with high-level security clearances. The segment's backlog consists of thousands of contracts and task orders across a mix of U.S. and non-U.S. government and commercial customers.

HIGHLIGHTS

Mission Systems leads the deployment of the Mobile User Objective System (MUOS) ground system, which includes four ground-station facilities positioned around the globe to assist in the management and operation of orbiting satellites.

Mission Systems produces a family of high-assurance encryption products that are widely deployed to protect national security systems, information and networks across all domains against dynamic and persistent threats.

GDIT's expansive portfolio includes cloud services, cybersecurity, network modernization, artificial intelligence, machine learning, application development, high-performance computing and 5G next-generation wireless communications.

Grew total potential contract value — which includes backlog plus unfunded IDIQ contracts and unexercised options — by 18.1% to \$48.1 billion.

Awarded a contract with maximum potential value of \$5.6 billion to modernize, integrate and operate the Department of Defense's Mission Partner Environments (MPEs), enabling the military and its partners to securely communicate and share real-time information at multiple levels of classification.

Won a U.S. Space Force contract with a maximum potential value of \$2.2 billion to provide sustainment services for the MUOS satellite communications system.

Acquired Iron EagleX, Inc., further expanding GDIT's portfolio of mission solutions in artificial intelligence and machine learning, cyber, software development and cloud services.

PART I

ITEM 1. BUSINESS

(Dollars in millions, unless otherwise noted)

BUSINESS OVERVIEW

General Dynamics is a global aerospace and defense company that specializes in high-end design, engineering and manufacturing to deliver state-of-the-art solutions to our customers. We offer a broad portfolio of products and services in business aviation; ship construction and repair; land combat vehicles, weapons systems and munitions; and technology products and services. Our leadership positions in attractive business aviation and defense markets enable us to deliver superior and enduring shareholder returns.

Our company consists of 10 business units, which are organized into four operating segments: Aerospace, Marine Systems, Combat Systems and Technologies. We refer to the latter three collectively as our defense segments. To optimize market focus, customer intimacy, agility and operating expertise, each business unit is responsible for the development and execution of its strategy and operating results. This structure allows for a lean corporate function, which sets the overall strategy and governance for the company and is responsible for allocating and deploying capital.

Our business units seek to deliver superior operating results by building industry-leading franchises. To achieve this goal, we invest in advanced technologies, pursue a culture of continuous improvement, and strive to be the low-cost, high-quality provider in each of our markets. The result is long-term value creation measured by strong earnings and cash flow and an attractive return on capital.

Over the past decade, we have invested to create, renew or expand our portfolio of products and services across our businesses. This includes product development investments in Aerospace to bring to market an all-new lineup of business jet aircraft, capital investments in Marine Systems to support significant growth in U.S. Navy ship and submarine construction plans over the next two decades, development of next-generation platforms and technologies to meet customers' emerging requirements in Combat Systems, and strategic acquisitions to achieve critical mass and build out a complete spectrum of solutions for our Technologies customers. We expect to realize an attractive return from these investments in each of our segments, and we will continue to evaluate our capital deployment opportunities to deliver long-term growth and enduring value to our shareholders.

Following is additional information on each of our operating segments. For a supplemental discussion of segment performance and backlog, see Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7.

AEROSPACE

Our Aerospace segment is recognized as a leading producer of business jets and the standard bearer in new technology aircraft, aircraft repair, customer support and custom completion services. The segment consists of our Gulfstream and Jet Aviation business units. We have earned our reputation through:

- superior aircraft design, manufacturing excellence, quality, performance, safety and reliability;
- technologically advanced flight deck and cabin systems; and
- industry-leading customer support.

We believe the key to long-term value creation in the business jet industry is steady investment in new aircraft models and technologies and in customer service capabilities. Since acquiring Gulfstream more than 20 years ago, we have made significant investments in research and development (R&D), state-of-the-art manufacturing facilities, and maintenance and support through a combination of product development efforts, capital expansion and Jet Aviation’s global support network. We are also the industry leader in the use of sustainable aviation fuel (SAF) and energy efficient engines.

We are committed to continual investment in R&D to create new aircraft that consistently broaden customer offerings while raising the bar for safety and performance. The result is the unprecedented development of an all-new lineup of the most technologically advanced business jet aircraft in the world. The Gulfstream family of aircraft offer industry-leading cabin, cockpit and safety technologies and the longest ranges at the fastest speeds in their respective classes.

The following represents Gulfstream’s current product line, along with the maximum range, maximum speed, cabin length (excluding baggage), and total number of city-pair speed records held for each aircraft:

Note: Range subject to multiple variables

Gulfstream’s in-service aircraft hold 405 city-pair speed records, more than any other business jet manufacturer, including the National Aeronautic Association’s polar and westbound around-the-world speed records.

The most recent addition to the in-service Gulfstream fleet is the ultra-long-range, ultra-large-cabin G700, which entered service following U.S. Federal Aviation Administration (FAA) certification in March 2024. It combines our most spacious cabin with our advanced Symmetry Flight Deck, the industry’s most technologically advanced flight deck, and the superior high-speed performance of all-new engines to create best-in-class capabilities.

In 2021, we introduced two new aircraft, the ultra-long-range, ultra-large-cabin G800 and the large-cabin G400, completing a nearly two decade effort to develop an all new family of Gulfstream aircraft.

Both aircraft feature our industry-leading high-speed range and efficiency, safety enhancements, and our advanced Symmetry Flight Deck. The G800 is Gulfstream's longest-range aircraft, with an 8,000 nautical mile range at Mach 0.85. The G800 replaces the G650 and G650ER, which currently operate in 55 countries with more than 580 aircraft of this family in service. The G400 is a clean-sheet (i.e., all new) design developed in concert with the G500 and G600, thus expanding the commonality across the Gulfstream family of aircraft. The G400 will join a market segment in which Gulfstream has not participated for several decades. Both aircraft will enter service following FAA certification.

The G500 and G600 entered service in 2018 and 2019, respectively. These clean sheet aircraft replaced the G450 and G550 models, whose combined family has an installed base of more than 1,650 aircraft around the world. Our investment in the development of these aircraft included a new wing, new avionics, new fuselage and new ergonomically designed larger interiors, as well as systems and technologies to improve the manufacturing process and quality of the aircraft. As a result, the G500 and G600 are faster, more fuel efficient, and have greater cabin volume, reduced emissions, more range and improved flight controls compared with the aircraft they replaced. At year-end 2024, cumulative deliveries of the G500 and G600 aircraft totaled more than 300.

Our disciplined and consistent approach to new product development has allowed us to introduce repeatedly first-to-market capabilities that set industry standards for safety, performance, quality, speed and comfort. Product enhancement and development efforts include initiatives in advanced avionics, composites, flight-control and vision systems, acoustics, and cabin technologies.

Gulfstream designs, develops and manufactures aircraft in Savannah, Georgia, including all large-cabin models. The mid-cabin G280 is assembled by a non-U.S. partner. All models are outfitted in Gulfstream's and Jet Aviation's facilities. As Gulfstream's aircraft portfolio and customer base have grown and become increasingly global in reach over the years, we have invested in our facilities and operations around the world. At our Savannah campus, we added new purpose-built manufacturing facilities, increased aircraft service capacity, opened a customer-support distribution center and expanded our R&D capabilities.

We offer comprehensive support for the more than 3,000 Gulfstream aircraft in service around the world and operate an extensive network of factory-owned service centers. We continue to invest in these maintenance, repair and overhaul (MRO) facilities and inventory to accommodate fleet growth. We also operate a 24/7 year-round customer support center and offer on-call Gulfstream aircraft technicians ready to deploy around the world for customer service requirements under our Field and Airborne Support Team (FAST) rapid-response unit.

In addition to expanding the reach of Gulfstream's aircraft maintenance network outside the United States, Jet Aviation provides a comprehensive suite of innovative aircraft services for aircraft owners and operators around the world. With approximately 50 locations throughout North America, Europe, the Middle East and the Asia-Pacific region, our offerings include maintenance, completion, aircraft management, charter, staffing and fixed-base operator (FBO) services.

Jet Aviation manages approximately 310 business aircraft globally on behalf of individuals and corporate owners. We operate a leading global FBO network of approximately 30 facilities on four continents and support all aircraft types with a full range of maintenance services, including 24/7 global aircraft-on-ground support. We also operate one of the world's largest custom completion and refurbishment centers for both narrow- and wide-body aircraft and perform modifications, upgrades and lifecycle sustainment support for various government fleets. We continue to grow our global footprint through acquisitions, expansions and significant renovations in strategic business aviation markets most

frequented by these customers. In 2024, we acquired FBO operations in Milwaukee, Wisconsin, and broke ground on a new facility in Miami, Florida, at Opa Locka Executive Airport, expanding options in the Upper Midwest and on the East Coast for customers based in and traveling across these regions.

The following map displays the broad reach of our combined Gulfstream and Jet Aviation services network, including authorized service centers:

The Aerospace segment places a priority on sustainability throughout its manufacturing and service operations, producing aircraft that maximize fuel efficiency while offering customers options to reduce or eliminate their carbon footprints. Gulfstream and Jet Aviation have been at the forefront of the industry by adopting and expanding the availability of SAF, which achieves as much as an 80% reduction in carbon dioxide emissions per gallon over its lifecycle compared to petroleum-based jet fuel. Gulfstream's service and test aircraft have flown more than two million nautical miles on SAF since 2016, and in 2019, Gulfstream became the first business jet manufacturer to make SAF available to customers. In November 2023, Gulfstream conducted the world's first transatlantic flight using 100% SAF. Gulfstream also offers operators the ability to achieve carbon-neutral travel by facilitating the purchase of carbon-offset credits. In addition to actively expanding the availability of SAF at its FBO locations, Jet Aviation allows customers to purchase SAF at locations where it is not available through a book-and-claim system. Since 2019, Jet Aviation has uploaded more than 11 million gallons of blended SAF to its customers.

Revenue for the Aerospace segment was 24% of our consolidated revenue in 2024, 20% in 2023 and 22% in 2022. Revenue by major products and services was as follows:

Year Ended December 31	2024	2023	2022
Aircraft manufacturing	\$ 7,811	\$ 5,710	\$ 5,876
Aircraft services	3,438	2,911	2,691
Total Aerospace	\$ 11,249	\$ 8,621	\$ 8,567

MARINE SYSTEMS

Our Marine Systems segment is the leading designer and builder of nuclear-powered submarines and a leader in surface combatant and auxiliary ship design and construction for the U.S. Navy. We also provide maintenance, modernization and lifecycle support services for Navy ships and maintain the most sophisticated marine engineering expertise in the world to support future capabilities. Our ability to design, build and maintain our nation's most technologically sophisticated warships is a critical element of the U.S. defense industrial base. In addition to Navy ships, we have designed and built ocean-going Jones Act ships for commercial customers. Marine Systems consists of three business units — Electric Boat, Bath Iron Works and NASSCO.

In support of our Navy customer's significant increase in demand for submarines and surface ships, we have made substantial investments to expand our facilities, grow and train our workforce, and expand our supply chain. The resulting increase in capacity and capabilities will support the unprecedented growth expected in our shipbuilding business, particularly submarines, over the next two decades.

Electric Boat is the prime contractor and lead shipyard on all Navy nuclear-powered submarine programs. The business is responsible for all aspects of design and engineering and leads the construction of both Columbia-class ballistic-missile submarines and Virginia-class attack submarines.

The Columbia-class ballistic-missile submarine is a 12-boat program that the Navy considers its top acquisition priority. Accordingly, the program has received the highest possible rating from the government's Defense Priorities and Allocations System. These submarines will provide strategic deterrent capabilities for decades, with the first boat expected to deliver in 2028 to begin replacement of the current Ohio-class ballistic-missile submarine fleet as it reaches the end of its service life. Construction is scheduled to span two decades, and the value of the Navy's program of record is in excess of \$125 billion.

The Navy procures Virginia-class submarines in multi-boat blocks. Along with an industry partner, we are currently working on Blocks IV and V in the program, with 14 Virginia-class submarines in our backlog scheduled for delivery through 2032. Ten of the planned boats in Block V will include the Virginia Payload Module, an 84-foot Electric Boat-designed-and-built hull section that adds four additional payload tubes, more than tripling the strike capacity of these submarines and providing unique capabilities to support special missions.

We have invested significant capital over the past several years in expanded and modernized facilities at Electric Boat to support the growth in submarine construction, and will work with our Navy customer on any additional construction needs that could develop in light of increased submarine demand. Equal to the commitment of capital is our commitment to developing our Electric Boat workforce. While the steepest portion of our personnel ramp is behind us, we still expect the Electric Boat workforce to continue to grow to enable sustained production of one Columbia-class submarine plus up to two Virginia-class submarines per year as the submarine industrial base expands to support that pace. Along with strong contributions from the states of Connecticut and Rhode Island, we continue to invest in the training and tools necessary for our skilled employees to deliver these next-generation submarines to the Navy. We continue to work with our growing network of approximately 3,000 suppliers to support the growth related to concurrent production of the two submarine programs.

Bath Iron Works builds the Arleigh Burke-class (DDG-51) guided-missile destroyer and manages modernization and lifecycle support for all Navy destroyers. In 2023, we were awarded a contract from

the Navy for construction of three Flight III DDG-51 destroyers. We have a total of 11 ships in backlog scheduled for delivery through 2032.

NASSCO specializes in Navy auxiliary and support ships and is currently building the Expeditionary Sea Base (ESB), which serves as an afloat forward-staging base for U.S. Marines and special operations forces, and the John Lewis-class (T-AO-205) fleet replenishment oiler. Work on the final ESB in backlog will continue into 2026, while the six T-AO-205 ships currently in backlog have deliveries planned into 2028. In 2024, NASSCO received an award for the tenth ship of this class with options to build up to seven additional T-AO-205 ships. NASSCO has also designed and built crude oil and product tankers and container and cargo ships for commercial customers, satisfying Jones Act requirements that ships carrying cargo between U.S. ports be built in U.S. shipyards.

On December 31, 2024, backlog for our major ship construction programs and the scheduled final delivery date of ships currently in backlog were as follows:

In addition to design and construction activities, our Marine Systems segment provides comprehensive post-delivery services to modernize and extend the service life of these and other Navy ships. NASSCO conducts full-service maintenance and surface-ship repair operations in Navy fleet concentration areas in San Diego, California; Norfolk, Virginia; Bremerton, Washington; and Mayport, Florida. Electric Boat provides submarine maintenance and modernization services in a variety of U.S. locations, and Bath Iron Works provides lifecycle support services for Navy surface ships in U.S. and overseas ports. In support of allied navies, we offer program management, planning, engineering and design support for submarine construction programs.

Revenue for the Marine Systems segment was 30% of our consolidated revenue in 2024, 29% in 2023 and 28% in 2022. Revenue by major products and services was as follows:

Year Ended December 31	2024	2023	2022
Nuclear-powered submarines	\$ 10,392	\$ 8,631	\$ 7,310
Surface ships	2,819	2,698	2,561
Repair and other services	1,132	1,132	1,169
Total Marine Systems	\$ 14,343	\$ 12,461	\$ 11,040

COMBAT SYSTEMS

Our Combat Systems segment is a premier manufacturer and integrator of land combat solutions worldwide, including wheeled and tracked combat vehicles, weapons systems and munitions. The segment consists of three business units — Land Systems, European Land Systems (ELS), and Ordnance and Tactical Systems (OTS).

Combat Systems creates long-term value through operational excellence — high-quality, on-schedule and on-budget performance — combined with investments in innovative technologies that modernize existing platforms and develop next-generation capabilities to meet our customers' rapidly evolving requirements. We maintain our market-leading position by focusing on innovation, affordability and speed to market to deliver increased survivability, performance and lethality on the battlefield. Our large installed base of wheeled and tracked vehicles around the world and expertise gained from research, engineering and production programs position us well for modernization programs, support and sustainment services, and future development programs.

Land Systems is the sole-source producer of two foundational products central to the U.S. Army's warfighting capabilities — the Abrams main battle tank and Stryker wheeled combat vehicle. Both of these platforms are core components of the multi-domain, joint war fight in practice today and envisioned on the battlefield of the future.

We continue to maximize the capability, effectiveness and lethality of the Abrams tank to overmatch all current and potential threats. The demand by NATO members and other allies and partners for procurement and upgrades of Abrams tanks remains strong, reflected by a growing installed base in Europe, the Middle East, North Africa and Indo-Pacific theaters of operation.

The Stryker is an eight-wheeled, medium-weight combat vehicle that combines lethality, mobility and survivability. Land Systems continues to develop upgrades and enhancements to this highly versatile and combat-proven platform to address the Army's evolving operational needs. We are currently fielding a Stryker platform that includes enhanced survivability, increased power, improved cross-country mobility and an advanced digital, in-vehicle network. We have completed fielding these vehicles for four of the current eight Army brigades, as well as for the Army's Ranger Regiment. In addition, coordination continues with the Army for next-generation upgrades to the platform and new uses for the vehicle. We continue to expand the mission capabilities of this platform, including an air defense mission package (Sergeant Stout, formerly known as M-SHORAD), a state-of-the-art electronic warfare suite, a high-energy laser, a high-power microwave and several command post options.

We are in low-rate initial production (LRIP) of the Army's M10 Booker combat vehicle — the first newly developed Army ground combat vehicle to transition from prototype to production in 45 years. The M10 Booker will enhance the capability and lethality of Infantry Brigade Combat Teams in combat

operations. The highly lethal, survivable and mobile direct-fire combat vehicle melds recently developed and battle-tested designs to dominate ground threats on the multi-domain battlefield.

Combat Systems provides similar capabilities for U.S. allies and partners through export opportunities and through our operations in several countries around the world, including Canada, the United Kingdom, Spain, Switzerland, Austria, Germany and Romania. As a result, we have a market-leading position in light armored vehicles (LAVs) with more than 12,000 of the high-mobility, versatile Pandur, Piranha and other LAVs in service worldwide.

Land Systems is producing 449 new LAVs for the Canadian army in eight variants, including ambulances, command posts, maintenance and recovery vehicles, and troop-carrying vehicles, as well as upgrading Canada's existing fleet. In addition, Land Systems is producing 66 additional LAVs on the Light Armoured Vehicle Reconnaissance Surveillance System (LRSS) program that are equipped with state of the art surveillance suites. Land Systems is also producing the British Army's Ajax armored fighting vehicle, a next-generation, medium-weight tracked combat vehicle. With six variants, including a reconnaissance vehicle, an armored personnel carrier and various support platforms, the Ajax family of vehicles offers advanced electronic architecture and proven technology for a balance of survivability, lethality and mobility, along with high reliability for a vehicle in its weight class.

ELS is producing and upgrading Piranha vehicles, a premier 8x8 armored combat vehicle, around the world. We are currently providing Piranha 5 vehicles for several countries, including Denmark, Romania and Spain. Additionally, we provide mobile bridge systems with payloads ranging from 100 kilograms to 100 tons to customers worldwide. We offer the ASCOD, a highly versatile tracked combat vehicle with multiple versions, including the Spanish Pizarro and the Austrian Ulan. ELS also offers Duro and Eagle tactical vehicles in a range of options and weight classes and is currently producing these vehicles for Luxembourg, Switzerland and Germany, while providing a full range of product support for the German armed forces.

We are expanding our platform capabilities through continued investment in robotic and autonomous vehicle technology. We have developed semi-autonomous robotic platforms that can be equipped with an array of modular mission payloads for use alongside dismounted soldiers. The Army's first robotic vehicle program of record, the Small Multipurpose Equipment Transport (S-MET), is based on a Land Systems-developed autonomous vehicle. Additionally, we have developed the Tracked Robot 10-ton (TRX) prototype, a medium-sized, semi-autonomous combat vehicle that enables critical battlefield roles, such as direct and indirect fire, autonomous resupply, reconnaissance and other battlefield missions.

On December 31, 2024, the installed base for our major vehicle programs, as well as the quantity and scheduled final delivery date of vehicles and vehicle upgrades in backlog were as follows:

	Vehicle	Installed Base		Backlog	
		Vehicle Quantity	Countries	Vehicle Quantity	Final Delivery
	ABRAMS Main Battle Tank	4,334	10	519	2027
	STRYKER Wheeled Vehicle	4,624	3	493	2026
	M10 BOOKER Combat Vehicle	25	1	70	2026
	LAV	4,976	9	370	2032
	AJAX / ASCOD Tracked Vehicle	612	4	382	2027
	PANDUR / PIRANHA Armored Vehicle	7,276	26	825	2032
	DURO / EAGLE Tactical Vehicle	2,944	5	75	2026

Complementing these military-vehicle offerings, OTS designs, develops and produces a comprehensive array of sophisticated weapon systems and munitions. OTS produces next-generation weapon and defense systems for shipboard, aircraft and ground applications, including high-speed Gatling guns for all U.S. fighter aircraft, and combat vehicle active protection systems.

OTS's munitions portfolio covers the full breadth of naval, air and ground forces applications across all calibers and weapon platforms for the U.S. government and its non-U.S. partners. Globally, we maintain a market-leading position in the supply of Hydra-70 rockets, large-caliber tank ammunition, medium-caliber ammunition, military propellants, mortar and a 155mm artillery suite of ammunition. OTS is expanding its existing metal parts production capacity from 36,000 to 86,000 rounds per month in 2025 and its existing propellant capacity from 5 million to 16 million pounds per year by 2028 while establishing capacity for 155mm load, assemble, and pack (LAP) of 50,000 rounds per month in 2025. The OTS facilities and production expansion supports the Army's effort to accelerate artillery production. In addition, OTS entered into a strategic teaming agreement in 2024 for the production of solid rocket motors that will improve resiliency in the domestic supply chain.

OTS is the systems integrator for the next generation of artillery solutions in support of the Army's Indirect Fire Modernization objectives. Additionally, OTS maintains a leading position providing missile subsystems in support of U.S. tactical and strategic missiles, provisioning both legacy and next-

generation missiles with critical aerostructures, control actuators, high-performance warheads, and cutting-edge hypersonic rocket cases.

Revenue for the Combat Systems segment was 19% of our consolidated revenue in 2024, 20% in 2023 and 18% in 2022. Revenue by major products and services was as follows:

Year Ended December 31	2024	2023	2022
Military vehicles	\$ 5,101	\$ 5,036	\$ 4,581
Weapons systems, armament and munitions	2,932	2,442	2,024
Engineering and other services	964	790	703
Total Combat Systems	\$ 8,997	\$ 8,268	\$ 7,308

TECHNOLOGIES

Our Technologies segment provides a full spectrum of services, technologies and products to a wide range of military, intelligence, federal civilian and state customers. The segment is organized into two business units — Information Technology (GDIT) and Mission Systems — with a diverse portfolio that includes:

- consulting, technology solutions and mission-support services;
- mobile communication, computers, command-and-control and cyber (C5) mission systems; and
- intelligence, surveillance and reconnaissance (ISR) solutions.

Over the past decade, the U.S. Department of Defense (DoD), the intelligence community and federal civilian agencies have increasingly prioritized technology solutions as a critical element of their missions, transforming technology resources from back-office support functions to a strategic priority. Expanded cyber threats and the demand for advanced warfighter connectivity have accelerated these trends, adding urgency to required technology investments. The result is a significant increase in federal information technology (IT) modernization and technology spending in recent years and a shift to large-scale, end-to-end, highly engineered solutions to meet the ever-changing information-systems and mission-support needs of these customers.

GDIT and Mission Systems share a common defense, intelligence and federal civilian customer base and increasingly go to market together. In addition, with the convergence of digital technologies, the two businesses benefit from significant complementary offerings and solution sets. We make strategic investments in new and emerging technologies and partner with commercial companies to bring solutions to our customers that combine leading-edge technologies with an intimate knowledge of customers' mission needs. The segment's highly skilled workforce comprises approximately 40,000 employees, including technologists, engineers, mission experts and cleared personnel critical to solving the toughest security and technology challenges facing the United States and its allies.

GDIT provides digital consulting services, modernizes large-scale IT enterprises, and deploys the latest technologies to optimize and protect customer networks, data and information. Operating thousands of complex digital modernization programs across the federal government, GDIT's expansive portfolio includes cloud services, cybersecurity, network modernization, artificial intelligence/machine learning (AI/ML), application development, high-performance computing, and 5G and next-generation wireless communications. In 2024, GDIT acquired Iron EagleX, Inc., further expanding its portfolio of mission solutions in AI/ML, cyber, software development and cloud services. At the center of these efforts is GDIT's development of secure, tailorable and scalable digital solutions, known as our Digital

Accelerators. These Digital Accelerators are at the forefront of technological trends and are designed to accelerate customers' adoption and integration of advanced technologies to meet unique mission needs.

Mission Systems is a defense electronics manufacturer and integrator for C5ISR applications in all domains. Our products and solutions are built into platforms and integrated systems critical to our national security. The business' portfolio includes both prime contract programs with government customers as well as subcontract positions with large platform providers to develop and integrate technologies to make their systems smarter and more secure.

The Technologies segment leverages its scale, partnerships and deep knowledge of its customers' missions and challenges to bring innovation to those customers across a portfolio of thousands of contracts. While no individual contract is material to the segment's results, the following highlights provide a sampling of the value of this business.

In the defense market, GDIT is modernizing the U.S. Central Command's (CENTCOM) enterprise IT infrastructure. CENTCOM's area of responsibility covers 21 nations in Northeast Africa, Central and South Asia and the Middle East. We are utilizing AI/ML technologies to improve decision making, transition CENTCOM to a new cloud environment, and enhance the efficiency and effectiveness of its networks. GDIT is also leveraging its zero trust capabilities to bolster CENTCOM's cyber defenses and protect against future cyber threats.

In the federal civilian market, GDIT is operating and modernizing the Healthcare Integrated General Ledger Accounting System (HIGLAS) for the Centers for Medicare and Medicaid Services (CMS). HIGLAS is a single, integrated accounting system that standardizes and centralizes federal financial accounting for all of CMS's programs. The HIGLAS system processes approximately 4.5 million Medicare claims daily and over \$1.6 trillion in annual payments. In modernizing the HIGLAS system, GDIT will leverage its AI/ML capabilities to analyze trends and patterns to determine potential anomalies in the data and detect fraud, waste and abuse.

Under the User Facing and Data Center Services (UDS) contract for the National Geospatial-Intelligence Agency (NGA), GDIT is providing hybrid cloud services, and innovative IT design, engineering, implementation and operations support services. We are supporting NGA in the development of their new headquarters in St. Louis, Missouri, and are committed to supporting the St. Louis area as a strategic hub for the geospatial intelligence community through our innovation center, community partnerships and talent pipeline programs. As an example, in our DeepSky lab, teams can test new capabilities and collaborate with technology and industry partners to prototype new solutions.

Mission Systems develops and manufactures high-assurance encryption products that are widely deployed to protect national security systems, data and networks against persistent threats. These Type 1 National Security Agency (NSA)-certified products and capabilities provide needed protection for classified voice, video and data in-transit or at-rest in all domains. Capabilities range from enterprise systems to embedded applications required for terrestrial, airborne or space environments.

We are working with our U.S. Army customer to adapt elements of advanced resilient radio frequency (RF) to address battlefield realities such as jamming, spoofing, cyberattacks and lack of ground connectivity. Given our deep product innovation experience, we were recently selected to build the Next Generation Survival radio for the U.S. Joint Forces. For the Canadian Army, we provide the Land Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) system.

Mission Systems continues to help advance our nation’s position in the space domain. The U.S. Space Development Agency (SDA) selected Mission Systems to establish the ground operations and integration segment for Tranche 1 and 2 of the National Defense Space Architecture by building ground entry points and operations centers, as well as providing network operations and systems integration services for the SDA’s next tranche of proliferated low-Earth orbit satellites. In addition, we provide critical subsystems for data processing and security of space assets across multiple space vehicle platforms.

In the maritime domain, we have a more than 60-year legacy of providing critical systems to the Navy’s submarine programs. These include advanced fire-control and weapon launch systems, tactical control systems, specialized hardware and software solutions for acoustics, cybersecurity, and torpedo guidance, and other core capabilities that are essential for submarine modernization with U.S. and allied forces.

Mission Systems also continues to invest in autonomous capabilities both undersea and in the air. Our Unmanned Undersea Vehicle (UUV) Manufacturing and Assembly Center of Excellence provides manufacturing, assembly, integration and testing capabilities for Mission Systems’ Bluefin Robotics UUVs, as well as the Hammerhead and MEDUSA programs for the Navy. In addition, we support a variety of manned aircraft and unmanned aerial vehicle (UAV) platforms with mission-critical processing and security subsystems on both modern combat and ISR aircraft as well as emerging capabilities like the Collaborative Combat Aircraft.

Revenue for the Technologies segment was 27% of our consolidated revenue in 2024, 31% in 2023 and 32% in 2022. Revenue by major products and services was as follows:

Year Ended December 31	2024	2023	2022
IT services	\$ 8,761	\$ 8,459	\$ 8,195
C5ISR solutions	4,366	4,463	4,297
Total Technologies	\$ 13,127	\$ 12,922	\$ 12,492

CUSTOMERS

In 2024, 69% of our consolidated revenue was from the U.S. government, 14% was from U.S. commercial customers, 10% was from non-U.S. government customers and the remaining 7% was from non-U.S. commercial customers.

U.S. GOVERNMENT

Our primary customer is the DoD. We also contract with other U.S. government customers, including the intelligence community and the Departments of Homeland Security and Health and Human Services. Our revenue from the U.S. government was as follows:

Year Ended December 31	2024	2023	2022
DoD	\$ 27,191	\$ 24,720	\$ 22,250
Non-DoD	4,810	4,711	4,808
Foreign military sales (FMS)*	1,063	896	633
Total U.S. government	\$ 33,064	\$ 30,327	\$ 27,691
% of total revenue	69%	72%	70%

* In addition to our direct non-U.S. sales, we sell to non-U.S. governments through the FMS program. Under the FMS program, we contract with and are paid by the U.S. government, and the U.S. government assumes the risk of collection from the non-U.S. government customer.

Our U.S. government revenue is derived from fixed-price, cost-reimbursement and time-and-materials contracts. Our production contracts are primarily fixed-price. Under these contracts, we agree to perform a specific scope of work for a fixed amount. Contracts for research, engineering, repair and maintenance, and other services are typically cost-reimbursement or time-and-materials. Under cost-reimbursement contracts, the customer reimburses contract costs incurred and pays a fixed, incentive or award-based fee. The amount for an incentive or award fee is determined by our ability to achieve targets set in the contract, such as cost, quality, schedule and performance. Under time-and-materials contracts, the customer pays a fixed hourly rate for direct labor and generally reimburses us for the cost of materials.

Of our U.S. government revenue, fixed-price contracts accounted for 51% in 2024, 53% in 2023 and 56% in 2022; cost-reimbursement contracts accounted for 43% in 2024, 41% in 2023 and 38% in 2022; and time-and-materials contracts accounted for 6% in 2024, 2023 and 2022.

For information on the advantages and disadvantages of each of these contract types, see Note B to the Consolidated Financial Statements in Item 8.

U.S. COMMERCIAL

Our U.S. commercial revenue was \$6.7 billion in 2024, \$5.8 billion in 2023 and \$5.7 billion in 2022, which represented 14%, 14% and 15% of our consolidated revenue in each of the respective years. The majority of this revenue was for business jet aircraft and related services where our customer base consists of individuals and public and privately held companies across a wide range of industries.

NON-U.S.

Our revenue from non-U.S. government and commercial customers was \$8 billion in 2024, \$6.1 billion in 2023 and \$6 billion in 2022, which represented 17% of our consolidated revenue in 2024, 14% in 2023 and 15% in 2022.

We conduct business with customers around the world. Our non-U.S. defense subsidiaries maintain long-term relationships with their customers and have established themselves as principal regional suppliers and employers, providing a broad portfolio of products and services.

Our non-U.S. commercial revenue consists primarily of business jet aircraft exports and worldwide aircraft services. While the installed base of aircraft is concentrated in North America, orders from

customers outside North America represent a significant portion of our aircraft business with approximately 43% of the Aerospace segment's aircraft backlog on December 31, 2024.

COMPETITION

Several factors determine our ability to compete successfully in the defense and business aviation markets. While customers' evaluation criteria vary, the principal competitive elements include:

- the technical excellence, reliability, safety and cost competitiveness of our products and services;
- our ability to innovate and develop new products and technologies that improve mission performance and adapt to dynamic threats;
- successful program execution and on-time delivery of complex, integrated systems;
- our global footprint and accessibility to customers;
- the reputation and customer confidence derived from past performance; and
- the successful management of customer relationships.

DEFENSE MARKET COMPETITION

The U.S. government contracts with numerous domestic and non-U.S. companies for products and services. We compete against other contractors as well as smaller companies that specialize in a particular technology or capability. Outside the United States, we compete with global defense contractors' exports and the offerings of local, private and state-owned defense manufacturers. Our Marine Systems segment has one primary competitor with which it also partners on the Virginia-class submarine program, and to which it subcontracts on the Columbia-class submarine program. For commercial and repair work, the Marine Systems segment competes with several additional U.S. shipyards. Our Combat Systems segment competes with a large number of U.S. and non-U.S. businesses. Our Technologies segment competes with many companies, from large government contracting and commercial technology companies to small niche competitors with specialized technologies or expertise. The operating cycle of many of our major programs can result in sustained periods of program continuity when we perform successfully.

We are involved in teaming and subcontracting relationships with some of our competitors. Competitions for major defense and other government contracting programs often require companies to form teams to bring together a spectrum of capabilities to meet the customer's requirements. Opportunities associated with these programs include roles as the program's integrator, overseeing and coordinating the efforts of all participants on a team, or as a provider of a specific component or subsystem.

BUSINESS JET AIRCRAFT MARKET COMPETITION

The Aerospace segment has several competitors for each of its Gulfstream products. Key competitive factors include aircraft safety, reliability and performance; comfort and in-flight productivity; service quality, global footprint and responsiveness; technological and new-product innovation; and price. We believe that Gulfstream competes effectively in all of these areas.

The Aerospace segment competes worldwide in the business jet aircraft services market primarily on the basis of quality, price and timeliness. While competition for each type of service varies somewhat, the segment faces a number of competitors of varying sizes for each of its offerings.

INTELLECTUAL PROPERTY

We develop technology, manufacturing processes and systems-integration practices. In addition to owning a large portfolio of proprietary intellectual property, we license some intellectual property rights to and from others. The U.S. government holds licenses to many of our patents developed in the performance of U.S. government contracts, and it may use or authorize others to use the inventions covered by these patents. Although these intellectual property rights are important to the operation of our business, no existing patent, license or other intellectual property right is of such importance that its loss or termination would have a material impact on our business.

HUMAN CAPITAL MANAGEMENT

Our company is a global community of approximately 117,000 employees dedicated to our Ethos of transparency, trust, honesty and alignment. These four core values drive how we operate our business; govern how we interact with each other, our customers, partners and suppliers; guide the way that we treat our workforce; and determine how we connect with our communities. Our commitment to ethical business practices is outlined in our *Standards of Business Ethics and Conduct*, which states our expectation that all employees conduct business in accordance with our Ethos, applicable laws and our policies. Each employee is asked to acknowledge receipt, understanding of and compliance with our standards.

Due to the highly specialized nature of our business, we must hire and train skilled and qualified people to design and build the products and perform the services required by our customers. This includes upskilling employees to advance within the workplace. The health, welfare and safety of our employees is paramount throughout our workplaces. This effort starts with treating all employees with dignity and respect and providing them with fair, market-based, competitive and equitable compensation. We recognize and reward the performance of our employees in line with our pay-for-performance philosophy and provide a comprehensive suite of benefit options that aim to enable our employees and their dependents to live healthy and productive lives.

Across our businesses, we take measures to prevent workplace hazards, encourage healthy and safe behaviors and enforce a culture of continuous improvement to ensure that our processes help reduce safety incidents and illnesses and comply with applicable health and safety laws.

We recognize that our success as a company depends on our ability to attract, develop and retain qualified people. Our commitment to promoting diversity of thought, experience, perspectives, backgrounds and capabilities to drive innovation strengthens the solutions we deliver to our customers. General Dynamics works hard to promote an environment that values and supports all employees. We proudly support a work environment that respects diverse opinions, values individual skills, celebrates unique experiences and cultivates teamwork. These efforts are a demonstration of our dedication to equal employment opportunities that foster and support a principled, productive and inclusive work environment. We stand for basic universal human rights, including that employment must be voluntary. We track, measure and analyze our workforce trends to establish accountability for putting people first across our businesses and at every level of our company.

Our values motivate us to promote strong workplace practices with opportunities for development and training. Our training and development efforts focus on ensuring that our people are appropriately trained on critical job skills as well as on leadership behaviors that are consistent with our Ethos. We conduct rigorous succession planning exercises to ensure that key positions have the appropriate level of

bench strength to provide for future key positions and leadership transitions. We listen to our people to assess areas of concern and levels of engagement.

2024 WORKFORCE STATISTICS

- Approximately 84% of our employees are based in the United States, of which roughly 69% are white, 31% are people of color, 19% are veterans of the U.S. armed forces and 8% have self-reported having a disability. The remaining 16% of our workforce is based internationally in over 65 countries with the primary concentrations being in North America and Europe. Approximately 21% of our workforce is represented by collective bargaining agreements.
- Our global workforce is 76% male and 24% female, and our senior leadership teams across the business are represented by 75% males and 25% females. During 2024, we hired more than 23,800 individuals of which 74% were male and 26% were female. For our approximately 19,400 U.S.-based hires in 2024, 58% were white and 42% were people of color.

RAW MATERIALS AND SUPPLIERS

We depend on suppliers and subcontractors for raw materials, components and subsystems. Our U.S. government customer is a supplier for some of our programs. These supply networks can experience price fluctuations and capacity constraints, which can put pressure on our costs. Effective management and oversight of suppliers and subcontractors is an important element of our successful performance. If our sources of supply are disrupted, particularly in instances where we rely on only one or two sources of supply, or in the event that international conflicts result in the disruption of manufacturing or trade relations for some supply components, our ability to meet our customer commitments could be adversely impacted. We attempt to mitigate risks with our suppliers by entering into long-term agreements and leveraging company-wide agreements to achieve economies of scale and by negotiating flexible pricing terms in our customer contracts.

REGULATORY MATTERS

U.S. GOVERNMENT CONTRACTS

U.S. government contracts are subject to procurement laws and regulations. The Federal Acquisition Regulation (FAR) and the Cost Accounting Standards (CAS) govern the majority of our contracts. The FAR mandates uniform policies and procedures for U.S. government acquisitions and purchased services. Also, individual agencies can have acquisition regulations that provide implementing language for the FAR or that supplement the FAR. For example, the DoD implements the FAR through the Defense Federal Acquisition Regulation Supplement (DFARS). For all federal government entities, the FAR regulates the phases of any product or service acquisition, including:

- acquisition planning;
- competition requirements;
- contractor qualifications;
- protection of source selection and supplier information; and
- acquisition procedures.

In addition, the FAR addresses the allowability of our costs, while the CAS addresses the allocation of those costs to contracts. The FAR and CAS subject us to audits and other government reviews

covering issues such as cost, performance, internal controls and accounting practices relating to our contracts.

NON-U.S. REGULATORY

Our non-U.S. operations are subject to the applicable government regulations and procurement policies and practices, as well as U.S. policies and regulations. We are also subject to regulations governing investments, exchange controls, repatriation of earnings and import-export control.

BUSINESS JET AIRCRAFT

The Aerospace segment is subject to FAA regulation in the United States and other similar aviation regulatory authorities internationally, including the Civil Aviation Administration of Israel (CAAI), the European Aviation Safety Agency (EASA) and the Civil Aviation Administration of China (CAAC). For an aircraft to be manufactured and sold, the model must receive a type certificate from the appropriate aviation authority, and each aircraft must receive a certificate of airworthiness. Aircraft outfitting and completions also require approval by the appropriate aviation authority, which is often accomplished through a supplemental type certificate. Aviation authorities can require changes to a specific aircraft or model type before granting approval. Maintenance facilities and charter operations must be licensed by aviation authorities as well.

ENVIRONMENTAL

We are subject to a variety of federal, state, local and foreign environmental laws and regulations. These laws and regulations cover the discharge, treatment, storage, disposal, investigation and remediation of materials, substances and wastes identified in the laws and regulations. We are directly or indirectly involved in environmental investigations or remediation at some of our current and former facilities and at third-party sites that we do not own but where we have been designated a potentially responsible party (PRP) by the U.S. Environmental Protection Agency or a state environmental agency. As a PRP, we are potentially liable to the government or third parties for the cost of remediating contamination. In cases where we have been designated a PRP, we generally seek to mitigate these environmental liabilities through available insurance coverage and by pursuing appropriate cost-recovery actions. In the unlikely event that we are required to fully fund the remediation of a site, the current statutory framework would allow us to pursue contributions from other PRPs. We regularly assess our compliance status and management of environmental matters.

Operating and maintenance costs associated with environmental compliance and management of contaminated sites are a normal, recurring part of our operations. Historically, these costs have not been material. In addition, we could be affected by future laws or regulations imposed in response to concerns over climate change, the timing and effect of which are difficult to assess.

Changes in environmental and climate change laws or regulations, including laws relating to greenhouse gas emissions, could lead to new or additional investment in product designs or facilities and could increase environmental compliance expenditures, including increased energy and raw materials costs. Environmental costs are often recoverable under our contracts with the U.S. government. Based on information currently available and current U.S. government policies relating to cost recovery, we do not expect continued compliance with environmental regulations, including costs associated with changes in environmental and climate change laws or regulations, to have a material impact on our results of operations, financial condition or cash flows. For additional information relating to the impact of environmental matters, see Note M to the Consolidated Financial Statements in Item 8.

AVAILABLE INFORMATION

We file reports and other information with the Securities and Exchange Commission (SEC) pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the Exchange Act). These reports and information include annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and proxy statements. Free copies of these items, and any amendments to those items filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, are made available on our website (gd.com) as soon as practicable after we electronically file such items with, or furnish them to, the SEC. The SEC maintains a website (sec.gov) that contains reports, proxy and information statements, and other information.

In addition to the information contained in this Form 10-K, information about the company can be found on our website and our Investor Relations website (investorrelations.gd.com). Our Investor Relations website contains a significant amount of information about the company, including financial information, our corporate governance principles and practices, and other information for investors. We encourage investors to visit our website, as we frequently update and post new information about our company, and it is possible that this information could be deemed material information.

References to our website and the SEC's website in this Form 10-K do not constitute, and should not be viewed as, incorporation by reference of the information contained on, or available through, the websites. The information should not be considered a part of this Form 10-K, unless otherwise expressly incorporated by reference.

ITEM 1A. RISK FACTORS

An investment in our common stock or debt securities is subject to risks and uncertainties. Investors should consider the following factors, in addition to the other information contained in this annual report on Form 10-K, before deciding whether to purchase our securities.

Investment risks can be market-wide as well as unique to a specific industry or company. The market risks faced by an investor in our securities are similar to the uncertainties faced by investors in a broad range of industries. There are some risks that apply more specifically to our business.

Our revenue is concentrated with the U.S. government. This customer relationship involves some specific risks. In addition, our sales to non-U.S. customers expose us to different financial and legal risks. Despite the varying nature of our government and commercial operations and the markets they serve, each segment shares some common risks, such as the ongoing development of high-technology products and the price, availability and quality of commodities and subsystems.

Risks Relating to Our Business and Industry

The U.S. government provides a significant portion of our revenue. Approximately 70% of our consolidated revenue was from the U.S. government. Levels of U.S. defense spending may be impacted by numerous factors, such as the domestic political environment, changes in national and international priorities, and threats to national security. Competing demands for federal funds can pressure various areas of spending. Decreases in U.S. government defense and other spending or changes in spending allocation or priorities could result in one or more of our programs being reduced, delayed or terminated, which could impact our financial performance.

For additional information relating to U.S. government budget and funding matters, see the Business Environment section of Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7.

U.S. government contracts are not always fully funded at inception, and any funding is subject to disruption or delay. Our U.S. government revenue is funded by agency budgets that operate on an October-to-September fiscal year. Early each calendar year, the President of the United States presents to the Congress the budget for the upcoming fiscal year. This budget proposes funding levels for every federal agency and is typically the result of months of policy and program reviews throughout the executive branch. For the remainder of the year, the Appropriations and Authorization Committees of the Congress typically review the president's budget proposals and establish the funding levels for the upcoming fiscal year. Once these levels are enacted into law, the Executive Office of the President administers the funds to the agencies.

There are two primary risks associated with the U.S. government budget cycle. First, the annual process may be delayed or disrupted. If the annual budget is not approved by the beginning of the government fiscal year, portions of the U.S. government can shut down or operate under a continuing resolution that maintains spending at prior-year levels, which can impact funding for our programs and timing of new awards. Second, the Congress typically appropriates funds on a fiscal-year basis, even though contract performance may extend over many years. Future revenue under existing multi-year contracts is conditioned on the continuing availability of congressional appropriations. Changes in appropriations in subsequent years may impact the funding available for these programs. Delays or changes in funding can impact the timing of available funds or lead to changes in program content.

Government contracts are subject to termination rights by the customer. U.S. government contracts generally permit the government to terminate a contract, in whole or in part, for convenience. If a contract is terminated for convenience, a contractor usually is entitled to receive payments for its allowable costs incurred and the proportionate share of fees or earnings for the work performed. The government may also terminate a contract for default in the event of a breach by the contractor. If a contract is terminated for default, the government in most cases pays only for the work it has accepted. Many foreign contracts have similar termination rights by customers. The termination of multiple or large programs could have a material adverse effect on our future revenue and earnings.

Government contractors operate in a highly regulated environment and are subject to audit by the U.S. government. Numerous U.S. government agencies routinely audit and review government contractors. These agencies review a contractor's performance under its contracts and compliance with applicable laws, regulations and standards. The U.S. government also reviews the adequacy of, and compliance with, internal control systems and policies, including the contractor's purchasing, property, estimating, material, earned value management and accounting systems. In some cases, audits may result in delayed payments or contractor costs not being reimbursed or subject to repayment. If an audit or investigation were to result in allegations against a contractor of improper or illegal activities, civil or criminal penalties and administrative sanctions could result, including termination of contracts, forfeiture of profits, suspension of payments, fines and suspension or prohibition from doing business with the U.S. government. In addition, reputational harm could result if allegations of impropriety were made. In some cases, audits may result in disputes with the respective government agency that can result in negotiated settlements, arbitration or litigation. Moreover, new laws, regulations or standards, or changes to existing ones, can increase our performance and compliance costs and reduce our revenue and earnings.

Our Aerospace segment is subject to changing customer demand for business aircraft. The business jet market is driven by the demand for business-aviation products and services by corporate, individual and government customers in the United States and around the world. Customer demand can be affected by a number of factors, including changes in general economic conditions, the availability and cost of credit, pricing pressures and trends in capital goods markets. An adverse change in customer demand for our business-aviation products and services could materially affect our future revenue and earnings. In addition, if customers default on existing contracts and the contracts are not replaced, the segment's anticipated revenue and profitability could be reduced materially.

Earnings and margin depend on our ability to perform on our contracts. When agreeing to contractual terms, our management team makes assumptions and projections about future conditions and events. The accounting for our contracts requires assumptions and estimates about these conditions and events. These projections and estimates assess, among other things:

- the productivity and availability of labor;
- the complexity of the work to be performed;
- the cost and availability of materials and components; and
- schedule requirements.

If there is a significant change in one or more of these circumstances, estimates or assumptions, or if the risks under our contracts are not managed adequately, the profitability of contracts could be adversely affected. This could affect earnings and margin materially.

Revenue, earnings and margin depend in part on supplier performance. We rely on other companies and our government customers to provide materials, components and subsystems for our products. Suppliers, including subcontractors, sometimes perform some of the services that we provide to our customers. We depend on these suppliers and government entities to meet our contractual obligations in full compliance with customer requirements and applicable law. Misconduct by suppliers, such as a failure to comply with procurement regulations or engaging in unauthorized activities, may harm our future revenue, earnings and margin.

We sometimes rely on only one or two sources of supply, and any disruption in our supply chain could have an adverse effect on our ability to meet our customer commitments and could adversely affect our business, results of operations and financial condition. For example, some of our operating segments rely on the supply of semiconductors for the manufacture of our products, and any inability of or delay by our suppliers to meet our order demands (including due to the suppliers' competing commercial priorities, any military conflict resulting in a disruption of manufacturing or trade relations, or any other business disruption) could delay or disrupt our ability to procure semiconductors. Our ability to perform our obligations to our customers, and our future revenue, earnings and margin, may be materially adversely affected if (1) any one or more of our suppliers is unable to or otherwise fails to, provide the agreed-upon materials or perform the agreed-upon services in a timely and cost-effective manner, or engages in misconduct or other improper activities or (2) we are unable to otherwise obtain necessary materials, components, subsystems or services in a timely and cost-effective manner.

Our success depends in part on our ability to develop new products and technologies and maintain a qualified workforce to meet the needs of our customers. Many of the products and services we provide involve sophisticated technologies and engineering, with related complex manufacturing and system-integration processes. Our customers' requirements change and evolve regularly. Accordingly, our performance depends in part on our ability to continue to develop, manufacture and provide innovative products and services and bring those offerings to market quickly at

cost-effective prices. Many of our new products must meet extensive and time-consuming regulatory requirements that are often outside our control and may result in unanticipated delays. Additionally, due to the highly specialized nature of our business, we must hire and retain the skilled and qualified personnel necessary to perform the services required by our customers and to develop and manufacture our products. To the extent that the demand for skilled personnel exceeds supply, we could experience higher labor, recruiting or training costs in order to attract and retain such employees. If we were unable to develop new products that meet customers' changing needs and satisfy regulatory requirements in a timely manner or successfully attract and retain qualified personnel, our future revenue and earnings may be materially adversely affected.

Risks Relating to Our International Operations

Operations outside the United States are subject to various risks that may be associated with doing business in foreign countries. In some countries there is increased chance for economic, legal or political instability, and procurement procedures may be less robust or mature, which may complicate the contracting process. Our non-U.S. operations may be sensitive to and impacted by (1) changes in a foreign government's national policies and priorities, political leadership and budgets, which may be influenced by changes in threat environments, geopolitical uncertainties, volatility in economic conditions and other economic and political factors including inflationary pressures; (2) changes in U.S., foreign, and international laws, regulations, and policies; (3) energy, natural resource and other commodity shortages; and (4) global trade disputes and supply chain disruptions. For example, the ongoing conflict between Russia and Ukraine has resulted in the imposition of numerous economic and trade sanctions, export controls, and other restrictions targeting Russia and Belarus, and the Russian government has implemented counter-sanctions and export controls targeting the U.S. and various foreign countries in which we operate. These actions have caused some economic disruptions around the world and have exacerbated global supply chain challenges. Changes and developments in any of these matters or factors may occur suddenly and could impact funding for programs or delay purchasing decisions or customer payments.

Non-U.S. transactions can involve increased risks arising from foreign exchange rate variability, which could, among other things, negatively impact sales and the translation of our international revenue from local currencies into U.S. dollars, and differing legal systems. Our non-U.S. operations are subject to U.S. and foreign laws and regulations, including laws and regulations relating to import-export controls, technology transfers, the Foreign Corrupt Practices Act (FCPA) and other anti-corruption laws, and the International Traffic in Arms Regulations (ITAR). An unfavorable event or trend in any one or more of these factors or a failure to comply with U.S. or foreign laws could result in administrative, civil or criminal liabilities, including suspension or debarment from government contracts or suspension of our export privileges, and could materially adversely affect revenue and earnings.

In addition, some non-U.S. government customers require contractors to enter into letters of credit, performance or surety bonds, bank guarantees and other similar financial arrangements. We may also be required to agree to specific in-country purchases, manufacturing agreements or financial support arrangements, known as offsets, that require us to satisfy investment or other commitments or face penalties. Offset requirements may extend over several years and could require us to team with local companies to fulfill these commitments. If we do not satisfy these financial or offset requirements, our future revenue and earnings may be materially adversely affected.

Risks Relating to Our Acquisitions and Similar Investment Activities

We have made and expect to continue to make investments, including acquisitions and joint ventures, that involve risks and uncertainties. When evaluating potential acquisitions and joint ventures, we make judgments regarding the value of business opportunities, technologies and other assets, and the risks and costs of potential liabilities based on information available to us at the time of the transaction. Whether we realize the anticipated benefits from these transactions depends on multiple factors, including our integration of the businesses involved; the performance of the underlying products, capabilities, or technologies; market conditions following the acquisition; and acquired liabilities, including some that may not have been identified prior to the acquisition. These factors could materially adversely affect our financial results.

Changes in business conditions may cause goodwill and other intangible assets to become impaired. Goodwill represents the purchase price paid in excess of the fair value of net tangible and intangible assets acquired in a business combination. Goodwill is not amortized and remains on our balance sheet indefinitely unless there is an impairment or a sale of a portion of the business. We review goodwill for impairment annually at each of our reporting units or when circumstances indicate that the likelihood of an impairment is greater than 50%. Such circumstances include a significant adverse change in the business climate for one of our reporting units or a decision to dispose of a reporting unit or a significant portion of a reporting unit. We face some uncertainty in our business environment due to a variety of challenges, including the risk factors discussed in this section. We may experience unforeseen circumstances that adversely affect the value of our goodwill or intangible assets. Future write-offs of goodwill or other intangible assets as a result of an impairment in the business could materially adversely affect our results of operations and financial condition.

Other Business and Operational Risks

Our business could be negatively impacted by cybersecurity events and other disruptions. We face various cybersecurity threats, including threats to our IT infrastructure and attempts to gain unauthorized access to our proprietary or classified information, denial-of-service attacks, as well as threats to the physical security of our facilities and employees, and threats from terrorist acts. We also design and manage IT systems and products for various customers. We generally face the same security threats for these systems and products as for our own internal systems. In addition, we face cybersecurity threats from entities and persons that may seek to target us through our customers, suppliers and other third parties with whom we do business. Many of these cybersecurity threats are increasingly sophisticated and constantly evolving. Accordingly, we maintain information security staff, policies and procedures for managing risk to our information systems, and we review and update our policies, procedures and practices in light of evolving threats. We conduct employee training on cybersecurity to mitigate persistent and continuously evolving cybersecurity threats, and we report cybersecurity events or losses of customer data to affected customers and applicable regulatory authorities. However, there can be no assurance that any such actions, including the timeliness of our efforts to review, update or implement policies, procedures and practices in light of evolving threats, or the safeguards put in place by our customers, suppliers and other parties on which we rely, will be sufficient to detect, prevent and mitigate cybersecurity breaches or disruptions, or the unauthorized release of sensitive information or corruption of data.

We have experienced cybersecurity events and disruptions such as viruses and attacks targeting our IT systems. Such prior events have not had a material impact on our financial condition, results of operations or liquidity. However, future threats could have a materially adverse impact on our company by, among other things, causing harm to our business, financial condition, results of operations or

reputation; disrupting our operations; exposing us to potential liability, regulatory actions and loss of business; and challenging our eligibility for future work on sensitive or classified systems for government customers. Due to the evolving nature of these security threats, the potential impact of any future incident cannot be predicted. Our insurance coverage may not be adequate to cover all the costs related to cybersecurity attacks or disruptions resulting from such events.

Our business may continue to be negatively impacted by the coronavirus (COVID-19) pandemic and could be negatively impacted by other pandemics and outbreaks. The COVID-19 pandemic has had, and could continue to have, a negative effect on our business, results of operations and financial condition. Other outbreaks of contagious diseases, including new variants of COVID-19, or other adverse public health developments in countries where we operate or our customers are located, could similarly adversely affect our business. This includes disruptions or restrictions on our employees' ability to work effectively, temporary closures of our facilities and the facilities of our customers, and the imposition of quarantine and travel restrictions that have and may in the future negatively affect demand for our products and services and result in supply-chain disruptions. Any such effects could materially adversely affect our ability to perform on our contracts. Any cost increases that result from these effects may not be fully recoverable on our contracts or adequately covered by insurance.

Global climate change could negatively affect our business. Increased public awareness and concern regarding global climate change may result in state, federal or international requirements to reduce or mitigate global warming, such as the imposition of carbon pricing mechanisms, stricter limits on greenhouse gas emissions, or other business restrictions or compliance requirements regarding reducing or mitigating global climate change. If environmental or climate-change laws or regulations are adopted or changed that directly or indirectly impose significant new costs, operational restrictions or compliance requirements on our business, products, customers or suppliers, they could increase our costs, require additional capital expenditures, reduce our margins and adversely affect our business, results of operations and financial condition.

Further, while we continuously evaluate and seek opportunities to improve our climate-related measures, there can be no assurance that changes in customer demand patterns and competition, as well as potential reputational risks, related to climate change will not adversely affect our business, results of operations and financial condition.

FORWARD-LOOKING STATEMENTS

This annual report on Form 10-K contains forward-looking statements that are based on management's expectations, estimates, projections and assumptions. Words such as "expects," "anticipates," "plans," "believes," "forecasts," "scheduled," "outlook," "estimates," "should" and variations of these words and similar expressions are intended to identify forward-looking statements. Examples include projections of revenue, earnings, operating margin, segment performance, cash flows, contract awards, aircraft production, deliveries and backlog. In making these statements, we rely on assumptions and analyses based on our experience and perception of historical trends, current conditions and expected future developments as well as other factors we consider appropriate under the circumstances. We believe our estimates and judgments are reasonable based on information available to us at the time. Forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended. These statements are not guarantees of future performance and involve risks and uncertainties that are difficult to predict. Therefore, actual future results and trends may differ materially from what is forecast in forward-looking statements due to a variety of factors, including the risk factors discussed in this Form 10-K.

All forward-looking statements speak only as of the date of this report or, in the case of any document incorporated by reference, the date of that document. All subsequent written and oral forward-looking statements attributable to General Dynamics or any person acting on our behalf are qualified by the cautionary statements in this section. We do not undertake any obligation to update or publicly release revisions to any forward-looking statements to reflect events, circumstances or changes in expectations after the date of this report. These factors may be revised or supplemented in future filings with the SEC.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 1C. CYBERSECURITY

We face various cybersecurity threats. The purpose of our cybersecurity program is to assess, identify, manage and mitigate cybersecurity risk while supporting the achievement of our business objectives.

Under our comprehensive risk management program, the board of directors (Board) of the company maintains oversight of the most significant risks facing the company, including cybersecurity risks, while senior management is responsible for the identification and prioritization of risks that are material to our business, corresponding risk-mitigation efforts and day-to-day management of our risk management program. The full Board retains oversight over management's cybersecurity efforts. At least annually, and often more frequently, the Board receives cybersecurity briefings from senior executives, including, when appropriate, executives focused on cybersecurity matters.

Our companywide cybersecurity policy sets the framework for our approach to cybersecurity. Each business unit and our corporate headquarters designates individuals with appropriate qualifications and experience to be responsible for addressing cybersecurity matters, including assessing, identifying and managing risks from cybersecurity threats, with a direct reporting line to senior management. Under our approach to cybersecurity, each business unit designs and operates its own information and cybersecurity program tailored to its market, customer requirements, regulatory requirements and threats. Our cybersecurity policy and procedures are designed to ensure senior management receives timely and adequate information regarding cybersecurity matters, including threats and incident response, as appropriate to the matter. Our policies and procedures are also designed to oversee and identify material cybersecurity risks related to third-party vendors and service providers.

Our companywide Cyber Council, comprised of information technology and cybersecurity executives from our business units, shares information and cybersecurity practices throughout the company, recommends policy and procedure updates and tracks emerging trends. The chair of the Cyber Council reports directly to the company's chief executive officer.

As part of our approach to cyber risk management, we regularly perform internal audits of internal processes and controls relating to cybersecurity. From time to time, as appropriate under our overall cybersecurity program, we engage third-party experts to support the assessment of cyber related risks, including to conduct cyber penetration testing.

See Item 1A—Risk Factors above for additional discussion of various risks related to cybersecurity that are reasonably likely to have a material impact on our company, including our business strategy, results of operations or financial condition.

ITEM 2. PROPERTIES

We operate in a number of offices, manufacturing plants, laboratories, warehouses and other facilities in the United States and abroad. We believe our facilities are adequate for our present needs and, given planned improvements and construction, expect them to remain adequate for the foreseeable future.

On December 31, 2024, our segments had material operations at the following locations:

- **Aerospace** – Mesa and Scottsdale, Arizona; Van Nuys, California; West Palm Beach, Florida; Brunswick and Savannah, Georgia; Cahokia, Illinois; Westfield, Massachusetts; Teterboro, New Jersey; New York, New York; Tulsa, Oklahoma; Dallas and Fort Worth, Texas; Appleton, Wisconsin; Sydney, Australia; Mexicali, Mexico; Singapore; Basel, Switzerland; Farnborough, United Kingdom.
- **Marine Systems** – San Diego, California; Groton and New London, Connecticut; Jacksonville, Florida; Bath and Brunswick, Maine; Middletown and North Kingstown, Rhode Island; Norfolk and Portsmouth, Virginia; Bremerton, Washington; Mexicali, Mexico.
- **Combat Systems** – Anniston, Alabama; East Camden, Arkansas; Healdsburg, California; Crawfordville, St. Petersburg and Tallahassee, Florida; Marion, Illinois; Saco, Maine; Sterling Heights, Michigan; Lincoln, Nebraska; Lima, Ohio; Eynon, Scranton and Wilkes-Barre, Pennsylvania; Garland and Mesquite, Texas; Joint Base Lewis-McChord, Washington; Vienna, Austria; Le Gardeur, London and Valleyfield, Canada; Kaiserslautern, Germany; Madrid, Sevilla and Trubia, Spain; Bürglen, Kreuzlingen and Tägerwilen, Switzerland; Merthyr Tydfil, United Kingdom.
- **Technologies** – Daleville, Alabama; Scottsdale, Arizona; Orlando, Florida; Bossier City, Louisiana; Annapolis Junction, Maryland; Dedham, Pittsfield and Taunton, Massachusetts; Bloomington, Minnesota; Rensselaer, New York; Greensboro, North Carolina; Chesapeake and Marion, Virginia; multiple locations in Northern Virginia; Ottawa, Canada; Oakdale and St. Leonards, United Kingdom.

A summary of floor space by segment on December 31, 2024, follows:

(Square feet in millions)	Company- owned Facilities	Leased Facilities	Government- owned Facilities	Total
Aerospace	5.5	10.1	0.5	16.1
Marine Systems	9.0	5.4	—	14.4
Combat Systems	6.7	6.6	4.9	18.2
Technologies	2.2	7.7	0.9	10.8
Total square feet	23.4	29.8	6.3	59.5

ITEM 3. LEGAL PROCEEDINGS

For information relating to legal proceedings, see Note M to the Consolidated Financial Statements in Item 8.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

INFORMATION ABOUT OUR EXECUTIVE OFFICERS

All of our executive officers are appointed annually. None of our executive officers were selected pursuant to any arrangement or understanding between the officer and any other person. Set forth below is information regarding our executive officers as of February 7, 2025 (references are to positions with General Dynamics Corporation, unless otherwise noted):

Name, Position and Office	Age
Jason W. Aiken – Executive Vice President, Technologies since February 2024; Executive Vice President, Technologies and Chief Financial Officer, January 2023 - February 2024; Senior Vice President and Chief Financial Officer, January 2014 - December 2022; Vice President of the company and Chief Financial Officer of Gulfstream Aerospace Corporation, September 2011 - December 2013; Vice President and Controller, April 2010 - August 2011; Staff Vice President, Accounting, July 2006 - March 2010	52
Shane A. Berg – Senior Vice President, Human Resources and Administration since February 2024; Senior Vice President, Planning and Development, January 2022 - February 2024; Executive Vice President of Princeton Theological Seminary, 2016 - January 2022	53
Christopher J. Brady – Vice President of the company and President of General Dynamics Mission Systems since January 2019; Vice President, Engineering of General Dynamics Mission Systems, January 2015 - December 2018; Vice President, Engineering of General Dynamics C4 Systems, May 2013 - December 2014; Vice President, Assured Communications Systems of General Dynamics C4 Systems, August 2004 - May 2013	62
Mark L. Burns – Vice President of the company and President of Gulfstream Aerospace Corporation since July 2015; Vice President of the company since February 2014; President, Product Support of Gulfstream Aerospace Corporation, June 2008 - June 2015	65
Danny Deep – Executive Vice President, Combat Systems, since April 2024; Vice President of the company and President of General Dynamics Land Systems, April 2020 - April 2024; Chief Operating Officer of General Dynamics Land Systems, September 2018 - April 2020; Vice President of General Dynamics Land Systems – Canada, January 2011 - September 2018	55
Gregory S. Gallopoulos – Senior Vice President, General Counsel and Secretary since January 2010; Vice President and Deputy General Counsel, July 2008 - January 2010; Managing Partner of Jenner & Block LLP, January 2005 - June 2008	65
M. Amy Gilliland – Senior Vice President of the company since April 2015; President of General Dynamics Information Technology since September 2017; Deputy for Operations of General Dynamics Information Technology, April 2017 - September 2017; Senior Vice President, Human Resources and Administration, April 2015 - March 2017; Vice President, Human Resources, February 2014 - March 2015; Staff Vice President, Strategic Planning, January 2013 - February 2014; Staff Vice President, Investor Relations, June 2008 - January 2013	50
Kimberly A. Kuryea – Senior Vice President and Chief Financial Officer since February 2024; Senior Vice President, Human Resources and Administration, April 2017 - April 2024; Vice President and Controller, September 2011 - March 2017; Chief Financial Officer of General Dynamics Advanced Information Systems, November 2007 - August 2011; Staff Vice President, Internal Audit, March 2004 - October 2007	57

William A. Moss – Vice President and Controller since April 2017; Staff Vice President, Internal Audit, May 2015 - March 2017; Staff Vice President, Accounting, August 2010 - May 2015	61
Phebe N. Novakovic – Chairman and Chief Executive Officer since January 2013; President and Chief Operating Officer, May 2012 - December 2012; Executive Vice President, Marine Systems, May 2010 - May 2012; Senior Vice President, Planning and Development, July 2005 - May 2010; Vice President, Strategic Planning, October 2002 - July 2005	67
David Paddock – Vice President of the company and President of General Dynamics Land Systems since April 2024; Vice President of the company and President of Jet Aviation, July 2019 - April 2024; Senior Vice President, Regional Operations USA of Jet Aviation, January 2015 - July 2019	57
Mark Rayha – Vice President of the company and President of Electric Boat Corporation since December 2024; Senior Vice President and Chief Operating Officer of Electric Boat Corporation, September 2023 - December 2024; Vice President and Chief Financial Officer of Electric Boat Corporation, July 2021 - September 2023; Vice President, Finance of Electric Boat Corporation, January 2020 - July 2021; Vice President and Chief Financial Officer of General Dynamics Mission Systems, January 2015 - January 2020	58
Robert E. Smith – Executive Vice President, Marine Systems, since July 2019; Vice President of the company and President of Jet Aviation, January 2014 - July 2019; Vice President and Chief Financial Officer of Jet Aviation, July 2012 - January 2014	57

PART II

ITEM 5. MARKET FOR THE COMPANY’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is listed on the New York Stock Exchange under the trading symbol “GD.”

On January 26, 2025, there were approximately 9,000 holders of record of our common stock.

For information regarding securities authorized for issuance under our equity compensation plans, see Note R to the Consolidated Financial Statements contained in Item 8.

We did not make any unregistered sales of equity securities in 2024.

The following table provides information about our fourth-quarter purchases of equity securities that are registered pursuant to Section 12 of the Securities Exchange Act of 1934, as amended:

Period	Total Number of Shares	Average Price per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares That May Yet Be Purchased Under the Program
<i>Shares Purchased Pursuant to Share Buyback Program</i>				
9/30/24-10/27/24	82,385	\$ 303.44	82,385	3,942,747
10/28/24-11/24/24	1,285,352	291.74	1,285,352	2,657,395
11/25/24-12/31/24	3,417,696	270.93	3,417,696	9,239,699
<i>Shares Delivered or Withheld Pursuant to Restricted Stock Vesting*</i>				
9/30/24-10/27/24	130	299.96		
10/28/24-11/24/24	—	—		
11/25/24-12/31/24	33	279.39		
	<u>4,785,596</u>	<u>277.08</u>		

* Represents shares withheld by, or delivered to, us pursuant to provisions in agreements with recipients of restricted stock granted under our equity compensation plans that allow us to withhold, or the recipient to deliver to us, the number of shares with a fair value equal to the statutory tax withholding due upon vesting of the restricted shares.

On December 4, 2024, our board of directors (Board) authorized management to repurchase up to 10 million additional shares of the company's outstanding stock. We repurchased 4.8 million shares in the fourth quarter of 2024. On December 31, 2024, 9.2 million shares remained authorized by the Board for repurchase. For additional information relating to our purchases of common stock during the past three years, see Note N to the Consolidated Financial Statements in Item 8.

The following performance graph compares the cumulative total return to shareholders on our common stock, assuming reinvestment of dividends, with similar returns for the Standard & Poor's 500 Index and the Standard & Poor's Aerospace & Defense Index, both of which include General Dynamics.

Cumulative Total Return
Based on Investments of \$100 Beginning December 31, 2019
(Assumes Reinvestment of Dividends)
(in per-share amounts)

ITEM 6. [RESERVED]

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Dollars in millions, except per-share amounts or unless otherwise noted)

For an overview of our operating segments, including a discussion of our major products and services, see the Business discussion contained in Item 1. The following discussion of our financial condition and results of operations for 2024 compared with 2023 should be read in conjunction with our Consolidated Financial Statements included in Item 8, while a discussion of 2023 compared with 2022 can be found in Item 7 of our annual report on Form 10-K for the year ended December 31, 2023.

BUSINESS ENVIRONMENT

GLOBAL EVENTS

The coronavirus (COVID-19) pandemic caused significant disruptions to national and global economies and government activities, including supply chain and staffing challenges. Additionally, in response to the Russian invasion of Ukraine, the United States and several other countries imposed economic and trade sanctions, export controls and other restrictions targeting Russia and Belarus. Lastly, the impact of the conflict in the Middle East continues to evolve. The disruptions caused by these events continue to impact global economies and businesses, including ours. The primary impact to our business is supply chain challenges, including availability of parts, quality escapes and inflationary pressures.

In our Aerospace segment, supply chain challenges paced our ability to ramp up production at the rate we like in response to strong customer demand for our aircraft, causing out-of-sequence manufacturing that increased costs and decreased operational efficiency. In addition, the conflict in the Middle East impacted the delivery schedule for our Israel-based supplier of mid-cabin aircraft. Within our defense segments, the COVID-19 pandemic resulted in supply chain challenges that continue to impact our Marine Systems segment. The Russia-Ukraine conflict and increased threat environment have created additional demand for certain of our products and services, particularly in our Combat Systems segment.

Any longer-term impact of these global events to our business is currently unknown due to the uncertainty around duration and their broader impact. For additional information, see the Risk Factors in Part I, Item 1A.

OUR MARKETS

With approximately 70% of our revenue from the U.S. government, government spending levels — particularly defense spending — influence our financial performance. The Congress has not yet passed a defense appropriations bill for the government's current fiscal year. However, the government has been operating under a continuing resolution (CR) that provides funding for some federal agencies through March 14, 2025. When the government operates under a CR, all programs of record are funded at the prior year's appropriated levels until the current year appropriations bill is signed into law. Therefore, the U.S. Department of Defense (DoD) is prohibited from starting new programs or increasing funding on existing programs unless there is an exception for the program included in the CR. The current CR included exceptions allowing the DoD to obligate additional funds for two fiscal year 2024 and one fiscal year 2025 Virginia-class submarines, and for non-executive pay improvements and infrastructure

investments to support the submarine industrial base. In addition, the CR included an exception allowing the DoD to obligate funds for the construction of the second submarine under the existing Columbia-class submarine contract. We do not anticipate the current CR having a material impact on our results of operations, financial condition or cash flows. However, the impact to our business from an extended CR or government shutdown that may result from any continuing delay by Congress to pass a new defense appropriations bill would depend on the duration and government implementation of the CR or shutdown.

The long-term outlook for our U.S. defense business is influenced by the U.S. military's funding priorities, the diversity of our programs and customers, our insight into customer requirements stemming from our incumbency on core programs, our ability to evolve our products to address a fast-changing threat environment and our proven track record of successful contract execution.

International demand for military equipment and technologies presents opportunities for our non-U.S. operations and exports from our North American businesses. While the revenue potential can be significant, there are risks to doing business in foreign countries, including changing budget priorities and overall spending pressures unique to each country.

In our Aerospace segment, we expect our investment in the development of new aircraft products and technologies to support the segment's long-term growth. Similarly, we believe our aircraft services business will be a source of steady revenue growth as the global business jet fleet continues to grow.

RESULTS OF OPERATIONS

INTRODUCTION

The following paragraphs explain how we recognize revenue and operating costs in our operating segments and the terminology we use to describe our operating results.

In the Aerospace segment, we record revenue on contracts for new aircraft when the customer obtains control of the asset, which is generally upon delivery and acceptance by the customer of the fully outfitted aircraft. Revenue associated with the segment's services businesses is recognized as work progresses or upon delivery of services. Fluctuations in revenue from period to period result from the number and mix of new aircraft deliveries, and the level and type of aircraft services performed during the period.

The majority of the Aerospace segment's operating costs relates to new aircraft production on firm orders and consists of labor, material, subcontractor and overhead costs. The costs are accumulated in production lots, recorded in inventory and recognized as operating costs at aircraft delivery based on the estimated average unit cost in a production lot. While changes in the estimated average unit cost for a production lot impact the level of operating costs, the amount of operating costs reported in a given period is based largely on the number and type of aircraft delivered. Operating costs in the Aerospace segment's services businesses are recognized generally as incurred.

For new aircraft, operating earnings and margin are a function of the prices of our aircraft, our operational efficiency in manufacturing and outfitting the aircraft, and the mix of ultra-large-cabin, large-cabin and mid-cabin aircraft deliveries. Aircraft mix can also refer to the stage of program maturity for our aircraft models. A new aircraft model typically has lower margins in its initial production lots, and then margins generally increase as we realize efficiencies in the production process. Additional factors affecting the segment's earnings and margin include the volume, mix and profitability

of services work performed, the market for pre-owned aircraft, and the level of general and administrative (G&A) and net research and development (R&D) costs incurred by the segment.

In the defense segments, revenue on long-term government contracts is recognized generally over time as the work progresses, either as products are produced or as services are rendered. Typically, revenue is recognized over time using costs incurred to date relative to total estimated costs at completion to measure progress toward satisfying our performance obligations. Incurred costs represent work performed, which corresponds with, and thereby best depicts, the transfer of control to the customer. Contract costs include labor, material, overhead and, when appropriate, G&A expenses. Variances in costs recognized from period to period reflect primarily increases and decreases in production or activity levels on individual contracts. Because costs are used as a measure of progress, year-over-year variances in costs result in corresponding variances in revenue, which we generally refer to as volume.

Operating earnings and margin in the defense segments are driven by changes in volume, performance or contract mix. Performance refers to changes in profitability based on adjustments to estimates at completion on individual contracts. These adjustments result from increases or decreases to the estimated value of the contract, the estimated costs to complete the contract or both. Therefore, changes in costs incurred in the period compared with prior periods do not necessarily impact profitability. It is only when total estimated costs at completion on a given contract change without a corresponding change in the contract value (or vice versa) that the profitability of that contract may be impacted. Contract mix refers to changes in the volume of higher- versus lower-margin work. Higher or lower margins can result from a number of factors, including contract type (e.g., fixed-price/cost-reimbursable) and type of work (e.g., development/production). Contract mix can also refer to the stage of program maturity for our long-term production contracts. New long-term production contracts typically have lower margins initially, and then margins generally increase as we achieve learning curve improvements or realize other cost reductions.

CONSOLIDATED OVERVIEW

2024 IN REVIEW

- Strong operating performance:
 - Revenue of \$47.7 billion, an increase of 12.9% from 2023
 - Operating earnings of \$4.8 billion, an increase of 13% from 2023, with sequential growth throughout the year
 - Diluted earnings per share of \$13.63, up 13.4% from 2023
 - Cash provided by operating activities of \$4.1 billion, or 109% of net earnings
- Backlog of \$90.6 billion, supporting our long-term growth expectations:
 - Strong Gulfstream aircraft order activity, including orders across all aircraft models
 - Several significant contract awards received in our defense segments, including \$3.7 billion of combined awards from the U.S. Navy for advance procurement and other work for the Virginia-class submarine program

Year Ended December 31	2024	2023	Variance	
Revenue	\$ 47,716	\$ 42,272	\$ 5,444	12.9%
Operating costs and expenses	(42,920)	(38,027)	(4,893)	12.9%
Operating earnings	4,796	4,245	551	13.0%
Operating margin	10.1%	10.0%		

Our consolidated revenue increased in 2024 driven by growth across all segments, including double digit percentage growth in our Aerospace and Marine Systems segments. Operating margin increased 10 basis points.

REVIEW OF OPERATING SEGMENTS

Following is a discussion of operating results and outlook for each of our operating segments. For the Aerospace segment, results are analyzed by specific types of products and services, consistent with how the segment is managed. For the defense segments, the discussion is based on markets and the lines of products and services offered with a supplemental discussion of specific contracts and programs when significant to the results. Additional information regarding our segments can be found in Note O to the Consolidated Financial Statements in Item 8.

AEROSPACE

Year Ended December 31	2024	2023	Variance	
Revenue	\$ 11,249	\$ 8,621	\$ 2,628	30.5%
Operating earnings	1,464	1,182	282	23.9%
Operating margin	13.0%	13.7%		
Gulfstream aircraft deliveries (in units)	136	111	25	22.5%

Operating Results

The increase in the Aerospace segment's revenue in 2024 consisted of the following:

Aircraft manufacturing	\$ 2,101
Aircraft services	527
Total increase	\$ 2,628

Aircraft manufacturing revenue increased in 2024 due primarily to the number and mix of aircraft deliveries, including our ultra-long-range, ultra-large-cabin G700 aircraft, which began deliveries in the second quarter of 2024 following U.S. Federal Aviation Administration (FAA) and European Union Aviation Safety Agency (EASA) certification. The number of G700 deliveries in 2024 was impacted by supplier quality escapes, late delivery of components and out of station work. Aircraft services revenue was higher in 2024 due to increased customer demand for aircraft maintenance based on established maintenance cycles, a larger installed base and customer flight activity.

The increase in the segment's operating earnings in 2024 consisted of the following:

Aircraft manufacturing	\$	213
Aircraft services		129
G&A/other expenses		(60)
Total increase	\$	282

Aircraft manufacturing operating earnings increased in 2024 but not at the same rate as revenue, reflecting additional costs associated with the initial deliveries of G700 aircraft due to out of station work caused by supplier quality escapes and late delivery of components. Aircraft services operating earnings were higher in 2024 due to higher volume. G&A/other expenses increased in 2024 consistent with the growth in the business. In total, the Aerospace segment's operating margin decreased 70 basis points in 2024.

2025 Outlook

We expect the Aerospace segment's 2025 revenue to increase to approximately \$12.7 billion with operating margin of approximately 13.7%.

MARINE SYSTEMS

Year Ended December 31	2024	2023	Variance	
Revenue	\$ 14,343	\$ 12,461	\$ 1,882	15.1%
Operating earnings	935	874	61	7.0%
Operating margin	6.5%	7.0%		

Operating Results

The increase in the Marine Systems segment's revenue in 2024 consisted of the following:

U.S. Navy ship construction	\$	1,525
U.S. Navy ship engineering, repair and other services		357
Total increase	\$	1,882

Revenue from U.S. Navy ship construction and engineering was up in 2024 due primarily to increased volume on the Columbia-class and Virginia-class submarine programs. The Marine Systems segment's operating margin decreased 50 basis points in 2024 due to a \$123 unfavorable profit adjustment in the fourth quarter of 2024 on the Virginia-class Block IV contract as it approaches completion in 2026. The Virginia-class program has been impacted by supplier quality issues and late supply chain deliveries causing cost growth and schedule delays.

2025 Outlook

We expect the Marine Systems segment's 2025 revenue to increase to approximately \$15 billion with operating margin of approximately 6.8%.

COMBAT SYSTEMS

Year Ended December 31	2024	2023	Variance	
Revenue	\$ 8,997	\$ 8,268	\$ 729	8.8%
Operating earnings	1,276	1,147	129	11.2%
Operating margin	14.2%	13.9%		

Operating Results

The increase in the Combat Systems segment's revenue in 2024 consisted of the following:

Weapons systems and munitions	\$ 509
U.S. military vehicles	218
International military vehicles	2
Total increase	\$ 729

Weapons systems and munitions revenue increased in 2024 due to heightened demand for artillery products. Revenue from U.S. military vehicles was up in 2024 due primarily to higher volume on the U.S. Army's M10 Booker combat vehicle program. The Combat Systems segment's operating margin increased 30 basis points compared with 2023 driven by favorable contract mix.

2025 Outlook

We expect the Combat Systems segment's 2025 revenue to increase to approximately \$9.1 billion with operating margin of approximately 14.5%.

TECHNOLOGIES

Year Ended December 31	2024	2023	Variance	
Revenue	\$ 13,127	\$ 12,922	\$ 205	1.6%
Operating earnings	1,260	1,202	58	4.8%
Operating margin	9.6%	9.3%		

Operating Results

The increase in the Technologies segment's revenue in 2024 consisted of the following:

Information technology (IT) services	\$ 302
C5ISR* solutions	(97)
Total increase	\$ 205

* Command, control, communications, computers, cyber, intelligence, surveillance and reconnaissance

The Technologies segment's revenue increased in 2024 due primarily to strong demand for IT services, including the ramp-up of new programs, offset partially by C5ISR solutions program timing and the ramp-down of legacy programs. Overall, the segment's margin increased 30 basis points compared with 2023 due to strong operating performance.

2025 Outlook

We expect the Technologies segment's 2025 revenue to increase to approximately \$13.5 billion with operating margin of approximately 9.2%.

CORPORATE

Corporate operating costs totaled \$139 in 2024 and \$160 in 2023 and consisted primarily of equity-based compensation expense. Corporate operating costs are expected to be approximately \$150 in 2025.

OTHER INFORMATION

PRODUCT AND SERVICE REVENUE AND OPERATING COSTS

Year Ended December 31	2024	2023	Variance	
Revenue:				
Products	\$ 28,635	\$ 24,595	\$ 4,040	16.4%
Services	19,081	17,677	1,404	7.9%
Operating Costs:				
Products	\$ (24,332)	\$ (20,591)	\$ (3,741)	18.2%
Services	(16,020)	(15,009)	(1,011)	6.7%

The increase in product revenue in 2024 consisted of the following:

Aircraft manufacturing	\$ 2,101
Ship construction	1,525
Weapons systems and munitions	509
Other, net	(95)
Total increase	\$ 4,040

Aircraft manufacturing revenue increased due to additional aircraft deliveries. Ship construction revenue was up due primarily to higher volume on the Columbia-class and Virginia-class submarine programs. Weapons systems and munitions revenue increased due to heightened demand for artillery products. In 2024, product operating costs increased at a higher rate than revenue due to supplier quality issues and late supply chain deliveries on the Virginia-class Block IV contract within our Marine Systems segment and additional costs associated with initial deliveries of G700 aircraft due to out of station work caused by supplier quality escapes and late delivery of components in our Aerospace segment.

The increase in service revenue in 2024 consisted of the following:

Aircraft services	\$ 527
C5ISR solutions/IT services	493
Ship services	357
Other, net	27
Total increase	\$ 1,404

Aircraft services revenue increased due to additional maintenance work. C5ISR solutions and IT services revenue was up due to higher volume, including the ramp-up of new programs. Ship services revenue increased due to higher volume on the Columbia-class submarine program. The primary drivers of the increase in service operating costs were the changes in volume on the programs described above.

G&A EXPENSES

As a percentage of revenue, G&A expenses decreased to 5.4% in 2024 compared with 5.7% in 2023 due to growth in revenue. We expect G&A expenses as a percentage of revenue in 2025 to be generally consistent with 2024.

OTHER, NET

Net other income was \$68 in 2024 and \$82 in 2023 and represents primarily the non-service components of pension and other post-retirement benefits. In 2025, we expect net other income to be approximately \$50.

INTEREST, NET

Net interest expense was \$324 in 2024 and \$343 in 2023. See Note K to the Consolidated Financial Statements in Item 8 for additional information regarding our debt obligations, including interest rates. We expect 2025 net interest expense to be consistent with 2024.

PROVISION FOR INCOME TAX, NET

Our effective tax rate was 16.7% in 2024 and 16.8% in 2023. For further discussion, including a reconciliation of our effective tax rate from the statutory federal rate, see Note D to the Consolidated Financial Statements in Item 8. For 2025, we expect a full-year effective tax rate of approximately 17.5%, generally consistent with our original expectations for 2024 before declining due to certain U.S. and foreign tax credits and benefits and other timing items.

BACKLOG AND ESTIMATED POTENTIAL CONTRACT VALUE

Our total backlog, including funded and unfunded portions, was \$90.6 billion on December 31, 2024, compared to \$93.6 billion at the end of 2023. Our total backlog is equal to our remaining performance obligations under contracts with customers as discussed in Note B to the Consolidated Financial Statements in Item 8. Our total estimated contract value, which combines total backlog with estimated potential contract value, was \$144 billion on December 31, 2024.

The following table details the backlog and estimated potential contract value of each segment at the end of 2024 and 2023:

	Funded	Unfunded	Total Backlog	Estimated Potential Contract Value	Total Estimated Contract Value
December 31, 2024					
Aerospace	\$ 18,895	\$ 798	\$ 19,693	\$ 1,132	\$ 20,825
Marine Systems	30,530	9,288	39,818	9,560	49,378
Combat Systems	16,142	838	16,980	8,647	25,627
Technologies	9,577	4,529	14,106	34,029	48,135
Total	\$ 75,144	\$ 15,453	\$ 90,597	\$ 53,368	\$ 143,965
December 31, 2023					
Aerospace	\$ 19,557	\$ 897	\$ 20,454	\$ 451	\$ 20,905
Marine Systems	30,141	15,755	45,896	3,647	49,543
Combat Systems	13,816	721	14,537	6,236	20,773
Technologies	8,961	3,779	12,740	28,011	40,751
Total	\$ 72,475	\$ 21,152	\$ 93,627	\$ 38,345	\$ 131,972

For additional information about our major products and services in backlog see the Business discussion contained in Item 1.

AEROSPACE

Aerospace funded backlog represents primarily new aircraft orders for which we have definitive purchase contracts and deposits from customers. Unfunded backlog consists of agreements to provide future aircraft maintenance and support services. The Aerospace segment ended 2024 with backlog of \$19.7 billion.

Orders in 2024 reflected strong demand across our portfolio of products and services, including orders for all models of Gulfstream aircraft. The segment's book-to-bill ratio (orders divided by revenue) was 1-to-1 in 2024, even as revenue grew by more than 30% year over year.

Beyond total backlog, estimated potential contract value represents primarily options and other agreements with existing customers to purchase new aircraft and long-term aircraft services agreements. On December 31, 2024, estimated potential contract value in the Aerospace segment was \$1.1 billion.

Demand for Gulfstream aircraft remains strong across customer types and geographic regions, generating orders from public and privately held companies, individuals, and governments around the world. Geographically, U.S. customers represented 54% of the segment's orders in 2024 and 56% of the segment's backlog on December 31, 2024, demonstrating continued strong domestic demand.

The following represents Gulfstream aircraft (in units) in backlog by region on December 31, 2024:

DEFENSE SEGMENTS

The total backlog in our defense segments represents the estimated remaining sales value of work to be performed under firm contracts. The funded portion of total backlog includes items that have been authorized and appropriated by the Congress and funded by customers, as well as commitments by international customers that are approved and funded similarly by their governments. The unfunded portion of total backlog includes the amounts we believe are likely to be funded, but there is no guarantee that future budgets and appropriations will provide the same funding level currently anticipated for a given program.

Estimated potential contract value in our defense segments includes unexercised options associated with existing firm contracts and unfunded work on indefinite delivery, indefinite quantity (IDIQ) contracts. Contract options represent agreements to perform additional work under existing contracts at the election of the customer. We recognize options in backlog when the customer exercises the option and establishes a firm order. For IDIQ contracts, we evaluate the amount of funding we expect to receive and include this amount in our estimated potential contract value. This amount is often less than the total IDIQ contract value, particularly when the contract has multiple awardees. The actual amount of funding received in the future may be higher or lower than our estimate of potential contract value.

Total backlog in our defense segments was \$70.9 billion on December 31, 2024, compared with \$73.2 billion at year-end 2023. In 2024, the total book-to-bill ratio in our defense segments was 1-to-1. Estimated potential contract value in our defense segments was \$52.2 billion on December 31, 2024, up 37.8% compared with \$37.9 billion at year-end 2023.

MARINE SYSTEMS

The Marine Systems segment's backlog consists of very long-term submarine and surface ship construction programs, as well as numerous engineering and repair contracts. The segment's total estimated contract value remained steady compared with year-end 2023.

Significant contract awards in the Marine Systems segment during 2024 include:

- \$780 from the U.S. Navy for the construction of an additional John Lewis-class (T-AO-205) fleet replenishment oiler. The contract including options for an additional seven T-AO-205 oilers has a maximum potential value of more than \$6.7 billion.
- \$2.9 billion from the Navy for long-lead materials for Block V and Block VI Virginia-class submarines.
- \$205 from the Navy for planning yard services for the Arleigh Burke-class (DDG-51) guided-missile destroyer program. The contract including options has a maximum potential value of \$1.1 billion.
- \$770 from the Navy for lead yard services, development studies, design and engineering efforts, procurement and delivery of initial spare parts to support maintenance availabilities for Virginia-class submarines.
- \$530 from the Navy to provide maintenance, modernization and repair services for the DDG-51 destroyer, USS Hartford Los Angeles-class submarine and Wasp-class amphibious assault ship programs.
- \$455 from the Navy to provide engineering, technical, design and planning yard support services for operational strategic and attack submarines.
- \$255 for future technology development on the next-generation attack submarine, SSN(X), program for the Navy.
- \$115 for advanced nuclear plant studies (ANPS) in support of the Columbia-class submarine program.
- \$55 from the Navy to support non-nuclear maintenance on submarines based at the New England Naval Submarine Support Facility.

The following represents the Marine Systems segment's total estimated contract value by major program on December 31, 2024:

COMBAT SYSTEMS

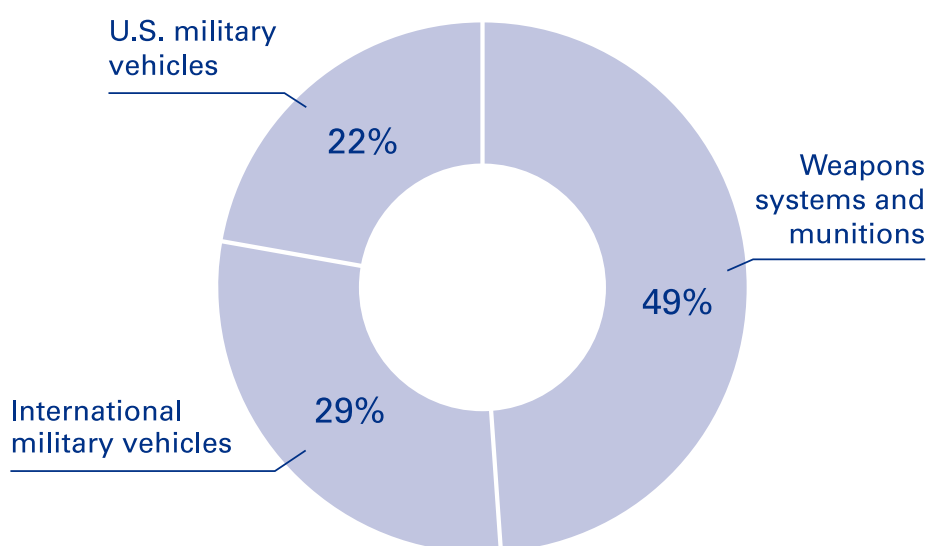

The Combat Systems segment's backlog consists of a mix of U.S. and international combat vehicles, weapons systems and munitions programs. The vehicle programs are generally long-term franchise programs, while the weapons systems and munitions programs tend to be shorter-term in nature. The segment's backlog was up 16.8% from year-end 2023 to \$17 billion. The segment's estimated potential contract value was \$8.6 billion on December 31, 2024, compared with \$6.2 billion at year-end 2023.

Significant contract awards in the Combat Systems segment during 2024 include:

- \$2 billion for various munitions and ordnance. These contracts have a maximum potential value of \$3.2 billion.
- An IDIQ contract to provide medium-caliber ammunition cartridges for the U.S. Army. The contract has a maximum potential value of \$3 billion among two awardees.
- \$1.6 billion from the Army to produce 155mm artillery projectile metal parts and propelling bag charges and establish additional capacity for artillery propellant. The contracts have a maximum potential value of \$2.5 billion.
- \$1.3 billion for the production of Pandur 6x6 wheeled combat vehicles from the Austrian Federal Ministry of Defense. The contract including options has a maximum potential value of \$2 billion.
- Two contracts from the Canadian government for the Logistics Vehicle Modernization (LVM) program to provide a new fleet of light and heavy armored vehicles and logistics support services for the Canadian Army. These contracts including options have a maximum potential value of \$1.9 billion. The scope of the work is shared with an industry partner.
- \$605 from the Army for Stryker vehicle upgrades, systems technical support and inventory management. The contracts have a maximum potential value of \$1.1 billion.

- \$350 from the Army for Abrams main battle tank upgrades, engineering and logistics support services, and system and sustainment technical support services.
- \$325 from the Army for the third phase of the low-rate initial production (LRIP) of the M10 Booker Combat Vehicle.
- \$325 from the Canadian government to produce armored combat support vehicles (ACSVs).
- \$285 to produce Abrams main battle tanks in the system enhancement package version 3 (SE Pv3) configuration for Romania.
- \$280 from the Army to produce Stryker Sgt. Stout vehicles and provide long-lead materials to support the future retrofit of the vehicles to a dual Stinger Vehicle Universal Launcher (SVUL) configuration.

The following represents the Combat Systems segment's total estimated contract value by market on December 31, 2024:

TECHNOLOGIES

The Technologies segment's backlog consists of thousands of contracts and task orders across a mix of U.S. and non-U.S. government and commercial customers. These contracts can be shorter-cycle or span multiple years, but commonly include a smaller, initially funded order. Therefore, our estimated potential contract value of \$34 billion is an important indicator of future orders and revenue. In 2024, approximately 75% of the segment's orders were from additional work on IDIQ contracts or the exercise of options. The segment's total estimated contract value was \$48.1 billion on December 31, 2024, up 18.1% compared with \$40.8 billion at year-end 2023.

Significant contract awards in the Technologies segment during 2024 include:

- \$50 from the U.S. Air Force to modernize, integrate and operate the DoD's Mission Partner Environments (MPEs), enabling the military and its partners to securely communicate and share real-time information at multiple levels of classification. The contract has a maximum potential value of \$5.6 billion.
- \$2.2 billion for several key classified contracts. These contracts have a maximum potential value of \$4.4 billion.
- A contract from the U.S. Space Force to provide sustainment services for the Mobile User Objective System (MUOS) satellite communications system. The contract has a maximum potential value of \$2.2 billion.
- Four IDIQ contracts from the Canadian government to support the Land Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) system for the Canadian Army. The contracts have a maximum potential value of \$1.3 billion.
- \$125 to modernize the U.S. Central Command's (CENTCOM) enterprise IT infrastructure. The contract including options has a maximum potential value of \$920.
- \$140 from the Navy to manufacture and test various components for MK54 torpedoes and for general engineering services. The contract including options has a maximum potential value of \$810.
- \$340 from the Navy to provide full life cycle and operational support for the Trident II Fire Control System (FCS) onboard Ohio-class submarines and continue the development, production and installation of FCS for all new Columbia-class submarines. The contract including options has a maximum potential value of \$620.
- \$605 for multiple awards from the U.S. Space Development Agency (SDA) to develop and integrate ground systems for the low-Earth orbit (LEO) satellite network.
- \$205 from the North Carolina Department of Health and Human Services to operate its Medicaid Management Information System. The contract including options has a maximum potential value of \$525.
- \$515 from the National Geospatial-Intelligence Agency (NGA) to provide hybrid cloud services and IT design, engineering, and operations and sustainment services.
- \$280 for two awards from the New York State Department of Health to operate and modernize the state's health insurance exchange and to support and enhance the state's Medicaid Management Information System. These contracts including options have a maximum potential value of \$480.
- \$235 from the Centers for Medicare and Medicaid Services (CMS) to provide cloud services and software tools and to support the Benefits Coordination & Recovery Center. The contracts including options have a maximum potential value of \$470.
- \$115 from the Department of Veteran Affairs (VA) under the Veterans Intake, Conversion and Communications Services (VICCS) program to digitally convert historical veteran records and automate data extraction of existing records. The contract including options has a maximum potential value of \$345.

The following represents the Technologies segment's total estimated contract value by customer on December 31, 2024:

LIQUIDITY AND CAPITAL RESOURCES

We place a strong emphasis on cash flow generation, which is underpinned by an operating discipline focused on cost control and working capital management. This emphasis gives us the flexibility for prudent capital deployment, while allowing us to maintain an appropriate debt level, and preserves a strong balance sheet for future opportunities.

We evaluate a variety of capital deployment options based on current market conditions and our long-term outlook, and we believe agility is a key component of our capital deployment strategy as market conditions change over time. Our capital deployment priorities include investments in our business infrastructure, products and services to drive long-term growth, a predictable dividend, strategic acquisitions and opportunistic share repurchases.

We believe cash generated by operating activities, supplemented by commercial paper issuances, is sufficient to satisfy our short- and long-term liquidity needs. An additional potential source of capital is the issuance of long-term debt in capital market transactions.

We ended 2024 with a cash and equivalents balance of \$1.7 billion compared with \$1.9 billion at the end of 2023. The following is a discussion of our major operating, investing and financing activities in 2024 and 2023, as classified on the Consolidated Statement of Cash Flows in Item 8:

Year Ended December 31	2024	2023
Net cash provided by operating activities	\$ 4,112	\$ 4,710
Net cash used by investing activities	(953)	(941)
Net cash used by financing activities	(3,369)	(3,094)

OPERATING ACTIVITIES

Cash provided by operating activities was \$4.1 billion in 2024 compared with \$4.7 billion in 2023. The primary driver of cash flows in both years was net earnings. Cash flows in 2024 were affected negatively by growth in operating working capital, particularly driven by the ramp-up in production of new Gulfstream aircraft models, offset partially by an increase in customer deposits driven by Gulfstream aircraft orders in our Aerospace segment. Cash flows in 2023 were affected positively by a decrease in unbilled receivables due to the receipt of progress payments on large international vehicle contracts in our Combat Systems segment and an increase in customer deposits driven by Gulfstream aircraft orders, offset partially by an increase in inventory due primarily to the ramp-up in production of new Gulfstream aircraft models.

INVESTING ACTIVITIES

Cash used by investing activities was \$953 in 2024 and \$941 in 2023. Our investing activities include cash paid for capital expenditures and business acquisitions; purchases, sales and maturities of marketable securities; and proceeds from asset sales.

Capital Expenditures. The primary use of cash for investing activities in both years was capital expenditures. Capital expenditures were \$916 in 2024 and \$904 in 2023. Capital expenditures include equipment and facility enhancements to support new and existing programs across our businesses.

FINANCING ACTIVITIES

Cash used by financing activities was \$3.4 billion in 2024 and \$3.1 billion in 2023. Financing activities include the use of cash for repurchases of common stock, payment of dividends, and debt and commercial paper repayments. Our financing activities also include proceeds received from debt and commercial paper issuances and employee stock option exercises.

Dividends. On March 6, 2024, our board of directors (Board) declared an increased quarterly dividend of \$1.42 per share, the 27th consecutive annual increase. Previously, the Board had increased the quarterly dividend to \$1.32 per share in March 2023. Cash dividends paid were \$1.5 billion in 2024 and \$1.4 billion in 2023.

Share Repurchases. Our Board from time to time authorizes management's repurchase of outstanding shares of our common stock on the open market. On December 4, 2024, the Board authorized management to repurchase up to 10 million additional shares of the company's outstanding stock. We paid \$1.5 billion and \$434 in 2024 and 2023, respectively, to repurchase our outstanding

shares. On December 31, 2024, 9.2 million shares remained authorized by our Board for repurchase, representing 3.4% of our total shares outstanding.

Debt Issuances and Repayments. In November 2024, we repaid fixed-rate notes of \$500, and in May and August 2023, we repaid fixed-rate notes of \$750 and \$500, respectively, all at their respective scheduled maturities using cash on hand. Fixed-rate notes of \$750 mature in both April and May 2025. We currently plan to repay these notes at maturity using cash on hand, potentially supplemented by commercial paper or other borrowings. For additional information regarding our debt obligations, including scheduled debt maturities and interest rates, see Note K to the Consolidated Financial Statements in Item 8.

On December 31, 2024, we had no commercial paper outstanding, but we maintain the ability to access the commercial paper market in the future. Separately, we have a \$4 billion committed bank credit facility for general corporate purposes and working capital needs and to support our commercial paper issuances. We also have an effective shelf registration on file with the Securities and Exchange Commission (SEC) that allows us to access the debt markets.

NON-GAAP FINANCIAL MEASURES

We emphasize the efficient conversion of net earnings into cash and the deployment of that cash to maximize shareholder returns. As described below, we use free cash flow and return on invested capital (ROIC) to measure our performance in these areas. While we believe these metrics provide useful information, they are not defined operating measures under U.S. generally accepted accounting principles (GAAP), and there are limitations associated with their use. Our calculation of these metrics may not be completely comparable to similarly titled measures of other companies. As a result, the use of these metrics should not be considered in isolation from, or as a substitute for, GAAP measures.

Free Cash Flow. We define free cash flow as net cash provided by operating activities less capital expenditures. We believe free cash flow is a useful measure for investors because it portrays our ability to generate cash from our businesses for purposes such as repaying debt, funding business acquisitions, repurchasing our common stock and paying dividends. We use free cash flow to assess the quality of our earnings and as a key performance measure in evaluating management. The following table reconciles free cash flow with net cash from operating activities, as classified on the Consolidated Statement of Cash Flows in Item 8:

Year Ended December 31	2024	2023	2022
Net cash provided by operating activities	\$ 4,112	\$ 4,710	\$ 4,579
Capital expenditures	(916)	(904)	(1,114)
Free cash flow	\$ 3,196	\$ 3,806	\$ 3,465
Cash flows as a percentage of net earnings:			
Net cash provided by operating activities	109%	142%	135%
Free cash flow	85%	115%	102%

Return on Invested Capital. We believe ROIC is a useful measure for investors because it reflects our ability to generate returns from the capital we have deployed in our operations. We use ROIC to evaluate investment decisions and as a performance measure in evaluating management. We define ROIC as net operating profit after taxes divided by average invested capital. Net operating profit after taxes is defined as net earnings plus after-tax interest and amortization expense, calculated using the

statutory federal income tax rate. Average invested capital is defined as the sum of the average debt and average shareholders' equity excluding accumulated other comprehensive loss. Average debt and average shareholders' equity excluding accumulated other comprehensive loss are calculated using the respective balances at the end of the preceding year and the respective balances at the end of each of the four quarters of the year presented. ROIC excludes goodwill impairments and non-economic accounting changes as they are not reflective of company performance.

ROIC is calculated as follows:

Year Ended December 31	2024	2023	2022
Net earnings	\$ 3,782	\$ 3,315	\$ 3,390
After-tax interest expense	310	315	309
After-tax amortization expense	191	201	235
Net operating profit after taxes	\$ 4,283	\$ 3,831	\$ 3,934
Average invested capital	\$ 32,451	\$ 31,258	\$ 31,260
Return on invested capital	13.2%	12.3%	12.6%

CASH REQUIREMENTS

The following is a discussion of how we expect to meet the future cash requirements from known contractual and other obligations.

The majority of our revenue is derived from long-term contracts and programs that can span several years. We similarly enter into long-term agreements with suppliers and subcontractors for goods and services in support of these contracts and programs with payment terms that are generally aligned with the payment terms from our customers. In some instances, we require advance payments or deposits from our customers, which help fund our purchase commitments and reduce the risk of customer performance.

Additionally, we have significant liabilities under our defined benefit retirement plans. As these liabilities are settled using plan assets, our future cash requirements associated with these liabilities are generally limited to the annual cash contributions to these plans required in accordance with Internal Revenue Service (IRS) regulations. See Note S to the Consolidated Financial Statements in Item 8 for additional information.

Other obligations, such as scheduled principal and interest payments on our fixed-rate notes, and scheduled payments in accordance with our lease agreements are expected to be satisfied using cash generated from operations. See Notes J and K to the Consolidated Financial Statements in Item 8 for additional information.

ADDITIONAL FINANCIAL INFORMATION

APPLICATION OF CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Management's Discussion and Analysis of Financial Condition and Results of Operations is based on the Consolidated Financial Statements, which have been prepared in accordance with GAAP. The preparation of financial statements in accordance with GAAP requires that we make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenue

and expenses during the reporting period. We employ judgment in making our estimates, but they are based on historical experience, currently available information and various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from these estimates. We believe our judgment is applied consistently and produces financial information that fairly depicts our results of operations for all periods presented.

In our opinion, the following policies are critical and require the use of significant judgment in their application:

Revenue. A performance obligation is a promise in a contract to transfer a distinct good or service to the customer, and is the unit of account for revenue. A contract's transaction price is allocated to each distinct performance obligation within that contract and recognized as revenue when, or as, the performance obligation is satisfied. Our performance obligations are satisfied over time as work progresses or at a point in time.

Substantially all of our revenue in the defense segments is recognized over time because control is transferred continuously to our customers. Typically, revenue is recognized over time using costs incurred to date relative to total estimated costs at completion to measure progress toward satisfying our performance obligations. Incurred costs represent work performed, which corresponds with, and thereby best depicts, the transfer of control to the customer.

Most of our revenue recognized at a point in time is for the manufacture of business jet aircraft in our Aerospace segment. Revenue on these contracts is recognized when the customer obtains control of the asset, which is generally upon delivery and acceptance by the customer of the fully outfitted aircraft.

The majority of our revenue is derived from long-term contracts and programs that can span several years. Accounting for long-term contracts and programs involves the use of various techniques to estimate total contract revenue and costs. We estimate the profit on a contract as the difference between the total estimated revenue and expected costs to complete a contract and recognize that profit over the life of the contract. For discussion of our contract estimates, the assumptions used, and the impact of changes in estimates, see Note B to the Consolidated Financial Statements in Item 8.

Consistent with industry practice, we classify assets and liabilities related to long-term contracts as current, even though some of these amounts may not be realized within one year. The timing of revenue recognition, billings and cash collections results in billed accounts receivable, unbilled receivables (contract assets), and customer advances and deposits (contract liabilities) on the Consolidated Balance Sheet. These assets and liabilities are reported on the Consolidated Balance Sheet on a contract-by-contract basis at the end of each reporting period.

Long-lived Assets and Goodwill. We review long-lived assets, including intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. We assess the recoverability of the carrying value of assets held for use based on a review of undiscounted projected cash flows. Impairment losses, where identified, are measured as the excess of the carrying value of the long-lived assets over the estimated fair value as determined by discounted cash flows.

Goodwill represents the purchase price paid in excess of the fair value of net tangible and intangible assets acquired in a business combination. We review goodwill for impairment annually at each of our reporting units or when circumstances indicate that the likelihood of an impairment is greater than 50%. Such circumstances include a significant adverse change in the business climate for one of our reporting units or a decision to dispose of a reporting unit or a significant portion of a reporting unit. Our reporting

units are consistent with our operating segments in Note O to the Consolidated Financial Statements in Item 8. We use both qualitative and quantitative approaches when testing goodwill for impairment. When determining the approach to be used, we consider the current facts and circumstances of each reporting unit as well as the excess of each reporting unit's estimated fair value over its carrying value based on our most recent quantitative assessments. Our qualitative approach evaluates the business environment and various events impacting the reporting unit including, but not limited to, macroeconomic conditions, changes in the business environment and reporting unit-specific events. If, based on the qualitative assessment, we determine that it is more likely than not that the fair value of a reporting unit is greater than its carrying value, then a quantitative assessment is not necessary. However, if a quantitative assessment is determined to be necessary, we compare the fair value of a reporting unit to its carrying value and, if necessary, recognize an impairment loss for the amount by which the carrying value exceeds the reporting unit's fair value.

Our estimate of a reporting unit's fair value is based primarily on the discounted cash flows of the underlying operations and requires the use of judgment by management. The process requires numerous assumptions, including the timing of work embedded in our backlog, our performance and profitability under our contracts, our success in securing future business, the appropriate risk-adjusted interest rate used to discount the projected cash flows, and terminal-value growth rates applied to the final year of projected cash flows. Due to the variables inherent in our estimates of fair value, differences in assumptions may have a material effect on the result of our impairment analysis. To assess the reasonableness of our discounted cash flows, we compare the sum of our reporting units' fair value to our market capitalization. Additionally, we evaluate the reasonableness of each reporting unit's fair value by comparing the fair value to peer companies and recent relevant market transactions.

In the fourth quarter of 2024, we completed qualitative assessments for each of our reporting units. Our Aerospace, Marine Systems and Combat Systems reporting units' estimated fair values significantly exceeded their respective carrying values based on our most recent quantitative assessments, which were performed in the fourth quarter of 2018. Our Technologies reporting unit's estimated fair value exceeded its carrying value by approximately 25% at the time of our last quantitative assessment in the fourth quarter of 2022. Our qualitative assessments this year did not present indicators of impairment.

Commitments and Contingencies. We are subject to litigation and other legal proceedings arising either from the normal course of business or under provisions relating to the protection of the environment. Estimating liabilities and costs associated with these matters requires the use of judgment. We record a liability associated with claims or pending or threatened litigation when it is probable a loss has been incurred and the amount is reasonably estimable. The ultimate resolution of our exposure related to these matters may change as further facts and circumstances become known.

Retirement Plans. Our pension and other post-retirement benefit costs and obligations depend on several assumptions and estimates, which are based on our best judgment, including consideration of current and future market conditions. For a discussion of our assumptions and any changes to these assumptions, as well as the impact of these changes, which is reported as an actuarial gain or loss in the reconciliation of the change in the benefit obligation, see Note S to the Consolidated Financial Statements in Item 8. The key assumption is the interest rates used to discount estimated future pension benefits. We base the discount rates on a current yield curve developed from a portfolio of high-quality, fixed-income investments with maturities consistent with the projected benefit payout period. The effect of a 25-basis-point increase or decrease in the discount rate assumption on the December 31, 2024, pension benefit obligation is (\$261) or \$272, respectively.

As described in Note S to the Consolidated Financial Statements in Item 8, our contractual arrangements with the U.S. government provide for the recovery of benefit costs for our government retirement plans. We have elected to defer recognition of the benefit costs until such costs can be allocated to contracts. Therefore, the impact of annual changes in financial reporting assumptions on the retirement benefit cost for these plans does not immediately affect our operating results.

GUARANTOR FINANCIAL INFORMATION

The outstanding notes described in Note K to the Consolidated Financial Statements in Item 8, issued by General Dynamics Corporation (the parent), are fully and unconditionally guaranteed on an unsecured, joint and several basis by several of the parent's 100%-owned subsidiaries (the guarantors). The guarantee of each guarantor ranks equally in right of payment with all other existing and future senior unsecured indebtedness of such guarantor. A listing of the guarantors is included in an exhibit to this Form 10-K.

Because the parent is a holding company, its cash flow and ability to service its debt, including the outstanding notes, depends on the performance of its subsidiaries and the ability of those subsidiaries to distribute cash to the parent, whether by dividends, loans or otherwise. Holders of the outstanding notes have a direct claim only against the parent and the guarantors.

Under the relevant indenture, the guarantee of each guarantor is limited to the maximum amount that can be guaranteed without rendering the guarantee voidable under applicable laws relating to fraudulent conveyance or fraudulent transfer or similar laws affecting the rights of creditors generally. Each indenture also provides that, in the event (1) of a merger, consolidation or sale or disposition of all or substantially all of the assets of a guarantor (other than a transaction with the parent or any of its subsidiaries) or (2) there occurs a transfer, sale or other disposition of the voting stock of a guarantor so that the guarantor is no longer a subsidiary of the parent, then the guarantor or the entity acquiring the assets (in the event of the sale or other disposition of all or substantially all of the assets of a guarantor) will be released and relieved of any obligations under the guarantee.

The following summarized financial information presents the parent and guarantors (collectively, the combined obligor group) on a combined basis. The summarized financial information of the combined obligor group excludes net investment in and earnings of subsidiaries related to interests held by the combined obligor group in subsidiaries that are not guarantors of the notes.

STATEMENT OF EARNINGS INFORMATION

Year Ended December 31	2024
Revenue	\$ 18,701
Operating costs and expenses, excluding G&A	(16,638)
Net earnings	785

BALANCE SHEET INFORMATION

	December 31, 2024	December 31, 2023
Cash and equivalents	\$ 474	\$ 986
Other current assets	5,187	5,012
Noncurrent assets	4,841	4,506
Total assets	\$ 10,502	\$ 10,504
Short-term debt and current portion of long-term debt	\$ 1,500	\$ 503
Other current liabilities	3,016	2,890
Long-term debt	7,210	8,700
Other noncurrent liabilities	3,170	3,281
Total liabilities	\$ 14,896	\$ 15,374

The summarized balance sheet information presented above includes the funded status of the company's primary qualified U.S. government pension plans as the parent has the ultimate obligation for the plans.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk, primarily from foreign currency exchange rates, interest rates, commodity prices and investments.

Foreign Currency Risk. Our exchange-rate sensitivity relates primarily to changes in the Canadian dollar, euro and Swiss franc exchange rates. We had notional forward exchange contracts outstanding of \$6.2 billion and \$5.7 billion on December 31, 2024 and 2023, respectively. A 10% unfavorable rate movement in our portfolio of forward exchange contracts would have resulted in the following hypothetical, incremental pretax losses:

(Dollars in millions)	2024	2023
Recognized	\$ (36)	\$ (107)
Unrecognized	(180)	(74)

These losses would be offset by corresponding gains in the remeasurement of the underlying transactions being hedged. We believe these foreign currency forward exchange contracts and the offsetting underlying commitments, when taken together, do not create material market risk.

Interest Rate Risk. On December 31, 2024, we had \$8.8 billion principal amount of fixed-rate debt. Our fixed-rate debt obligations are not putable, and we do not trade these securities in the market. A 10% unfavorable interest rate movement would not have a material impact on the fair value of our fixed-rate debt.

Commodity Price and Investment Risk. See Note Q to the Consolidated Financial Statements in Item 8 for a discussion of commodity price and investment risk.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

CONSOLIDATED STATEMENT OF EARNINGS

(Dollars in millions, except per-share amounts)	Year Ended December 31

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per-share amounts or unless otherwise noted)

A. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

General Dynamics is a global aerospace and defense company that offers a broad portfolio of products and services in business aviation; ship construction and repair; land combat vehicles, weapons systems and munitions; and technology products and services.

The following is a discussion of certain significant accounting policies, and further discussion is contained in other notes to these financial statements.

Basis of Consolidation and Classification. The Consolidated Financial Statements include the accounts of General Dynamics Corporation and our wholly owned and majority-owned subsidiaries. We eliminate all intercompany balances and transactions in the Consolidated Financial Statements.

Consistent with industry practice, we classify assets and liabilities related to long-term contracts as current, even though some of these amounts may not be realized within one year.

Use of Estimates. The nature of our business requires that we make estimates and assumptions in accordance with U.S. generally accepted accounting principles (GAAP). These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenue and expenses during the reporting period. We base our estimates on historical experience, currently available information and various other assumptions that we believe are reasonable under the circumstances. Actual results may differ from these estimates.

Research and Development Expenses. Company-sponsored research and development (R&D) expenses, including Aerospace product-development costs, were \$565 in 2024, \$510 in 2023 and \$480 in 2022. R&D expenses are included in operating costs and expenses in the Consolidated Statement of Earnings in the period in which they are incurred. Customer-sponsored R&D expenses are charged directly to the related contracts.

The Aerospace segment has cost-sharing arrangements with some of its suppliers that enhance the segment's internal development capabilities and offset a portion of the financial cost associated with the segment's product development efforts. These arrangements explicitly state that supplier contributions are for reimbursement of costs we incur in the development of new aircraft models and technologies, and we retain substantial rights in the products developed under these arrangements. We record amounts received from these cost-sharing arrangements as a reduction of R&D expenses. We have no obligation to refund any amounts received under the agreements regardless of the outcome of the development efforts. Under the typical terms of an agreement, payments received from suppliers for their share of the costs are based on milestones and are recognized as received. Our policy is to defer payments in excess of the costs we have incurred.

Interest, Net. Net interest expense consisted of the following:

Year Ended December 31	2024	2023	2022
Interest expense	\$ 393	\$ 399	\$ 391
Interest income	(69)	(56)	(27)
Interest expense, net	\$ 324	\$ 343	\$ 364

See Note K for information regarding our debt obligations, including interest rates.

Cash and Equivalents and Investments in Debt and Equity Securities. We consider securities with a maturity of three months or less to be cash equivalents. Our cash balances are invested primarily in time deposits rated A-/A3 or higher. Our investments in other securities are included in other current and noncurrent assets on the Consolidated Balance Sheet. We report our equity securities at fair value with subsequent changes in fair value recognized in net earnings. We report our available-for-sale debt securities at fair value with unrealized gains and losses recognized as a component of other comprehensive (loss) income in the Consolidated Statement of Comprehensive Income. We had no material trading or held-to-maturity debt securities on December 31, 2024 or 2023. See Note P for additional information regarding our investments in debt and equity securities.

Acquisitions. In the last three years, we acquired a business in our Aerospace segment, a business in our Combat Systems segment and two businesses in our Technologies segment. The operating results of these acquisitions have been included in our reported results since their respective closing dates. The purchase prices of the acquisitions have been allocated to the estimated fair value of net tangible and intangible assets acquired, with any excess purchase price recorded as goodwill.

Long-lived Assets and Goodwill. We review long-lived assets, including intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. We assess the recoverability of the carrying value of assets held for use based on a review of undiscounted projected cash flows. Impairment losses, where identified, are measured as the excess of the carrying value of the long-lived assets over the estimated fair value as determined by discounted cash flows.

Goodwill represents the purchase price paid in excess of the fair value of net tangible and intangible assets acquired in a business combination. We review goodwill for impairment annually at each of our reporting units or when circumstances indicate that the likelihood of an impairment is greater than 50%. Our reporting units are consistent with our operating segments in Note O. We use both qualitative and quantitative approaches when testing goodwill for impairment. When determining the approach to be used, we consider the current facts and circumstances of each reporting unit as well as the excess of each reporting unit's estimated fair value over its carrying value based on our most recent quantitative assessments. Our qualitative approach evaluates the business environment and various events impacting the reporting unit including, but not limited to, macroeconomic conditions, changes in the business environment and reporting unit-specific events. If, based on the qualitative assessment, we determine that it is more likely than not that the fair value of a reporting unit is greater than its carrying value, then a quantitative assessment is not necessary. However, if a quantitative assessment is determined to be necessary, we compare the fair value of a reporting unit to its carrying value and, if necessary, recognize an impairment loss for the amount by which the carrying value exceeds the reporting unit's fair value. Our estimate of a reporting unit's fair value is based primarily on the discounted cash flows of the underlying operations.

In the fourth quarter of 2024, we completed qualitative assessments for each of our reporting units. Our Aerospace, Marine Systems and Combat Systems reporting units' estimated fair values significantly exceeded their respective carrying values based on our most recent quantitative assessments, which were performed in the fourth quarter of 2018. Our Technologies reporting unit's estimated fair value exceeded its carrying value by approximately 25% at the time of our last quantitative assessment in the fourth quarter of 2022. Our qualitative assessments this year did not present indicators of impairment.

For a summary of our goodwill by reporting unit, see Note H.

Recent Accounting Pronouncements. In 2024, we adopted Accounting Standards Update (ASU) 2023-07, Improvements to Reportable Segment Disclosures, using the retrospective method of adoption. The ASU adds disclosure requirements for segment expense information.

In December 2023, the Financial Accounting Standards Board (FASB) issued ASU 2023-09, Improvements to Income Tax Disclosures, effective for annual periods beginning after December 15, 2024. The ASU requires disclosure of disaggregated income tax information, including the effective tax rate reconciliation and income taxes paid. In November 2024, the FASB issued ASU 2024-03, Disaggregation - Income Statement Expenses. The ASU requires disclosure of certain disaggregated costs and expenses on an annual and interim basis in the notes to the financial statements. ASU 2024-03 is effective for annual periods beginning after December 15, 2026, using the prospective or retrospective methods of adoption, with early adoption permitted. Although we have not determined the method or period of adoption, we expect to disclose additional information as required by the standard. There are other ASUs that have been issued by the FASB but are not yet effective. We do not expect that the adoption of these standards will have a material impact on our results of operations, financial condition or cash flows.

B. REVENUE

Performance Obligations. A performance obligation is a promise in a contract to transfer a distinct good or service to the customer, and is the unit of account for revenue. A contract's transaction price is allocated to each distinct performance obligation within that contract and recognized as revenue when, or as, the performance obligation is satisfied. The majority of our contracts have a single performance obligation as the promise to transfer the individual goods or services is not separately identifiable from other promises in the contracts and is, therefore, not distinct. Some of our contracts have multiple performance obligations, most commonly due to the contract covering multiple phases of the product life cycle (development, production, maintenance and support). For contracts with multiple performance obligations, we allocate the contract's transaction price to each performance obligation using our best estimate of the standalone selling price of each distinct good or service in the contract. The primary method used to estimate standalone selling price is the expected cost plus a margin approach, under which we forecast our expected costs of satisfying a performance obligation and then add an appropriate margin for that distinct good or service. We classify revenue as products or services based on the predominant attributes of the associated performance obligation.

Contract modifications are routine in the performance of our contracts. Contracts are often modified to account for changes in customer specifications or requirements. In most instances, contract modifications are for goods or services that are not distinct and, therefore, are accounted for as part of the existing contract.

Our performance obligations are satisfied over time as work progresses or at a point in time. Revenue from products and services transferred to customers over time accounted for 76% of our revenue in 2024, 79% in 2023 and 77% in 2022. Substantially all of our revenue in the defense segments is recognized over time because control is transferred continuously to our customers. Typically, revenue is recognized over time using costs incurred to date relative to total estimated costs at completion to measure progress toward satisfying our performance obligations. Incurred costs represent work performed, which corresponds with, and thereby best depicts, the transfer of control to the customer. Contract costs include labor, material, overhead and, when appropriate, G&A expenses.

Revenue from goods and services transferred to customers at a point in time accounted for 24% of our revenue in 2024, 21% in 2023 and 23% in 2022. Most of our revenue recognized at a point in time is for the manufacture of business jet aircraft in our Aerospace segment. Revenue on these contracts is recognized when the customer obtains control of the asset, which is generally upon delivery and acceptance by the customer of the fully outfitted aircraft.

On December 31, 2024, we had \$90.6 billion of remaining performance obligations, which we refer to as total backlog. We expect to recognize approximately 45% of our remaining performance obligations as revenue in 2025, an additional 40% by the end of 2027 and the balance thereafter.

Contract Estimates. The majority of our revenue is derived from long-term contracts and programs that can span several years. Accounting for long-term contracts and programs involves the use of various techniques to estimate total contract revenue and costs. We estimate the profit on a contract as the difference between the total estimated revenue and expected costs to complete a contract and recognize that profit over the life of the contract.

Contract estimates are based on various assumptions to project the outcome of future events that often span several years. These assumptions include labor productivity and availability; the complexity of the work to be performed; the cost and availability of materials; the performance of subcontractors; and the availability and timing of funding from the customer.

The nature of our contracts gives rise to several types of variable consideration, including claims, award fees and incentive fees. We include in our contract estimates additional revenue for contract modifications or claims against the customer when we believe we have an enforceable right to the modification or claim, the amount can be estimated reliably and its realization is probable. In evaluating these criteria, we consider the contractual/legal basis for the claim, the cause of any additional costs incurred, the reasonableness of those costs and the objective evidence available to support the claim. We include award fees or incentive fees in the estimated transaction price when there is a basis to reasonably estimate the amount of the fee. These estimates are based on historical award experience, anticipated performance and our best informed judgment at the time.

As a significant change in one or more of these estimates could affect the profitability of our contracts, we review and update our contract-related estimates regularly. We recognize adjustments in estimated profit on contracts under the cumulative catch-up method. Under this method, the impact of the adjustment on profit recorded to date on a contract is recognized in the period the adjustment is identified. Revenue and profit in future periods of contract performance are recognized using the adjusted estimate. If at any time the estimate of contract profitability indicates an anticipated loss on the contract, we recognize the total loss in the period it is identified.

The impact of adjustments in contract estimates on our operating earnings can be reflected in either operating costs and expenses or revenue. The aggregate impact of adjustments in contract estimates increased our revenue, operating earnings and diluted earnings per share as follows:

Year Ended December 31	2024	2023	2022
Revenue	\$ 176	\$ 191	\$ 343
Operating earnings	56	112	370
Diluted earnings per share	\$ 0.16	\$ 0.32	\$ 1.05

While no adjustment on any one contract was material to the Consolidated Financial Statements in 2024, 2023 or 2022, our Marine Systems segment's 2024 results were affected negatively by supplier

quality issues and late supply chain deliveries causing cost growth and schedule delays on the Virginia-class submarine Block IV contract.

We have large, long-term contracts with the U.S. Navy for Virginia-class submarines and an international customer for tracked vehicles in which our estimates for contract revenue include variable consideration. For both contracts, it is reasonably possible that the actual amount of variable consideration realized could be less than our estimate, which could have a material unfavorable impact on our results of operations.

In addition, during 2024 the Navy was informed of deficiencies in welding procedures conducted by our teammate and subcontractor on our Virginia-class and Columbia-class submarine programs. It is reasonably possible that addressing these deficiencies could potentially impose costs or schedule delays not accounted for in our estimates related to our long-term contracts with the Navy for the construction of submarines.

Revenue by Category. Our portfolio of products and services consists of more than 9,000 active contracts. The following series of tables presents our revenue disaggregated by several categories.

Revenue by major products and services was as follows:

Year Ended December 31	2024	2023	2022
Aircraft manufacturing	\$ 7,811	\$ 5,710	\$ 5,876
Aircraft services	3,438	2,911	2,691
Total Aerospace	11,249	8,621	8,567
Nuclear-powered submarines	10,392	8,631	7,310
Surface ships	2,819	2,698	2,561
Repair and other services	1,132	1,132	1,169
Total Marine Systems	14,343	12,461	11,040
Military vehicles	5,101	5,036	4,581
Weapons systems, armament and munitions	2,932	2,442	2,024
Engineering and other services	964	790	703
Total Combat Systems	8,997	8,268	7,308
Information technology (IT) services	8,761	8,459	8,195
C5ISR* solutions	4,366	4,463	4,297
Total Technologies	13,127	12,922	12,492
Total revenue	\$ 47,716	\$ 42,272	\$ 39,407

* Command, control, communications, computers, cyber, intelligence, surveillance and reconnaissance

Revenue by contract type was as follows:

Year Ended December 31, 2024	Aerospace	Marine Systems	Combat Systems	Technologies	Total Revenue
Fixed-price	\$ 10,250	\$ 6,800	\$ 7,973	\$ 5,376	\$ 30,399
Cost-reimbursement	—	7,542	951	5,749	14,242
Time-and-materials	999	1	73	2,002	3,075
Total revenue	\$ 11,249	\$ 14,343	\$ 8,997	\$ 13,127	\$ 47,716
Year Ended December 31, 2023					
Fixed-price	\$ 7,645	\$ 6,202	\$ 7,321	\$ 5,646	\$ 26,814
Cost-reimbursement	—	6,258	880	5,457	12,595
Time-and-materials	976	1	67	1,819	2,863
Total revenue	\$ 8,621	\$ 12,461	\$ 8,268	\$ 12,922	\$ 42,272
Year Ended December 31, 2022					
Fixed-price	\$ 7,626	\$ 6,509	\$ 6,434	\$ 5,402	\$ 25,971
Cost-reimbursement	—	4,529	813	5,190	10,532
Time-and-materials	941	2	61	1,900	2,904
Total revenue	\$ 8,567	\$ 11,040	\$ 7,308	\$ 12,492	\$ 39,407

Our segments operate under fixed-price, cost-reimbursement and time-and-materials contracts. Our production contracts are primarily fixed-price. Under these contracts, we agree to perform a specific scope of work for a fixed amount. Contracts for research, engineering, repair and maintenance, and other services are typically cost-reimbursement or time-and-materials. Under cost-reimbursement contracts, the customer reimburses contract costs incurred and pays a fixed, incentive or award-based fee. The amount for an incentive or award fee is determined by our ability to achieve targets set in the contract, such as cost, quality, schedule and performance. Under time-and-materials contracts, the customer pays a fixed hourly rate for direct labor and generally reimburses us for the cost of materials.

Each of these contract types presents advantages and disadvantages. Typically, we assume more risk with fixed-price contracts. However, these types of contracts offer additional profits when we complete the work for less than originally estimated. Cost-reimbursement contracts generally subject us to lower risk. Accordingly, the associated base fees are usually lower than fees earned on fixed-price contracts. Under time-and-materials contracts, our profit may vary if actual labor-hour rates vary significantly from the negotiated rates. Also, because these contracts may provide little or no fee for managing material costs, the content mix can impact profitability.

Revenue by customer was as follows:

Year Ended December 31, 2024	Aerospace	Marine Systems	Combat Systems	Technologies	Total Revenue
U.S. government:					
Department of Defense (DoD)	\$ 253	\$ 14,204	\$ 5,102	\$ 7,632	\$ 27,191
Non-DoD	—	2	8	4,800	4,810
Foreign military sales (FMS)	43	132	857	31	1,063
Total U.S. government	296	14,338	5,967	12,463	33,064
U.S. commercial	6,237	2	258	198	6,695
Non-U.S. government	1,447	3	2,599	422	4,471
Non-U.S. commercial	3,269	—	173	44	3,486
Total revenue	\$ 11,249	\$ 14,343	\$ 8,997	\$ 13,127	\$ 47,716

Year Ended December 31, 2023

U.S. government:					
DoD	\$ 303	\$ 12,325	\$ 4,580	\$ 7,512	\$ 24,720
Non-DoD	—	3	10	4,698	4,711
FMS	69	129	651	47	896

U.S. commercial	5,236	3	237	233	5,709
Non-U.S. government	587	3	2,563	404	3,557
Non-U.S. commercial	2,311	—	92	47	2,450
Total revenue	\$ 8,567	\$ 11,040	\$ 7,308	\$ 12,492	\$ 39,407

Contract Balances. The timing of revenue recognition, billings and cash collections results in billed accounts receivable, unbilled receivables (contract assets), and customer advances and deposits (contract liabilities) on the Consolidated Balance Sheet. In our defense segments, amounts are billed as work progresses in accordance with agreed-upon contractual terms, either at periodic intervals (e.g., biweekly or monthly) or upon achievement of contractual milestones. Generally, billing occurs subsequent to revenue recognition, resulting in contract assets. However, we sometimes receive advances or deposits from our customers, particularly on our international contracts, before revenue is recognized, resulting in contract liabilities. These assets and liabilities are reported on the Consolidated Balance Sheet on a contract-by-contract basis at the end of each reporting period. In our Aerospace segment, we generally receive deposits from customers upon contract execution and upon achievement of contractual milestones. These deposits are liquidated when revenue is recognized. Changes in the contract asset and

liability balances during the year ended December 31, 2024, were not materially impacted by any other factors.

Revenue recognized in 2024, 2023 and 2022 that was included in the contract liability balance at the beginning of each year was \$5.8 billion, \$4.2 billion and \$4 billion, respectively. This revenue represented primarily the sale of business jet aircraft.

C. EARNINGS PER SHARE

We compute basic earnings per share (EPS) using net earnings for the period and the weighted average number of common shares outstanding during the period. Diluted EPS incorporates the additional shares issuable upon the assumed exercise of stock options and the release of restricted stock and restricted stock units (RSUs).

Basic and diluted weighted average shares outstanding were as follows (in thousands):

Year Ended December 31	2024	2023	2022
Basic weighted average shares outstanding	273,858	273,143	275,311
Dilutive effect of stock options and restricted stock/RSUs*	3,627	2,582	2,858
Diluted weighted average shares outstanding	277,485	275,725	278,169

* Excludes unvested stock options, and vested stock options that had exercise prices in excess of the average market price of our common stock during the year and, therefore, the effect of including these options would be antidilutive. These options totaled 1,033 in 2024, 2,961 in 2023 and 1,466 in 2022.

D. INCOME TAXES

Income Tax Provision. We calculate our provision for federal, state and foreign income taxes based on current tax law. The following is a summary of our net provision for income taxes for continuing operations:

Year Ended December 31	2024	2023	2022
Current:			
U.S. federal	\$ 622	\$ 619	\$ 649
State	32	27	52
Foreign	190	200	123
Total current	844	846	824
Deferred:			
U.S. federal	(90)	(131)	(196)
State	(4)	7	(11)
Foreign	8	(53)	29
Total deferred	(86)	(177)	(178)
Provision for income taxes, net	\$ 758	\$ 669	\$ 646
Net income tax payments	\$ 560	\$ 1,100	\$ 1,245

The reported tax provision differs from the amounts paid because some income and expense items are recognized in different time periods for financial reporting than for income tax purposes. This includes the impact of the requirement, effective January 1, 2022, to capitalize and amortize over five years certain R&D expenditures that were previously deductible immediately for tax purposes, which contributed to increased net income tax payments.

State and local income taxes allocable to U.S. government contracts are included in operating costs and expenses in the Consolidated Statement of Earnings and, therefore, are not included in the provision above.

The reconciliation from the statutory federal income tax rate to our effective income tax rate follows:

Year Ended December 31	2024	2023	2022
Statutory federal income tax rate	21.0%	21.0%	21.0%
Domestic tax credits	(3.3)	(3.3)	(1.5)
Equity-based compensation	(1.0)	(0.4)	(0.8)
Foreign-derived intangible income	(1.7)	(1.6)	(1.6)
State tax on commercial operations, net of federal benefits	0.5	0.7	0.8
Global impact of international operations	1.0	0.5	0.1
Tax impact of restructuring	—	—	(1.9)
Other, net	0.2	(0.1)	(0.1)
Effective income tax rate	16.7%	16.8%	16.0%

Net Deferred Tax Liability. The tax effects of temporary differences between reported earnings and taxable income consisted of the following:

December 31	2024	2023
Research and development expenditures	\$ 968	\$ 670
Lease liabilities	441	414
Retirement benefits	251	311
Salaries and wages	223	215
Tax loss and credit carryforwards	185	267
Workers' compensation	153	148
Other	383	373
Deferred assets	2,604	2,398
Valuation allowances	(169)	(241)
Net deferred assets	\$ 2,435	\$ 2,157
Intangible assets	\$ (1,063)	\$ (1,057)
Contract accounting methods	(682)	(528)
Property, plant and equipment	(447)	(422)
Lease right-of-use assets	(425)	(395)
Capital Construction Fund qualified ships	(57)	(57)
Other	(315)	(325)
Deferred liabilities	\$ (2,989)	\$ (2,784)
Net deferred tax liability	\$ (554)	\$ (627)

Our deferred tax assets and liabilities are included in other noncurrent assets and liabilities on the Consolidated Balance Sheet. Our net deferred tax liability consisted of the following:

December 31	2024	2023
Deferred tax asset	\$ 19	\$ 28
Deferred tax liability	(573)	(655)
Net deferred tax liability	\$ (554)	\$ (627)

We believe it is more likely than not that we will generate sufficient taxable income in future periods to realize our deferred tax assets, subject to the valuation allowances recognized.

Our deferred tax balance associated with our retirement benefits includes a deferred tax asset of \$446 on December 31, 2024, and \$488 on December 31, 2023, related to the amounts recorded in accumulated other comprehensive loss (AOCL) to recognize the funded status of our retirement plans. For a reconciliation of the increase in funded status of our defined benefit plans in 2024, see Note S.

One of our deferred tax liabilities results from our participation in the Capital Construction Fund (CCF), a program established by the U.S. government and administered by the Maritime Administration that supports the acquisition, construction, reconstruction or operation of U.S. flag merchant marine vessels. The program allows us to defer federal and state income taxes on earnings derived from eligible programs as long as the proceeds are deposited in the fund and withdrawals are used for qualified activities. We had U.S. government accounts receivable pledged (and thereby deposited) to the CCF of \$333 and \$315 on December 31, 2024 and 2023, respectively.

On December 31, 2024, we had net operating loss carryforwards of \$630, substantially all of which are associated with jurisdictions that have an indefinite carryforward period.

Tax Uncertainties. We participate in the Internal Revenue Service (IRS) Compliance Assurance Process (CAP), a real-time review of our consolidated federal corporate income tax return. The IRS has examined our consolidated federal income tax returns through 2022. For the tax year ending December 31, 2023, the IRS placed us in the phase of CAP reserved for taxpayers whose risk of noncompliance does not warrant the continual use of IRS examination resources. For the tax year ending December 31, 2024, the IRS placed us into a CAP phase in which they will consider certain tax return information early in 2025 in the interest of expediting their risk assessment and review of our 2024 tax return.

For all periods open to examination by tax authorities, we periodically assess our liabilities and contingencies based on the latest available information. Where we believe there is more than a 50% chance that our tax position will not be sustained, we record our best estimate of the resulting tax liability, including interest, in the Consolidated Financial Statements. We include any interest or penalties incurred in connection with income taxes as part of income tax expense.

Based on all known facts and circumstances and applicable tax law, we believe the total amount of any unrecognized tax benefits on December 31, 2024, was not material to our results of operations, financial condition or cash flows. In addition, there are no tax positions for which it is reasonably possible that the unrecognized tax benefits will vary significantly over the next 12 months, producing, individually or in the aggregate, a material effect on our results of operations, financial condition or cash flows.

The Organization for Economic Co-operation and Development has issued “Pillar Two” model rules introducing a new global minimum tax of 15% on a country-by-country basis, with certain aspects

intended to be effective on January 1, 2024, and other aspects on January 1, 2025. Although it is uncertain whether the U.S. will adopt any Pillar Two rules, some countries have enacted, introduced, or are considering implementing legislation. Because we generally do not have material operations in jurisdictions with tax rates lower than the proposed Pillar Two minimum, any legislation enacted consistent with the Pillar Two model rules is not expected to have a material effect on our results of operations, financial condition or cash flows.

E. ACCOUNTS RECEIVABLE

Accounts receivable represent amounts billed and currently due from customers. Payment is typically received from our customers either at periodic intervals (e.g., biweekly or monthly) or upon achievement of contractual milestones. Accounts receivable consisted of the following:

December 31	2024	2023
Non-U.S. government	\$ 1,299	\$ 1,389
U.S. government	1,239	1,126
Commercial	439	489
Total accounts receivable	\$ 2,977	\$ 3,004

Receivables from non-U.S. government customers included amounts related to long-term production programs for the Spanish Ministry of Defence of \$1 billion and \$1.1 billion on December 31, 2024 and 2023, respectively. A different ministry, the Spanish Ministry of Industry, has funded work on these programs in advance of costs incurred by the company. The cash advances are reported on the Consolidated Balance Sheet in current customer advances and deposits and will be repaid to the Ministry of Industry as we collect on the outstanding receivables from the Ministry of Defence. The net amounts for these programs on December 31, 2024 and 2023, were advance payments of \$67 and \$271, respectively. With respect to our other receivables, we expect to collect substantially all of the year-end 2024 balance during 2025.

F. UNBILLED RECEIVABLES

Unbilled receivables represent revenue recognized on long-term contracts (contract costs and estimated profits) less associated advances and progress billings. These amounts will be billed in accordance with the agreed-upon contractual terms. Unbilled receivables consisted of the following:

December 31	2024	2023
Unbilled revenue	\$ 40,634	\$ 40,552
Advances and progress billings	(32,386)	(32,555)
Net unbilled receivables	\$ 8,248	\$ 7,997

On December 31, 2024 and 2023, net unbilled receivables included \$1.2 billion associated with a large international tracked vehicle contract in our Combat Systems segment. The contract, signed in 2010, experienced an unbilled receivable build-up in 2021 and 2022. The customer resumed payments on the contract in the first quarter of 2023. Other than the balance related to the tracked vehicle contract, we expect to bill substantially all of the remaining year-end 2024 net unbilled receivables balance during 2025, and the amount not expected to be billed in 2025 results primarily from the agreed-upon contractual billing terms.

G&A costs in unbilled revenue on December 31, 2024 and 2023, were \$444 and \$483, respectively.

G. INVENTORIES

The majority of our inventories are for business jet aircraft. Our inventories are stated at the lower of cost or net realizable value. Work in process represents largely labor, material and overhead costs associated with aircraft in the manufacturing process, and is based primarily on the estimated average unit cost in a production lot. Substantially all of our raw materials are valued on either the average cost or the first-in, first-out method. We record pre-owned aircraft acquired in connection with the sale of new aircraft at the lower of the trade-in value or the estimated net realizable value.

Inventories consisted of the following:

December 31	2024	2023
Work in process	\$ 6,279	\$ 5,655
Raw materials	3,396	2,886
Finished goods	26	22
Pre-owned aircraft	23	15
Total inventories	\$ 9,724	\$ 8,578

The increase in total inventories during 2024 was due primarily to the ramp-up in production of new Gulfstream aircraft models, including the G700 that began deliveries in the second quarter of 2024. Customer deposits associated with firm orders for these aircraft, which are reported in customer advances and deposits and other noncurrent liabilities on the Consolidated Balance Sheet, also increased.

H. GOODWILL AND INTANGIBLE ASSETS

Goodwill. The changes in the carrying amount of goodwill by reporting unit were as follows:

	Aerospace	Marine Systems	Combat Systems	Technologies	Total Goodwill
December 31, 2022 (a)	\$ 3,019	\$ 297	\$ 2,766	\$ 14,252	\$ 20,334
Acquisitions (b)	—	—	—	16	16
Other (c)	180	—	46	10	236
December 31, 2023 (a)	3,199	297	2,812	14,278	20,586
Acquisitions (b)	9	—	39	158	206
Other (c)	(123)	—	(93)	(20)	(236)
December 31, 2024 (a)	\$ 3,085	\$ 297	\$ 2,758	\$ 14,416	\$ 20,556

- (a) Goodwill in the Technologies reporting unit was net of \$1.8 billion of accumulated impairment losses.
(b) Included adjustments during the purchase price allocation period.
(c) Consisted primarily of adjustments for foreign currency translation.

Intangible Assets. Intangible assets consisted of the following:

December 31	Gross Carrying Amount (a)	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount (a)	Accumulated Amortization	Net Carrying Amount
	2024			2023		
Contract and program intangible assets (b)	\$ 3,278	\$ (1,989)	\$ 1,289	\$ 3,256	\$ (1,868)	\$ 1,388
Trade names and trademarks	511	(289)	222	542	(288)	254
Technology and software	61	(52)	9	65	(51)	14
Other intangible assets	60	(60)	—	64	(64)	—
Total intangible assets	\$ 3,910	\$ (2,390)	\$ 1,520	\$ 3,927	\$ (2,271)	\$ 1,656

(a) Changes in gross carrying amounts consisted primarily of adjustments for foreign currency translation, acquired and divested intangible assets and write-offs of fully amortized intangible assets.

(b) Consisted of acquired backlog and probable follow-on work and associated customer relationships.

We did not recognize any impairments of our intangible assets in 2024, 2023 or 2022. The amortization lives (in years) of our intangible assets on December 31, 2024, were as follows:

Intangible Asset	Range of Amortization Life
Contract and program intangible assets	7-30
Trade names and trademarks	30
Technology and software	7-15
Other intangible assets	7

Amortization expense is included in operating costs and expenses in the Consolidated Statement of Earnings. Amortization expense for intangible assets was \$180 in 2024, \$194 in 2023 and \$202 in 2022. We expect to record annual amortization expense over the next five years as follows:

Year Ended December 31	Amortization Expense
2025	\$ 178
2026	174
2027	167
2028	142
2029	125

I. PROPERTY, PLANT AND EQUIPMENT, NET

Property, plant and equipment (PP&E) is carried at historical cost, net of accumulated depreciation. Net PP&E by major asset class consisted of the following:

December 31	2024	2023
Machinery and equipment	\$ 7,067	\$ 6,806
Buildings and improvements	4,886	4,654
Construction in process	1,173	1,086
Land and improvements	438	454
Total PP&E	13,564	13,000
Accumulated depreciation	(7,097)	(6,802)
PP&E, net	\$ 6,467	\$ 6,198

We depreciate most of our assets using the straight-line method and the remainder using accelerated methods. Buildings and improvements are depreciated over periods of up to 50 years. Machinery and equipment are depreciated over periods of up to 30 years. Our government customers provide certain facilities and equipment for our use that are not included above.

J. LEASES

We determine at its inception whether an arrangement that provides us control over the use of an asset is a lease. We recognize at lease commencement a right-of-use (ROU) asset and lease liability based on the present value of the future lease payments over the lease term. We have elected not to recognize an ROU asset and lease liability for leases with terms of 12 months or less. Some of our leases include options to extend the term of the lease for up to 29 years or to terminate the lease within one year. When it is reasonably certain that we will exercise the option, we include the impact of the option in the lease term for purposes of determining total future lease payments. As most of our lease agreements do not explicitly state the discount rate implicit in the lease, we use our incremental borrowing rate on the commencement date to calculate the present value of future payments.

Certain of our leases include variable payments, which may be calculated based on the Consumer Price Index (CPI) or similar indices at the lease commencement date. To the extent these variable payments are not considered fixed, we exclude such payments from the ROU asset and lease liability and expense as incurred. In addition to the present value of the future lease payments, the calculation of the ROU asset also includes any deferred rent, lease pre-payments and initial direct costs of obtaining the lease, such as commissions.

In addition to the base rent, real estate leases typically contain provisions for common-area maintenance and other similar services, which are considered non-lease components for accounting purposes. For our real estate leases, we apply a practical expedient to include these non-lease components in calculating the ROU asset and lease liability. For all other types of leases, non-lease components are excluded from our ROU assets and lease liabilities and expensed as incurred.

Our leases are for office space, manufacturing facilities, and machinery and equipment. Real estate represents more than 75% of our lease obligations.

The components of lease costs were as follows:

Year Ended December 31	2024	2023	2022
Finance lease cost:			
Amortization of ROU assets	\$ 62	\$ 61	\$ 96
Interest on lease liabilities	21	14	14
Operating lease cost	317	320	308
Short-term lease cost	74	76	68
Variable lease cost	39	34	23
Sublease income	(16)	(17)	(17)
Total lease costs, net	\$ 497	\$ 488	\$ 492

Additional information related to leases was as follows:

Year Ended December 31	2024	2023	2022
Cash paid for amounts included in the measurement of lease liabilities:			
Operating cash flows from operating leases	\$ 319	\$ 322	\$ 307
Operating cash flows from finance leases	20	13	13
Financing cash flows from finance leases	64	55	80
ROU assets obtained in exchange for lease liabilities:			
Operating leases	292	279	297
Finance leases	155	240	4

Additional quantitative lease information was as follows:

December 31	2024	2023
Weighted-average remaining lease term:		
Operating leases	10.8 years	11.8 years
Finance leases	14.4 years	14.3 years
Weighted-average discount rate:		
Operating leases	4%	4%
Finance leases	4%	4%

The following is a reconciliation of future undiscounted cash flows to the operating and finance lease liabilities, and the related ROU assets, presented on the Consolidated Balance Sheet on December 31, 2024:

Year Ended December 31	Operating Leases	Finance Leases
2025	\$ 295	\$ 87
2026	249	62
2027	213	55
2028	160	49
2029	123	46
Thereafter	665	401
Total future lease payments	1,705	700
Less imputed interest	319	172
Present value of future lease payments	1,386	528
Less current portion of lease liabilities	253	66
Long-term lease liabilities	\$ 1,133	\$ 462
ROU assets	\$ 1,295	\$ 501

On December 31, 2023, operating and finance lease liabilities and the related ROU assets were as follows:

	Operating Leases	Finance Leases
Current portion of lease liabilities	\$ 260	\$ 65
Long-term lease liabilities	1,115	382
ROU assets	1,280	407

Lease liabilities are included on the Consolidated Balance Sheet in current and noncurrent other liabilities, while ROU assets are included in noncurrent other assets.

On December 31, 2024, we had additional future payments on leases that had not yet commenced of \$201. These leases will commence in 2025 and 2026, and have lease terms ranging from one to 20 years.

K. DEBT

Debt consisted of the following:

December 31		2024	2023
Fixed-rate notes due:	Interest rate:		
November 2024	2.375%	\$ —	\$ 500
April 2025	3.250%	750	750
May 2025	3.500%	750	750
June 2026	1.150%	500	500
August 2026	2.125%	500	500
April 2027	3.500%	750	750
November 2027	2.625%	500	500
May 2028	3.750%	1,000	1,000
April 2030	3.625%	1,000	1,000
June 2031	2.250%	500	500
April 2040	4.250%	750	750
June 2041	2.850%	500	500
November 2042	3.600%	500	500
April 2050	4.250%	750	750
Other	Various	76	90
Total debt principal		8,826	9,340
Less unamortized debt issuance costs and discounts		64	79
Total debt		8,762	9,261
Less current portion		1,502	507
Long-term debt		\$ 7,260	\$ 8,754

In November 2024, we repaid fixed-rate notes of \$500 at the scheduled maturity using cash on hand. Interest payments associated with our debt were \$385 in 2024, \$378 in 2023 and \$383 in 2022.

The aggregate amounts of scheduled principal maturities of our debt are as follows:

Year Ended December 31	Debt Principal
2025	\$ 1,502
2026	1,003
2027	1,253
2028	1,003
2029	3
Thereafter	4,062
Total debt principal	\$ 8,826

On December 31, 2024, we had no commercial paper outstanding, but we maintain the ability to access the commercial paper market in the future. Separately, we have a \$4 billion committed bank credit facility for general corporate purposes and working capital needs and to support our commercial paper issuances. This credit facility expires in March 2027. We may renew or replace this credit facility

in whole or in part at or prior to its expiration date. We also have an effective shelf registration on file with the Securities and Exchange Commission (SEC) that allows us to access the debt markets.

Our financing arrangements contain a number of customary covenants and restrictions. We were in compliance with all covenants and restrictions on December 31, 2024.

L. OTHER LIABILITIES

A summary of significant other liabilities by balance sheet caption follows:

December 31	2024	2023
Salaries and wages	\$ 1,325	\$ 1,191
Dividends payable	390	362
Lease liabilities	319	325
Workers' compensation	244	237
Other	1,209	1,151
Total other current liabilities	\$ 3,487	\$ 3,266
Customer deposits on commercial contracts	\$ 2,996	\$ 2,576
Retirement benefits	2,024	2,219
Lease liabilities	1,595	1,497
Other	2,118	2,033
Total other liabilities	\$ 8,733	\$ 8,325

M. COMMITMENTS AND CONTINGENCIES

Litigation

On October 6, 2023, a putative class action lawsuit was filed in the United States District Court for the Eastern District of Virginia against General Dynamics Corporation, certain of its subsidiaries and various other companies alleging that they conspired, in violation of the Sherman Act, not to solicit naval architects and marine engineers from each other. The named plaintiffs purport to represent a class of individuals consisting of all naval architects and marine engineers employed by the shipyard and consultancy defendants, their predecessors, their subsidiaries and/or their related entities in the United States at any time since January 1, 2000. The plaintiffs allege that the conspiracy suppressed compensation paid to the putative class members, and the plaintiffs seek trebled monetary damages, attorneys' fees, injunctive and other equitable relief. We are defending the matter. On April 19, 2024, the District Court dismissed the plaintiffs' complaint. Plaintiffs initiated an appeal of the dismissal of their complaint to the U.S. Court of Appeals for the Fourth Circuit on May 20, 2024. Given the current status of this matter, we are unable to express a view regarding the ultimate outcome or, if the outcome is adverse, to estimate an amount or range of reasonably possible loss. Depending on the outcome of this matter, there could be a material impact on our results of operations, financial condition and cash flows.

Additionally, various other claims and legal proceedings incidental to the normal course of business are pending or threatened against us. These other matters relate to such issues as government investigations and claims, the protection of the environment, asbestos-related claims and employee-related matters. The nature of litigation is such that we cannot predict the outcome of these other matters. However, based on information currently available, we believe any potential liabilities in these

other proceedings, individually or in the aggregate, will not have a material impact on our results of operations, financial condition or cash flows.

Environmental

We are subject to and affected by a variety of federal, state, local and foreign environmental laws and regulations. We are directly or indirectly involved in environmental investigations or remediation at some of our current and former facilities and third-party sites that we do not own but where we have been designated a potentially responsible party (PRP) by the U.S. Environmental Protection Agency or a state environmental agency. Based on historical experience, we expect that a significant percentage of the total remediation and compliance costs associated with these facilities will continue to be allowable contract costs and, therefore, recoverable under U.S. government contracts.

As required, we provide financial assurance for certain sites undergoing or subject to investigation or remediation. We accrue environmental costs when it is probable that a liability has been incurred and the amount can be reasonably estimated. Where applicable, we seek insurance recovery for costs related to environmental liabilities. We do not record insurance recoveries before collection is considered probable. Based on all known facts and analyses, we do not believe that our liability at any individual site, or in the aggregate, arising from such environmental conditions will be material to our results of operations, financial condition or cash flows. We also do not believe that the range of reasonably possible additional loss beyond what has been recorded would be material to our results of operations, financial condition or cash flows.

Other

Government Contracts. As a government contractor, we are subject to U.S. government audits and investigations relating to our operations, including claims for fines, penalties, and compensatory and treble damages. We believe the outcome of such ongoing government audits and investigations will not have a material impact on our results of operations, financial condition or cash flows.

In the performance of our contracts, we routinely request contract modifications that require additional funding from the customer. Most often, these requests are due to customer-directed changes in the scope of work. While we are entitled to recovery of these costs under our contracts, the administrative process with our customer may be protracted. Based on the circumstances, we periodically file requests for equitable adjustment (REAs) that are sometimes converted into claims. In some cases, these requests are disputed by our customer. We believe our outstanding modifications, REAs and other claims will be resolved without material impact to our results of operations, financial condition or cash flows.

Letters of Credit and Guarantees. In the ordinary course of business, we have entered into letters of credit, bank guarantees, surety bonds and other similar arrangements with financial institutions and insurance carriers totaling approximately \$1.8 billion on December 31, 2024. In addition, from time to time and in the ordinary course of business, we contractually guarantee the payment or performance of our subsidiaries arising under certain contracts.

Aircraft Trade-ins. In connection with orders for new aircraft in contract backlog, some Gulfstream customers hold options to trade in aircraft as partial consideration in their new-aircraft transaction. These trade-in commitments are generally structured to establish the fair market value of the trade-in aircraft at a date generally 45 or fewer days preceding delivery of the new aircraft to the customer. At that time, the customer is required to either exercise the option or allow its expiration. Other trade-in commitments are structured to guarantee a predetermined trade-in value. These commitments present more risk in the event of an adverse change in market conditions. In either case, any excess of the preestablished trade-in

price above the fair market value at the time the new aircraft is delivered is treated as a reduction of revenue in the new-aircraft sales transaction. As of December 31, 2024, the estimated change in fair market values from the date of the commitments was not material.

Labor Agreements. On December 31, 2024, approximately one-fifth of the employees of our subsidiaries were working under collectively bargained terms and conditions, including 61 collective agreements that we have negotiated directly with unions and works councils. A number of these agreements expire within any given year. Historically, we have been successful at renegotiating these labor agreements without any material disruption of operating activities. In 2025, we expect to negotiate the terms of 23 agreements covering approximately 5,400 employees. We do not expect the renegotiations will, either individually or in the aggregate, have a material impact on our results of operations, financial condition or cash flows.

Product Warranties. We provide warranties to our customers associated with certain product sales. We record estimated warranty costs in the period in which the related products are delivered. The warranty liability recorded at each balance sheet date is based generally on the number of months of warranty coverage remaining for the products delivered and the average historical monthly warranty payments. Warranty obligations incurred in connection with long-term production contracts are accounted for within the contract estimates at completion. Our other warranty obligations, primarily for business jet aircraft, are included in other current and noncurrent liabilities on the Consolidated Balance Sheet.

The changes in the carrying amount of warranty liabilities for each of the past three years were as follows:

Year Ended December 31	2024	2023	2022
Beginning balance	\$ 597	\$ 603	\$ 641
Warranty expense	137	90	99
Payments	(106)	(101)	(116)
Adjustments	14	5	(21)
Ending balance	\$ 642	\$ 597	\$ 603

N. SHAREHOLDERS' EQUITY

Authorized Stock. Our authorized capital stock consists of 500 million shares of \$1 per share par value common stock and 50 million shares of \$1 per share par value preferred stock. The preferred stock is issuable in series, with the rights, preferences and limitations of each series to be determined by our board of directors (Board).

Shares Issued and Outstanding. On December 31, 2024, we had 481,880,634 shares of common stock issued and 270,340,502 shares of common stock outstanding, including unvested restricted stock of 404,405 shares. On December 31, 2023, we had 481,880,634 shares of common stock issued and 273,599,948 shares of common stock outstanding. No shares of our preferred stock were outstanding on either date. The only changes in our shares outstanding during 2024 and 2023 resulted from shares repurchased in the open market and share activity under our equity compensation plans. See Note R for additional details.

Share Repurchases. On December 4, 2024, the Board authorized management to repurchase up to 10 million additional shares of the company's outstanding stock. In 2024, we repurchased 5.4 million of

our outstanding shares for \$1.5 billion. On December 31, 2024, 9.2 million shares remained authorized by our Board for repurchase, representing 3.4% of our total shares outstanding. We repurchased 2 million shares for \$434 in 2023 and 5.3 million shares for \$1.2 billion in 2022.

Dividends per Share. Our Board declared dividends per share of \$5.68 in 2024, \$5.28 in 2023 and \$5.04 in 2022. We paid cash dividends of \$1.5 billion in 2024, and \$1.4 billion in 2023 and 2022.

Accumulated Other Comprehensive Loss. The changes, pretax and net of tax, in each component of AOCL consisted of the following:

	Changes in Unrealized Cash Flow Hedges	Foreign Currency Translation Adjustments	Changes in Retirement Plans' Funded Status	AOCL
December 31, 2021	\$ 144	\$ 538	\$ (2,602)	\$ (1,920)
Other comprehensive loss, pretax	(190)	(278)	241	(227)
Provision for income tax, net	50	—	(55)	(5)
Other comprehensive loss, net of tax	(140)	(278)	186	(232)
December 31, 2022	4	260	(2,416)	(2,152)
Other comprehensive income, pretax	10	413	722	1,145
Provision for income tax, net	(3)	—	(149)	(152)
Other comprehensive income, net of tax	7	413	573	993
December 31, 2023	11	673	(1,843)	(1,159)
Other comprehensive loss, pretax	(117)	(438)	208	(347)
Provision for income tax, net	30	—	(42)	(12)
Other comprehensive loss, net of tax	(87)	(438)	166	(359)
December 31, 2024	\$ (76)	\$ 235	\$ (1,677)	\$ (1,518)

Amounts reclassified out of AOCL related primarily to changes in our retirement plans' funded status and included pretax recognized net actuarial losses and amortization of prior service credit. See Note S for these amounts, which are included in our net annual pension and other post-retirement benefit cost (credit).

O. SEGMENT INFORMATION

We have four operating segments: Aerospace, Marine Systems, Combat Systems and Technologies. We organize our segments in accordance with the nature of products and services offered. Our chief operating decision maker is our Chairman and Chief Executive Officer (CEO).

We measure each segment's profitability based on operating earnings. Segment operating earnings exclude net interest and other income and expense items. The Chairman and CEO uses segment operating earnings as an input when assessing segment performance and when making decisions to allocate financial resources between segments. The Chairman and CEO uses operating earnings in assessing segment performance by comparing operating earnings to prior period results and plan-to-actual variances. The Chairman and CEO also uses forecasted expense information for each segment to manage operations.

Summary financial information for each of our segments follows:

Year Ended December 31	Revenue (a)			Other Segment Items (b)			Operating Earnings		
	2024	2023	2022	2024	2023	2022	2024	2023	2022
Aerospace	\$ 11,249	\$ 8,621	\$ 8,567	\$ (9,785)	\$ (7,439)	\$ (7,437)	\$ 1,464	\$ 1,182	\$ 1,130
Marine Systems	14,343	12,461	11,040	(13,408)	(11,587)	(10,143)	935	874	897
Combat Systems	8,997	8,268	7,308	(7,721)	(7,121)	(6,233)	1,276	1,147	1,075
Technologies	13,127	12,922	12,492	(11,867)	(11,720)	(11,265)	1,260	1,202	1,227
Corporate (c)	—	—	—	—	—	—	(139)	(160)	(118)
Total	\$ 47,716	\$ 42,272	\$ 39,407	\$ (42,781)	\$ (37,867)	\$ (35,078)	\$ 4,796	\$ 4,245	\$ 4,211

(a) See Note B for additional revenue information by segment.

(b) Other segment items consist of material and labor costs, depreciation and amortization, and other overhead and general and administrative expenses.

(c) Corporate operating costs consisted primarily of equity-based compensation expense.

The following is additional summary financial information for each of our segments:

Year Ended December 31	Identifiable Assets			Capital Expenditures			Depreciation and Amortization*		
	2024	2023	2022	2024	2023	2022	2024	2023	2022
Aerospace	\$ 16,192	\$ 15,099	\$ 12,676	\$ 235	\$ 200	\$ 214	\$ 220	\$ 200	\$ 195
Marine Systems	7,019	6,209	5,864	424	511	530	243	217	191
Combat Systems	10,275	10,479	11,032	135	107	94	117	108	105
Technologies	19,286	19,534	19,700	119	85	175	294	327	383
Corporate	3,108	3,489	2,313	3	1	101	12	11	10
Total	\$ 55,880	\$ 54,810	\$ 51,585	\$ 916	\$ 904	\$ 1,114	\$ 886	\$ 863	\$ 884

* Depreciation and amortization by reportable segment is included within the other segment items expense caption.

The following table presents our revenue by geographic area based on the location of our customers:

Year Ended December 31	2024	2023	2022
North America:			
United States	\$ 39,759	\$ 36,160	\$ 33,400
Other	1,278	961	934
Total North America	41,037	37,121	34,334
Europe	3,161	2,765	2,238
Asia/Pacific	1,546	1,086	1,224
Africa/Middle East	1,680	1,147	1,365
South America	292	153	246
Total revenue	\$ 47,716	\$ 42,272	\$ 39,407

Our revenue from non-U.S. operations was \$5 billion in 2024, \$4.3 billion in 2023 and \$4 billion in 2022, and earnings from continuing operations before income taxes from non-U.S. operations were \$732 in 2024, \$631 in 2023 and \$567 in 2022. The long-lived assets associated with these operations were 3% of our total long-lived assets on December 31, 2024 and 4% of our total long-lived assets on December 31, 2023 and 2022.

P. FAIR VALUE

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market in an orderly transaction between marketplace participants. Various valuation approaches can be used to determine fair value, each requiring different valuation inputs. The following hierarchy classifies the inputs used to determine fair value into three levels:

- Level 1 – quoted prices in active markets for identical assets or liabilities.
- Level 2 – inputs, other than quoted prices, observable by a marketplace participant either directly or indirectly.
- Level 3 – unobservable inputs significant to the fair value measurement.

We did not have any significant non-financial assets or liabilities measured at fair value on December 31, 2024 or 2023.

Our financial instruments include cash and equivalents, accounts receivable and payable, marketable securities held in trust and other investments, short- and long-term debt, and derivative financial instruments. The carrying values of cash and equivalents and accounts receivable and payable on the Consolidated Balance Sheet approximate their fair value. The following tables present the fair values of our other financial assets and liabilities on December 31, 2024 and 2023, and the basis for determining their fair values:

	Carrying Value	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Financial Assets (Liabilities)	December 31, 2024				
Measured at fair value:					
Marketable securities held in trust:					
Cash and equivalents	\$ 36	\$ 36	\$ 27	\$ 9	\$ —
Available-for-sale debt securities	128	128	—	128	—
Commingled equity funds	48	48	48	—	—
Commingled fixed-income funds	6	6	6	—	—
Other investments	40	40	28	—	12
Cash flow hedge assets	52	52	—	52	—
Cash flow hedge liabilities	(140)	(140)	—	(140)	—
Measured at amortized cost:					
Short- and long-term debt principal	(8,826)	(8,103)	—	(8,103)	—
	December 31, 2023				
Measured at fair value:					
Marketable securities held in trust:					
Cash and equivalents	\$ 21	\$ 21	\$ —	\$ 21	\$ —
Available-for-sale debt securities	115	115	—	115	—
Commingled equity funds	49	49	49	—	—
Commingled fixed-income funds	6	6	6	—	—
Other investments	40	40	23	—	17
Cash flow hedge assets	109	109	—	109	—
Cash flow hedge liabilities	(61)	(61)	—	(61)	—
Measured at amortized cost:					
Short- and long-term debt principal	(9,340)	(8,764)	—	(8,764)	—

Our Level 1 assets include commingled equity and fixed-income funds that are valued using a unit price or net asset value (NAV). These funds are actively traded and valued using quoted prices for identical securities from the market exchanges. The fair value of our Level 2 assets and liabilities, which consist primarily of fixed-income securities, cash flow hedges and our fixed-rate notes, is determined under a market approach using valuation models that incorporate observable inputs such as interest rates, bond yields and quoted prices for similar assets. Our Level 3 assets include direct private equity investments that are measured using inputs unobservable to a marketplace participant.

Q. DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES

We are exposed to market risk, primarily from foreign currency exchange rates, commodity prices and investments. We may use derivative financial instruments to hedge some of these risks as described below. We do not use derivative financial instruments for trading or speculative purposes.

Foreign Currency Risk. Our foreign currency exchange rate risk relates to receipts from customers, payments to suppliers and intercompany transactions denominated in foreign currencies. To the extent possible, we include in our contracts terms that are designed to protect us from this risk. Otherwise, we

enter into derivative financial instruments, principally foreign currency forward purchase and sale contracts, designed to offset and minimize our risk. The dollar-weighted two-year average maturity of these instruments generally matches the duration of the activities that are at risk.

Commodity Price Risk. We are subject to commodity price risk, primarily on long-term, fixed-price contracts. To the extent possible, we include in our contracts terms that are designed to protect us from these risks. Some of the protective terms included in our contracts are considered derivative financial instruments but are not accounted for separately because they are clearly and closely related to the host contract. We have not entered into any material commodity hedging contracts but may do so as circumstances warrant. We do not believe that changes in commodity prices will have a material impact on our results of operations or cash flows.

Investment Risk. Our investment policy allows for purchases of fixed-income securities with an investment-grade rating and a maximum maturity of up to five years. On December 31, 2024 and 2023, we held \$1.7 billion and \$1.9 billion in cash and equivalents, respectively, but held no material marketable securities other than those held in trust to meet some of our obligations under workers' compensation and non-qualified pension plans. On December 31, 2024 and 2023, we held marketable securities in trust of \$218 and \$191, respectively. These marketable securities are reflected at fair value on the Consolidated Balance Sheet in other current and noncurrent assets. See Note P for additional details.

Hedging Activities. We had notional forward exchange contracts outstanding of \$6.2 billion and \$5.7 billion on December 31, 2024 and 2023, respectively. These derivative financial instruments are cash flow hedges and are reflected at fair value on the Consolidated Balance Sheet in other current assets and liabilities. See Note P for additional details.

Changes in fair value (gains and losses) related to derivative financial instruments that qualify as cash flow hedges are deferred in AOCL until the underlying transaction is reflected in earnings. Alternatively, gains and losses on derivative financial instruments that do not qualify for hedge accounting are recorded each period in earnings. All gains and losses from derivative financial instruments recognized in the Consolidated Statement of Earnings are presented in the same line item as the underlying transaction, generally operating costs and expenses.

Net gains and losses recognized in earnings on derivative financial instruments that do not qualify for hedge accounting were not material to our results of operations in any of the past three years. Net gains and losses reclassified to earnings from AOCL related to qualified hedges were also not material to our results of operations in any of the past three years, and we do not expect the amount of these gains and losses that will be reclassified to earnings during the next 12 months to be material.

We had no material derivative financial instruments designated as fair value or net investment hedges on December 31, 2024 and 2023.

Foreign Currency Financial Statement Translation. We translate foreign currency balance sheets from our international businesses' functional currency (generally the respective local currency) to U.S. dollars at the end-of-period exchange rates, and statements of earnings at the average exchange rates for each period. The resulting foreign currency translation adjustments are a component of AOCL.

We do not hedge the fluctuation in reported revenue and earnings resulting from the translation of these international operations' results into U.S. dollars. The impact of translating our non-U.S. operations' revenue and earnings into U.S. dollars was not material to our results of operations in any of

the past three years. In addition, the effect of changes in foreign exchange rates on non-U.S. cash balances was not material in any of the past three years.

R. EQUITY COMPENSATION PLANS

Equity Compensation Overview. We have equity compensation plans for employees, as well as for non-employee members of our Board. The equity compensation plans seek to provide an effective means of attracting and retaining directors, officers and key employees, and to provide them with incentives to enhance our growth and profitability. Under the equity compensation plans, awards may be granted to officers, employees or non-employee directors in common stock, options to purchase common stock, restricted shares of common stock, participation units (including RSUs, stock appreciation rights and phantom stock units) or any combination of these.

Annually, we grant awards of stock options, restricted stock and RSUs to participants in our equity compensation plans in early March. Additionally, we may make limited ad hoc grants on a quarterly basis for new hires or promotions. We issue common stock under our equity compensation plans from treasury stock. On December 31, 2024, in addition to the shares reserved for issuance upon the exercise of outstanding stock options, approximately 15 million shares have been authorized for awards that may be granted in the future.

Equity-based Compensation Expense. Equity-based compensation expense is included in G&A expenses. The following table details the components of equity-based compensation expense recognized in net earnings in each of the past three years:

Year Ended December 31	2024	2023	2022
Stock options	\$ 60	\$ 65	\$ 71
Restricted stock/RSUs	85	78	59
Total equity-based compensation expense, net of tax	\$ 145	\$ 143	\$ 130

Stock Options. Stock options granted under our equity compensation plans are issued with an exercise price at the fair value of our common stock determined by the average of the high and low stock prices as listed on the New York Stock Exchange (NYSE) on the date of grant. Participants generally vest in stock options over three years – with 50% of the options vesting after two years and the remaining 50% vesting the following year – and expire 10 years after the grant date.

We recognize compensation expense related to stock options on a straight-line basis over the vesting period of the awards, net of estimated forfeitures, except for awards to retirement-eligible participants that are recognized on an accelerated basis. Estimated forfeitures are based on our historical forfeiture experience. We estimate the fair value of stock options on the date of grant using the Black-Scholes option pricing model with the following assumptions for each of the past three years:

Year Ended December 31	2024	2023	2022
Expected volatility	23.2-23.3%	22.7-22.9%	22.4-23.0%
Weighted average expected volatility	23.3%	22.8%	22.5%
Expected term (in months)	60	60	60
Risk-free interest rate	4.2-4.6%	3.6-4.7%	1.7-4.2%
Expected dividend yield	2.2%	2.3%	2.3%

We determine the above assumptions based on the following:

- Expected volatility is based on the historical volatility of our common stock
- Expected term is based on assumptions used by a set of comparable peer companies
- Risk-free interest rate is the yield on a U.S. Treasury zero-coupon issue with a remaining term equal to the expected term of the option at the grant date
- Expected dividend yield is based on our historical dividend yield

The resulting weighted average fair value per stock option granted (in dollars) was \$60.55 in 2024, \$47.46 in 2023 and \$38.93 in 2022. Stock option expense reduced pretax operating earnings (and on a diluted per-share basis) by \$75 (\$0.21) in 2024, \$82 (\$0.24) in 2023 and \$91 (\$0.26) in 2022. On December 31, 2024, we had \$35 of unrecognized compensation cost related to stock options, which is expected to be recognized over a weighted average period of 1.8 years.

A summary of stock option activity during 2024 follows:

In Shares and Dollars	Shares Under Option	Weighted Average Exercise Price Per Share
Outstanding on December 31, 2023	11,210,483	\$ 191.99
Granted	1,303,870	274.96
Exercised	(2,289,456)	174.98
Forfeited/canceled	(73,975)	247.01
Outstanding on December 31, 2024	10,150,922	\$ 206.08
Vested and expected to vest on December 31, 2024	10,062,557	\$ 205.61
Exercisable on December 31, 2024	6,545,037	\$ 184.41

Summary information with respect to our stock options' intrinsic value and remaining contractual term on December 31, 2024, follows:

	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value
Outstanding	6.1	\$ 597
Vested and expected to vest	6.0	596
Exercisable	4.8	518

In the table above, intrinsic value is calculated as the excess, if any, of the market price of our stock on the last trading day of the year over the exercise price of the options. For stock options exercised, intrinsic value is calculated as the difference between the market price on the date of exercise and the exercise price. The total intrinsic value of stock options exercised was \$249 in 2024, \$75 in 2023 and \$205 in 2022.

Restricted Stock/RSUs. Grants of restricted stock are awards of shares of common stock. RSUs represent obligations that have a value derived from or related to the value of our common stock, and are payable in cash or common stock. The fair value of restricted stock and RSUs equals the average of the high and low market prices of our common stock as listed on the NYSE on the date of grant.

Participants generally vest in restricted stock and RSUs, over a three-year restriction period after the grant date, during which recipients may not sell, transfer, pledge, assign or otherwise convey their restricted shares to another party. During this period, restricted stock recipients receive cash dividends

on their restricted shares and are entitled to vote those shares, while RSU recipients receive dividend-equivalent units instead of cash dividends and are not entitled to vote their RSUs or dividend-equivalent units.

We grant RSUs with one or more performance measures (performance stock units or PSUs) determined by the compensation committee of the Board as described in our proxy statement. Depending on the company's performance, the number of PSUs earned may be less than, equal to or greater than the original number of PSUs awarded subject to a payout range.

We recognize compensation expense related to restricted stock and RSUs on a straight-line basis over the vesting period of the awards, except for restricted stock awards to retirement-eligible participants that are recognized on an accelerated basis. Compensation expense related to restricted stock and RSUs reduced pretax operating earnings (and on a diluted per-share basis) by \$108 (\$0.31) in 2024, \$99 (\$0.28) in 2023 and \$74 (\$0.21) in 2022. On December 31, 2024, we had \$105 of unrecognized compensation cost related to restricted stock and RSUs, which is expected to be recognized over a weighted average period of 1.9 years.

A summary of restricted stock and RSU activity during 2024 follows:

In Shares and Dollars	Shares/ Share-Equivalent Units	Weighted Average Grant-Date Fair Value Per Share
Nonvested at December 31, 2023	1,290,902	\$ 215.91
Granted	571,395	271.04
Vested	(538,769)	165.83
Forfeited	(38,792)	246.77
Nonvested at December 31, 2024	1,284,736	\$ 252.27

The total fair value of vesting shares was \$148 in 2024, \$96 in 2023 and \$95 in 2022.

S. RETIREMENT PLANS

We provide retirement benefits to eligible employees through a variety of plans:

- Defined contribution
- Defined benefit
 - Pension (qualified and non-qualified)
 - Other post-retirement benefit

Substantially all of our plans use a December 31 measurement date, consistent with our fiscal year.

Defined Contribution Plans

We provide eligible employees the opportunity to participate in defined contribution plans (commonly known as 401(k) plans), which permit contributions on a before-tax and after-tax basis. Employees may contribute to various investment alternatives. In most of these plans, we match a portion of the employees' contributions. Our contributions to these plans totaled \$517 in 2024, \$462 in 2023 and \$415 in 2022. On December 31, 2024 and 2023, the defined-contribution plans held approximately 15 million and 16 million shares of our common stock respectively, each representing approximately 6% of our outstanding shares.

Defined Benefit Plans

Plan Descriptions. We have trustee, qualified pension plans covering eligible employees aligned with the markets in our business: U.S. government, non-U.S. government and commercial. Some of these plans require employees to make contributions to the plan. We also sponsor several non-qualified pension plans, which provide eligible executives with additional benefits, including excess benefits over limits imposed on qualified plans by federal tax law. The principal factors affecting the benefits earned by participants in our pension plans are employees' years of service and compensation levels. Our primary U.S. pension plans, which comprise the majority of our unfunded obligation, were closed to new salaried participants on January 1, 2007, and were closed to new hourly participants in subsequent collective bargaining agreements over the next several years. Additionally, we have made several changes to these plans for certain participants that limit or cease the benefits that accrue for future service.

In addition to pension benefits, we maintain plans that provide post-retirement health care and life insurance coverage for certain employees and retirees. These benefits vary by employment status, age, service and salary level at retirement. The coverage provided and the extent to which the retirees share in the cost of the program vary throughout the company. The plans provide health care and life insurance benefits only to those employees who retire directly from our service and not to those who terminate service prior to eligibility for retirement.

Contributions. It is our policy to fund our qualified pension plans in a manner that optimizes the tax deductibility and contract recovery of contributions considered within our capital deployment framework. Therefore, we may make discretionary contributions in addition to the required contributions determined in accordance with IRS regulations. We contributed \$73 to our qualified pension plans in 2024. In 2025, our required contributions are \$241.

We maintain several tax-advantaged accounts, primarily Voluntary Employees' Beneficiary Association (VEBA) trusts, to fund the obligations for some of our other post-retirement benefit plans. For non-funded plans, claims are paid as received. Contributions to our other post-retirement benefit plans were not material in 2024 and are not expected to be material in 2025.

Benefit Payments. We expect the following benefits to be paid from our defined benefit plans over the next 10 years:

	Pension Benefits	Other Post-Retirement Benefits
2025	\$ 903	\$ 47
2026	900	46
2027	912	44
2028	924	43
2029	922	41
2030-2034	4,545	191

Benefit Cost. Our annual benefit cost consists of five primary elements:

- The cost of benefits earned by employees for services rendered during the year
- An interest charge on our plan liabilities
- An expected return on our plan assets for the year
- Actuarial gains and losses, which result from changes in assumptions and differences between actual and expected return on assets and participant experience
- The cost or credit attributed to prior service resulting from changes we make to plan benefit terms

For qualified pension plans and other post-retirement benefit plans, actuarial gains and losses and prior service costs or credits are initially deferred in AOCL and then amortized on a straight-line basis over future years. For our qualified U.S. government pension plans, we amortize actuarial gains and losses over a custom amortization period based on the amount of pension costs allocable to our U.S. government contracts. For the remaining qualified pension plans and other post-retirement benefit plans, we amortize only the amount of actuarial gains and losses that exceeds 10% of the greater of plan assets or benefit obligations. This amount is amortized over the average remaining service period of plan participants who are active employees unless all or almost all of a plan's participants are inactive or are not accruing additional benefits. In such cases, the amortization period is based on the average remaining life expectancy of the plan participants. To further reduce the volatility of our annual benefit cost, gains and losses resulting from the return on plan assets are included over five years in the determination of the amortizable amount of actuarial gains and losses. For non-qualified pension plans, we recognize actuarial gains and losses immediately.

Net annual benefit cost (credit) consisted of the following:

Year Ended December 31	Pension Benefits		
	2024	2023	2022
Service cost	\$ 73	\$ 66	\$ 102
Interest cost	627	650	400
Expected return on plan assets	(821)	(829)	(907)
Net actuarial loss	189	752	171
Prior service credit	(6)	(13)	(20)
Settlement/curtailment/other	87	3	4
Net annual benefit cost (credit)	\$ 149	\$ 629	\$ (250)

Year Ended December 31	Other Post-Retirement Benefits		
	2024	2023	2022
Service cost	\$ 4	\$ 4	\$ 6
Interest cost	28	30	19
Expected return on plan assets	(33)	(32)	(31)
Net actuarial gain	(31)	(30)	(16)
Prior service cost	2	2	1
Settlement/curtailment/other	(15)	5	(11)
Net annual benefit credit	\$ (45)	\$ (21)	\$ (32)

In October 2024, we purchased an irrevocable group annuity contract (referred to as a buy-out contract) for \$673 using retirement plan assets held in trust to transfer the related outstanding qualified pension obligations to two insurance companies. As a result of the transaction, the insurance companies are now required to pay and administer the retirement benefits owed to approximately 16,000 U.S.

retirees and beneficiaries, with no change to the amount, timing or form of the monthly retirement benefit payments. In connection with this transaction, we recognized a non-cash settlement charge of approximately \$80 in our qualified U.S. government pension plans related to the GAAP acceleration of deferred actuarial losses included in AOCL for the plans.

Our contractual arrangements with the U.S. government provide for the recovery of pension and other post-retirement benefit costs related to employees working on government contracts, including settlement costs. The amount allocated to U.S. government contracts is determined in accordance with the Federal Acquisition Regulation (FAR) and Cost Accounting Standards (CAS), which may result in a timing difference with the amount determined under GAAP. We defer this difference on the Consolidated Balance Sheet. At this time, cumulative benefit costs exceed the amount allocated to contracts, and the difference is reported in other current assets. To the extent there is a non-service component of net annual benefit cost (credit) for our defined benefit plans, it is reported in other income (expense) in the Consolidated Statement of Earnings.

Funded Status. We recognize an asset or liability on the Consolidated Balance Sheet equal to the funded status of each of our defined benefit plans. The funded status is the difference between the fair value of the plan's assets and its benefit obligation. The following is a reconciliation of the benefit obligations and plan/trust assets, and the resulting funded status, of our defined benefit plans:

Year Ended December 31	Pension Benefits		Other Post-Retirement Benefits	
	2024	2023	2024	2023
Change in Benefit Obligation				
Benefit obligation at beginning of year	\$ (13,736)	\$ (13,505)	\$ (598)	\$ (617)
Service cost	(73)	(66)	(4)	(4)
Interest cost	(627)	(650)	(28)	(30)
Amendments	1	1	—	(5)
Actuarial gain (loss)	643	(377)	32	8
Settlement/curtailment/other	727	(52)	11	(3)
Benefits paid	876	913	49	53
Benefit obligation at end of year	\$ (12,189)	\$ (13,736)	\$ (538)	\$ (598)
Change in Plan/Trust Assets				
Fair value of assets at beginning of year	\$ 11,886	\$ 11,435	\$ 649	\$ 626
Actual return on plan assets	128	1,177	28	57
Employer contributions	73	106	—	—
Settlement/curtailment/other	(733)	59	—	—
Benefits paid	(854)	(891)	(32)	(34)
Fair value of assets at end of year	\$ 10,500	\$ 11,886	\$ 645	\$ 649
Funded status at end of year	\$ (1,689)	\$ (1,850)	\$ 107	\$ 51

The overall decrease in our pension benefit obligation for the year ended December 31, 2024, was due primarily to the settlement resulting from the buy-out contract, and actuarial gain created by the change in the weighted-average discount rate, which increased from 4.83% at December 31, 2023, to 5.40% at December 31, 2024.

The overall increase in our pension benefit obligation for the year ended December 31, 2023, was due primarily to actuarial loss created by the change in the weighted-average discount rate, which decreased from 5.08% at December 31, 2022, to 4.83% at December 31, 2023.

Amounts recognized on the Consolidated Balance Sheet consisted of the following:

December 31	Pension Benefits		Other Post-Retirement Benefits	
	2024	2023	2024	2023
Noncurrent assets	\$ 130	\$ 140	\$ 347	\$ 316
Current liabilities	(22)	(23)	(13)	(13)
Noncurrent liabilities	(1,797)	(1,967)	(227)	(252)
Net (liability) asset recognized	\$ (1,689)	\$ (1,850)	\$ 107	\$ 51

Amounts deferred in AOCL for our defined benefit plans consisted of the following:

December 31	Pension Benefits		Other Post-Retirement Benefits	
	2024	2023	2024	2023
Net actuarial loss (gain)	\$ 2,453	\$ 2,674	\$ (294)	\$ (303)
Prior service (credit) cost	(46)	(52)	10	12
Total amount recognized in AOCL, pretax	\$ 2,407	\$ 2,622	\$ (284)	\$ (291)

The following is a reconciliation of the change in AOCL for our defined benefit plans:

Year Ended December 31	Pension Benefits		Other Post-Retirement Benefits	
	2024	2023	2024	2023
Net actuarial loss (gain)	\$ 50	\$ 29	\$ (27)	\$ (33)
Prior service (credit) cost	(1)	(1)	—	5
Amortization of:				
Net actuarial (loss) gain from prior years	(189)	(752)	31	30
Prior service credit (cost)	6	13	(2)	(2)
Settlement/curtailment/other	(81)	(10)	5	(1)
Change in AOCL, pretax	\$ (215)	\$ (721)	\$ 7	\$ (1)

A pension plan's funded status is the difference between the plan's assets and its projected benefit obligation (PBO). The PBO is the present value of future benefits attributed to employee services rendered to date, including assumptions about future compensation levels. On December 31, 2024 and 2023, most of our pension plans had a PBO that exceeded the plans' assets. Summary information for those plans follows:

December 31	2024	2023
PBO	\$ (11,476)	\$ (13,019)
Fair value of plan assets	9,657	11,029

A pension plan's accumulated benefit obligation (ABO) is the present value of future benefits attributed to employee services rendered to date, excluding assumptions about future compensation levels. The ABO for all pension plans was \$12.1 billion and \$13.6 billion on December 31, 2024 and 2023, respectively. The ABO for all other post-retirement plans was \$538 and \$598 on December 31, 2024 and 2023, respectively. On December 31, 2024 and 2023, most of our defined benefit plans had an ABO that exceeded the plans' assets.

Summary information for those plans follows:

December 31	Pension Benefits		Other Post-Retirement Benefits	
	2024	2023	2024	2023
ABO	\$ (11,380)	\$ (12,900)	\$ (227)	\$ (275)
Fair value of plan assets	9,657	11,029	—	22

Assumptions. We calculate the plan assets and liabilities for a given year and the net annual benefit cost for the subsequent year using assumptions determined as of December 31 of the year in question.

The following table summarizes the weighted average assumptions used to determine our benefit obligations:

Assumptions on December 31	2024	2023
Pension Benefits		
Benefit obligation discount rate	5.40%	4.83%
Rate of increase in compensation levels	2.58%	2.60%
Other Post-Retirement Benefits		
Benefit obligation discount rate	5.41%	4.89%
Health care cost trend rate:		
Trend rate for next year	7.50%	6.25%
Ultimate trend rate	5.00%	5.00%
Year rate reaches ultimate trend rate	2035	2032

The following table summarizes the weighted average assumptions used to determine our net annual benefit cost:

Assumptions for Year Ended December 31	2024	2023	2022
Pension Benefits			
Discount rates:			
Benefit obligation	4.83%	5.08%	2.84%
Service cost	3.90%	4.50%	2.51%
Interest cost	4.74%	4.98%	2.31%
Expected long-term rate of return on assets	6.35%	6.34%	6.78%
Rate of increase in compensation levels	2.66%	2.60%	2.52%
Other Post-Retirement Benefits			
Discount rates:			
Benefit obligation	4.89%	5.16%	2.89%
Service cost	4.91%	5.26%	3.32%
Interest cost	4.83%	5.09%	2.33%
Expected long-term rate of return on assets	5.07%	5.04%	5.12%

We base the discount rates on a current yield curve developed from a portfolio of high-quality, fixed-income investments with maturities consistent with the projected benefit payout period.

We determine the long-term rates of return on assets based on consideration of historical and forward-looking returns and the current and expected asset allocation. In 2024, we increased the

expected long-term rates of return on assets by 1 basis point for our pension plans and by 3 basis points for our other post-retirement benefit plans, resulting from changes in our asset allocations.

Retirement plan assumptions are based on our best judgment, including consideration of current and future market conditions. Given the long-term nature of the assumptions being made, actual outcomes can and often do differ from these estimates. Changes in these estimates impact future pension and other post-retirement benefit costs. As previously discussed, our contractual arrangements with the U.S. government provide for the recovery of pension and other post-retirement benefit costs. Therefore, the impact of annual changes in financial reporting assumptions on the cost for these plans does not immediately affect our operating results.

Assets. A committee of our Board is responsible for the strategic oversight of our defined benefit plan assets held in trust. Management develops investment policies and provides oversight of a third-party investment manager who reports to the committee on a regular basis. The outsourced third-party investment manager develops investment strategies and makes all day-to-day investment decisions related to defined benefit plan assets in accordance with our investment policy and target allocation percentages with the objective of generating future returns at or above our assumed long-term rates of return used to determine net annual benefit cost.

Our investment policy endeavors to strike the appropriate balance between asset growth and funded status protection. The objective of the policy is to generate asset returns that will increase the funded status of our plans while systematically reducing cost and deficit risk as funded status of the plans improve. Several of our U.S. pension plans are now utilizing a target asset allocation strategy that will automatically increase investments in liability-hedging assets (primarily commingled fixed-income funds) and decrease investments in return-seeking assets (primarily commingled equity funds) as the plans reach specific funded status targets. At the end of 2024, our target asset allocation ranges for plans that are less than fully funded were 40-70% return-seeking assets and 30-60% liability-hedging assets.

More than 90% of our pension plan assets are held in a single trust for our primary qualified U.S. government and commercial pension plans. On December 31, 2024, the trust was invested largely in commingled funds comprised primarily of equity and fixed-income securities. The trust also invests in other asset classes consistent with our investment policy. Our investment policy allows the use of derivative instruments when appropriate to reduce anticipated asset volatility, to gain exposure to an asset class or to adjust the duration of fixed-income assets.

We hold assets in VEBA trusts for some of our other post-retirement benefit plans. On December 31, 2024, these trusts were invested largely in fixed-income securities and commingled funds comprised primarily of equity and fixed-income securities. Our asset allocation strategy for the VEBA trusts considers funded status, potential fluctuations in our other post-retirement benefit obligation, the taxable nature of certain VEBA trusts, tax deduction limits on contributions and the regulatory environment.

Our defined benefit plan assets are reported at fair value. See Note P for a discussion of the hierarchy for determining fair value. Our Level 1 assets include commingled equity and fixed-income funds that are valued using a unit price or NAV. These funds are actively traded and valued using quoted prices for identical securities from the market exchanges. Our Level 2 assets include fixed-income securities and commingled equity and fixed-income funds whose underlying investments are valued using observable marketplace inputs. The fair value of plan assets invested in fixed-income securities is generally determined under a market approach using valuation models that incorporate observable inputs such as interest rates, bond yields and quoted prices for similar assets. Our plan assets invested in Level 2 commingled funds are valued using a unit price or NAV obtained from the fund's transfer agent or investment manager that is based on the underlying, observable investments of the fund. Our Level 3 assets consist of insurance deposit contracts, retirement annuity contracts and real estate funds.

Certain investments valued using NAV as a practical expedient are excluded from the fair value hierarchy but are included in the tables below to permit reconciliation to total plan assets. These investments are redeemable at NAV generally on a monthly or quarterly basis, and most have redemption notice periods of up to 90 days. The unfunded commitments related to these investments were not material on December 31, 2024 or 2023.

The fair value of our pension plan assets by investment category and the corresponding level within the fair value hierarchy were as follows:

Asset Category	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2024				
Cash and equivalents	\$ 177	\$ 16	\$ 161	\$ —
Commingled funds:				
Equity funds	3,597	514	3,083	—
Fixed-income funds	6,048	195	5,853	—
Real estate funds	14	—	—	14
Other investments:

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
General Dynamics Corporation:

Opinion on the Consolidated Financial Statements

We have audited the accompanying Consolidated Balance Sheet of General Dynamics Corporation and subsidiaries (the Company) as of December 31, 2024 and 2023, the related Consolidated Statements of Earnings, Comprehensive Income, Cash Flows, and Shareholders' Equity for each of the years in the three-year period ended December 31, 2024, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2024, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 7, 2025 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Estimates used to recognize revenue for select long-term contracts

As discussed in Note B to the consolidated financial statements, accounting for long-term contracts involves estimating total contract revenue and costs. Revenue is recognized over time using costs incurred to date relative to total estimated costs at completion to measure progress toward satisfying performance obligations.

For a select group of long-term contracts in the defense segments, we identified the assessment of certain assumptions that are an input into the amount of revenue recognized during the period as a critical audit matter. Examples of these assumptions are estimates of labor hours, the cost of materials for the work to be performed and the transaction price. The evaluation of one or more of the assumptions used to recognize revenue for the select group of long-term contracts required a high level of subjective auditor judgment due to the nature of the individual contracts and related contract performance risks. Specifically, changes to certain assumptions may have a significant impact on the revenue recorded during the period.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the assumptions used to recognize revenue for the select group of long-term contracts. This included contract-level controls over certain revenue and cost assumptions. For certain contracts, we compared the Company's historical estimates of costs to actual costs incurred to assess the Company's ability to estimate accurately. Based on the nature of the individual contract, we evaluated certain revenue and cost assumptions by:

- reading the underlying contract and any related amendments to obtain an understanding of the contractual requirements and related performance obligations
- assessing the enforceable rights and obligations of the underlying contractual terms when changes to price or scope, or both, are not yet agreed
- assessing costs incurred to date and the relative progress toward satisfying the performance obligation(s) of the contract
- assessing, if relevant, the estimated costs at completion by considering similar or predecessor contracts and programs
- inquiring of financial and operational personnel of the Company to identify factors that should be considered within the estimated costs at completion or indications of potential management bias
- inspecting correspondence, if any, between the Company and the customer regarding actual to date and expected performance
- analyzing the sufficiency of the Company's assessment of contract performance risks included within the estimated costs at completion.

Discount rates used in pension benefit obligation

As discussed in Note S to the consolidated financial statements, the Company's pension benefit obligation and the associated plan assets were \$12.2 billion and \$10.5 billion, respectively, on December 31, 2024. The weighted-average discount rate assumption used in estimating the pension benefit obligation as of December 31, 2024, of 5.40% was based on a current yield curve developed from a portfolio of high-quality, fixed-income investments with maturities consistent

with the projected benefit payout period. The selected discount rates have a significant effect on the measurement of the pension benefit obligation.

We identified the evaluation of the discount rates for certain plans' pension benefit obligations as a critical audit matter. This is due to the extent of specialized skills required to assess the discount rate assumption used to discount estimated future benefit payments. In addition, certain plans' pension benefit obligations were sensitive to changes in this assumption.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the pension benefit obligation process. This included a control related to the determination of the discount rate assumption. We involved an actuarial professional with specialized skills and knowledge, who assisted in:

- evaluating the Company's methodology used to develop the discount rates
- checking the accuracy of the discount rates using the cash flows and spot rates provided by the Company
- evaluating the Company's determination of the discount rates by comparing changes in the discount rates from the prior year against changes in published indices using publicly available market data.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Our management, under the supervision and with the participation of the Chief Executive Officer and the Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act) as of December 31, 2024. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, on December 31, 2024, our disclosure controls and procedures were effective.

The certifications of the company's Chief Executive Officer and Chief Financial Officer required under Section 302 of the Sarbanes-Oxley Act have been filed as Exhibits 31.1 and 31.2 to this report.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Shareholders of General Dynamics Corporation:

The management of General Dynamics Corporation is responsible for establishing and maintaining adequate internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Our internal control system was designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management evaluated the effectiveness of our internal control over financial reporting as of December 31, 2024. In making this evaluation, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control – Integrated Framework (2013)*. Based on our evaluation we believe that, as of December 31, 2024, our internal control over financial reporting is effective based on those criteria.

KPMG LLP has issued an audit report on the effectiveness of our internal control over financial reporting. The KPMG report immediately follows this report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
General Dynamics Corporation:

Opinion on Internal Control Over Financial Reporting

We have audited General Dynamics Corporation and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Consolidated Balance Sheet of the Company as of December 31, 2024 and 2023, the related Consolidated Statements of Earnings, Comprehensive Income, Cash Flows, and Shareholders' Equity for each of the years in the three-year period ended December 31, 2024, and the related notes (collectively, the consolidated financial statements), and our report dated February 7, 2025 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only

in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no changes in our internal control over financial reporting that occurred during the quarter ended December 31, 2024, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

During the quarter ended December 31, 2024, none of our directors or officers adopted or terminated a Rule 10b5-1 trading arrangement or a non-Rule 10b5-1 trading arrangement (as such terms are defined under Item 408 of Regulation S-K).

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required to be set forth herein, except for the information included under Information About Our Executive Officers in Part I, will be included in the sections titled "Election of the Board of Directors of the Company," "Governance of the Company – Our Ethos," "Audit Committee Report" and, if included, "Other Information – Delinquent Section 16(a) Reports" in our definitive proxy statement for our 2025 annual shareholders meeting (the Proxy Statement), or elsewhere in the Proxy Statement, and that information is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information required to be set forth herein will be included in the sections titled "Governance of the Company – Director Compensation," "Compensation Discussion and Analysis," "Executive

Compensation” and “Compensation Committee Report” in our Proxy Statement, or elsewhere in the Proxy Statement, and that information is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required to be set forth herein will be included in the sections titled “Security Ownership of Management” and “Security Ownership of Certain Beneficial Owners” in our Proxy Statement, and that information is incorporated herein by reference.

The information required to be set forth herein with respect to securities authorized for issuance under our equity compensation plans will be included in the section titled “Equity Compensation Plan Information” in our Proxy Statement, and that information is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required to be set forth herein will be included in the sections titled “Governance of the Company – Related Person Transactions Policy” and “Election of the Board of Directors of the Company – Director Independence” in our Proxy Statement, and that information is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Our independent registered public accounting firm is KPMG LLP, McLean, VA, Auditor ID: 185.

The information required to be set forth herein will be included in the section entitled “Advisory Vote on the Selection of Independent Auditors – Audit and Non-Audit Fees” in our Proxy Statement, and that information is incorporated herein by reference.
