

TOMPKINS FINANCIAL

A message from Tom Rochon & Steve Romaine

As 2024 began, we were in one of the most challenging banking environments in quite some time. Coming off the heels of several high-profile bank failures, and with a rising rate environment pressuring earnings, the year began with uncertainty.

Taking a thorough and detailed approach which included some difficult decisions, we prepared a plan designed to face the challenges head-on and return our performance to the levels to which we have been accustomed.

We are pleased to share that our team met the challenge in 2024. We delivered strong financial results and we continued to be an active and important part of our communities.

FINANCIAL RESULTS

In 2024, diluted earnings per share were \$4.97, up 653.0% compared to the year ended December 31, 2023. Net income for 2024 was \$70.9 million, an increase of \$61.3 million compared to 2023. The 2023 results included an after-tax loss of \$52.9 million or \$3.69 loss per diluted share, related to the sale of \$510.5 million of securities as we repositioned our balance sheet for the future.

We experienced growth across all of our businesses. We saw net interest margin expansion, growth in loan balances and experienced strong growth in fee-based revenue through our wealth and insurance businesses. We also employed diligent expense management, with noninterest expenses down 1.8% compared to the prior year.

As profitability improved, we remained well positioned to continue driving growth through quality customer relationships.

GROWTH

We remain focused on sustaining growth across all of our businesses while we continue to improve our performance metrics. We entered 2024 with capital and liquidity positions that enabled us to proactively pursue favorable opportunities on the lending side. In 2024, we saw strong growth, with average loans in the fourth quarter up \$445.1 million compared to the fourth quarter of 2023. Our efforts to recruit talent in the commercial lending area helped drive an increase in activity. Our investments in online technology have also supported strong activity from our small business, home equity and residential lending teams.

Equally important to our success was our ability to attract and retain deposit balances. In a very difficult environment, our team worked hard to manage funding costs while broadening our deposit base. In 2024, we saw growth in average total deposits in the fourth quarter up \$91.9 million compared to the fourth quarter of 2023.

While growth in our banking businesses was strong, our fee-based businesses also contributed to our favorable performance. Tompkins Financial Advisors^{*} and Tompkins Insurance combined to drive increased revenue of \$3.3 million compared to the prior year.

EXPENSES

We would be remiss if we discussed the results of 2024 without acknowledging the outstanding work our teams did managing expenses. For the year, total expenses were down 1.8% compared to the prior year. Our teams remained diligent in ensuring all of our resources were focused on supporting and driving growth activities. We challenged ourselves to review all activities to determine priorities, focusing on efficiency and operating leverage. Internal initiatives around expense management generated many great ideas that either eliminated expenses or allowed for the redeployment of resources to efforts that directly support strategic objectives.

TECHNOLOGY AND THE CUSTOMER EXPERIENCE

As quickly as we have seen the rate environment change over the last several years, the pace of technological change is just as brisk. We invested heavily in technologies that allow our customers to seamlessly and efficiently achieve their financial objectives. We offer a competitive mobile application with all the features our customers need. Over the last three years, we have added online capabilities in all of our lending businesses. We continue to upgrade our capabilities in the areas of risk and fraud mitigation as we, like the entire industry, know this fight needs to be met with the same tenacity and ingenuity that fraudsters employ.

We continue to embrace technology to provide efficiencies in our operation. In 2024, we created the "Center of Excellence," a team of Tompkins professionals that is focused on hastening the pace with which we automate manual processes and tasks.

We know our resources are finite and we strive to continually find ways to ensure we can redirect them to activities that support and drive growth.

We are also active in monitoring the growing capabilities of artificial intelligence (AI) and the opportunities it offers to drive exceptional customer experiences. We already deploy solutions that utilize AI, currently using it to detect and reduce fraud. This landscape is changing rapidly, and the opportunities created from further development of this technology will provide the catalyst for future enhancements in how we deliver our products and services to customers.

COMMITMENT TO THE COMMUNITY

At the core of our business is a focus on, and commitment to, the communities we serve. Not only do we employ hundreds of people throughout our local communities, we also engage regularly by volunteering our time and energy as well as by making financial contributions to many organizations. With the decline in face-to-face customer interactions, our engagement within our communities serves as a key differentiator.

Our teams also regularly work with local organizations and on initiatives designed to increase access to banking, improve financial literacy within our communities, and support those less fortunate.

In our Pennsylvania market, Tompkins was the first private sector entity to support the Helping Harvest Annex project. Helping Harvest's mission is to feed the hungry, serving more than 125,000 people annually. The Annex project is an adaptive reuse of a 51,000 square foot historic building in Reading, PA which will house Helping Harvest and two other non-profit organizations. During the year, our team worked with the Cornell Prison Education Program to create a program that allows formerly incarcerated individuals to reengage with the banking system and rebuild their credit. Our hope is that this pilot program can serve as a model for broader outreach to individuals in our markets.

We also launched a pilot program in the Rochester, NY market, offering grants for down payment and/or closing cost assistance to home buyers living in low-income census tracts. Again, our goal is to expand this program to our broader markets in an effort to support the dream of homeownership in our communities.

BOARD TRANSITION

This is the final letter that will be joint with our esteemed chair, Tom Rochon, who is retiring from the Board of Directors. Tom has been our board chair since 2014 and has served as a director since 2009. In that time, he has challenged our board and management team to think strategically – and dream big – while staying focused on our mission of supporting the communities we serve.

Tom's commitment to our communities, our employees and our shareholders is unmatched. His support of our leadership team, with a calming influence and steady hand, has fostered the success we have enjoyed at Tompkins. His wisdom, kindness and presence will be missed.

Dan Fessenden will assume the role of board chair effective at the close of our annual meeting, after the new board has been elected. Dan has served as a director of the company since 2009 and currently serves as chair of our Central New York Community Bank Board. Dan served as a member of the New York State Assembly from 1993 to 1999 and is currently the executive director of the Fred L. Emerson Foundation, a family foundation located in Auburn, New York. We are fortunate to be able to transition board leadership to someone as capable as Dan, whose rich and diverse background and steady leadership style will serve us well into the future

In November, we lost a cherished colleague with the passing of Alfred "Al" Weber. Al served on the Tompkins Financial Corporation board since 2012. He also served as the chair of our Pennsylvania Community Bank Board. Prior to that, Al served as the chair of the board of VIST Financial Corporation from 2005 until its acquisition by Tompkins in 2012. To know Al was to be constantly entertained by his ability to make his points in the context of an engaging story. There is no way to replace Al's depth of experience, nor his distinctive voice. We will miss both his leadership and his insight.

Finally, we thank Jennifer Tegan for her service as a director since 2019. We will miss Jennifer's vision and strong voice on the board, while appreciating her continued focus on community service and development in her role as Managing Director of New York Ventures at Empire State Development.

THE FUTURE

As we enter 2025, we are faced with a much better outlook than in the recent past. While the global, political and economic environments still provide plenty of unknowns, we believe we are positioned well to meet the challenges. The support of our shareholders is critical to our success at all times and we can't thank you enough for your confidence in our organization. Our entire team remains steadfast in our focus on our customers, communities and shareholders, and we look forward to a rewarding and successful year.

We thank you for your continued support of Tompkins Financial and wish you every happiness in the coming year.

- Thomas Rochor

General

Tompkins Financial Corporation ("Tompkins" or the "Company") is headquartered in Ithaca, New York and is registered as a Financial Holding Company with the Federal Reserve Board under the Bank Holding Company Act of 1956, as amended. The Company is a locally-oriented, community-based financial services organization that offers a full array of products and services, including commercial and consumer banking, leasing, trust and investment management, financial planning and wealth management, and insurance services. At December 31, 2024, the Company had one wholly-owned banking subsidiary, Tompkins Community Bank. Banking services consist primarily of attracting deposits from the areas served by Tompkins Community Bank's 54 banking offices (38 offices in New York and 16 offices in Pennsylvania), and using those deposits to originate a variety of commercial loans, agricultural loans, consumer loans, real estate loans, and leases in those same areas. Tompkins Community Bank provides a full array of trust and wealth management services under the Tompkins Financial Advisors brand, including investment management, trust and estate, financial and tax planning as well as life, disability and long-term care insurance services. The Company also has a wholly-owned insurance agency subsidiary, Tompkins Insurance Agencies, Inc. ("Tompkins Insurance"). The Company's principal offices are located at 118 E. Seneca St., P.O. Box 460, Ithaca, New York, 14850, and its telephone number is (888) 503-5753. The Company's common stock is traded on the NYSE American under the symbol "TMP."

Tompkins was organized in 1995, under the laws of the State of New York, as a bank holding company for Tompkins Trust Company (the "Trust Company"), a commercial bank that has operated in Ithaca, New York and surrounding communities since 1836. In January 2021, Tompkins combined its four wholly-owned banking subsidiaries into one bank, with the Bank of Castile, Mahopac Bank, and VIST Bank merging with and into the Trust Company. Immediately following the merger, the Trust Company changed its name to Tompkins Community Bank.

The Tompkins strategy centers around its core values and a commitment to delivering long-term value to our clients, communities, and shareholders. A key strategic initiative for the Company is a focus on responsible and sustainable growth, including initiatives to grow organically through our current businesses, as well as through possible acquisitions of financial institutions, branches, and financial services businesses. As such, the Company has acquired, and from time to time considers acquiring, banks, thrift institutions, branch offices of banks or thrift institutions, or other businesses that would complement the Company's business or its geographic reach. The Company generally targets merger or acquisition partners that are culturally similar and have experienced management and possess either significant market presence or have potential for improved profitability through financial management, economies of scale and expanded services. The Company has pursued acquisition opportunities in the past, and continues to review new opportunities.

The Company also has defined strategic initiatives around digital delivery of services to meet the changing needs of client expectations, while maintaining our commitment to excellence in the delivery of personal service when self-serve options are unable to meet the needs of our clients. Our strategy includes a focus on building a scalable foundation based on a continuous improvement approach necessary for our long-term success. This foundation includes investments in automation, analytics and security to drive ongoing consistency, efficiency, and security in our operations. We also recognize the need to develop and acquire talent that is well prepared to succeed in our changing industry. Initiatives in this area include a focus on characteristics such as collaboration, innovation and agility.

Narrative Description of Business

The Company has identified three business segments, consisting of banking, insurance and wealth management.

Banking services consist primarily of attracting deposits from the areas served by the Company's banking subsidiary and using those deposits to originate a variety of commercial loans, agricultural loans, consumer loans, real estate loans, and leases in those same areas. The Company's lending function is managed within the guidelines of a comprehensive Board of Directors-approved lending policy. Policies and procedures are reviewed on a regular basis. Reporting systems are in place to provide management with ongoing information related to loan production, loan quality, concentrations of credit, loan delinquencies and

nonperforming and potential problem loans. The Company has an independent third party loan review process that samples, reviews, and validates the risk identification and assessment made by the lenders and credit personnel. The results of these reviews are presented to the Board of Directors of the Company's banking subsidiary, and the bank's Credit Oversight Committee.

The Company's principal expenses are interest on deposits, interest on borrowings, and operating and general administrative expenses, as well as provisions for credit loss expenses. Funding sources, other than deposits, include borrowings, securities sold under agreements to repurchase, and cash flow from lending and investing activities. The Company's principal source of revenue is interest income on loans and securities.

The Company maintains a portfolio of securities such as U.S. Treasury securities, obligations of U.S. government agencies and U.S. government sponsored entities, obligations of states and political subdivisions thereof, and equity securities. Management typically invests in securities with short to intermediate average lives in order to better match the interest rate sensitivities of its assets and liabilities. Investment decisions are made within policy guidelines established by the Company's Board of Directors. The investment policy is based on the asset/liability management goals of the Company, and is monitored by the Company's Asset/Liability Management Committee. The intent of the policy is to establish a portfolio of high quality diversified securities, which optimizes net interest income within safety and liquidity limits deemed acceptable by the Asset/Liability Management Committee.

The Company has operated its insurance agency subsidiary, Tompkins Insurance, since 2001. Insurance services include property and casualty insurance, employee benefit consulting, life, long-term care and disability insurance. Tompkins Insurance is headquartered in Batavia, New York. Over the years, Tompkins Insurance has acquired smaller insurance agencies in the market areas served by Tompkins Community Bank and successfully consolidated them into Tompkins Insurance. Tompkins Insurance offers services to customers of Tompkins Community Bank by sharing offices with Tompkins Community Bank. In addition to these shared offices, Tompkins Insurance has four stand-alone offices in Western New York.

Wealth management services consist of investment management, trust and estate, financial and tax planning as well as life, disability and long-term care insurance services. Wealth management services are provided under the trade name Tompkins Financial Advisors. Tompkins Financial Advisors has office locations, and services are available, at certain of Tompkins Community Bank's branch locations.

Subsidiaries

Tompkins Community Bank

Tompkins Community Bank operates 54 branches, 38 branches in New York, and 16 located in Pennsylvania. Tompkins has operated in Ithaca, New York and surrounding communities since 1836. Tompkins Community Bank provides wealth management services through Tompkins Financial Advisors, a division of Tompkins Community Bank. As of December 31, 2024, Tompkins Community Bank had consolidated total assets of \$8.1 billion, consolidated total loans of \$6.0 billion, and consolidated total deposits of \$6.5 billion. A description of markets served by Tompkins Community Bank are included below:

Tompkins Central New York ("CNY")

We operate 12 branches in our CNY market, with the largest market area being Tompkins County, which has a population of approximately 104,000. Education plays a significant role in the Tompkins County economy with Cornell University and Ithaca College being two of the county's major employers. Tompkins Community Bank has a full-service office in Cortland, New York and a full-service office in Auburn, New York. Both of these offices are located in counties contiguous to Tompkins County. Tompkins Community Bank also has two full-service branches in Fayetteville and Syracuse, New York which are located in Onondaga County.

Tompkins Western New York ("WNY")

We operate 14 banking offices in our WNY market, in towns situated in and around the areas commonly known as the Genesee Valley region of New York State. The main business office for WNY is located in Batavia, New York and is shared with Tompkins Insurance. Our WNY market is a six-county market, much of which is rural in nature, but also includes Monroe County (population approximately 748,000), where the city of Rochester is located, and Erie County (population approximately 946,000) located near Buffalo, New York. The population of the counties in our WNY market, other than Monroe and Erie, is approximately 198,000.

Tompkins Hudson Valley New York ("HV")

We operate 12 banking offices in our HV market. The 12 banking offices include 4 full-service offices in Putnam County, New York, 3 full-service offices in Dutchess County, New York, and 5 full-service offices in Westchester County, New York. Putnam County has a population of approximately 98,000 and is about 60 miles north of Manhattan. Dutchess County has a population of approximately 297,000, and Westchester County has a population of approximately 991,000.

Tompkins Pennsylvania ("PA")

We operate 16 banking offices in Pennsylvania, including one limited-service office. The 16 banking offices include 10 offices in Berks County, 3 offices in Montgomery County, 1 office in Philadelphia County, 1 office in Delaware County and 1 office in Schuylkill County. The population of the counties served by PA is Philadelphia: 1.6 million, Montgomery: 869,000, Delaware: 577,000, Berks: 433,000 and Schuylkill: 144,000. The main office is located in Wyomissing, Pennsylvania.

Tompkins Insurance Agencies, Inc.

Tompkins Insurance is headquartered in Batavia, New York. Insurance services include property and casualty insurance, employee benefit consulting, and life, long-term care and disability insurance. Tompkins Insurance offers services to customers of the Tompkins Community Bank by sharing offices within Western New York, Central New York and Pennsylvania. In addition to these shared offices, Tompkins Insurance has four stand-alone offices in Western New York.

Competition

Competition for commercial banking and other financial services is strong in the Company's market areas. In one or more aspects of its business, Tompkins Community Bank competes with other commercial banks, savings and loan associations, credit unions, finance companies, internet-based financial services companies, mutual funds, insurance companies, brokerage and investment banking companies, and other financial intermediaries. Some of these competitors have substantially greater resources and lending capabilities and may offer services that the Company does not currently provide. In addition, many of the Company's non-bank competitors are not subject to the same extensive State and Federal regulations that govern financial holding companies and Federally-insured banks.

Competition among financial institutions is based upon interest rates offered on deposit accounts, interest rates charged on loans and other credit and service charges, the quality and scope of the services rendered, the convenience of facilities and services, and, in the case of loans to commercial borrowers, relative lending limits. Management believes that a community-based financial organization is better positioned to establish personalized financial relationships with both commercial customers and individual households. The Company's community commitment and involvement in its primary market areas, as well as its commitment to quality and personalized financial services, are factors that contribute to the Company's competitiveness. Management believes that Tompkins Community Bank can compete successfully in its primary market areas by making prudent lending decisions quickly and more efficiently than its competitors, without compromising asset quality or profitability. In addition, the Company focuses on providing unparalleled customer service, which includes offering a strong suite of products and services, including products that are accessible to our customers through digital channels. Although management feels that this business model has caused the Company to grow its customer base in recent years and allows it to compete effectively in the markets it serves, we cannot assure you that such factors will result in future success.

Supervision and Regulation

Regulatory Agencies

As a registered financial holding company, the Company is regulated under the Bank Holding Company Act of 1956 as amended ("BHC Act"), and is subject to examination and comprehensive regulation by the Federal Reserve Board ("FRB"). The Company is also subject to the jurisdiction of the Securities and Exchange Commission ("SEC") and is subject to disclosure and regulatory requirements under the Securities Act of 1933, as amended (the "Securities Act"), and the Securities Exchange Act of 1934, as amended (the "Exchange Act"). The Company's activities, or those of its subsidiary bank, Tompkins Community Bank, are also subject to regulation under the Federal Reserve Act, the Federal Deposit Insurance Act, the Dodd-Frank Act, the Truth-in-Lending Act (which governs disclosures of credit terms to consumer borrowers), the Truth-in-Savings Act, the Equal Credit Opportunity Act, the Fair Credit Reporting Act (which governs the manner in which consumer debts may be collected by collection agencies), the Home Mortgage Disclosure Act (which requires financial institutions to provide certain information about home mortgage and refinanced loans), the Servicemembers Civil Relief Act, Section 5 of the Federal Trade Commission Act (which prohibits unfair or deceptive acts and practices in or affecting commerce), the Real Estate Settlement Procedures Act, and the Electronic Funds Transfer Act, as well as other federal, state and local laws. The Company's common

stock is traded on the NYSE American under the Symbol "TMP" and as a result the Company is subject to the rules of the NYSE American for listed companies.

Tompkins Community Bank is a state chartered bank and a non-member of the Federal Reserve System and is subject to examination and comprehensive regulation by various regulatory authorities, including the Federal Deposit Insurance Corporation ("FDIC"), and the New York State Department of Financial Services ("NYSDFS"). Each of these agencies issues regulations and requires the filing of reports describing the activities and financial condition of the entities under its jurisdiction. Likewise, such agencies conduct examinations on a recurring basis to evaluate the safety and soundness of the institutions, and to test compliance with various regulatory requirements, including: consumer protection, privacy, fair lending, the Community Reinvestment Act, the Bank Secrecy Act, sales of non-deposit investments, electronic data processing, and trust department activities.

The Company's insurance subsidiary is subject to examination and regulation by the NYSDFS and the Pennsylvania Insurance Department.

The Company's wealth management subsidiary is subject to examination and regulation by various regulatory agencies. The trust division of Tompkins Community Bank is subject to examination and comprehensive regulation by the FDIC and NYSDFS.

Federal Home Loan Bank ("FHLB") System

The Federal Home Loan Banks (the "FHLBs") are a group of cooperatives that lending institutions use to finance housing and economic development in local communities. We are a member of the FHLB of New York ("FHLBNY"). FHLB members are required to maintain a minimum investment in capital stock of the applicable FHLB. The board of directors of the FHLBNY may increase the minimum investment requirements in the event it has concluded that additional capital is required to allow it to meet its own regulatory capital requirements. Any increase in the minimum investment requirements outside of specified ranges requires the approval of the Federal Housing Finance Agency. Because the extent of any obligation to increase our investment in the FHLBNY depends entirely upon the occurrence of a future event, the amount of any future investment in the capital stock of the FHLBNY is not determinable.

Regulatory Reform

Legislation, some of which may be extensive and comprehensive in nature, is introduced in Congress and New York's legislature from time to time. Such legislation may change applicable statutes and the operating environment in substantial and unpredictable ways. We cannot determine the ultimate effect that future legislation or implementing regulations would have upon our financial condition or upon our results of operations or the results of operations of any of our subsidiaries.

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Dodd-Frank Act") by way of example, contains a comprehensive set of provisions designed to govern the practices and oversight of financial institutions and other participants in the financial markets. The Dodd-Frank Act made extensive changes in the regulation of financial institutions and their holding companies. Some of the changes brought about by the Dodd-Frank Act were modified by the Economic Growth, Regulatory Relief, and Consumer Protection Act of 2018 (the "Regulatory Relief Act"), signed into law on May 24, 2018.

Debit-Card Interchange Fees

FRB regulations mandated by the Dodd-Frank Act limit interchange fees on debit cards to a maximum of 21 cents per transaction plus 5 basis points of the transaction amount. Issuers that, together with their affiliates, have less than \$10 billion in assets, such as the Company, are exempt from the debit card interchange fee standards. However, FRB regulations prohibit all card issuers, including Tompkins Community Bank, from restricting the number of networks over which electronic debit transactions may be processed to fewer than two unaffiliated networks, or inhibiting a merchant's ability to direct the routing of the electronic debit transaction over any network that the card issuer has enabled to process them.

Volcker Rule

The Dodd-Frank Act required the federal financial regulatory agencies to adopt rules that prohibit banks and their affiliates from engaging in proprietary trading and investing in certain covered funds. The statutory provision is commonly called the "Volcker Rule," and is not applicable to depository institutions and their holding companies whose total assets do not exceed \$10 billion. As of December 31, 2024, the Company's total assets on a consolidated basis were \$8.1 billion.

Federal Bank Holding Company ("BHC") Regulation

We are a bank holding company subject to regulation under the BHC Act and the examination and reporting requirements of the FRB. In general, the BHC Act limits the business of bank holding companies to banking, managing or controlling banks,

and other activities that the FRB has determined to be closely related to banking. In addition, we have elected to be treated as a financial holding company under the BHC Act and therefore may engage in any activity, or acquire and retain the shares of a company engaged in any activity, that is either (i) financial in nature or incidental to such financial activity (as determined by the FRB in consultation with the Secretary of the Treasury) or (ii) complementary to a financial activity and does not pose a substantial risk to the safety and soundness of depository institutions or the financial system generally (as solely determined by the FRB), without prior approval of the FRB.

If a bank holding company elects to be treated as a financial holding company, as we have, (i) the bank holding company and all of its depository institution subsidiaries must be "well-capitalized" and "well-managed," as defined in the FRB's Regulation Y and (ii) the bank holding company must file a declaration with the FRB that it elects to be a "financial holding company," which we have done. A depository institution subsidiary is considered to be "well-capitalized" if it satisfies the requirements for this status discussed in the section captioned "Capital Adequacy and Prompt Corrective Action," below. A depository institution subsidiary is considered to be "well-capitalized" if it satisfies the requirements for this status discussed in the section captioned "Capital Adequacy and Prompt Corrective Action," below. A depository institution subsidiary is considered "well-managed" if it received a composite rating and management rating of at least "satisfactory" in its most recent examination. A financial holding company's status will also depend upon it maintaining its status as "well-capitalized" and "well-managed" under applicable FRB regulations. If a financial holding company must enter into an agreement with the FRB to comply with all applicable capital and management requirements. Until the financial holding company returns to compliance, the FRB may impose limitations or conditions on the conduct of its activities, and the company engaged in such financial activities without prior approval of the FRB. If the company does not return to compliance within 180 days, the FRB may require divestiture of the holding company's depository institutions. Bank holding companies and banks must also be "well-capitalized" and "well-managed" in order to acquire banks located outside their home state.

In order for a financial holding company to commence any new activity permitted by the BHC Act or to acquire a company engaged in any new activity permitted by the BHC Act, each insured depository institution subsidiary of the financial holding company must have received a rating of at least "satisfactory" in its most recent examination under the Community Reinvestment Act ("CRA"). See the section captioned "Community Reinvestment Act", below.

The FRB has the power to order any bank holding company or its subsidiaries to terminate any activity or to terminate its ownership or control of any subsidiary when the FRB has reasonable grounds to believe that continuation of such activity or such ownership or control constitutes a serious risk to the financial soundness, safety or stability of any bank subsidiary of the bank holding company.

Share Repurchases and Dividends

The ability of the Company to pay dividends on or to repurchase its common stock, and the ability of Tompkins Community Bank to pay dividends to the Company, may be restricted due to several factors including: (a) applicable federal and state banking codes, (b) covenants contained in our borrowing agreements (as applicable), and (c) the regulatory authority of the FRB, the FDIC, and the NYSDFS. Our ability to pay dividends to our stockholders or to repurchase shares of our common stock is also subject to restrictions set forth in the New York Business Corporation Law.

Notification to the FRB is required prior to our declaring and paying a cash dividend to our stockholders during any period in which our quarterly and/or cumulative twelve month net earnings are insufficient to fund the dividend amount, among other requirements. Under such circumstances, we may not pay a dividend should the FRB object until such time as we receive approval from the FRB or no longer need to provide notice under applicable regulations. In addition, prior approval of the FRB may be required in certain circumstances prior to our repurchasing shares of our common stock.

In connection with any decision regarding dividends and share repurchase programs, our Board will take into account general business conditions, our financial results, projected cash flows, capital requirements, contractual, legal and regulatory restrictions on the payment of dividends by Tompkins Community Bank to the Company, and such other factors as deemed relevant. We can provide no assurance that we will continue to declare dividends on a quarterly basis, or otherwise, or to repurchase shares of our common stock. The declaration of dividends by the Company is subject to the discretion of our Board.

The Company's primary source of liquidity is the receipt of cash dividends from Tompkins Community Bank. Various statutes and regulations limit the availability of cash dividends from Tompkins Community Bank and the dividends paid by Tompkins Community Bank are regulated by the NYSDFS and the FDIC under their general supervisory authority as it relates to a bank's capital requirements. Tompkins Community Bank may declare a dividend without the approval of the NYSDFS and FDIC as long as the total dividends declared in a calendar year do not exceed its net income for the current fiscal year, plus the retained net income for the prior two fiscal years.

Transactions with Affiliates and Other Related Parties

Transactions between Tompkins Community Bank and its affiliates are regulated under federal banking law. Subject to certain exceptions set forth in the Federal Reserve Act and its implementing regulations, found in FRB Regulation W, a bank may enter into "covered transactions" with its affiliates if the aggregate amount of the covered transactions with any single affiliate does not exceed 10 percent of the bank's capital stock and surplus or 20 percent of the bank's capital stock and surplus for covered transactions with all affiliates. Covered transactions include, among other things, extension of credit, the investment in securities, the purchase of assets, the acceptance of collateral or the issuance of a guaranty. The Dodd-Frank Act significantly expanded the coverage and scope of the limitations on affiliate transactions within a banking organization. Additionally, most transactions that a bank engages in with an affiliate, including where an affiliate performs a service for the bank, must be on similar terms and conditions as the bank would agree to with a non-affiliate.

Tompkins Community Bank's authority to extend credit to its directors, executive officers and 10% shareholders (collectively, "Reg O Insiders"), as well as to entities controlled by such persons, is governed by the requirements of Sections 22(g) and 22(h) of the Federal Reserve Act and Regulation O as promulgated by the FRB. Among other things, these provisions require that extensions of credit to Reg O Insiders (i) be made on terms that are substantially the same as, and follow credit underwriting procedures that are not less stringent than, those prevailing for comparable transactions with persons or entities that are not Reg O Insiders (or their related parties), and that do not involve more than the normal risk of repayment or present other unfavorable features; and (ii) not exceed certain limitations on the amount of credit extended to such persons, individually and in the aggregate, which limits are based, in part, on the amount of the bank's capital. In addition, extensions of credit in excess of certain limits must be approved by the bank's board of directors. Additional restrictions apply to extensions of credit to executive officers of Tompkins Community Bank. A similar scope of restrictions on insider transactions is required by Title 3, Part 11 of NYSDFS Banking regulations.

Mergers and Acquisitions

The BHC Act, the Bank Merger Act, the Change in Bank Control Act and other federal and state statutes regulate acquisitions of interests in commercial banks. The BHC Act requires the prior approval of the FRB for the direct or indirect acquisition by a bank holding company of more than 5.0% of the voting shares of a commercial bank or its parent holding company and for a person, other than a bank holding company, to acquire 25% or more of any class of voting securities of a bank or bank holding company. Under the Bank Merger Act, the prior approval of the appropriate bank regulatory agencies is required for a member bank to merge with another bank or purchase the assets or assume the deposits of another bank. In reviewing applications seeking approval of merger and acquisition transactions, the bank regulatory authorities will consider, among other things, the competitive effect and public benefits of the transactions, the capital position of the CRA (see the section captioned "Community Reinvestment Act", below) and fair housing laws and the effectiveness of the subject organizations in combating money laundering activities.

Source of Strength Doctrine

The Dodd-Frank Act requires bank holding companies to act as a source of financial and managerial strength to their subsidiary banks. Under this requirement, Tompkins is expected to commit resources to support Tompkins Community Bank, including at times when it may not be advantageous for Tompkins to do so. Any capital loans by a bank holding company to a subsidiary bank are subordinated in right of payment to deposits and to certain other indebtedness of such subsidiary bank. In the event of a bank holding company's bankruptcy, any commitment by the bank holding company to a federal bank regulatory agency to maintain the capital of a subsidiary bank will be assumed by the bankruptcy trustee and entitled to priority of payment.

Capital Adequacy and Prompt Corrective Action

Bank holding companies and banks are subject to various regulatory capital requirements administered by state and federal agencies. These agencies may establish higher minimum requirements if, for example, a banking organization previously has received special attention or has a high susceptibility to interest rate risk. Risk-based capital requirements determine the adequacy of capital based on the risk inherent in various classes of assets and off-balance sheet items. Under the Dodd-Frank Act, the Federal Reserve must apply consolidated capital requirements to depository institution holding companies that are no less stringent than those currently applied to depository institutions. The Dodd-Frank Act additionally requires capital requirements to be counter-cyclical so that the required amount of capital increases in times of economic expansion and decreases in times of economic contraction, consistent with safety and soundness.

Under federal regulations, bank holding companies and banks must meet certain risk-based capital requirements, commonly known as "Basel III". The Basel III capital framework, among other things, (i) includes the capital measure, "Common Equity Tier 1" ("CET1"), (ii) specifies that Tier 1 capital consists of CET1 and "Additional Tier 1 capital" instruments meeting

specified requirements, (iii) defines CET1 narrowly by requiring that most adjustments to regulatory capital measures be made to CET1 and not to the other components of capital and (iv) expands the scope of the adjustments as compared to existing regulations. Financial institutions are also required to maintain a minimum "capital conservation buffer" to avoid restrictions on capital distributions such as dividends and equity repurchases and other payments such as discretionary bonuses to executive officers.

The Basel III capital rules require Tompkins to maintain minimum capital ratios, which include an additional capital conservation buffer of 2.5%, as follows: (i) a minimum ratio of CET1 to risk-weighted assets of 7.0%, (ii) a minimum ratio of Total capital to risk-weighted assets of 8.5%, (iii) a minimum ratio of Total capital (that is, Tier 1 plus Tier 2) to risk-weighted assets of 10.5%, and (iv) a minimum leverage ratio of 4.0%, calculated as the ratio of Tier 1 capital to average assets. Banking institutions that fail to meet the effective minimum ratios once the capital conservation buffer is taken into account, as detailed above, will be subject to constraints on capital distributions, including dividends and share repurchases, and certain discretionary executive compensation. The severity of the constraints depends on the amount of the shortfall and the institution's "eligible retained income" (that is, the greater of (i) net income for the preceding four quarters, net of distributions and associated tax effects not reflected in net income and (ii) average net income over the preceding four quarters).

The Federal Deposit Insurance Act ("FDIA") requires federal banking agencies to take "prompt corrective action" ("PCA") should an insured depository institution fail to meet certain capital adequacy standards. If an insured depository institution is classified in one of the undercapitalized categories, it is required to submit a capital restoration plan to the appropriate federal banking agency and the holding company must guarantee the performance of that plan. Based upon its capital levels, a bank that is classified as well-capitalized, adequately capitalized or undercapitalized, may be treated as though it were in the next lower capital category if the appropriate federal banking agency, after notice and opportunity for hearing, determines that an unsafe or unsound condition or an unsafe or unsound practice, warrants such treatment. A depository institution is deemed to be "well-capitalized" if the institution has a total risk-based capital ratio of 10.0% or greater, a CET1 ratio of 6.5% or greater, a Tier 1 risk-based capital ratio of 8.0% or greater, and a leverage ratio of 5.0% or greater, and the institution is not subject to an order, written agreement, capital directive or prompt corrective action directive to meet and maintain a specific level for any capital measure.

For further information concerning the regulatory capital requirements, actual capital amounts and the ratios of Tompkins and Tompkins Community Bank, see the discussion in "Note 19 - Regulations and Supervision" in the Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K.

Deposit Insurance

Substantially all of Tompkins Community Bank's deposits are insured up to applicable limits by the Deposit Insurance Fund ("DIF") of the FDIC and are subject to deposit insurance assessments to maintain the DIF. The Dodd-Frank Act permanently increased the maximum amount of deposit insurance to \$250,000 per deposit category, per depositor, per institution retroactive to January 1, 2008.

Tompkins Community Bank pays deposit insurance premiums to the FDIC based on assessment rates established by the FDIC. Deposit insurance premiums are based on assets. The FDIC calculates deposit insurance assessment rates for established small banks, generally those banks with less than \$10 billion of assets that have been insured for at least five years, using the CAMELS rating system and other factors. The CAMELS rating system is a supervisory rating system designed to take into account and reflect all financial and operational risks that a bank may face, including capital adequacy, asset quality, management capability, earnings, liquidity and sensitivity to market risk. To determine a bank's assessment rate, each of seven financial ratios and a weighted average of CAMELS component ratings are multiplied by a corresponding pricing multiplier. The sum of these products is added to a uniform amount, with the resulting sum being an institution's initial base assessment rate (subject to minimum or maximum assessment rates based on a bank's CAMELS composite rating). This method takes into account various measures, including an institution's leverage ratio, brokered deposit ratio, one year asset growth, the ratio of net income before taxes to total assets, and considerations related to asset quality.

On June 21, 2022, the FDIC adopted an Amended Restoration Plan and a notice of proposed rulemaking to increase the likelihood that the reserve ratio would be restored to at least 1.35% by September 30, 2028. The FDIC's Board of Directors also increased initial base deposit insurance assessment rate schedules uniformly by 2 basis points, effective in the first quarterly assessment period of 2023.

On November 16, 2023, the FDIC issued a final rule implementing a special assessment to recover the loss to the DIF arising from the protection of uninsured depositors following the closures of Silicon Valley Bank and Signature Bank. The assessment base for the special assessment is equal to a bank's estimated uninsured deposits, reported for the quarter ended December 31,

2022, adjusted to exclude the first \$5 billion in estimated uninsured deposits from the bank, or for banks that are part of a holding company with one or more subsidiary banks, at the banking organization level. The Company is not subject to the special assessment as its uninsured deposits for the December 31, 2022, reporting period, the measurement period for the special assessment, were below the \$5 billion exclusion.

Under the FDIA, the FDIC may terminate deposit insurance upon a finding that the institution has engaged in unsafe and unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC.

FDIC insurance expense totaled \$5.7 million, \$4.3 million, and \$2.8 million in 2024, 2023 and 2022, respectively.

Depositor Preference

The FDIA provides that, in the event of the "liquidation or other resolution" of an insured depository institution, such as Tompkins Community Bank, the claims of depositors of the institution, including the claims of the FDIC, as subrogee of the insured depositors, and certain claims for administrative expenses of the FDIC as receiver, will have priority over other general unsecured claims against the institution. If an insured depository institution fails, insured and uninsured depositors, along with the FDIC, will have priority in payment ahead of unsecured, non-deposit creditors, including the parent bank holding company, with respect to any extensions of credit they have made to such insured depository institutions, as well as the shareholders of the parent bank holding company, who are unlikely to recover in the event a bank holding company's sole bank subsidiary fails.

Community Reinvestment Act ("CRA")

The CRA and the regulations issued thereunder are intended to encourage banks to help meet the credit needs of their entire service area, including low- and moderate-income neighborhoods, consistent with the safe and sound operations of such banks. These regulations also provide for regulatory assessment of a bank's record in meeting the needs of its service area when considering applications to establish branches, merger applications and applications to acquire the assets and assume the liabilities of another bank. As of December 31, 2024, the Company's subsidiary bank had a CRA rating of satisfactory.

On October 24, 2023, the Federal Reserve Board, FDIC, and OCC issued a joint final rule that amends the regulations implementing the Community Reinvestment Act to better achieve the purposes of the law. The changes are designed to

- Encourage banks to expand access to credit, investment, and basic banking services in low-and moderate-income communities.
- Adapt to changes in the banking industry, including internet and mobile banking.
- Provide greater clarity, consistency, and transparency in the application of CRA regulations.
- Tailor CRA evaluations and data collection to bank size and type.

Most of the final rule's requirements have an effective date of January 1, 2026. The remaining requirements, including data reporting requirements become applicable on January 1, 2027. While the final rule is currently enjoined as to a group of trade associations while a federal court considers a lawsuit filed by those trade associations challenging the rule, the Company continues to prepare for compliance with the amendments.

Federal Securities Laws

The common stock of the Company is registered with the SEC under the Exchange Act. Therefore, the Company is subject to the reporting, information disclosure, proxy solicitation and other requirements imposed on public companies by the SEC under the Exchange Act. Additionally, Company insiders are subject to securities trading limitations and are required to file insider ownership reports with the SEC. The SEC and NYSE American have adopted regulations under the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley") and the Dodd-Frank Act that apply to the Company as an exchange-traded, public company, which seek to improve corporate governance, accounting, and reporting requirements, provide enhanced penalties for financial reporting improprieties and improve the reliability of disclosures in SEC filings. For example, the Sarbanes-Oxley requirements include: (1) requirements for audit committees, including independence and financial expertise; (2) certification of financial statements by the chief executive officer and chief financial officer of reporting companies; (3) standards for auditors and regulation of audits; (4) disclosure and reporting requirements for reporting companies and their directors and executive officers; and (5) a range of civil and criminal penalties for fraud and other violations of securities laws.

Anti-Money Laundering and the USA Patriot Act

The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"), the Bank Secrecy Act of 1970 ("BSA"), the Money Laundering Control Act of 1986, and other

federal laws, collectively impose obligations on all financial institutions, including the Company, to implement policies, procedures and controls which are reasonably designed to detect and report instances of money laundering and the financing of terrorism. The bank regulatory agencies have increased the regulatory scrutiny of the BSA and anti-money laundering programs maintained by financial institutions. Failure of a financial institution to maintain and implement adequate programs to combat money laundering and terrorist financing, or to comply with all of the relevant laws or regulations, could have serious legal and reputational consequences for the institution, including causing applicable bank regulatory authorities not to approve merger or acquisition transactions when regulatory approval is required or to prohibit such transactions even if approval is not required.

The Anti-Money Laundering Act of 2020 ("AMLA"), which amends the BSA, was enacted in January 2021. The AMLA is intended to be a comprehensive reform and modernization to U.S. bank secrecy and anti-money laundering laws. Among other things, it codifies a risk-based approach to anti-money laundering compliance for financial institutions; requires the development of standards for evaluating technology and internal processes for BSA compliance; and expands enforcement- and investigation-related authority, including increasing available sanctions for certain BSA violations and instituting BSA whistleblower incentives and protections.

Financial Privacy

The Gramm-Leach-Bliley Act of 1999 ("GLBA") requires that financial institutions implement comprehensive written information security programs that include administrative, technical and physical safeguards designed to protect consumer information. Under the GLBA, federal banking regulators adopted rules that limit the ability of banks and other financial institutions to disclose non-public information about consumers to non-affiliated third parties. These limitations require disclosure of privacy policies and certain security breaches to consumers and, in some circumstances, allow consumers to prevent disclosure of certain personal information to a non-affiliated third party. These provisions affect, among other things, how consumer information is transmitted through diversified financial companies and conveyed to outside vendors.

Office of Foreign Assets Control Regulation

The United States has imposed economic sanctions that affect transactions with designated foreign countries, designated nationals and others. These are known as the "OFAC" rules based on their administration by the U.S. Treasury Department Office of Foreign Assets Control ("OFAC"). The OFAC-administered sanctions targeting designated countries take many different forms. Generally, however, they contain one or more of the following elements: (i) restrictions on trade with or investment in a sanctioned country, including prohibitions against direct or indirect imports from and exports to a sanctioned country and prohibitions on "U.S. persons" engaging in financial transactions relating to making investments in, or providing investment-related advice or assistance to, a sanctioned country; and (ii) a blocking of assets in which the government or specially designated nationals of the sanctioned country have an interest, by prohibiting transfers of property subject to a U.S. jurisdiction (including property in the possession or control of U.S. persons). These sanctions, or other criminal networks. Blocked assets (e.g., property and bank deposits) cannot be paid out, withdrawn, set off or transferred in any manner without a license from OFAC. Failure to comply with these sanctions could have serious legal, strategic and reputational consequences, and result in civil money penalties against the Company and Tompkins Community Bank.

Consumer Protection Laws

In connection with its lending and leasing activities, Tompkins Community Bank is subject to a number of federal and state laws designed to protect borrowers and promote lending. These consumer financial laws include the Equal Credit Opportunity Act, the Fair Credit Reporting Act, the Fair and Accurate Credit Transaction Act, Electronic Funds Transfer Act, the Expedited Funds Availability Act, the Truth in Lending Act, the Truth in Savings Act, the Home Mortgage Disclosure Act, and the Real Estate Settlement Procedures Act, and similar laws at the state level. Tompkins Community Bank's failure to comply with any of the consumer financial laws can result in civil actions, regulatory enforcement action by the federal banking agencies and the U.S. Department of Justice.

Additionally, the Dodd-Frank Act established the Consumer Financial Protection Bureau ("CFPB") with broad powers to supervise and enforce consumer protection laws. The CFPB has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions, including the authority to prohibit "unfair, deceptive or abusive" acts and practices. The CFPB has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Tompkins Community Bank is required to comply with the rules of the CFPB; however, these rules are generally enforced by our primary regulator, the FDIC.

Cybersecurity

The Company is subject to data security standards and privacy and data breach notice requirements as established by federal and state regulators. See Item 1C. Cybersecurity for a detailed discussion of cybersecurity and Item 1A. Risk Factors for a discussion of risks related to cybersecurity.

Incentive Compensation

The Dodd-Frank Act required the federal bank regulatory agencies and the SEC to establish joint regulations or guidelines prohibiting incentive-based payment arrangements at specified regulated entities, such as the Company, having at least \$1 billion in total assets that encourage inappropriate risks by providing an executive officer, employee, director or principal shareholder with excessive compensation, fees, or benefits or that could lead to material financial loss to the entity. In addition, these regulators must establish regulations or guidelines requiring enhanced disclosure to regulators of incentive-based compensation arrangements. The agencies proposed such regulations in May 2016, and in May 2024 reproposed the text of the 2016 proposed regulations. If these or other regulations are adopted in a form similar to that initially proposed, they will impose limitations on the manner in which the Company may structure compensation for its executives. Given the uncertainty at this time whether or when a final rule will be adopted, management cannot determine the potential impact on the Company.

In October 2022, the SEC adopted a final rule pursuant to the Dodd-Frank Act directing the national securities exchanges and associations, including the NYSE American LLC, on which the Company's stock is listed for trading, to implement listing standards that require listed companies to adopt policies mandating the recovery or "clawback" of incentive-based, executive compensation in connection with accounting restatements due to material noncompliance with federal securities laws. The NYSE American's listing standards pursuant to the SEC's rule became effective in October 2023. The Company has adopted a clawback policy that is intended to comply with the NYSE American listing standards. The Company's rights under this policy to recover excess incentive compensation are in addition to any other remedies available to the Company under applicable law, policy or agreement, including without limitation those rights described under Section 304 of Sarbanes-Oxley.

Additionally, the FRB, OCC and FDIC have issued comprehensive final guidance on incentive compensation policies intended to ensure that the incentive compensation policies of banking organizations do not undermine the safety and soundness of such organizations by encouraging excessive risk-taking. The guidance, which covers all employees that have the ability to materially affect the risk profile of an organization, either individually or as part of a group, is based upon the key principles that a banking organization's incentive compensation arrangements should (i) provide incentives that do not encourage risk-taking beyond the organization's ability to effectively identify and manage risks, (ii) be compatible with effective internal controls and risk management, and (iii) be supported by strong corporate governance, including active and effective oversight by the organization's board of directors. Management believes the current and past compensation practices of the Company do not encourage excessive risk taking or undermine the safety and soundness of the organization.

The FRB reviews, as part of the regular, risk-focused examination process, the incentive compensation arrangements of banking organizations, such as the Company, that are not "large, complex banking organizations." The findings of the supervisory initiatives are included in reports of examination and deficiencies can lead to limitations on the Company's abilities and even enforcement actions.

The Company is also subject to the NYSDFS' "Guidance on Incentive Compensation Arrangements," applicable to all New York state regulated banks (including Tompkins Community Bank), which provides that incentive compensation may not be tied to employee performance indicators unless the bank has effective risk management, oversight and control systems in place. We believe the Company is compliant with all applicable state and federal regulations regarding incentive compensation.

Climate-Related Risk and Disclosure

In recent years, federal, state and international lawmakers and regulators have increased their focus on financial institutions' and other companies' risk oversight, disclosures and practices in connection with climate change and other environmental, social and governance ("ESG") matters. For example, in March 2024, the SEC issued a final rule which would require public issuers, including us, to significantly expand the scope of climate-related disclosures in their SEC filings. However, on April 4, 2024, the SEC issued a stay of the final rule pending the completion of judicial review of petitions seeking review of the final rules, and as of the date of this Report, the SEC's stay of the final rule remained in place.

On October 21, 2021, the Financial Stability Oversight Council published a report identifying climate-related financial risks as an "emerging threat" to financial stability. On October 24, 2023, the OCC, the FDIC and the Federal Reserve jointly finalized principles for climate-related financial risk management for national banks with more than \$100 billion in total assets. Although these risk management principles do not apply to Tompkins directly based upon our current size, the OCC has indicated that all banks, regardless of their size, may have material exposures to climate-related financial and other risks that require prudent

management. As climate-related supervisory guidance is formalized, and relevant risk areas and corresponding control expectations are further refined, we may be required to expend significant capital and incur compliance, operating, maintenance and remediation costs in order to conform to such requirements.

Other Governmental Initiatives

From time to time, legislative and regulatory initiatives are introduced in Congress and state legislatures, as well as by regulatory authorities. These initiatives may include proposals to expand or contract the powers of bank holding companies and depository institutions, proposals to change the financial institution regulatory environment, or proposals that affect public companies generally. Such legislation could change banking laws and the operating environment of Tompkins in substantial, but unpredictable ways. We cannot predict whether any such legislation will be enacted, and, if enacted, the effect that it, or any implementing regulations would have on our financial condition or results of operations.

Employees and Human Capital

Tompkins' culture is underpinned by its core values, including a commitment to our employees. As of December 31, 2024, the Company had 1,011 total employees, which included 941 full-time employees and 70 part-time and temporary employees. Of the Company's total employees, 846 are employed by Tompkins Community Bank, and 165 employees are employed by our subsidiary Tompkins Insurance Agencies, Inc. No employees are covered by a collective bargaining agreement, and the Company believes its employee relations are excellent.

The Company's demand for qualified candidates at all levels of its organization grows as the Company's business grows. In 2024, Tompkins' centralized Talent Acquisition Team reported challenges in recruiting and retaining qualified talent in our insurance sales positions due to competition for a limited number of experienced individuals. The Company is also mindful of macroeconomic factors impacting the financial services industry, such as inflation and continued low unemployment in all four of its markets, and it routinely undertakes a salary and benefit review to confirm that its total compensation is aligned with the market.

A key component of the Company's recruitment and retention strategy is to offer employees at all levels the opportunity to participate in the Company's success. The Company maintains a robust Profit-Sharing plan for all employees who meet minimum service requirements. As of December 31, 2024, 84% of all employees received a profit-sharing contribution during 2024. The Company also offers incentive and/or equity compensation plans or programs to employees at many levels of the Company and, as of December 31, 2024, 55% of all employees had an opportunity to earn supplemental compensation reflective of their position and overall contributions towards the Company's strategic objectives. Another important tool in the Company's recruiting and retention strategy is the availability of a remote or hybrid scheduling option for the majority of team members. As of the date of this report, just under half of the Company's employees have taken advantage of this opportunity.

The Company continues to broaden the scope of its talent development initiatives across its geographically diverse footprint in order to sustain a value-driven and growth-oriented environment where employees can perform at their peak and the next generation of leaders are prepared to lead. The Company offers an array of programs including continuing education dedicated to strengthen employee engagement, personal accountability, productivity, and emotional well-being including customized programs, growth-focused coaching sessions, career-path roadmaps, curated learning resources and tuition assistance. The Company provides a blend of in person and virtual learning environments to ensure opportunities are available to all team members across its footprint. The Company also has a robust talent review and succession process. Significant time is spent at the Senior Leadership and Management level identifying and providing development for potential successors.

The Company strives to promote a culture where all people feel welcome to be our customers, employees, directors, and shareholders. Our leadership team sponsors initiatives and events that recognize and engage our employees, and strengthen our employees' sense of belonging within our organization. These initiatives include educational opportunities, celebrating cultural events, and sponsoring local teams that enhance our employee engagement. These Local Acorn Community Alliance teams were established in each of the Company's markets to support our external service efforts, through their focus on providing education and volunteering opportunities that meet the needs of their local communities.

Available Information

The Company maintains a website at www.tompkinsfinancial.com. The Company makes available free of charge through its website its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, its proxy statements related to its shareholders' meetings, and amendments to these reports or statements, filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as soon as reasonably practicable after the Company electronically files such material with, or furnishes such material to, the SEC. Copies of these reports are also available at no charge to any person who requests them, with such requests directed to Tompkins Financial Corporation, Investor Relations Department, P.O. Box 460, Ithaca, New

York 14851, telephone no. (888) 503-5753. The SEC maintains an Internet website that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC, including material filed by the Company, at www.sec.gov. The information contained on the Company's website is provided for the information of the reader and they are not intended to be active links. The Company is not including the information contained on the Company's website as a part of, or incorporating it by reference into, this Annual Report on Form 10-K, or into any other report filed with or furnished to the SEC by the Company.

Item 1A. Risk Factors

The Company's success depends on management's ability to identify and manage the risks inherent in its financial services business. These risks include credit risk, market risk, liquidity risk, operational risk, regulatory, compliance and legal risk, and strategic risk. We list below the material risks we face. Any of these risks could result in a material adverse impact on the Company's business, operating results, financial condition, liquidity, and cash flow, or may cause the Company's results to vary materially from recent results, or from the results implied by any forward-looking statements made by the Company.

Credit Risk

The Company is subject to increased business risk because the Company has a significant concentration of commercial real estate and commercial business loans, repayment of which is often dependent on the cash flows of the borrower.

The Company offers different types of commercial loans to a variety of businesses, and we believe commercial loans will continue to comprise a significant concentration of our loan portfolio in 2025 and beyond. Real estate lending is generally considered to be collateral-based lending with loan amounts based on predetermined loan-to-collateral values. As such, declines in real estate valuations in the Company's market area would lower the value of the collateral securing these loans. Additionally, the Company has experienced, and expects to continue experiencing, increased competition in commercial real estate lending. This increased competition may inhibit the Company's ability to generate additional commercial real estate loans or maintain its current inventory of commercial real estate loans. The Company's commercial business loans are made based primarily on the cash flow and creditworthiness of the borrower and secondarily on the underlying collateral provided by the borrower, with liquidation of the underlying real estate collateral being viewed as the primary source of repayment in the event of borrower default. The borrowers' cash flow may be difficult to predict, and collateral securing these loans may fluctuate in value. Although commercial business loans are often collateralized by equipment, inventory, accounts receivable, or other business assets, the liquidation of collateral in the event of default is often an insufficient source of repayment. As of December 31, 2024, commercial and commercial real estate loans totaled \$4.3 billion or 72.2% of the Company's total loans.

The Company's agricultural loans are often dependent upon the health of the agricultural industry in the location of the borrower, and the ability of the borrower to repay may be affected by many factors outside of the borrower's control.

As part of the Company's commercial business lending activities, the Company originates agricultural loans, consisting of agricultural real estate loans and agricultural operating loans. As of December 31, 2024, \$327.6 million or 5.4% of the Company's total loan portfolio consisted of agriculturally-related loans, including \$217.6 million in agricultural real estate loans and \$110.0 million in agricultural operating loans. Payments on agricultural loans are dependent on the profitable operation or management of the related farm property. The success of the farm may be affected by many factors outside the control of the borrower, including adverse weather conditions that prevent the planting of a crop or limit crop yields (such as wind, hail, drought and floods), loss of livestock due to disease or other factors, declines in market prices for agricultural regulations). Many farms are dependent upon a limited number of key individuals whose injury or death may significantly affect the successful operation of the farm. If the cash flow from a farming operation is diminished, the borrower's ability to repay the loan may be impaired. While agricultural operating loans are generally secured by a blanket lien on the farm's operating assets, any repossessed collateral in respect of a defaulted loan may not provide an adequate source of repayment of the outstanding balance.

Additionally, the profitable operation or management of the related farm properties, and the value thereof, is impacted by changes in U.S. government trade policies. Tariffs, retaliatory tariffs or other trade restrictions on products and materials that farm properties related to our agriculturally-related loans import or export could cause the costs of such farm operations and management to increase, the price of products from such farm operations to increase, demand for such products to decrease and the margins on such products to decrease. Such potential adverse effects on related farm property operations and management could reduce the related farm properties' revenues, financial results and ability to service debt, which, in turn, could adversely affect our financial condition and results of operations. In addition, to the extent changes in the political environment have a

negative impact on us or on the markets in which we operate, our business, results of operations and financial condition could be materially and adversely impacted in the future.

The Company could be subject to environmental risks and associated costs on real estate properties owned by the Company, real estate properties that collateralize the Company's loans or real estate properties that the Company obtains title to.

The Company owns various properties used in the operation of its business. In addition, from time to time, the Company forecloses on properties or may be deemed to become involved in the management of its borrowers' properties. The Company could be subject to environmental liabilities imposed by applicable federal and state laws with respect to any of these properties. For example, we may be held liable to a government entity or to third parties for property damage, personal injury, investigation and clean-up costs incurred by these parties in connection with environmental contamination, or may be required to clean up hazardous or toxic substances, or chemical releases, at a property, or may be subject to common law claims by third parties for damages and costs resulting from environmental contamination emanating from the property. Additionally, a significant portion of our loan portfolio at December 31, 2024 was secured by real estate and, if the real estate securing our assets is subject to environmental liability, our collateral position may be substantially weakened. Any such environmental liabilities imposed on the Company could have a material adverse impact on the Company's financial condition or results of operations.

Market Risk

The Company's business and financial performance are impacted significantly by market interest rates and movements in those rates. The monetary, tax and other policies of governmental agencies, including the Federal Reserve, have a significant impact on interest rates and overall financial market performance over which the Company has no control and which the Company may not be able to anticipate adequately.

As a result of the high percentage of the Company's assets and liabilities that are in the form of interest-bearing or interestrelated instruments, changes in interest rates, in the shape of the yield curve or in spreads between different market interest rates, can have a material effect on the Company's business and profitability and the value of the Company's assets and liabilities. For example, changes in interest rates or interest rate spreads may:

- affect the difference between the interest that the Company earns on assets and the interest that the Company pays on liabilities, which impacts the Company's overall net interest income and profitability;
- adversely affect the ability of borrowers to meet obligations under variable or adjustable rate loans and other debt instruments, which in turn, affects the Company's loss rates on those assets;
- decrease the demand for interest rate-based products and services, including loans and deposits; and
- affect prepayment rates on the Company's loans and securities, which could adversely affect the Company's earnings, financial condition and cash flow.

The monetary, tax and other policies of the Federal government and its agencies, including the Federal Reserve, have a significant impact on interest rates and overall financial market performance. These governmental policies can thus affect the activities and results of operations of banking organizations such as the Company. An important function of the Federal Reserve is to regulate the national supply of bank credit and certain interest rates. The actions of the Federal Reserve influence the rates of interest that the Company charges on loans and that the Company pays on borrowings and interest-bearing deposits and can also affect the value of the Company's on-balance sheet and off-balance sheet financial instruments. Also, due to the impact on rates for short-term funding, the Federal Reserve's policies influence, to a significant extent, the Company's cost of such funding. The Company cannot predict the nature or timing of future changes in monetary, tax and other policies or the effect that they may have on the Company's business activities, financial condition and results of operations.

For information about how the Company manages its interest rate risk, refer to Part II, Item 7A, "Quantitative and Qualitative Disclosures About Market Risk" of this Report.

Adverse developments affecting the banking industry, and resulting media coverage, have contributed to market volatility and regulatory scrutiny in the banking system and have negatively impacted the Company's results of operations and/or stock price, and such adverse effects on the Company could recur or continue.

Adverse events affecting the financial services industry generally, including bank failures, has caused decreased confidence in the banking system among investors, customers and counterparties, which has generated market volatility among publicly traded bank holding companies. Uncertainty and concern regarding soundness or creditworthiness of other financial institutions has been, and may be in the future, compounded by advances in technology that increase the speed at which deposits can be moved, as well as the speed and reach of media attention, including social media, and its ability to disseminate concerns or rumors, in each case potentially exacerbating liquidity concerns and market disruption within the financial services industry. Such events have, and any future events could, adversely impact the market price and volatility of the Company's common stock.

Additionally, high profile bank failures and other events affecting the banking industry have resulted in, and may continue to result in, potentially adverse changes to laws and regulations governing banks and bank holding companies or increased supervisory or enforcement activities, including higher capital requirements or FDIC insurance assessments or special assessments. Any of these changes could have a material impact on our business, financial condition and results of operations.

Declines in asset values may result in impairment charges and may adversely affect the value of the Company's results of operations, financial condition and cash flows.

A majority of the Company's investment portfolio is comprised of securities which are collateralized by residential mortgages. These residential mortgage-backed securities include securities of U.S. government agencies, U.S. government-sponsored entities, and private-label collateralized mortgage obligations. The Company's securities portfolio also includes obligations of U.S. government-sponsored entities, obligations of states and political subdivisions thereof, U.S. corporate debt securities and equity securities. A more detailed discussion of the investment portfolio, including types of securities held, the carrying and fair values, and contractual maturities, is provided in the Notes to Consolidated Financial Statements in Part II, Item 8 of this Report. Gains or losses on these instruments may have a direct impact on our results of operations, including higher or lower income and earnings, unless we adequately hedge our positions. The fair value of investments may be affected by factors other than the underlying performance of the issuer or composition of the obligations themselves, such as rating downgrades, adverse changes in the business climate, a lack of liquidity for resale of certain investment securities and changes in interest rates. For example, decreases in interest rates and increases in mortgage prepayment speeds, which are influenced by interest rates and other factors, could adversely impact the value of our securities collateralized by residential mortgages, causing a significant acceleration of purchase premium amortization on our mortgage portfolio because a decline in long-term interest rates shortens the expected lives of the securities. Conversely, increases in interest rates may result in a decrease in residential mortgage loan originations and mortgage prepayment speeds, directly impacting the value of these securities collateralized by residential mortgages. Management evaluates investment securities for expected credit-related impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Any impairment that is not credit related is recognized in other comprehensive income (loss), net of applicable taxes. Credit-related impairment is recognized as an allowance for credit losses on the Company's Consolidated Statements of Condition, limited to the amount by which the amortized cost basis exceeds the fair value, with a corresponding adjustment to earnings.

The Company's business may be adversely affected by general economic conditions in local and national markets, the possibility of the economy's return to recessionary conditions and the possibility of further turmoil or volatility in the financial markets.

General economic conditions impact the banking and financial services industry. The U.S. and global economies have experienced volatility in recent years and may continue to do so for the foreseeable future. There can be no assurance that economic conditions will not deteriorate. Unfavorable or uncertain economic conditions can be caused by many macro and micro factors, including declines in economic growth, business activity or investor or business confidence, limitations on the availability or increases in the cost of credit and capital, increases in inflation or interest rates, the timing and impact of changing governmental policies, and the impact of widespread protests, civil unrest, wars, pandemics and other public health crises. The Company is particularly affected by U.S. domestic economic conditions, including U.S. interest rates, the unemployment rate, housing prices, the level of consumer confidence, changes in consumer spending, the number of personal bankruptcies and other factors. A decline in U.S. domestic business and economic conditions, without rapid recovery, could have adverse effects on our business, including the following:

- consumer and business confidence levels could be lowered and cause declines in credit usage, adverse changes in
 payment patterns, decreases in demand for loans or other financial products and services and decreases in deposits or
 investments in accounts with Company;
- the Company's ability to assess the creditworthiness of its customers may be impaired if the models and approaches the Company uses to select, manage and underwrite its customers become less predictive of future behaviors;
- demand for and income received from the Company's fee-based services, including investment services and insurance commissions and fees, could decline, the cost to the Company to provide any or all products and services could increase, and the levels of assets under management could materially impact revenues from our trust and wealth management businesses; and
- the credit quality or value of loans and other assets or collateral securing loans may decrease.

The Company's business is concentrated in and largely dependent upon the continued growth and welfare of the general geographic markets in which we operate.

The Company's operations are heavily concentrated in New York State and, to a lesser extent, Pennsylvania and, as a result, the Company's financial condition, results of operations and cash flows are significantly impacted by changes in the economic conditions in those areas. Therefore, the Company's financial performance generally, and in particular, the ability of borrowers to pay interest on and repay the principal of outstanding loans and the value of collateral securing these loans, is highly dependent upon the business environment in the markets where the Company operates, particularly New York State and Pennsylvania. The Company's success depends to a significant extent upon the business activity, population, income levels, deposits and real estate activity in these markets. Although our clients' business and financial interests may extend well beyond these markets, adverse economic conditions that affect these markets could disproportionately reduce the Company's growth rate, affect the ability of the Company's financial condition and results of operations. Because of the Company's geographic concentration, we are less able than other regional or national financial institutions to diversify our credit risks across multiple markets. For additional information on the Company's market area, see Part I, Item 1, "Business" of this Report on Form 10-K.

Liquidity Risk

The Company's funding sources may prove insufficient to replace deposits and support future growth.

The Company must maintain sufficient cash flow and liquid assets to satisfy current and future financial obligations, including demand for loans and deposit withdrawals, funding operating costs, and for other corporate purposes. As a part of our liquidity management, we use a number of funding sources in addition to core deposit growth and repayments and maturities of loans and investments. As we continue to grow, we are likely to become more dependent on these sources, which may include various short-term and long-term wholesale borrowings, including Federal funds purchased and securities sold under agreements to repurchase, brokered certificates of deposit, proceeds from the sale of loans, and borrowings from the FHLBNY and others. We also maintain available lines of credit with the FHLBNY that are secured by loans. Adverse operating results or changes in industry conditions could make it difficult or impossible for us to access these additional funding sources and could make our existing funds more volatile. Our financial flexibility could be materially constrained if we are unable to maintain access to funding or if adequate financing is not available to accommodate future growth at acceptable interest rates. If we are required to rely more heavily on more expensive funding sources to support future growth, our revenues may not increase proportionately to cover our costs. In that case, our operating margins and profitability would be adversely affected. Further, the volatility inherent in some of these funding sources, particularly brokered deposits, may increase our exposure to liquidity risk. Any interruption in these sources of liquidity when needed could adversely affect our results of operations, financial condition, cash flow or regulatory capital levels. In addition, reduced liquidity could result from circumstances beyond our control, such as general market disruptions or operational problems that affect us or third parties. Management's efforts to closely monitor our liquidity position for compliance with internal policies may not be successful or sufficient to deal with dramatic or unanticipated reductions in liquidity.

The Company's liquidity may be adversely affected by the soundness of other financial institutions.

Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships. The Company has exposure to many different industries and counterparties, and routinely executes transactions with counterparties in the financial services industry. The most important counterparty for the Company, in terms of liquidity, is the Federal Home Loan

Bank of New York ("FHLBNY"). The Company uses FHLBNY as its primary source of overnight funds and also has long-term advances and repurchase agreements with FHLBNY. The Company is required to maintain sufficient collateral in the form of commercial and residential real estate loans at FHLBNY. In addition, the Company is required to hold stock in FHLBNY. The amount of borrowed funds and repurchase agreements with the FHLBNY, and the amount of FHLBNY stock held by the Company, at its most recent fiscal year-end are discussed in Part II, Item 8 of this Report on Form 10-K.

There are 11 branches of the FHLB, including New York. The FHLBNY is jointly and severally liable along with the other FHLBs for the consolidated obligations issued on behalf of the FHLBs through the Office of Finance. Dividends on, redemption of, or repurchase of shares of the FHLBNY's capital stock cannot occur unless the principal and interest due on all consolidated obligations have been paid in full. If another FHLB were to default on its obligation to pay principal or interest on any consolidated obligations, the Federal Home Loan Finance Agency (the "Finance Agency") may allocate the outstanding liability among one or more of the remaining Federal Home Loan Banks on a pro rata basis or on any other basis the Finance Agency may determine. As a result, the FHLBNY's ability to pay dividends on, to redeem, or to repurchase shares of capital stock could be affected by the financial condition of one or more of the other Federal Home Loan Banks. Any such adverse effects on the FHLBNY could adversely affect our liquidity and the value of our investment in FHLBNY common stock, and could negatively impact our results of operations.

Systemic weakness in the FHLB system could result in higher costs of FHLB borrowings, reduced value of FHLB stock, and increased demand for alternative sources of liquidity that are more expensive, such as brokered time deposits, the discount window at the Federal Reserve, or lines of credit with correspondent banks. Any of these scenarios could adversely affect our liquidity, the value of our investment in FHLB common stock and our financial condition.

A decline in the value of our goodwill and other intangible assets could adversely affect our financial condition and results of operations.

As of December 31, 2024, the Company had \$94.8 million of goodwill and other intangible assets. The Company is required to test its goodwill and intangible assets for impairment on a periodic basis. A significant decline in the Company's expected future cash flows, a significant adverse change in business climate, slower growth rates or a significant and sustained decline in the price of the Company's common stock, may necessitate our taking charges in the future related to the impairment of the Company's goodwill and intangible assets. If we make an impairment determination in a future reporting period, the Company's earnings and the book value of these intangible assets would be reduced by the amount of the impairment. Further, a goodwill impairment charge could significantly restrict the ability of our banking subsidiary to make dividend payments to us without prior regulatory approval, which could have a material adverse effect on our financial condition and results of operations.

The Company relies on cash dividends from its subsidiaries to fund its operations, and payment of those dividends could be discontinued at any time.

The Company is a financial holding company whose principal assets and sources of income are its wholly-owned subsidiaries. The Company is a separate and distinct legal entity from its subsidiaries, and therefore the Company relies primarily on dividends from its subsidiaries to meet its obligations and to provide funds for the payment of dividends to the Company's shareholders, to the extent declared by the Company's board of directors. Various federal and state laws and regulations limit the amount of dividends that a bank may pay to its parent company and impose regulatory capital and liquidity requirements on the Company and its banking subsidiary. Further, as a holding company, the Company's right to participate in a distribution of assets upon the liquidation or reorganization of a subsidiary is subject to the prior claims of the subsidiary's creditors (including, in the case of the Company's banking subsidiary, the bank's depositors). If the Company were unable to receive dividends from its subsidiaries it would materially and adversely affect the Company's liquidity and its ability to service its debt, pay its other obligations, or pay cash dividends on its common stock.

Operational Risks

The Company has been, and may continue to be, adversely affected by fraud.

As a financial institution, the Company is inherently exposed to operational risk in the form of theft and other fraudulent activity by employees, customers and other third parties targeting the Company and/or the Company's customers or data. Such activity may take many forms, including check fraud, electronic fraud, wire fraud, phishing, social engineering and other dishonest acts. Although the Company devotes substantial resources to maintaining effective policies and internal controls to

identify and prevent such incidents, given the increasing sophistication of possible perpetrators, the Company may experience financial losses or reputational harm as a result of fraud. Fraudulent activity could have a material adverse effect on the Company's business, financial condition and results of operations.

A breach of information or other technological security, including as a result of cyber-attacks, could have a material adverse effect on our business, financial condition and results of operations.

In the ordinary course of business, we rely on electronic communications and information systems, both internally and as provided by third parties, including our customers, to conduct our operations and to store, process, and/or transmit sensitive data on a variety of computing platforms and networks and over the Internet. We cannot be certain that all of our systems, or third-party systems upon which we rely, are free from vulnerability to attack or other technological difficulties or failures. Information security breaches and cybersecurity related incidents may include attempts to access information, including customer and company information, malicious code, computer viruses, phishing, denial of service attacks and other means of intrusion that could result in unauthorized access, misuse, loss or destruction of data (including confidential customer, employee and company information), account takeovers, and disruption of service or other functionality. These types of threats may derive from human error, fraud or malice on the part of external or internal parties, or may result from accidental technological failure. If information security is breached or difficulties or failures occur, despite the controls we and our third-party vendors have instituted, information may be lost or misappropriated or we and/or our customers may experience a disruption in essential service or operations. Any of the foregoing events could result in financial loss or costs, reputational harm or damages and litigation, regulatory investigation costs or remediation costs to us or others. Any of these consequences could have a material adverse effect on our financial condition and results of operations.

The pervasive and ongoing risk of cybersecurity threats and incidents could have a material adverse effect on our business, financial condition and results of operations.

The risk of a security breach or disruption, particularly through cyber-attack or cyber intrusion, has significantly increased, in part due to the expansion of new technologies, the increased use of the internet and mobile services and the increased intensity and sophistication of attempted attacks and intrusions from around the world. The threat from cyber-attacks is severe, attacks are sophisticated and increasing in volume, and attackers respond rapidly to changes in defensive measures. Breach attempts or other disruptions are constantly evolving and generally are not recognized until launched against a target, and in some cases are designed not to be detected and, in fact, may not be detected. Accordingly, we may be unable to anticipate these techniques or to implement adequate security barriers or other preventative measures. Our systems and those of our customers and third-party service providers are under constant threat and it is possible that we could experience a significant event in the future. Our technologies, systems, networks and software, and those of other financial institutions have been, and are likely to continue to be, the target of cybersecurity threats and attacks, which may range from uncoordinated individual attempts to sophisticated and targeted measures directed at us. Risks and exposures related to cybersecurity attacks are expected to remain high for the foreseeable future due to the rapidly evolving nature and sophistication of these threats as well as the expanding use of Internet banking, mobile banking and other technology-based products and services by us and our customers. Publicized information concerning security and cyber-related problems could cause us to incur reputational harm and discourage customers from using our electronic or web-based applications or solutions, which could harm their utility as a means of conducting commercial transactions. In addition, while we maintain specific "cyber" insurance coverage, which may apply in the event of many breach scenarios, the amount of coverage may not be adequate in any particular case. Furthermore, because cyber threat scenarios are inherently difficult to predict and can take many forms, some breaches may not be addressed and covered under our cyber insurance coverage, or even if covered, our coverage may not be sufficient. As cyber threats continue to evolve, we have been and may continue to be required to expend significant additional resources to modify our protective measures or to investigate and remediate any information security vulnerabilities, which may negatively impact our business, financial condition and results of operations.

The Company's business requires the collection and retention of large volumes of sensitive data, which is subject to extensive regulation and oversight and exposes our business to additional risks.

The Company, in its ordinary course of business, collects and retains large volumes of customer data, including personally identifiable information in various information systems that we maintain and in those maintained by third parties with whom we contract to provide data services. The Company also maintains important internal Company data such as personally identifiable information about its employees and information relating to operations. Customers and employees have been, and will continue to be, targeted by cybersecurity threats attempting to misappropriate confidential information such as passwords, bank account

information or other personal or business information. The Company's attempts to mitigate these threats may not be successful as cybercrimes are complex and continue to evolve.

A security breach or other significant disruption of our information systems or those related to our customers, merchants and our third-party vendors, including as a result of cyber-attacks and/or human error could result in the unauthorized access to, and destruction, loss, theft, misappropriation or release of confidential, sensitive or otherwise valuable information of ours or our customers. Unauthorized access and/or disclosure of the confidential information of ours or our customers could (i) result in a violation of applicable privacy, data breach and other laws, subjecting us to additional regulatory scrutiny and exposing us to civil litigation, governmental action and possible financial liability; (ii) require significant management attention and resources to remedy the damages that result; and/or (iii) harm our reputation and/or cause a decrease in the number of customers that choose to do business with us. The occurrence of any of the foregoing could have a material adverse effect on our business, financial condition and results of operations.

The Company's operations may be adversely affected if its external vendors do not perform as expected or if its access to third-party services is interrupted.

The Company relies on certain external vendors to provide products and services necessary to maintain the day-to-day operations of the Company. Some of the products and services provided by vendors include key components of our business infrastructure including data processing and storage and internet connections and network access, among other products and services. Accordingly, the Company's operations are exposed to the risk that these vendors will not perform in accordance with the contracted arrangements or under service level agreements. The failure of an external vendor to perform in accordance with the contracted arrangements or under service level agreements, because of changes in the vendor's organizational structure, financial condition, support for existing products and services for our vendors' services and products quickly and cost-effectively, the failures of our vendors could have a material adverse impact on the Company's business and, in turn, the Company's financial condition and results of operations.

Additionally, our information technology and telecommunications systems interface with and depend on third-party systems, and we could experience service denials if demand for such services exceeds capacity or such third-party systems fail or experience interruptions. If sustained or repeated, a system failure or service denial could result in a deterioration of our ability to process new and renewal loans, gather deposits and provide customer service, compromise our ability to operate effectively, damage our reputation, result in a loss of customer business and subject us to additional regulatory scrutiny and possible financial liability, any of which could have a material adverse effect on our financial condition and results of operations.

Climate change could have a material negative impact on the Company and clients.

The Company's business, as well as the operations and activities of our clients, could be negatively impacted by climate change. Climate change presents both immediate and long-term risks to the Company and its clients, and these risks are expected to increase over time. Climate change presents multi-faceted risks, including: operational risk from the physical effects of climate events on the Company and its clients' facilities and other assets; credit risk from borrowers with significant exposure to climate risk; transition risks associated with the transition to a less carbon-dependent economy; and reputational risk from stakeholder concerns about our practices related to climate change, the Company's carbon footprint, and the Company's business relationships with clients who operate in carbon-intensive industries.

Federal and state banking regulators and supervisory authorities, investors, and other stakeholders have increasingly viewed financial institutions as important in helping to address the risks related to climate change both directly and with respect to their clients, which may result in financial institutions coming under increased pressure regarding the disclosure and management of their climate risks and related lending and investment activities. Given that climate change could impose systemic risks upon the financial sector, either via disruptions in economic activity resulting from the physical impacts of climate change or changes in policies as the economy transitions to a less carbon-intensive environment, the Company may face regulatory risk of increasing focus on the Company's resilience to climate-related risks, including in the context of stress testing for various climate stress scenarios. Ongoing legislative or regulatory uncertainties and changes regarding climate risk management and practices have and may continue to result in higher regulatory, compliance, credit, and reputational risks and costs.

With the increased importance and focus on climate change, we are making efforts to enhance our governance of climate change-related risks and integrate climate considerations into our risk governance framework. Nonetheless, the risks associated

with climate change are rapidly changing and evolving in an escalating fashion, making them difficult to assess due to limited data and other uncertainties. We could experience increased expenses resulting from strategic planning, litigation, and technology and market changes, and reputational harm as a result of negative public sentiment, regulatory scrutiny, and reduced investor and stakeholder confidence due to our response to climate change and our climate change strategy, which, in turn, could have a material negative impact on our business, results of operations, and financial condition.

The Company's insurance agency subsidiary's commission revenues are based on premiums set by insurers and any decreases in these premium rates could adversely affect its operations and revenues.

The Company's insurance agency subsidiary, Tompkins Insurance, derives the bulk of its revenue from commissions paid by insurance underwriters on the sale of insurance products to clients. Tompkins Insurance does not determine the insurance premiums on which its commissions are based. Insurance premiums are cyclical in nature and may vary widely based on market conditions. As a result, insurance brokerage revenues and profitability can be volatile. Revenue from insurance commissions and fees could be negatively affected by fluctuations in insurance premiums and other factors beyond the Company's control, including changes in laws and regulations impacting the healthcare and insurance markets. In addition, there have been and may continue to be various trends in the insurance industry toward alternative insurance markets including, among other things, increased use of self-insurance, captives, and risk retention groups. Even if Tompkins Insurance is able to participate in these activities, it is unlikely to realize revenues and profitability as favorable as those realized from our traditional brokerage activities. The Company cannot predict the timing or extent of future changes in premiums and thus commissions. As a result, the Company cannot predict the effect that future premium rates will have on its operations. Decreases in premium rates could adversely affect its operations and revenues.

Legal, Compliance and Regulatory Risks

The Company operates in a highly regulated environment and may be adversely impacted by current or future laws and regulations due to increased compliance costs, potential fines for noncompliance, and restrictions on our ability to offer products or buy or sell businesses.

The Company is subject to extensive state and federal laws and regulations, supervision and legislation that affect how it conducts its business. The majority of these laws and regulations are for the protection of consumers, depositors and the deposit insurance fund. The regulations influence such things as the Company's lending practices, capital structure, investment practices, and dividend policy. The Dodd-Frank Act, which established the CFPB and enacted other reforms, has had, and may continue to have, a significant effect on the entire financial services industry. Compliance with these regulations and other initiatives negatively impacts revenue and increases our cost of doing business on an ongoing basis. Any new regulatory agenda could bring new or changed regulatory requirements and enforcement priorities, which could necessitate changes to the Company's businesses, result in increased compliance costs and affect the profitability of such businesses. Refer to "Supervision and Regulation" in Part I, Item 1 - "Business" of this Report on Form 10-K for additional information on material laws and regulations impacting the Company's businesse.

Financial institutions have become subject to increased scrutiny, more intense supervision and regulation, and more supervisory findings and actions. Banking regulators are authorized to take supervisory actions that may restrict or limit a financial institution's activities. Regulatory restrictions on our activities could adversely affect our costs and revenues, and may impair our ability to execute our strategic plans. In addition, if our regulators identify a compliance failure, we may be assessed a fine, prohibited from completing a strategic acquisition or divestiture, or subject to other actions imposed by the regulatory authorities. The recent regulatory activity and increased scrutiny have resulted, and may continue to result, in increases in our costs of doing business, and could result in decreased revenues and net income, reduce our ability to effectively compete to attract and retain customers, or make it less attractive for us to continue providing certain products and services. Any future changes in federal or state law and regulations, as well as the interpretations and implementations, or modifications or repeals, of such laws and regulations, could have a material adverse effect on our business, financial condition or results of operations.

The Company may be exposed to regulatory sanctions or liability if we do not timely detect and report money laundering or other illegal activities.

We are required to comply with anti-money laundering and anti-terrorism laws applicable to financial institutions. These laws and regulations require us, among other things, to enact policies and procedures to verify the identity of our customers, and to report suspicious transactions to regulatory agencies. These laws and regulations are complex and compliance with them requires costly, sophisticated monitoring systems and qualified personnel. The bank regulatory agencies have increased the regulatory scrutiny of the anti-money laundering programs maintained by financial institutions. The policies and procedures that we have adopted in order to detect and prevent such illegal transactions may not be successful in eliminating all instances of such transactions. To the extent we fail to fully comply with applicable laws and regulations, we face the possibility of fines or other penalties, such as restrictions on our business activities, and we may also suffer reputational harm, all of which could have a material adverse effect on our business, results of operations and financial condition. Refer to "Supervision and Regulation" in Part I, Item 1 - "Business" of this Report on Form 10-K for additional information on anti-money laundering and anti-terrorism laws impacting the Company's business.

We will be subject to heightened regulatory requirements if we exceed \$10 billion in total consolidated assets.

Based on our historical growth rates and current size, it is possible that our total assets could exceed \$10 billion in the future. Our total consolidated assets as of December 31, 2024 were \$8.1 billion. The Dodd-Frank Act and its implementing regulations impose enhanced supervisory requirements on bank holding companies with more than \$10 billion in total consolidated assets.

In addition to the additional regulatory requirements that we will become subject to if we cross this asset threshold, federal financial regulators may require the Company to, or the Company may proactively, take actions to prepare for compliance with such increased regulations before we exceed \$10 billion in total consolidated assets. We may, therefore, incur significant compliance costs in an effort to ensure compliance although we have not reached \$10 billion in total consolidated assets. These additional compliance costs, if they occur, may adversely affect our business, results of operations and financial condition.

The Company is or may become involved in lawsuits, legal proceedings, information-gathering requests, and investigations by governmental agencies or other parties that may lead to adverse consequences.

The Company's primary business of financial services involves substantial risk of legal liability. The Company and its subsidiaries are, from time to time, named or threatened to be named as defendants in various lawsuits arising from their respective business activities, including activities of companies they have acquired. In addition, from time to time, the Company is, or may become, the subject of governmental and self-regulatory agency information-gathering requests, reviews, investigations and proceedings and other forms of regulatory inquiry, including by bank regulatory agencies, the SEC and law enforcement authorities. The results of such proceedings could lead to delays in or prohibition to acquire other companies, significant penalties, including monetary penalties, damages, adverse judgments, settlements, fines, injunctions, restrictions on the way in which the Company conducts its business, or reputational harm.

Although the Company establishes accruals for legal proceedings when information related to the loss contingencies represented by those matters indicates both that a loss is probable and that the amount of loss can be reasonably estimated, the Company does not have accruals for all legal proceedings where it faces a risk of loss. In addition, due to the inherent subjectivity of the assessments and unpredictability of the outcome of legal proceedings, amounts accrued may not represent the ultimate loss to the Company from the legal proceedings in question. Thus, the Company's ultimate losses may be higher than the amounts accrued for legal loss contingencies, which could adversely affect the Company's financial condition and results of operations.

Strategic Risk

The Company is subject to risks presented by acquisitions, which, if realized, could negatively affect our results of operations and financial condition.

The Company's strategic initiatives include diversification within its markets, growth of its fee-based businesses, and growth internally and through acquisitions of financial institutions, branches, and financial services businesses. As such, the Company has acquired, and from time to time considers acquiring, banks, thrift institutions, branch offices of banks or thrift institutions, or other businesses within markets currently served by the Company or in other locations that would complement the Company's business or its geographic reach. Any future acquisitions will be accompanied by the risks commonly encountered in acquisitions. These risks include: the difficulty of integrating operations and personnel, the potential disruption of our ongoing business, the inability of management to realize or maximize anticipated financial and strategic positions, increased operating adequate financing, the potential for litigation risk, the potential loss of members of a key executive management group, the potential reputational damage and the impairment of relationships with employees and customers as a result of changes in ownership and management. Further, the asset quality or other financial characteristics of an acquired company may deteriorate after the acquisition agreement is signed or after the acquisition closes. We cannot provide any assurance that we

will be successful in overcoming these risks or any other problems encountered in connection with acquisitions and any of these risks, if realized, could have an adverse effect on our results of operations and financial condition.

Our success depends on our ability to offer our customers an evolving suite of products and services, and we may not be able to effectively manage the risks inherent in the development of financial products and services.

We continually monitor our suite of products and services, and prioritize new offerings based on our determination of customer demand, within regulatory parameters for financial products. We may invest significant time and resources in new products which become obsolete, or do not generate the revenues we had anticipated, or which are ultimately deemed unacceptable by regulatory authorities. As we expand the range and complexity of our products and services, we are exposed to increasingly complex risks, including potential fraud, and our employees and risk management systems may not be adequate to mitigate such risks effectively. Our failure to effectively identify and manage these risks and uncertainties could have a material adverse effect on our business.

The implementation and use of new and evolving Artificial Intelligence ("AI") technologies present uncertainties and challenges.

The financial services industry is subject to rapid technological developments and innovations, including the use of AI technologies. The development and implementation of AI technologies is complex, and there are technical challenges associated with achieving the optimal level of accuracy, efficiency and reliability. The algorithms and models used in AI systems may have limitations, including biases, errors, or inability to handle certain data types or scenarios. The use of AI technologies by financial institutions and their customers, and the regulatory framework and expectations surrounding the use of AI technologies, are in their early stages. Flaws in the technology, ethical issues associated with the use of AI may limit its usefulness and expose us to competitive harm, potential legal liability, and brand or reputational harm. Furthermore, there is a risk of system failures, disruptions, or vulnerabilities that could compromise the integrity, security or privacy of generated content. If we are unable to successfully use and manage AI technologies, such limitations or failures could result in reputational damage, inefficiencies, increased costs, and competitive harm, any of which could have a material adverse effect on our financial condition and results of operations.

Item 1B. Unresolved Staff Comments

None.

Item 1C. Cybersecurity

Risk management and strategy

The Company takes very seriously the responsibilities to protect sensitive information, technology resources, and shareholder value from the risk of cyber threats and incidents.

The Company maintains an enterprise-wide and Board-approved Information and Cyber Security Program (the "Program"), which includes strategy, written policies, procedures, guidelines and standards to address the assessment, identification and management of cybersecurity risks. The Company designed the Program to be consistent with industry standards and in compliance with applicable federal and New York state laws, regulations and guidelines. As discussed in further detail under the subheading "Governance" below, the Program is fully integrated with the Company's overall enterprise risk management systems and processes.

The Company has adopted the Factor Analysis for Information Risk (FAIR) assessment approach, an industry standard risk assessment methodology. Under the FAIR approach, the Company identifies, catalogs, assesses and manages material cyber risks by: (a) documenting threat actors and organizations (i.e., cybercriminals, nation state actors, hackers, company insiders), (b) analyzing their likelihood of attack, their motives, capabilities and tactics; (c) assessing the potential impacts of such threat actor attacks against company assets, and documented vulnerabilities (or cyber exposures), both internally and externally of the organization; and (d) evaluating the implemented security controls and effectiveness of those controls against defined risk scenarios. The Company rates vulnerabilities based on the criticality of a vulnerability and/or the value of the asset associated with the vulnerability (for example, people, systems, customer data, or money). When a residual risk exceeds the desired threshold set by the Board-defined risk appetite of the organization, additional controls are recommended and implemented to reduce the potential risk to an acceptable level and provide appropriate management of the cyber risk exposure.

In conjunction with the FAIR assessment, the Company uses the MITRE Attack framework to identify the various exploitation techniques and tactics used by the most likely threat actors. This framework informs the risk management process with valuable insight into some of the most common, or likely, cyber-attacks the Company should address.

Additionally, the Company leverages insights from independently-conducted penetration testing provided by external thirdparty assessors, as required by the NYSDFS cybersecurity regulations, to discover and evaluate potential vulnerabilities across the enterprise that should be contemplated within the overall cyber risk program. The Company also engages independent thirdparty auditors to provide additional subject matter expertise, as well as to perform comprehensive independent audits of the Program. Audits are conducted no less than annually to evaluate the effectiveness and maturity of the Program. Audits include a review of the cyber risk assessment process, security control effectiveness, and compliance with regulatory requirements.

To manage the risks identified, the Company implements controls and tests those controls for effectiveness. The Company uses the Federal Financial Institutions Examination Council Cyber Assessment Tool (CAT), the National Institute of Standards and Technology (NIST) Cybersecurity Framework (CSF), the NYSDFS cybersecurity requirements and the Center for Internet Security (CIS) Critical Controls to help inform the Company of best practices for control implementation and potential risk mitigation opportunities that align with defined risk scenarios, and generally as a baseline for best practice control implementation.

As part of the Program, the Company has established policies and procedures to oversee, identify and mitigate material cybersecurity risks associated with the use of any third-party service providers. The Company evaluates and risk rates third-party relationships against a defined set of minimum-security requirements under its enterprise-wide Third-Party Risk Management program. Higher-risk third party service providers are reviewed in more detail and as part of the continual due diligence process to ensure changes to the relationship and/or risk posture are identified and managed appropriately.

The Company is not aware of any cybersecurity incidents that have materially affected the Company, including its business strategy, results of operations or financial condition. For a discussion of cybersecurity threats that could materially affect the Company's business strategy, results of operations or financial condition, please see Item 1A. Risk Factors.

Governance

The Program is governed by the Board of Directors and specifically, the Audit and Risk Committee, as well as two management committees, the Enterprise Risk Management Committee ("ERMC") and the Technology and Information Security Committee ("TISC").

Annually, the Audit and Risk Committee reviews and recommends for approval to the Board the Company's Information Security Policy, which outlines the roles, responsibilities, and objectives for the Program. On a quarterly basis, the Company's Chief Information Security Officer ("CISO") presents the Company's cybersecurity report and related material for review by the Audit and Risk Committee and then by the Board. This report includes emerging risks, overall program effectiveness/status, cybersecurity incidents, staffing, risk exceptions, and recommended enhancements to the program, as applicable. Annually, the CISO provides security related education to the Board and to the Audit and Risk Committee.

The TISC oversees the governance of the Company's enterprise technology and information security programs, including strategy, management principles, risk and compliance. The TISC reviews the policies, strategy, emerging topics, risks and general compliance of the programs to ensure they are adequate and sufficient to govern and manage the associated risk of the Company. The TISC coordinates and communicates with the Audit and Risk Committee on risk-related items through the Company's Enterprise Risk Management Committee. The TISC provides a forum for advising and sharing information among members of the Company's senior leadership team and is comprised of Company risk owners with expertise across a wide range of financial, technical, operational, strategic, and cybersecurity skill sets. The TISC is co-chaired by the Chief Technology Officer, who is responsible for the enterprise-wide information technology program and the CISO, who is responsible for the enterprise-wide information of information technology and information security professional (CISSP), with over 20 years of experience in a combination of information security, and holds a Bachelor's degree in Information Technology, with an Associate's degree in Computer Network Management.

The Program includes a Security Response Team ("SRT") assigned the responsibility to ensure the Company responds to, communicates and effectively remediates, isolates and restores business operations during any security incident. The SRT procedures are derived from the National Institute of Standards and Technology (NIST) Computer Security and incident Handling framework.

The ERMC is responsible for overall risk governance and management across Tompkins. As such, the ERMC reviews cyber risk exceptions, emerging risks, minutes from the TISC meetings, and reports on the health and risk associated with the Program. The ERMC is comprised of senior leadership team members as well as critical subject matter experts with risk management experience. The ERMC reports information about risk to the Audit and Risk Committee on a quarterly basis. The ERMC is chaired by the Director of Enterprise Risk Management and the Chief Risk Officer, who oversees the governance of enterprise-wide Risk Management program(s).

Item 2. Properties

The Company's executive offices are located at 118 East Seneca Street in Ithaca, New York. Tompkins Community Bank has 54 branch offices, of which 25 are owned and 29 are leased at market rents. The Company's insurance subsidiary has 4 standalone offices, of which 2 are owned by the Company and 2 are leased at market rents. The Company's wealth management and financial planning division has 2 offices which are leased at a market rent, and shares other locations within branches of Tompkins Community Bank. Management believes the current facilities are suitable for their present and intended purposes. For additional information about the Company's facilities, including rental expenses, see "Note 6 - Premises and Equipment" in Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K.

Item 3. Legal Proceedings

The Company is subject to various claims and legal actions that arise in the ordinary course of conducting business. As of December 31, 2024, management, after consultation with legal counsel, does not anticipate that the aggregate ultimate liability arising out of litigation pending or threatened against the Company or its subsidiaries would be material to the Company's consolidated financial position. On at least a quarterly basis, the Company assesses its liabilities and contingencies in connection with such legal proceedings. Although the Company does not believe that the outcome of pending litigation will be material to the Company's consolidated financial position, it cannot rule out the possibility that such outcomes will be material to the consolidated results of operations for a particular reporting period in the future.

Item 4. Mine Safety Disclosures

Not applicable.

Information About Our Executive Officers

The information concerning the Company's executive officers is provided below as of February 28, 2025.

Name	Age	Title	Year Joined Company
Stephen S. Romaine	60	President and CEO	January 2000
Matthew D. Tomazin	40	Executive Vice President, CFO and Treasurer	April 2019
Johanna B. Anderson	45	Executive Vice President	July 2023
David S. Boyce	58	Executive Vice President	January 2001
David M. DeMilia	49	Executive Vice President	April 2008
Alyssa H. Fontaine	44	Executive Vice President, General Counsel, and CRO	January 2016
Charles J. Guarino	49	Senior Vice President and Chief Banking Operations Officer	March 2019
Ginger G. Kunkel	54	Executive Vice President	December 2021
Stacie M. Mastin	46	Senior Vice President, Director of Human Resources	January 2008
John M. McKenna	58	Executive Vice President	April 2009
Eric W. Taylor	43	Executive Vice President	July 2024
Diane D. Torcello	62	Executive Vice President	May 2005

Business Experience of the Executive Officers:

Stephen S. Romaine has served as President and Chief Executive Officer of the Company since January 2007. From 2003 through 2006, he served as President and Chief Executive Officer of Mahopac Bank. Mr. Romaine currently serves on the board of the Federal Home Loan Bank of New York and the New York Bankers Association.

Johanna B. Anderson joined the Company in July 2023 as President of Tompkins Community Bank CNY and Executive Vice President. Ms. Anderson had served on the Tompkins Community Bank CNY Board and Board Loan Committee since 2020. Prior to joining the Company, Ms. Anderson served as Executive Director of Ithaca Neighborhood Housing Services, a nonprofit organization dedicated to expanding housing opportunities to low and moderate-income residents in Central New York, from August 2017 to June 2023.

Matthew D. Tomazin has served as Executive Vice President, Chief Financial Officer & Treasurer of the Company since October 2023. Mr. Tomazin joined the Company in April 2019 as Vice President and Senior Quantitative Analyst and served as Senior Vice President and Treasurer from February 2021 to September 2023. From 2008 until April 2019, Mr. Tomazin served in accounting and strategic finance roles, most recently as Vice President and Assistant Treasurer with NBT Bancorp Inc., a registered financial holding company with its principal headquarters located in Norwich, New York.

David S. Boyce joined the Company in January 2001 and was appointed President and Chief Executive Officer of Tompkins Insurance in 2002. He was promoted to Executive Vice President of the Company in April 2004. Mr. Boyce has served Tompkins Insurance and its predecessor company for 36 years.

David M. DeMilia joined Tompkins Mahopac Bank in April 2008 as a Regional Vice President, providing commercial banking services in Westchester County. In 2014, he was promoted to Senior Vice President before becoming Tompkins Community Bank Hudson Valley's Senior Commercial Loan Officer in October 2018. In June 2021, he was appointed President of Tompkins Community Bank HV, overseeing Tompkins' activities in the Hudson Valley region.

Alyssa H. Fontaine joined the Company in January 2016 as Executive Vice President and General Counsel. She took on the additional responsibility of Chief Risk Officer in May 2022. She had previously been a partner in the corporate/securities practice group of Harris Beach PLLC, a regional law firm which she joined in 2006. Ms. Fontaine serves as the Chair of the American Bankers Association General Counsels Committee.

Charles J. Guarino joined the Company in March 2019 as Senior Vice President, Manager of Retail & Small Business Lending, overseeing the bank's consumer, residential, small business and specialty lending areas. In October 2023, he was promoted to Senior Vice President and Chief Banking Operations Officer. Prior to joining the Company, Mr. Guarino spent 24 years with Financial Institutions, Inc., a registered financial holding company with its principal headquarters located in Warsaw, New York. There, Mr. Guarino oversaw areas such as marketing, retail banking, retail lending, wealth management and indirect auto lending, most recently serving as Senior Vice President, Chief Retail Lending Executive from June 2016 to March 2019. Mr. Guarino currently serves on the marketing and fundraising committee of Hub585, Inc., a nonprofit organization focused on youth and families.

Ginger G. Kunkel joined the Company in December 2021 as Executive Vice President and Chief Operating Officer of Tompkins Community Bank PA. In May 2022, Ms. Kunkel was appointed President of Tompkins Community Bank PA, overseeing Tompkins' activities in the Pennsylvania market. Prior to joining Tompkins Community Bank, Ms. Kunkel spent 7 years at Riverview Financial Corporation, a bank holding company headquartered in Harrisburg, Pennsylvania where she led the Commercial, Retail, Operations/IT, Trust and Wealth Management teams. Ms. Kunkel served as Senior Executive Vice President and Chief Operating Officer of Riverview Financial Corporation from January 2019 to December 2021 and as Executive Vice President, Chief Banking Officer from March 2014 to January 2019. She serves as a board member for the Pennsylvania Bankers Association Services Corporation.

Stacie M. Mastin has served as Senior Vice President and Director of Human Resources of the Company since May 2024. From May 2022 to May 2024, Ms. Mastin served as Vice President and Human Resources Manager for Corporate Culture. Ms. Mastin joined the Company in January 2008 as a senior learning and development business partner and has held various roles throughout her tenure, including human resources manager and wealth advisor from August 2019 to May 2022. From April 1997 to January 2008, Ms. Mastin held various roles, including branch manager, at M&T Bank, a banking subsidiary of M&T Bank Corporation. Ms. Mastin currently serves as president of the Society for Human Resources Management of Tompkins County.

John M. McKenna has been employed by the Company since April 2009. He was appointed President of Tompkins Community Bank WNY effective January 1, 2015, and President of Tompkins Community Bank effective January 1, 2022. From 2009 to 2014, Mr. McKenna was a senior vice president at The Bank of Castile, concentrating in commercial lending. Mr. McKenna has served as a member of the State Charter Advisory Board of the NYSDFS since February 2024.

Eric W. Taylor rejoined the Company in July 2024 as Executive Vice President and President of Tompkins Financial Advisors. Mr. Taylor began his career with the Company in July 2007, serving as a financial consultant and trust officer until July 2009. Prior to rejoining the Company, Mr. Taylor spent 15 years in wealth management and institutional client services roles with subsidiaries of M&T Bank Corporation, including Wilmington Trust, N.A., a national banking association offering trust and wealth management services, and Wilmington Funds Management Corporation, an investment advisor registered under the Investment Advisers Act of 1940. From August 2018 to July 2024, Mr. Taylor served as Executive Vice President and Head of Investment Implementation and Investment Advisor Services of Wilmington Trust, N.A., where he was responsible for investment planning, account management and compliance, and the oversight of more than 70 client-facing investment advisors. From November 2022 to July 2024, Mr. Taylor also served as President and a member of the board of trustees for the Wilmington Funds, a \$14 billion mutual fund complex.

Diane D. Torcello joined the Company in May 2005. In May 2023, she was appointed Executive Vice President of the Company and President of Tompkins Community Bank WNY overseeing Tompkins' activities in the Western New York market. From 2013 until May 2023, Ms. Torcello served as Senior Vice President and Community Banking Manager for Western New York, where she oversaw all staff and operations in the Western New York branch network.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Price and Dividend Information

The Company's common stock is traded under the symbol "TMP" on the NYSE American. As of February 24, 2024, there were approximately 2,634 holders of shares of our common stock.

While the Company has a long history of paying cash dividends on shares of its common stock, the Company's ability to pay dividends is generally limited to earnings from the prior year, although retained earnings and dividends from its subsidiaries may also be used to pay dividends under certain circumstances. The Company's primary source of funds to pay for shareholder dividends is receipt of dividends from its subsidiaries. Future dividend payments to the Company by its subsidiaries will be dependent on a number of factors, including earnings and the financial condition of each subsidiary, and are subject to regulatory limitations discussed in "Supervision and Regulation" in Part I, Item 1 of this Report.

Issuer Purchases of Equity Securities

The following table reflects all Company repurchases, including those made pursuant to publicly announced plans or programs, during the quarter ended December 31, 2024:

	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
Period	(a)	(b)	(c)	(d)
October 1, 2024 through				
October 31, 2024	2,380	\$ 59.19	0	\$ 400,000
November 1, 2024 through				
November 30, 2024	14,276	\$ 73.95	0	\$ 400,000
December 1, 2024 through				
December 31, 2024	701	\$ 67.83	0	\$ 400,000
Total	17,357	\$ 71.68	0	\$ 400,000

Included above are 2,380 shares purchased in October 2024, at an average cost of \$59.19, and 817 shares purchased in November 2024, at an average cost of \$75.12, by the trustee of the rabbi trust established by the Company under the Company's Second Amended and Restated Retainer Plan for Eligible Directors of Tompkins Financial Corporation and Participating Subsidiaries, which were part of the director deferred compensation under that plan. In addition, the table includes 13,459 and 701 shares delivered to the Company in November 2024 and December 2024, respectively, at an average cost of \$73.88 and \$67.83, respectively, to satisfy mandatory tax withholding requirements upon vesting of restricted stock under the 2019 Equity Plan.

On July 20, 2023, the Company's Board of Directors authorized a share repurchase plan (the "2023 Repurchase Plan") under which the Company may repurchase up to 400,000 shares of the Company's common stock over the 24 months following adoption of the plan. Shares may be repurchased from time to time under the 2023 Repurchase Plan in open market transactions at prevailing market prices, in privately negotiated transactions, or by other means in accordance with federal securities laws. The repurchase program may be suspended, modified or terminated by the Board of Directors at any time for any reason. As of December 31, 2024, no shares have been repurchased under the 2023 Repurchase Plan.

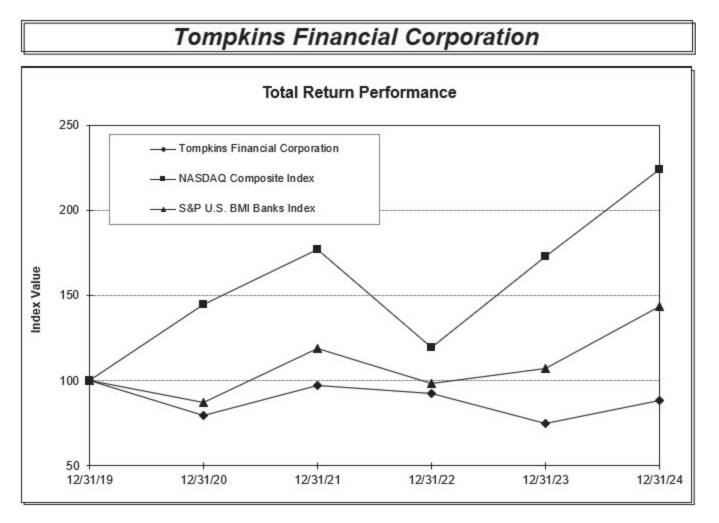

Recent Sales of Unregistered Securities

None.

Performance Graph

The following graph compares the Company's cumulative total stockholder return over the five-year period from December 31, 2019 through December 31, 2024, with (1) the total return for the NASDAQ Composite and (2) the total return for S&P U.S. BMI Banks index. The graph assumes \$100.00 was invested on December 31, 2019, in the Company's common stock and the comparison groups and assumes the reinvestment of all cash dividends prior to any tax effect and retention of all stock dividends.

In accordance with and to the extent permitted by applicable law or regulation, the information set forth under the heading "Performance Graph" shall not be incorporated by reference into any future filing under the Securities Act or Exchange Act and shall not be deemed to be "soliciting material" or to be "filed" with the SEC under the Securities Act or the Exchange Act, except to the extent that the Company specifically requests that such information be treated as soliciting material or specifically incorporates it by reference into such filings. The performance graph represents past performance and should not be considered an indication of future performance.

			Period E	nding		
Index	12/31/19	12/31/20	12/31/21	12/31/22	12/31/23	12/31/24
Tompkins Financial Corporation	100.00	79.65	96.99	92.72	74.90	88.20
NASDAQ Composite	100.00	144.92	177.06	119.45	172.77	223.87

Item 6. [Reserved.]

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following analysis is intended to provide the reader with a further understanding of the consolidated financial condition and results of operations of the Company and its operating subsidiaries for the periods shown. This Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with other sections of this Report on Form 10-K, including Part I, "Item 1. Business," and Part II, "Item 8. Financial Statements and Supplementary Data." For a comparison of our operating results for the year ended December 31, 2023 compared to the year ended December 31, 2022, please refer to Part II, Item 7 of the Company's 2023 Annual Report on Form 10-K filed on February 29, 2024.

Overview

The Company is headquartered in Ithaca, New York and is registered as a Financial Holding Company with the Federal Reserve Board under the Bank Holding Company Act of 1956, as amended. The Company is a locally oriented, communitybased financial services organization that offers a full array of products and services, including commercial and consumer banking, leasing, trust and investment management, financial planning and wealth management, and insurance services. In January 2022, the Company combined its four wholly-owned banking subsidiaries into one bank, with the Bank of Castile, Mahopac Bank, and VIST Bank merging with and into Tompkins Trust Company (the "Trust Company") with the Trust Company as the surviving institution. Immediately following the merger, the Trust Company changed its name to Tompkins Community Bank. At December 31, 2024, the Company had one wholly-owned banking subsidiary, Tompkins Community Bank, and one wholly-owned insurance agency subsidiary, Tompkins Insurance and Tompkins Financial Advisors, a division of Tompkins Community Bank, which provided a full array of investment services, including investment management, trust and estate, financial and tax planning services. The Company's principal offices are located at 118 E. Seneca Street, Ithaca, NY, 14850, and its telephone number is: (888) 503-5753. The Company's common stock is traded on the NYSE American under the symbol "TMP."

Forward-Looking Statements

This Report on Form 10-K contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. The statements contained in this Report that are not statements of historical fact may include forwardlooking statements that involve a number of risks and uncertainties. Forward-looking statements may be identified by use of such words as "may", "will", "estimate", "intend", "continue", "believe", "expect", "plan", or "anticipate", as well as the negative and other variations of these terms and other similar words. Examples of forward-looking statements may include statements regarding the asset quality of the Company's loan portfolios; the level of the Company's allowance for credit losses; the sufficiency of liquidity sources; the Company's exposure to changes in interest rates, and to new, changed, or extended government/regulatory expectations; the need to sell securities before recovery of amortized cost; the expected increases in interest income attributable to recent sales of available-for-sale debt securities; the impact of changes in accounting standards; and trends, plans, prospects, growth and strategies. Forward-looking statements are made based on management's expectations and beliefs concerning future events impacting the Company and are subject to uncertainties and factors relating to the Company's operations and economic environment, all of which are difficult to predict and many of which are beyond the control of the Company, that could cause actual results of the Company to differ materially from those expressed and/or implied by forward-looking statements and historical performance. The following factors, in addition to those listed as Risk Factors in Item 1A, are among those that could cause actual results to differ materially from the forward-looking statements and historical performance: changes in general economic, market and regulatory conditions; our ability to attract and retain deposits and other sources of liquidity; gross domestic product growth and inflation trends; the impact of the interest rate and inflationary environment on the Company's business, financial condition and results of operations; other income or cash flow anticipated from the Company's operations, investment and/or lending activities; changes in laws and regulations affecting banks, bank holding companies and/or financial holding companies, including the Dodd-Frank Act, and state and local government mandates; the impact of any change in the FDIC insurance assessment rate or the rules and regulations related to the calculation of the FDIC insurance assessment amount; increased supervisory and regulatory scrutiny of financial institutions; technological developments and changes; cybersecurity incidents and threats; the ability to continue to introduce competitive new products and services on a timely, cost-effective basis; governmental and public policy changes, including environmental regulation; reliance on large customers and the geographic concentration of our business; the ability to access financial resources in the amounts, at the times, and on the terms required to support the Company's future businesses; and the economic impact, including potential market volatility, of national and global events, including the response to bank failures, war and geopolitical matters (including the war in Israel and surrounding regions and the war in Ukraine), widespread protests, civil unrest, political uncertainty, and pandemics or other public health crises. The Company does not undertake any obligation to update its forwardlooking statements.

Critical Accounting Policies

The accounting and reporting policies followed by the Company conform, in all material respects, to U.S. generally accepted accounting principles ("GAAP") and to general practices within the financial services industry. In the course of normal business activity, management must select and apply many accounting policies and methodologies and make estimates and assumptions that lead to the financial results presented in the Company's consolidated financial statements and accompanying notes. There are uncertainties inherent in making these estimates and assumptions, which could materially affect the Company's results of operations and financial position.

Management considers accounting estimates to be critical to reported financial results if (i) the accounting estimates require management to make assumptions about matters that are highly uncertain, and (ii) different estimates that management reasonably could have used for the accounting estimate in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, could have a material impact on the Company's financial statements. Management considers the accounting policies relating to the allowance for credit losses ("allowance", or "ACL") to be a critical accounting policy because of the uncertainty and subjectivity involved in this policy and the material effect that estimates related to this area can have on the Company's financial condition and results of operations.

The Company's methodology for estimating the allowance considers available relevant information about the collectability of cash flows, including information about past events, current conditions, and reasonable and supportable forecasts. Refer to "Allowance for Credit Losses" below, "Note 4 - Allowance for Credit Losses", and "Note 1 - Summary of Significant Accounting Policies" in the Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K for additional discussion regarding the allowance.

For information on the Company's significant accounting policies and to gain a greater understanding of how the Company's financial performance is reported, refer to "Note 1 - Summary of Significant Accounting Policies" in the Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K.

Critical Accounting Estimates

The Company's significant accounting policies conform with GAAP and are described in "Note 1 - Summary of Significant Accounting Policies" of the Notes to Consolidated Financial Statements included in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K.. In applying those accounting policies, management of the Company is required to exercise judgment in determining many of the methodologies, assumptions and estimates to be utilized. Certain critical accounting estimates are more dependent on such judgment and in some cases may contribute to volatility in the Company's reported financial performance should the assumptions and estimates used change over time due to changes in circumstances. The most significant area in which management of the Company applies critical assumptions and estimates include the following:

Accounting for credit losses - the Company accounts for the allowance for credit losses using the current expected credit loss model. Under this model, the allowance for credit losses represents a valuation account that is deducted from the amortized cost basis of certain financial assets, including loans and leases, to present the net amount expected to be collected at the balance sheet date. A provision for credit losses is recorded to adjust the level of the allowance as deemed necessary by management. In estimating expected losses in the loan and lease portfolio, borrower-specific financial data and macro-economic assumptions are utilized to project losses over a reasonable and supportable forecast period. For certain loan pools that share similar risk characteristics, the Company utilizes statistically developed models to estimate amounts and timing of expected future cash flows, collateral values and other factors used to determine the borrowers' abilities to repay obligations. Such models consider historical correlations of credit losses with various macroeconomic assumptions including unemployment and gross domestic product. These forecasts may be adjusted for inherent limitations or biases of the models. Subsequent to the forecast period, the Company utilizes longer-term historical loss experience to estimate losses over the remaining contractual life of the loans. Changes in the circumstances considered when determining management's estimates and assumptions could result in changes in those estimates and assumptions, which could result in adjustment of the allowance for credit losses in future periods. A discussion of facts and circumstances considered by management in determining the allowance for credit losses is included herein in "Note 4 - Allowance for Credit Losses" in the Notes to the Unaudited Consolidated Financial Statements included in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K.

Results of Operations

General

The Company reported diluted earnings per share of \$4.97 in 2024, an increase of 653.0% compared to diluted earnings per share of \$0.66 in 2023. Net income for the year ended December 31, 2024, was \$70.9 million, an increase of 645.4% compared to \$9.5 million in 2023. The 2023 results included an after-tax loss of \$52.9 million, or a loss of \$3.69 per diluted share, related to the sale of \$510.5 million of available-for-sale debt securities in 2023. The sale of securities and subsequent reinvestment of the proceeds from the sale in the second and third quarters of 2023 favorably impacted securities revenue in the fourth quarter of 2023 and in 2024 as the securities sold had an average yield of 0.86%, while the proceeds of the sale were largely reinvested into securities with an estimated yield of approximately 5.09%. Earnings performance in 2024 also benefited from increased net interest income, growth in fee-based businesses and lower operating expenses compared to 2023.

Excluding the impact of the realized losses on the sales of investment securities, adjusted net income, a non-GAAP financial measure, was \$70.8 million for the year ended December 31, 2024, up \$8.4 million, or 13.5%, when compared to the prior year. Earnings per diluted share, adjusted to exclude the impact of realized losses on sales of investment securities ("adjusted diluted earnings per share"), also a non-GAAP financial measure, of \$4.96 for the year ended December 31, 2024, increased \$0.60 or 13.8% compared to the prior year. Reconciliations of these non-GAAP financial measures with the most directly comparable GAAP financial measures are presented in the "Non-GAAP Disclosure" on page 53.

In addition to earnings per share, key performance measurements for the Company include return on average shareholders' equity (ROE) and return on average assets (ROA). ROE was 10.33% in 2024, compared to 1.50% in 2023, while ROA was 0.90% in 2024 and 0.12% in 2023. Tompkins' 2024 ROE compared favorably with a peer ratio of 9.67%, while ROA trailed by 3 basis points when compared to peer ROA of 0.93%. The peer group data is derived from the FRB's "Bank Holding Company Performance Report", which covers banks and bank holding companies with assets between \$3.0 billion and \$10.0 billion as of September 30, 2024 (the most recent report available). Although the peer group data is presented based upon financial information that is one fiscal quarter behind the financial information included in this report, the Company believes that it is relevant to include certain peer group information for comparison to current period numbers. ROA and ROE adjusted to exclude the impact of realized losses on sales of investment securities ("adjusted ROA" and "adjusted ROE", which are non-GAAP financial measures), were 0.90% and 10.33% for the year ended December 31, 2024, compared to 0.82% and 9.83% for the year ended December 31, 2024, compared to 0.82% and 9.83% for the year ended December 31, 2023. Reconciliations of these non-GAAP financial measures with the most directly comparable GAAP financial measures are presented in "Non-GAAP Disclosure" on page 53.

Segment Reporting

The Company operates in three business segments: banking, insurance and wealth management. Insurance is comprised of property and casualty insurance services and employee benefit consulting operated under the Tompkins Insurance subsidiary. Wealth management activities include the results of the Company's trust, financial planning, and wealth management services provided by Tompkins Financial Advisors, a division of Tompkins Community Bank. All other activities are considered banking. For additional financial information on the Company's segments, refer to "Note 21 - Segment and Related Information" in the Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K. The Company adopted ASU No. 2023-07, "Segment Reporting: Improvements to Reportable Segment Disclosures", effective for the Company for fiscal years beginning after December 15, 2024.

Banking Segment

The banking segment reported net income of \$59.2 million for the year ended December 31, 2024, up \$59.2 million compared to net income of \$74,000 for 2023. Results for 2023 included an after-tax loss of \$52.9 million related to the sale of \$510.5 million of available-for-sale debt securities. Earnings performance in 2024 also benefited from increased interest income, growth in fee-based businesses and lower operating expenses compared to 2023.

The provision for credit loss expense was \$6.6 million in 2024, compared to a provision expense of \$4.3 million in the prior year. The increase in the provision for credit losses in 2024 over 2023 was mainly driven by loan growth, an increase in net loan charge-offs, and model assumption updates. The ratio of the allowance to total loans at December 31, 2024 was 0.94%, up from 0.92% at December 31, 2023. For additional information, see the section titled "The Allowance for Credit Losses" below.

Noninterest income of \$30.0 million in 2024 increased \$73.7 million or 168.7% compared to 2023. Noninterest income in 2023 included a pre-tax loss of \$70.0 million on the sales of available-for-sale debt securities in the second and third quarters of 2023. The increase in 2024 compared to 2023 also included growth in card services income, service charges on deposit

accounts and other income. For the year ended December 31, 2024, derivative income increased by \$1.3 million or 266.9% due mainly to fees collected from new customer interest rate swap arrangements, and bank owned life insurance earnings increased by \$1.0 million or 60.3% over 2023 due to a \$504,000 adjustment on BOLI policies surrendered in the previous year and settled in 2024.

Noninterest expense of \$157.3 million for the year ended December 31, 2024, decreased \$5.0 million or 3.1% from 2023 noninterest expense. The decrease was largely due to reductions in technology, marketing, and nonrecurring expenses in 2023, which included \$879,000 of expenses related to branch closures; New York State minimum tax expense of \$830,000, and approximately \$640,000 in expenses related to staff restructuring charges. These decreases were partially offset by increases in salaries and benefits and FDIC insurance expense in 2024.

Insurance Segment

The insurance segment reported net income of \$7.8 million for 2024, which was up \$1.3 million or 19.6% compared to 2023. A \$1.9 million or 5.0% increase in noninterest revenue was partially offset by an increase in noninterest expenses of \$213,000 or 0.7%. The increase in revenue was mainly in property and casualty commissions, which were up \$747,000 or 2.8% in 2024 over 2023. Contingency revenue was up \$952,000 or 27.4% in 2024 compared to 2023. Revenue growth in 2024 benefited from business development efforts and generally higher policy premium levels. The increase in expenses was mainly in salaries and wages as a result of normal annual merit increases along with increases in profit sharing and incentives, which were partially offset by decreases in travel and meetings and other operating expenses.

Wealth Management Segment

The wealth management segment reported net income of \$3.8 million for the year ended December 31, 2024, an increase of \$906,000 or 31.5% compared to 2023. Revenue of \$20.5 million increased \$2.2 million or 12.2% compared to 2023, mainly as a result of higher average assets under management, favorable market conditions and gains of \$558,000 on the sale of certain customer accounts. Noninterest expenses increased by \$1.0 million or 7.1% compared to 2023. The increase was mainly driven by salaries and employee benefits, and technology expense related to the core wealth platform. The fair value of assets under management or in custody at December 31, 2024 totaled \$3.1 billion, representing a decrease of \$27.5 million or 0.9% compared to \$3.1 billion at year-end 2023. While the market performance for the year was favorable, increases in asset values were offset by sales of certain customer accounts totaling about \$115.0 million.

Net Interest Income

Net interest income is the Company's largest source of revenue, representing 70.6% of total revenues for the year ended December 31, 2024, and 95.3% of total revenues for the year ended December 31, 2023. The decrease in the ratio of net interest income to revenues in 2024 was largely driven by a pre-tax loss of \$70.0 million on the sales of available-for-sale debt securities during 2023. Net interest income is dependent on the volume and composition of interest earning assets and interest-bearing liabilities and the level of market interest rates. *Table 1 – Average Statements of Condition and Net Interest Analysis* shows average interest-earning assets and interest-bearing liabilities, and the corresponding yield or cost associated with each.

Net interest income of \$211.1 million for 2024 increased by \$1.6 million or 0.8% from 2023. The slight increase was primarily due to increases in both average loan balances and average loan yields, largely offset by higher average funding costs in 2024 compared to 2023.

Net interest margin for 2024 was 2.79%, compared to 2.84% for 2023. The decrease in net interest margin for the year ended December 31, 2024 compared to the year ended December 31, 2023 was due to increases in the average rates paid on interestbearing liabilities outpacing increases on interest-earning assets yields due to the higher interest rate environment, as well as increases in higher rate average other borrowings.

The net interest margin was 2.93% for the fourth quarter of 2024, up 14 basis points when compared to the immediate prior quarter, and up 11 basis points from 2.82% for the fourth quarter of 2023. The increase in net interest margin, when compared to the most recent prior quarter, was mainly due to lower funding costs resulting from growth in average deposits and lower market rates. The increase in net interest margin when compared to the same period prior year was mainly a result of higher yields on average interest earning assets and higher average loan balances, and was partially offset by higher average funding costs.

Interest income increased \$50.2 million or 16.9% in 2024 from 2023, driven by an increase in average interest-earning assets as well as higher interest earning asset yields due to the higher interest rate environment. Average interest-earning assets for the year ended December 31, 2024, increased \$190.7 million, or 2.6%, compared to 2023. The growth in average interest-earning

assets was mainly in average loans, partially offset by a decrease in average securities. For the year ended December 31, 2024, the average yield on interest-earning assets increased 56 basis points over 2023.

Interest income on loans for the year ended December 31, 2024, was up \$41.5 million, or 15.9% compared to 2023, driven by higher average balances and higher average yields. Average loans and leases increased \$410.9 million or 7.7% in 2024 compared to 2023, and represented 75.9% of average earning assets in 2024 compared to 72.3% in 2023. The increase was largely driven by growth in the commercial real estate and commercial and industrial portfolios. The average yield on loans for the year ended December 31, 2024, of 5.25%, was up 37 basis points from 2023. The increase in average loan yields was a result of market-related increases in interest rates on new loans, a significant increase in variable and adjustable rate loan yields driven by rising market interest rates, including the prime rate, and an increase in new loan originations.

Interest income on securities, excluding dividends on FHLB stock, for the year ended December 31, 2024, was up \$7.1 million or 20.6% as compared to 2023, as higher average yields more than offset lower average balances. The average yield on total securities for the year ended December 31, 2024, increased 62 basis points, while average balances for securities decreased \$234.3 million, or 11.6%, from 2023. The increase in average securities yields was driven by market interest rate increases and the repositioning of the investment portfolio through the sale of approximately \$510.5 million of available-for-sale investment securities in the second and third quarters of 2023. The securities sold had an average yield of 0.86%, while the proceeds of the sale were largely reinvested into securities with an estimated average yield of approximately 5.09%. In 2024, the Company used the majority of cash flow from the securities portfolio to support loan growth.

Interest expense for 2024 increased \$48.6 million or 55.4% compared to 2023, driven mainly by the increase in average rates paid on interest-bearing liabilities and funding mix, with an increase in average borrowings and average time deposits. The average cost of interest-bearing deposits was 2.27% in 2024, an increase of 69 basis points from 1.58% in 2023, while the average cost of interest-bearing liabilities increased to 2.60% in 2024 from 1.79% in 2023.

Average interest bearing deposits in 2024 increased \$80.0 million or 1.8% compared to 2023, with average time deposits up \$223.8 million or 28.2% and average interest-bearing checking, savings and money market deposits down \$143.8 million or 3.9%. Average noninterest bearing deposit balances in 2024 decreased \$156.8 million or 7.9% versus 2023 and represented 28.7% of average total deposits in 2024 compared to 30.8% in 2023.

Average other borrowings increased by \$275.2 million or 75.7% in 2024 from 2023. The average rate paid on other borrowings for the year ended December 31, 2024, was up 41 basis points over 2023. The increase in the cost of average borrowings was primarily the result of the greater utilization of comparatively higher rate overnight borrowings to support loan growth.

Net interest income			\$211,102				\$209,514				\$230,281	

For the year ended December 31,

¹ Average balances and yields on available-for-sale debt securities are based on historical amortized cost. ² Interest income includes the tax effects of tax-equivalent adjustments using the Federal income tax rate of 21.0% in 2024, 2023, and 2022 to increase tax exempt interest income to tax-equivalent basis.

³ Nonaccrual loans are included in the average asset totals presented above. Payments received on nonaccrual loans have been recognized as disclosed in "Note 1 - Summary of Significant Accounting Policies" of the Company's consolidated financial statements included in Part 1 of this Report on Form 10-K.

Net interest income	\$	(1,425)	\$	3,075	\$	1,650	\$	(3,744)	\$	(17,265)	\$	(21,009)		

¹ Interest income includes the tax effects of tax-equivalent adjustments using the Federal income tax rate of 21.0% in 2024, 2023 and 2022 to increase tax exempt interest income to tax-equivalent basis.

Changes in net interest income occur from a combination of changes in the volume of interest-earning assets and interestbearing liabilities, and in the rate of interest earned or paid on them. The above table illustrates changes in interest income and interest expense attributable to changes in volume (change in average balance multiplied by prior year rate), changes in rate (change in rate multiplied by prior year volume), and the net change in net interest income. The net change attributable to the combined impact of volume and rate has been allocated to each in proportion to the absolute dollar amounts of the change. In 2024, net interest income increased by \$1.7 million, resulting from a \$50.3 million increase in interest income, partially offset by a \$48.6 million increase in interest expense. The increase in interest income largely reflects increases in average loan balances and average loan yields. The increase in interest expense reflects higher rates paid on interest-bearing liabilities, both deposits and other borrowings, and increases in average other borrowings.

Provision for Credit Loss Expense

The provision for credit loss expense represents management's estimate of the expense necessary to maintain the allowance for credit losses at an appropriate level. The ratio of allowance to total loans and leases increased to 0.94% at December 31, 2024 from 0.92% at December 31, 2023. The increase in the ratio of allowance to total loans from year-end December 31, 2023 was mainly a result of changes in qualitative factors relating to loan growth and asset quality, model assumptions changes, and updates to economic forecasts for unemployment and gross domestic product. The increase in allowance for credit losses was partially offset by lower off-balance sheet reserves due to model changes related to utilization rates and a decrease in loan pipeline. The provision for credit losses for 2024 included a provision credit of \$807,000 related to off-balance sheet credit exposures compared to a provision credit of \$526,000 for 2023. The section captioned "Financial Condition – The Allowance for Credit Losses" below has further details on the allowance for credit losses and asset quality metrics.

Noninterest Income

	Year end	led December 3	31,
(In thousands)	2024	2023	2022
Insurance commissions and fees	\$ 39,100 \$	37,351 \$	36,201
Wealth management fees	19,589	17,951	18,091
Service charges on deposit accounts	7,288	6,913	7,365
Card services income	12,057	11,488	11,024
Other income	10,061	6,511	5,925
Net gain (loss) on securities transactions	32	(69,973)	(634)
Total	\$ 88,127 \$	10,241 \$	77,972

Noninterest income of \$88.1 million for the year-ended December 31, 2024 increased \$77.9 million or 760.5% from 2023. Noninterest income represented 29.5% of total revenues in 2024, up from 4.7% in 2023. The increase in noninterest income was largely due to the previously noted sales of available-for-sale debt securities, mainly in the third quarter of 2023, which resulted in the recognition of a pre-tax loss of \$70.0 million for the year ended December 31, 2023. Fee-based revenues, including insurance commissions and fees, wealth management fees, service charges on deposit accounts and card services income, for the year ended December 31, 2024, collectively, increased \$4.3 million, or 5.9%, over 2023.

Insurance commissions and fees of \$39.1 million increased \$1.7 million or 4.7% in 2024 compared to \$37.4 million for 2023. The increase was mainly in property and casualty commissions, which were up \$747,000 or 2.8% in 2024 over 2023, and contingency revenue, which was up \$952,000 or 27.4% in 2024 compared to 2023. Revenue growth in 2024 benefited from business development efforts and generally higher policy premium levels as a result of general market conditions.

Wealth management fees of \$19.6 million in 2024 increased \$1.6 million or 9.1% compared to 2023, reflecting favorable market conditions, and an increase in average assets under management. Wealth management fees include fees from trust services, financial planning, wealth management services, and brokerage related services. The fair value of assets managed by, or in custody of, Tompkins was \$3.1 billion at December 31, 2024, a decrease of \$27.5 million or 0.9% from \$3.1 billion at December 31, 2023. While the market performance for the year was favorable, the increases in asset values were offset by sales of certain customer accounts.

Service charges on deposit accounts of \$7.3 million increased \$375,000 or 5.4% in 2024 compared to 2023. The increase was primarily in net overdraft fees and service fees on personal and business accounts, reflective of increased transaction activity, resulting in part from new initiatives in 2024.

Card services income increased \$569,000 or 5.0% in 2024 over 2023. The primary components of card services income are fees related to interchange income and transaction fees for debit card transactions, credit card transactions and ATM usage. The increase in 2024 included a \$255,000 sign-on bonus related to the renewal of a card services contract.

Other income of \$10.1 million increased \$3.6 million or 54.5% compared to 2023. The increase for 2024 compared to 2023 was mainly due to derivatives related income (up \$1.3 million), higher earnings on bank owned life insurance (up \$1.0 million), and gains on sale of residential loans (up \$905,000). The year ended December 31, 2024 also included gains of \$558,000 on the sale of certain customer accounts within the wealth management business.

Noninterest Expense

	Year e	nded Decemb	er 31,
(In thousands)	2024	2023	2022
Salaries and wages	\$ 101,150	97,370	\$ 98,261
Other employee benefits	26,661	27,333	24,969
Net occupancy expense of premises	12,634	13,278	13,093
Furniture and fixture expense	7,666	8,663	8,058
FDIC insurance	5,696	4,298	2,798
Amortization of intangible assets	332	334	873
Other operating expense	45,503	52,016	47,699
Total	\$ 199,642	5 203,292	\$ 195,751

Noninterest expense for the year ended 2024 of \$199.6 million, decreased \$3.7 million, or 1.8% compared to 2023. The decrease in noninterest expense in 2024 over 2023 was mainly driven by lower other expenses (technology, marketing, professional fees, retirement plan expense, and travel and meeting expense), partially offset by higher FDIC insurance expense.

Expenses associated with salaries and wages and employee benefits are the largest component of total noninterest expense. In 2024, these expenses increased \$3.1 million or 2.5% compared to 2023. Salaries and wages increased \$3.8 million or 3.9% in 2024 over the prior year, driven mainly by annual merit pay increases and incentive related accruals. The number of employees as measured by average full time equivalents (FTEs) for 2024 were 966, compared to 1,014 for 2023. Other employee benefits decreased \$672,000 or 2.5% over 2023, mainly in health insurance, which was down \$880,000 or 7.7% in 2024 over 2023.

The decreases in net occupancy expense of premises and furniture and fixture expense in 2024 compared to 2023, were mainly due to a \$669,000 decrease in furniture, fixtures and equipment depreciation expense and a \$492,000 decrease in expenses related to branch closures.

Other operating expenses of \$45.5 million decreased by \$6.5 million or 12.5% compared to 2023, including decreases in technology, down \$1.3 million; marketing, down \$1.2 million; professional fees, down \$1.0 million; retirement plan expense, down \$709,000; and travel and meeting expense, down \$667,000. Partially offsetting these decreases, FDIC insurance expense was up \$1.4 million or 32.5% year-over-year.

Noncontrolling Interests

Net income attributable to noncontrolling interests represents the portion of net income in consolidated majority-owned subsidiaries that is attributable to the minority owners of a subsidiary. The Company had net income attributable to noncontrolling interests of \$123,000 in 2024, in line with 2023. The noncontrolling interests relate to three real estate investment trusts ("REIT"), which were substantially owned by the Company, through the fourth quarter of 2024, as discussed below under "Income Tax Expense".

Income Tax Expense

The provision for income taxes provides for Federal, New York State, Pennsylvania and other miscellaneous state income taxes. The 2024 provision was \$22.0 million, which increased \$19.5 million or 781.9% compared to the 2023 provision. The increase in income tax expense between comparable periods reflects an increase in pre-tax income, as the prior year reflected realized losses on the sale of certain available-for-sale debt securities. The effective tax rate for the Company was 23.7% in 2024, up from 20.8% in 2023. Contributing to the increase in the effective tax rate in 2024 was the loss of certain New York State tax benefits related to the Company's REIT subsidiaries, discussed below. The effective rates for 2024 and 2023 differed from the U.S. statutory rate of 21.0% during those periods due to the effect of tax-exempt income from loans, securities, and life insurance assets, investments in tax credits, and excess tax benefits of stock-based compensation.

In 2024, the Company's average assets exceeded the \$8.0 billion threshold for receiving certain New York State tax benefits associated with the Company's REIT subsidiaries. Therefore, the Company did not recognize any tax benefit in connection with the REITs in 2024. In the fourth quarter of 2024, the Company's bank subsidiary approved the dissolution of the REITs.

Financial Condition

Total assets were \$8.1 billion at December 31, 2024, up by 3.7% or \$289.3 million from the previous year end. Total loans increased \$414.0 million or 7.4% from year-end 2023, while total securities decreased by \$185.1 million or 10.7%. Total deposits at year-end 2024 increased \$72.0 million or 1.1% from year-end 2023, while total borrowings increased \$188.1 million or 31.3%.

Loans and leases were 74.2% of total assets at December 31, 2024, compared to 71.7% of total assets at December 31, 2023. Total loan balances were \$6.0 billion at December 31, 2024, an increase of \$414.0 million or 7.4% compared to the \$5.6 billion reported at year-end 2023. The increase was mainly in commercial real estate loans and commercial and industrial loans. A more detailed discussion of the loan portfolio is provided below in this section under the caption "Loans and Leases".

As of December 31, 2024, total securities comprised 19.1% of total assets, compared to 22.1% of total assets at year-end 2023. Securities decreased \$185.1 million or 10.7% at December 31, 2024, compared to December 31, 2023. Contributing to the decrease in securities from year-end 2023 was mainly maturities and principal payments on available-for-sale debt securities and, to a much lesser extent, sales of available-for-sale debt securities. These decreases were partially offset by securities purchases in 2024. A more detailed discussion of the securities portfolio is provided below in this section under the caption "Securities".

Total deposits at year-end 2024 increased by \$72.0 million or 1.1% compared to December 31, 2023. At December 31, 2024 time deposit balances increased \$70.4 million or 7.1%, checking, savings and money market accounts increased by \$74.1 million or 2.1%, and noninterest bearing deposits decreased by \$72.5 million or 3.8%, when compared to December 31, 2023. Other borrowings, consisting mainly of short-term advances with the FHLB, increased \$188.1 million or 31.3% from December 31, 2023. A more detailed discussion of deposits and borrowings is provided below in this section under the caption "Deposits and Other Liabilities".

Shareholders' Equity

The Consolidated Statements of Changes in Shareholders' Equity included in the Consolidated Financial Statements of the Company contained in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K, detail changes in equity capital over prior year end. Total shareholders' equity increased \$43.5 million or 6.5% to \$713.4 million at December 31, 2024, from \$669.9 million at December 31, 2023. Additional paid-in capital increased by \$2.9 million, from \$297.2 million at December 31, 2023, to \$300.1 million at December 31, 2024. The \$2.9 million increase included \$3.9 million attributed to stock-based compensation expense, partially offset by \$1.2 million of restricted stock activity. Retained earnings increased by \$35.6 million, reflecting net income of \$70.9 million, less dividends paid of \$35.1 million for the year-ended December 31, 2024.

Accumulated other comprehensive loss decreased from \$125.0 million at December 31, 2023 to \$118.5 million at December 31, 2024, reflecting a \$2.2 million increase in unrealized losses on available-for-sale debt securities due to market interest rates and \$8.7 million decrease related to employee post-retirement benefit plans. Under regulatory requirements, amounts reported as accumulated other comprehensive income/loss related to net unrealized gain or loss on available-for-sale debt securities and the funded status of the Company's defined benefit post-retirement benefit plans do not increase or reduce regulatory capital and are not included in the calculation of risk-based capital and leverage capital ratios.

Total shareholders' equity decreased \$52.5 million or 8.5% to \$669.9 million at December 31, 2023, from \$617.4 million at December 31, 2022. Additional paid-in capital decreased by \$5.6 million, from \$302.8 million at December 31, 2022, to \$297.2 million at December 31, 2023. The \$5.6 million decrease included the following: an \$8.7 million aggregate purchase price paid related to the Company's repurchase and retirement of 150,000 shares of its common stock in the first six months of 2023 pursuant to its publicly announced stock repurchase plan; and \$1.3 million related to the exercise of stock options and restricted stock activity. These were partially offset by \$4.1 million attributed to stock-based compensation expense, and \$331,000 related to shares issued for the Company's director deferred compensation plan. Retained earnings decreased by \$25.2 million, reflecting net income of \$9.5 million, less dividends paid of \$34.7 million for the year ended December 31, 2023.

Accumulated other comprehensive loss decreased from \$208.7 million at December 31, 2022 to \$125.0 million at December 31, 2023, reflecting a \$79.3 million decrease in unrealized losses on available-for-sale debt securities due to market interest rates and the aforementioned \$70.0 million pre-tax loss on available-for-sale debt securities sales, and \$4.4 million related to employee post-retirement benefit plans.

The Company increased cash dividends per share by 1.7% in 2024 over 2023, which followed an increase of 3.9% in 2023 over 2022. Dividends per share were \$2.44 in 2024, compared to \$2.40 in 2023, and \$2.31 in 2022. Cash dividends paid represented 49.6%, 364.6%, and 39.5% of after-tax net income in 2024, 2023, and 2022, respectively.

On October 22, 2021, the Company's Board of Directors authorized a share repurchase plan (the "2021 Repurchase Plan") for the repurchase of up to 400,000 shares of the Company's common stock over the 24 months following adoption of the 2021 Repurchase Plan. Under the 2021 Repurchase Plan, the Company repurchased a total of 380,182 shares at an average cost of \$70.14.

On July 20, 2023, the Company's Board of Directors authorized a replacement share repurchase plan (the "2023 Repurchase Plan") under which the Company may repurchase up to 400,000 shares of the Company's common stock over the 24 months following adoption of the plan. Shares may be repurchased from time to time under the 2023 Repurchase Plan in open market transactions at prevailing market prices, in privately negotiated transactions, or by other means in accordance with federal securities laws, and the repurchase program may be suspended, modified or terminated by the Board of Directors at any time for any reason. As of December 31, 2024, there have been no shares repurchased under the 2023 Repurchase Plan.

The Company and its subsidiary bank are subject to various regulatory capital requirements administered by federal bank regulatory agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material adverse effect on the Company's business, results of operations and financial condition. Under capital adequacy guidelines and the regulatory framework for prompt corrective action (PCA), banks must meet specific guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. Capital amounts and classifications of the Company and its subsidiary bank are also subject to qualitative judgments by regulators concerning components, risk weightings, and other factors. Quantitative measures established by regulation to ensure capital adequacy require the maintenance of minimum amounts and ratios of common equity Tier 1 capital, Total capital and Tier 1 capital to risk-weighted assets, and of Tier 1 capital to average assets. Management believes that the Company and its subsidiary bank meet all capital adequacy requirements to which they are subject.

As of December 31, 2024, the capital ratios for the Company's subsidiary bank exceeded the minimum levels required to be considered well capitalized. Additional information on the Company's capital ratios and regulatory requirements is provided in "Note 19 - Regulations and Supervision" in the Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K.

Securities

The Company maintains a portfolio of securities such as U.S. Treasuries, U.S. government sponsored entities securities, U.S. government agencies, non-U.S. Government agencies or sponsored entities mortgage-backed securities, obligations of states and political subdivisions thereof and equity securities. Management typically invests in securities with short to intermediate average lives in order to better match the interest rate sensitivities of its assets and liabilities. Investment decisions are made within policy guidelines established by the Company's Board of Directors. The investment policy established by the Company's Board of Directors is based on the asset/liability management goals of the Company, and is monitored by the Company's Asset/Liability Management Committee and Investment Committee. The intent of the policy is to establish a portfolio of high-quality diversified securities, which optimizes net interest income within safety and liquidity limits deemed acceptable by the Asset/Liability Management Committee.

The Company classifies its securities at date of purchase as available-for-sale, held-to-maturity or trading. Securities are generally classified as available-for-sale. Securities available-for-sale may be used to enhance total return, provide additional liquidity, or reduce interest rate risk. Securities in the held-to-maturity portfolio would consist of obligations of the U.S. Government, U.S. Government sponsored entities and obligations of state and political subdivisions. Securities in the trading portfolio would reflect those securities that the Company elects to account for at fair value, with the adoption of ASC Topic 825, *Financial Instruments*.

The Company's total securities portfolio at December 31, 2024 was \$1.5 billion, compared to \$1.7 billion at December 31, 2023. The table below shows the composition of the available-for-sale and held-to-maturity debt securities portfolios as of yearend 2024, 2023 and 2022. The decrease in securities from year-end 2023 was mainly a result of \$198.4 million of payments, maturities and calls on available-for-sale debt securities, and \$39.9 million of sales of available-for-sale debt securities, partially offset by \$55.9 million of securities purchases. Unrealized losses on the available-for-sale debt securities portfolio were \$135.6 million at year-end 2024, up from \$131.8 million at year-end 2023. The increase in unrealized losses at year end 2024 over prior year end was primarily attributable to market conditions.

Additional information on the securities portfolio is available in "Note 2 - Securities" in the Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K, which details the types of securities held, the carrying and fair values, and the contractual maturities as of December 31, 2024 and 2023.

The Company evaluates available-for-sale debt securities for expected credit losses ("ECL") in unrealized loss positions at each measurement date to determine whether the decline in the fair value below the amortized cost basis (impairment) is due to credit-related factors or noncredit-related factors.

Factors that may be indicative of ECL include, but are not limited to, the following:

- Extent to which the fair value is less than the amortized cost basis.
- Adverse conditions specifically related to the security, an industry, or geographic area (changes in technology, business practice).
- Payment structure of the debt security with respect to underlying issuer or obligor.
- Failure of the issuer to make scheduled payment of principal and/or interest.
- Changes to the rating of a security or issuer by a NRSRO.
- Changes in tax or regulatory guidelines that impact a security or underlying issuer.

For available-for-sale debt securities in an unrealized loss position, the Company evaluates the securities to determine whether the decline in the fair value below the amortized cost basis is the result of changes in interest rates or reflects a fundamental change in the creditworthiness of the underlying issuer. Any impairment that is not credit related is recognized in other comprehensive income, net of applicable taxes. Credit-related impairment is recognized as an allowance for credit losses ("ACL") on the Company's Statements of Condition, limited to the amount by which the amortized cost basis exceeds the fair value, with a corresponding adjustment to earnings. Both the ACL and the adjustment to net income may be reversed if conditions change. Management measures expected credit losses on held-to-maturity debt securities on a collective basis by major security type with each type sharing similar risk characteristics and considers historical credit loss information that is adjusted for current conditions and reasonable and supportable forecasts. Management has made the accounting policy election to exclude accrued interest receivable on held-to-maturity debt securities from the estimate of credit losses. As of December 31, 2024, the held-to-maturity portfolio consisted of U.S. Treasury securities and securities issued by U.S. government-sponsored enterprises, including Federal National Mortgage Agency, Federal Home Loan Bank, and Federal Farm Credit Banks Funding Corporation. U.S. Treasury securities are backed by the full faith and credit of and/or guaranteed by the U.S. government, and it is expected that the securities will not be settled at prices less than the amortized cost bases of the securities. Securities issued by U.S. government, are widely recognized as "risk-free," and have a long history of zero credit loss. As such, the Company did not record an allowance for credit losses for these securities as of December 31, 2024.

The gross unrealized losses reported for residential mortgage-backed securities relate to investment securities issued by U.S. government sponsored entities such as Federal National Mortgage Association, Federal Home Loan Mortgage Corporation ("FHLMC"), and U.S. government agencies such as Government National Mortgage Association. The total gross unrealized losses, shown in the tables above, were primarily attributable to changes in interest rates and levels of market liquidity, relative to when the investment securities were purchased, and not due to the credit-related quality of the investment securities. The Company does not have the intent to sell these securities and does not believe it is more likely than not that the Company will be required to sell these securities before a recovery of amortized cost.

The Company also holds non-marketable Federal Home Loan Bank New York ("FHLBNY") stock and non-marketable Atlantic Community Bankers Bank ("ACBB") stock, which are required to be held for regulatory purposes and for borrowing availability. The required investment in FHLBNY stock is tied to the Company's borrowing levels with the FHLBNY. Holdings of FHLBNY stock and ACBB stock totaled \$42.2 million and \$95,000 at December 31, 2024, respectively. These securities are carried at par, which is also cost. During 2024, the FHLBNY continued to pay dividends and repurchase stock. As such, the Company has not recognized any impairment on its holdings of FHLBNY. At December 31, 2023, the Company's holdings of FHLBNY stock and ACBB stock totaled \$33.6 million and \$95,000, respectively.

Management's policy is to purchase investment grade securities that, on average, have relatively short expected durations. This policy helps mitigate interest rate risk and provides sources of liquidity without significant risk to capital. The contractual maturity distribution of debt securities and mortgage-backed securities as of December 31, 2024, along with the weighted average yield of each category, is presented in *Table 3-Maturity Distribution* below. Balances are shown at amortized cost and weighted average yields are calculated on a fully tax-equivalent basis. Expected maturities may differ from contractual maturities presented in *Table 3-Maturity Distribution* below, because issuers may have the right to call or prepay obligations with or without penalty and mortgage-backed securities may pay throughout the periods prior to contractual maturity.

¹Balances of available-for-sale debt securities are shown at amortized cost.

² Interest income includes the tax effects of tax-equivalent adjustments using a combined New York State and Federal effective income tax rate of 24.5% to increase tax-exempt interest income to tax-equivalent basis.

The average tax-equivalent yield on the securities portfolio was 2.36% in 2024, 1.74% in 2023 and 1.40% in 2022.

At December 31, 2024, there were no holdings of any one issuer, other than the U.S. Government sponsored entities, in an amount greater than 10% of the Company's shareholders' equity.

Loans and Leases

Table 4 - Composition of Loan and Lease Portfolio

Total	\$ 3,379,817	100.00 % \$	5 3,112,667	100.00 %

¹*Retail included 2.7% and 2.9%, respectively, of owner occupied real estate at December 31, 2024 and December 31, 2023.*

² Office space included 1.4%, respectively, of owner occupied real estate at both December 31, 2024 and December 31, 2023.

³ Industrial included 2.27% and 2.16%, respectively, of owner occupied real estate at December 31, 2024 and December 31, 2023.

⁴ Medical included 2.45% and 2.69%, respectively, of owner occupied real estate at December 31, 2024 and December 31, 2023.

Total loans and leases of \$6.0 billion at December 31, 2024 increased \$414.0 million or 7.4% from December 31, 2023. The increase was mainly in commercial real estate loans and commercial and industrial loans. At December 31, 2024, total loans and leases represented 74.2% of total assets compared to 71.7% of total assets at December 31, 2023.

Residential real estate loans, including home equity loans, were \$1.6 billion at December 31, 2024, an increase of \$9.2 million or 0.6% compared to \$1.6 billion at year-end 2023. Residential real estate loans comprised 26.1% of total loans and leases at December 31, 2024 compared to 27.9% at December 31, 2023. Growth in residential loan balances is impacted by the Company's decision to retain these loans or sell them in the secondary market due to interest rate considerations. The Company's Asset/Liability Committee meets regularly and establishes standards for selling or retaining residential real estate mortgage originations.

The Company may sell residential real estate loans in the secondary market based on interest rate considerations. The Company's Asset/Liability Committee meets regularly and establishes standards for selling and retaining residential real estate mortgage originations. These residential real estate loans are generally sold to Federal Home Loan Mortgage Corporation ("FHLMC") without recourse in accordance with standard secondary market loan sale agreements. These residential real estate loans also are subject to customary representations and warranties made by the Company, including representations and warranties related to gross incompetence and fraud. The Company has not had to repurchase any loans as a result of these representations and warranties.

During 2024, 2023, and 2022, the Company sold residential mortgage loans totaling \$40.1 million, \$4.5 million, and \$8.9 million, respectively, and realized net gains on these sales of \$1.0 million, \$96,000, and \$155,000, respectively. When residential mortgage loans are sold to FHLMC or SONYMA, the Company typically retains all servicing rights, which provides the Company with a source of fee income. In connection with the sales in 2024, 2023, and 2022, the Company recorded mortgage-servicing assets of \$299,000, \$34,000, and \$66,000, respectively.

The Company originates fixed rate and adjustable rate residential mortgage loans. The Company also originates loans that have characteristics of both, such as a 7/6 adjustable rate mortgage, which has a fixed rate for the first seven years and then adjusts semi-annually thereafter. The majority of residential mortgage loans originated over the last several years have been fixed rate loans. Adjustable rate loans increased in 2023 and 2024 as a result of the higher interest rate environment. Adjustable rate residential real estate loans are underwritten based upon the initial rate when the fixed rate period is 5 years or longer. For loans

with an initial fixed rate of less than 5 years, the fully indexed rate is utilized for ability to repay qualifying and underwriting. This underwriting practice matches secondary market guidelines.

Commercial real estate loans totaled \$3.4 billion at December 31, 2024, an increase of \$267.2 million or 8.6% compared to December 31, 2023, and represented 56.1% of total loans and leases at December 31, 2024, compared to 55.5% at December 31, 2023.

Commercial and industrial loans totaled \$965.6 million at December 31, 2024, which was an increase of \$142.1 million or 17.3% from December 31, 2023. Commercial and industrial loans represented 16.0% of total loans at December 31, 2024 compared to 14.7% at December 31, 2023.

As of December 31, 2024, agriculturally-related loans totaled \$327.6 million or 5.4% of total loans and leases compared to \$322.9 million or 5.8% of total loans and leases at December 31, 2023. Agriculturally-related loans include loans to dairy farms and cash and vegetable crop farms. Agriculturally related loans are primarily made based on identified cash flows of the borrower with consideration given to underlying collateral, personal guarantees, and government related guarantees. Agriculturally-related loans are generally secured by the assets or property being financed or other business assets such as accounts receivable, livestock, equipment or commodities/crops.

The consumer loan portfolio includes personal installment loans, indirect automobile financing, and overdraft lines of credit. Consumer and other loans were \$96.4 million at December 31, 2024, compared to \$97.8 million at December 31, 2023.

The lease portfolio decreased by 18.8% to \$12.5 million at December 31, 2024 from \$15.4 million at December 31, 2023. As of December 31, 2024, commercial leases and municipal leases represented 100.0% of total leases.

The Company has adopted comprehensive lending policies, underwriting standards and loan review procedures. There were no significant changes to the Company's existing policies, underwriting standards and loan review procedures during 2024. The Company's Board of Directors approves the lending policies at least annually. The Company recognizes that exceptions to policy guidelines may occasionally occur and has established procedures for approving exceptions to these policy guidelines. Management has also implemented reporting systems to monitor loan originations, loan quality, concentrations of credit, loan delinquencies and nonperforming loans and potential problem loans.

The Company's loan and lease customers are located primarily in the New York and Pennsylvania communities served by its subsidiary bank. Although operating in numerous communities in New York and Pennsylvania, the Company is still dependent on the general economic conditions of these states and the local economic conditions of the communities within those states in which the Company does business.

Analysis of Past Due and Nonperforming Loans

	As of December 31,									
(In thousands)		2024		2023		2022		2021		2020

	~									

¹ The 2020 column in the above table excludes \$794,000 of acquired loans that were 90 days past due and accruing interest. These loans were originally recorded at fair value on the acquisition date of August 1, 2012. These loans are considered to be accruing as the Company can reasonably estimate future cash flows on these acquired loans and the Company expects to fully collect the carrying value of these loans. Therefore, the Company is accreting the difference between the carrying value of these loans and their expected cash flows into interest income.

The level of nonperforming assets as of the past five year-ends is illustrated in the table above. The Company's total nonperforming assets as a percentage of total assets was 0.80% at both December 31, 2024 and December 31, 2023, compared to its peer group's most recent ratio of 0.49% at September 30, 2024. The peer data is from the Federal Reserve Board and represents banks or bank holding companies with assets between \$3.0 billion and \$10.0 billion.

Nonperforming loans and leases totaled \$50.9 million at December 31, 2024 and decreased 18.3% from December 31, 2023. Nonperforming loans and leases represented 0.85% of total loans at December 31, 2024, compared to 1.11% of total loans at December 31, 2023, and 0.62% of total loans at December 31, 2022. Nonperforming loans and leases in the commercial real estate portfolio at year-end 2024 decreased by \$11.9 million compared to year-end 2023. The decrease in nonperforming loans was mainly due to a \$14.3 million decrease related to one commercial property being transferred from commercial real estate loans into other real estate owned ("OREO") during the fourth quarter of 2024.

The Company adopted ASU 2022-02 effective January 1, 2023. This standard eliminated the previous troubled debt restructuring ("TDR") accounting model and replaced it with guidance and disclosure requirements for identifying modifications to borrowers experiencing financial difficulty. Modifications to borrowers experiencing financial difficulty may include interest rate reductions, principal or interest forgiveness, forbearances, term extensions, and other actions intended to minimize economic loss and to avoid foreclosure or repossession of collateral. Prior year TDRs are included in the above table within the following categories: "loans 90 days past due and accruing", "nonaccrual loans", or "troubled debt restructurings not included above".

In general, the Company places a loan on nonaccrual status if principal or interest payments become 90 days or more past due and/or management deems the collectability of the principal and/or interest to be in question, as well as when called for by regulatory requirements. Although in nonaccrual status, the Company may continue to receive payments on these loans. These payments are generally recorded as a reduction to principal and interest income is recorded only after principal recovery is

reasonably assured. For additional financial information on the difference between the interest income that would have been recorded if these loans and leases had been paid in accordance with their original terms and the interest income that was recorded, refer to "Note 3 - Loans and Leases" in the Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K.

The Company's recorded investment in loans and leases that are individually evaluated totaled \$31.7 million at December 31, 2024, and \$44.4 million at December 31, 2023. The decrease from December 31, 2023, was mainly due to the one commercial real estate loan being moved into OREO mentioned above. A loan is individually evaluated when, based on current information and events, it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. Individually evaluated loans consist of our non-homogenous nonaccrual loans and loans that are 90 days or more past due. Specific reserves on individually evaluated loans that are not collateral dependent are measured based on the present value of expected future cash flows discounted at the original effective interest rate of each loan. For loans that are collateral dependent, impairment is measured based on the fair value of the collateral less estimated selling costs, and such impaired amounts are generally charged off.

At December 31, 2024, there were specific reserves of \$1.7 million, related to three commercial real estate relationships totaling \$7.5 million compared to \$1.1 million of specific reserves on one commercial real estate relationship totaling \$7.4 million at December 31, 2023. The majority of the individually evaluated loans are collateral dependent loans that have limited exposure or require limited specific reserves because of the amount of collateral support with respect to these loans or the loans have been written down to fair value. Interest payments on individually evaluated loans are typically applied to principal unless collectability of the principal amount is reasonably assured. In these cases, interest is recognized on a cash basis. There was no interest income recognized on individually evaluated loans and leases for 2024, 2023 and 2022.

The ratio of the allowance to nonperforming loans was 111.06% at December 31, 2024, compared to 82.84% at December 31, 2023. The increase in the ratio from year-end 2023 to year-end 2024 was mainly due to the decrease in nonperforming loans discussed in more detail above and, to a lesser extent, the increase in the allowance for credit losses. The Company's nonperforming loans are mostly made up of collateral dependent loans requiring little to no specific allowance due to the level of collateral available with respect to these loans and/or previous charge-offs.

Management reviews the loan portfolio for evidence of potential problem loans and leases. Potential problem loans and leases are loans and leases that are currently performing in accordance with contractual terms, but where known information about possible credit problems of the related borrowers causes management to have doubt as to the ability of such borrowers to comply with the present loan payment terms and may result in such loans and leases becoming nonperforming at some time in the future. Management considers loans and leases classified as Substandard, which continue to accrue interest, to be potential problem loans and leases. The Company, through its credit administration function, identified 16 commercial relationships in the loan portfolio totaling \$41.2 million at December 31, 2024 that were potential problem loans. At December 31, 2023, there were 17 commercial relationships totaling \$26.0 million that were considered potential problem loans. Of the 16 commercial relationships from the portfolio that were classified as potential problem loans at December 31, 2024, there were 4 relationships that individually equaled or exceeded \$1.0 million, which in aggregate totaled \$37.4 million. The increase in the aggregate amount of potential problem loans at year-end 2024 from year-end 2023 was mainly due to the addition of one commercial relationships 17.4 million.

Potential problem loans remain in a performing status due to a variety of factors, including payment history, the value of collateral supporting the credits, and personal or government guarantees. These factors, when considered in the aggregate, give management reason to believe that the current risk exposure on these loans does not warrant accounting for these loans as nonperforming. However, these loans do exhibit certain risk factors, which have the potential to cause them to become nonperforming. Accordingly, management's attention is focused on these credits, which are reviewed on at least a quarterly basis.

The Allowance for Credit Losses

Management reviews the appropriateness of the ACL on a regular basis. Management considers the accounting policy relating to the ACL to be a critical accounting policy, given the inherent uncertainty in evaluating the levels of the ACL required to cover credit losses in the portfolio and the material effect that assumptions could have on the Company's results of operations. The Company has developed a methodology to measure the amount of estimated credit loss exposure inherent in the loan portfolio to assure that an appropriate ACL is maintained. The Company's methodology is based upon guidance provided in SEC Staff Accounting Bulletin No. 119, *Measurement of Credit Losses on Financial Instruments ("CECL"), and Financial Instruments - Credit Losses* and *ASC Topic 326, Financial Instruments - Credit Losses*.

The Company uses a discounted cash flow ("DCF") method to estimate expected credit losses for all loan segments excluding the leasing segment. For each of these loan segments, the Company generates cash flow projections at the instrument level wherein payment expectations are adjusted for estimated prepayment speeds, curtailments, recovery lag, probability of default, and loss given default. The modeling of expected prepayment speeds, curtailment rates, and time to recovery are based on internal historical data.

The Company uses regression analysis of historical internal and peer data to determine suitable loss drivers to utilize when modeling lifetime probability of default and loss given default. This analysis also determines how expected probability of default and loss given default will react to forecasted levels of the loss drivers. For all loans utilizing the DCF method, management utilizes and forecasts national unemployment and a one year percentage change in national gross domestic product as loss drivers in the model.

For all DCF models, management has determined that four quarters represents a reasonable and supportable forecast period and reverts back to a historical loss rate over eight quarters on a straight-line basis. Management leverages economic projections from a reputable and independent third party to inform its loss driver forecasts over the four-quarter forecast period. Other internal and external indicators of economic forecasts, and scenario weightings, are also considered by management when developing the forecast metrics.

Due to the size and characteristics of the leasing portfolio, the Company uses the remaining life method, using the historical loss rate of the commercial and industrial segment, to determine the allowance for credit losses.

The combination of adjustments for credit expectations and timing expectations produces an expected cash flow stream at the instrument level. Instrument effective yield is calculated, net of the impacts of prepayment assumptions, and the instrument expected cash flows are then discounted at that effective yield to produce a net present value of expected cash flows ("NPV"). An ACL is established for the difference between the NPV and amortized cost basis.

Loans that do not share similar risk characteristics are evaluated on an individual basis. The ACL for individually evaluated loans is measured using the DCF method based on the loan's contractual interest rate, or at the loan's observable market price, or if the loan is collateral dependent, at the fair value of the collateral, less cost to sell.

Since the methodology is based upon historical experience and trends, current conditions, and reasonable and supportable forecasts, as well as management's judgment, factors may arise that result in different estimates. While management's evaluation of the allowance as of December 31, 2024 considers the allowance to be appropriate, under adversely different conditions or assumptions, the Company would need to increase or decrease the allowance. In addition, various federal regulatory agencies and the NYSDFS, as part of their examination process, review the Company's allowance and may require the Company to recognize additions to the allowance based on their judgments and information available to them at the time of their examinations.

As of December 31, 2024, the ACL was \$56.5 million, an increase of \$4.9 million or 9.5% from year-end 2023. The increase reflects provision for credit loss expense of \$6.6 million, less net loan charge-offs of \$2.5 million. The ratio of the allowance for credit losses as a percentage of total loans was 0.94% at year-end 2024 compared to 0.92% at year-end 2023. The allowance coverage to nonperforming loans and leases was 111.06% at December 31, 2024 compared to 82.84% at December 31, 2023.

The increase in the ACL from year-end 2023 reflects loan growth, mainly in commercial real estate and commercial loans; updates to model assumptions, including prepayment speeds, curtailment rates, and recovery lag; as well as updated economic forecasts for unemployment and gross domestic product during the fourth quarter. Reserves totaling approximately \$593,000 were added to the allowance during 2024 related to two commercial relationships that were individually evaluated for impairment. The ACL estimate reflects the difference between fair value of collateral less costs to sell and the amortized cost basis of the loans. Qualitative reserves were added to the commercial real estate portfolio at year-end 2024 driven by loan growth and asset quality, including higher than historical levels of past-due and nonaccrual loans.

Total loans were \$6.0 billion at December 31, 2024, an increase of \$414.0 million or 7.4% from December 31, 2023. The increase from year-end 2023 was mainly in the commercial real estate and commercial and industrial portfolios. Credit quality metrics at December 31, 2024, were mixed when compared to year-end 2023. Nonperforming assets represented 0.80% of total assets at December 31, 2024 and December 31, 2023. Nonperforming loans and leases decreased \$11.4 million or 18.3% from year end 2023 and represented 0.85% of total loans at December 31, 2024 compared to 1.11% at December 31, 2023. Loans internally-classified Special Mention or Substandard decreased \$14.9 million or 11.9% compared to December 31, 2023. The

decrease in nonperforming loans and loans internally-classified Special Mention or Substandard was mainly due to one commercial relationship totaling \$14.3 million being transferred to other real estate owned in 2024. Net loan charge-offs totaled \$2.5 million in 2024, compared to net recoveries of \$721,000 in 2023. Loans past due 30-89 days and accruing interest totaled \$28.8 million at year-end 2024 compared to \$4.2 million at year-end 2023. The increase was mainly the inclusion of one commercial real estate loan for \$17.4 million becoming past due during the fourth quarter of 2024.

The allocation of the Company's allowance as of December 31, 2024, and each of the previous four years is illustrated in *Table 5 - Allocation of the Allowance for Credit Losses*, below. The table provides an allocation of the allowance for credit losses for inherent loan losses by type. The allocation is neither indicative of the specific amounts or the loan categories in which future charge-offs may occur, nor is it an indicator of future loss trends. The allocation of the allowance for credit losses to each category does not restrict the use of the allowance to absorb losses in any category. The table shows a fairly consistent allocation of the loan portfolio and allowance over the period with commercial real estate and residential real estate representing the largest proportion of total loans and the allowance.

Table 5 - Allocation of the Allowance for Credit Losses

Table 6 - Analysis of the Allowance for Credit Losses shows the activity in the allowance for credit losses over the past five years. The allowance at December 31, 2024 was \$56.5 million, an increase of \$4.9 million from year-end 2023, reflecting a provision expense of \$7.4 million and net charge-offs of \$2.5 million for the year-ended December 31, 2024. Net charge-offs / (recoveries) as a percentage of average loans was 0.04% for 2024 compared to (0.01)% in 2023 and 2022.

As a result of the adoption of ASU 2016-13, the Company recorded a net cumulative-effect adjustment reducing the allowance for credit losses by \$2.5 million from \$39.9 million at December 31, 2019 to \$37.4 million at January 1, 2020.

Management believes that, based upon its evaluation as of December 31, 2024, the allowance is appropriate.

Loan Commitments and Allowance for Credit Losses on Off-Balance Sheet Credit Exposures

Financial instruments include off-balance sheet credit instruments, such as commitments to make loans, and commercial letters of credit. The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for off-balance sheet loan commitments is represented by the contractual amount of those instruments. Such financial instruments are recorded when they are funded. The Company records an allowance for credit losses on off-balance sheet credit exposures, unless the commitments to extend credit are unconditionally cancellable, through a charge to credit loss expense for off-balance sheet credit exposures included in other noninterest expense in the Company's consolidated statements of income. As of December 31, 2024, the Company's reserve for off-balance sheet credit exposures was \$1.5 million, compared to \$2.3 million at December 31, 2023.

Deposits and Other Liabilities

Total deposits were \$6.5 billion at December 31, 2024, an increase of \$72.0 million or 1.1% compared to year-end 2023. The increase from year-end 2023 consisted of savings and money market balances which were up \$74.1 million, and time deposits which were up \$70.4 million. These increases were partially offset by a \$72.5 million decrease in non-interest bearing deposits.

The most significant source of funding for the Company is core deposits. The Company defines core deposits as total deposits less time deposits of \$250,000 or more, brokered deposits, municipal money market deposits and reciprocal deposit relationships with municipalities. Core deposits increased by \$73.2 million or 1.4% to \$5.3 billion at year-end 2024 from \$5.2 billion at year-end 2023. Core deposits represented 81.3% of total deposits at December 31, 2024, compared to 81.1% of total deposits at December 31, 2023.

Municipal money market accounts and reciprocal deposit relationships with municipalities totaled \$426.5 million at year-end 2024, which decreased 21.3% from year-end 2023. In general, there is a seasonal pattern to municipal deposits starting with a low point during July and August. Account balances tend to increase throughout the fall and into the winter months from tax deposits and receive an additional inflow at the end of March from the electronic deposit of state funds.

The Company uses both retail and wholesale repurchase agreements. Retail repurchase agreements are arrangements with local customers of the Company, in which the Company agrees to sell securities to the customer with an agreement to repurchase those securities at a specified later date. Retail repurchase agreements totaled \$37.0 million at December 31, 2024, and \$51.0 million at December 31, 2023. Management generally views local repurchase agreements as an alternative to large time deposits. Refer to "Note 8 - Federal Funds Purchased and Securities Sold Under Agreements to Repurchase" in the Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K for further details on the Company's repurchase agreements.

The Company's other borrowings totaled \$790.2 million at year-end 2024, which were up \$188.1 million over prior year end. Loan growth over year-end 2023 contributed to the increase in borrowings year-over-year. The \$790.2 million in borrowings at December 31, 2024, included \$247.0 million in overnight advances from the FHLB and \$543.2 million in term advances from the FHLB. Borrowings of \$602.1 million at year-end 2023 represented \$477.1 million in overnight borrowings and \$125.0 million in FHLB term advances. Of the \$543.2 million in FHLB term advances at year-end 2024, \$345.0 million are due within three months, \$53.2 million are due between six months and one year, and \$145.0 million are due in over one year. Refer to "Note 9 - Other Borrowings" in Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K for further details on the Company's term borrowings with the FHLB.

Liquidity Management

The objective of liquidity management is to ensure the availability of adequate funding sources to satisfy the demand for credit, deposit withdrawals, operating expenses, and business investment opportunities. The Company's large, stable core deposit base and strong capital position are the foundation for the Company's liquidity position. The Company uses a variety of resources to meet its liquidity needs, which include deposits, cash and cash equivalents, short-term investments, cash flow from lending and investing activities, repurchase agreements, and borrowings. The Company may also use borrowings as part of a growth strategy. Asset and liability positions are monitored primarily through the Asset/Liability Management Committee of the Company's subsidiary bank. This Committee reviews periodic reports on the liquidity and interest rate sensitivity positions. Comparisons with industry and peer groups are also monitored. The Company's strong reputation in the communities it serves, along with its strong financial condition, provides access to numerous sources of liquidity as described below. Management believes these diverse liquidity sources provide sufficient means to meet all demands on the Company's liquidity that are reasonably likely to occur. Management measures liquidity, including the level of cash, unencumbered securities, and the availability of dependable borrowing sources. The board has set a policy limit stating that reliable sources of liquidity should remain in excess of 6% of total assets. The ratio was 10.3% of total assets at December 31, 2024.

Core deposits, discussed above under "Deposits and Other Liabilities", are a primary and low cost funding source obtained primarily through the Company's branch network. In addition to core deposits, the Company uses non-core funding sources to support asset growth. These non-core funding sources include time deposits of \$250,000 or more, municipal money market deposits, brokered deposits, reciprocal deposits, bank borrowings, securities sold under agreements to repurchase and overnight and term advances from the FHLB. Rates and terms are the primary determinants of the mix of these funding sources. Non-core funding sources of \$2.0 billion at December 31, 2024 increased \$173.0 million, or 9.3% as compared to December 31, 2023. Non-core funding sources, as a percentage of total liabilities, were 27.5% at December 31, 2024, compared to 26.1% at December 31, 2023.

Non-core funding sources may require securities to be pledged against the underlying liability. Securities carried at \$904.2 million at December 31, 2024 were either pledged or sold under agreements to repurchase, compared to \$1.0 billion at December 31, 2023. Pledged securities or securities sold under agreements to repurchase represented 53.8% of total securities at December 31, 2024, compared to 54.8% of total securities at December 31, 2023.

Cash and cash equivalents totaled \$134.4 million as of December 31, 2024 which increased from \$79.5 million at December 31, 2023. Short-term investments, consisting of securities due in one year or less, increased from \$98.7 million at December 31, 2023, to \$99.2 million on December 31, 2024.

Cash flow from the loan and investment portfolios provides a significant source of liquidity. These assets may have stated maturities in excess of one year, but have monthly principal reductions. Total mortgage-backed securities, at fair value, were \$699.6 million at December 31, 2024 compared with \$766.1 million at December 31, 2023. Outstanding principal balances of residential mortgage loans, consumer loans, and leases totaled approximately \$1.7 billion at December 31, 2024, up \$5.0 million, or 0.3% compared with December 31, 2023. Aggregate amortization from monthly payments on these assets provides significant additional cash flow to the Company.

Liquidity is enhanced by ready access to national and regional wholesale funding sources including Federal funds purchased, repurchase agreements, brokered certificates of deposit, and FHLB advances. Through its subsidiary bank, the Company has borrowing relationships with the FHLB and correspondent banks, which provide secured and unsecured borrowing capacity. As members of the FHLB, the Company's subsidiary banks can use certain unencumbered mortgage-related assets and securities to secure additional borrowings from the FHLB. At December 31, 2024, the established borrowing capacity with the FHLB was \$1.5 billion, or 18.4% of total assets, with available unencumbered mortgage-related assets of \$502.8 million. In addition to the \$790.2 million of FHLB borrowings outstanding at December 31, 2024, the Company had utilized \$200 million of availability at December 31, 2024, to collateralize municipal deposits through several standby letters of credit with the FHLB. Additional assets may also qualify as collateral for FHLB advances upon approval of the FHLB.

Through various programs at the Federal Reserve Bank, the Company has the ability to use certain unencumbered mortgagerelated assets and securities to secure borrowings from the Federal Reserve Bank's Discount Window. At December 31, 2024 the available borrowing capacity with the Federal Reserve Bank was \$141.4 million, secured by investment securities. In addition to the available borrowing lines at the FHLB and Federal Reserve Bank, the Company maintains \$606.1 million of unencumbered securities which could be pledged to further enhance secured borrowing capacity.

The Company has not identified any trends or circumstances that are reasonably likely to result in material increases or decreases in liquidity in the near term.

Table 7 - Loan Maturity

Remaining maturity of loans December 31, 2024

(In thousands)	Total]	Less than 1 year	After 1 year to 5 years	fter 5 years to 15 years	After 15 years
Commercial and industrial	\$ 965,575	\$	248,210	\$ 291,786	\$ 226,986	\$ 198,593
Commercial real estate	3,379,817		181,689	661,838	1,518,673	1,017,617
Residential real estate	1,570,840		879	22,118	267,794	1,280,049
Total	\$ 5,916,232	\$	430,778	\$ 975,742	\$ 2,013,453	\$ 2,496,259

Of the loan amounts shown above in Table 7 - Loan Maturity, maturing over 1 year, \$2.4 billion have fixed rates and \$3.1 billion have adjustable rates.

Off-Balance Sheet Arrangements

In the normal course of business, the Company is party to certain financial instruments, which in accordance with accounting principles generally accepted in the United States, are not included in its Consolidated Statements of Condition. These transactions include commitments under standby letters of credit, unused portions of lines of credit, and commitments to fund new loans and are undertaken to accommodate the financing needs of the Company's customers. Loan commitments are agreements by the Company to lend monies at a future date. These loan and letter of credit commitments are subject to the same credit policies and reviews as the Company's loans. Because most of these loan commitments expire within one year from the date of issue, the total amount of these loan commitments and contingent liabilities is provided in "Note 16 - Commitments and Contingent Liabilities" in the Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K.

Contractual Obligations

The Company leases land, buildings, and equipment under operating lease arrangements extending to the year 2090. Most leases include options to renew for periods ranging from 5 to 20 years. In addition, the Company has a software contract for its core banking application through June 30, 2030 along with contracts for more specialized software programs through 2029. Further information on the Company's lease arrangements is provided in "Note 6 - Premises and Equipment" in the Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K. The Company's contractual obligations as of December 31, 2024, are shown in *Table 8-Contractual Obligations and Commitments* below.

Table 8 - Contractual Obligations and Commitments

Contractual cash obligations	At December 31, 2024 Payments due within							
(In thousands)	Total	1 year		1-3 years		3-5 years	A	fter 5 years

Total contractual cash obligations	\$ 608,705 \$	415,269	\$	138,717	\$	34,819	\$	19,900

¹ Operating leases include renewals the Company considers reasonably certain to exercise.

Non-GAAP Disclosure

The following table summarizes the Company's results of operations on a GAAP basis and on an operating (non-GAAP) basis for the periods indicated. The non-GAAP financial measures adjust GAAP measures to exclude the effects of non-operating items, such as the effects of the sales of available-for-sale debt securities, and significant nonrecurring income or expense on earnings, equity, and capital. The Company believes the non-GAAP measures provide meaningful comparisons of our underlying operational performance and facilitate management's and investors' assessments of business and performance trends in comparison to others in the financial services industry. These non-GAAP financial measures should not be considered in isolation or as a measure of the Company's profitability or liquidity; they are in addition to, and are not a substitute for, financial measures under GAAP. The non-GAAP financial measures presented herein may be different from non-GAAP financial measures used by other companies, and may not be comparable to similarly titled measures reported by other companies. In the future, the Company may utilize other measures to illustrate performance. Non-GAAP financial measures have limitations since they do not reflect all of the amounts associated with the Company's results of operations as determined in accordance with GAAP.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market Risk

Interest rate risk is the primary market risk category associated with the Company's operations. Interest rate risk refers to the volatility of earnings caused by changes in interest rates. The Company manages interest rate risk using income simulation to measure interest rate risk inherent in its on-balance sheet and off-balance sheet financial instruments at a given point in time. The simulation models are used to estimate the potential effect of interest rate shifts on net interest income for future periods. Each quarter the Company's Asset/Liability Management Committee reviews the simulation results to determine whether the exposure of net interest income to changes in interest rates remains within Board-approved levels. The Committee also considers strategies to manage this exposure and incorporates these strategies into the investment and funding decisions of the Company. The Company uses derivatives to manage various risks and to accommodate the business requirements of its customers. Additional information on derivatives is available in "Note 22 - Derivatives and Hedging Activities" in the Notes to Consolidated Financial Statements in Part II, "Item 8. Financial Statements and Supplementary Data" of this Report on Form 10-K.

The Company's Board of Directors has set a policy that interest rate risk exposure will remain within a range whereby net interest income will not decline by more than 10% in one year as a result of a 100 basis point parallel change in rates. Based upon the most recent simulation analysis performed as of November 30, 2024, a 200 basis point parallel upward change in interest rates over a one-year time frame would result in a one-year decrease in net interest income from the base case of approximately 3.9%, while a 200 basis point parallel decline in interest rates over a one-year period would result in a one year increase in net interest income of 3.9% from the base case. This simulation assumes no balance sheet growth, no changes in balance sheet mix, deposit rates move in a manner that reflects the historical relationship between deposit rate movement and changes in Federal funds rate, and no management action to address balance sheet mismatches.

The decrease in net interest income in the rising rate scenario is a result of the balance sheet showing a more liability sensitive position over a one year time horizon. As such, in a rising rate scenario, in the short-term, net interest income would be expected to trend slightly below the base assumption, as upward adjustments to rate sensitive deposits and short-term funding outpace increases to asset yields which are concentrated in intermediate to longer-term products. As intermediate and longer-term assets continue to reprice/adjust into higher rate environment and funding costs stabilize, the simulation shows net interest income would be expected to trend upwards.

The 200 basis point decline scenario increases net income slightly in the first year as a result of the Company's assets repricing downward to a lesser degree than the rates on the Company's interest-bearing liabilities, mainly deposits and overnight borrowings. The model assumes that prepayments accelerate in the down interest rate environment resulting in additional pressure on asset yields as proceeds are reinvested at lower rates.

The most recent simulation of a base case scenario, which in addition to the above assumptions, also assumes interest rates remain unchanged from the date of the simulation, reflects a net interest margin that is increasing over the next 12 to 18 months.

Although the simulation model is useful in identifying potential exposure to interest rate movements, actual results may differ from those modeled as the repricing, maturity, balance sheet mix, and prepayment characteristics of financial instruments may change to a different degree than modeled. In addition, the model does not reflect actions that management may employ to manage the Company's interest rate risk exposure. The Company's current liquidity profile, capital position, and growth prospects offer a level of flexibility for management to take actions that could offset some of the negative effects of unfavorable movements in interest rates. Management believes the current exposure to changes in interest rates is not significant in relation to the earnings and capital strength of the Company.

In addition to the simulation analysis, management uses an interest rate gap measure. *Table 9-Interest Rate Risk Analysis* below is a Condensed Static Gap Report, which illustrates the anticipated repricing intervals of assets and liabilities as of December 31, 2024. The Company's one-year interest rate gap was a negative \$565.8 million or 6.98% of total assets at December 31, 2024, compared with a negative \$836.6 million or 10.70% of total assets at December 31, 2023. The change from year-end 2023 to year-end 2024 is mainly due to the decrease in overnight borrowings with the FHLB into longer maturities, which were used to support loan growth. A negative gap position exists when the amount of interest-bearing liabilities maturing or repricing within a particular time period. This analysis suggests that the Company's net interest income is moderately at risk in an increasing rate environment over the next 12 months. An interest rate gap measure could be significantly affected by external factors such as a rise or decline in interest rates, loan or securities prepayments, and deposit withdrawals.

Table 9 - Interest Rate Risk Analysis

December 31, 2024

Management's Statement of Responsibility

Management is responsible for the preparation of the consolidated financial statements and related financial information contained in all sections of this annual report, including the determination of amounts that must necessarily be based on judgments and estimates. It is the belief of management that the consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles.

Management establishes and monitors the Company's system of internal accounting controls to meet its responsibility for reliable financial statements. The system is designed to provide reasonable assurance that assets are safeguarded, and that transactions are executed in accordance with management's authorization and are properly recorded.

The Audit & Examining Committee of the board of directors, composed solely of outside directors, meets periodically and privately with management, internal auditors, and the independent registered public accounting firm, KPMG LLP, to review matters relating to the quality of financial reporting, internal accounting control, and the nature, extent, and results of audit efforts. The independent registered public accounting firm and internal auditors have unlimited access to the Audit/Examining Committee to discuss all such matters. The consolidated financial statements have been audited by KPMG LLP for the purpose of expressing an opinion on the consolidated financial statements. In addition, KPMG LLP has audited the Company's internal control over financial reporting, as of December 31, 2024.

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors Tompkins Financial Corporation:

Opinion on Internal Control Over Financial Reporting

We have audited Tompkins Financial Corporation and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated statements of condition of the Company as of December 31, 2024 and 2023, the related consolidated statements of income, comprehensive income, cash flows, and changes in shareholders' equity for each of the years in the three-year period ended December 31, 2024, and the related notes (collectively, the consolidated financial statements), and our report dated February 28, 2025 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ KPMG LLP Rochester, New York February 28, 2025

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors Tompkins Financial Corporation:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated statements of condition of Tompkins Financial Corporation and subsidiaries (the Company) as of December 31, 2024 and 2023, the related consolidated statements of income, comprehensive income, cash flows and changes in shareholders' equity for each of the years in the three-year period ended December 31, 2024, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2024, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 28, 2025 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Allowance for Credit Losses - Loans evaluated on a Collective Basis

As discussed in Notes 1 and 4 to the consolidated financial statements, the Company's allowance for credit losses on loans evaluated on a collective basis (the collective ACL on loans) was \$54.784 million out of a total allowance for credit losses on loans of \$56.496 million as of December 31, 2024. The collective ACL on loans includes the measure of expected credit losses on a collective (pooled) basis for those loans that share similar risk characteristics. The methodologies apply historical loss information, adjusted for asset-specific characteristics, economic conditions at the measurement date, and forecasts about future economic conditions expected to exist through the contractual lives of the financial assets that are reasonable and supportable. The Company uses a discounted cash flow methodology (DCF methodology) where the respective cash flows for each segment are developed using the assumptions of probability of default (PD), loss given default (LGD), estimated prepayment speeds, and exposure at default. The DCF methodology is calculated at the loan level and aggregated at the segment level; expected credit losses are estimated over the effective life of the loans by measuring the difference between the net present value of

modeled cash flows and the amortized cost basis. The Company uses models to develop the PD and LGD, which are derived from internal and selected peer groups' historical default and loss experience, that incorporate probability weighted economic scenarios and macroeconomic assumptions over a reasonable and supportable forecast period. In order to capture the unique risks of the loan segments within the PD and LGD models, the Company measures expected credit losses at the loan level by segment, by pooling loans when the financial assets share similar risk characteristics. After the reasonable and supportable forecast period, the Company reverts back to a historical loss rate over eight quarters on a straight-line basis. A portion of the collective ACL on loans is comprised of adjustments to historical loss information. These adjustments are based on qualitative factors not reflected in the quantitative model but likely to impact the measurement of estimated credit losses.

We identified the assessment of the collective ACL on loans as a critical audit matter. A high degree of audit effort, including specialized skills and knowledge, and subjective and complex auditor judgment was involved in the assessment of the collective ACL on loans due to significant measurement uncertainty. Specifically, the assessment encompassed the evaluation of the collective ACL on loans methodology, including the methods and models used to estimate the modeled cash flows and other significant assumptions, including portfolio segmentation, estimated prepayment speeds, the economic forecast scenarios and scenario weightings, macroeconomic assumptions, the reasonable and supportable forecast period, the composition of the peer group data, and the historical observation period. The assessment also included the evaluation of the qualitative factors and their significant assumptions, including the effects of limitations inherent in the quantitative model and an evaluation of the conceptual soundness and performance of the PD and LGD models. In addition, auditor judgment was required to evaluate the sufficiency of audit evidence obtained.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the measurement of the collective ACL on loans, including controls over the:

- development of the collective ACL on loans methodology
- continued use and appropriateness of changes made to PD and LGD models
- performance monitoring of the PD and LGD models
- identification and determination and measurement of the significant assumptions used in the PD and LGD models, including prepayment assumptions
- development of the qualitative factors including the significant assumptions used in the measurement of the qualitative factors; and
- analysis of the collective ACL on loans results, trends, and ratios.

We evaluated the Company's process to develop the collective ACL on loans estimate by testing certain sources of data, factors, and assumptions that the Company used, and considered the relevance and reliability of such data, factors, and assumptions. In addition, we involved credit risk professionals with specialized skills and knowledge, who assisted in:

- evaluating the Company's collective ACL on loans methodology for compliance with U.S. generally accepted accounting principles
- evaluating judgments made by the Company relative to the development and performance testing of the discounted cash flow model, and other significant assumptions such as prepayment speeds by comparing them to relevant Company-specific metrics and trends and the applicable industry and regulatory practices
- assessing the conceptual soundness and performance testing of the discounted cash flow model, by inspecting the model documentation to determine whether the model is suitable for its intended use
- evaluating the economic forecast scenarios and weightings, by comparing them to the Company's business environment and relevant industry practices
- evaluating the length of the historical observation period and reasonable and supportable forecast period by comparing them to specific portfolio risk characteristics and trends
- assessing the composition of the peer group by comparing to specific portfolio characteristics and
- evaluating the methodology used to develop the qualitative factors and the effect of those factors on the collective ACL on loans compared with relevant credit risk factors and consistency with credit trends and identified limitations of the underlying quantitative model.

We also assessed the sufficiency of the audit evidence obtained related to the collective ACL on loans by evaluating the:

- cumulative results of the audit procedures
- qualitative aspects of the Company's accounting practices
- potential bias in the accounting estimate.

/s/ KPMG LLP

We have served as the Company's auditor since 1995.

Note 1 Summary of Significant Accounting Policies

Basis Of Presentation

Tompkins Financial Corporation ("Tompkins" or "the Company") is registered as a Financial Holding Company with the Federal Reserve Board pursuant to the Bank Holding Company Act of 1956, as amended, organized under the laws of New York State. Tompkins is the parent company of Tompkins Community Bank, and Tompkins Insurance Agencies, Inc. ("Tompkins Insurance"). Tompkins Community Bank provides a full array of trust and investment services under the Tompkins Financial Advisors brand. Unless the context otherwise requires, the term "Company" refers to Tompkins Financial Corporation and its subsidiaries.

The Company determines whether it has a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity or a variable interest entity under GAAP. Voting interest entities are entities in which the total equity investment at risk is sufficient to enable the entity to finance itself independently and provides the equity holders with the obligation to absorb losses, the right to receive residual returns and the right to make decisions about the entity's activities. The Company consolidates voting interest entities in which it has all, or at least a majority of, the voting interest. As defined in applicable accounting standards, variable interest entities (VIEs) are entities that lack one or more of the characteristics of a voting interest entity. A controlling financial interest in a VIE is present when the Company has both the power and ability to direct the activities of the VIE that most significantly impact the VIE's economic performance and an obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE.

The consolidated financial statements have been prepared in accordance with GAAP. In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclose contingent assets and liabilities, at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Actual results could differ from those estimates. Significant items subject to such estimates and assumptions include the allowance for credit losses, valuation of goodwill and intangible assets, deferred income tax assets, and obligations related to employee benefits.

The consolidated financial information included herein combines the results of operations, assets, liabilities, and shareholders' equity (including comprehensive income or loss) of the Company and entities in which the Company has a controlling financial interest. All significant intercompany balances and transactions are eliminated in consolidation. Amounts in the prior periods' consolidated financial statements are reclassified when necessary to conform to the current periods' presentation.

The Company has evaluated subsequent events for potential recognition and/or disclosure and determined that no further disclosures were required.

Cash and Cash Equivalents

Cash and cash equivalents in the Consolidated Statements of Cash Flows include cash and noninterest bearing balances due from banks, interest-bearing balances due from banks, Federal funds sold, and money market funds. Management regularly evaluates the credit risk associated with the counterparties to these transactions and believes that the Company is not exposed to any significant credit risk on cash and cash equivalents.

Securities

Management determines the appropriate classification of debt securities at the time of purchase. Securities are classified as held-to-maturity when the Company has the positive intent and ability to hold the securities to maturity. Held-to-maturity debt securities are stated at amortized cost. Debt securities not classified as held-to-maturity debt securities are classified as either available-for-sale or equity. Available-for-sale debt securities are stated at fair value with the unrealized gains and losses, net of tax, excluded from earnings and reported as a separate component of accumulated comprehensive income or loss, in shareholders' equity. Certain equity securities that do not have a readily determinable fair value are stated at cost. Shares of stock of the Federal Home Loan Bank of New York, are also carried at cost.

Premiums and discounts are amortized or accreted over the expected life or call date of the related security as an adjustment to yield using the interest method. Dividend and interest income are recognized when earned. Realized gains and losses on the sale of securities are included in net gain (loss) on securities transactions. The cost of securities sold is based on the specific identification method.

For available-for-sale debt securities in an unrealized loss position, at least quarterly, the Company evaluates the securities to determine whether the decline in the fair value below the amortized cost basis (impairment) is due to credit-related factors or

noncredit-related factors. Any impairment that is not credit-related is recognized in other comprehensive income (loss), net of applicable taxes. Credit-related impairment is recognized as an allowance for credit losses ("ACL") on the Statements of Condition, limited to the amount by which the amortized cost basis exceeds the fair value, with a corresponding adjustment to earnings. Both the ACL and the adjustment to net income may be reversed if conditions change. However, if the Company intends to sell an impaired available-for-sale debt security or more likely than not will be required to sell such a security before recovering its amortized cost basis. Because the security's amortized cost basis is adjusted to fair value, there is no ACL in this situation. Changes in the allowance for credit losses are recorded as provision (credit) for credit loss expense. Losses are charged against the ACL when management believes the uncollectability of an available-for-sale debt security is confirmed or when either of the criteria regarding intent or requirement to sell is met.

Management measures expected credit losses on held-to-maturity debt securities on a collective basis by major security type with each type sharing similar risk characteristics and considers historical credit loss information that is adjusted for current conditions and reasonable and supportable forecasts.

Accrued interest receivable on securities is excluded from the estimate of credit losses.

Loans and Leases

Loans are reported at their principal outstanding balance, net of deferred loan origination fees and costs, and unearned income. The Company has the ability and intent to hold its loans for the foreseeable future, except for certain residential real estate loans held-for-sale. The Company provides motor vehicle and equipment financing to its customers through direct financing leases. These leases are carried at the aggregate of lease payments receivable, plus estimated residual values, less unearned income. Unearned income on direct financing leases is amortized over the lease terms, resulting in a level rate of return.

Residential real estate loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or estimated fair value. Fair value is determined on the basis of the rates quoted in the secondary market. Net unrealized losses attributable to changes in market interest rates are recognized through a valuation allowance by charges to income. Loans are generally sold on a non-recourse basis with servicing retained. Any gain or loss on the sale of loans is recognized at the time of sale as the difference between the recorded basis in the loan and the net proceeds from the sale. The Company may use commitments at the time loans are originated or identified for sale to mitigate interest rate risk. The commitments to sell loans and the commitments to originate loans held-for-sale at a set interest rate, if originated, are considered derivatives under Accounting Standard Codification ("ASC") Topic 815, *Derivatives and Hedging*. The impact of the estimated fair value adjustment was not significant to the consolidated financial statements.

Interest income on loans is accrued and credited to income based upon the principal amount outstanding. Loan origination fees and costs are deferred and recognized over the life of the loan as an adjustment to yield. Loans are considered past due if the required principal and interest payments have not been received as of the date such payments are due. Loans and leases, including individually evaluated loans, are generally classified as nonaccrual if they are past due as to maturity or payment of principal or interest for a period of more than 90 days, unless such loans are well secured and in the process of collection. Loans that are past due less than 90 days may also be classified as nonaccrual if repayment in full of principal or interest is in doubt.

Loans may be returned to accrual status when all principal and interest amounts contractually due (including arrearages) are reasonably assured of repayment within an acceptable time period, and there is a sustained period (generally six consecutive months) of repayment performance by the borrower in accordance with the contractual terms of the loan agreement. When interest accrual is discontinued, all unpaid accrued interest is reversed. Payments received on loans on nonaccrual are generally applied to reduce the principal balance of the loan.

In general, the principal balance of a loan is charged off in full or in part when management concludes, based on the available facts and circumstances, that collection of principal in full is not probable. For commercial and commercial real estate loans, this conclusion is generally based upon a review of the borrower's financial condition and cash flow, payment history, economic conditions, and the conditions in the various markets in which the collateral, if any, may be liquidated. In general, consumer loans are charged-off in accordance with regulatory guidelines which provide that such loans be charged-off when the Company becomes aware of the loss, such as from a triggering event that may include new information about a borrower's intent/ability to repay the loan, bankruptcy, fraud or death, among other things, but in no case will the charge-off exceed specified delinquency timeframes. Such delinquency timeframes state that closed-end retail loans (loans with pre-defined maturity dates, such as real estate mortgages, home equity loans and consumer installment loans) that become past due 120 cumulative days and open-end retail loans (loans that roll-over at the end of each term, such as home equity lines of credit) that become past due 180 cumulative days should be classified as a loss and charged-off. For residential real estate loans, charge-off

decisions are based upon past due status, current assessment of collateral value, and general market conditions in the areas where the properties are located.

Acquired Loans

Acquired loans are recorded at fair value at the date of acquisition based on a discounted cash flow methodology that considers various factors including the type of loan and related collateral, classification status, fixed or variable interest rate, term of loan and whether or not the loan was amortizing, and a discount rate reflecting the Company's assessment of risk inherent in the cash flow estimates. Certain larger purchased loans are individually evaluated while other purchased loans are grouped together according to similar risk characteristics and are treated in the aggregate when applying various valuation techniques. These cash flow evaluations are inherently subjective as they require material estimates, all of which may be susceptible to significant change.

Allowance for Credit Losses – Loans

The Company estimates the ACL on loans based on the underlying assets' amortized cost basis, which is the amount at which the financing receivable is originated or acquired, adjusted for applicable accretion or amortization of premium, discount, collection of cash, and charge-offs. In the event that collection of principal becomes uncertain, the Company has policies in place to reverse accrued interest in a timely manner. Therefore, the Company has made a policy election to exclude accrued interest from the amortized cost basis.

Expected credit losses are reflected in the ACL through a charge to the provision for credit loss expense. When the Company deems all or a portion of a financial asset to be uncollectible, the appropriate amount is written off and the ACL is reduced by the same amount. In general, the principal balance of a loan is charged off in full or in part when management concludes, based on the available facts and circumstances, that collection of principal in full is not probable. In addition, the Company has reserves for expected recoveries where the Company reviews the prior four quarter charge-offs and applies a recovery rate based on the Company's historical experience. Subsequent recoveries, if any, are credited to the ACL when received.

The Company measures expected credit losses of financial assets at the loan level by segment, by pooling loans when the financial assets share similar risk characteristics. Depending on the nature of the pool of financial assets with similar risk characteristics, the Company uses a discounted cash flow ("DCF") method to estimate the expected credit losses. Allowance on loans that do not share risk characteristics are evaluated on an individual basis. The Company assigns a credit risk rating to all commercial and commercial real estate loans. The Company reviews commercial and commercial real estate loans rated Substandard or worse, on nonaccrual, and greater than \$250,000 for loss potential and when deemed appropriate, assigns an allowance based on an individual evaluation.

The Company's methodologies for estimating the ACL consider available relevant information about the collectability of cash flows, including information about past events, current conditions, and reasonable and supportable forecasts. The methodologies apply historical loss information, adjusted for asset-specific characteristics, economic conditions at the measurement date, and forecasts about future economic conditions expected to exist through the contractual lives of the financial assets that are reasonable and supportable, to the identified pools of financial assets with similar risk characteristics for which the historical loss experience was observed. The Company's methodologies revert back to average historical loss information on a straight line basis over eight quarters when it can no longer develop reasonable and supportable forecasts.

The Company has identified the following pools of financial assets with similar risk characteristics for measuring expected credit losses: commercial, commercial real estate, residential, home equity, consumer and leases. This segmentation was selected based on the differences in the risk profile of each of these categories and aligns well with regulatory reporting categories. This segmentation separates borrower type, collateral type and the nature of the loan. The differences in risk profiles of these segments enable the ACL to be more precise in its allocation due to the inherent risk in these specific portfolios.

Discounted Cash Flow Method

The Company uses the DCF method to estimate expected credit losses for the commercial, commercial real estate, residential, home equity, and consumer loan pools. For each of these loan segments, the Company generates cash flow projections at the instrument level wherein payment expectations are adjusted for exposure at default using estimated prepayment speeds, time to recovery, probability of default, and loss given default. The modeling of expected prepayment speeds, and time to recovery are based on historical internal data.

The Company uses regression analysis of historical internal and peer data to determine suitable loss drivers to utilize when modeling lifetime probability of default and loss given default. This analysis also determines how expected probability of default and loss given default will react to forecasted levels of the loss drivers. For all loan pools utilizing the DCF method,

management utilizes and forecasts national unemployment and a one-year percentage change in national gross domestic product as loss drivers in the model.

For all DCF models, management has determined that four quarters represents a reasonable and supportable forecast period and reverts back to a historical loss rate over eight quarters on a straight-line basis. Management leverages economic projections from an independent third party to inform its loss driver forecasts over the four-quarter forecast period. Other internal and external indicators of economic forecasts, and scenario weightings, are also considered by management when developing the forecast metrics. The model considers a base case forecast and two alternative forecasts and assigns weightings to these three scenarios based on current conditions and expectations for future conditions.

The combination of adjustments for credit expectations (default and loss) and timing expectations (prepayment, curtailment, and time to recovery) produces an expected cash flow stream at the instrument level. Instrument effective yield is calculated, net of the impacts of prepayment assumptions, and the instrument expected cash flows are then discounted at that effective yield to produce an instrument-level net present value of expected cash flows ("NPV"). An ACL is established for the difference between the instrument's NPV and amortized cost basis.

The model also considers the need to qualitatively adjust expected loss estimates for information not already captured in the loss estimation process. These qualitative factors include, but are not limited to, those suggested by the Interagency Policy Statement on Allowances for Credit Losses. These qualitative factor adjustments may increase or decrease the Company's estimate of expected credit losses.

Due to the size and characteristics of the leasing portfolio, the remaining life method, using the historical loss rate of the commercial and industrial segment, is used to determine the allowance for credit losses.

Individually Evaluated Financial Assets

Loans that do not share common risk characteristics are evaluated on an individual basis. For collateral dependent financial assets where the Company has determined that foreclosure of the collateral is probable, or where the borrower is experiencing financial difficulty and the Company expects repayment of the financial asset to be provided substantially through the operation or sale of the collateral, the ACL is measured based on the difference between the fair value of the collateral less cost to sell, and the amortized cost basis of the asset as of the measurement date. The ACL may be zero if the fair value of the collateral at the measurement date exceeds the amortized cost basis of the financial asset.

The Company's estimate of the ACL reflects losses expected over the remaining contractual life of the assets. The contractual term does not consider extensions, renewals or modifications unless the Company has identified an expected troubled debt restructuring.

For acquired credit impaired loans accounted for under FASB ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality, ("ASC Topic 310-30"), the Company's allowance for loan and lease losses was estimated based upon our expected cash flows for these loans. To the extent that we experienced a deterioration in borrower credit quality resulting in a decrease in our expected cash flows subsequent to the acquisition of the loans, an allowance for loan losses would be established based on our estimate of future credit losses over the remaining life of the loans.

For acquired non-credit impaired loans accounted for under FASB ASC Topic 310-20, Nonrefundable Fees and Other Costs, ("ASC Topic 310-20"), the Company's allowance for loan and lease losses was maintained through provisions for loan losses based upon an evaluation process that was similar to our evaluation process used for originated loans. In conducting this evaluation, which included a review of loans on which full collectability may not be reasonably assured, the Company considered, among other matters, the estimated fair value of the underlying collateral, economic conditions, historical net loan loss experience, carrying value of the loans, which included the remaining net purchase discount or premium, and other factors that warrant recognition in determining our allowance for loan losses.

The Company adopted Accounting Standard Update ("ASU") 2016-13 on January 1, 2020, using the prospective transition approach for financial assets purchased with credit deterioration ("PCD") that were previously classified as purchased credit impaired ("PCI") and accounted for under ASC 310-30. In accordance with the standard, the Company did not reassess whether PCI assets met the criteria of PCD assets as of the date of adoption. The remaining discount on the PCD assets will be accreted into interest income on a level-yield method over the life of the loans.

Loan Modifications

The Company adopted ASU 2022-02 effective January 1, 2023. This standard eliminated the previous troubled debt restructuring ("TDR") accounting model and replaced it with guidance and disclosure requirements for identifying modifications to loans to borrowers experiencing financial difficulty. Modifications to borrowers experiencing financial difficulty may include interest rate reductions, principal or interest forgiveness, forbearances, term extensions, and other actions intended to minimize economic loss and to avoid foreclosure or repossession of collateral.

Loan Commitments and Allowance for Credit Losses on Off-Balance Sheet Credit Exposures

Financial instruments include off-balance sheet credit instruments, such as commitments to make loans, unused lines of credit and commercial letters of credit, issued to meet customer financing needs. The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for off-balance sheet loan commitments is represented by the contractual amount of those instruments. Such financial instruments are recorded when they are funded.

The Company records an allowance for credit losses on off-balance sheet credit exposures, unless the commitments to extend credit are unconditionally cancellable, through a charge to the provision for credit loss expense for off-balance sheet credit exposures included in other noninterest expense in the Company's Consolidated Statements of Income. The ACL on off-balance sheet credit exposures is estimated by loan segment at each balance sheet date under the current expected credit loss model using similar methodologies as portfolio loans, taking into consideration the likelihood that funding will occur, and is included in other liabilities on the Company's Statements of Condition.

Premises and Equipment

Land is carried at cost. Premises and equipment are stated at cost, less allowances for depreciation. The provision for depreciation for financial reporting purposes is computed generally by the straight-line method at rates sufficient to write-off the cost of such assets over their estimated useful lives. Buildings are amortized over a period of 10-39 years, and furniture, fixtures, and equipment are amortized over a period of 2-20 years. Leasehold improvements are generally depreciated over the lesser of the lease term or the estimated lives of the improvements. Maintenance and repairs are charged to expense as incurred. Gains or losses on disposition are reflected in earnings.

Leases

The Company leases certain office facilities and office equipment under operating leases. The Company also owns certain office facilities which it leases to outside parties under operating lessor leases; however, such leases are not significant. For operating leases other than those considered to be short-term, defined as leases of 12 months or less, the Company recognizes operating lease right-of-use ("ROU") assets and related lease liabilities at the time of lease commencement. ROU assets represent the Company's right to use the underlying asset for the lease term and the lease liabilities represent the Company's obligation to make lease payments under the leases. ROU assets and operating lease liabilities are reported as components of accrued interest and other assets and other liabilities, respectively, on our accompanying consolidated balance sheets. Leases with terms of 12 months or less are recognized in the income statement over the lease term.

In recognizing ROU assets and related lease liabilities, the Company accounts for lease and non-lease components (such as taxes, insurance, and common area maintenance costs) separately as such amounts are generally readily determinable under our lease contracts. To estimate the present value of lease payments over the expected lease term, the Company uses interest rates on advances from the FHLB at the time of commencement. The Company's lease term may include options to extend or terminate the leases when it is reasonably certain that the option will be exercised. Lease expense is recognized on a straight-line basis over the lease term and is included in net occupancy expense of premises in the Company's Consolidated Statements of Income.

Bank Owned Life Insurance

The Company owns life insurance policies on certain current and former employees and directors where the Bank is the beneficiary. Bank owned life insurance ("BOLI") is recorded at the amount that can be realized under the insurance contract at the balance sheet date, which is the cash surrender value ("CSV") adjusted for other charges or other amounts due that are probable at settlement. Increases in the CSV of the policies, as well as the death benefits received, net of any CSV, are recorded in noninterest income, and are not subject to income taxes.

Other Real Estate Owned

Other real estate owned consists of properties formerly pledged as collateral to loans, which have been acquired by the Company through foreclosure proceedings or acceptance of a deed in lieu of foreclosure. Upon transfer of a loan to foreclosure status, an appraisal is generally obtained and any excess of the loan balance over the fair value, less estimated costs to sell, is

charged against the allowance for credit losses. Expenses and subsequent adjustments to the fair value are treated as other operating expense.

Goodwill

Goodwill represents the excess of purchase price over the fair value of assets acquired in a transaction using purchase accounting. Goodwill has an indefinite useful life and is not amortized, but is tested for impairment. Goodwill impairment tests are performed on an annual basis or when events or circumstances dictate. On January 1, 2020, the Company adopted ASU 2017-04, *"Intangibles - Goodwill and Other (Topic 350) - Simplifying the Test for Goodwill Impairment"*, which eliminates an entity's requirement to compute the implied fair value. The Company tests goodwill annually as of December 31st. The Company has the option to perform a qualitative assessment of goodwill, which considers company-specific and economic characteristics that might impact its carrying value. If, based on this qualitative assessment, it is more likely than not that the fair value of the reporting unit is less than its carrying amount, then a quantitative test (Step 1) is performed, which compares the fair value of a reporting unit to the carrying amount of the reporting unit in order to identify potential impairment. If the estimated fair value of a reporting unit exceeds its carrying amount, the goodwill of the reporting unit is not considered impaired. The implied fair value of goodwill is determined in the same manner as goodwill that is recognized in a business combination. Significant judgment and estimates are involved in estimating the fair value of the assets and liabilities of the reporting units.

Other Intangible Assets

Other intangible assets include core deposit intangibles, customer related intangibles, covenants not to compete, and mortgage servicing rights. Core deposit intangibles represent a premium paid to acquire a base of stable, low cost deposits in the acquisition of a bank, or a bank branch, using purchase accounting. The amortization period for core deposit intangible ranges from 5 to 10 years, using an accelerated method. The covenants not to compete are amortized on a straight-line basis over 3 to 6 years, while customer related intangibles are amortized on an accelerated basis over a range of 6 to 15 years. The amortization period is monitored to determine if circumstances require such periods to be revised. The Company periodically reviews its intangible assets for changes in circumstances that may indicate the carrying amount of the asset is impaired. The Company tests its intangible assets for impairment on an annual basis or more frequently if conditions indicate that an impairment loss has more likely than not been incurred.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred taxes are reviewed quarterly and reduced by a valuation allowance if, based upon the information available, it is more likely than not that some or all of the deferred tax assets will not be realized. Realization of deferred tax assets is dependent upon the generation of a sufficient level of future taxable income and recoverable taxes paid in prior years. In such cases, although realization is not assured, management believes it is more likely than not that all of the deferred tax assets will be realized. The Company's policy is to recognize interest and penalties on unrecognized tax benefits in income tax expense in the Consolidated Statements of Income.

Tax Credit Investments

The Company accounts for its investments in qualified affordable housing projects using the proportional amortization method. Under that method, the Company amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense. As of December 31, 2024 and 2023, the Company's remaining investment in qualified affordable housing projects, net of amortization totaled \$2.1 million and \$2.3 million, respectively.

Securities Sold Under Agreements to Repurchase

Securities sold under agreements to repurchase (repurchase agreements) are agreements in which the Company transfers the underlying securities to a third-party custodian's account that explicitly recognizes the Company's interest in the securities. The agreements are accounted for as secured financing transactions provided the Company maintains effective control over the transferred securities and meets other criteria as specified in FASB ASC Topic 860, *Transfers and Servicing* ("ASC Topic 860"). The Company's agreements are accounted for as secured financings; accordingly, the transaction proceeds are reflected as liabilities and the securities underlying the agreements continue to be carried in the Company's securities portfolio.

Treasury Stock

The cost of treasury stock is shown on the Consolidated Statements of Condition as a separate component of shareholders' equity, and is a reduction to total shareholders' equity. Shares are released from treasury at fair value, identified on an average cost basis.

Trust and Investment Services

Assets held in fiduciary or agency capacities for customers are not included in the accompanying Consolidated Statements of Condition, since such items are not assets of the Company. Fees associated with providing trust and investment services are included in noninterest income. Additional information on trust and investment fees is presented in "Note 13 - Revenue Recognition."

Earnings Per Share

Basic earnings per share is calculated by dividing net income available to common shareholders by the weighted average number of shares outstanding during the year, exclusive of shares represented by the unvested portion of restricted stock and restricted stock units. Diluted earnings per share is calculated by dividing net income available to common shareholders by the weighted average number of shares outstanding during the year plus the dilutive effect of the unvested portion of restricted stock and restricted stock units and stock issuable upon conversion of common stock equivalents (primarily stock options) or certain other contingencies. The Company uses authoritative accounting guidance under ASC Topic 260, *Earnings Per Share*, which provides that unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method. The Company has issued stock-based compensation awards that included restricted stock awards that contain such rights and are thus considered participating securities. The Company has also issued restricted stock awards that do not contain non-forfeitable rights to dividends or dividends that contain such rights and are thus considered participating securities. The Company has also issued restricted stock awards that do not contain non-forfeitable rights to dividends or dividends.

Segment Reporting

The Company manages its operations through three reportable business segments in accordance with the standards set forth in FASB ASC Topic 280, "Segment Reporting". The three segments are: (i) banking ("Banking"), (ii) insurance ("Tompkins Insurance Agencies, Inc.") and (iii) wealth management ("Tompkins Financial Advisors"). The Company's insurance services and wealth management services are managed separately from the Bank. Additional information on the segments is presented in "Note 21 - Segment and Related Information".

Comprehensive Income (Loss)

For the Company, comprehensive income (loss) represents net income plus the net change in unrealized gains or losses on available-for-sale debt securities for the period (net of taxes), and the actuarial gain or loss and amortization of unrealized amounts in the Company's defined-benefit retirement and pension plan, supplemental employee retirement plan, and post-retirement life and healthcare benefit plan (net of taxes), and is presented in the Consolidated Statements of Comprehensive Income (Loss) and Consolidated Statements of Changes in Shareholders' Equity. Accumulated other comprehensive income (loss) represents the net unrealized gains or losses on available-for-sale debt securities (net of tax) and unrecognized net actuarial gain or loss, unrecognized prior service costs, and unrecognized net initial obligation (net of tax) in the Company's defined-benefit retirement and pension plan, supplemental employee retirement plan, and post-retirement life and healthcare benefit plan.

Pension and Other Employee Benefits

The Company maintains noncontributory defined-benefit and defined contribution plans, which cover substantially all employees of the Company. In addition, the Company also maintains supplemental employee retirement plans for certain executives and a post-retirement life and healthcare plan. These plans are discussed in detail in "Note 10 - Employee Benefit Plans". The Company incurs certain employment-related expenses associated with these plans. In order to measure the expense associated with these plans, various assumptions are made including the discount rate used to value certain liabilities, expected return on plan assets, anticipated mortality rates, and expected future healthcare costs. The assumptions are based on historical experience as well as current facts and circumstances. A third-party actuarial firm is used to assist management in measuring the expense and liability associated with the plans. The Company uses a December 31 measurement date for its plans. As of the measurement date, plan assets are determined based on fair value, generally representing observable market prices. The projected benefit obligation is primarily determined based on the present value of projected benefit distributions at an assumed discount rate.

The expenses associated with these plans are charged to current operating expenses. The Company recognizes an asset for a plan's overfunded status or a liability for a plan's underfunded status in the Company's consolidated statements of condition,

and recognizes changes in the funded status of these plans in comprehensive income, net of applicable taxes, in the year in which the change occurred.

Stock-Based Compensation

The Company's current stock-based compensation plan provides for stock options, stock appreciation rights ("SARs"), restricted stock awards, restricted stock units and performance share units.

Compensation expense for awards is recognized over the service period based on the fair value at the date of grant and is included in salaries and employee benefits expense in the Consolidated Statements of Income. Grant date fair value for SARs is estimated using the Black-Scholes option-pricing model. Awards of restricted stock awards, restricted stock units and performance share units are valued at the fair market value of the Company's common stock as of the award date. Compensation expense for performance share units is estimated based on the probability that the performance conditions will be achieved. The likelihood that the performance conditions will be met is assessed each reporting period. Forfeitures are recognized when they occur. Vested equity awards are issued from authorized but unissued stock.

Excess tax benefits (expenses) result when tax return deductions differ from recognized share-based compensation cost that are determined using the grant-date fair value approach for financial statement purposes. Excess tax benefits (expenses) related to the settlement of share-based awards are recorded as a decrease (increase) to income tax expense in the Consolidated Income Statements and are classified in the Consolidated Statements of Cash Flows as an operating activity.

Fair Value Measurements

The Company accounts for the provisions of FASB ASC Topic 820, *Fair Value Measurements and Disclosures* ("ASC Topic 820"), for financial assets and financial liabilities. ASC Topic 820 defines fair value, establishes a framework for measuring fair value in accordance with GAAP, and expands disclosures about fair value measurements. See "Note 18 - Fair Value Measurements".

In general, fair values of financial instruments are based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable marketbased parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and the Company's creditworthiness, among others.

Revenue Recognition

In general, for revenue not associated with financial instruments, guarantees and lease contracts, the Company applies the following steps when recognizing revenue from contracts with customers: (i) identify the contract, (ii) identify the performance obligations, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations and (v) recognize revenue when a performance obligation is satisfied. Our contracts with customers are generally short term in nature, typically due within one year or less or cancellable by us or our customer upon a short notice period. Performance obligations for our customer contracts are generally satisfied at a single point in time, typically when the transaction is complete, or over time. For performance obligations satisfied over time, the Company primarily uses the output method, directly measuring the value of the products/services transferred to the customer, to determine when performance obligations have been satisfied. The Company typically receives payment from customers and recognizes revenue concurrent with the satisfaction of our performance obligations. In most cases, this occurs within a single financial reporting period. For payments received in advance of the satisfaction of performance obligations, revenue recognition is deferred until such time as the performance obligations have been satisfied. In cases where we have not received payment despite satisfaction of our performance obligations, we accrue an estimate of the amount due in the period our performance obligations have been satisfied. For contracts with variable components, only amounts for which collection is probable are accrued. The Company generally acts in a principal capacity, on our own behalf, in most of our contracts with customers. In such transactions, the Company recognizes revenue and the related costs to provide our services on a gross basis in our financial statements. In some cases, the Company acts in an agent capacity, deriving revenue through assisting other entities in transactions with our customers. In such transactions, the Company recognizes revenue and the related costs to provide our services on a net basis in our financial statements. These transactions recognized on a net basis primarily relate to insurance and brokerage commissions and fees derived from our customers' use of various interchange and ATM/debit card networks. Refer to "Note 13 - Revenue Recognition" for additional disclosures.

Derivative Instruments and Hedging Activities

The Company enters into derivative financial instruments to manage exposures that arise from business activities that result in the receipt or payment of future known and uncertain cash amounts, the value of which are determined by interest rates. The Company also enters into interest rate derivatives to accommodate the business requirements of certain qualifying customers. All derivatives are recognized as other assets or other liabilities on the Company's Consolidated Statements of Condition at fair

value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative and resulting designation.

For derivatives designated and that qualify as fair value hedges, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in interest income.

The Company has entered into risk participation agreements with other banks in commercial loan arrangements. These derivatives are not designated as hedges and therefore, changes in fair value are recognized in earnings.

Under a risk participation-out agreement, a derivative asset, the Company participates out a portion of the credit risk associated with the interest rate swap position executed with the commercial borrower for a fee paid to the participating bank. Under a risk participation-in agreement, a derivative liability, the Company assumes, or participates in, a portion of the credit risk associated with the interest rate swap position with the commercial borrower for a fee received from the other bank.

Newly Adopted Accounting Standards

ASU No. 2023-02, "Investments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method." This update will allow reporting entities to consistently account for equity investments made primarily for the purpose of receiving income tax credits or other income tax benefits. This update applies to all reporting entities that hold (1) tax equity investments that meet the conditions for and elect to account for them using the proportional amortization method or (2) an investment in a low income housing tax credit ("LIHTC") structure through a limited liability entity that is not accounted for using the proportional amortization method and to which certain LIHTC specific guidance removed from Subtopic 323-740 has been applied. Additionally, the disclosure requirements apply to investments that generate income tax credits and other income tax benefits from a tax credit program for which the entity has elected to apply the proportional amortization method). The amendments in this update permit reporting entities to elect to account for their tax equity investments, regardless of the tax credit program from which the income tax credits are received, using the proportional amortization method if certain conditions are met. ASU 2023-02 is effective for fiscal years beginning after December 15, 2023 and interim periods in those years. The adoption of ASU 2023-02 on January 1, 2024 did not have a material effect on the Company's financial statements.

Transition for existing tax credits that qualify must be recognized using either a modified retrospective transition or a retrospective transition for all existing tax investments still expected to provide tax benefits and elected under ASU 2023-02 to apply the proportional amortization method. The Company has elected to treat all existing tax credit investments requiring adjustment under ASU 2023-02 using the modified retrospective method approach.

The Company had recorded 2 investments in separate LIHTC structures as of December 31, 2024 totaling \$2.1 million already using proportional amortization, with a \$57,000 benefit recorded to income tax expense in the fiscal year ending December 31, 2024 and \$54,000 benefit for the fiscal year ending December 31, 2023. In addition, the Company has a historic rehabilitation tax credit that was previously recorded using the equity investment accounting method and had no residual book value or financial impact in either the current or prior year. The ASU 2023-02 day 1 adoption entry for this tax credit included the recording of a \$40,000 investment and the write-off of a \$444,000 gross timing difference (tax effective at \$111,000) with a corresponding \$71,000 reduction to retained earnings.

The Company has also elected to treat the following categories of tax credit investments under the proportional amortization method:

- LIHTC Low Income Housing Tax Credits
- New Market Tax Credits
- Historic Rehabilitation Tax Credit
- Renewable Energy Tax Credit
- State Specific Tax Credits

ASU No. 2023-07, "Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures." The amendments in this update improve financial reporting by requiring disclosure of incremental segment information on an annual and interim basis. The amendments in this ASU are effective for the Company for fiscal years beginning after December 15, 2023 and interim periods within fiscal years beginning after December 15, 2024. Adoption did not have a significant effect on our financial statements or disclosures.

Accounting Standards Pending Adoption

ASU No. 2023-06, Disclosure Improvements, amends the disclosure or presentation requirements related to various subtopics in the FASB Accounting Standards Codification. The new guidance is intended to align GAAP requirements with those of the SEC. The ASU will become effective on the earlier of the date on which the SEC removes its disclosure requirements from Regulation S-X or Regulation S-K, or June 30, 2027. Early adoption is prohibited. Adoption of ASU 2023-06 is not expected to have a material impact on our consolidated financial statements.

ASU No. 2023-09, "Income Taxes (Topic 740) - Improvements to Income Tax Disclosures." The amendments in this update relate to the rate reconciliation and income taxes paid disclosures improve the transparency of income tax disclosures by requiring (1) consistent categories and greater disaggregation of information in the rate reconciliation and (2) income taxes paid disaggregated by jurisdiction. ASU 2023-09 is effective for fiscal years beginning after December 15, 2024 and interim periods in those years. Tompkins is currently evaluating the potential impact of ASU 2023-09 on our consolidated financial statements.

ASU No. 2024-03, "Disaggregation of Income Statement Expenses," requires new financial statement disclosures in tabular format, disaggregating information about prescribed categories underlying any relevant income statement expense captions, including employee compensation, depreciation, and intangible asset amortization. Tompkins is required to adopt this ASU prospectively for annual periods beginning after December 15, 2026, and interim periods within fiscal years beginning after December 15, 2027. Early adoption and retrospective application are permitted.

The Company reviews new accounting standards as issued. Management has not identified any other new standards that it believes will have a significant impact on the Company's financial statements.

Note 2 Securities

Available-for-Sale Debt Securities

The following tables summarize available-for-sale debt securities held by the Company at December 31, 2024 and 2023:

December 31, 2024	Available-for-Sale Debt Securities							
(In thousands)	А	mortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value			
U.S. Treasuries	\$	75,141	\$ 140	\$ 3,784	\$ 71,497

Held-to-Maturity Debt Securities

The following tables summarize held-to-maturity debt securities held by the Company at December 31, 2024 and 2023:

December 31, 2024	Held-to-Maturity Debt Securities						
(In thousands)	А	mortized Cost	Gross Unrealized Gains		Gross Unrealized Losses	F	air Value
U.S. Treasuries	\$	86,049	\$	0 \$	11,361	\$	74,688
Obligations of U.S. Government sponsored entities		226,413	\$	0	33,806		192,607
Total held-to-maturity debt securities	\$	312,462	\$	0 \$	45,167	\$	267,295

December 31, 2023	Held-to-Maturity Debt Securities						
(In thousands)	A	mortized Cost	Gross Unrealized Gains		Gross Unrealized Losses	F	air Value
U.S. Treasuries	\$	86,266	\$	0 \$	5 11,051	\$	75,215
Obligations of U.S. Government sponsored entities		226,135		0	33,895		192,240
Total held-to-maturity debt securities	\$	312,401	\$	0 \$	5 44,946	\$	267,455

The following table sets forth information with regard to sales transactions of available-for-sale debt securities:

	Year ended December 31,						
(In thousands)		2024	2023	2022			
Proceeds from sales	\$	39,952 \$	440,488 \$	160,638			
Gross realized gains		50	0	0			
Gross realized losses		0	(69,983)	(11,916)			
Net gain (loss) on sales of available-for-sale debt securities	\$	50 \$	(69,983) \$	(11,916)			

The Company's available-for-sale and held-to-maturity debt securities portfolios includes callable securities that may be called prior to maturity. The Company did not recognize any gains on called securities for the years ended December 31, 2024, 2023 and 2022. The Company also recognized net losses of \$18,400, net gains of \$10,000, and net losses of \$125,000 on equity securities for the years ended December 31, 2024, 2023 and 2022, respectively, reflecting the change in fair value.

In 2023, the Company completed a balance sheet repositioning for general balance sheet, portfolio and interest rate risk management, by selling approximately \$510.5 million of available-for-sale debt securities, which resulted in an pre-tax loss on the sale of approximately \$70.0 million.

In the fourth quarter of 2022, the Company sold its Class B common shares of Visa Inc. for \$11.4 million. The shares had no carrying value on the Company's Consolidated Statements of Condition, and the Company had no historical cost basis in the shares, thus the \$11.4 million was realized as a pre-tax gain. The Company received the shares as part of its membership interest in Visa in March 2008.

The following table summarizes available-for-sale debt securities that had unrealized losses at December 31, 2024:

December 31, 2024	Available-for-Sale Debt Securities									
	Less than	12 Months	Tot	al						
(In thousands)	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses

The Company evaluates available-for-sale debt securities for expected credit losses ("ECL") in unrealized loss positions at each measurement date to determine whether the decline in the fair value below the amortized cost basis is due to credit-related factors or noncredit-related factors.

Factors that may be indicative of ECL include, but are not limited to, the following:

- Extent to which the fair value is less than the amortized cost basis.
- Adverse conditions specifically related to the security, an industry, or geographic area (changes in technology, business practice).
- Payment structure of the debt security with respect to underlying issuer or obligor.
- Failure of the issuer to make scheduled payment of principal and/or interest.
- Changes to the rating of a security or issuer by a nationally recognized statistical rating organization.
- Changes in tax or regulatory guidelines that impact a security or underlying issuer.

For available-for-sale debt securities in an unrealized loss position, the Company evaluates the securities to determine whether the decline in the fair value below the amortized cost basis is the result of changes in interest rates or reflects a fundamental change in the credit worthiness of the underlying issuer. Any impairment that is not credit related is recognized in other comprehensive income (loss), net of applicable taxes. Credit-related impairment is recognized as an allowance for credit losses ("ACL") on the Statements of Condition, limited to the amount by which the amortized cost basis exceeds the fair value, with a corresponding adjustment to earnings. Both the ACL and the adjustment to net income may be reversed if conditions change.

Management measures expected credit losses on held-to-maturity debt securities on a collective basis by major security type with each type sharing similar risk characteristics and considers historical credit loss information that is adjusted for current conditions and reasonable and supportable forecasts. Management has made the accounting policy election to exclude accrued interest receivable on held-to-maturity debt securities from the estimate of credit losses. As of December 31, 2024, the held-to-maturity portfolio consisted of U.S. Treasury securities and securities issued by U.S. government-sponsored enterprises, including the Federal National Mortgage Agency and the Federal Farm Credit Banks Funding Corporation. U.S. Treasury securities will not be settled at prices less than the amortized cost bases of the securities issued by U.S. government, and it is expected that the securities or U.S. government-sponsored enterprises carry the explicit and/or implicit guarantee of the U.S. government, are widely recognized as "risk-free," and have a long history of zero credit loss. As such, the Company did not record an allowance for credit losses for these securities as of December 31, 2024.

The total gross unrealized losses, shown in the tables above, were primarily attributable to changes in interest rates and levels of market liquidity, relative to when the investment securities were purchased, and not due to the credit-related quality of the investment securities. The Company does not have the intent to sell these securities and does not believe it is more likely than not that the Company will be required to sell these securities before a recovery of amortized cost. The gross unrealized losses reported for available-for-sale residential mortgage-backed securities relate to investment securities issued by U.S. government sponsored entities such as Federal National Mortgage Association, FHLMC and U.S. government agencies such as Government National Mortgage Association. The gross unrealized losses for held-to-maturity debt securities are on US Treasuries and securities issued by U.S. government-sponsored enterprises, including the Federal National Mortgage Agency and the Federal Farm Credit Banks Funding Corporation.

The Company did not recognize any net credit impairment charge to earnings on investment securities in 2024, 2023, or 2022.

The amortized cost and estimated fair value of debt securities by contractual maturity are shown in the following table. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties. Mortgage-backed securities are shown separately since they are not due at a single maturity date.

Trading Securities

The Company had no securities designated as trading during 2024 or 2023.

Pledged Securities

The Company pledges securities as collateral for public deposits and other borrowings, and sells securities under agreements to repurchase. See "Note 8 - Federal Funds Purchased and Securities Sold Under Agreements to Repurchase" for further discussion. Securities carried of \$904.2 million and \$1.0 billion, at December 31, 2024 and 2023, respectively, were either pledged or sold under agreements to repurchase.

Concentrations of Securities

Except for U.S. government securities, there were no holdings, when taken in the aggregate, of any single issuer that exceeded 10% of shareholders' equity at December 31, 2024.

Equity Securities

The Company invests in one equity fund. This security is carried at fair value.

Investment in Small Business Investment Companies

The Company has equity investments in small business investment companies ("SBIC") established for the purpose of providing financing to small businesses in market areas served by the Company. These investments totaled \$671,000 and \$485,000 at December 31, 2024 and 2023, respectively, and were included in other assets on the Company's Consolidated Statements of Condition. These investments are accounted for either under the cost method or the equity method of accounting. As of December 31, 2024, the Company reviewed these investments and determined that there was no impairment.

Federal Home Loan Bank Stock

The Company also holds non-marketable Federal Home Loan Bank New York ("FHLBNY") stock and non-marketable Atlantic Community Bankers Bank ("ACBB") stock, all of which are required to be held for regulatory purposes and for borrowing availability. The required investment in FHLB stock is tied to the Company's borrowing levels with the FHLB. Holdings of FHLBNY stock and ACBB stock totaled \$42.2 million and \$95,000 at December 31, 2024, respectively. These securities are carried at par, which is also cost. As of December 31, 2024, the FHLBNY continued to pay dividends and repurchase stock. As such, the Company has not recognized any impairment on its holdings of FHLBNY.

Note 3 Loans and Leases

Loans and Leases at December 31, 2024 and December 31, 2023 were as follows:

	Year ended December 31,

¹ Commercial and industrial other includes \$159,000 and \$404,000 respectively, of Payment Protection Program "PPP" loans as of December 31, 2024 and 2023.

The Company has adopted comprehensive lending policies, underwriting standards and loan review procedures. There were no significant changes to the Company's existing lending policies, underwriting standards or loan review procedures during 2024. The Company's Board of Directors approves the lending policies at least annually. The Company recognizes that exceptions to policy guidelines may occasionally occur and has established procedures for approving exceptions to these policy guidelines. Management has also implemented reporting systems to monitor loan originations, loan quality, concentrations of credit, loan delinquencies and nonperforming loans and potential problem loans.

Residential real estate loans

The Company's policy is to underwrite residential real estate loans in accordance with secondary market guidelines in effect at the time of origination, including loan-to-value ("LTV") and documentation requirements. LTVs exceeding 80% for fixed rate loans and 80% for adjustable rate loans require private mortgage insurance to reduce the exposure. The Company verifies applicants' income, obtains credit reports and independent real estate appraisals in the underwriting process to ensure adequate collateral coverage and that loans are extended to individuals with good credit and income sufficient to repay the loan. In limited circumstances, the Company will make exceptions to secondary market underwriting standards to support community reinvestment activities.

The Company originates fixed rate and adjustable rate residential mortgage loans, including loans that have characteristics of both, such as a 7/6 adjustable rate mortgage, which has a fixed rate for the first seven years and then adjusts semi-annually thereafter. The majority of residential mortgage loans originated over the last several years have been fixed rate loans. Adjustable rate loans have increased in popularity due to the rising interest rate environment. Adjustable rate residential real estate loans are underwritten based upon the initial rate when the fixed rate period is 5 years or longer. For loans with an initial fixed rate of less than 5 years, the fully indexed rate is utilized for the ability to repay qualifying and underwriting. This underwriting practice matches secondary market guidelines.

The Company may sell residential real estate loans in the secondary market based on interest rate considerations. These residential real estate loans are generally sold to FHLMC or SONYMA without recourse in accordance with standard secondary market loan sale agreements. These residential real estate loan sales are subject to customary representations and warranties, including representations and warranties related to gross incompetence and fraud. The Company has not had to repurchase any loans as a result of these general representations and warranties.

During 2024, 2023, and 2022, the Company sold residential mortgage loans totaling \$40.1 million, \$4.5 million, and \$8.9 million, respectively, and realized net gains on these sales of \$1.0 million, \$96,000, and \$155,000, respectively. These residential real estate loans are generally sold without recourse in accordance with standard secondary market loan sale agreements. When residential mortgage loans are sold to FHLMC or SONYMA, the Company typically retains all servicing rights, which provides the Company with a source of fee income. In connection with the sales in 2024, 2023, and 2022, the Company recorded mortgage-servicing assets of \$299,000, \$34,000, and \$66,000, respectively. The loans sold to FHLMC and SONYMA were originated with the intent to sell.

Amortization of mortgage servicing assets amounted to \$91,000 in 2024, \$81,000 in 2023, and \$128,000 in 2022. At December 31, 2024 and 2023, the Company serviced residential mortgage loans aggregating \$158.0 million and \$130.4 million. Mortgage servicing rights, at an amortized cost basis, totaled \$1.1 million at December 31, 2024 and \$927,000 at December 31, 2023. These mortgage servicing rights were evaluated for impairment at year-end 2024 and 2023 and no impairment was recognized. Loans held for sale, which are included in residential real estate, totaled \$1.7 million and \$602,000 at December 31, 2024 and 2023, respectively.

As members of the FHLB, the Company's subsidiary bank may use unencumbered mortgage related assets to secure borrowings from the FHLB. At December 31, 2024 and 2023, the Company had \$543.2 million and \$125.0 million, respectively, of term advances from the FHLB that were secured by residential mortgage loans. In addition to the term advances presented above, standby letters of credit with the FHLB of \$200 million and \$316 million, at December 31, 2024 and 2023, respectively, were secured by residential mortgage loans.

Commercial and industrial loans

The Company's Commercial Loan Policy sets forth guidelines for debt service coverage ratios, LTV's and documentation standards. Commercial and industrial loans are primarily made based on identified cash flows of the borrower with consideration given to underlying collateral and personal or government guarantees. The Company's policy establishes debt service coverage ratio limits that require a borrower's cash flow to be sufficient to cover principal and interest payments on all new and existing debt. Commercial and industrial loans are generally secured by the assets being financed or other business

assets such as accounts receivable or inventory. Many of the loans in the commercial portfolio have variable interest rates tied to Prime Rate, FHLBNY borrowing rates, Secured Overnight Financing Rate ("SOFR"), or U.S. Treasury indices.

Commercial real estate

The Company's Commercial Loan Policy sets forth guidelines for debt service coverage ratios, LTV's and documentation standards. Commercial real estate loans are primarily made based on identified cash flows of the borrower with consideration given to underlying real estate collateral and personal or government guarantees. The Company's policy establishes a maximum LTV based on the type of property and debt service coverage ratio limits that require a borrower's cash flow to be sufficient to cover principal and interest payments on all new and existing debt. Commercial real estate loans may be fixed or variable rate loans with interest rates tied to Prime Rate, FHLBNY borrowing rates, SOFR, or U.S. Treasury indices.

Agriculture loans

Agriculturally-related loans include loans to dairy farms, cash and vegetable crop farms and a variety of other livestock and crop producers. Agriculturally-related loans are primarily made based on identified cash flows of the borrower with consideration given to underlying collateral, personal guarantees, and government related guarantees. Agriculturally-related loans are generally secured by the assets or property being financed or other business assets such as accounts receivable, livestock, equipment, or commodities/crops. The Company's policy establishes a maximum LTV based on the type of property and debt service coverage ratio limits that require a borrower's cash flow to be sufficient to cover principal and interest payments on all new and existing debt, with limited adjustments to consider commodities/crops, equipment and accounts receivable. Agriculturally-related loans may be fixed or variable rate with interest tied to Prime Rate, FHLBNY borrowing rates, SOFR, or U.S. Treasury indices.

Consumer and other loans

The consumer loan portfolio includes indirect and direct loans relating to personal installment loans, automobile financing, and overdraft lines of credit. The majority of the consumer portfolio consists of indirect and direct automobile loans. Consumer loans are generally short-term and have fixed rates of interest that are set giving consideration to current market interest rates, the financial strength of the borrower, and internal profitability targets. The Company's Consumer Loan Underwriting Guidelines Policy establishes maximum debt to income ratios and includes guidelines for verification of applicants' income and receipt of credit reports.

Leases

Leases are primarily made to commercial customers and the origination criteria typically includes the value of the underlying assets being financed, the useful life of the assets being financed, and identified cash flows of the borrower. Most leases carry a fixed rate of interest that is set giving consideration to current market interest rates, the financial strength of the borrower, and internal profitability targets.

Loan and Lease Customers

The Company's loan and lease customers are located primarily in the upstate New York and Pennsylvania communities served by Tompkins Community Bank. The Bank operates twelve banking offices in the counties of Tompkins, Cayuga, Cortland, Onondaga and Schuyler, New York; fourteen banking offices in the counties of Wyoming, Livingston, Genesee, Orleans and Monroe, New York; twelve banking offices in the counties of Putnam County, Dutchess County and Westchester, New York; and sixteen offices in the counties of Berks, Montgomery, Philadelphia, Delaware and Schuylkill, Pennsylvania. Other than general economic risks, management is not aware of any material concentrations of credit risk to any industry or individual borrower.

Loans to Related Parties

Directors and officers of the Company and its affiliated companies are customers of, and have other transactions with, the Company's banking subsidiaries in the ordinary course of business. Such loans and commitments are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons not related to the Company, and did not involve more than normal risk of collectability or present other unfavorable features.

Nonaccrual Loans and Leases

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments are due. Loans are placed on nonaccrual status either due to the delinquency status of principal and/or interest (generally when past due 90 or more days) or a judgment by management that the full repayment of principal and interest is unlikely. When interest accrual is discontinued, all unpaid accrued interest is reversed. Payments received on loans on nonaccrual are generally applied to reduce the principal balance of the loan. Loans are generally returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. When

management determines that the collection of principal in full is improbable, management will charge-off a partial amount or full amount of the loan balance. Management considers specific facts and circumstances relative to each individual credit in making such a determination. For residential and consumer loans, management uses specific regulatory guidance and thresholds for determining charge-offs.

The below table is an aging analysis of past due loans, segregated by class of loans as of December 31, 2024 and 2023:

December 31, 2024

The difference between the interest income that would have been recorded if nonaccrual loans and leases had paid in accordance with their original terms and the interest income that was recorded, was \$13.9 million for the year ended December 31, 2024, \$2.2 million for the year ended December 31, 2023, and \$1.4 million for year ended December 31, 2022. The Company had no material commitments to make additional advances to borrowers with nonperforming loans.

Note 4 Allowance for Credit Losses

Management reviews the appropriateness of the ACL on a regular basis. Management considers the accounting policy relating to the allowance to be a critical accounting policy, given the inherent uncertainty in evaluating the levels of the allowance required to cover credit losses in the portfolio and the material effect that assumptions could have on the Company's results of operations. The Company has developed a methodology to measure the amount of estimated credit loss exposure inherent in the loan portfolio to assure that an appropriate allowance is maintained. The Company's methodology is based upon guidance provided in SEC Staff Accounting Bulletin No. 119, *Measurement of Credit Losses on Financial Instruments ("CECL"), and Financial Instruments - Credit Losses* and *ASC Topic 326, Financial Instruments - Credit Losses*.

The Company uses a DCF method to estimate expected credit losses for all loan segments excluding the leasing segment. For each of these loan segments, the Company generates cash flow projections at the instrument level wherein payment expectations are adjusted for estimated prepayment speed, curtailments, recovery lag, probability of default, and loss given default. The modeling of expected prepayment speeds, curtailment rates, and time to recovery are based on internal historical data.

The Company uses regression analysis of historical internal and peer data to determine suitable loss drivers to utilize when modeling lifetime probability of default and loss given default. This analysis also determines how expected probability of default and loss given default will react to forecasted levels of the loss drivers. For all loans utilizing the DCF method, management utilizes forecasts of national unemployment rates and a one year percentage change in national gross domestic product as loss drivers in the model.

For all DCF models, management has determined that four quarters represents a reasonable and supportable forecast period and reverts back to a historical loss rate over eight quarters on a straight-line basis. Management leverages economic projections from a reputable and independent third party to inform its loss driver forecasts over the four-quarter forecast period. Other internal and external indicators of economic forecasts, and scenario weightings, are also considered by management when developing the forecast metrics.

Due to the size and characteristics of the leasing portfolio, the Company uses the remaining life method, using the historical loss rate of the commercial and industrial segment, to determine the allowance for credit losses.

The combination of adjustments for credit expectations and timing expectations produces an expected cash flow stream at the instrument level. Instrument effective yield is calculated, net of the impacts of prepayment assumptions, and the instrument expected cash flows are then discounted at that effective yield to produce a net present value of expected cash flows ("NPV"). An ACL is established for the difference between the NPV and amortized cost basis.

Since the methodology is based upon historical experience and trends, current conditions, and reasonable and supportable forecasts, as well as management's judgment, factors may arise that result in different estimates. While management's evaluation of the allowance as of December 31, 2024 considers the allowance to be appropriate, under adversely different conditions or assumptions, the Company would need to increase or decrease the allowance. In addition, various federal and State regulatory agencies, as part of their examination process, review the Company's allowance and may require the Company to recognize additions to the allowance based on their judgments and information available to them at the time of their examinations.

Loan Commitments and Allowance for Credit Losses on Off-Balance Sheet Credit Exposures

Financial instruments include off-balance sheet credit instruments, such as commitments to make loans, and commercial letters of credit. The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for off-balance sheet loan commitments is represented by the contractual amount of those instruments. Such financial instruments are recorded when they are funded. The Company records an allowance for credit losses on off-balance sheet credit exposures, unless the commitments to extend credit are unconditionally cancellable, through a charge to credit loss expense for off-balance sheet credit exposures included in provision expense in the Company's consolidated statements of income.

Changes in the allowance for credit losses for the years ended December 31, 2024, 2023 and 2022 are summarized as follows:

Allowance for Credit Losses - Loans and Leases

(In thousands)	2024	2023	2022
Total allowance at beginning of year	\$ 51,584 \$	45,934 \$	42,843
Impact of adopting ASU 2022-02	0	64	0

Loan Modifications to Borrowers Experiencing Financial Difficulty

The Company adopted ASU 2022-02 effective January 1, 2023. This standard eliminated the previous troubled debt restructuring accounting model and replaced it with guidance and disclosure requirements for identifying modifications to loans to borrowers experiencing financial difficulty. Modifications to borrowers experiencing financial difficulty may include interest rate reductions, principal or interest forgiveness, forbearances, term extensions, and other actions intended to minimize economic loss and to avoid foreclosure or repossession of collateral.

The following tables show the amortized cost basis at December 31, 2024 and 2023 of the loans modified to borrowers experiencing financial difficulty, disaggregated by class of financing receivable and type of concession granted:

Note 5 Goodwill and Other Intangible Assets

(In thousands)	Banking	Insurance	Μ	Wealth anagement	Total
Balance at January 1, 2023	\$ 64,524	\$ 19,867	\$	8,211 \$	92,602
Adjustment to goodwill	0	0		0	0
Balance at December 31, 2023	64,524	19,867		8,211	92,602
Adjustment to goodwill	0	0		0	0
Balance at December 31, 2024	\$ 64,524	\$ 19,867	\$	8,211 \$	92,602

Goodwill is assigned to reporting units. The Company reviews its goodwill and intangible assets annually, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. Based on the Company's review as of December 31, 2024, there was no impairment of its goodwill or intangible assets.

Other Intangible Assets

The following table provides information regarding the Company's amortizing intangible assets:

December 31, 2024 (In thousands)	Gross Carrying Amount	ccumulated mortization	N	et Carrying Amount
Amortized intangible assets:				
Core deposit intangible	\$ 18,774	\$ 18,774	\$	0
Customer relationships	9,048	8,237		811
Other intangibles	7,220	5,828		1,392
Total intangible assets	\$ 35,042	\$ 32,839	\$	2,203

December 31, 2023 (In thousands)	Gross Carrying Amount	ccumulated nortization	et Carrying Amount
Amortized intangible assets:			
Core deposit intangible	\$ 18,774	\$ 18,774	\$ 0
Customer relationships	9,048	7,948	1,100
Other intangibles	6,921	5,694	1,227
Total intangible assets	\$ 34,743	\$ 32,416	\$ 2,327

Amortization expense related to intangible assets totaled \$332,000 in 2024, \$334,000 in 2023 and \$873,000 in 2022. The estimated aggregate future amortization expense for intangible assets remaining as of December 31, 2024 is as follows:

Estimated amortization expense:¹

(In thousands)	
For the year ended December 31, 2025	\$ 335
For the year ended December 31, 2026	297
For the year ended December 31, 2027	248
For the year ended December 31, 2028	66
For the year ended December 31, 2029	38

¹Excludes the amortization of mortgage servicing rights. Amortization of mortgage servicing rights was \$91,000 in 2024, \$81,000 in 2023 and \$128,000 in 2022.

Note 6 Premises and Equipment

Premises and equipment at December 31 were as follows:

(In thousands)	2024	2023
Land	\$ 8,062 \$	8,063
Premises and equipment	104,847	104,366
Furniture, fixtures, and equipment	91,146	90,168
Accumulated depreciation and amortization	(127,428)	(122,910)
Total	\$ 76,627 \$	79,687

Depreciation and amortization expenses in 2024, 2023, and 2022 are included in operating expenses as follows:

(In thousands)	2024	2023	2022
Premises	\$ 2,713 \$	2,844 \$	2,500
Furniture, fixtures, and equipment	4,756	5,246	5,138
Total	\$ 7,469 \$	8,090 \$	7,638

The Company leases land, buildings and equipment under operating lease arrangements. Total gross rental expense amounted to \$4.1 million in 2024, \$4.7 million in 2023, and \$4.6 million in 2022. Most leases include options to renew for periods ranging from 5 to 20 years.

Lease components

Right-of-use lease assets totaled \$26.9 million and \$27.7 million at December 31, 2024 and 2023, respectively and are reported in accrued interest and other assets in the accompanying consolidated statements of condition. The related lease liabilities totaled \$28.5 million and \$29.1 million at December 31, 2024 and 2023, respectively, and are reported in other liabilities in the accompanying consolidated statements of condition. Lease payments under operating leases that were applied to our operating lease liability totaled \$2.9 million during 2024 and \$3.8 million during 2023. Included in the 2023 lease payment figures above were 2 lease termination payments totaling \$579,000 which were applied to the lease liability.

The components of operating lease expense, primarily included in "Net occupancy expense of premises," in 2024, 2023, and 2022 were as follows:

(In thousands)	2024	2023	2022
Operating lease cost	\$ 4,083 \$	4,741 \$	4,654
Variable lease cost	687	681	695
Short-term lease cost	9	2	2
Sublease income	0	0	(11)
Total lease cost	\$ 4,779 \$	5,424 \$	5,340

At December 31, 2024, we did not have any material finance lease assets or liabilities.

Other information related to operating leases for 2024 and 2023 was as follows:

(In thousands)	2024		2023
Cash paid for amounts included in the measurement of lease liabilities:			
Operating cash flows from operating leases	\$ 3,863	\$	4,688
Weighted-average remaining lease term on operating leases	11.3	5	11.64
Weighted-average discount rates on operating leases	3.67 %	6	3.47 %
Right-of-use assets obtained in exchange for lease liabilities	2,341		1,655

The following table reconciles future undiscounted lease payments due under non-cancelable operating leases (those amounts subject to recognition) to the aggregate operating lessee lease liability as of December 31, 2024:

(In thousands)	
2025	\$ 3,588
2026	3,546
2027	3,241
2028	2,992
2029	2,924
2030 and subsequent years	18,944
Total lease payments	35,235
Less: Interest	6,701
Present value of lease liabilities	\$ 28,534

Note 7 Deposits

Aggregate time deposits of \$250,000 or more were \$465.8 million at December 31, 2024, and \$389.8 million at December 31, 2023. Scheduled maturities of time deposits at December 31, 2024, were as follows:

(In thousands)	Less than \$250,000 and \$250,000 over			Total		
Maturity						
Three months or less	\$ 223,429	\$	193,827	\$	417,256	
Over three through six months	205,872		124,145		330,017	
Over six through twelve months	76,394		56,769		133,163	
Total due in 2024	\$ 505,695	\$	374,741	\$	880,436	
2026	49,741		38,194		87,935	
2027	36,336		48,814		85,150	
2028	8,125		3,017		11,142	
2029	1,766		1,001		2,767	
Thereafter	945		0		945	
Total	\$ 602,608	\$	465,767	\$	1,068,375	

Note 8 Federal Funds Purchased and Securities Sold Under Agreements to Repurchase

Information regarding securities sold under agreements to repurchase and Federal funds purchased is detailed in the following tables for the years ended December 31:

Securifies So	d Under	Agreements to	Renurchase
Sccurres 50	u Unuci	rigi comento to	reputenase

Average interest rate paid during the year	5.99 %	Ď	0.00 %	0	0.00 %

Securities sold under agreements to repurchase ("repurchase agreements") are secured borrowings that typically mature within thirty to ninety days, although the Company has, at times, entered into repurchase agreements with the Federal Home Loan Bank ("FHLB") with longer maturities. The Company uses both retail and wholesale repurchase agreements. Retail repurchase agreements are arrangements with local customers of the Company, in which the Company agrees to sell securities to the customer with an agreement to repurchase those securities at a specified later date. Retail repurchase agreements totaled \$37.0 million at December 31, 2024. The Company had no outstanding wholesale repurchase agreements at December 31, 2024.

Securities sold under agreements to repurchase are stated at the amount of cash received in connection with the transaction. The Company may be required to provide additional collateral based on the fair value of the underlying securities.

Federal funds purchased are short-term borrowings that typically mature within one to 90 days.

Note 9 Other Borrowings

The following table summarizes the Company's borrowings as of December 31:

(In thousands)	2024	2023
Overnight FHLB advances	\$ 247,000 \$	477,100
Term FHLB advances	543,247	125,000
Total other borrowings	\$ 790,247 \$	602,100

The Company, through its subsidiary bank, had available line-of-credit agreements with correspondent banks permitting borrowings to a maximum of approximately \$139.0 million at December 31, 2024, and \$99.0 million at December 31, 2023. There were no outstanding advances against those lines at December 31, 2024 or December 31, 2023.

Through its subsidiary bank, the Company has a borrowing relationship with the FHLB, which provides secured borrowing capacity, subject to available collateral. As a member of the FHLB, the Company can use certain unencumbered mortgage-related assets and securities to secure borrowings from the FHLB. Established borrowing capacity with the FHLB was \$1.5 billion and \$1.6 billion at December 31, 2024 and December 31, 2023, respectively. The unused borrowing capacity on established lines with the FHLB was \$502.8 million and \$642.2 million at December 31, 2024, respectively.

At December 31, 2024, there were \$247.0 million in overnight advances and \$543.2 million in term advances with the FHLB, with a weighted average rate of 4.52%, compared to \$477.1 million in overnight advances and \$125.0 million in term advances with a weighted average rate of 5.15%, at December 31, 2023. At December 31, 2024, the term advances with the FHLB includes \$398.2 million which matures within one year and \$145.0 million which matures in over one year. Maturities of advances due in over one year include \$70.0 million in 2026, \$50.0 million in 2027 and \$25.0 million in 2028.

In addition to amounts presented above, availability of \$200 million and \$316 million, at December 31, 2024 and 2023, respectively, was utilized to collateralize municipal deposits through several standby letters of credit with the Federal Home Loan Bank.

The Company had no callable FHLB borrowings at December 31, 2024.

The Company has a \$25.0 million line of credit with a bank. As of December 31, 2024 and December 31, 2023, there was no outstanding balance on the line. The line matures in June 2025.

Note 10 Employee Benefit Plans

The Company maintains a noncontributory defined-benefit plan (the "DB Pension Plan") and a 401(k) plan (the "Retirement Savings Plan"). The Company makes both matching contributions and discretionary contributions under the Retirement Savings Plan, which covers substantially all employees of the Company.

The DB Pension Plan was closed to new employees at year-end 2009 and was frozen on July 31, 2015. The benefits under the DB Pension Plan are based on years of service, age and percentages of the employees' average final compensation. The Retirement Savings Plan offers the participant a wide range of investment alternatives from which to choose. Assets of the Company's DB Pension Plan are invested in mutual funds and cash equivalents.

The Retirement Savings Plan covers substantially all employees of the Company who have reached the age of 21. The Company makes matching contributions to an account set up in the participant's name. Employees may contribute a percentage of their eligible compensation with a Company match of such contributions up to a maximum match of 2%. The Company also provided an additional employer contribution of 2% of the employee's base pay. The Company's expense associated with these contributions was \$3.4 million in 2024, \$3.2 million in 2023, and \$3.1 million in 2022. In addition, discretionary contributions are made once per year and equals a percentage of pay and varies based on the participant's age, service, and tenure with the Company. Expenses related to the discretionary contributions totaled \$3.9 million in 2024, \$4.2 million in 2023, and \$4.1 million in 2022.

The Company has an Employee Stock Ownership Plan ("ESOP") covering substantially all employees of the Company that have at least one year of service. The ESOP allows for Company contributions in the form of common stock of the Company. Annually, the Tompkins Board of Directors determines a profit-sharing payout to its employees in accordance with a performance-based formula. A percentage of the approved amount is paid in Company common stock into the ESOP. Contributions are limited to a maximum amount as stipulated in the ESOP. The remaining percentage is either paid out in cash, contributed to a health savings account, or deferred into the Retirement Savings Plan at the direction of the employee. Compensation expense related to the profit-sharing payout totaled \$3.8 million in 2024, \$1.4 million in 2023, and \$5.3 million in 2022.

The Company maintains supplemental employee retirement plans ("SERPs") for certain executives. In 2016, certain SERPs were amended and restated to reflect changes resulting from the freezing of the DB Pension Plan, and the Company entered into additional SERP agreements with certain executives. In 2019, the SERP for the Company's CEO was amended to expand the definition of "Earnings" under the SERP to better align the scope of compensation included in our CEO's retirement benefits with chief executive compensation in a manner that is more consistent with market practice. All benefits provided under the SERPs are unfunded and the Company makes payments to plan participants.

The Company also maintains a post-retirement welfare benefit plan that provides health and death benefits for certain team members. Under this plan, as amended in 2005, the Company contributes toward post-retirement healthcare benefits for employees who commenced employment prior to January 1, 2005. Retirees and employees who were eligible to retire when the health benefit was amended were unaffected. Generally, all other employees were eligible for Health Reimbursement Accounts ("HRA") with an initial balance equal to the amount of the Company's estimated then current liability. Contributions to the plan are limited to an annual contribution of 4% of the total HRA balance. Employees, upon retirement, will be able to utilize their HRA for qualified health costs and deductibles. In 2019, the death benefit was discontinued for new entrants, and only employees who had attained age 50 as of February 1, 2020 are eligible to earn this benefit.

The Company engages independent, external actuaries to compute the amounts of liabilities and expenses relating to all of its employee benefits plans, subject to the assumptions that the Company selects. The benefit obligation for these plans represents the liability of the Company for current and former employees, and is affected primarily by the following: service cost (benefits attributed to employee service during the period); interest cost (interest on the liability due to the passage of time); actuarial gains/losses (experience during the year different from that assumed and changes in plan assumptions); and benefits paid to participants.

GAAP requires an employer to recognize in its statements of condition as an asset or liability the overfunded or underfunded status of a defined benefit postretirement plan, measured as the difference between the fair value of plan assets and the benefit obligation. For a pension plan, the benefit obligation is the projected benefit obligation; for any other postretirement benefit plan, such as a retiree health care plan, the benefit obligation is the accumulated postretirement benefit obligation. The following table sets forth the changes in the projected benefit obligation for the DB Pension Plan and SERPs and the accumulated post-retirement benefit obligation for the Life and Healthcare Plan, the respective plan assets, and the plans' funded status and amounts recognized in the Company's Consolidated Statements of Condition at December 31, 2024 and 2023 (the measurement dates of the plans).

	Life and Healthcare								
	DB Pension Plan				Plan		SERP P	lan	
(In thousands)	2024 2023			2024 2023		2024	2023

Plan participants' contributions	0		0		87	92	0	0	
Actuarial loss (gain)	(4,288)		1,242		(815)	(153)	(2,259)	(315)	
Benefits paid	(4,352)		(4,320)		(337)	(326)	(1,019)	(906)	
Benefit obligation at end of year	\$ 65,266 \$	\$	70,718	\$	6,905 \$	7,603 \$	22,872 \$	24,961	
Change in plan assets:									
Fair value of plan assets at beginning of year	\$ 84,644 \$	\$	78,885	\$	0 \$	0 \$	0 \$	0	
Actual return on plan assets	8,025		10,079		0	0	0	0	
Plan participants' contributions	0		0		87	92	0	0	
Employer contributions	0		0		250	234	1,019	906	
Benefits paid	(4,353)		(4,320)		(337)	(326)	(1,019)	(906)	
Fair value of plan assets at end of year	\$ 88,316 \$	\$	84,644	\$	0 \$	0 \$	0 \$	0	
Funded (unfunded) status	\$ 23,050 \$	\$	13,926	\$	(6,905) \$	(7,603) \$	(22,872) \$	(24,961)	

The benefit obligation for the DB Pension Plan at December 31, 2024 and 2023, was \$65.3 million and \$70.7 million, respectively. The accumulated benefit obligation for the Life and Healthcare Plan at December 31, 2024 was \$6.9 million compared to \$7.6 million at December 31, 2023. The accumulated benefit obligation for the SERPs at December 31, 2024 was \$20.0 million and was \$21.1 million at December 31, 2023. The funded status of the DB Pension Plan was recognized in accrued interest and other assets, and the unfunded status of the Life and Healthcare Plan and the SERPs was recognized in other liabilities in the Consolidated Statements of Condition at December 31, 2024 in the amounts of \$23.1 million, \$(6.9) million, and \$(22.9) million, respectively. The funded status of the DB Pension Plan was recognized in accrued interest and other assets, and the Life and Healthcare Plan and the SERPs was recognized in accrued interest and other assets of the Life and Healthcare Plan and the SERPs was recognized in accrued interest and other assets, and the Life and Healthcare Plan and the SERPs was recognized in accrued interest and other assets, and the Life and Healthcare Plan and the SERPs was recognized in accrued interest and other assets, and the Life and Healthcare Plan and the SERPs was recognized in other liabilities in the Consolidated Statements of Condition at December 31, 2023, in the amounts of \$13.9 million, \$(7.6) million, and \$(25.0) million, respectively.

The actuarial (gain) loss shown above totaling a gain of \$7.4 million in 2024 and a loss of \$774,000 in 2023 were mainly the result of changes in the discount rates used to measure the benefit obligation of all plans at year end compared to those used at the prior year-end. The specific discount rates for each plan at December 31, 2024 and December 31, 2023 are provided below.

Net periodic benefit cost and other comprehensive income (loss) includes the following components:

(In thousands)	DB Pension Plan			Life and H	Iealthcare P	lan	SERP Plan		
Components of net periodic benefit cost	2024	2023	2022	2024	2023 20	22 2	2024	2023	2022
Service cost	\$ 0 \$	0 \$	§ 0\$	25 \$	33 \$	174 \$	59 \$	43	\$ 78
Interest cost	3,188	3,275	1,985	342	354	223	1,130	1,148	814

Rate of compensation increase									
Benefit Cost for Plan Year	N/A	N/A	N/A	4.00 %	4.00 %	4.00 %	5.00 %	5.00 %	5.00 %
Benefit Obligation at End of Plan Year	N/A	N/A	N/A	4.00 %	4.00 %	4.00 %	5.00 %	5.00 %	5.00 %

To develop the expected long-term rate of return on assets assumption for the DB Pension Plan, the Company considered the historical returns and the future expectations for returns for each asset class, as well as target asset allocations of the pension portfolio. Based on this analysis, the Company selected 6.25% as the long-term rate of return on assets assumption.

The discount rates used to determine the Company's DB Pension Plan and other post-retirement benefit obligations as of December 31, 2024, and December 31, 2023, were determined by matching estimated benefit cash flows to a yield curve derived from Citigroup's regular bond yield at December 31, 2024 and December 31, 2023.

Based on the Company's anticipation of future experience under the DB Pension Plan, the mortality tables used to determine future benefit obligations under the plan were updated as of December 31, 2021 to the PRI-2012 Mortality Tables with Mortality Improvement Scale MP 2021. The Company updated this assumption based on the newest improvement table released by The Society of Actuaries as of December 31, 2024. The appropriateness of the assumptions is reviewed annually.

Cash Flows

Plan assets are amounts that have been segregated and restricted to provide benefits, and include amounts contributed by the Company and amounts earned from investing contributions, less benefits paid. The Company funds the cost of the SERPs and the Life and Healthcare Plan benefits on a pay-as-you-go basis.

The benefits as of December 31, 2024, expected to be paid in each of the next five fiscal years, and in the aggregate for the five fiscal years thereafter were as follows:

(In thousands)	DB Pension Plan	Life and Healthcare Plan	SERP Plan
2025	\$ 4,44	6 \$ 486	\$ 958
2026	4,62	0 487	948
2027	4,77	2 500	925
2028	4,74	4 493	900
2029	4,86	5 478	1,069
2029-2033	24,56	9 2,256	9,706
Total	\$ 48,01	6 \$ 4,700	\$ 14,506

Plan Assets

The DB Pension Plan's weighted-average asset allocations at December 31, 2024 and 2023, respectively, by asset category are as follows:

	2024	2023
Equity securities	60 %	61 %
Debt securities	39 %	38 %
Other	1 %	1 %
Total Allocation	100 %	100 %

It is the policy of the Trustees of the Plan to invest the Pension Trust Fund (the "Fund") for total return. The Trustees seek the maximum return consistent with the interests of the participants and beneficiaries and prudent investment management. The management of the Fund's assets is in compliance with the guidelines established in the Company's Pension Plan and Trust Investment Policy, which is reviewed and approved annually by the Tompkins Board of Directors, and the Retirement Plan Management Committee.

The intention is for the Fund to be prudently diversified. The Fund's investments will be invested among the fixed income, equity and cash equivalent sectors. The Retirement Plan Management Committee will designate minimum and maximum positions in any of the sectors. In no case shall more than 10% of the Fund assets consist of qualified securities or real estate of the Company. Unless otherwise approved by the Trustees of the Plan, the following investments are prohibited:

- Restricted stock, private placements, short positions, calls, puts, or margin transactions;
- Commodities, oil and gas properties, real estate properties, or
- Any investment that would constitute a prohibited transaction as described in the Employee Retirement Income Security Act of 1974 ("ERISA"), section 407, 29 U.S.C. 1106.

In general, the investment in debt securities is limited to readily marketable debt securities having a Standard & Poor's rating of "A" or Moody's rating of "A", securities of, or guaranteed by the United States Government or its agencies, or obligations of banks or their holding companies that are rated in the three highest ratings assigned by Fitch Investor Service, Inc. In addition, investments in equity securities must be listed on the NYSE or traded on the national Over-the-Counter market or listed on the NASDAQ. Cash equivalents generally may be United States Treasury obligations, commercial paper having a Standard & Poor's rating of "A-1" or Moody's National Credit Officer rating of "P-1" or higher.

The major categories of assets in the Company's DB Pension Plan as of year-end are presented in the following table. Assets are segregated by the level of valuation inputs within the fair value hierarchy established by ASC Topic 820 utilized to measure fair value (see "Note 18 - Fair Value Measurements").

Fair Value Measurements December 31, 2024

(In thousands)	F	air Value 2024	(Level 1)	(Leve	el 2)	(Level 3)
Cash and cash equivalents	\$	966	\$ 966	\$	0 \$	0
Common stocks		34,249	34,249		0	0
Mutual funds		53,101	53,101		0	0
Total Fair Value of Plan Assets	\$	88,316	\$ 88,316	\$	0 \$	0

Fair Value Measurements December 31, 2023

December 51, 2025					
	F	air Value			
(In thousands)		2023	(Level 1)	(Level 2)	(Level 3)
Cash and cash equivalents	\$	1,023	\$ 1,023	\$ 0	\$ 0
Common stocks		25,975	25,975	0	0
Mutual funds		57,646	57,646	0	0
Total Fair Value of Plan Assets	\$	84,644	\$ 84,644	\$ 0	\$ 0

The Company determines the fair value for its pension plan assets using an independent pricing service. The pricing service uses a variety of techniques to determine fair value, including market maker bids, quotes and pricing models. Inputs to the model include recent trades, benchmark interest rates, spreads, and actual and projected cash flows. Based on the inputs used by our independent pricing services, the Company identifies the appropriate level within the fair value hierarchy to report these fair values. U.S. Treasury securities, common stocks and mutual funds are considered Level 1 based on quoted prices in active markets.

Life insurance benefits are provided to certain officers of the Company. In connection with these policies, the Company reflected life insurance assets on its Consolidated Statements of Condition of \$76.4 million at December 31, 2023, and \$67.9 million at December 31, 2023. The insurance is carried at its cash surrender value on the Consolidated Statements of Condition. The Company purchased \$6.3 million of insurance in 2024. In the fourth quarter of 2023, the Company surrendered certain separate account BOLI policies. Increases in the cash surrender value of the insurance are reflected as noninterest income, net of any related mortality expense.

The Company provides split dollar life insurance benefits to certain employees. The plan is unfunded and the estimated liability of the plan is recorded in other liabilities in the Consolidated Statements of Condition at \$1.7 million as of December 31, 2024 and \$1.5 million as of December 31, 2023. Compensation expense related to the split dollar life insurance was approximately \$177,000 in 2024 and \$3,000 in 2023.

Note 11 Stock Plans and Stock-Based Compensation

In 2019, the 2009 Tompkins Financial Corporation Equity Plan ("2009 Equity Plan") expired and was replaced by the new Tompkins Financial Corporation 2019 Equity Plan ("2019 Equity Plan"). Under the 2019 Equity Plan, the Company may grant stock options, stock appreciation rights ("SARs"), shares of restricted stock, restricted units and performance share awards covering up to 2,275,000 shares of the Company's common stock to certain officers and employees. Restricted stock awards and restricted units and performance share awards will reduce the shares available for grant under the 2019 Equity Plan by 4.25 shares for each share subject to an award, resulting in a total number of full-value share awards that may be issued under the 2019 Equity Plan to 535,294.

Stock options and SARs are granted at an exercise price equal to the stock's fair value at the date of grant, may not have a term in excess of ten years, and have vesting periods of five and seven years from the grant date. Options and SARs with an expiration date in 2026 have a five-year vesting schedule with zero percent vesting in year one and 25% vesting in years two through five. All other options and SARs have a seven-year vesting schedule with zero percent vesting in year one, 17% vesting in years two through six and 15% vesting in year seven. Restricted stock awards and restricted stock units that were granted in the periods covering 2019 through 2024 have a five-year vesting schedule with zero percent vesting in year one and 25% vesting in years two through five. For performance share awards, there is a 3-year performance period in the fiscal years immediately following the grant date, at which time the performance goal is measured. If the goal is achieved, the value of the

award either vests and is immediately payable, or is subject to additional time-based vesting, depending on the terms of the particular executive's award agreement.

The Company granted 84,019 equity awards to its employees in 2024, consisting of 57,060 shares of restricted stock, 19,929 performance stock units and 7,030 restricted stock units. The Company granted 120,116 equity awards to its employees in 2023, consisting of 79,140 shares of restricted stock, 28,346 performance share units and 12,630 restricted stock units.

The following table presents the activity related to stock options and SARs under the Company's 2009 Equity Plan and 2019 Equity Plan for the year ended December 31, 2024:

	Number of Shares/Rights	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at January 1, 2024	48,882	\$ 59.13		
Granted	0	0.00		
Exercised	(18,325)	50.21		
Forfeited	(10,536)	60.60		
Outstanding at December 31, 2024	20,021	\$ 66.51	1.23	\$ 131,642
Exercisable at December 31, 2024	20,021	\$ 66.51	1.23	\$ 131,642

Total stock-based compensation expense for stock options and SARs was \$0 in 2024, \$0 in 2023, and \$33,000 in 2022. As of December 31, 2024, unrecognized compensation cost related to unvested stock options and SARs totaled \$0. Net cash proceeds, tax benefits and intrinsic value related to total stock options, SARs, and restricted stock exercised is as follows:

(In thousands)	 2024	2023	2022
Proceeds from stock option exercises	\$ (115) \$	(124) \$	(538)
Tax benefits related to stock option exercises	(134)	(229)	196
Intrinsic value of stock option exercises	132	270	1,075

The Company uses the Black-Scholes option-valuation model to determine the fair value of incentive stock options and SARs at the date of grant. The valuation model estimates fair value based on the assumptions for the risk-free rate, expected dividend yield, volatility and expected life. The risk-free rate is the interest rate available on zero-coupon U.S. Treasury instruments with a remaining term equal to the expected term of the share option at the time of grant. The expected dividend yield is based on the dividend trends and the market price of the Company's stock price at grant. Volatility is largely based on historical volatility of the Company's stock price. The expected term is based upon historical experience of employee exercises and terminations as the vesting term of the grants. The fair values of the grants are expensed over the vesting periods. There were no incentive stock options or SARs granted in 2024, 2023 or 2022.

December 31, 2024										
Options and SARs Outstanding				Options and SARs Exercisable						
Range of Exercise Prices	Number Outstanding	Weighted Average Remaining Contractual Life	Weighted Average Number		We	ighted Average Exercise Price				
\$50.01-76.90	19,799	1.22	\$	66.29	19,799	\$	66.29			
\$76.91-86.18	222	1.89	\$	86.18	222	\$	86.18			
	20,021	1.23	\$	66.51	20,021	\$	66.51			

The following table presents activity related to restricted stock awards and restricted stock units for the year ended December 31, 2024:

	Number of Shares	Weighted Average Grant Date Fair Value
Unvested at January 1, 2024	269,913	\$ 63.22
Granted	84,019	72.29
Vested	(53,779)	76.59
Forfeited	(18,556)	66.78
Unvested at December 31, 2024	281,597	\$ 62.33

The Company granted 57,060 restricted stock awards, 7,030 restricted stock units, and 19,929 performance units in 2024, each at an average grant date fair value of \$72.29. The Company granted 79,140 restricted stock awards, 12,630 restricted stock units, and 28,346 performance units in 2023, each at an average grant date fair value of \$51.02. The Company granted 50,155 restricted stock awards, 8,215 restricted stock units, 16,284 performance units and 2,615 performance share awards in 2022 at an average grant date fair value of \$81.48. The grant date fair values were the closing prices of the Company's common stock on the grant dates. The Company recognized stock-based compensation related to restricted stock awards, restricted stock units, and performance share awards of \$4.6 million in 2024, \$4.4 million in 2023, and \$4.8 million in 2022. Unrecognized compensation costs related to restricted stock and performance awards totaled \$10.0 million, and restricted stock units totaled \$1.3 million at December 31, 2024 and will be recognized over 3.5 years and 3.8 years, respectively on a weighted average basis.

Note 12 Other Noninterest Income and Expense

Other income and operating expense totals are presented in the table below. Components of these totals exceeding 1%, and other significant items, of the aggregate of total interest income and other income for any of the years presented below are stated separately.

		Year ended December 31,				l,
(In thousands)		2024		2023		2022
NONINTEREST INCOME						
Other service charges		\$ 2,753	\$	2,625	\$	2,703
Increase in cash surrender value of corpo	orate owned life insurance	2,768		1,727		1,162
Net gain on sale of loans		1,001		96		155

Other miscellaneous expenses		14,990		17,331		13,919
	Total other noninterest expenses	\$ 51,199	\$	56,314	\$	50,497

Note 13 Revenue Recognition

The Company recognizes revenue in accordance with ASU No. 2014-09 Revenue from Contracts with Customers (ASC 606) and all subsequent ASUs that modified ASC 606. ASC 606 is applicable to the Company's noninterest revenue streams including its deposit related fees, card services income, trust and management, and insurance commissions and fees. Noninterest revenue streams in-scope of Topic 606 are discussed below.

Insurance Commissions and Fees

Insurance commissions and fees from insurance product sales are typically earned upon the effective date of bound coverage, as no significant performance obligation remains after coverage is bound. Commission revenue on policies billed in installments is accrued based upon the completion of the performance obligation creating a current asset for the unbilled revenue until such time as an invoice is generated, typically not to exceed twelve months. Contingent commissions are estimated based upon management's expectations for the user with an appropriate constraint applied and accrued relative to the recognition of the corresponding core commissions.

Trust & Asset Management

Trust and asset management income is primarily comprised of fees earned from the management and administration of trusts and other customer assets. The Company's performance obligation is generally satisfied over time and the resulting fees are recognized monthly, based upon the month-end fair value of the assets under management and the applicable fee rate. Payment is generally received a few days after month end through a direct charge to customers' accounts. The Company does not earn performance-based incentives. Optional services such as real estate sales and tax return preparation services are also available to existing trust and asset management customers. The Company's performance obligation for these transactional-based services is generally satisfied, and related revenue recognized, at a point in time (i.e., as incurred). Payment is received shortly after services are rendered.

Mutual Fund & Investment Income

Mutual fund and investment income consists of other recurring revenue streams such as commissions from sales of mutual funds and other investments, and investment advisory fees from the Company's Strategic Asset Management Services wealth management product. Commissions from the sale of mutual funds and other investments are recognized on the trade date, which is when the Company has satisfied its performance obligation. The Company also receives periodic service fees (i.e., trailers) from mutual fund companies typically based on a percentage of net asset value, recorded over time, usually monthly or quarterly, as net asset value is determined. Investment advisor fees from the wealth management product are earned over time and based on an annual percentage rate of the net asset value. The investment advisor fees are charged to the customer's account in advance on the first month of the quarter, and the revenue is recognized over the following three-month period. The Company does engage a third party, LPL Financial, LLC (LPL), to satisfy part of this performance obligation, and therefore this income is reported net of any corresponding expenses paid to LPL.

Service Charges on Deposit Accounts

Service charges on deposit accounts consist of account analysis fees (i.e., net fees earned on analyzed business and public checking accounts), monthly service fees, check orders, and other deposit account related fees. The Company's performance obligation for account analysis fees and monthly service fees is generally satisfied, and the related revenue recognized, over the period in which the service is provided. Check orders and other deposit account related fees are largely transactional based, and therefore, the Company's performance obligation is satisfied and related revenue recognized, at a point in time. Payment for service charges on deposit accounts is primarily received immediately or in the following month through a direct charge to customers' accounts.

Card Services Income

Fees, exchange, and other service charges are primarily comprised of debit and credit card income, ATM fees, merchant services income, and other service charges. Debit and credit card income is primarily comprised of interchange fees earned whenever the Company's debit and credit cards are processed through card payment networks such as MasterCard. ATM fees are primarily generated when a Company cardholder uses a non-Company ATM or a non-Company cardholder uses a Company ATM. Merchant services income mainly represents fees charged to merchants to process their debit and credit card transactions, in addition to account management fees. The Company's performance obligation for fees and exchange are largely satisfied, and related revenue recognized, when the services are rendered or upon completion. Payment is typically received immediately or in the following month.

Other

Other service charges include revenue from processing wire and ACH transfers, lock box service and safe deposit box rental. Payment on these revenue streams is received primarily through a direct charge to the customer's account, immediately or in the following month, and therefore, the Company's performance obligation is satisfied, and related revenue recognized, at a point in time.

The following presents noninterest income, segregated by revenue streams in-scope and out-of-scope of ASC 606, for the years ended December 31, 2024, 2023, and 2022:

	Year ended December 31,				
(In thousands)	2024	2023	2022		
Noninterest Income					
In-scope of Topic 606:					
Insurance Revenues	\$ 39,100 \$	37,351 \$	36,201		
Investment Service Income	19,589	17,951	18,091		
Service Charges on Deposit Accounts	7,288	6,913	7,365		
Card Services Income	12,057	11,488	11,024		
Other	1,296	1,324	1,291		
Noninterest Income (in-scope of ASC 606)	79,330	75,027	73,972		
Noninterest Income (out-of-scope of ASC 606)	8,797	(64,786)	4,000		
Total Noninterest Income	\$ 88,127 \$	10,241 \$	77,972		

Contract Balances

A contract asset balance occurs when an entity performs a service for a customer before the customer pays consideration or before payment is due, which would result in contract receivables or assets, respectively. A contract liability balance is an entity's obligation to transfer a service to a customer for which the entity has already received payment or for which payment is due from the customer. The Company's noninterest revenue streams, excluding some insurance commissions and fees, are largely based on transactional activity, or standard month-end revenue accruals such as asset management fees based on month-end market values. Receivables primarily consist of amounts due for insurance and wealth management services performed for which the Company's performance obligations have been fully satisfied. Consideration is often received immediately or shortly after the Company satisfies its performance obligation and revenue is recognized. The Company does not typically enter into long-term revenue contracts with customers, and therefore, does not experience significant contract balances.

Contract Acquisition Costs

In connection with the adoption of ASC 606, an entity is required to capitalize, and subsequently amortize into expense, certain incremental costs of obtaining a contract with a customer if these costs are expected to be recovered. The incremental costs of obtaining a contract are those costs that an entity incurs to obtain a contract with a customer that it would not have incurred if the contract had not been obtained (for example, sales commission). The Company utilizes the practical expedient which allows entities to immediately expense contract acquisition costs when the asset that would have resulted from capitalizing these costs would have been amortized in one year or less. Upon adoption of ASC 606, the Company did not capitalize any contract acquisition costs.

Note 14 Income Taxes

The income tax expense (benefit) attributable to income from operations is summarized as follows:

(In thousands)	Current	Deferred	Total
2024			
Federal	\$ 20,248	\$ (3,313) \$	16,935
State	4,837	231	5,068
Total	\$ 25,085	\$ (3,082) \$	22,003
2023			
Federal	\$ 2,583	\$ 381 \$	2,964
State	346	(815)	(469)
Total	\$ 2,929	\$ (434) \$	2,495
2022			
Federal	\$ 19,238	\$ 994 \$	20,232
State	4,409	(84)	4,325
Total	\$ 23,647	\$ 910 \$	24,557

The primary reasons for the differences between income tax expense and the amount computed by applying the statutory federal income tax rate to earnings are as follows:

	2024	2023	2022
Statutory federal income tax rate	21.0 %	21.0 %	21.0 %
State income taxes, net of federal benefit	4.5 %	(3.1)%	3.1 %
Tax exempt income	(1.3)%	(9.4)%	(1.1)%
Excess benefits from equity-based compensation	(0.1)%	1.1 %	(0.3)%
Bank-owned life insurance income	(0.6)%	(3.0)%	(0.2)%
Surrender of Bank-owned life insurance	0.0 %	13.6 %	0.0 %
Federal tax credit	(0.2)%	(0.8)%	0.0 %
Non-Deductible Meals & Entertainment	0.1 %	1.3 %	0.0 %
Section 162(m) Limitation	0.1 %	1.1 %	0.2 %
Deductible ESOP Dividends under 404(k)	(0.3)%	(2.5)%	(0.3)%
All other	0.5 %	1.5 %	0.0 %
Total	23.7 %	20.8 %	22.4 %

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities as of December 31 were as follows:

(In thousands)	2024	2023
Deferred tax assets:		
Allowance for credit losses	\$ 14,733 \$	13,731
Lease liability	7,119	7,267
Interest income on nonperforming loans	870	992
Compensation and benefits	12,936	12,414
Purchase accounting adjustments	323	424
Liabilities held at fair value	78	54
Deferred loan fees and costs	1,290	1,111
Net operating loss carryforwards	0	491
Other	753	744
Total	\$ 38,102 \$	37,228
Deferred tax liabilities:		
Prepaid pension	12,019	11,813
Right of use asset	6,763	6,955
Depreciation	3,068	3,505
Intangibles	1,675	1,600
Leases	2,199	2,688
Taxable bank-owned life insurance policies	0	1,834
Contingent Commissions	871	778
Other	1,336	855
Total deferred tax liabilities	\$ 27,931 \$	30,028
Net deferred tax asset at year-end	10,171	7,200
Net deferred tax asset at beginning of year	7,200	6,766
Increase in net deferred tax asset	2,971	434
Investments in tax credit structures accounting standard adoption recorded through equity	111	0
Deferred tax benefit	\$ (3,082) \$	(434)

Net operating loss carryforwards for New York and New York City purposes of \$8.5 million and 344,000 were generated in 2023. These net operating losses were fully utilized in 2024.

The above analysis does not include recorded deferred tax assets (liabilities) of \$33.9 million and \$32.7 million as of December 31, 2024 and 2023, respectively, related to net unrealized holdings losses/(gains) in the available-for-sale debt securities portfolio. In addition, the analysis excludes recorded deferred tax assets of \$5.6 million and \$8.4 million, as of December 31, 2024 and 2023, respectively, related to employee benefit plans.

Realization of deferred tax assets is dependent upon the generation of future taxable income or the existence of sufficient taxable income. A valuation allowance is provided when it is more likely than not that some portion of the deferred tax assets will not be realized. In assessing the need for a valuation allowance, management considers the scheduled reversal of the deferred tax liabilities, the level of historical taxable income, and the projected future taxable income over the periods in which the temporary differences comprising the deferred tax assets will be deductible. Based on its assessment, management determined that no valuation allowance was necessary at December 31, 2024 and 2023.

At December 31, 2024, December 31, 2022 and December 31, 2021, the Company had an insignificant amount of ASC 740-10 unrecognized tax benefits. The Company does not expect the total amount of unrecognized tax benefits to significantly increase within the next twelve months. The Company recognizes interest and penalties on unrecognized tax benefits in income tax expense in its Consolidated Statements of Income.

The Company is subject to U.S. federal income tax and income tax in New York and various state jurisdictions. All tax years ending after December 31, 2020 are open to examination by the taxing authorities.

Note 15 Other Comprehensive Income (Loss)

The tax effect allocated to each component of other comprehensive income (loss) were as follows:

December 31, 2024	Before-Tax Amount	Tax (Expense) Benefit	Net of Tax
(In thousands)			
Available-for-sale debt securities:			
Change in net unrealized gain (loss) during the period	\$ (3,709) \$	5 1,588	\$ (2,121)
Reclassification adjustment for net realized gains on sale of available- for-sale debt securities included in net income	(50)	12	(38)
Net unrealized losses	(3,759)	1,600	(2,159)
Employee benefit plans:

Note 16 Commitments and Contingent Liabilities

The Company, in the normal course of business, is a party to financial instruments with off-balance-sheet risk to meet the financial needs of its customers. These financial instruments include loan commitments, standby letters of credit, and unused portions of lines of credit. The contract, or notional amount, of these instruments represents the Company's involvement in particular classes of financial instruments. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized on the Consolidated Statements of Condition.

The Company's maximum potential obligations to extend credit for loan commitments (unfunded loans, unused lines of credit, and standby letters of credit) outstanding on December 31 were as follows:

(In thousands)	2024	2023
Loan commitments	\$ 152,255 \$	109,342
Standby letters of credit	38,525	39,089
Undisbursed portion of lines of credit	1,134,554	1,020,558
Total	\$ 1,325,334 \$	1,168,989

Commitments to extend credit (including lines of credit) are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Standby letters of credit are conditional commitments to guarantee the performance of a customer to a third party. The Company extends standby letters of credit to its customers in the normal course of business. The standby letters of credit are generally short-term. As of December 31, 2024, the Company's maximum potential obligation under standby letters of credit was \$38.5 million. Management uses the same credit policies in making commitments to extend credit and standby letters of credit as are used for on-balance-sheet lending decisions. Based upon management's evaluation of the counterparty, the Company may require collateral to support commitments to extend credit and standby letters of credit. The credit risk amounts are equal to the contractual amounts, assuming the amounts are fully advanced and collateral or other security is of no value. The Company does not anticipate losses as a result of these transactions. These commitments also have off-balance-sheet interest-rate risk, in that the interest rate at which these commitments were made may not be at market rates on the date the commitments are fulfilled. Since some commitments and standby letters of credit are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash flow requirements.

The Company may also have rate lock agreements associated with mortgage loans to be sold in the secondary market (certain of which relate to loan applications for which no formal commitment has been made). The amount of rate lock agreements at December 31, 2024 was immaterial. In order to limit the interest rate risk associated with rate lock agreements, as well as the interest rate risk associated with mortgages held for sale, if any, the Company enters into agreements to sell loans in the secondary market to unrelated investors on a loan-by-loan basis. At December 31, 2024, the Company had approximately \$4,730,000 of commitments to sell mortgages to unrelated investors on a loan-by-loan basis.

In the normal course of business, the Company is involved in various legal proceedings, investigations, and administrative proceedings. Civil litigation may range from individual actions involving a single plaintiff to putative class action lawsuits with potentially thousands of class members. Investigations may involve both formal and informal proceedings, by both government agencies and self-regulatory bodies. Based on information presently known to us, we do not believe there is any matter to which we are a party, or involving any of our properties, that individually or in the aggregate, would reasonably be expected to have a material adverse effect on our financial statements.

Note 17 Earnings Per Share

Calculation of basic earnings per share (Basic EPS) and diluted earnings per share (Diluted EPS) is shown below.

	Year	en	ded Decemb	er 3	51,
(In thousands, except share and per share data)	2024		2023		2022
Basic					
Net income available to common shareholders	\$ 70,850	\$	9,505	\$	85,030
Less: income attributable to unvested stock-based compensation awards	0		(42)		(250)
Net earnings allocated to common shareholders	70,850		9,463		84,780
Weighted average shares outstanding, including unvested stock-based compensation awards	14,404,233		14,442,077		14,532,448
Less: unvested stock-based compensation awards	(186,127)		(187,416)		(204,168)
Weighted average shares outstanding - Basic	14,218,106		14,254,661		14,328,280
Diluted					
Net earnings allocated to common shareholders	\$ 70,850	\$	9,463	\$	84,780
Weighted average shares outstanding - Basic	14,218,106		14,254,661		14,328,280
Plus: incremental shares from assumed conversion of stock-based compensation awards	50,337		46,560		76,014
Weighted average shares outstanding - Diluted	14,268,443		14,301,221		14,404,294
Basic EPS	\$ 4.98	\$	0.66	\$	5.92
Diluted EPS	\$ 4.97	\$	0.66	\$	5.89

Stock-based compensation awards representing 8,476, 39,266, and 1,554 common shares for 2024, 2023, and 2022, respectively, were not included in the computations of diluted earnings per common share because the effect on those periods would have been antidilutive.

Note 18 Fair Value Measurements

FASB ASC Topic 820, *Fair Value Measurements and Disclosures*, defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. FASB ASC Topic 820 also establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 – Quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability;

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of December 31, 2024 and 2023 segregated by the level of valuation inputs within the fair value hierarchy used to measure fair value:

Recurring Fair Value Measurements December 31, 2024

(In thousands)		(Level 1)	(Level 2)	(Level 3)
Assets				
Available-for-sale debt securities				
U.S. Treasuries	\$ 71,497	\$ 0	\$ 71,497	\$ 0
Obligations of U.S. Government sponsored entities	380,280	0	380,280	0
Obligations of U.S. states and political subdivisions	77,694	0	77,694	0
Mortgage-backed securities - residential, issued by:				
U.S. Government agencies	63,254	0	63,254	0

Liabilities				
Derivatives not designated as hedging instruments	\$ 1,826	\$ 0	\$ 1,826	\$ 0

Securities: Fair values for U.S. Treasury securities are based on quoted market prices. Fair values for obligations of U.S. government sponsored entities, mortgage-backed securities-residential, obligations of U.S. states and political subdivisions, and U.S. corporate debt securities are based on quoted market prices, where available, as provided by third party pricing vendors. If

quoted market prices are not available, fair values are based on quoted market prices of comparable instruments in active markets and/or based upon matrix pricing methodology, which uses comprehensive interest rate tables to determine market price, movement and yield relationships. These securities are reviewed periodically to determine if there are any events or changes in circumstances that would adversely affect their value.

The Company determines fair value for its available-for-sale debt securities using an independent bond pricing service for identical assets or very similar securities. The pricing service uses a variety of techniques to determine fair value, including market maker bids, quotes and pricing models. Inputs to the model include recent trades, benchmark interest rates, spreads, and actual and projected cash flows. The Company reviews the prices supplied by the independent pricing service, as well as their underlying pricing methodologies, for reasonableness and to ensure such prices are aligned with traditional pricing matrices. In general, the Company's investment portfolio consists of traditional investments, nearly all of which are U.S. Treasury obligations, federal agency bullet or mortgage pass-through securities, or general obligation municipal bonds. Pricing for such instruments is fairly generic and is easily obtained. Quarterly, the Company will validate prices supplied by the independent pricing service by comparing to prices obtained from a second third-party source. Based on the inputs used by our independent pricing services, the Company identifies the appropriate level within the fair value hierarchy to report these fair values.

Derivatives: The Company has contracted with a third party vendor to provide periodic valuations for its interest rate derivatives to determine the fair value of its interest rate contracts. The vendor utilizes standard valuation methodologies applicable to interest rate derivatives such as discounted cash flow analysis. Such valuations are based upon readily observable market data and are therefore considered Level 2 valuations by the Company.

Certain assets are measured at fair value on a nonrecurring basis, that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances. For the Company, these include loans held for sale, collateral dependent individually evaluated loans, other real estate owned, goodwill and other intangible assets. During 2024, certain collateral dependent individually evaluated loans and other real estate owned at December 31, 2024, were adjusted down to fair value. Collateral values are estimated using Level 3 inputs based upon observable market data. Real estate values are generally valued using independent appraisals or other indications of value based on recent comparable sales of similar properties or assumptions generally available in the market.

The following table presents the carrying amounts and estimated fair values of the Company's financial instruments at December 31, 2024 and 2023. The carrying amounts shown in the table are included in the Consolidated Statements of Condition under the indicated captions. The fair value estimates, methods and assumptions set forth below for the Company's financial instruments, including those financial instruments carried at cost, are made solely to comply with disclosures required by GAAP and does not always incorporate the exit-price concept of fair value prescribed by ASC Topic 820-10 and should be read in conjunction with the financial statements and notes included in this Report.

Estimated Fair Value of Financial Instruments December 31, 2024

(In thousands)		Carrying Amount	Fair Value	(Level 1)	(Level 2)	(Level 3)

Other borrowings	602,100	600,814	0	600,814	0
Accrued interest payable	3,474	3,474	0	3,474	0

¹Lease receivables, although excluded from the scope of ASC Topic 825, are included in the estimated fair value amounts at their carrying value.

The following methods and assumptions were used in estimating fair value disclosures for financial instruments:

Cash and Cash Equivalents: The carrying amounts reported in the Consolidated Statements of Condition for cash, noninterestbearing deposits, money market funds, and Federal funds sold approximate the fair value of those assets.

Securities - Held-to-Maturity: Fair values for U.S. Treasury securities are based on quoted market prices. Fair values for obligations of U.S. government sponsored entities, and mortgage-backed securities-residential are based on quoted market

prices, where available, as provided by third party pricing vendors. If quoted market prices were not available, fair values are based on quoted market prices of comparable instruments in active markets and/or based upon a matrix pricing methodology, which uses comprehensive interest rate tables to determine market price, movement and yield relationships. These securities are reviewed periodically to determine if there are any events or changes in circumstances that would adversely affect their value.

FHLB Stock and Other Stock: The carrying amount of FHLB stock approximates fair value. If the stock is redeemed, the Company will receive an amount equal to the par value of the stock. For miscellaneous equity securities, carrying value is cost.

Loans and Leases: Fair value for loans is calculated using an exit price notion. The Company's valuation methodology takes into account factors such as estimated cash flows, including contractual cash flow and assumptions for prepayments; liquidity risk; and credit risk. The fair values of residential loans were estimated using discounted cash flow analyses, based upon available market benchmarks for rates and prepayment assumptions. The fair values of commercial and consumer loans were estimated using discounted cash flow analyses, based upon interest rates currently offered for loans and leases with similar terms and credit quality. The fair values of loans held for sale were determined based upon contractual prices for loans with similar characteristics.

Accrued Interest Receivable and Accrued Interest Payable: The carrying amount of these short term instruments approximates fair value.

Deposits: The fair values disclosed for noninterest bearing accounts and accounts with no stated maturities are equal to the amount payable on demand at the reporting date. The fair value of time deposits is based upon discounted cash flow analyses using rates offered for FHLB advances, which is the Company's primary alternative source of funds.

Fed Funds Purchased and Securities Sold Under Agreements to Repurchase: The carrying amount of these instruments approximates fair value because the instruments have short-term maturities.

Other borrowings: The fair value of other borrowings is based upon discounted cash flow analyses using current rates offered for FHLB advances, with similar terms.

Note 19 Regulations and Supervision

Capital Requirements:

The Company and its subsidiary bank are subject to various regulatory capital requirements administered by federal bank regulatory agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material adverse effect on the Company's business, results of operation and financial condition. Under capital adequacy guidelines and the regulatory framework for prompt corrective action (PCA), banks must meet specific guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. Capital amounts and classifications of the Company and its subsidiary bank are also subject to qualitative judgments by regulators concerning components, risk weightings, and other factors. Quantitative measures established by regulation to ensure capital adequacy require the maintenance of minimum amounts and ratios (set forth in the table below) of common equity Tier I capital, total capital and Tier 1 capital to risk-weighted assets (as defined in the regulation), and of Tier 1 capital to average assets (as defined in the regulation). Management believes that the Company and its subsidiary bank meet all capital adequacy requirements to which they are subject.

As of December 31, 2024, the most recent notifications from Federal bank regulatory agencies categorized the Company's subsidiary bank as "well capitalized" under the regulatory framework for PCA. To be categorized as well capitalized, the Company and its subsidiary bank must maintain total risk-based, Tier 1 risk-based, common equity Tier 1 capital and Tier 1 leverage ratios as set forth in the table below. There are no conditions or events since that notification that management believes have changed the capital category of the Company or its subsidiary bank.

In the first quarter of 2020, U.S. Federal regulatory authorities issued an interim final rule that provided banking organizations that adopt CECL during the 2020 calendar year with the option to delay for two years the estimated impact of CECL on regulatory capital relative to regulatory capital determined under the prior incurred loss methodology, followed by a three-year transition period to phase out the aggregate amount of the capital benefit provided during the initial two-year delay (i.e., a five-year transition in total). In connection with our adoption of CECL on January 1, 2020, we elected to utilize the five-year CECL transition.

The following table presents actual and required capital ratios as of December 31, 2024 and December 31, 2023 for Tompkins and its banking subsidiary. The minimum capital amounts required under Basel III include the capital conservation buffer of 2.5%, which must be added to each of the minimum required risk-based capital ratios (Total capital to risk-weighted assets, Common equity Tier 1 capital to risk-weighted assets and Tier 1 capital to risk weighted assets). Capital levels required to be considered well capitalized are based upon prompt corrective action regulations, as amended to reflect the changes under the Basel III Capital Rules.

Actual capital amounts and ratios of the Company and its subsidiary bank are as follows:

	Actual	Minimum Capital Required- Basel III Fully-Phased-In	Required to be Considered Well Capitalized
(dollar amounts in thousands)	Amount/Ratio	Amount/Ratio	Amount/Ratio
December 31, 2024			
Total Capital (to risk-weighted assets)			
The Company (consolidated)	\$796,226 /13.1%	\$639,844/>10.5%	\$609,375/>10.0%

A Statement of Changes in Shareholders' Equity has not been presented since it is the same as the Consolidated Statement of Changes in Shareholders' Equity previously presented for the consolidated Company.

Note 21 Segment and Related Information

The Company adopted ASU No. 2023-07, "Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures." effective December 15, 2024. In accordance with Topic 280, the Company manages its operations through three reportable business segments: (i) banking and financial services ("Banking"), (ii) insurance services ("Tompkins Insurance") and (iii) wealth management ("Tompkins Financial Advisors"). The Company's insurance services and wealth management services are managed separately from the Banking segment.

Banking

Tompkins Community Bank has twelve banking offices located in Ithaca, NY and surrounding communities; fourteen banking offices located in the Genesee Valley region of New York State as well as Monroe County; twelve full-service banking offices located in the counties north of New York City; and sixteen banking offices headquartered and operating in the areas surrounding southeastern Pennsylvania.

Banking services consist primarily of attracting deposits from the areas served by the Company's banking subsidiary and using those deposits to originate a variety of commercial loans, agricultural loans, consumer loans, real estate loans and leases in those same areas. The Company's subsidiary bank provides a variety of retail banking services including checking accounts, savings accounts, time deposits, IRA products, residential mortgage loans, personal loans, home equity loans, credit cards, debit cards and safe deposit services delivered through its branch facilities, ATMs, voice response, mobile banking, Internet banking and remote deposit services. The Company's subsidiary bank also provides a variety of commercial banking services such as lending activities for a variety of business purposes, including real estate financing, construction, equipment financing, accounts receivable financing and commercial leasing. Other commercial services include deposit and cash management services, letters of credit, sweep accounts, credit cards, Internet-based account services, mobile banking and remote deposit services. The banking subsidiary does not engage in sub-prime lending.

Insurance

The Company provides property and casualty insurance services and employee benefits consulting through Tompkins Insurance Agencies, Inc., a 100% wholly-owned subsidiary of the Company, headquartered in Batavia, New York. Tompkins Insurance is an independent insurance agency, representing many major insurance carriers and provides employee benefit consulting to employers in Western and Central New York and Southeastern Pennsylvania, assisting them with their medical, group life insurance and group disability insurance. Tompkins Insurance has four stand-alone offices in Western New York.

Wealth Management

The wealth management segment is generally organized under the Tompkins Financial Advisors brand. Tompkins Financial Advisors offers a comprehensive suite of financial services to customers, including trust and estate services, investment management and financial and insurance planning for individuals, corporate executives, small business owners and high net worth individuals. Tompkins Financial Advisors has offices in each of the Company's regional markets.

Chief Operating Decision Maker

Our Chief Executive Officer ("CEO") is our chief operating decision maker. In order to allocate costs, capital and resources to each operating segment, we (i) identify the cost or opportunity value of funds within each business segment, (ii) measure the profitability of a particular business segment by relating appropriate costs to revenues, (iii) evaluate each business segment in a manner consistent with its economic impact on consolidated earnings, and (iv) enhance asset and liability pricing decisions. Our CEO reviews actual net income versus budgeted net income on a monthly basis to assess segment performance and to make decisions about allocating capital and personnel among the segments.

Summarized financial information concerning the Company's reportable segments and the reconciliation to the Company's consolidated results is shown in the following table. Investment in subsidiaries is netted out of the presentations below. The "Intercompany" column identifies the intercompany activities of revenues, expenses and other assets between the banking and financial services segments. The Company accounts for intercompany fees and services at an estimated fair value according to regulatory requirements for the services provided. Intercompany items relate primarily to the use of human resources, information systems, accounting and marketing services provided by any of the banks and the holding company. All other accounting policies are the same as those described in "Note 1 - Summary of Significant Accounting Policies" in this Report.

Note 22 Derivatives and Hedging Activities

Risk Management Objective of Using Derivatives

The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company manages economic risks, including interest rate, liquidity, and credit risk, primarily by managing the amount, sources, and duration of its assets and liabilities and the use of derivative financial instruments. Specifically, the Company enters into derivative financial instruments to manage exposures that arise from business activities that result in the receipt or payment of future known and uncertain cash amounts, the value of which are determined by interest rates. The Company also enters into interest rate derivatives to accommodate the business requirements of certain qualifying customers. All derivatives are recognized as other assets or other liabilities on the Company's Consolidated Statements of Condition at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative and resulting designation.

Derivatives Designated as Hedging Instruments

Fair Value Hedges of Interest Rate Risk

The Company is exposed to changes in the fair value of certain of its fixed-rate assets due to changes in benchmark interest rates. The Company uses interest rate swaps to manage its exposure to changes in fair value on these instruments attributable to changes in the designated benchmark interest rate. Interest rate swaps designated as fair value hedges involve the payment of fixed-rate amounts to a counterparty in exchange for the Company receiving variable-rate payments over the life of the agreements without the exchange of the underlying notional amount. As of December 31, 2024, the Company had interest rate swaps with a total notional amount of \$150.0 million hedging fixed-rate residential mortgage loans.

For derivatives designated and that qualify as fair value hedges, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in interest income.

As of December 31, 2024 and December 31, 2023, the following amounts were recorded on the Consolidated Statements of Condition related to cumulative basis adjustment for fair value hedges.

Line Item in the Statement of Financial Position in Which the Hedged Item is Included	Carrying Amount of the Hedged Assets/(Liabilities)	Cumulative Amount of Fair Value Hedging Adjustment Included in the Carrying Amount of the Hedged Assets/ (Liabilities)	Carrying Amount of the Hedged Assets/(Liabilities)	Cumulative Amount of Fair Value Hedging Adjustment Included in the Carrying Amount of the Hedged Assets/ (Liabilities)
	December 31, 2024	December 31, 2024	December 31, 2023	December 31, 2023
Fixed Rate Loans ¹	\$149,175	\$(825)	\$148,633	\$(1,367)
Total	\$149,175	\$(825)	\$148,633	\$(1,367)

¹ These amounts include the amortized cost basis of closed portfolios of fixed rate loans used to designate hedging relationships in which the hedged item is the stated amount of assets in the closed portfolio anticipated to be outstanding for the designated hedged period. At December 31, 2024 and December 31, 2023, the amortized cost basis of the closed portfolios used in these hedging relationships was \$711.0 million and \$763.4 million respectively; the cumulative basis adjustments associated with these hedging relationships was \$825,000 and \$1.4 million, respectively; and the amount of the designated hedged items was \$150.0 million for both periods.

Derivatives Not Designated as Hedging Instruments

The Company enters into interest rate swaps to help commercial loan borrowers manage their interest rate risk. These interest rate swap contracts allow borrowers to convert variable-rate loan payments to fixed-rate loan payments. When the Company enters into an interest rate derivative contract with a commercial loan borrower, it simultaneously enters into a "mirror" interest rate contract with a third party. For interest rate swaps, the third party exchanges the client's fixed-rate loan payments for variable-rate loan payments. The Company's credit policies with respect to interest rate contracts with commercial borrowers are similar to those used for loans. The Company retains the risk that is associated with the potential failure of counterparties and the risk inherent in originating loans. The interest rate contracts with counterparties are generally subject to bilateral collateralization terms. These derivatives are not designated as hedges and therefore, changes in fair value are recognized in earnings.

The Company has entered into risk participation agreements with other banks in commercial loan arrangements. Participating banks guarantee the performance on borrower-related interest rate swap contracts. These derivatives are not designated as hedges and therefore, changes in fair value are recognized in earnings.

Under a risk participation-out agreement, a derivative asset, the Company participates out a portion of the credit risk associated with the interest rate swap position executed with the commercial borrower for a fee paid to the participating bank. Under a risk participation-in agreement, a derivative liability, the Company assumes, or participates in, a portion of the credit risk associated with the interest rate swap position with the commercial borrower for a fee received from the other bank.

Tabular Disclosure of Fair Values of Derivative Instruments on the Consolidated Statements of Condition

The tables below present the fair value of the Company's derivative financial instruments as well as their classification on the consolidated statements of condition as of December 31, 2024 and December 31, 2023. Amounts below are presented on a net basis in accordance with applicable accounting guidance.

Credit-risk-related Contingent Features

Applicable for OTC derivatives with dealers

The Company has agreements with each of its derivative counterparties that contain a provision where if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default on its derivative obligations. As of December 31, 2024 and December 31, 2023, the fair value of derivatives in a net liability position, which includes accrued interest but excludes any adjustment for nonperformance risk, related to these agreements was \$1.3 million and \$1.8 million, respectively. As of December 31, 2024 and December 31, 2023, the Company had posted \$260,000 and \$1.5 million, respectively, in collateral related to these agreements. The interest rate hedge counterparty has posted \$890,000 and \$1.5 million of collateral in proportion to potential losses in the derivative position at December 31, 2024 and December 31, 2023, respectively.

Unaudited Quarterly Financial Data

The Company has adopted certain provisions within the amendments to Regulation S-K that eliminate tabular presentation of unaudited quarterly financial information. There have been no material retrospective changes to financial statements for any of the quarters within the fiscal years ended December 31, 2024 and December 31, 2023.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's management, including its Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of December 31, 2024. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that as of the end of the period covered by this Report on Form 10-K, the Company's disclosure controls and procedures were effective.

Management's Annual Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. As of December 31, 2024, management evaluated the effectiveness of the Company's internal control over financial reporting based on the framework for effective internal control over financial reporting established in "Internal Control - Integrated Framework (2013)," issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission. Based on its evaluation under the COSO framework, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2024. The results of management's assessment were reviewed with the Company's Audit and Risk Committee of its Board of Directors. The independent registered public accounting firm that audited the Company's consolidated financial statements included in this report has issued an attestation report on the Company's internal control over financial reporting as of December 31, 2024, which is included in Part II, Item 8 of this Report.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the quarter ended December 31, 2024, that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

None

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this item is incorporated herein by reference to the material under the captions "Proposal No. 1 – Election of Directors", the discussion of the Company's code of ethics under "Corporate Governance Matters - Code of Ethics", the discussion of the Audit & Risk Committee under "Matters Relating to the Board of Directors", the discussion of any failures to timely file reports required by Section 16(a) of the Exchange Act under "Delinquent Section 16(a) Reports", and the discussion of the Company's insider trading policy under the heading "Corporate Governance Matters - Insider Trading Policy", all in the Company's proxy statement relating to its 2025 annual meeting of shareholders (the "Proxy Statement"), which the Company intends to file with the SEC on or about April 1, 2025; and the material captioned "Information About Our Executive Officers" in Part I of this Report on Form 10-K.

Item 11. Executive Compensation

The information called for by this item is incorporated herein by reference to the material under the captions, "Executive Compensation" (excluding the information presented under the subheading "Pay Versus Performance"), "Matters Relating to the Board of Directors - Director Compensation", "Matters Relating to the Board of Directors – Compensation Committee – Compensation Committee Interlocks and Insider Participation", and "Corporate Governance Matters - Risk and Influence on Compensation Programs" in the Proxy Statement.

The material incorporated herein by reference to the material under the caption "Executive Compensation - Compensation Committee Report" in the Proxy Statement is deemed "furnished" within this Report on Form 10-K and shall not be deemed to be "soliciting material" or to be "filed" with the SEC or subject to Regulation 14A, or to the liabilities of Section 18 of the Exchange Act, and shall not be deemed to be incorporated by reference into any filing under the Securities Act or the Exchange Act, except to the extent that the Company specifically requests that the information be treated as soliciting material or specifically incorporates it by reference into such filing.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information regarding security ownership of management and certain beneficial owners is incorporated by reference to the information under the caption "Security Ownership of Certain Beneficial Owners and Management" in the Proxy Statement.

Information regarding stock-based compensation awards outstanding and available for future grant as of December 31, 2024 is presented in the table below.

Equite Commention Dlon Information

Equity Compensation Plan Information							
Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available For Future Issuance Under Equity Compensation Plans (excluding Securities in Column (a))				
	(a)	(b)	(c)				
Equity Compensation Plans Approved by Security Holders	80,044 ¹	\$66.51	918,783 ²				
Equity Compensation Plans Not Approved by Security Holders	0	0.00	0				

¹ Includes 60,023 Performance Stock Units to be issued in shares of the Company's common stock if certain target metrics are met. No weighted average exercise price is included in Column (b) for these securities.

² Represents shares that are available for issuance under the 2019 Equity Incentive Plan, which became effective May 7, 2019, as amended effective May 9, 2023.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information called for by this item is incorporated herein by reference to the material under the captions "Corporate Governance Matters - Affirmative Determination of Director Independence" and "Transactions with Related Persons" in the Proxy Statement.

Item 14. Principal Accountant Fees and Services

The information called for by this item is incorporated herein by reference to the material under the caption "Independent Registered Public Accounting Firm" in the Proxy Statement. Our independent registered public accounting firm is KPMG LLP, Rochester, NY, Auditor Firm ID 185.
