☒ **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended December 31, 2024

or

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission File Number: 001-38207

Celcuity Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or Other Jurisdiction of Incorporation or Organization)

16305 36th Avenue North, Suite 100 Minneapolis, MN
(Address of principal executive offices)

82-2863566
(I.R.S. Employer Identification No.)

55446
(Zip Code)

Registrant's telephone number, including area code: (763) 392-0767

Securities registered pursuant to Section 12(b) of the Act:

Title of each class
Common Stock, \$0.001 par value per share

Trading Symbol(s)
CELC

Name of each exchange on which registered
The Nasdaq Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. ☐ Yes ☒ No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. ☐ Yes ☒ No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). ☒ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.:

Large accelerated filer ☐
Non-accelerated filer ☒

Accelerated filer ☐
Smaller reporting company ☒
Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 262(b)) by the registered public accounting firm that prepared or issued its audit report. ☐

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). ☐ Yes ☒ No

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant, based on \$16.38, the closing price of the shares of common stock on June 28, 2024 (the last business day of the registrant's most recently completed second fiscal quarter) as reported by The Nasdaq Capital Market on such date, was approximately \$530,223,434.

As of March 24, 2025, there were 37,839,392 shares of the registrant's common stock outstanding.

DOCUMENTS INCORPORATED IN PART BY REFERENCE

Portions of the registrant's definitive proxy statement relating to its 2025 Annual Meeting of Stockholders are incorporated by reference into Part III of this Annual Report on Form 10-K.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 provides a “safe harbor” for forward-looking statements. This Annual Report on Form 10-K (this “Annual Report”) contains forward-looking statements regarding us, our business prospects and our results of operations that are subject to certain risks and uncertainties that could cause our actual business, prospects and results of operations to differ materially from those that may be anticipated by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those described in Part I, Item 1A, “Risk Factors” and elsewhere in this Annual Report. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this Annual Report. We expressly disclaim any intent or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Readers are urged to carefully review and consider the various disclosures made by us in this Annual Report and in our other reports filed with the Securities and Exchange Commission (the “SEC”) that advise interested parties of the risks and uncertainties that may affect our business.

All statements, other than statements of historical facts, contained in this Annual Report, including statements regarding our plans, objectives and expectations for our business, operations and financial performance and condition, are forward-looking statements. In some cases, you can identify forward-looking statements by the following words: “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “might,” “target,” “ongoing,” “plan,” “potential,” “predict,” “project,” “should,” “will,” “would,” or the negative of these terms or other comparable terminology, although not all forward-looking statements contain these words. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our results, performance or achievements to be materially different from the information expressed or implied by the forward-looking statements in this Annual Report. Additionally, our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures or investments that we may make. Forward-looking statements may include, among other things, statements relating to:

- our clinical trial plans and the estimated timelines and costs for such trials;
- our plans to develop and commercialize our products, and our expectations about the market opportunity for gedatolisib and our ability to serve that market;
- our expectations with respect to our competitive advantages, including the potential efficacy of gedatolisib in various patient types alone or in combination with other treatments;
- our expectations regarding the timeline of patient enrollment and results from clinical trials, including our existing Phase 3 VIKTORIA-1 clinical trial, upcoming Phase 3 VIKTORIA-2 clinical trial, and Phase 1b/2 clinical trial for gedatolisib;
- our expectations regarding our ability to obtain United States Food and Drug Administration (“FDA”) approval to commercialize gedatolisib;
- our expectations regarding governmental laws and regulations affecting our operations, including, without limitation, developments in laws and regulations or their interpretation, including, among others, changes in tax laws and regulations internationally and in the U.S. and laws that affect our operations and our laboratory;
- our expectations with respect to the development, validation, required approvals, costs and timelines of our drug candidate gedatolisib;
- our beliefs related to the potential benefits resulting from Breakthrough Therapy designation for gedatolisib;
- our plans with respect to research and development and related expenses for the foreseeable future;
- our beliefs about our ability to capitalize on the exclusive global development and commercialization rights obtained from our license agreement with Pfizer with respect to gedatolisib;
- our expectations regarding the future payments that may be owed to Pfizer under our license agreement with them;
- our beliefs with respect to the potential rate and degree of market acceptance, both in the United States and internationally, and clinical utility of gedatolisib;
- our revenue expectations;
- our expectations regarding business development activities, including collaborations with pharmaceutical companies;
- our plans with respect to pricing in the United States and internationally, and our ability to obtain reimbursement for our drug candidate, gedatolisib, including expectations as to our ability or the amount of time it will take to achieve successful reimbursement from third-party payors, such as commercial insurance companies and health maintenance organizations, and from government insurance programs, such as Medicare and Medicaid;
- our expectations as to the use of proceeds from our financing activities;

- our expectations with respect to availability of capital, including accessing our current debt facility or any other debt facility or other capital sources in the future, and our assumption that we will have adequate authorized shares for future equity issuances;
- our beliefs regarding the adequacy of our cash on hand to fund our clinical trials, capital expenditures, working capital, and other general corporate expenses, as well as the increased costs associated with being a public company;
- our plans with respect to potentially raising capital; and
- our expectations regarding our ability to obtain and maintain intellectual property protection for our product candidates, including our gedatolisib drug candidate and our CELsignia platform and tests.

These statements involve known and unknown risks, uncertainties and other factors that may cause our results or our industry's actual results, levels of activity, performance or achievements to be materially different from the information expressed or implied by these forward-looking statements. Certain risks, uncertainties and other factors include, but are not limited to, our limited operating history; our potential inability to develop, validate and commercialize gedatolisib on a timely basis or at all; the uncertainties and costs associated with clinical studies and with developing and commercializing biopharmaceuticals; the complexity and difficulty of demonstrating the safety and sufficient magnitude of benefit to support regulatory approval of gedatolisib and other products we may develop; challenges we may face in developing and maintaining relationships with pharmaceutical company partners; the uncertainty and costs associated with clinical trials; the uncertainty regarding market acceptance by physicians, patients, third-party payors and others in the medical community, and with the size of market opportunities available to us; difficulties we may face in managing growth, such as hiring and retaining a qualified sales force and attracting and retaining key personnel; changes in government regulations; tightening credit markets and limitations on access to capital; stock market volatility or other factors that may affect our ability to access capital on favorable terms or at all; and obtaining and maintaining intellectual property protection for our technology and time and expense associated with defending third-party claims of intellectual property infringement, investigations or litigation threatened or initiated against us. See "Risk Factors" in Part I, Item 1A of this Annual Report for additional risks, uncertainties and other factors applicable to the Company.

SUMMARY OF RISK FACTORS

Below is a summary of the material factors that make an investment in our common stock speculative or risky. This summary does not address all of the risks that we face. Additional discussion of the risks summarized in this risk factor summary, and other risks that we face, can be found in the "Risk Factors" section of Part I, Item 1A of this Annual Report and should be carefully considered, together with other information in this Annual Report and our other filings with the Securities and Exchange Commission before making investment decisions regarding our common stock.

- We have a limited operating history and we may never generate revenue or profit;
- Our inability to raise additional capital on acceptable terms in the future may limit our ability to develop and commercialize our drug candidate, gedatolisib;
- Future financing activities could dilute the percentage ownership of our stockholders and could cause our stock price to fall, or could result in operating or other restrictions;
- We are currently conducting and will continue to conduct clinical trials. Clinical trials are expensive and complex with uncertain outcomes, which may prevent or delay commercialization of our products;
- Our near-term revenue prospects depend on the success of our initial drug product, gedatolisib. If we are unable to successfully complete clinical development of, obtain regulatory approval for, or commercialize, gedatolisib, or if we experience delays in doing so, our business will be materially and adversely impacted;
- The successful development and commercialization of our products is highly uncertain;
- We were not involved in the early development of gedatolisib, so we are dependent on third parties having accurately generated, collected, interpreted and reported data from certain preclinical and clinical trials;
- We have not yet successfully completed any registrational clinical trials, and we may be unable to do so for any drug candidates we may develop;
- For a new drug to be approved for marketing, the FDA in the United States and health authorities in other countries must determine that the drug is safe and effective. Because all drugs can have adverse effects, the data from our Phase 3 clinical study must demonstrate to the satisfaction of the FDA and other health authorities that the benefits of gedatolisib in combination with palbociclib and fulvestrant, or gedatolisib in combination with fulvestrant, outweigh its risks. Failure to demonstrate sufficient magnitude of benefit, even if the benefit is found to be statistically significant, may not support regulatory approval;

- We must navigate lengthy, uncertain, and expensive regulatory approval processes to be able to market our products in the U.S. and other jurisdictions;
- If we encounter difficulties enrolling patients in any of our clinical trials, our clinical development activities could be delayed or otherwise adversely affected;
- We depend on intellectual property licensed from third parties, including from Pfizer for our lead product candidate, gedatolisib, and termination of this license could result in the loss of significant rights, which would materially and adversely impact our business;
- If we and our business partners are unable to obtain and maintain intellectual property protection for our products and technology, or if the scope of the intellectual property protection obtained is not sufficiently broad, our competitors could develop and commercialize drug candidates similar or identical to ours, and our ability to successfully commercialize our drug candidate may be impaired;
- If we fail to comply with our obligations under our patent license with Pfizer, we could lose certain license rights that are important to our business;
- We rely on third parties to conduct certain aspects of our preclinical studies and clinical trials and to formulate and manufacture our drug product. If these third parties do not successfully carry out their contractual duties, meet expected deadlines or comply with regulatory requirements, we may not be able to obtain regulatory approval for, or commercialize, any potential product candidates;
- We will be dependent on our ability to attract and retain key personnel;
- We may encounter difficulties in scaling production, commercializing, marketing and distributing our products, including in hiring and retaining a qualified sales force;
- Our estimate of the market opportunity for our drug candidate may not prove to be accurate;
- We face significant competition from other pharmaceutical and diagnostic companies; and
- The price of our common stock may be volatile and fluctuate substantially.

PART I

ITEM 1. Business

Overview

Unless otherwise provided in this Annual Report, references to the “Company,” “we,” “us,” and “our” and similar references refer to Celcuity Inc., a Delaware corporation. We own various unregistered trademarks and service marks, including our corporate logo. Solely for convenience, the trademarks, trade names and service marks in this Annual Report, including those owned by third parties, may be referred to without the ®, TM or SM symbols, but such references should not be construed as any indicator that the owner of such trademarks, trade names and service marks will not assert, to the fullest extent under applicable law, their rights thereto. We do not intend the use or display of other companies’ trademarks, trade names and service marks to imply an endorsement or sponsorship of us by any other companies.

We are a clinical-stage biotechnology company focused on the development of targeted therapies for the treatment of multiple solid tumor indications. Our lead therapeutic candidate is gedatolisib, a potent, well-tolerated, small molecule reversible inhibitor, administered intravenously, that selectively targets all Class I isoforms of phosphatidylinositol-3-kinase (“PI3K”) and the two mechanistic targets of rapamycin (“mTOR”) sub-complexes, mTORC1 and mTORC2. Gedatolisib’s mechanism of action and pharmacokinetic properties are differentiated from other currently approved and investigational therapies that target PI3K or mTOR alone or together. We believe there is significant potential for gedatolisib to address breast and prostate cancer tumors, and it has the potential to be used in other tumor types where the PI3K/protein kinase B (“AKT”)/mTOR (“PAM”) pathway is either: i) driving tumorigenesis directly; ii) cooperating with other dysregulated signaling pathways; or iii) a mechanism of resistance to other drug therapies.

Our initial clinical development programs for gedatolisib are focusing on the treatment of patients with hormone receptor positive (“HR+”), human epidermal growth factor receptor 2 negative (“HER2-”), or HR+/HER2-, advanced or metastatic breast cancer (“ABC”), and patients with metastatic castration resistant prostate cancer (“mCRPC”).

In January 2022, gedatolisib was granted Fast Track designation for the treatment of patients with HR+/HER2- advanced breast cancer after progression on CDK4/6 therapy. Fast Track designation is granted by the FDA for products that are intended for the treatment of serious or life-threatening diseases or conditions and which demonstrate the potential to address an unmet medical need.

In July 2022, gedatolisib was granted Breakthrough Therapy Designation for HR+/HER2- advanced breast cancer after progression on CDK4/6 therapy. Breakthrough Therapy designation is granted by the FDA to expedite the development and regulatory review of an investigational medicine that is intended to treat a serious or life-threatening condition. The criteria for Breakthrough Therapy designation requires preliminary clinical evidence that demonstrates the drug may have substantial improvement on one or more clinically significant endpoints over available therapy.

In December 2022, we dosed the first patient in our Phase 3, open-label, randomized two-part clinical trial, VIKTORIA-1. This trial is evaluating the efficacy and safety of gedatolisib in combination with fulvestrant with and without palbociclib in adults with HR+, HER2- advanced breast cancer who have received prior treatment with a CDK4/6 inhibitor in combination with an aromatase inhibitor. Two studies based on PIK3CA mutation status are included in the trial. According to confirmed PIK3CA mutation status, patients will be manually assigned to a cohort evaluating patients who have PIK3CA wild type (“WT”) tumors or to a cohort evaluating patients who have PIK3CA mutant (“MT”) tumors. The two cohorts are randomized separately. The cohort evaluating PIK3CA WT patients completed enrollment during the fourth quarter of 2024 while the cohort evaluating patients with PIK3CA MT (as defined below) continues to enroll patients.

In February 2024, we dosed our first patient in our Phase 1b/2 clinical trial, CELC-G-201, evaluating gedatolisib in combination with darolutamide in patients with mCRPC. Initial preliminary data for the Phase 1 portion of the trial is expected to be available by the end of the second quarter of 2025.

During the third quarter of 2024, we commenced site selection and activation activities to support a Phase 3, open-label, randomized clinical trial, VIKTORIA-2. This trial is expected to dose its first patient in Q2 2025. This trial will evaluate the efficacy and safety of gedatolisib plus a CDK4/6 inhibitor and fulvestrant as first-line treatment for patients with HR+/HER2- endocrine treatment resistant advanced breast cancer. For the CDK4/6 inhibitor, investigators may choose either ribociclib or palbociclib. Approximately 200 clinical sites in North America, Europe, Latin America, and Asia-Pacific, including many sites included in the VIKTORIA-1 clinical trial, will participate in the study.

The PI3K/AKT/mTOR (PAM) Pathway

Dysregulation of the PAM signaling pathway is observed in many types of cancer, including breast and prostate cancer. The important role the PAM pathway plays in cancer has led to significant investment in the development of many different PI3K and mTOR inhibitors for solid tumors.

Activities associated with PI3K involve complex essential cell regulatory mechanisms, including feedforward and feedback signaling loops. Overactivation of the pathway is frequently present in human malignancies and plays a key role in cancer progression. Four catalytic isoforms of Class I PI3K preferentially mediate signal transduction and tumor cell survival based on the type of malignancy and the genetic or epigenetic alterations an individual patient harbors. Due to the multiple subcellular locations, activities, and importance of the different PI3K complexes in regulating many types of cancer cell proliferation, control of PI3K activity is an important target in cancer therapy.

mTOR is a critical effector in cell-signaling pathways commonly dysregulated in human cancers. The mTOR signaling pathway integrates both intracellular and extracellular signals and serves as a central regulator of cell metabolism, growth, proliferation, and survival. mTOR is a serine/threonine protein kinase, a downstream effector of PI3K, and regulated by hormones, growth factors, and nutrients, that are contained in two functionally distinct protein assemblies – mTORC1 and mTORC2. In cancer, dysfunctional signaling leads to various constitutive activities of the mTOR complexes, making mTOR a good therapeutic target.

Developing efficacious and well-tolerated therapies that target this pathway has been challenging. This reflects the inherent adaptability and complexity of the PAM pathway, where numerous feedforward and feedback loops, crosstalk with other pathways, and compensatory pathways enable resistance to PAM pathway inhibition. Another major hurdle for the development of PAM pathway inhibitors has been the inability to achieve optimal drug-target blockade in tumors while avoiding undue toxicities in patients.

Gedatolisib

By targeting multiple nodes of the PAM pathway, gedatolisib can overcome adaptive resistance mechanisms that inhibitors targeting single PI3K/AKT/mTOR nodes do not address. As a result, we believe gedatolisib offers distinct advantages over currently approved and investigational therapies that target PI3K or mTOR alone or together.

- **Overcomes limitations of therapies that only inhibit a single Class I PI3K isoform or only one mTOR kinase complex.**

Gedatolisib is a pan-class I isoform PI3K inhibitor with low nanomolar potency for the p110 α , p110 β , p110 γ , and p110 δ isoforms. Because gedatolisib inhibits all four PI3K isoforms and both the mTORC1 and mTORC2 complexes, it prevents the confounding effect of isoform interaction that may occur with isoform specific PI3K inhibitors and the confounding interaction between PI3K isoforms, AKT, and mTOR. By contrast, node-specific inhibitors cross-activate uninhibited sub-units due to numerous feedforward and feedback loops between the PI3K isoforms, AKT, and mTOR complexes, which in turn induces compensatory resistance that reduces the efficacy of isoform specific PI3K, AKT, or mTORC1 inhibitors.

To compare the functional effect of inhibiting single versus multiple PAM pathway nodes, we evaluated gedatolisib, and node-selective inhibitors for PI3K α (alpelisib), AKT (capivasertib) and mTORC1 (everolimus) in a panel of breast cancer cell lines using a live cell proliferation rate dose response analysis. The results of this analysis are presented in the table below.

Breast Cancer Cell Line Proliferation Rate Dose Response Analysis
Average values for 14 PIK3CA MT and 14 PIK3CA WT breast cancer cell lines

Note: Growth rate (“GR”) was assessed using 28 cell lines by measuring live cells reducing potential with Real Time-Glo MT luciferase assay before and after 72-hour drug treatment. GR₅₀ (concentration required to inhibit growth rate by 50%) is a measure of potency. Max cell growth inhibition (GR at highest drug concentration tested) is a measure of efficacy.

Source: Rossetti S. et.al., npj Breast Cancer, 2024

On average, gedatolisib was 300-fold more potent than the single node PAM inhibitors analyzed and only gedatolisib induced a significant cytotoxic effect. In addition, gedatolisib’s potency and efficacy was comparable in cell lines with and without PIK3CA mutations, in contrast to the single node PAM inhibitors.

- **Better tolerated by patients than oral PI3K and mTOR drugs.**

Gedatolisib is administered intravenously (IV) on a four-week cycle of three-weeks-on, one-week-off, in contrast to the orally administered pan-PI3K or dual PI3K/mTOR inhibitors that are no longer being clinically developed. Oral pan-PI3K or PI3K/mTOR inhibitors have repeatedly been found to induce significant side effects that were not well tolerated by patients. This typically leads to a high proportion of patients requiring dose reductions or treatment discontinuation, despite showing promising efficacy. By contrast, gedatolisib stabilizes at lower concentration levels in plasma compared to orally administered PI3K inhibitors, resulting in less toxicity, while maintaining concentrations sufficient to inhibit PAM pathway signaling.

Isoform-specific PI3K or mTORC1 inhibitors administered orally were developed to reduce toxicities in patients. While the range of toxicities associated with single-node PAM inhibitors is narrower than oral pan-PI3K or PI3K/mTOR inhibitors, administering them orally on a continuous basis still leads to challenging toxicities. The experience with the FDA approved oral PI3K- α inhibitor, alpelisib, and mTORC1 inhibitor, everolimus, illustrates the challenge. In their Phase 3 pivotal trials, alpelisib and everolimus were found to induce hyperglycemia in 79% and 69% of patients evaluated, respectively. In addition, 26% and 24% of patients discontinued alpelisib and everolimus, respectively, due to treatment related adverse events. By contrast, in the 103-patient dose expansion portion of the Phase 1b clinical trial with gedatolisib, only 25% of patients experienced hyperglycemia and less than 9% discontinued treatment.

Clinical Development

As of December 31, 2024, 492 patients with solid tumors have received gedatolisib in eight completed clinical trials. Gedatolisib’s safety, tolerability and pharmacokinetic profile were determined in a Phase 1 First-in-Human clinical trial. Of the 492 patients, 129 were treated with gedatolisib as a single agent in three clinical trials. The remaining 363 patients received gedatolisib in combination with other anti-cancer agents in five clinical trials. Additional patients received gedatolisib in combination with other anti-cancer agents in nine investigator sponsored clinical trials.

Breast Cancer Program

Breast cancer is the most prevalent cancer in women, accounting for 30% of all female cancers and 13% of cancer-related deaths in the United States. The National Cancer Institute estimated that approximately 310,720 new cases of breast cancer would be diagnosed in the United States in 2024, and approximately 42,250 breast cancer patients would die of the disease.

Four different breast cancer subtypes are currently identified using molecular tests that determine the level of HR and HER2 expression. The most common subtype of ABC is HR+/HER2-. Approximately 70% of all breast cancer tumors express the estrogen receptor (“ER”), which, upon activation, regulates the expression of various genes involved in tumor proliferation. Despite progress in treatment strategies, metastatic HR+/HER2- breast cancer (“MBC”) remains an incurable disease, with a median overall survival (OS) of three years and a five-year survival rate of 34%.

Three different classes of targeted therapies are currently used to treat HR+/HER2- tumors: endocrine-based therapies, CDK4/6 inhibitors, and PAM inhibitors. Each of the CDK4/6 inhibitors and PAM inhibitors are generally used to respond to the related mechanisms of resistance to endocrine therapy, namely, activation of the CDK4/6 and PAM pathways.

Over 70% of breast cancers have direct or indirect activation of the PAM pathway. The upregulation of the PAM pathway promotes hormone-dependent and independent ER transcriptional activity, which contributes to endocrine resistance, leading to tumor cell growth, survival, motility, and metabolism. Clinical studies have demonstrated that PAM inhibition can restore sensitivity to estrogen therapy (ET).

Additionally, the PAM pathway, like other mitogenic pathways, can also promote the activities of cyclin D and CDK4/6 to drive proliferative cell cycling. The available evidence indicates that resistance to CDK4/6 inhibition in patients with HR+/HER2- advanced breast cancer is a transient adaptive mechanism, most likely involving the PAM pathway. This data indicates that CDK4/6 signaling may be restored in CDK4/6 resistant tumors when PAM inhibitors are applied. Thus, continuing CDK4/6 inhibitor treatment in combination with a PAM inhibitor in patients who progressed on their prior CDK4/6 inhibitor, would both blockade the potentially reactivated CDK4/6 pathway and prevent adaptive activation of the PAM pathway. This suggests the limited efficacy induced by current standard-of-care (SOC) therapies in patients who have progressed on a CDK4/6 therapy reflects the mechanistic inadequacy of relying on partial PAM inhibition (e.g., alpelisib or everolimus) and no CDK4/6 inhibition to address this complex disease mechanism.

We believe the complex connection between the PAM and CDK4/6 pathways can potentially enable gedatolisib to adaptively reactivate CDK4/6 signaling that reportedly occurs in CDK4/6 resistant tumors when the PAM pathway is comprehensively blocked. By re-activating CDK4/6 signaling, we believe gedatolisib can restore the therapeutic effect of CDK4/6 inhibition when it is combined with a CDK4/6 inhibitor. The contributory effect of a CDK4/6 inhibitor when combined with gedatolisib would thus largely reflect the interaction between the two therapies that gedatolisib initiates.

Evidence of gedatolisib’s anti-tumor activity in breast cancer cells was provided in a study evaluating the MCF7 xenograft model (ER+/HER2-/PIK3CA mutant), where the combination of gedatolisib with palbociclib and fulvestrant caused 90% tumor regression with no tumor regrowth observed for more than 60 days after the final dose.

Source: Layman SABCS 2021

Clinical Experience with Gedatolisib in Breast Cancer

The favorability of preliminary results from our most recently completed clinical trial, a Phase 1b clinical trial which evaluated 138 patients with HR+/HER2- ABC, led us to focus on our initial clinical development program on advanced breast cancer.

On January 13, 2022, gedatolisib was granted Fast Track designation for the treatment of patients with HR+/HER2- advanced breast cancer after progression on CDK4/6 therapy. Fast Track designation is granted by the FDA for products that are intended for the treatment of serious or life-threatening diseases or conditions and which demonstrate the potential to address an unmet medical need. The designation offers the opportunity for frequent interactions with the FDA to discuss the drug's development plan and to ensure collection of appropriate data needed to support drug approval, as well as eligibility for rolling submission of a New Drug Application.

On July 18, 2022, gedatolisib was granted Breakthrough Therapy Designation for HR+/HER2- advanced breast cancer after progression on CDK4/6 therapy. Breakthrough Therapy designation is granted by the FDA to expedite the development and regulatory review of an investigational medicine that is intended to treat a serious or life-threatening condition. The criteria for Breakthrough Therapy designation require preliminary clinical evidence that demonstrates the drug may have substantial improvement on one or more clinically significant endpoints over available therapies. The benefits of Breakthrough Therapy Designation include more intensive guidance from the FDA on an efficient development program, access to a scientific liaison to help accelerate review time, and potential eligibility for priority review if relevant criteria are met. Celcuity's breakthrough application was supported by data from a Phase 1b clinical trial that assessed the safety, tolerability and clinical activity of gedatolisib in combination with palbociclib and fulvestrant in patients with HR+/HER2- advanced breast cancer whose disease progressed during treatment with a CDK4/6 therapy and an aromatase inhibitor.

Phase 1b HR+/HER2- ABC Clinical Trial Results

A Phase 1b dose-finding trial with an expansion portion for safety and efficacy evaluated gedatolisib when added to either the standard doses of palbociclib plus letrozole or palbociclib plus fulvestrant in patients with HR+/HER2- advanced breast cancer. PI3K mutation status was not used as an eligibility criterion. Patient enrollment for the trial is complete.

A total of 138 patients with HR+/HER2- advanced breast cancer were dosed in the clinical trial. Four patients from this study continue to receive study treatment, as of December 31, 2024, each of whom have received study treatment for more than five years.

- 35 patients were enrolled in two dose escalation arms to evaluate the safety and tolerability and determine the maximum tolerable dose ("MTD") of gedatolisib when used in combination with the standard doses of palbociclib and endocrine therapies. The MTD was determined to be 180 mg administered intravenously once weekly.
- 103 patients were enrolled in one of four expansion arms (A, B, C, D) to determine if the triplet combination of gedatolisib plus palbociclib and letrozole or gedatolisib plus palbociclib and fulvestrant produced a superior objective response (OR), compared to historical control data of the doublet combination (palbociclib plus endocrine therapy). All patients received gedatolisib in combination with standard doses of palbociclib and endocrine therapy (either letrozole or fulvestrant). In Arms A, B, and C, patients received an intravenous dose of 180 mg of gedatolisib once weekly. In Arm D, patients received an intravenous dose of 180 mg of gedatolisib on a four-week cycle of three-weeks-on, one-week-off. Objective response was determined using Response Evaluation Criteria in Solid Tumors v1.0, or RECIST v1.0.
 - **Arm A:** ABC with progression and no prior endocrine-based systemic therapy or a CDK4/6 inhibitor in the metastatic setting. First-line endocrine-based therapy for advanced disease (CDK4/6 treatment naive).
 - **Arm B:** ABC with progression during one or two prior endocrine-based systemic therapies in the advanced setting, with no prior therapy with any CDK inhibitor. Second- or third-line endocrine-based therapy for metastatic disease.
 - **Arm C:** ABC with progression during one or two prior endocrine-based systemic therapies in the advanced setting and following prior therapy with a CDK inhibitor. Second- or third-line endocrine-based therapy for advanced disease.
 - **Arm D:** ABC with progression during one or two prior endocrine-based systemic therapies in the advanced setting and following prior therapy with a CDK inhibitor. Second- or third-line endocrine-based therapy for advanced disease.

- For the 103 patients enrolled in the expansion portion of the Phase 1b clinical trial, the objective response rate (“ORR”) in aggregate among patients with evaluable tumors was 63%.
- Best responses, as measured by RECIST v1.0, are shown in the following chart for Arm A (1st line patients) and Arm D (2nd/3rd line patients who received Phase 3 dosing regimen). The dotted line represents the cutoff for partial response (PR), defined as a 30% reduction from the baseline tumor assessment.

Source: Layman SABCS 2021

- Safety analysis:
 - For all arms in aggregate, all patients experienced at least one Grade 1 or Grade 2 treatment-emergent adverse event. The Grade 3 and 4 treatment-emergent adverse events occurring in at least 20% of patients were neutropenia (63%), stomatitis (27%) and rash (20%). Neutropenia is a known class effect of CDK4/6 inhibitors. Stomatitis was reversible in most patients with a steroidal mouth rinse. All grades of treatment-related adverse events related to hyperglycemia were reported in 22% of patients; Grade 3 or 4 hyperglycemia was reported in 7% of patients. Gedatolisib was discontinued in less than 9% of patients.
 - For the patients in Arm D, who received the Phase 3 dosing schedule, Grade 3 and 4 treatment-emergent adverse events occurring in at least 20% of patients were neutropenia (67%), leukopenia (22%), and stomatitis (22%). All grades of treatment-related adverse events related to hyperglycemia were reported in 26% of patients; Grade 3 or 4 hyperglycemia were reported in 7% of patients. Gedatolisib was discontinued in 4% of patients.
- Best overall response data for each arm is presented in the table below:

Total Expansion Arms (N=103)								
	Arm A		Arm B		Arm C		Arm D	
Prior Therapy	1L		2L+		2L/3L		2L/3L	
n (Full, response evaluable).....	CDKi-naive		CDKi-naive		CDKi-pretreated		CDKi-pretreated	
Study Treatment	31, 27		13, 13		32, 28		27, 27	
Gedatolisib schedule	P + L + G		P + F + G		P + F + G		P + F + G	
ORR ¹ (evaluable).....	weekly		weekly		weekly		3 wks on/1 wk off	
mPFS ² , mos (range).....	85%		77%		36%		63%	
PFS % at 12 mos ²	48.4		12.9		5.1		12.9	
	(16.9, NR)		(7.6, 38.3)		(3.3, 7.5)		(7.4, 16.7)	
	72.1%		54.5%		23.6%		53.2%	
	WT	MT	WT	MT	WT	MT	WT	MT
PIK3CA status	81%	16%	69%	31%	75%	25%	56%	41%
ORR (evaluable).....	81%	100%	78%	75%	25%	63%	60%	73%
PFS at 12 months	74%	60%	50%	67%	22%	29%	49%	60%

(1) ORR represents PR, except in Arm A, which had 1 CR = Complete response. Responses per RECIST 1.1; (2) Includes 2 unconfirmed PR

Abbreviations: 1L= first line, 2L= second line; mos= months; NR = not reached; ORR, objective response rate; PFS, progression free survival

Phase 3 HR+/HER2- ABC Clinical Trial (VIKTORIA-1)

In 2022, we initiated VIKTORIA-1, a Phase 3, open-label, randomized clinical trial to evaluate the efficacy and safety of gedatolisib in combination with fulvestrant with or without palbociclib in adults with HR+/HER2- advanced breast cancer whose disease has progressed after prior CDK4/6 therapy in combination with an aromatase inhibitor. This multi-center, international trial is expected to enroll approximately 701 total subjects at more than 200 clinical sites across North America, Europe, Latin America, and Asia-Pacific. The first patient was dosed in December 2022.

The clinical trial enables separate evaluation of subjects according to their *PIK3CA* status.

- Subjects who meet eligibility criteria and do not have confirmed *PIK3CA* mutations (i.e., WT) are randomly assigned (1:1:1) to receive a regimen of either gedatolisib, palbociclib, and fulvestrant (Arm A), gedatolisib and fulvestrant (Arm B), or fulvestrant (Arm C). During the fourth quarter of 2024, we achieved our enrollment goal of 351 subjects who are *PIK3CA* WT. We expect topline data for this group to be available in Q2 2025.
- Subjects who meet eligibility criteria and have *PIK3CA* mutations (i.e., MT) are randomly assigned (3:3:1) to receive a regimen of either gedatolisib, palbociclib, and fulvestrant (Arm D), alpelisib and fulvestrant (Arm E), or gedatolisib and fulvestrant (Arm F). Enrollment of up to 350 subjects who are *PIK3CA* MT is ongoing. We expect topline data for this group to be available in the fourth quarter of 2025.

The clinical trial primary endpoints are progression free survival (“PFS”), per RECIST 1.1 criteria, as assessed by blinded independent central review (“BICR”). Two primary endpoints will be evaluated in subjects who are *PI3KCA* WT, and one primary endpoint will be evaluated in subjects who are *PI3KCA* MT. In subjects who are *PI3KCA* WT, the PFS of gedatolisib in combination with palbociclib and fulvestrant (Arm A) will be compared to fulvestrant monotherapy (Arm C), and the PFS in gedatolisib in combination with fulvestrant (Arm B) will be compared to fulvestrant monotherapy (Arm C). In subjects who are *PI3KCA* MT, the PFS of gedatolisib in combination with palbociclib and fulvestrant (Arm D) will be compared to alpelisib combined with fulvestrant (Arm E).

All subjects will receive treatment according to the assigned study arm until objective progressive disease, unacceptable toxicity, death, or withdrawal of consent, whichever occurs first. Subjects in Arm C will have the option to receive the treatment regimen provided in Arm A or Arm B upon radiographically confirmed disease progression. Subjects will be followed for adverse events, safety laboratory testing, tumor assessment by RECIST v1.1, quality of life, and overall survival.

Phase 3 HR+/HER2- ABC Clinical Trial (VIKTORIA-2)

During the third quarter of 2024, we initiated site selection and activation activities to support a Phase 3, open-label, randomized clinical trial to evaluate the efficacy and safety of gedatolisib plus a CDK4/6 inhibitor and fulvestrant as first-line treatment for patients with HR+/HER2- advanced breast cancer that is endocrine treatment resistant (VIKTORIA-2). For the CDK4/6 inhibitor, investigators may choose either ribociclib or palbociclib. This multi-center, international trial is expected to enroll approximately 12–36 evaluable subjects in the safety run-in portion of the study to evaluate the safety of gedatolisib when combined with ribociclib and fulvestrant. In the Phase 3 portion of the study, approximately 638 subjects will be randomized and assigned to Cohort 1 (“*PIK3CA* WT”) or Cohort 2 (“*PIK3CA* MT”) based on their *PIK3CA* status. Subjects in each cohort will be randomized on a 1:1 basis to either Arm A (gedatolisib with fulvestrant and ribociclib or palbociclib) or Arm B (fulvestrant and ribociclib or palbociclib). It is expected that approximately 200 clinical sites across North America, Europe, Latin America, and Asia-Pacific will participate. The first patient is expected to be dosed in the second quarter of 2025.

The clinical trial primary endpoints for this study are PFS, per RECIST 1.1 criteria, as assessed by BICR. The statistical analyses of Cohort 1 and 2 are independent of the other. For each cohort, the PFS of gedatolisib in combination with fulvestrant and either palbociclib or ribociclib (Arm A) will be compared to fulvestrant combined with either palbociclib or ribociclib (Arm B).

Prostate Cancer Program

In the United States, prostate cancer is the second leading cause of cancer death in men. Current estimates predict that one in eight men will be diagnosed with prostate cancer in his lifetime. The National Cancer Institute estimates that in 2024 there will be over 299,000 new cases of prostate cancer in the United States and approximately 35,250 deaths from the disease. Although approximately 69% of patients are diagnosed with localized prostate cancer, about 8% of patients present with metastatic disease with a 5-year survival rate of 37%. Androgen deprivation therapy (“ADT”) via medical or surgical castration has been the mainstay treatment for metastatic prostate cancer. However, prostate cancer cells develop resistance to ADT and progress to castration resistance, leading to poor prognosis and a median overall survival of about three to five years.

Men with mCRPC have a poor prognosis and a predicted survival rate of fewer than two years from the initial time of progression. Treatment options for prostate cancer depend on many different factors, including the stage of the cancer. Castration-resistant prostate cancer is defined by disease progression despite ADT and is often indicated by rising levels of PSA. Current standard of care for men with castration-resistant prostate cancer provides that patients should initially receive a combination of ADT and either abiraterone, which works by decreasing androgen levels, or enzalutamide, which works by blocking androgen binding to androgen receptors (“AR”). If the disease progresses despite these second-generation hormonal therapies, chemotherapy is considered the next treatment option. Treatment with chemotherapy is generally postponed for as long as possible due to the potential for severe side effects including neuropathies, nausea, diarrhea, decreased mental capacity and increased risk of infections.

Preclinical studies have demonstrated a potential association between the PAM pathway and AR signaling in prostate cancer cells developing resistance to ADT. In these studies, the AR and PAM pathways were shown to cross-regulate each other. This is similar to the relationship demonstrated in breast cancer with the estrogen receptor pathway and the PAM pathway. Additionally, 70% - 100% of mCRPC tumors have PAM related pathway alterations.

Several clinical studies have shown promising results by inhibiting the PAM pathway in combination with an AR inhibitor. In separate Phase 2 and Phase 3 trials, the AKT inhibitor, ipatasertib, showed improvement in radiographic PFS (“rPFS”) in patients with mCRPC and tumors with phosphatase and tensin homolog (“PTEN”) loss when ipatasertib was combined with the AR inhibitor, abiraterone, versus abiraterone alone. In a Phase 2 trial, the pan-PI3K inhibitor, samotolisib, reported median rPFS of 10.2 when combined with enzalutamide versus 5.5 months for enzalutamide alone.

Evidence of gedatolisib’s in vivo activity in prostate cancer was provided in a study evaluating the 22RV-1, PC3, and C4-2 prostate cancer xenograft models. As seen in the figures below, gedatolisib induced greater than 80% tumor growth inhibition, regardless of the xenograft model’s sensitivity to the AR inhibitor, enzalutamide and the cell lines’ PTEN or AR status. In addition, gedatolisib combined with enzalutamide induced significantly greater tumor growth inhibition than enzalutamide alone in the enzalutamide sensitive model (“C4-2”).

Phase 1b/2 mCRPC Clinical Trial (CELC-G-201)

We received approval from the FDA in mid-2023 to proceed with the clinical development of gedatolisib in combination with Nubeqa® (darolutamide), an approved androgen receptor inhibitor, for the treatment of patients with mCRPC. We have since initiated a Phase 1b/2 clinical trial (CELC-G-201) that will enroll up to 54 participants with mCRPC who progressed after treatment with an AR inhibitor. We dosed our first patient in this trial in February 2024.

In the Phase 1b portion of the clinical trial, we enrolled 36 participants randomly assigned to receive 600 mg darolutamide combined with either 120 mg gedatolisib in Arm 1 or 180 mg gedatolisib in Arm 2. An additional 12 participants will then be enrolled in the Phase 2 portion of the study at the recommended phase 2 dose (“RP2D”) level to enable evaluation of 30 participants treated with the RP2D of gedatolisib.

The primary objectives of the Phase 1b portion of the trial include assessment of the safety and tolerability of gedatolisib in combination with darolutamide and determination of the recommended Phase 2 dose of gedatolisib. The primary objective of the Phase 2 portion of the trial is to assess the rPFS at six months of patients who received the RP2D.

Pfizer License Agreement

In April 2021, we entered into a license agreement (“the Gedatolisib License Agreement”) with Pfizer pursuant to which we acquired exclusive (including as to Pfizer) worldwide sublicensable rights to research, develop, manufacture, and commercialize gedatolisib for the treatment, diagnosis and prevention of all diseases. Pursuant to the Gedatolisib License Agreement, we are obligated to use commercially reasonable efforts to develop and seek regulatory approval for at least one product in the U.S. and if regulatory approval is obtained, to commercialize such product in the U.S. and at least one international major market.

We paid Pfizer a \$5.0 million upfront fee upon execution of the Gedatolisib License Agreement and issued to Pfizer \$5.0 million of our common stock. We are also required to make milestone payments to Pfizer upon achievement of certain development and commercial milestone events, up to an aggregate of \$335.0 million. We will pay Pfizer tiered royalties on sales of gedatolisib at percentages ranging from the low to mid-teens, that may be subject to deductions for expiration of valid claims, amounts due under third-party licenses and generic competition. Unless earlier terminated, the Gedatolisib License Agreement will expire upon the expiration of all royalty obligations. The royalty period will expire on a country-by-country basis upon the later of (a) 12 years following the date of First Commercial Sale of such Product in such country, (b) the expiration of all regulatory or data exclusivity in such country for such Product, or (c) the date upon which the manufacture, use, sale, offer for sale or importation of such Product in such country would no longer infringe, but for the license granted herein, a Valid Claim of a Licensed Patent Right. Capitalized terms in this paragraph have the meanings set forth in the Gedatolisib License Agreement.

We have the right to terminate the Gedatolisib License Agreement for convenience upon 90 days’ prior written notice. Pfizer may not terminate the agreement for convenience. Either we or Pfizer may terminate the Gedatolisib License Agreement if the other party is in material breach and such breach is not cured within the specified cure period. In addition, either we or Pfizer may terminate the Gedatolisib License Agreement in the event of specified insolvency events involving the other party.

Manufacturing

We rely on third parties to manufacture gedatolisib. We have entered into agreements with contract manufacturing organizations (“CMOs”), to produce the drug substance gedatolisib, and produce, package and distribute finished drug product for clinical supply. We require all of our CMOs to conduct manufacturing activities in compliance with applicable laws including current good manufacturing practice (“cGMP”), requirements. We anticipate that these CMOs will have the capacity to support both clinical supply and commercial-scale production, and we have started negotiating agreements at this time to cover commercial production. We may also elect to enter into agreements with other CMOs to manufacture supplies of drug substance and finished drug product.

Sales and Marketing

If any of our product candidates are approved, we intend to market and commercialize them in the U.S. and select international markets, either alone or in partnership with others. Cancer patients are primarily treated by medical, surgical, or radiation oncologists, and we believe they can be reached with a targeted sales force.

Competition for Gedatolisib

The pharmaceutical industry is characterized by rapid evolution of technologies and intense competition. While we believe that our product candidates, technology, knowledge, experience, intellectual property, and scientific resources provide us with competitive advantages, we face competition from major pharmaceutical and biotechnology companies, academic institutions, governmental agencies and public and private research institutions, among others. Any product candidates that we successfully develop and commercialize will compete with approved treatment options, including off-label therapies, and new therapies that

may become available in the future. Key considerations that would impact our ability to effectively compete with other therapies include the efficacy, safety, method of administration, cost, level of promotional activity and intellectual property protection of our products. Many of the companies against which we may compete have significantly greater financial resources and expertise than we do in research and development, manufacturing, preclinical testing, conducting clinical trials, obtaining regulatory approvals and marketing approved products.

There are several PI3K, AKT, and mTOR inhibitors approved by the FDA, including PIQRAY and AFINITOR from Novartis AG, TRUQAP from AstraZeneca plc, Itovebi from F. Hoffmann-La Roche Ltd, COPIKTRA from Verastem, Inc., and ZYDELIG from Gilead Sciences, Inc. We are aware that other companies are, or may be, developing products for this indication, including BridgeBio Pharma Inc., Eli Lilly and Company, Kazia Therapeutics Limited, Relay Therapeutics, Inc., Revolution Medicines Inc., and Takeda Pharmaceutical Company Limited. There may be additional companies with programs suitable for addressing these patient populations that could be competitive with our efforts but that have not yet disclosed specific clinical development plans. Smaller or early-stage companies, including oncology-focused therapeutics companies, may also prove to be significant competitors, particularly through collaborative arrangements with large and established companies. These companies may also compete with us in recruiting and retaining qualified scientific and management personnel, establishing clinical trial sites, enrolling patients in clinical trials and acquiring technologies complementary to, or necessary for, our programs. The availability of reimbursement from government and private payors will also significantly impact the pricing and competitiveness of our products. Our competitors may obtain FDA or other regulatory approvals for their products more rapidly than we may obtain approvals for our product candidates, which could result in our competitors establishing a strong market position before we are able to commercialize our product candidates.

CELsignia

We founded our company to develop our proprietary CELsignia diagnostic platform and relied on the capability of this technology to identify our lead drug candidate, gedatolisib. CELsignia characterizes the specific activity of various oncogenic signaling pathways, including the PAM pathway, in living patient tumor cells. As previously disclosed, we made the decision to focus on the clinical development of gedatolisib and minimize our activities to support development of CELsignia.

Intellectual Property

Our success depends in part on our ability to obtain and maintain proprietary protection for our product candidates, manufacturing and process discoveries and other know-how, to operate without infringing the proprietary rights of others, and to prevent others from infringing our proprietary rights. We plan to protect our proprietary positions using a variety of methods, which include protecting current U.S. and foreign patents related to proprietary technology, inventions and improvements and prosecuting additional U.S. and foreign patents that we determine are important to the development and implementation of our business. For example, we, our licensors, or our collaborators currently have, or are pursuing, patents covering the composition of matter for our drug product candidates and we plan to generally pursue patent protection covering methods-of-use for one or more clinical programs. We also rely on trade secrets, trademarks, know-how, continuing technological innovation and potential in-licensing opportunities to develop and maintain our proprietary position.

Gedatolisib Patents

We entered into the Gedatolisib License Agreement with Pfizer in April 2021, pursuant to which we acquired exclusive worldwide rights under Pfizer patents and know-how to develop, manufacture and commercialize gedatolisib. We have exclusive licenses under the Gedatolisib License Agreement to patent rights in the U.S. and numerous foreign jurisdictions relating to gedatolisib. The patent rights in-licensed under the Gedatolisib License Agreement include 12 granted patents in the U.S. and more than 290 patents granted in foreign jurisdictions including Australia, Canada, China, France, Germany, Spain, United Kingdom and Japan. A U.S. patent covering gedatolisib as a composition of matter has a statutory expiration date in December 2029 (including 209 days of Patent Term Adjustment) and a U.S. patent that covers the cyclodextrin formulation of gedatolisib that is currently in clinical development expires in January 2041 (including 578 days of Patent Term Adjustment), not including any patent term extension that may be awarded by the FDA, and relevant foreign counterparts.

CELsignia Patents

With respect to CELsignia, we have six issued U.S. patents and 30 issued international patents covering our diagnostic approach using cell signaling analysis in living patient cells to guide treatment of patients with targeted therapies and cell sample preparation methods. The earliest expiration date of the patents is 2033. In addition, we have developed significant proprietary know-how and trade secrets for the various cell sample preparation and cellular analysis methods we have developed.

Product Trademark

We have applied for trademark protection for our preferred commercial product tradename. While we expect the trademark to issue, the FDA ultimately will determine whether we can use the trademark with our product.

Trade Secrets

In addition to patents, we rely on trade secrets and know-how to develop and maintain our competitive position. We typically rely on trade secrets to protect aspects of our business that are not amenable to, or that we do not consider appropriate for, patent protection. We protect trade secrets and know-how by establishing confidentiality agreements and invention assignment agreements with our employees, consultants, scientific advisors, contractors and partners. These agreements generally provide that all confidential information developed or made known during the course of an individual or entity's relationship with us must be kept confidential during and after the relationship. These agreements also generally provide that all inventions resulting from work performed for us or relating to our business and conceived or completed during the period of employment or assignment, as applicable, shall be our exclusive property. In addition, we take other appropriate precautions, such as physical and technological security measures, to guard against misappropriation of our proprietary information by third parties.

Government Regulation

Approval of Gedatolisib and Other Drug Products

Government authorities in the U.S. at the federal, state and local level and in other countries and jurisdictions, including the EU, extensively regulate, among other things, the research, development, testing, manufacture, quality control, approval, labeling, packaging, storage, record-keeping, promotion, advertising, distribution, post-approval monitoring and reporting, marketing and export and import of drug products, such as gedatolisib and other drugs that may be used in combination with or compete with gedatolisib. Generally, before a new drug can be marketed, considerable data demonstrating its quality, safety and efficacy must be obtained, organized into a format specific for each regulatory authority and submitted for review and approved by the regulatory authority. The regulatory approval process is time-consuming and requires significant capital expenditures.

U.S. Approval Process

Overview of FDA Approval Process

In the U.S., pharmaceutical products are subject to extensive regulation by the FDA. The Federal Food, Drug, and Cosmetic Act (the "FDC Act"), and other federal and state statutes and regulations, govern, among other things, the research, development, testing, manufacture, storage, recordkeeping, approval, labeling, promotion and marketing, distribution, post-approval monitoring and reporting, sampling, and import and export of pharmaceutical products. Failure to comply with applicable U.S. requirements may subject a company to a variety of administrative or judicial sanctions, such as FDA refusal to approve pending New Drug Applications ("NDAs"), warning or untitled letters, product recalls, product seizures, total or partial suspension of production or distribution, injunctions, fines, civil penalties and criminal prosecution. The process required by the FDA before a drug may be marketed in the United States generally involves the following:

- completion of nonclinical laboratory tests, animal studies and formulation studies according to good laboratory practices (GLP), or other applicable regulations;
- submission to the FDA of an application for an investigational new drug application ("IND"), which must become effective before human clinical trials may begin;

- performance of adequate and well-controlled human clinical trials according to the FDA’s regulations commonly referred to as current good clinical practices (“GCPs”), to establish the safety and efficacy of the proposed drug for its intended use;
- submission to the FDA of an NDA for a new drug;
- satisfactory completion of an FDA inspection of the manufacturing facility or facilities where the drug is produced to assess compliance with the FDA cGMPs, to assure that the facilities, methods and controls are adequate to preserve the drug’s identity, strength, quality and purity;
- potential FDA inspection of the nonclinical and clinical trial sites that generated the data in support of the NDA; and
- FDA review of the NDA.

The lengthy process of seeking required approvals and the continuing need for compliance with applicable statutes and regulations require the expenditure of substantial resources and approvals are inherently uncertain.

Preclinical and Clinical Stages

Preclinical tests include laboratory evaluation of product chemistry, formulation and toxicity, as well as animal trials to assess the characteristics and potential safety and efficacy of the product. The conduct of the preclinical tests must comply with federal regulations and requirements, including good laboratory practices. The results of preclinical testing are submitted to the FDA as part of an IND along with other information, including information about product chemistry, manufacturing and controls and a proposed clinical trial protocol. Long term preclinical tests, such as animal tests of reproductive toxicity and carcinogenicity, may continue after the IND is submitted. A 30-day waiting period after the submission of each IND is required prior to the commencement of clinical testing in humans. If the FDA has neither commented on nor questioned the IND within this 30-day period, the clinical trial proposed in the IND may begin.

The clinical stage of development involves the administration of the investigational product to healthy volunteers or disease-affected patients under the supervision of qualified investigators, generally physicians not employed by, or under control of, the trial sponsor, in accordance with GCPs. Clinical trials are conducted under protocols detailing, among other things, the objectives of the clinical trial, dosing procedures, subject selection and exclusion criteria and the parameters to be used to monitor subject safety and assess efficacy. Each protocol, and any subsequent amendments to the protocol, must be submitted to the FDA as part of an IND. Furthermore, each clinical trial must be reviewed and approved by an Institutional Review Board (“IRB”), for each institution at which the clinical trial will be conducted to ensure that the risks to individuals participating in the clinical trials are minimized and are reasonable in relation to anticipated benefits. The IRB also monitors the clinical trial until completed. Human clinical trials are typically conducted in three sequential phases, which may overlap or be combined:

- Phase 1 clinical trials generally involve a small number of healthy volunteers or disease-affected patients who are initially exposed to a single dose and then multiple doses of the product candidate. The primary purpose of these clinical trials is to assess the metabolism, pharmacologic action, side effect tolerability and safety of the drug.
- Phase 2 clinical trials involve studies in disease-affected patients to determine the dose required to produce the desired benefits. At the same time, safety and further pharmacokinetic and pharmacodynamic information is collected, possible adverse effects and safety risks are identified, and a preliminary evaluation of efficacy is conducted.
- Phase 3 clinical trials generally involve a larger number of patients at multiple sites and are designed to provide the data necessary to demonstrate the effectiveness of the product for its intended use, its safety in use and to establish the overall benefit/risk relationship of the product and provide an adequate basis for product approval. These trials may include comparisons with placebo and/or other comparator treatments. The duration of treatment is often extended to mimic the actual use of a product during marketing.

A registrational trial is a clinical trial that adequately meets regulatory agency requirements for the evaluation of a drug candidate’s efficacy and safety such that it can be used to justify the approval of the drug. Generally, registrational trials are Phase 3 trials but may be Phase 2 trials if the trial design provides a reliable assessment of clinical benefit, particularly in situations where there is an unmet medical need.

Post-approval trials, sometimes referred to as Phase 4 clinical trials, may be conducted after initial marketing approval. These trials are used to gain additional experience from the treatment of patients in the intended therapeutic indication, particularly for long-term safety follow up.

Progress reports detailing the results of the clinical trials must be submitted at least annually to the FDA and more frequently if serious adverse events occur. The FDA or the sponsor may suspend or terminate a clinical trial at any time, or the FDA may impose other sanctions on various grounds, including a finding that the research patients are being exposed to an unacceptable health risk. Similarly, an IRB can suspend or terminate approval of a clinical trial at its institution if the clinical trial is not being conducted in accordance with the requirements of the IRB or if the drug has been associated with unexpected serious harm to patients.

There also are requirements governing the reporting of ongoing clinical trials and completed clinical trial results to public registries. Information about most clinical trials must be submitted within specific timeframes for publication on the www.clinicaltrials.gov website. Information related to the product, patient population, phase of investigation, trial sites and investigators and other aspects of the clinical trial is made public as part of the registration of the clinical trial. Sponsors are also obligated to discuss the results of their clinical trials after completion. Disclosure of the results of these trials can be delayed in some cases for up to two years after the date of completion of the trial. Competitors may use this publicly available information to gain knowledge regarding the progress of development programs.

FDA Review and Approval Process

After completion of the required clinical testing, an NDA is prepared and submitted to the FDA. Prior to granting approval of the NDA, which is required before marketing of the product may begin in the U.S., the FDA must determine whether to accept the submission and, thereafter, conduct an in-depth review. This process may take a year or more. The NDA must include the results of all preclinical, clinical and other testing and a compilation of data relating to the product's pharmacology, chemistry, manufacture and controls. The cost of preparing and submitting an NDA is substantial. The submission of an NDA to FDA, absent an applicable fee waiver, is subject to a substantial application user fee, currently \$4,310,002 for Fiscal Year 2025, and the manufacturer and/or sponsor under an approved NDA are also subject to annual program fees for eligible products, which are currently \$403,889 for Fiscal Year 2025.

The FDA may also refer applications for novel drug products, or drug products that present difficult questions of safety or efficacy, to an advisory committee—typically a panel that includes clinicians and other experts—for review, evaluation and a recommendation as to whether the application should be approved. The FDA is not bound by the recommendation of an advisory committee, but it generally follows such recommendations. Before approving an NDA, the FDA will typically inspect one or more clinical sites to assure compliance with GCP. Additionally, the FDA will inspect the facility or the facilities at which the drug is manufactured. The FDA will not approve the product unless compliance with cGMP is satisfactory and the NDA contains data that provide substantial evidence that the drug is safe and effective in the indication studied.

After the FDA evaluates the NDA and the manufacturing facilities, it issues either an approval letter or a complete response letter. A complete response letter generally outlines the deficiencies in the submission and may require substantial additional testing, or information, in order for the FDA to reconsider the application. If, or when, those deficiencies have been addressed to the FDA's satisfaction in a resubmission of the NDA, the FDA will issue an approval letter. The FDA has committed to reviewing such resubmissions in two to six months depending on the type of information included.

An approval letter authorizes commercial marketing of the drug with specific prescribing information for specific indications. As a condition of NDA approval, the FDA may require a risk evaluation and mitigation strategy ("REMS"), to help ensure that the benefits of the drug outweigh the potential risks. REMS can include medication guides, communication plans for healthcare professionals and elements to assure safe use ("ETASU"). ETASU can include, but are not limited to, special training or certification for prescribing or dispensing, dispensing only under certain circumstances, special monitoring and the use of patient registries. The requirement for a REMS can materially affect the potential market and profitability of the drug. Moreover, product approval may require substantial post-approval testing and surveillance to monitor the drug's safety or efficacy. Once granted, product approvals may be withdrawn if compliance with regulatory standards is not maintained or problems are identified following initial marketing.

Changes to some of the conditions established in an approved application, including changes in indications, labeling or manufacturing processes or facilities, require submission and FDA approval of a new NDA or NDA supplement before the change can be implemented. An NDA supplement for a new indication typically requires clinical data similar to that in the original application, and the FDA uses the same procedures and actions in reviewing NDA supplements as it does in reviewing NDAs.

U.S. Marketing Exclusivity

Upon NDA approval of a new chemical entity (“NCE”), which is a drug (i.e., gedatolisib) that contains no active moiety that has been approved by the FDA in any other NDA, that drug receives five years of marketing exclusivity during which the FDA cannot accept any Abbreviated New Drug Application (“ANDA”), seeking approval of a generic version of that drug. Certain changes to a drug, such as the addition of a new indication to the package insert, are associated with a three-year period of exclusivity during which the FDA cannot approve an ANDA for a generic drug that includes the change. An ANDA may be submitted one year before NCE exclusivity expires if a Paragraph IV certification is filed. If there is no listed patent in the Orange Book, there is no Paragraph IV certification, and, thus, no ANDA may be filed before the expiration of the exclusivity period.

Patent Term Extension

After NDA approval, owners of relevant drug patents may apply for up to a five-year patent extension for one patent. The allowable patent term extension is calculated as half of the drug’s testing phase—the time between IND and NDA submission—and all of the review phase—the time between NDA submission and approval up to a maximum of five years. The time can be shortened if the FDA determines that the applicant did not pursue approval with due diligence. The total patent term after the extension may not exceed 14 years from approval.

For patents that might expire during the application phase, the patent owner may request an interim patent extension. An interim patent extension increases the patent term by one year and may be renewed up to four times. For each interim patent extension granted, the post-approval patent extension is reduced by one year. The director of the U.S. Patent and Trademark Office must determine that approval of the drug covered by the patent for which a patent extension is being sought is likely. Interim patent extensions are not available for a drug for which an NDA has not been submitted.

Fast Track Designation

The FDA is required to facilitate the development, and expedite the review, of drugs that are intended for the treatment of a serious or life-threatening disease or condition for which there is no effective treatment, and which demonstrate the potential to address unmet medical needs for the condition. Under the Fast Track program, the sponsor of a new drug candidate may request that the FDA designate the drug candidate for a specific indication as a Fast Track drug concurrent with, or after, the filing of the IND for the drug candidate. The FDA must determine if the drug candidate qualifies for Fast Track Designation within 60 days of receipt of the sponsor’s request.

Under the Fast Track program and the FDA’s accelerated approval regulations, the FDA may approve a drug for a serious or life-threatening illness that provides meaningful therapeutic benefit to patients over existing treatments based upon a surrogate endpoint that is reasonably likely to predict clinical benefit, or on a clinical endpoint that can be measured earlier than irreversible morbidity or mortality, that is reasonably likely to predict an effect on irreversible morbidity or mortality or other clinical benefit, taking into account the severity, rarity or prevalence of the condition and the availability or lack of alternative treatments.

In clinical trials, a surrogate endpoint is a measurement of laboratory or clinical signs of a disease or condition that substitutes for a direct measurement of how a patient feels, functions or survives. Surrogate endpoints can often be measured more easily or more rapidly than clinical endpoints. A drug candidate approved on this basis is subject to rigorous post-marketing compliance requirements, including the completion of Phase 4 or post-approval clinical trials to confirm the effect on the clinical endpoint. Failure to conduct required post-approval studies, or confirm a clinical benefit during post-marketing studies, will allow the FDA to withdraw the drug from the market on an expedited basis. All promotional materials for product candidates approved under accelerated regulations are subject to prior review by the FDA.

In addition to other benefits such as the ability to use surrogate endpoints and engage in more frequent interactions with the FDA, the FDA may initiate review of sections of a Fast Track drug’s NDA before the application is complete. This rolling review is available if the applicant provides, and the FDA approves, a schedule for the submission of the remaining information and the applicant pays applicable user fees. However, the FDA’s time period goal for reviewing an application does not begin until the last section of the NDA is submitted. Additionally, the Fast Track Designation may be withdrawn by the FDA if the FDA believes that the designation is no longer supported by data emerging in the clinical trial process.

Breakthrough Therapy Designation

Breakthrough Therapy Designation by the FDA provides more extensive development consultation opportunities with FDA senior staff, allows for the rolling review of the drug's application for approval and indicates that the product could be eligible for priority review if supported by clinical data at the time of application submission for drugs that are intended to treat a serious or life-threatening disease or condition where preliminary clinical evidence indicates that the drug may demonstrate substantial improvement over existing therapies on one or more clinically significant endpoints. Under the breakthrough therapy program, the sponsor of a new drug candidate may request that the FDA designate the drug candidate for a specific indication as a breakthrough therapy concurrent with, or after, the filing of the IND for the drug candidate. The FDA must determine if the drug candidate qualifies for Breakthrough Therapy Designation within 60 days of receipt of the sponsor's request.

Disclosure of Clinical Trial Information

Sponsors of clinical trials of FDA regulated products, including drugs, are required to register and disclose certain clinical trial information. Information related to the product, patient population, phase of investigation, trial sites and investigators and other aspects of the clinical trial is then made public as part of the registration. Sponsors are also obligated to discuss the results of their clinical trials after completion. Disclosure of the results of these trials can be delayed in certain circumstances for up to two years after the date of completion of the trial. Competitors may use this publicly available information to gain knowledge regarding the progress of development programs.

European Union Approval Process

Overview

In the EU, our product candidates may also be subject to extensive regulatory requirements. As in the U.S., medicinal products can be marketed only if a marketing authorization from the competent regulatory agencies has been obtained. Similar to the U.S., the various phases of preclinical and clinical research in the EU are subject to significant regulatory controls.

The Clinical Trials Regulation (EU) No 536/2014 came into effect in 2022. The Clinical Trials Regulation is directly applicable in all the EU Member States, and repealed the Clinical Trials Directive 2001/20/EC. The Clinical Trials Regulation aims to simplify and streamline the approval of clinical trials in the EU. The main characteristics of the regulation include: a streamlined application procedure via a single-entry point, the Clinical Trial Information System ("CTIS"); a single set of documents to be prepared and submitted for the application as well as simplified reporting procedures for clinical trial sponsors; and a harmonized procedure for the assessment of applications for clinical trials, which is divided in two parts. Part I is assessed by the competent authorities of all EU Member States in which an application for authorization of a clinical trial has been submitted (Member States concerned). Part II is assessed separately by each Member State concerned. Strict deadlines have been established for the assessment of clinical trial applications. The role of the relevant ethics committees in the assessment procedure will continue to be governed by the national law of the concerned EU Member State. However, overall related timelines will be defined by the Clinical Trials Regulation.

To obtain a marketing authorization of a drug in the EU, we may submit Marketing Authorisation Applications ("MAA"), either under the so-called centralized or national authorization procedures.

Centralized Procedure

The centralized procedure provides for the grant of a single marketing authorization following a favorable opinion by the European Medicines Agency ("EMA"), that is valid in all EU Member States, as well as Iceland, Liechtenstein and Norway. The centralized procedure is compulsory for medicines produced by specified biotechnological processes, products designated as orphan medicinal products, advanced therapy medicines (such as gene-therapy, somatic cell-therapy or tissue-engineered medicines) and products with a new active substance indicated for the treatment of specified diseases, such as HIV/AIDS, cancer, diabetes, neurodegenerative disorders or autoimmune diseases and other immune dysfunctions and viral diseases. The centralized procedure is optional for products that represent a significant therapeutic, scientific or technical innovation, or whose authorization would be in the interest of public health. Under the centralized procedure, the maximum timeframe for the evaluation of an MAA by the EMA is 210 days, excluding clock stops, when additional written or oral information is to be provided by the applicant in response to questions asked by the Committee of Medicinal Products for Human Use (the "CHMP"). Accelerated assessment might be granted by the CHMP in exceptional cases when a medicinal product is expected to be of a major public health interest, particularly from the point of view of therapeutic innovation. The timeframe for the evaluation of an MAA under the accelerated assessment procedure is 150 days, excluding stop-clocks.

National Authorization Procedures

There are also two other possible routes to authorize medicinal products in several EU countries, which are available for investigational medicinal products that fall outside the scope of the centralized procedure:

- Decentralized procedure. Using the decentralized procedure, an applicant may apply for simultaneous authorization in more than one EU country of medicinal products that have not yet been authorized in any EU country and that do not fall within the mandatory scope of the centralized procedure.
- Mutual recognition procedure. In the mutual recognition procedure, a medicine is first authorized in one EU Member State, in accordance with the national procedures of that country. Following this, further marketing authorizations can be sought from other EU countries in a procedure whereby the countries concerned agree to recognize the validity of the original, national marketing authorization.

Under the above-described procedures, before granting an MAA, the EMA or the competent authorities of the Member States of the European Economic Area (“EEA”), assess the risk-benefit balance of the product on the basis of scientific criteria concerning its quality, safety and efficacy.

EU Regulatory Exclusivity

In the EU, new products authorized for marketing (i.e., reference products) qualify for eight years of data exclusivity and an additional two years of market exclusivity upon marketing authorization. The data exclusivity period prevents generic applicants from relying on the preclinical and clinical trial data contained in the dossier of the reference product when applying for a generic marketing authorization in the EU during a period of eight years from the date on which the reference product was first authorized in the EU. The market exclusivity period prevents a successful generic applicant from commercializing its product in the EU until ten years have elapsed from the initial authorization of the reference product in the EU. The ten-year market exclusivity period can be extended to a maximum of eleven years if, during the first eight years of those ten years, the marketing authorization holder obtains an authorization for one or more new therapeutic indications which, during the scientific evaluation prior to their authorization, are held to bring a significant clinical benefit in comparison with existing therapies.

Drug Approval-Related Regulations – Rest of the World

For other countries outside of the EU and the U.S., such as countries in Eastern Europe, Latin America or Asia, the requirements governing the conduct of clinical trials, product licensing, pricing and reimbursement vary from jurisdiction to jurisdiction. Additionally, the clinical trials must be conducted in accordance with cGCP requirements and the applicable regulatory requirements and the ethical principles that have their origin in the Declaration of Helsinki. If we fail to comply with applicable foreign regulatory requirements, we may be subject to, among other things, fines, suspension or withdrawal of regulatory approvals, product recalls, seizure of products, operating restrictions and criminal prosecution.

Regulations of CELsignia Tests

CLIA and CMS for Diagnostic

Our CELsignia tests are laboratory developed tests (“LDTs”), and subject to regulation under the Clinical Laboratory Improvement Amendments (“CLIA”). The Centers for Medicare & Medicaid Services (“CMS”), an agency within the U.S. Department of Health and Human Services (“HHS”), regulates all clinical laboratory testing (except research) performed on humans in the United States through CLIA. All clinical laboratories that perform clinical lab services on human specimens for the purpose of providing information on the diagnosis, prevention or treatment of disease must receive CLIA certification. We received our CLIA certification in 2016. We also had our laboratory certified by the College of American Pathologists (“CAP”), in 2016, an organization recognized by CMS as a third-party reviewer of clinical laboratories. Several states, including, among others, New York and California, require licensure of out-of-state labs that receive specimens from the state and compliance with the state’s individual laboratory regulations.

FDA for Diagnostics

FDA approval or clearance is not currently required for CELsignia tests offered as a stand-alone LDT test. If we are partnered with a drug company to launch a CELsignia test as a companion diagnostic for a new drug indication, we would be required to obtain premarket approval (PMA), in conjunction with the pharmaceutical company seeking a new drug approval for the matching therapy. Historically, the FDA has exercised enforcement discretion with respect to tests performed solely in

a central laboratory, like the CELsignia tests or LDTs. The FDA has not required laboratories that furnish only LDTs to comply with the agency's requirements for medical devices (e.g., establishment registration, device listing, quality systems regulations, premarket clearance or premarket approval, and post-market controls). However, the FDA has discussed potential regulation of LDTs and may regulate LDTs in the future.

Pricing and Reimbursement of our Product Candidates

Significant uncertainty exists as to the coverage and reimbursement status of any products we sell or may sell. Sales of our drug products will depend, in part, on the extent to which the costs of the products will be covered by third-party payors, including government health programs such as VA, Tricare, Medicare and Medicaid, commercial health insurers, and other managed care organizations.

In order to obtain coverage and reimbursement for our drug product, we will conduct extensive pharmacoeconomic studies in order to demonstrate the medical necessity and cost-effectiveness of our product. Whether or not we conduct such studies, our products may not be considered medically necessary or cost-effective. A third-party payor's decision to provide coverage for a product does not imply that an adequate reimbursement rate will be approved. Further, one payor's determination to provide coverage for a product does not assure that other payors will also provide coverage, and adequate reimbursement, for the product. Third-party reimbursement may not be sufficient to enable us to maintain price levels high enough to realize an appropriate return on our investment in product development.

The containment of healthcare costs has become a priority of federal, state and foreign governments, and the prices of drugs have been a focus in this effort. Third-party payors are increasingly challenging the prices charged for medical products, examining the medical necessity and reviewing the cost-effectiveness of drug products and questioning product safety and efficacy. If these third-party payors do not consider our product to be cost-effective compared to other available products, they may not cover our product or, if they do, the level of reimbursement may not be sufficient to allow us to realize a profit on the use of our product. The U.S. government, state legislatures and foreign governments have shown significant interest in implementing cost-containment programs to limit the growth of government-paid healthcare costs, including price controls and restrictions on reimbursement. Adoption of such controls and measures, and tightening of restrictive policies in jurisdictions with existing controls and measures, could limit payments for our product and could adversely affect our net revenue and results.

In August 2022, the Inflation Reduction Act ("IRA") was signed into law, which, among other things, requires manufacturers of certain drugs to engage in price negotiations with Medicare (beginning in 2026), imposes rebates under Medicare Part B and Medicare Part D to penalize price increases that outpace inflation, and replaces the Part D coverage gap discount program with a new discounting program. We will evaluate the impact of the IRA on our business, operations and financial condition and results as the full effect of the IRA on our business strategy and the pharmaceutical industry remains uncertain. In addition, changes to the Medicaid program or the federal 340B drug pricing program, which imposes ceilings on prices that drug manufacturers can charge for medications sold to certain health care facilities, could have a material impact on our business following commercialization. We expect to see continued focus by Congress and the Trump Administration on regulating pricing, which could result in legislative and regulatory changes designed to control costs.

Pricing and reimbursement schemes vary widely from country to country. Some countries may require the completion of additional studies that compare the cost-effectiveness of a particular drug product to currently available drugs. The downward pressure on healthcare costs in general, particularly prescription drugs, has become intense. As a result, increasingly high barriers are being erected to the entry of new drug products. In addition, in some countries, cross-border imports from low-priced markets exert competitive pressure that may reduce pricing within a country. Any country that has price controls or reimbursement limitations for drug products may not allow favorable reimbursement and pricing arrangements for our product.

Coverage policies, third-party reimbursement rates and pricing regulation may change at any time.

Other Healthcare Laws

Manufacturing, sales, promotion and other activities following product approval are also subject to regulation by numerous regulatory authorities in the U.S. in addition to the FDA, including CMS, the HHS Office of Inspector General and HHS Office for Civil Rights, other divisions of the HHS, the Department of Justice and state regulatory bodies including Boards of Pharmacy and Price Transparency Boards.

Healthcare systems, physicians, pharmacists, and third-party payors will play a primary role in the recommendation and prescription of any products for which we obtain marketing approval. Our current and future arrangements with third-party payors, healthcare systems, physicians and pharmacists may expose us to broadly applicable fraud and abuse and other healthcare laws and regulations that may constrain the business or financial arrangements and relationships through which we market, sell and distribute our drug product. In the U.S., these laws include, without limitation, state and federal anti-kickback, false claims, physician payment transparency, and patient data privacy and security laws and regulations, including but not limited to those described below.

The U.S. federal Anti-Kickback Statute (“AKS”) prohibits, among other things, any person or entity from knowingly and willfully offering, paying, soliciting, receiving or providing any remuneration, directly or indirectly, overtly or covertly, to induce or in return for purchasing, leasing, ordering or arranging for or recommending the purchase, lease or order of any good, facility, item or service reimbursable, in whole or in part, under Medicare, Medicaid or other federal healthcare programs. The term “remuneration” has been broadly interpreted to include anything of value. The AKS has been interpreted to apply to arrangements between pharmaceutical and medical device manufacturers on the one hand and prescribers, purchasers, formulary managers and beneficiaries on the other hand. A person does not need to have actual knowledge of the statute or specific intent to violate it in order to have committed a violation of the AKS.

Moreover, a claim including items or services resulting from a violation of the AKS constitutes a false or fraudulent claim for purposes of the federal civil False Claims Act, which imposes civil penalties, including through civil whistleblower or qui tam actions, against individuals or entities (including manufacturers) for, among other things, knowingly presenting, or causing to be presented to federal programs (including Medicare and Medicaid) claims for items or services that are false or fraudulent, claims for items or services not provided as claimed, or claims for medically unnecessary items or services. This could apply even if we are not submitting claims directly to payors as would be the case with drug products.

In addition, under a federal law directed at “self-referral,” commonly known as the “Stark Law,” there are prohibitions, with certain exceptions, on referrals for certain designated health services, including laboratory services, that are covered by the Medicare and Medicaid programs by physicians who personally, or through a family member, have an investment or ownership interest in, or a compensation arrangement with, an entity performing the tests. The prohibition also extends to payment for any testing referred in violation of the Stark Law. Bills submitted in violation of the Stark Law may not be paid by Medicare or Medicaid, and there may be significant penalties for violations. Many states have comparable laws that are not limited to Medicare and Medicaid referrals.

These regulations present compliance and litigation risks for our business and others in our industry. We incur compliance-related expenses and expect to incur additional expenses if and when our products are commercialized. We may be subject to penalties or limitations on government program participation if we are found to have violated these regulations.

The federal Health Insurance Portability and Accountability Act of 1996 (“HIPAA”) created additional federal criminal statutes that prohibit, among other actions, knowingly and willfully executing, or attempting to execute, a scheme to defraud or to obtain, by means of false or fraudulent pretenses, representations or promises, any money or property owned by, or under the control or custody of, any healthcare benefit program, including private third-party payors, knowingly and willfully embezzling or stealing from a healthcare benefit program, willfully obstructing a criminal investigation of a healthcare offense and knowingly and willfully falsifying, concealing or covering up a material fact or making any materially false, fictitious or fraudulent statement in connection with the delivery of or payment for healthcare benefits, items or services. Similar to the AKS, a person or entity does not need to have actual knowledge of the statute or specific intent to violate it in order to have committed a violation.

In addition, there has been a recent trend of increased federal and state regulation of payments made to physicians and certain other healthcare providers, and their ownership and investment interests. The Affordable Care Act (the “ACA”), imposed, among other things, annual reporting requirements through the Physician Payments Sunshine Act for covered manufacturers for certain payments and “transfers of value” to these providers. Failure to submit timely, accurately and completely the required information for all payments, transfers of value and ownership or investment interests may result in civil monetary penalties.

We may also be subject to data privacy and security regulation by both the federal government and the states in which we conduct our business. HIPAA, as amended by the Health Information Technology for Economic and Clinical Health Act (“HITECH”), and their respective implementing regulations, impose specified requirements relating to the privacy, security and transmission of individually identifiable health information held by covered entities and their business associates. Among other things, HITECH made HIPAA’s security standards directly applicable to “business associates,” defined as independent

contractors or agents of covered entities that create, receive, maintain or transmit protected health information in connection with providing a service for or on behalf of a covered entity, although it is unclear that we would be considered a “business associate” in the normal course of our business. HITECH also increased the civil and criminal penalties that may be imposed against covered entities, business associates and possibly other persons, and gave state attorneys general new authority to file civil actions for damages or injunctions in federal courts to enforce the federal HIPAA laws and seek attorney’s fees and costs associated with pursuing federal civil actions. In addition, state laws govern the privacy and security of health information in certain circumstances, many of which differ from each other in significant ways and may not have the same requirements, thus complicating compliance efforts. See “European Data Collection” below for a discussion of data privacy and security enactments of the EU.

At the state level, the California Consumer Privacy Act (the “CCPA”), as amended and expanded by the California Privacy Rights Act (the “CPRA”), impose data protection obligations on certain businesses. While we believe that certain limited exceptions under the CPRA for clinical trial data and other health data would apply to us, these regulations exemplify the vulnerability of our business to the evolving regulatory environment related to personal data and protected health information, which causes us to incur compliance costs. Privacy legislation similar to the CCPA has been adopted in other U.S. states, including Colorado, Connecticut, Kentucky, Maryland, Minnesota, Montana, New Jersey, New Hampshire, Nevada, Oregon, Rhode Island, Tennessee, Texas, Utah, and Virginia.

States and foreign jurisdictions also have fraud and abuse laws and regulations, such as state anti-kickback and false claims laws, which may apply to sales or marketing arrangements and claims involving healthcare items or services. Some state laws also require pharmaceutical companies to comply with the pharmaceutical industry’s voluntary compliance guidelines and the relevant federal government compliance guidance, and require drug manufacturers to report information related to payments and other transfers of value to physicians and other healthcare providers, marketing expenditures or drug pricing.

In order to sell products, we will need to comply with state laws, including those that require the registration of manufacturers and wholesale distributors of drug and biological products. Several states have enacted legislation requiring pharmaceutical and biotechnology companies to establish marketing compliance programs, file periodic reports with the state, make periodic public disclosures on sales, marketing, pricing, clinical trials and other activities, and/or register their sales representatives, as well as to prohibit pharmacies and other healthcare entities from providing certain physician prescribing data to pharmaceutical and biotechnology companies for use in sales and marketing, and to prohibit certain other sales and marketing practices. If and when we commercialize our products, all of our activities are potentially subject to federal and state consumer protection and unfair competition laws.

The scope and enforcement of each of these laws is uncertain and subject to rapid change in the current environment, especially in light of the lack of applicable precedent and regulations. If our operations are found to be in violation of any of these laws or any other governmental regulations that may apply to us, we may be subject to significant civil, criminal and administrative penalties, damages, fines, disgorgement, contractual damages, reputational harm, diminished profits and future earnings, imprisonment, exclusion of drugs from government funded healthcare programs, such as Medicare and Medicaid, and the curtailment or restructuring of our business strategy operations, as well as additional reporting obligations and oversight if we become subject to a corporate integrity agreement or other agreement to resolve allegations of non-compliance with these laws, any of which could adversely affect our ability to operate our business and our financial results. If any of the physicians or other healthcare providers or entities with whom we expect to do business is found to be not in compliance with applicable laws, they may be subject to significant criminal, civil or administrative sanctions, including exclusions from government funded healthcare programs. Ensuring business arrangements comply with applicable healthcare laws, as well as responding to possible investigations by government authorities, can be time- and resource consuming and can divert a company’s attention from the business.

European Data Collection

We are subject to the General Data Protection Regulation (the “GDPR”), and associated Data Protection Legislation, which govern the collection and use of personal data as it pertains to the EU/EEA/UK. This legislation imposes several requirements, including, but not limited to: determining the lawful bases of the processing of personal data, providing transparency information to the affected individuals, managing contractual relationships with relevant vendors and other third parties, notifying the appointment of a data protection officer to the relevant EU/EEA/UK competent national data protection authorities, and ensuring the security and confidentiality of personal data. The GDPR also imposes strict rules on the transfer of personal data outside of the EU/EEA/UK to the U.S. Failure to comply with the requirements of the GDPR and the related national data protection laws of the EU/EEA Member States and the UK may result in administrative penalties and other enforcement actions. We have incurred, and expect to continue to incur, compliance expenses in connection with the GDPR. If we are found to be in violation of the GDPR, our product development timeline may be affected, which would potentially affect our ability to generate revenue and might impact our competitive position.

Current and Future Legislation

In the U.S. and other jurisdictions, continued healthcare reform measures may result in more rigorous coverage criteria and additional downward pressure on the price that we, or any collaborators, may receive. Individual states in the U.S. have also been increasingly passing legislation and implementing regulations designed to control pharmaceutical and biological product pricing, including price or patient reimbursement constraints, discounts, restrictions on certain product access and marketing cost disclosure and transparency measures, and, in some cases, designed to encourage importation from other countries and bulk purchasing. Regulations may also prevent or delay marketing approval of our product candidates, restrict or regulate post-approval activities and affect our ability to profitably sell any product candidates.

Other Regulatory Requirements

Our operations use small amounts of hazardous materials in research and development and generate regulated medical waste in the normal course of performing our CELsignia tests. This subjects us to a variety of federal, state and local environmental and safety laws and regulations. Some of the regulations under the current regulatory structure provide for strict liability, holding a party potentially liable without regard to fault or negligence. We could be held liable for damages and fines as a result of our, or others', business operations should contamination of the environment or individual exposure to hazardous substances occur. We cannot predict how changes in laws or development of new regulations will affect our business operations or the cost of compliance.

Impact of Public Health Matters on our Business

As witnessed during the COVID-19 pandemic, future outbreaks or variants of the virus or other public health disruptions may cause additional delays in our clinical trial work or impact our ability to access health care practitioners who might utilize our product.

Corporate History

We were organized as a Minnesota limited liability company in 2011 and commenced operations in 2012. On September 15, 2017, we converted from a Minnesota limited liability company into a Delaware corporation and changed our name from Celcuity LLC to Celcuity Inc.

Employees and Labor Relations

As of December 31, 2024, we had 87 full-time employees, most of which were engaged in research and development activities, though hiring employees in preparation for anticipated commercial launch has begun. None of our employees are currently represented by a labor union or covered by a collective bargaining agreement and we believe that our relations with our employees are good. During 2024, our voluntary turnover rate was approximately 5%.

ITEM 1A. Risk Factors

Risk factors that could cause actual results to differ from our expectations and that could negatively impact our financial condition and results of operations are discussed below and elsewhere in this Annual Report. Additional risks and uncertainties not presently known to us or that are currently not believed to be significant to our business may also affect our actual results and could harm our business, financial condition and results of operations. If any of the risks or uncertainties described below or any additional risks and uncertainties actually occur, our business, results of operations and financial condition could be materially and adversely affected.

Risks Relating to Our Business

We have a limited operating history and we may never generate revenue or profit.

We are a clinical-stage biotechnology company that commenced activities in January 2012. We have a limited operating history, and our business plan has not been tested. Since inception, we have had no revenue and have incurred significant operating losses. We have financed our operations primarily through equity and debt offerings. To generate revenue and become and remain profitable, we need to successfully complete our existing clinical trials, cultivate partnerships with pharmaceutical companies, and develop and commercialize gedatolisib pursuant to our license agreement with Pfizer. We must also build operational and financial infrastructure to support commercial operations, train and manage employees, and market and sell our anticipated drug product.

We may never succeed in any of these activities and, even if we do, we may never generate revenue that is sufficient to achieve profitability. We expect to continue to incur significant expenses and operating losses for the foreseeable future, and the net losses we incur may fluctuate significantly from quarter to quarter. Our failure to become and remain profitable would decrease our value and could impair our ability to raise capital, maintain or expand our research and development efforts, expand our business, or continue our operations.

Our inability to raise additional capital on acceptable terms in the future may limit our ability to develop and commercialize our drug candidate, gedatolisib.

We will require additional capital to finance operating expenses and capital expenditures over the next several years if we launch gedatolisib and expand our infrastructure, commercial operations and research and development activities. If we are not able to secure additional funding when needed, we may have to delay, reduce the scope of or eliminate one or more research and development programs or selling and marketing initiatives. In addition, we may have to work with a partner on one or more of our products or market development programs, which could lower the economic value of those programs to our company.

Future financing activities could dilute the percentage ownership of our stockholders and could cause our stock price to fall or could result in operating or other restrictions.

We may seek to raise additional capital through equity offerings, debt financings, collaborations or licensing arrangements. Additional funding may not be available to us on acceptable terms, or at all. If we raise funds by issuing equity securities, it will result in dilution to current stockholders. Any equity securities issued may also provide for rights, preferences or privileges senior to those of holders of our existing securities. The incurrence of additional indebtedness or the issuance of certain equity securities could result in increased fixed payment obligations and could also include restrictive covenants, such as limitations on our ability to incur additional debt or issue additional equity, limitations on our ability to acquire or license intellectual property rights, and other operating restrictions that could adversely affect our ability to conduct our business. In the event that we enter into collaborations or licensing arrangements to raise capital, we may be required to accept unfavorable terms.

We are dependent on our ability to attract and retain key personnel.

Our operations are materially dependent upon the services of our officers and key employees, including Brian F. Sullivan, our Chief Executive Officer, and Dr. Lance G. Laing, our Chief Science Officer. Successful implementation of our business plan will also require the services of other consultants and additional personnel. We cannot assure you that we will be able to attract and retain such persons as employees, independent contractors, consultants or otherwise. If we are not able to attract individuals with the skills required for our business, or if we lose the services of either Mr. Sullivan or Dr. Laing, we may be unable to successfully implement our business plan.

Product liability claims may damage our reputation and, if insurance proves inadequate, these claims may harm our business.

We may be exposed to the risk of product liability claims that is inherent in the biopharmaceutical industry. A product liability claim may damage our reputation by raising questions about our product's safety and efficacy and could limit our ability to sell one or more products by preventing or interfering with commercialization of our drug candidate. In addition, product liability insurance for the biopharmaceutical industry is generally expensive to the extent it is available at all. There can be no assurance that we will be able to obtain or maintain such insurance on acceptable terms for any product we bring to market. Further, our product liability insurance coverage may not provide coverage or may be insufficient to reimburse us for any or all expenses or losses we may suffer. A successful claim against us with respect to uninsured liabilities or in excess of insurance coverage could have a material adverse effect on our business, financial condition and results of operations.

We expect to expand our development and regulatory capabilities and potentially implement sales, marketing and distribution capabilities, and as a result, we may encounter difficulties in managing our growth, which could disrupt our operations.

We expect to experience significant growth in the number of our employees and the scope of our operations, particularly in the areas of drug development, regulatory affairs and, if our product candidate receives marketing approval, sales, marketing and distribution. To manage our anticipated future growth, we must continue to implement and improve our managerial, operational and financial systems, expand our facilities and continue to recruit and train additional qualified personnel. Due to our limited financial and human resources, we may not be able to effectively manage the expansion of our operations or recruit and train additional qualified personnel. The expansion of our operations may lead to significant costs and may divert our management and business development resources. Any inability to manage growth could delay the execution of our business plans or disrupt our operations.

Risks Related to Our Product Strategy

Our near-term revenue prospects depend on the success of our initial drug product, gedatolisib. If we are unable to successfully complete clinical development of, obtain regulatory approval for or commercialize gedatolisib, or if we experience delays in doing so, our business will be materially harmed.

To date, we have not yet completed any registrational clinical trials or the development of our initial drug candidate, gedatolisib. Our future success and ability to generate revenue, which we do not expect until 2026 or later, if ever, is dependent on our ability to successfully develop, obtain regulatory approval for and commercialize gedatolisib for one or more intended uses. We may not have the financial resources to continue development of, or to modify existing or enter into new collaborations for, our current or future product candidates if we experience any issues that delay or prevent regulatory approval of, or our ability to commercialize, gedatolisib, including:

- our inability to demonstrate to the satisfaction of the FDA or comparable foreign regulatory authorities that gedatolisib is safe and effective;
- insufficiency of our financial and other resources to complete the necessary preclinical studies and clinical trials;
- negative or inconclusive results from our clinical trials or the clinical trials of others for drug products similar to ours, leading to a decision or requirement to conduct additional preclinical studies or clinical trials or abandon a program;
- product-related adverse events experienced by subjects in our clinical trials or by individuals using drugs or therapeutic biologics similar to gedatolisib;
- delays in submitting applications, delays or failure in obtaining the necessary approvals from regulators to commence a clinical trial, or a suspension or termination of a clinical trial once commenced;
- conditions imposed by the FDA or comparable foreign regulatory authorities regarding the scope or design of our clinical trials;
- poor effectiveness of gedatolisib or companion therapeutics during clinical trials;
- better than expected performance of control arms, such as placebo groups, which could lead to negative or inconclusive results from our clinical trials;
- delays in enrolling subjects in clinical trials;
- high drop-out rates of subjects from clinical trials;
- inadequate supply or quality of drug products or other materials necessary for the conduct of our clinical trials;
- greater than anticipated clinical trial or manufacturing costs;
- unfavorable FDA or comparable regulatory authority inspection and review of a clinical trial site;
- failure of our third-party contractors or investigators to comply with regulatory requirements or otherwise meet their contractual obligations in a timely manner, or at all;
- delays and changes in regulatory requirements, policy and guidelines, including the imposition of additional regulatory oversight around clinical testing generally or with respect to our therapies in particular; or
- varying interpretations of data by the FDA and comparable foreign regulatory authorities.

We were not involved in the early development of gedatolisib; therefore, we are dependent on third parties having accurately generated, collected, interpreted and reported data from certain preclinical and clinical trials of gedatolisib.

We had no involvement with or control over the initial preclinical and clinical development of gedatolisib. We are dependent on third parties having conducted their research and development in accordance with the applicable protocols and legal, regulatory and scientific standards; having accurately reported the results of all preclinical studies and clinical trials conducted with respect to such drug product; and having correctly collected and interpreted the data from these trials. If these activities were not compliant, accurate or correct, the clinical development, regulatory approval or commercialization of our drug product will be delayed and may be adversely affected.

We have not yet successfully completed any registrational clinical trials, and we may be unable to do so for any drug candidates we may develop.

We will need to successfully complete registrational clinical trials in order to obtain the approval of the FDA or comparable foreign regulatory authorities to market our drug product. Carrying out clinical trials, including later-stage registrational clinical trials, is a complicated process. As an organization, we have not previously completed any registrational clinical trials. In order to do so, we are building and expanding our clinical development and regulatory capabilities, and there is risk that we may be

unable to recruit and train qualified personnel. We also expect to continue to rely on third parties to conduct our clinical trials. If these third parties do not successfully carry out their contractual duties, meet expected deadlines or comply with regulatory requirements, we may not be able to obtain regulatory approval of or commercialize any product candidates. Consequently, we may be unable to successfully and efficiently execute and complete necessary clinical trials in a way that leads to submission and approval of our drug product. We may require more time and incur greater costs than our competitors and may not succeed in obtaining regulatory approval of any drug products that we develop. Failure to commence or complete, or delays in, our planned clinical trials, could prevent us from or delay us in commercializing our drug products.

The successful development of our products is highly uncertain.

Our business depends on the successful development of biopharmaceuticals, which is highly uncertain and is dependent on numerous factors, many of which are beyond our control. Product candidates that appear promising in the early phases of development may fail to reach the market for several reasons including, among other things, that clinical trial results may show the product candidates to be less effective than expected or to have unacceptable side effects or toxicities; we may fail to receive the necessary regulatory approvals or there may be a delay in receiving such approvals; or the proprietary rights of others and their competing products and technologies may prevent our product candidates from being commercialized.

The length of time necessary to complete clinical trials and to submit an application for marketing approval for a final decision by a regulatory authority varies significantly from one drug product to the next and from one country to the next and may be difficult to predict. We will incur significant research and development expenses before knowing whether our products are commercially viable, and may abandon development of a specific trial, or a product candidate, at any time for a variety of reasons. If we expend resources on products that are ultimately not commercially viable, our timing for becoming profitable and our ability to invest in other products in our pipeline would be adversely affected.

In addition, if gedatolisib receives marketing approval for the intended uses that we are pursuing, we will continue to be subject to significant post-approval regulatory obligations. Compliance with these requirements is costly, and any failure to comply or other issues with our drug products post-approval could adversely affect our business, financial condition and results of operations. In addition, there is always the risk that we, a regulatory authority or a third party might identify previously unknown problems with a product post-approval, such as adverse events of unanticipated severity or frequency.

If we encounter difficulties enrolling patients in any of our clinical trials, our clinical development activities could be delayed or otherwise adversely affected.

The timely completion of clinical trials in accordance with their protocols depends, among other things, on our ability to enroll a sufficient number of patients who remain in the trial until its conclusion. We may experience difficulties in patient enrollment in our clinical trials for a variety of reasons, including:

- the patient eligibility and exclusion criteria defined in the protocol;
- the size of the patient population required for analysis of the clinical trial's primary endpoints;
- the proximity of patients to clinical trial sites;
- the design of the clinical trial;
- our ability to recruit clinical trial investigators with the appropriate competencies and experience, and the ability of these investigators to identify and enroll suitable patients;
- perception of the safety profile of our drug products;
- our ability to obtain and maintain patient consents; and
- the risk that patients enrolled in clinical trials will drop out of the trials before completion.

Delays in patient enrollment may result in increased costs or may affect the timing or outcome of our clinical trials, which could prevent completion of these trials and adversely affect our ability to advance the development of our product candidates.

Interim, topline and preliminary data from our clinical studies that we announce or publish from time to time may change as more data becomes available and are subject to audit and verification procedures that could result in material changes in the final data.

From time to time, we may publicly disclose preliminary or topline data from our clinical studies, which is based on a preliminary analysis of then-available data, and the results and related findings and conclusions are subject to change following a more comprehensive review of the data related to the particular study. We also make assumptions, estimations, calculations and conclusions as part of our analyses of data, and we may not have received or had the opportunity to fully and carefully evaluate all data. As a result, the topline results that we report may differ from future results of the same studies, or different conclusions or considerations may qualify such results once additional data have been received and fully evaluated. Topline data also remain subject to audit and verification procedures that may result in the final data being materially different from the preliminary data we previously published. As a result, topline data should be viewed with caution until the final data are available. From time to time, we may also disclose interim data from our clinical studies. Interim data from clinical studies that we may complete are subject to the risk that one or more of the clinical outcomes may materially change as more patient data becomes available. Adverse differences between preliminary or interim data and final data could significantly harm our reputation and marketing efforts.

Further, others, including healthcare providers or payors, may not accept or agree with our assumptions, estimates, calculations, conclusions or analyses or may interpret or weigh the importance of data differently, which could impact the value of the particular program, the approvability or commercialization of the particular product candidate or product and our company in general. In addition, the information we choose to publicly disclose regarding a particular study is based on what is typically extensive information, and you or others may not agree with what we determine is the material or otherwise appropriate information to include in our disclosure, and any information we determine not to disclose may ultimately be deemed significant with respect to future decisions, conclusions, views, activities or otherwise regarding our business. If the topline or interim data that we report differ from actual results, or if others, including healthcare providers or payors, disagree with the conclusions reached, our ability to commercialize our product candidate may be harmed, which could harm our business, operating results, prospects or financial condition.

Clinical development involves a lengthy and expensive process, with an uncertain outcome. We may incur additional costs or experience delays in completing, or ultimately be unable to complete, the development and commercialization of our product candidates.

To obtain the requisite regulatory approvals to commercialize any drug products, we must demonstrate through extensive preclinical studies and clinical trials that such drug product is safe and effective in humans. Clinical testing is expensive and can take many years to complete, and its outcome is inherently uncertain. We may be unable to establish clinical endpoints that applicable regulatory authorities would consider clinically meaningful, and a clinical trial can fail at any stage of testing.

Differences in trial design between early-stage clinical trials and later-stage clinical trials, which involve a greater number of patients and take years to complete, make it difficult to extrapolate the results of earlier clinical trials to later clinical trials. Moreover, clinical data are often susceptible to varying interpretations and analyses, and many companies that have believed their product candidates performed satisfactorily in clinical trials have nonetheless failed to obtain marketing approval of their products. Additionally, we are conducting and plan to conduct some open-label clinical trials, where both the patient and investigator know whether the patient is receiving the investigational product candidate or either an existing approved drug or placebo. Most typically, open-label clinical trials test only the investigational product candidate and sometimes may do so at different dose levels. Open-label clinical trials are subject to various limitations that may exaggerate any therapeutic effect as patients in those trials are aware when they are receiving treatment. Open-label clinical trials may be subject to a “patient bias” where patients perceive their symptoms to have improved merely due to their awareness of receiving an experimental treatment. In addition, open-label clinical trials may be subject to an “investigator bias” where those assessing and reviewing the outcomes of the clinical trials are aware of which patients have received treatment and may interpret the information of the treated group more favorably given this knowledge. Where a randomized, placebo-controlled clinical trial is designed to allow enrolled subjects to cross-over to the treatment arm, there may be a risk of inadvertent unblinding of subjects prior to cross-over, which may limit the clinical meaningfulness of those data and may require the conduct of additional clinical trials. As such, the results from an open-label clinical trial may not be predictive of future clinical trial results with any of our product candidates for which we include an open-label clinical trial when studied in a controlled environment with a placebo or active control.

Successful completion of clinical trials is a prerequisite to submitting a new drug application, or NDA, to the FDA and similar marketing applications to comparable foreign regulatory authorities for each drug product and, consequently, the ultimate approval and commercial marketing of any drug products. We may experience delays in initiating or completing clinical trials, including if it takes longer than expected to activate the targeted number of clinical sites, if the enrollment of patients is slower than anticipated or negatively affected by staffing shortages at clinical sites, or by other unanticipated factors, or if the FDA or other regulatory authorities require us to pause one or more of our clinical trials due to unexpected safety issues. We also may experience numerous unforeseen events during, or as a result of, any future clinical trials that we could conduct that could delay or prevent our ability to receive marketing approval or commercialize our current product candidates or any future product candidates.

Our costs will increase if we experience delays in clinical testing or marketing approvals. We do not know whether our clinical trials will begin or continue as planned, will need to be reassigned or will be completed on schedule, or at all. Significant clinical trial delays also could shorten any periods during which we may have the exclusive right to commercialize our product candidates and may allow our competitors to bring products to market before we do, potentially impairing our ability to successfully commercialize our product candidates and harming our business and results of operations. Any delays in our clinical development programs may harm our business, financial condition and results of operations significantly.

We face significant competition, and our operating results will suffer if we fail to compete effectively.

Our industry is characterized by intense competition and rapid innovation. Our competitors may be able to develop other compounds or drugs that are able to achieve similar or better results than our lead product candidate, gedatolisib. Our potential competitors include major multinational pharmaceutical companies, established biotechnology companies, specialty pharmaceutical and diagnostic companies, and universities and other research institutions. Many of our competitors have substantially greater financial, technical and other resources, such as larger research and development staff and experienced marketing and manufacturing organizations and well-established sales forces.

Smaller or early-stage companies may also prove to be significant competitors, particularly as they develop novel approaches to treating disease indications that gedatolisib is also focused on treating. Established pharmaceutical companies may also invest heavily to accelerate discovery and development of novel therapeutics or to in-license novel therapeutics that could make the product candidates that we develop obsolete. Mergers and acquisitions in the biotechnology and pharmaceutical industries may result in even more resources being concentrated in our competitors.

Competition may increase further as a result of advances in the commercial applicability of technologies and greater availability of capital for investment in these industries. Our competitors, either alone or with collaboration partners, may succeed in developing, acquiring or licensing on an exclusive basis products that are more effective, safer, more easily commercialized or less costly than our product candidates or may develop proprietary technologies or secure patent protection that we may need for the development of our technologies and products. We believe the key competitive factors that will affect the development and commercial success of our product candidates are efficacy, safety, tolerability, reliability, convenience of use, price, and reimbursement.

Even if we obtain regulatory approval of drug products, the availability and price of our competitors' products could limit the demand and the price we are able to charge for our product candidates. We may not be able to implement our business plan if the acceptance of our product candidates is inhibited by price competition or the reluctance of physicians to switch from existing methods of treatment to our product candidates, or if physicians switch to other new drug or biologic products or choose to reserve our product candidates for use in limited circumstances.

If our information technology systems or data, or those of third parties upon which we rely, are or were compromised, we could face clinical trial delays; regulatory investigations or actions; litigation; fines and penalties; disruptions of our business operations; reputational harm; and other adverse consequences.

Cyberattacks, malicious internet-based activity, online and offline fraud, and other similar activities threaten the confidentiality, integrity, and availability of our sensitive information and information technology systems, and those of the third parties upon which we rely. We rely on contract research organizations, contract manufacturing organizations, distributors, supply chain resources, and other third-party service providers and technologies to operate critical business systems to process sensitive information in a variety of contexts, including, without limitation, on-site systems and cloud-based data centers, systems handling human resources, financial reporting and controls, customer relationship management, regulatory compliance, and other infrastructure operations. We also communicate sensitive data, including patient data, electronically, and through relationships with multiple third-party vendors and their subcontractors. These applications and

data encompass a wide variety of sensitive information, including research and development information, patient data, commercial information, and business and financial information. Our ability to monitor these third parties' security practices is limited, and these third parties may not have adequate security measures in place. If we or any of our third-party service providers experience a security incident or other interruption, we could experience adverse consequences. We cannot guarantee that third parties and infrastructure in our supply chain or our third-party partners' supply chains have not been compromised or that they do not contain exploitable defects or bugs that could result in a breach of or disruption to our information technology systems or the third-party information technology systems that support us and our services.

Cybersecurity threats are becoming increasingly difficult to detect, and come from a variety of sources, including without limitation, nation-state actors and activists that create disruption for geopolitical reasons and in conjunction with military conflicts and defense activities. This risk is heightened during times of war and other major conflicts, including the war between Russia and Ukraine, the conflict between Israel and Hamas and the risk of a larger regional conflict. In addition, we and the third parties upon which we rely face an evolving cybersecurity threat landscape, which includes social-engineering attacks (including through deep fakes, which may be increasingly more difficult to identify as fake, and phishing attacks), malicious code (such as viruses and worms), malware (including as a result of advanced persistent threat intrusions), denial-of-service attacks, credential stuffing, credential harvesting, personnel misconduct or error, ransomware attacks, supply-chain attacks, software bugs, server malfunctions, attacks enhanced or facilitated by artificial intelligence ("AI"), software or hardware failures, loss of data or other information technology assets, adware, telecommunications failures, natural disasters, terrorism, and other similar threats.

The majority of our employees and contractors work remotely. Remote work involves risks to our information technology systems and data, as individuals utilize network connections, computers and devices outside our premises or network, including working at home, while in transit and in public locations.

Ransomware attacks also continue to increase in prevalence and severity and can lead to significant interruptions in our operations, ability to provide our services, loss of data and income, reputational harm, and diversion of funds. Extortion payments may alleviate the negative impact of a ransomware attack, but we may be unwilling or unable to make such payments due to, for example, applicable laws or regulations prohibiting such payments.

While we take steps designed to identify, prevent, assess and mitigate vulnerabilities in our information systems and to mitigate related third-party risks, there can be no assurance that we will be able to detect and remediate all such vulnerabilities, including on a timely basis. The threats and techniques used to exploit vulnerabilities change frequently and are often sophisticated in nature. Therefore, we (or third parties on whom we rely) may be unable to detect a vulnerability until after a security incident has occurred. Further, we or third parties on which we rely may face downtime as a result of adopting new information technology systems that are designed to enhance compliance or reduce vulnerabilities.

A security incident or other interruption could result in unauthorized, unlawful, or accidental acquisition, modification, destruction, loss, alteration, encryption, disclosure of, or access to our sensitive information or our information technology systems, or those of the third parties upon whom we rely. This could disrupt our clinical trials, damage our reputation, and negatively affect our ability to conduct our business in the ordinary course, including our ability to collect, process, and prepare company financial information, provide information and educational materials through our website, and manage the administrative aspects of our business.

We may expend significant resources or modify our business activities (including our clinical trial activities) to try to protect against security incidents. Additionally, certain data privacy and security obligations may require us to implement and maintain certain measures to protect our information technology systems and sensitive information and to notify relevant stakeholders, including affected individuals, regulatory authorities and our stockholders, of certain security incidents. The disclosure decisions are complex, may take time to determine, and may be subject to change as an investigation progresses. Providing disclosure may be costly, and the failure to comply with such requirements could also lead to adverse consequences. If we (or a third party upon whom we rely) experience a security incident or are perceived to have experienced a security incident, we may face government enforcement actions (for example, investigations, fines, penalties, audits, and inspections); additional reporting requirements and/or oversight; restrictions on processing sensitive information (including personal information); litigation (including class claims) and mass arbitration; indemnification obligations; negative publicity; reputational harm; monetary fund diversions; interruptions in our operations (including availability of data); financial loss; and other similar harms. Accordingly, security incidents and attendant consequences may damage our financial position and negatively impact our ability to grow and operate our business.

Further, if the information technology systems of the third parties upon which we rely become subject to security incidents, we may have insufficient recourse against such third parties, and we may have to expend significant resources to mitigate the impact of such an event, and to develop and implement protections to prevent future events of this nature from occurring. There can be no assurance that limitations of liability in our third-party contracts are sufficient to protect us from liabilities, damages, or claims related to our data privacy and security obligations. We cannot be sure that our insurance coverage will be adequate or sufficient to protect us from or to mitigate liabilities arising out of our data privacy and security practices. Additionally, we cannot be sure that such coverage will continue to be available on commercially reasonable terms or at all, or that such coverage will pay future claims.

In addition to experiencing a security incident, third parties may gather, collect, or infer sensitive information about us from public sources, data brokers, or other means that reveals competitively sensitive details about our organization and could be used to undermine our competitive advantage or market position. Additionally, our sensitive information could be leaked, disclosed, or revealed as a result of or in connection with our employees', personnel's, or vendors' use of generative AI technologies.

Public health matters may materially and adversely impact our business, including ongoing clinical trials.

The outbreak of COVID-19 and government measures taken in response demonstrated that public health matters have a significant impact on the global economy, with healthcare systems particularly affected. Future outbreaks or variants of COVID-19, or the emergence of other pandemics or public health disruptions, could materially and adversely impact our clinical trials, business, financial condition and results of operations. Potential disruptions include but are not limited to:

- delays or difficulties in enrolling patients in clinical trials and obtaining the results of completed clinical trials;
- increased rates of patients withdrawing from clinical trials following enrollment as a result of quarantine or public health concerns;
- diversion of healthcare resources away from the conduct of clinical trials;
- delays in prospective clinical trial collaborations with pharmaceutical companies and sponsors;
- interruption or delays in the operations of the FDA or other regulatory authorities, which may impact review and approval timelines;
- limitations on our ability to recruit and hire key personnel due to our inability to meet with candidates because of travel restrictions; and
- limitations on employee resources that would otherwise be focused on the conduct of clinical trials and research as a result of focus on health matters and loss of productivity from remote work.

Artificial intelligence presents risks and challenges that can impact our business including by posing security risks to our confidential information, proprietary information and personal data.

Issues in the use of artificial intelligence, combined with an uncertain regulatory environment, may result in reputational harm, liability or other adverse consequences to our business operations. As with many technological innovations, artificial intelligence presents risks and challenges that could impact our business. Our vendors may incorporate generative artificial intelligence tools into their offerings without disclosing this use to us, and the providers of these generative artificial intelligence tools may not meet existing or rapidly evolving regulatory or industry standards with respect to privacy and data protection and may inhibit our or our vendors' ability to maintain an adequate level of service and experience. If any of our vendors experiences an actual or perceived breach or privacy or security incident because of the use of generative artificial intelligence, we may lose valuable intellectual property and confidential information and our reputation and the public perception of the effectiveness of our security measures could be harmed. Further, bad actors around the world use increasingly sophisticated methods, including the use of artificial intelligence, to engage in illegal activities involving the theft and misuse of personal information, confidential information and intellectual property. Any of these outcomes could damage our reputation, result in the loss of valuable property and information, and adversely impact our business.

Risks Related to Product Development and Product Regulation

If we are unable to obtain approval from the FDA or comparable foreign regulatory authorities to market our products for their intended use, we will not be able to generate revenue. For a new drug to be approved for marketing, the FDA and other regulatory authorities must determine that the drug is safe and effective. Because all drugs can have adverse effects, the data from our Phase 3 clinical study must demonstrate to the satisfaction of the FDA and other health authorities that the benefits of gedatolisib in combination with palbociclib and fulvestrant, gedatolisib in combination with fulvestrant, or gedatolisib in combination with fulvestrant plus a CDK4/6 inhibitor, outweigh its risks. Failure to demonstrate sufficient magnitude of benefit, even if the benefit is found to be statistically significant, may not support regulatory approval.

The marketability of our products, particularly gedatolisib, depends on securing approval from the FDA and equivalent foreign regulatory bodies. This requires rigorous pre-clinical and clinical studies, including Phase 3 clinical trials for each intended use, that the benefits of the therapy outweigh its risks. Failure to demonstrate sufficient magnitude of benefit, even if the benefit is found to be statistically significant, may not support regulatory approval. Satisfaction of the FDA's regulatory requirements typically takes many years and requires substantial resources for research, development and testing.

If a drug meets its primary efficacy endpoint objective in a Phase 3 clinical trial, and the drug sponsor has additional nonclinical and clinical data required by the FDA or other regulatory authorities, the drug sponsor may submit an NDA seeking marketing approval. Upon submission of an NDA, these health authorities perform a benefit-risk assessment that considers the strength and quality of evidence available and takes remaining uncertainties into account. These considerations include an assessment of the strengths and limitations of clinical trials, including design, and potential implications for assessing drug efficacy, the magnitude of benefit and interpretation of clinical importance, the benefit attributed to the drug when studied in combination with other therapies, and the clinical relevance of the study endpoints. We are currently conducting a Phase 3 clinical trial, VIKTORIA-1, evaluating gedatolisib in combination with fulvestrant with or without palbociclib, in patients with HR+/HER2- advanced breast cancer after progression on CDK4/6 therapy, conducting a Phase 3 clinical trial, VIKTORIA-2, evaluating gedatolisib in combination with a CDK4/6 inhibitor and fulvestrant as first-line treatment for patients with endocrine treatment resistant HR+/HER2- advanced breast cancer, and conducting a Phase 1b/2 clinical trial, CELC-G-201, evaluating gedatolisib in combination with darolutamide in patients with metastatic castration resistant prostate cancer.

We have sought feedback from the FDA and other regulatory authorities on the design of gedatolisib clinical trials, with the goal of addressing these considerations in the clinical trials' design. However, due to the complexity of clinical trials, the uncertainty of outcomes, and the uncertainty of how the FDA and other regulatory authorities may balance benefits and risks in their review of an NDA, it may not be practical or possible to address all benefit-risk assessment considerations in a clinical trial so that sufficient evidence is generated to support a marketing approval, even if the primary endpoint objective is achieved in the Phase 3 stage of the trial. The FDA or other regulatory authorities may require us to redesign or conduct additional unplanned clinical trials before granting any approval and we may not get approval at all. Regulatory approval may also be delayed by changes in government regulation, future legislation or administrative action or changes in FDA policy that occur prior to or during our regulatory review. We cannot predict whether our research and clinical approaches will result in a drug that the FDA considers safe for humans and effective for indicated uses. In light of these uncertainties, the results from clinical trials that we conduct may not support approval of gedatolisib.

If regulatory approvals are delayed or not obtained, especially with respect to gedatolisib, it will negatively impact our ability to commercialize our products and generate revenue and may diminish any competitive advantages that we may otherwise enjoy. If we are required to conduct additional clinical trials or other testing of gedatolisib beyond those that we currently contemplate, if we are unable to successfully complete clinical trials or other testing of gedatolisib, or if the results of these trials or tests are not positive or are only modestly positive or if there are safety concerns, we may:

- be delayed in obtaining marketing approval or not obtain marketing approval at all;
- obtain approval for indications or patient populations that are not as broad as intended or desired;
- obtain approval with labeling that includes significant use or distribution restrictions or safety warnings, including boxed warnings;
- be subject to changes in the way our products are administered;
- be required to perform additional clinical trials to support approval or be subject to additional post-marketing testing requirements;
- have regulatory authorities withdraw, or suspend, their approval of the product or impose restrictions on its distribution in the form of the FDA's Risk Evaluation and Mitigation Strategies program ("REMS") or through modification to an existing REMS;

- be sued; or
- experience damage to our reputation.

Additionally, if the size of the FDA group dedicated to reviewing oncology-related submissions is reduced, further delays of any regulatory submission by Celcuity may be encountered.

Breakthrough Therapy Designation or Fast Track Designation from the FDA may not actually lead to a faster development or regulatory review or approval process.

If a drug is intended for the treatment of a serious or life-threatening condition and the product demonstrates the potential to address unmet medical needs for this condition, the product sponsor may apply for Fast Track Designation. The designation offers the opportunity for frequent interactions with the FDA to discuss the drug's development plan and to ensure collection of appropriate data needed to support drug approval, as well as eligibility for submission of a New Drug Application.

In addition, a drug may receive Breakthrough Therapy Designation if it is intended, alone or in combination with one or more other products, to treat a serious or life-threatening disease or condition and preliminary clinical evidence indicates that the product may demonstrate substantial improvement over existing therapies on one or more clinically significant endpoints, such as substantial treatment effects observed early in clinical development. The benefits of Breakthrough Therapy Designation include more intensive guidance from the FDA on an efficient development program, access to a scientific liaison to help accelerate review time, and potential eligibility for priority review if relevant criteria are met. This designation can expedite the development and regulatory review of an investigational medicine that is intended to treat a serious or life-threatening condition.

Both Fast Track and Breakthrough Therapy Designations are within the discretion of the FDA. While the FDA has granted both designations to our lead drug candidate, gedatolisib, such designations may not result in a faster development process, review or approval compared to products considered for approval under conventional FDA procedures, and neither designation assures ultimate approval by the FDA. In addition, the FDA may later decide that the product no longer meets the qualification conditions and may rescind either or both such designations.

Obtaining and maintaining regulatory approval of our product candidates in one jurisdiction does not mean that we will be successful in obtaining regulatory approval of our product candidates in other jurisdictions.

Obtaining and maintaining regulatory approval of our product candidates in one jurisdiction does not guarantee that we will be able to obtain or maintain regulatory approval in any other jurisdiction, while a failure or delay in obtaining regulatory approval in one jurisdiction may have a negative effect on the regulatory approval process in others. For example, even if the FDA grants marketing approval of a product candidate, a comparable foreign regulatory authority must also approve the manufacturing, marketing and promotion of the product candidate in those countries.

Approval procedures vary among jurisdictions and can involve requirements and administrative review periods different from, and greater than, those in the U.S., including additional preclinical studies or clinical trials, as clinical trials conducted in one jurisdiction may not be accepted by regulatory authorities in other jurisdictions. In many jurisdictions outside the U.S., a product candidate must be approved for reimbursement before it can be approved for sale in that jurisdiction. In some cases, the price that we intend to charge for our products is also subject to approval.

Obtaining foreign regulatory approvals and compliance with foreign regulatory requirements could result in significant delays, difficulties and costs for us and could delay or prevent the introduction of our products in certain countries. If we fail to comply with the regulatory requirements in international markets and/or receive applicable marketing approvals, our target market will be reduced and our ability to realize the full market potential of our product candidates will be harmed.

Even if we receive initial regulatory approvals, we will be subject to ongoing regulatory obligations and continued regulatory review, which may result in significant additional expense, and we may be subject to penalties if we fail to comply with regulatory requirements or experience unanticipated problems with our product candidates.

If any of our product candidates are approved, they will be subject to ongoing regulatory requirements for manufacturing, labeling, packaging, storage, advertising, promotion, sampling, record-keeping, conduct of post-marketing studies and submission of safety, efficacy and other post-marketing information, including both federal and state requirements in the U.S. and requirements of comparable foreign regulatory authorities. In addition, we will be subject to continued compliance with requirements for any clinical trials that we conduct post-approval.

Manufacturers and manufacturers' facilities are required to comply with extensive FDA and comparable foreign regulatory authority requirements. Accordingly, we and others with whom we work must continue to expend time, money and effort in all areas of regulatory compliance, including manufacturing, production and quality control.

Any regulatory approvals that we receive for our product candidates may be subject to limitations on the approved indicated uses for which the product may be marketed or to the conditions of approval, or contain requirements for potentially costly post-marketing testing, including Phase 4 clinical trials and surveillance to monitor the safety and efficacy of the product candidate. Certain endpoint data we hope to include in any approved product labeling also may not make it into such labeling, including exploratory or secondary endpoint data such as patient-reported outcome measures. The FDA may impose consent decrees or withdraw approval if compliance with regulatory requirements and standards is not maintained or if problems occur after the product reaches the market. Later discovery of previously unknown problems with our product candidates, including adverse events of unanticipated severity or frequency, or with our third-party manufacturers or manufacturing processes, or failure to comply with regulatory requirements, may result in revisions to the approved labeling to add new safety information, imposition of post-marketing studies or clinical trials to assess new safety risks or imposition of distribution restrictions or other restrictions under a REMS program. Other potential consequences include, among other things:

- restrictions on the marketing or manufacturing of our products, withdrawal of the product from the market or voluntary or mandatory product recalls;
- fines, warning letters or holds on clinical trials;
- refusal by the FDA to approve pending applications or supplements to approved applications filed by us or suspension or revocation of license approvals;
- product seizure or detention or refusal to permit the import or export of our product candidates; and
- injunctions or the imposition of civil or criminal penalties.

The FDA strictly regulates marketing, labeling, advertising and promotion of products that are placed on the market. Products may be promoted only for the approved indications and in accordance with the provisions of the approved label. If we are slow or unable to adapt to changes in existing requirements or adopt new requirements or policies, or if we are not able to maintain regulatory compliance, we may lose any marketing approval that we may have obtained and we may not achieve or sustain profitability.

Our focus on the clinical development of gedatolisib has led us to minimize the Company's activities to support development of CELsignia, which will significantly delay, or potentially forestall, further advancement of clinical development of CELsignia tests or finding appropriate pharmaceutical company partners.

The success of our CELsignia tests depends on our ability to attract pharmaceutical company partnerships that provide revenue from the sale of CELsignia tests during clinical trials, from milestone payments during clinical trials, from sales of our CELsignia tests as companion diagnostics or stand-alone tests thereafter, and, potentially, from royalties on the incremental drug revenues our tests enable. Our ability to obtain such partnerships and generate such revenue depends in part on the ability of our first CELsignia tests to demonstrate the potential incremental opportunity available for pharmaceutical companies, as well as our ability to establish strategic partnerships or other arrangements with suitable pharmaceutical companies. Since these activities are no longer a priority for the Company, further advancement of the clinical development of the CELsignia platform will be substantially delayed or forestalled.

Risks Related to Intellectual Property

We depend on intellectual property licensed from third parties, including from Pfizer for our lead product candidate, and termination of this license could result in the loss of significant rights, which would harm our business.

We are dependent on patents, know-how and proprietary technology, both our own and licensed from others. All patents covering gedatolisib and any combination therapies using our product candidates are licensed from third parties. Any termination of a product license could result in the loss of significant rights and would cause material adverse harm to our ability to commercialize our product candidates.

Disputes may also arise between us and our licensors regarding intellectual property subject to a license agreement, including:

- the scope of rights granted under the license agreement and other interpretation-related issues;
- whether and the extent to which our technology and processes infringe on intellectual property of the licensor that is not subject to the licensing agreement;
- our right to sublicense patent and other rights to third parties under collaborative development relationships;
- our diligence obligations with respect to the use of licensed technology in relation to our development and commercialization of our product candidates and what activities satisfy those diligence obligations; and
- the ownership of inventions and know-how resulting from the joint creation or use of intellectual property by our licensors and us and our partners.

If disputes over intellectual property that we have licensed prevent or impair our ability to maintain our current licensing arrangements on acceptable terms, we may be unable to successfully develop and commercialize the affected product candidates.

We are generally also subject to all of the same risks with respect to protection of intellectual property that we own, as we are for intellectual property that we license. If we or our licensors fail to adequately protect this intellectual property, our ability to commercialize products could materially suffer.

If we fail to comply with our obligations under our patent license with Pfizer, we could lose license rights that are important to our business.

We are a party to a license agreement with Pfizer pursuant to which we in-license key patents for gedatolisib. This license imposes various diligence, milestone payment, royalty, insurance and other obligations on us. If we fail to comply with these obligations, Pfizer may have the right to terminate the license, in which event we would not be able to develop or market the products covered by such licensed intellectual property. Further, we cannot be certain that the activities by these licensors were conducted in compliance with applicable laws and regulations or will result in additional valid and enforceable patents and other intellectual property rights.

We may not be successful in obtaining or maintaining necessary rights to develop any future product candidates on acceptable terms.

Our clinical trials and other programs currently, and may in the future, involve additional product candidates that require the use of, or reliance on, proprietary rights held by third parties. Accordingly, the growth of our business depends in part on our ability to acquire, in-license or use these proprietary rights. We may be unable to acquire or in-license any compositions, methods of use, processes or other third-party intellectual property rights from third parties that we identify as necessary or important to our business operations. We may fail to obtain any of these licenses at a reasonable cost or on reasonable terms, if at all, which could harm our business. We may need to cease use of the compositions or methods covered by such third-party intellectual property rights, and may need to seek to develop alternative approaches that do not infringe on such intellectual property rights which may entail additional costs and development delays, even if we were able to develop such alternatives, which may not be feasible. Even if we are able to obtain a license, it may be non-exclusive, thereby giving our competitors access to the same technologies licensed to us. In that event, we may be required to expend significant time and resources to develop or license replacement technology.

The licensing and acquisition of third-party intellectual property rights is a competitive area, and companies that may be more established or have greater resources than we do may also be pursuing strategies to license or acquire third-party intellectual property rights that we may consider necessary or attractive in order to commercialize our product candidates. More established companies may have a competitive advantage over us due to their size, cash resources and greater clinical development and commercialization capabilities. There can be no assurance that we will be able to successfully complete such negotiations and ultimately acquire the rights to the intellectual property surrounding the additional product candidates that we may seek to acquire.

If we are not able to prevent disclosure of our trade secrets and other proprietary information, the value of our products could be significantly diminished.

We rely on trade secret protection to protect our interests in proprietary know-how and in processes for which patents are difficult to obtain or enforce. We may not be able to protect our trade secrets adequately. We have a policy of requiring our consultants, advisors and strategic partners to enter into confidentiality agreements and our employees to enter into invention, non-disclosure and non-compete agreements. However, no assurance can be given that we have entered into appropriate agreements with all parties that have had access to our trade secrets, know-how or other proprietary information. There is also no assurance that such agreements will provide meaningful protection of our trade secrets, know-how or other proprietary information in the event of any unauthorized use or disclosure of information. Furthermore, we cannot provide assurance that any of our employees, consultants, contract personnel, or strategic partners, either accidentally or through willful misconduct, will not cause serious damage to our programs and/or our strategy, for example by disclosing important trade secrets, know-how or proprietary information to our competitors. It is also possible that our trade secrets, know-how or other proprietary information could be obtained by third parties as a result of breaches of our physical or electronic security systems. Any disclosure of confidential data into the public domain or to third parties could allow our competitors to learn our trade secrets and use the information in competition against us. In addition, others may independently discover our trade secrets and proprietary information. Any action to enforce our rights is likely to be time consuming and expensive, and may ultimately be unsuccessful, or may result in a remedy that is not commercially valuable. These risks are accentuated in foreign countries where laws or law enforcement practices may not protect proprietary rights as fully as in the United States. Any unauthorized disclosure of our trade secrets or proprietary information could harm our competitive position.

We may be subject to claims by employees claiming ownership of what we regard as our own intellectual property.

While it is our policy to require our employees and contractors who may be involved in the development of intellectual property to execute agreements assigning such intellectual property to us, we may be unsuccessful in executing such an agreement with each party who in fact develops intellectual property that we regard as our own. Our and their assignment agreements may not be self-executing or may be breached, and we may be forced to bring claims against third parties, or defend claims they may bring against us, to determine the ownership of what we regard as our intellectual property. If we fail in prosecuting or defending any such claims, in addition to paying monetary damages, we may lose valuable intellectual property rights or personnel. Even if we are successful in prosecuting or defending against such claims, litigation could result in substantial costs and be a distraction to management.

If we are unable to obtain and maintain intellectual property protection for our product candidates, or if the scope of the intellectual property protection obtained is not sufficiently broad, our competitors could develop and commercialize product candidates similar or identical to ours, and our ability to successfully commercialize our product candidates may be impaired.

We have applied for patents that protect our product candidates, and our patent portfolio currently includes, for CELsignia, six issued U.S. patents and 30 issued international patents, and, for our drug candidate gedatolisib, 12 granted patents in the U.S. and more than 290 patents granted in foreign jurisdictions including Australia, Canada, China, France, Germany, Spain, United Kingdom and Japan. We cannot ensure that our intellectual property position will not be challenged or that all patents for which we have applied will be granted. We cannot know with certainty whether we were the first to make the inventions claimed in our owned or licensed patents or pending patent applications, or that we were the first to file for patent protection of such inventions.

The patent prosecution process is expensive and time-consuming, and we may not be able to file, prosecute, maintain, enforce or license all necessary or desirable patent applications at a reasonable cost or in a timely manner, or in all jurisdictions. We may choose not to seek patent protection for certain innovations and may choose not to pursue patent protection in certain jurisdictions, and under the laws of certain jurisdictions, patents or other intellectual property rights may be unavailable or limited in scope. Additionally, the laws and regulations governing patents could change in unpredictable ways that would weaken our ability to obtain new patents or to enforce our existing patents and patents that we might obtain in the future. There also may be patent reforms in foreign jurisdictions that could increase the uncertainties and costs surrounding the prosecution of our patent applications and the enforcement or defense of our issued patents in those jurisdictions. It is also possible that we will fail to identify patentable aspects of our discovery and nonclinical development output before it is too late to obtain patent protection.

As a result of these factors, the issuance, scope, validity, enforceability and commercial value of our patent rights are highly uncertain. Our pending and future patent applications may not result in patents being issued that protect our product candidates, in whole or in part, or which effectively prevent others from commercializing competitive product candidates. Moreover, given the amount of time required for the development, testing and regulatory review of new product candidates, patents protecting such candidates might expire before or shortly after such candidates are commercialized. As a result, our owned patent portfolio may not provide us with sufficient rights to exclude others from commercializing products similar or identical to ours.

Third parties may initiate legal proceedings alleging that we are infringing their intellectual property rights, the outcome of which would be uncertain and could have a material adverse effect on the success of our business.

The commercial success of our products depends upon our ability to use proprietary technologies without infringing the proprietary rights of third parties. There is considerable intellectual property litigation in the medical technology, biotechnology and pharmaceutical industries. We may become party to, or threatened with, future adversarial proceedings or litigation regarding intellectual property rights with respect to our products. Additionally, because current and future employees may have been previously employed at universities or other biotechnology, diagnostic technology or pharmaceutical companies, including our competitors or potential competitors and strategic partners, third parties may assert infringement claims against us based on existing patents or patents that may be granted in the future, or they may allege that our employees or we have used or disclosed intellectual property, including trade secrets or other proprietary information, of any such employee's former employer. Litigation may be necessary to defend against these claims.

Patent litigation could result in loss of exclusivity or freedom to operate or in patent claims being narrowed, invalidated or held unenforceable, in whole or in part, which could limit our ability to stop others from using or commercializing similar or identical technology and product candidates, or limit the duration of the patent protection of our technology and potential diagnostic tests. If we are found to infringe a third party's intellectual property rights, we could be required to obtain additional licenses from such third party to continue developing and marketing our applicable products. However, we may not be able to obtain any required license on commercially reasonable terms or at all. Even if we were able to obtain a license, it could be non-exclusive, thereby giving our competitors access to the same technologies licensed to us. We could be forced, including by court order, to cease commercializing the infringing technology or product.

In addition, we could be found liable for monetary damages, including treble damages and attorneys' fees if we are found to have willfully infringed a patent. A finding of infringement could prevent us from commercializing our products or force us to cease some of our business operations, which could materially harm our business. Claims that we have misappropriated the confidential information or trade secrets of third parties could have a similar negative impact on our business.

Any lawsuits relating to infringement of intellectual property rights necessary to defend ourselves or enforce our rights will be costly and time consuming and could be unsuccessful.

Because competition in our industry is intense, competitors may infringe or otherwise violate our issued patents, patents of our licensors or other intellectual property. To counter infringement or unauthorized use, we may be required to file infringement claims, which can be expensive and time consuming, and could distract our technical and management personnel from their normal responsibilities. Any claims we assert against perceived infringers could provoke these parties to assert counterclaims against us alleging that we infringe their patents. In addition, in a patent infringement proceeding, a court may decide that a patent of ours is invalid or unenforceable, in whole or in part, construe the patent's claims narrowly or refuse to stop the other party from using the technology at issue on the grounds that our patents do not cover the technology in question. An adverse result in any litigation proceeding could put one or more of our patents at risk of being invalidated or interpreted narrowly. We may also elect to enter into license agreements in order to settle patent infringement claims or to resolve disputes prior to litigation, and any such license agreements may require us to pay royalties and other fees that could be significant. Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure.

Risks Related to Our Reliance on Third Parties

We rely on third parties to conduct certain aspects of our preclinical studies and clinical trials. If these third parties do not successfully carry out their contractual duties, meet expected deadlines or comply with regulatory requirements, we may not be able to obtain regulatory approval for, or commercialize, any potential product candidates.

We depend upon third parties to execute our operational plans and to conduct certain aspects of our preclinical studies. Additionally, we depend on third parties, including independent investigators, to conduct our clinical trials, under agreements with universities, medical institutions, contract research organizations, or CROs, strategic partners and others. Our reliance on third parties may affect our development timelines and increase our costs.

We have limited control over third-party clinical investigators and limited visibility into their day-to-day activities, including with respect to their compliance with the approved clinical protocol. Nevertheless, we are responsible for ensuring that each of our clinical trials is conducted in accordance with the applicable protocol, legal and regulatory requirements and scientific standards. We and these third parties are required to comply with GCP requirements, which are regulations and guidelines enforced by the FDA and comparable foreign regulatory authorities for product candidates in clinical development. Regulatory authorities enforce these GCP requirements through periodic inspections of clinical trial sponsors, clinical investigators and clinical trial sites. If we or any of these third parties fail to comply with applicable GCP requirements, the clinical data generated in our clinical trials may be deemed unreliable and the FDA or comparable foreign regulatory authorities may require us to suspend or terminate these trials or perform additional preclinical studies or clinical trials before approving our marketing applications. Moreover, our business may be adversely affected if any of these third parties violates federal or state fraud and abuse or false claims laws and regulations or healthcare privacy and security laws.

Any third parties conducting aspects of our preclinical studies or our clinical trials will not be our employees and, except for remedies that may be available to us under our agreements with such third parties, we cannot control whether or not they devote sufficient time and resources to our preclinical studies and clinical programs. These third parties may also have relationships with other commercial entities, including our competitors, for whom they may also be conducting clinical trials or other product development activities, which could affect their performance on our behalf. If these third parties do not successfully carry out their contractual duties or obligations or meet expected deadlines, if they need to be replaced or if the quality or accuracy of the preclinical or clinical data they obtain is compromised due to the failure to adhere to our protocols or regulatory requirements or for other reasons, our development timelines, including clinical development timelines, may be extended, delayed or terminated and we may not be able to complete development of, obtain regulatory approval of or successfully commercialize our product candidates. As a result, our financial results and the commercial prospects for our product candidates would be harmed, our costs could increase and our ability to generate revenue could be delayed or precluded entirely.

Our reliance on third parties to formulate and manufacture our drug product will expose us to risks that may delay the development, regulatory approval and commercialization of our drug product or result in higher product costs.

We do not directly formulate or manufacture our drug product candidate and do not intend to establish our own manufacturing facilities. We will contract with one or more manufacturers to manufacture and supply our drug product, and we will use other third parties to package, store and distribute drug supplies for our clinical trials. If our drug product receives FDA approval, we will rely on one or more third-party contractors to manufacture and distribute our drug product.

Our reliance on a limited number of third-party manufacturers, including one primary manufacturer of the active ingredient gedatolisib, exposes us to risks that, among other things, we may be unable to identify manufacturers on acceptable terms or at all because the number of potential manufacturers is limited and the FDA must approve any replacement or additional manufacturer; our third-party manufacturers might be unable to formulate and manufacture our drugs in the volume and of the quality required to meet our clinical and/or commercial needs, if any; our contract manufacturers may not perform as agreed or may not remain in the contract manufacturing business for the time required to supply our clinical trials, or to successfully produce, store and distribute our products commercially; and our contract manufacturers may fail to comply with good manufacturing practice and other government regulations and corresponding foreign standards. Each of these risks could delay our clinical trials, the approval, if any, of our product candidates by the FDA, or the commercialization of our product candidates or result in higher costs or deprive us of potential product revenues.

The pharmaceutical companies that we partner with for our CELsignia tests may not be successful in receiving regulatory approval for drug indications or may not commercialize their companion therapies for our expected companion diagnostic programs.

There can be no assurances that our pharmaceutical partners for our CELsignia tests will be able to obtain regulatory approval for new indications to treat applicable patient populations or otherwise be successful in commercializing their therapies. Among other risks, our pharmaceutical company partners may not meet clinical trial endpoint targets, may encounter regulatory or production delays, may not pursue commercialization of companion therapeutics, or may terminate their relationship with us.

Performance issues or price increases by our shipping carriers could adversely affect our business, results of operations and financial condition, and harm our reputation and ability to provide our products on a timely basis.

Expedited, reliable shipping is essential to our operations. Should our shipping carriers encounter delivery performance issues such as loss, damage or destruction of a sample, such occurrences may damage our reputation and lead to decreased demand for our services and increased cost and expense to our business. In addition, any significant increase in shipping rates could adversely affect our operating margins and results of operations. Similarly, strikes, severe weather, natural disasters or other service interruptions by delivery services we use would adversely affect our ability to receive and process patient samples on a timely basis. There are only a few providers of overnight nationwide transport services, and there can be no assurance that we will be able to maintain arrangements with providers on acceptable terms, if at all.

Risks Related to Commercializing Our Products

Even if our products achieve positive clinical trial results and requisite approvals, they may fail to achieve the degree of market acceptance by physicians, patients, third-party payors and others in the medical community necessary for commercial success.

If any product we develop achieves positive clinical trial results and receives marketing approval, whether on a standalone basis or in combination with other therapies, it may nonetheless fail to gain sufficient market acceptance by physicians, patients, third-party payors and others in the medical community. For example, existing drug therapies may be viewed as more reliable than gedatolisib. If the product candidates we develop do not achieve an adequate level of acceptance, we may not generate significant product revenues and we may not become profitable. The degree of market acceptance of any product candidate, if approved for commercial sale, will depend on a number of factors, including:

- efficacy and potential advantages compared to alternatives;
- the ability to offer our products, if approved, for sale at competitive prices;
- convenience and ease of administration compared to other treatments;
- the willingness of the target patient population to try new therapies or diagnostics and of physicians to prescribe or initiate these therapies;
- the strength of marketing and distribution support;
- the ability to obtain sufficient third-party coverage, market access and adequate reimbursement; and
- the prevalence and severity of any side effects.

If our products do not achieve an adequate level of acceptance, we may never generate significant product revenues and we may not become profitable.

If we commercialize any product candidates, we will be subject to U.S. and foreign governmental regulations as well as private payor policies that mandate price controls or limitations on patient access to our products or establish prices paid by government entities or programs for our products. Our business and our future results could be adversely affected by changes in such regulations.

Even if we or our partners are successful in obtaining marketing approval, commercial success of any approved products will also depend in large part on the availability of insurance coverage and adequate reimbursement from third-party payors, including government payors such as the VA, Medicare and Medicaid programs, 340B, and managed care organizations in the U.S. or country specific governmental organizations in foreign countries. Government and private payors routinely seek to manage utilization and control costs, and there is considerable public and government scrutiny of pharmaceutical and diagnostic pricing. Efforts by states and the federal government to regulate prices or payment for pharmaceutical products, including

proposed actions to facilitate drug importation, limit reimbursement to lower international reference prices, require deep discounts, and require manufacturers to report and make public price increases and sometimes provide a written justification for such price increases, could adversely affect our business if implemented.

Availability of reimbursement may be affected by existing and future healthcare reform measures designed to reduce the cost of healthcare, including the Inflation Reduction Act, which requires manufacturers of certain drugs to engage in price negotiations with Medicare, imposes rebates under Medicare Part B and Medicare Part D to penalize price increases that outpace inflation, and replaces the Part D coverage gap discount program with a new discounting program. Some states have implemented, and others are considering implementing, patient access constraints or cost cutting under the Medicaid program, and some are considering measures that would apply to broader segments of their populations that are not Medicaid-eligible. State legislatures also have continued to focus on addressing drug costs, generally by increasing price transparency or limiting drug price increases.

Third-party payors also could require us to conduct additional studies, including post-marketing studies related to the cost effectiveness of a product and appropriateness for specific patient populations, to qualify for reimbursement, which could be costly and divert our resources. If government and other healthcare payors do not provide coverage and adequate reimbursement for our products once approved, market acceptance and commercial success would be reduced. Even if coverage is provided, the approved reimbursement amount may not be high enough to support pricing that results in a sufficient return on our research and development investment.

We expect pricing pressures will continue globally. U.S. and foreign governmental regulations that mandate price controls or limitations on patient access to our products or establish prices paid by government entities or programs for our products could impact our business, and our future results could be adversely affected by changes in such regulations or policies.

We may encounter difficulties in scaling production of, commercializing, marketing and distributing our products, including in hiring and retaining a qualified sales force.

In order to commercialize any of our products, we must build production, marketing, sales, managerial and other non-technical capabilities or make arrangements with third parties to perform these services, and we may not be successful in doing so. Our beliefs that our products will be commercially viable have not been tested. These activities will be expensive and time-consuming and will require significant attention of our executive officers to manage. There are risks involved in establishing our own sales and marketing capabilities, as well as with entering into arrangements with third parties to perform these services.

In particular, there is intense competition for qualified sales personnel and our inability to hire or retain an adequate number of sales representatives could limit our ability to maintain or expand our business and increase sales. Furthermore, there is no guarantee that the market opportunity for gedatolisib will be as significant as we expect or exist at all. If we are unable to successfully commercialize our products, or if we are delayed in doing so, including if we are unable to develop our marketing and sales networks or if our sales personnel do not perform as expected, we may never generate any revenue and our business may fail.

Our business, operational and financial goals may not be attainable if the market opportunities for our products are smaller than we expect. Our internal research and third party estimates may not accurately reflect the market opportunities for gedatolisib today or in the future.

The total market opportunities that we believe exist are based on a variety of assumptions and estimates, including the size of the addressable patient population in applicable jurisdictions, the penetration of other drugs in these markets, the number of potential companion diagnostic programs we will be able to successfully pursue, the amount of potential milestone payments that we could receive in companion diagnostic programs, the number of patients we will test in clinical trials, the price we will be able to charge for our products and the total annual number of cancer patients with undiagnosed abnormal cell signaling. In addition, we have relied on third-party publications, research, surveys and studies for information related to determining market opportunities, including without limitation, information on the number of cancer patients and those receiving various forms of treatment, the cost of drug therapy, the amount of revenue generated from various types of drug therapy, the objective response rates of drug therapies, the number of deaths caused by cancer and the expected growth in cancer drug therapy and diagnostic markets. Our internal research and estimates on market opportunities have been verified by independent sources, but any or all of our assumptions and/or estimates may prove to be incorrect for several reasons, such as inaccurate reports or information that we have relied on, potential patients or providers not being amenable to using our products or such patients becoming difficult to identify and access, limited reimbursement for our products, pricing pressure due to availability of alternative drugs or an inability to obtain the necessary regulatory approvals for new indications. If any or all of our assumptions and estimates prove inaccurate, we may not attain our business, operational and financial goals.

Other Risks Related to Government Regulation for Our Business

Failure to comply with the HIPAA security and privacy regulations may increase our operational costs.

A portion of the data that we obtain and handle for or on behalf of our clients is considered protected health information, or PHI, subject to HIPAA. Under HIPAA and our contractual agreements with our HIPAA-covered entity health plan customers, we may be considered a “business associate” to those customers and are required to maintain the privacy and security of PHI in accordance with HIPAA and the terms of our business associate agreements with our clients, including by implementing HIPAA-required administrative, technical and physical safeguards. We are also required to maintain similar business associate agreements with our subcontractors that have access to PHI of our customers in rendering services to us or on our behalf. We will incur significant costs to establish and maintain these safeguards and, if additional safeguards are required to comply with HIPAA regulations or our clients’ requirements, our costs could increase further, which would negatively affect our operating results. Furthermore, we cannot guarantee that such safeguards have been and will continue to be adequate under applicable laws. If we have failed, or fail in the future, to maintain adequate safeguards, or we or our agents or subcontractors use or disclose PHI in a manner prohibited or not permitted by HIPAA, our subcontractor business associate agreements, or our business associate agreements with our customers, or if the privacy or security of PHI that we obtain and handle is otherwise compromised, we could be subject to significant liabilities and consequences.

Compliance with global privacy and data security requirements could result in additional costs and liabilities to us or inhibit our ability to collect and process data globally, and the failure to comply with such requirements could subject us to significant fines and penalties, which may have a material adverse effect on our business, financial condition or results of operations.

In addition to PHI, we collect, receive, store, process, use, generate, transfer, disclose, make accessible, protect, secure, dispose of, transmit and share (collectively, process) personal data and other sensitive information. Accordingly, we are, or may become, subject to numerous federal, state, local and foreign privacy and security laws regulating the collection, use, safeguarding, transfer and other processing of information.

Globally, virtually every jurisdiction in which we operate has established its own data security and privacy frameworks with which we must comply. For example, the collection, use, disclosure, transfer, or other processing of personal data regarding individuals in the UK, and the European Economic Area (the “EEA”), including personal health data, is subject to the UK/EU General Data Protection Regulation (the “GDPR”), which is wide-ranging in scope and imposes numerous requirements on companies that process personal data, including requirements relating to the processing of health and other sensitive data, obtaining consent of the individuals to whom the personal data relates, providing information to individuals regarding data processing activities, implementing safeguards to protect the security and confidentiality of personal data, providing notification of data breaches, and taking certain measures when engaging third-party processors. In addition, the GDPR also imposes strict rules on the transfer of personal data to countries outside the UK/European Union, including the United States, and, as a result, increases the scrutiny that clinical trial sites located in the EEA should apply to transfers of personal data from such sites to countries that are considered to lack an adequate level of data protection, such as the United States. The GDPR also permits data protection authorities to require destruction of improperly gathered or used personal information and/or impose substantial fines for violations of the GDPR, which can be up to 4% of global revenue or €20 million, whichever is greater, and it also confers a private right of action on data subjects and consumer associates to lodge complaints with supervisory authorities, seek judicial remedies, and obtain compensation for damages resulting from violations of the GDPR. In addition, the GDPR provides that UK/EU member states may make their own further laws and regulations limiting the processing of personal data, including genetic, biometric or health data. Given the breadth and depth of changes in data protection obligations, preparing for and complying with these requirements is rigorous and time intensive and requires significant resources and a review of our technologies, systems and practices, as well as those of any third-party collaborators, service providers, contractors or consultants that process or transfer personal data collected in the European Union.

Similar actions are either in place or underway in the United States. For example, the California Consumer Privacy Act of 2018 (the “CCPA”), as amended and expanded by the California Privacy Rights Act (the “CPRA”), applies to personal information of consumers, business representatives, and employees, and requires covered businesses to provide specific disclosures related to a business’s processing of personal data, new operational practices, and requirements to respond to certain requests from California residents related to their personal data. There is uncertainty about how the CPRA and other similar laws may be implemented and applied, and inconsistencies across jurisdictions complicate our compliance efforts. Accordingly, the CPRA and other similar laws may impact our business activities and increase our compliance costs, as well as our legal risks. The regulatory framework for the collection, use, safeguarding, transfer and other processing of information is rapidly evolving and is likely to remain uncertain for the foreseeable future.

Evolving data privacy regulations may interrupt or delay our development, regulatory and commercialization activities and increase our cost of doing business, and could lead to government enforcement actions, private litigation and significant fines and penalties against us and could have a material adverse effect on our business, financial condition or results of operations. Even if we are not determined to have violated these laws, government investigations into these issues typically require the expenditure of significant resources and generate negative publicity, which could harm our reputation and our business.

We will also need to expend a considerable amount of resources complying with other federal, state and foreign laws and regulations. If we are unable to comply or have not complied with such laws, we could face substantial penalties or other adverse actions.

Our operations are subject, directly or indirectly, to other federal, state and foreign laws and regulations that are complex and their application to our specific products, services and relationships may not be clear and may be applied to our business in ways that we do not anticipate. Compliance with laws and regulations will require us to expend considerable resources implementing internal policies and procedures for compliance and ongoing monitoring and will require significant attention of our management team. This will be challenging as an early-stage company with limited financial resources and human capital. These laws include, for example:

- Title XI of the Social Security Act, commonly referred to as the federal Anti-Kickback Statute, which prohibits the knowing and willful offer, payment, solicitation or receipt of remuneration, directly or indirectly, in cash or in kind, in return for or to reward the referral of patients or arranging for the referral of patients, or in return for the recommendation, arrangement, purchase, lease or order of items or services that are covered, in whole or in part, by a federal healthcare program such as Medicare or Medicaid;
- The civil False Claims Act, which forbids the knowing submission or “causing the submission” of false or fraudulent information or the failure to disclose information in connection with the submission and payment of claims for reimbursement to Medicare, Medicaid, federal healthcare programs or private health plans;
- The federal Physician Self-referral Law, commonly known as the Stark Law, which prohibits physicians from referring Medicare or Medicaid patients to providers of “designated health services” with whom the physician or a member of the physician’s immediate family has an ownership interest or compensation arrangement, unless a statutory or regulatory exception applies, and similar state equivalents that may apply regardless of payor; and
- The U.S. Foreign Corrupt Practices Act of 1977, as amended, or FCPA, the U.S. domestic bribery statute contained in 18 U.S.C. § 201, the U.S. Travel Act, and the USA PATRIOT Act, which among other things, prohibit companies and their employees, agents, third-party intermediaries, joint venture partners and collaborators from authorizing, promising, offering, or providing, directly or indirectly, improper payments or benefits to recipients in the public or private sector.

Many states and foreign governments have adopted similar laws and regulations. Violations of law could subject us to civil or criminal penalties, monetary fines, disgorgement, individual imprisonment, contractual damages, reputational harm, diminished profits and future earnings and curtailment of our operations. We could also be required to change or terminate some portions of operations or business or could be disqualified from providing services to healthcare providers doing business with government programs.

Risks Relating to Our Common Stock

Provisions in our corporate charter documents and under Delaware law could make an acquisition of our company, which may be beneficial to our stockholders, more difficult and may prevent attempts by our stockholders to replace or remove our current management.

Provisions in our certificate of incorporation and our bylaws may discourage, delay or prevent a merger, acquisition or other change in control of our company that stockholders may consider favorable, including transactions in which you might otherwise receive a premium for your shares. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock, thereby depressing the market price of our common stock. In addition, because our board of directors will be responsible for appointing the members of our management team, these provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our board of directors. Among other things, these provisions:

- allow the authorized number of our directors to be changed only by resolution of our board of directors;

- limit the manner in which stockholders can remove directors from our board of directors;
- establish advance notice requirements for stockholder proposals that can be acted on at stockholder meetings and nominations to our board of directors;
- require that stockholder actions must be effected at a duly called stockholder meeting and prohibit actions by our stockholders by written consent;
- limit who may call stockholder meetings;
- authorize our board of directors to issue preferred stock without stockholder approval, which could be used to institute a “poison pill” that would work to dilute the stock ownership of a potential hostile acquirer, effectively preventing acquisitions that have not been approved by our board of directors; and
- require the approval of the holders of at least two-thirds of the votes that all our stockholders would be entitled to cast to amend or repeal specified provisions of our certificate of incorporation or bylaws.

Moreover, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, which prohibits a person who owns in excess of 15% of our outstanding voting stock from merging or combining with us for a period of three years after the date of the transaction in which the person acquired in excess of 15% of our outstanding voting stock, unless the merger or combination is approved in a prescribed manner.

Any of these provisions of our charter documents or Delaware law could, under certain circumstances, depress the market price of our common stock.

The price of our common stock may be volatile and fluctuate substantially, which could result in substantial losses for purchasers of our common stock or could subject us to securities litigation.

Our stock price may be extremely volatile. The stock market in general and the market for smaller medical technology companies in particular have experienced extreme volatility that has often been unrelated to the operating performance of particular companies. As a result of this volatility, investors may not be able to sell our common stock at or above the price they paid for such stock. The market price for our common stock may be influenced by many factors, including:

- the success of competitive products or technologies;
- results of existing or future clinical trials;
- regulatory or legal developments in the United States and other countries;
- developments or disputes concerning patent applications, issued patents or other proprietary rights;
- the recruitment or departure of key personnel;
- the level of expenses related to any of our products or clinical development programs;
- actual or anticipated changes in estimates as to financial results, development timelines or recommendations by securities analysts;
- operating results that fail to meet expectations of securities analysts that cover our company;
- variations in our financial results or those of companies that are perceived to be similar to us;
- changes in the structure of healthcare payment systems;
- market conditions in the pharmaceutical, biotechnology and medical technology sectors;
- sales of our stock by us, our insiders and our other stockholders;
- general economic and market conditions; and
- the other factors described in this “Risk Factors” section.

Additionally, companies that have experienced volatility in the market price of their stock have been subject to an increased incidence of securities class action litigation. We may be the target of this type of litigation in the future. Securities litigation against us could result in substantial costs and divert our management’s attention from other business concerns, which could seriously harm our business.

Future sales of shares of our common stock, including by us and significant stockholders, could negatively affect our stock price.

Sales of a substantial number of shares of our common stock in the public market could occur at any time. Since December 2022, we have issued 5,340,914 shares of common stock pursuant to equity financing arrangements, including pursuant to our Open Market Sale AgreementSM with Jefferies LLC, as agent, pursuant to which we may offer and sell, from time to time, through Jefferies, shares of our common stock having an aggregate offering price of up to \$125.0 million. At December 31, 2024, \$125.0 million of common stock remains available for sale under the Jefferies agreement. We may enter into additional equity financing arrangements in the future. The shares of common stock that we have issued pursuant to equity financings, or may issue in the future, may be resold at any time in the discretion of the investors.

In addition, an aggregate of 14,444,709 shares of common stock are issuable upon conversion or exercise of currently outstanding preferred stock and financing warrants, subject to certain beneficial ownership limitations, which the investors may subsequently resell into the market, and 4,306,977 shares of common stock are issuable upon exercise of awards granted under our 2017 Stock Incentive Plan and 2012 Equity Incentive Plan. Under our Amended and Restated Loan and Security Agreement, Innovatus has the right, at its election and until August 9, 2025, to convert up to 20% of the outstanding principal of the Term A Loan into shares of the Company's common stock at a price per share of \$10.00 (the "Conversion Right"). Innovatus will continue to have the right to exercise a previously disclosed warrant granted to it under the Prior Loan Agreement to purchase 26,042 shares of common stock at a price per share of \$14.40 through April 8, 2031. In connection with the funding of each of the Term C Loan, the Term D Loan, the Term E Loan and the Term F Loan, the Company agreed to issue to Innovatus and Oxford warrants to purchase that number of shares of the Company's common stock equal to 2.5% of the principal amount of the applicable Term Loan divided by the exercise price, which shall, with respect to the Term C Loan, be equal to the lower of (i) the volume weighted average closing price of the Company's common stock for the five-trading day period ending on the last trading day immediately preceding the execution of the A&R Loan Agreement or (ii) the closing price on the last trading day immediately preceding the execution of the A&R Loan Agreement. Accordingly, on May 30, 2024, the Company issued 103,876 warrants with an exercise price of \$14.84 per share. The relative fair value of the warrants was approximately \$1.2 million. For the additional Term Loans, the exercise price will be based on the lower of (i) the exercise price for the Warrants issued pursuant to the Term C Loan or (ii) the volume weighted average closing price of the Company's common stock for the five-trading day period ending on the last trading day immediately preceding the applicable Term Loan funding. The Warrants may be exercised on a cashless basis and are exercisable through the tenth anniversary of the applicable funding date. The number of shares of common stock for which each Warrant is exercisable and the associated exercise price are subject to certain proportional adjustments as set forth in such Warrant.

Sales of substantial amounts of shares of our common stock or other securities by these investors or our other stockholders or by us under the Open Market Sale AgreementSM, or the perception in the market that the holders of a large number of shares of our common stock intend to sell their shares, could reduce the trading price of our common stock, make it more difficult for you to sell your shares at a price that you desire and impair our ability to raise capital through the sale of equity or equity-related securities.

Our Series A Preferred Stock has rights, preferences, and privileges that are not held by, and are preferential to, the rights of holders of our common stock.

We issued 1,120,873 shares of Series A Preferred Stock in a financing transaction in December 2022, and 317,577 shares of Series A Preferred Stock were outstanding as of December 31, 2024. The Certificate of Designations of Preferences, Rights and Limitations of Series A Convertible Preferred Stock provides that, in the event of any voluntary or involuntary liquidation, dissolution or winding up of the Company, or in the event of a Deemed Liquidation Event (as defined in the Certificate of Designations of Preferences, Rights and Limitations of Series A Convertible Preferred Stock), the holders of Series A Preferred Stock are entitled to be paid from assets of the Company available for distribution to its stockholders, before any payment is made to the holders of common stock by reason of their ownership thereof, an amount per share equal to the greater of (i) the original issue price (\$5.75 on an as-converted-to-common stock basis), plus all accrued and unpaid dividends and (ii) the amount that the holder would have been entitled to receive at such time if the Series A Preferred Stock were converted into common stock. The Company may not, without the consent of holders of a majority of the outstanding shares of Series A Preferred Stock, amend its charter in a manner that adversely affects the powers, preferences or rights of the Series A Preferred Stock or issue or obligate itself to issue shares of any additional class or series of capital stock unless the same ranks junior to the Series A Preferred Stock with respect to the distribution of assets on the liquidation, dissolution or winding up of the Company and the payment of dividends.

If securities or industry analysts do not publish research or reports about our business, or publish negative reports about our business, our stock price and trading volume could decline.

The trading market for our common stock depends in part on the research and reports that securities or industry analysts publish about us or our business. We do not have any control over these analysts. There can be no assurance that analysts will cover us or provide favorable coverage. If one or more of the analysts who cover us downgrade our stock or change their opinion of our stock, our stock price would likely decline. If one or more of these analysts cease coverage of our company or fail to regularly publish reports on us, we could lose visibility in the financial markets, which could cause our stock price or trading volume to decline.

We incur increased costs as a result of operating as a public company, and our management devotes substantial time to new compliance initiatives and corporate governance practices.

As a public company, we incur significant legal, accounting and other expenses that we did not incur as a private company and that private company competitors do not incur. The Sarbanes-Oxley Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act, the continued listing requirements of The Nasdaq Stock Market and other applicable securities rules and regulations impose various requirements on public companies, including establishment and maintenance of effective disclosure and financial controls and corporate governance practices. Our management and other personnel devote a substantial amount of time to these compliance initiatives. Moreover, these rules and regulations have increased our ongoing legal and financial compliance costs and make some activities more time-consuming and costly.

Pursuant to Section 404 of the Sarbanes-Oxley Act, or Section 404, we are required to furnish a report by our management on our internal control over financial reporting. Depending upon our filer status, we could also be required to include an attestation report on internal control over financial reporting issued by our independent registered public accounting firm as required by Section 404(b). While we, as of December 31, 2024, concluded that our internal control over financial reporting was effective, we may need to dedicate additional internal resources and engage outside consultants to maintain compliance with Section 404 in the future. Any material weaknesses that we may identify in the future could result in an adverse reaction in the financial markets due to a loss of confidence in the reliability of our financial statements.

We do not currently intend to pay dividends on our common stock, and, consequently, our stockholders' ability to achieve a return on their investment will depend on appreciation in the price of our common stock.

We currently intend to invest our future earnings, if any, to fund our growth. We do not currently intend to pay dividends on our common stock for the foreseeable future, and, consequently, our stockholders' ability to achieve a return on their investment will depend on appreciation in the price of our common stock. There is no guarantee that our common stock will appreciate or even maintain the price at which our holders have purchased it.

ITEM 1B. Unresolved Staff Comments

None.

ITEM 1C. Cybersecurity

Risk Management & Strategy

Our cybersecurity risk management process is a component of our overall approach to managing material risks that could impact our operations, including cybersecurity threats. In general, we seek to manage material internal and third-party cybersecurity risks through an approach that focuses on: (i) protecting information systems and the information residing therein; (ii) identifying, preventing, and mitigating cybersecurity threats; and (iii) assessing and responding to cybersecurity incidents when they occur. Maintaining, monitoring, and updating our information security program—in an effort to ensure that it remains reasonable and appropriate in light of changes in the security threat landscape, available technology, and applicable legal and contractual requirements—is an ongoing effort.

We have implemented and maintain various processes, procedures, and measures to support our overall risk management strategy and to manage and mitigate the material risks posed by cybersecurity threats to our systems and data. With respect to cybersecurity, these measures include conducting risk assessments of our operations and using a risk register to assess identified risks; developing business continuity, disaster recovery and incident response plans; implementing technical safeguards and tools; conducting ongoing cybersecurity awareness training; and using contractual protections where appropriate. Our incident response plan outlines the procedures for reporting, investigating, and remediating cybersecurity incidents, including a framework to facilitate the escalation to our management team and board of cybersecurity incidents, so that our management team is alerted in a timely manner to material information that would be required to be disclosed or reported.

Our IT department maintains policies and procedures regarding network security, data protection and incident response. Pursuant to those policies, IT engages with the Chief Financial Officer, General Counsel and other experts when assessing cybersecurity threats, incident response, and making disclosure determinations following a data or network breach. The Vice President, IT is accountable at the management level for our overall IT risk management program. Additionally, our Chief Executive Officer and Audit Committee receives regular updates from the Chief Financial Officer, General Counsel and the Vice President, IT about significant threats and incidents involving cybersecurity and data protection, as well as security enhancements made to our IT infrastructure.

We use third-party service providers for a variety of services throughout our business, ranging from infrastructure support and maintenance, cybersecurity incident response, data protection and privacy compliance. In addition, we engage with contract research organizations, contract manufacturing organizations, distributors, and other supply chain resources.

We believe that the use of external service providers improves our operational capabilities, and we have implemented a vendor qualification and management program that applies to our service providers, including those that handle protected health information, personal information, or other information subject to protection under applicable privacy and data protection regulations. This program is designed to identify, address and seek to mitigate potential cybersecurity and data protection risks that arise from our use of external service providers. While we do not have full visibility into the cybersecurity risk management processes of our vendors, we require new service providers to complete a vendor questionnaire that identifies the vendor's network and user protections, such as the use of multi-factor authentication, and other cybersecurity risk management processes. Vendors that store or access our confidential information are required to certify that their information systems comply with applicable industry guidelines for cybersecurity, backup, and system recovery. We rely on our third-party service providers to provide notification of, and remediate, significant cybersecurity threats and cybersecurity incidents that jeopardize the confidentiality, integrity, or availability of our information.

We periodically evaluate, test, and update our policies, standards, and processes to mitigate cybersecurity threats and manage incidents effectively. These efforts include risk assessments, vulnerability assessments and remediations, phishing tests and employee education, and external scans. Additionally, to enhance our capabilities, we periodically engage third-party service providers, including cybersecurity consultants, to incorporate threat intelligence into our processes.

As of the date of this Form 10-K, we are not aware of any risks from cybersecurity threats, including those resulting from any previous cybersecurity incidents experienced by us or, to our knowledge, by any of our third-party service providers, that have materially affected, or are reasonably likely to materially affect, our business strategy, results of operations, or financial condition. For further discussion of cybersecurity and data privacy risks that may materially affect the Company and how they may do so, see "Risk Factors—If our information technology systems or data, or those of third parties upon which we rely, are or were compromised, we could face clinical trial delays; regulatory investigations or actions; litigation; fines and penalties; disruptions of our business operations; reputational harm; and other adverse consequences," included in Item 1A of this Annual Report on Form 10-K.

Governance

Our Audit Committee oversees Celcuity's management of risks arising from cybersecurity threats. Our CEO delivers periodic briefings to the Board and Audit Committee on material cybersecurity risks that are pertinent to our business operations. Additionally, we have processes to promptly notify the Audit Committee and Board of a significant cybersecurity incident and to inform the Audit Committee and Board of remediation progress, as appropriate.

The Vice President, IT has overall responsibility for our information security program, with support from our management team and specialized partners in cybersecurity incident response and privacy. The process includes managing our incident response strategy. If a cybersecurity incident meets certain criteria, however, our CEO, CFO and General Counsel will become involved with the response strategy, including decisions about public disclosure and reporting. Our Vice President, IT also coordinates with our CEO, CFO and General Counsel to determine strategic cybersecurity priorities and to establish compliance procedures.

We believe our business leaders have the appropriate expertise, background and depth of experience to manage risks arising from cybersecurity threats. Our Vice President, IT has served in various roles in information technology and information security for over three decades, which includes experience in the biotech, pharmaceutical and healthcare industries and experience in cybersecurity risk management and data privacy compliance.

In the ordinary course of our business, we, and the third parties upon which we rely, collect, process, receive, generate, use, transfer, disclose, make accessible, protect, secure, dispose of, transmit, share and store (collectively, “process”) proprietary, confidential, and sensitive information, including protected health information, personal information, credit card and other financial information, or other sensitive information owned or controlled by ourselves or our customers, payors, and other parties.

ITEM 2. Properties

We currently lease and occupy approximately 16,000 square feet in Minneapolis, Minnesota, which includes our clinical laboratory and offices. On March 13, 2023, we signed the fourth amendment to our lease agreement, which expires April 30, 2026. We anticipate leasing new office and lab space in advance of the end date of our lease. The lease provides for monthly rent, real estate taxes and operating expenses. We believe that this leased space is adequate to meet current and anticipated future requirements and that additional or substitute space will be available as needed to accommodate any expansions that our operations require.

ITEM 3. Legal Proceedings

From time to time we may be involved in disputes or litigation relating to claims arising out of our operations. We are not currently a party to any legal proceedings that could reasonably be expected to have a material adverse effect on our business, financial condition and results of operations.

ITEM 4. Mine Safety Disclosures

Not applicable.

PART II

ITEM 5. Market For Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Market Price Information

Our common stock has been listed on The Nasdaq Capital Market under the symbol "CELC" since September 20, 2017.

As of March 17, 2025, there were approximately 107 holders of record of our common stock. The actual number of holders of common stock is greater than this number of record holders and includes stockholders who are beneficial owners, but whose shares are held in street name by brokers and nominees. The number of holders of record also does not include stockholders whose shares may be held in trust by other entities.

Dividends

We have never declared or paid any cash dividends on our common stock. We currently intend to retain our future earnings, if any, to finance the operation and expansion of our business. We do not expect to pay cash dividends on our common stock in the foreseeable future. Payment of future cash dividends, if any, will be at the discretion of our board of directors after taking into account various factors, including our financial condition, operating results, current and anticipated cash needs, outstanding indebtedness and plans for expansion and restrictions imposed by lenders, if any.

Recent Sales of Unregistered Securities

None.

Issuer Purchases of Equity Securities

None.

Equity Compensation Plan Information

The information required by this Item concerning equity compensation plans is incorporated herein by reference from Part III, Item 11 of this Annual Report.

ITEM 6. Reserved.

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis of our financial condition and results of operations together in conjunction with our financial statements and the related notes included elsewhere in this Annual Report. Some of the information contained in this discussion and analysis or set forth elsewhere in this Annual Report, including information with respect to our plans and strategy for our business and expected financial results, includes forward-looking statements that involve risks and uncertainties. You should review the "Risk Factors" discussed in Item 1A of Part I of this Annual Report.

OVERVIEW

Celcuity is a clinical-stage biotechnology company focused on the development of targeted therapies for the treatment of multiple solid tumor indications. The Company's lead therapeutic candidate is gedatolisib, a potent, well-tolerated, small molecule reversible inhibitor, administered intravenously, that selectively targets all Class I isoforms of phosphatidylinositol-3-kinase ("PI3K") and the two mechanistic targets of rapamycin ("mTOR") sub-complexes, mTORC1 and mTORC2. Its mechanism of action and pharmacokinetic properties are differentiated from other currently approved and investigational therapies that target PI3K or mTOR alone or together. A Phase 3 clinical trial, VIKTORIA-1, evaluating gedatolisib in combination with fulvestrant with or without palbociclib in patients with HR+/HER2- advanced breast cancer is currently enrolling patients. Site selection activities are completed and activation activities for a Phase 3 clinical trial, VIKTORIA-2, evaluating gedatolisib in combination with a CDK4/6 inhibitor and fulvestrant as first-line treatment for patients with endocrine treatment resistant HR+/HER2- advanced breast cancer has commenced, and the first patient is expected to be dosed in the second quarter of 2025. A Phase 1b/2 clinical trial, CELC-G-201, evaluating gedatolisib in combination with darolutamide in patients with mCRPC, is currently underway.

In April 2021, we obtained exclusive global development and commercialization rights to gedatolisib under a license agreement with Pfizer Inc. We believe gedatolisib's unique mechanism of action, differentiated chemical structure, favorable pharmacokinetic properties, and intravenous route of administration offer distinct advantages over currently approved and investigational therapies that target PI3K, AKT, or mTOR alone or together.

- **Overcomes limitations of therapies that only inhibit a single Class I PI3K isoform or only one mTOR kinase complex.**

Gedatolisib is a pan-class I isoform PI3K inhibitor with low nanomolar potency for the p110 α , p110 β , p110 γ , and p110 δ isoforms and mTORC1 and mTORC2 complexes. Each PI3K isoform and mTOR complex is known to preferentially affect different signal transduction events that involve tumor cell survival, depending upon the aberrations associated with the linked pathway. When a therapy only inhibits a single Class I isoform (e.g., alpelisib, a PI3K- α inhibitor) or only one mTOR kinase complex (e.g., everolimus, an mTORC1 inhibitor), numerous feedforward and feedback loops between the PI3K isoforms and mTOR complexes cross-activate the uninhibited subunits. This, in turn, induces compensatory resistance that reduces the efficacy of isoform specific PI3K or single mTOR kinase complex inhibitors. Inhibiting all four PI3K isoforms and both mTOR complexes, as gedatolisib does, thus prevents the confounding effect of isoform interaction that may occur with isoform-specific PI3K inhibitors and the confounding interaction between PI3K isoforms and mTOR.

- **Better tolerated by patients than oral PI3K and mTOR drugs.**

Gedatolisib is administered intravenously on a four-week cycle of three weeks-on, one week-off, in contrast to the orally administered pan-PI3K or dual PI3K/mTOR inhibitors that are no longer being clinically developed. Oral pan-PI3K or PI3K/mTOR inhibitors have repeatedly been found to induce significant side effects that were not well tolerated by patients. This typically leads to a high proportion of patients requiring dose reductions or treatment discontinuation. The challenging toxicity profile of these drug candidates ultimately played a significant role in the decisions to halt their development, despite showing promising efficacy. By contrast, gedatolisib stabilizes at lower concentration levels in plasma compared to orally administered PI3K inhibitors, resulting in less toxicity, while maintaining concentrations sufficient to inhibit PI3K/mTOR signaling.

Isoform-specific PI3K inhibitors administered orally were developed to reduce toxicities in patients. While the range of toxicities associated with isoform-specific inhibitors is narrower than oral pan-PI3K or PI3K/mTOR inhibitors, administering them orally on a continuous basis still leads to challenging toxicities. The experience with an FDA approved oral p110- α specific inhibitor, PIQRAY, illustrates the challenge. In its Phase 3 pivotal trial, PIQRAY was found to induce a Grade 3 or 4 adverse event ("AE") related to hyperglycemia in 39% of patients evaluated. In addition, 26% of patients discontinued alpelisib due to treatment related AEs. By contrast, in the 103-patient dose expansion portion of the Phase 1b clinical trial with gedatolisib, only 7% of patients experienced Grade 3 or 4 hyperglycemia and less than 9% discontinued treatment.

As of December 31, 2024, 492 patients with solid tumors have received gedatolisib in eight clinical trials sponsored by Pfizer. Of the 492 patients, 129 were treated with gedatolisib as a single agent in three clinical trials. The remaining 363 patients received gedatolisib in combination with other anti-cancer agents in five clinical trials. Additional patients received gedatolisib in combination with other anti-cancer agents in nine investigator sponsored clinical trials.

A Phase 1b trial (B2151009) evaluating patients with HR+/HER2- metastatic breast cancer was initiated in 2016 and subsequently enrolled 138 patients. Four patients from this study continue to receive study treatment, as of December 31, 2024, each of whom have received study treatment for more than five years. The B2151009 clinical trial was an open label, multiple arm Phase 1b clinical trial that evaluated gedatolisib in combination with palbociclib (CDK4/6 inhibitor) and fulvestrant or letrozole in patients with HR+/HER2- advanced breast cancer. Thirty-five patients were enrolled in two dose escalation arms to evaluate the safety and tolerability and to determine the maximum tolerated dose ("MTD") of gedatolisib when used in combination with the standard doses of palbociclib and endocrine therapy (letrozole or fulvestrant). The MTD was determined to be 180 mg administered intravenously once weekly. A total of 103 patients were subsequently enrolled in one of four expansion arms (A, B, C, and D).

High objective overall response rates (“ORR”) were observed in all four expansion arms and were comparable in each arm for PIK3CA wild type (“WT”) and PIK3CA mutant (“MT”) patients. In patients who received prior hormonal therapy alone or in combination with a CDK4/6 inhibitor (Arms B, C, and D), the ORR (including unconfirmed partial responses) ranged from 36% to 77%. In patients who were treatment naïve in the advanced setting (Arm A), the ORR was 85%. Each arm achieved its primary endpoint target, which was reporting higher ORR in the study arm than the ORR from either the PALOMA-2 study (ORR=55%) that evaluated palbociclib plus letrozole for Arm A or the PALOMA-3 study (ORR=25%) that evaluated palbociclib plus fulvestrant for Arms B, C, and D. For all patients enrolled in the expansion portion of the study who had evaluable tumors, the ORR observed was 63%.

Median progression-free survival (PFS) was 12.9 months for patients who received a prior CDK4/6 inhibitor and were treated in the study with the Phase 3 dosing schedule (Arm D). For all treatment naïve patients who received gedatolisib combined with palbociclib plus letrozole in Expansion Arm A and Escalation Arm A (N=41), median PFS was 48.6 months and ORR was 79%. These results compare favorably to published data for current first-line standard-of-care treatments for patients with HR+/HER2-advanced breast cancer.

Gedatolisib combined with palbociclib and endocrine therapy demonstrated a favorable safety profile with manageable toxicity. The majority of treatment emergent adverse events were Grade 1 and 2. The most frequently observed adverse events included stomatitis/mucosal inflammation, the majority of which were Grade 1 and 2. The most common Grade 4 AEs were neutropenia and neutrophil count decrease, which were assessed as related to treatment with palbociclib. No Grade 5 events were reported in this study.

We are currently enrolling patients in a Phase 3, open-label, randomized clinical trial, VIKTORIA-1, to evaluate the efficacy and safety of two regimens in adults with HR+/HER2- advanced breast cancer whose disease has progressed after prior CDK4/6 therapy in combination with an aromatase inhibitor: 1) gedatolisib in combination with palbociclib and fulvestrant; and 2) gedatolisib in combination with fulvestrant. Over two hundred clinical sites in North America, Europe, Latin America, and Asia-Pacific are participating in the study. The first patient was dosed in this trial in December 2022.

The VIKTORIA-1 Phase 3 clinical trial will enable separate evaluation of subjects according to their PIK3CA status. Subjects who meet eligibility criteria and are PIK3CA WT will be randomly assigned (1:1:1) to receive a regimen of either gedatolisib, palbociclib, and fulvestrant (Arm A), gedatolisib and fulvestrant (Arm B), or fulvestrant (Arm C). The WT enrollment target was achieved in the fourth quarter of 2024. Subjects who meet eligibility criteria and are PIK3CA MT will be randomly assigned (3:3:1) to receive a regimen of either gedatolisib, palbociclib, and fulvestrant (Arm D), alpelisib and fulvestrant (Arm E), or gedatolisib and fulvestrant (Arm F). Topline data from Arms A, B and C of this clinical trial are expected in Q2 2025.

We received approval from the FDA in mid-2023 to proceed with the clinical development of gedatolisib in combination with Nubeqa® (darolutamide), an approved androgen receptor inhibitor, for the treatment of patients with metastatic castration resistant prostate cancer (“mCRPC”). We have since initiated a Phase 1b/2 study, CELC-G-201, that is enrolling patients with mCRPC who progressed after treatment with an androgen receptor inhibitor. The first patient was dosed in this trial in February 2024.

In the Phase 1b portion of the clinical trial, Celcuity expects approximately 36 participants will be randomly assigned to receive 600 mg darolutamide combined with either 120 mg gedatolisib in Arm 1 or 180 mg gedatolisib in Arm 2. An additional 12 participants will then be enrolled in the Phase 2 portion of the study at the recommended phase 2 dose (“RP2D”) level to enable evaluation of 30 participants treated with the RP2D of gedatolisib.

The primary objectives of the Phase 1b portion of the trial include assessment of the safety and tolerability of gedatolisib in combination with darolutamide and determination of the recommended Phase 2 dose of gedatolisib. The primary objective of the Phase 2 portion of the trial is to assess the radiographic progression-free survival at six months of patients who received the RP2D. Initial preliminary data for the Phase 1b dose escalation portion of the trial is expected to be available by the end of the second quarter of 2025.

A Phase 3, open-label, randomized clinical trial to evaluate the efficacy and safety of gedatolisib plus a CDK4/6 inhibitor and fulvestrant as first-line treatment for patients with HR+/HER2- advanced breast cancer that is endocrine treatment resistant (“VIKTORIA-2”) is currently activating clinical trial sites. For the CDK4/6 inhibitor, investigators may choose either ribociclib or palbociclib. This multi-center, international trial is expected to enroll approximately 12–36 evaluable subjects in the safety run-in portion of the study to evaluate the safety of gedatolisib when combined with ribociclib and fulvestrant. In the Phase 3 portion of the study, approximately 638 subjects will be randomized and assigned to Cohort 1 (PIK3CA WT) or Cohort 2

(PIK3CA MT) based on their PIK3CA status. Subjects in each cohort will be randomized on a 1:1 basis to either Arm A (gedatolisib with fulvestrant and ribociclib or palbociclib) or Arm B (fulvestrant and ribociclib or palbociclib). It is expected that approximately 200 clinical sites across North America, Europe, Latin America, and Asia-Pacific will participate. The first patient is expected to be dosed in the second quarter of 2025.

Recent Developments

The VIKTORIA-1 Phase 3 clinical trial evaluating gedatolisib in combination with fulvestrant with and without palbociclib in adults with HR+, HER2- advanced breast cancer who have received prior treatment with a CDK4/6 inhibitor is 100% enrolled for the *PIK3CA* wild-type cohort. We expect to provide topline data in Q2 2025.

The VIKTORIA-2 Phase 3 open-label randomized study evaluating the efficacy and safety of gedatolisib in combination with fulvestrant plus a CDK4/6 inhibitor, either ribociclib or palbociclib, in comparison to fulvestrant plus a CDK4/6 inhibitor as a first-line treatment for patients with HR+/HER2- advanced breast cancer who are endocrine therapy resistant remains on track to enroll its first patient in Q2 2025.

In December 2024, Celcuity presented overall survival data from a Phase 1b trial, which evaluated gedatolisib in combination with palbociclib and either letrozole or fulvestrant, in patients with HR+, HER2- advanced or metastatic breast cancer during a poster session at the 2024 San Antonio Breast Cancer Symposium (SABCS). Median overall survival was 77.3 months among patients with HR+, HER2- advanced breast cancer who were treatment-naïve in the advanced setting and 33.9 months among patients previously treated with a CDK4/6 inhibitor.

We have not generated any revenue from sales to date, and we continue to incur significant research and development and other expenses related to our ongoing operations. As a result, we are not and have never been profitable and have incurred losses in each period since we began operations in 2012. For the years ended December 31, 2024 and 2023, we reported a net loss of approximately \$111.8 million and \$63.8 million, respectively. As of December 31, 2024, our cash and cash equivalents and short-term investments were approximately \$235.1 million, and we had an accumulated deficit of approximately \$271.9 million.

RESULTS OF OPERATIONS

Components of Operating Results

Revenue

To date, we have not generated any revenue. With the execution of the Pfizer license agreement in April 2021, whereby we acquired exclusive world-wide licensing rights to develop and commercialize gedatolisib, we initiated a Phase 3 clinical trial, VIKTORIA-1, in 2022 to support potential regulatory approval to market gedatolisib. In August 2023, we initiated a Phase 1b/2 clinical trial, CELC-G-201, and we have initiated a second Phase 3 clinical trial, VIKTORIA-2, with dosing of the first patient planned in Q2 2025 to support submission to the FDA seeking approval for this indication for gedatolisib. If we obtain regulatory approvals to market gedatolisib, we expect to generate revenue from sales of the drug for the treatment of breast cancer patients.

Research and Development

Since our inception, we have primarily focused on research and development of gedatolisib, a PI3K/mTOR targeted therapy, and our CELsignia platform and corresponding tests. Research and development expenses primarily include:

- employee-related expenses related to our research and development activities, including salaries, benefits, recruiting, travel and stock-based compensation expenses;
- laboratory supplies;
- consulting fees paid to third parties;
- clinical trial costs;
- validation costs for gedatolisib;
- facilities expenses; and
- legal costs associated with patent applications.

Internal and external research and development costs are expensed as they are incurred. As we continue development of gedatolisib and manage studies and clinical trials, including the VIKTORIA-1 Phase 3 clinical trial, the CELC-G-201 Phase 1b/2 clinical trial, and the VIKTORIA-2 Phase 3 clinical trial, the proportion of research and development expenses allocated to external spending will grow at a faster rate than expenses allocated to internal expenses.

General and Administrative

General and administrative expenses consist primarily of salaries, benefits and stock-based compensation related to our executive, finance and support functions. Other general and administrative expenses include professional fees for auditing, tax, and legal services associated with being a public company, director and officer insurance, investor relations and travel expenses for our general and administrative personnel.

Sales and Marketing

Expenses and costs related to the initiation and operation of our medical and marketing teams, supply chain and distribution network are being incurred in anticipation of the commercialization of our first drug candidate, gedatolisib. These expenses consist primarily of employee-related expenses, professional and consulting fees related to these functions and operations, software costs, and the acquisition of data required to support our market analysis for our drug product. We would expect to begin to incur sales force, sales support staff and marketing expenses closer to a potential FDA approval date.

Interest Expense

Interest expense is primarily due to a Loan Agreement.

Interest Income

Interest income consists of interest income earned on our cash, cash equivalents and investment balances.

Results of Operations

Comparison of the Years Ended December 31, 2024 and 2023

	Years Ended December 31,		Increase (Decrease)

Research and Development

For the year ended December 31, 2024, our research and development expenses were approximately \$104.2 million, representing an increase of approximately \$43.6 million, or 72%, compared to 2023. Of the \$43.6 million increase in research and development expense, \$30.7 million was primarily related to costs supporting ongoing activities for the VIKTORIA-1 and CELC-G-201 trials and the commencement of the VIKTORIA-2 Phase 3 pivotal trial. The remaining \$12.9 million was related to increased employee and consulting expenses, of which \$0.1 million was in the form of non-cash stock-based compensation.

Conducting a significant amount of research and development is central to our business model. We plan to increase our research and development expenses for the foreseeable future as we seek to develop gedatolisib and manage the VIKTORIA-1 Phase 3 clinical trial, the CELC-G-201 Phase 1b/2 clinical trial, and the VIKTORIA-2 Phase 3 clinical trial.

General and Administrative

For the year ended December 31, 2024, our total general and administrative expenses were \$9.1 million, representing an increase of approximately \$3.4 million, or 61%, compared to 2023. Employee related expenses accounted for \$2.6 million of the \$3.4 million increase. The remaining \$0.8 million of the increase resulted from professional fees, expanding infrastructure and other administrative expenses.

We anticipate that our general and administrative expenses will increase in future periods, reflecting both increased costs in connection with the potential future commercialization of gedatolisib, an expanding infrastructure, and increased professional fees associated with public company regulatory developments and requirements, and other compliance matters.

Interest Expense

For the year ended December 31, 2024, interest expense was \$10.3 million and represents an increase of \$5.0 million compared to 2023. The increase is due primarily to the increased debt balance in 2024 compared to 2023 due to the incremental \$61.7 million funding of Term Loan C in May 2024. The \$10.3 million of interest expense includes \$2.7 million of non-cash interest expense.

Interest Income

For the year ended December 31, 2024, interest income was \$11.8 million and represents an increase of \$4.0 million compared to 2023. The increase was primarily the result of closing on additional equity and debt financing activities in May 2024, leading to higher cash, cash equivalents and short-term investment balances.

LIQUIDITY AND CAPITAL RESOURCES

Since our inception, we have incurred losses and cumulative negative cash flows from operations. Through December 31, 2024, we have funded our operations primarily through private placements and registered offerings of our equity securities and unsecured convertible notes, and borrowings under loan agreements. From inception through December 31, 2024, we raised an aggregate of approximately \$369.0 million of net proceeds through sales of our securities, and as of December 31, 2024 had \$100.0 million of borrowings under loan agreements, not including payable-in-kind interest. In March 2024, an investor exercised 1,739,080 warrants at an exercise price of \$8.05, which generated approximately \$14 million in cash. In March 2025, an investor exercised 695,650 warrants at an exercise price of \$8.05, which generated approximately \$5.6 million in cash. The warrants exercised in March 2024 and 2025 were issued pursuant to a private placement that closed on December 9, 2022. As of December 31, 2024, our cash and cash equivalents and short-term investments were approximately \$22.5 million and \$212.6 million, respectively, and we had an accumulated deficit of approximately \$271.9 million.

*Open Market Sale Agreement*SM. On February 4, 2022, we entered into an Open Market Sale AgreementSM with Jefferies LLC, as agent, pursuant to which we may offer and sell, from time to time, through Jefferies, shares of our common stock having an aggregate offering price of up to \$50.0 million, which amount was subsequently increased to \$125.0 million on December 6, 2024. On October 12, 2022, pursuant to this agreement, the Company sold 500,000 shares of common stock in a single transaction at a price of \$10.35 per share generating gross proceeds of \$5.2 million (\$4.8 million net of commissions and offering expenses). On December 1, 2023, pursuant to this agreement, the Company sold 1,034,500 shares of common stock in a single transaction at a price of \$14.50 per share, generating gross proceeds of \$15.0 million (\$14.4 million net of commissions and offering expenses). In April 2024 and May 2024, pursuant to this agreement, the Company sold 285,714 and 149,700 shares of common stock, respectively, at an average selling price of \$17.55 per share, generating gross proceeds of \$7.6 million before deducting commissions and other offering expenses of \$0.3 million. At December 31, 2024, \$125.0 million of common stock remains available for sale under the Jefferies agreement.

Private Placement. On December 9, 2022, we issued 6,182,574 shares of common stock, 1,120,873 shares of Series A Preferred Stock and warrants exercisable for 6,956,450 shares of common stock to certain institutional and other accredited investors pursuant to a securities purchase agreement entered into on May 15, 2022. Pursuant to the securities purchase agreement, the closing (funding) of the private placement occurred following dosage of the first patient in the Company's Phase 3 study, VIKTORIA-1. Investors purchased shares of common stock and Series A Preferred Stock at a price of \$5.75 per share

(on an as converted to common stock basis), with forty percent (40%) warrant coverage (on an as converted to common stock basis) and customary resale registration rights. The warrants have an exercise price of \$8.05 per share. The private placement generated gross proceeds of approximately \$100.0 million before deducting placement agent fees and other offering expenses of \$4.3 million.

Pre-funded Warrants. On October 18, 2023, the Company entered into a securities purchase agreement to sell pre-funded warrants at a price of \$8.70 per warrant, to purchase up to 5,747,787 shares of the Company's common stock in a private placement. The closing of the private placement occurred on October 20, 2023, and resulted in gross proceeds of approximately \$50.0 million, before deducting offering expenses of approximately \$0.1 million.

Equity Offering. On May 30, 2024, the Company entered into an underwriting agreement with Leerink Partners LLC, TD Securities (USA) LLC and Stifel, Nicolaus & Company, Incorporated as representatives of the several underwriters relating to the issuance and sale of 3,871,000 shares of common stock, at a price to the public of \$15.50, generating gross proceeds of approximately \$60.0 million. The offering closed on May 31, 2024 and resulted in net proceeds to the Company of approximately \$56.3 million after deducting underwriting discounts and other offering expenses payable by the Company. The Company intends to use the net proceeds from the offering for working capital and general corporate purposes, which may include research and development expenditures, clinical trial expenditures, expansion of business development activities and other general corporate purposes.

Loan Agreement. On May 30, 2024, the Company entered into an Amended and Restated Loan and Security Agreement (the "A&R Loan Agreement") with Innovatus Life Sciences Lending Fund I, LP, a Delaware limited partnership ("Innovatus"), as collateral agent, and the Lenders including Innovatus in its capacity as a Lender and Oxford Finance LLC ("Oxford"), pursuant to which Innovatus and Oxford, as Lenders, have agreed to make certain term loans ("Term Loans") to the Company in the aggregate principal amount of up to \$180 million. The A&R Loan Agreement amends and restates, in its entirety, that certain Loan and Security Agreement, dated April 8, 2021, as amended, between the Company and Innovatus, as collateral agent, and the Lenders named therein (the "Prior Loan Agreement").

Funding of the first \$100 million under the A&R Loan Agreement occurred on May 30, 2024, including tranche payments of \$16.8 million (the "Term A Loan") and \$21.5 million (the "Term B Loan") reflecting repayment of the principal amount of loans under the Prior Loan Agreement plus accrued payment-in-kind interest, in addition to \$61.7 million of new borrowings (the "Term C Loan"). The Company will be eligible to draw on a fourth tranche of \$30 million (the "Term D Loan") and fifth tranche of \$50 million (the "Term E Loan"), in each case upon achievement of certain clinical trial milestones and satisfaction of certain financial covenants determined on a pro forma as-funded basis. The Lenders may, in their sole discretion upon the Company's request, make additional term loans to the Company of \$45 million (the "Term F Loan"). Funding of these additional tranches is also subject to other customary conditions and limits on when the Company can request funding for such tranches. Costs associated with the new borrowings were approximately \$2.4 million.

Pursuant to the A&R Loan Agreement, the Company is entitled to make interest-only payments for thirty-six months, or up to forty-eight months if certain conditions are met. The Term Loans will mature on May 1, 2029 and will bear interest at a rate equal to the sum of (a) the greater of (i) the Prime Rate (as defined in the A&R Loan Agreement) or (ii) 7.75%, plus (b) 2.85%, provided that 1.0% of such interest will be payable in-kind by adding an amount equal to such 1.0% of the outstanding principal amount to the then outstanding principal balance on a monthly basis through May 31, 2027. The A&R Loan Agreement is secured by all assets of the Company. Proceeds will be used for working capital purposes and to fund the Company's general business requirements, including the Phase 3 VIKTORIA-2 clinical trial. The A&R Loan Agreement contains customary representations and warranties and covenants, subject to customary carve-outs, and includes financial covenants related to liquidity and other financial measures. Innovatus has the right, at its election and until August 9, 2025, to convert up to 20% of the outstanding principal of the Term A Loan into shares of the Company's common stock at a price per share of \$10.00 (the "Conversion Right"). Innovatus will continue to have the right to exercise a previously disclosed warrant granted to it under the Prior Loan Agreement to purchase 26,042 shares of common stock at a price per share of \$14.40 through April 8, 2031.

The A&R Loan Agreement contains a Final Fee, which is equal to 4.5% of the initial funding of the agreement and is due on the earliest to occur of (a) the Maturity Date, (b) the acceleration of any Term Loan, and (c) the prepayment of the Term Loans. There is also a contingent non-utilization fee for both the Term D and Term E loans. If the Company achieves the Term D Milestone and (i) fails to draw the full amount of the Term D Loan during the Term D Draw Period and (ii) fails to notify Collateral Agent, at any time before the date that is four weeks after the Company's achievement of the Term D Milestone, of the Company's intent not to draw the full amount of the Term D Loan, a non-utilization fee of \$900,000, with respect to the Term D Loan shall become due and payable on the earliest of (i) the termination of the Term D Draw Period, (ii) the Maturity

Date, (iii) the acceleration of any Term Loan, and (iv) the prepayment in whole of the Term Loans. If the Company achieves the Term E Milestone and (i) fails to draw the full amount of the Term E Loan during the Term E Draw Period and (ii) fails to notify Collateral Agent, at any time before the date that is four weeks after the Company's achievement of the Term E Milestone, of the Company's intent not to draw the full amount of the Term E Loan, a non-utilization fee of \$1,500,000, with respect to the Term E Loan shall become due and payable on the earliest of (i) the termination of the Term E Draw Period, (ii) the Maturity Date, (iii) the acceleration of any Term Loan, and (iv) the prepayment in whole of the Term Loans. After the 18-month anniversary of the Effective Date, the Company shall have the option to prepay all, but not less than all, of the Term Loans advanced by the Lenders under the A&R Loan Agreement, provided the Company (i) provides written notice to Collateral Agent of its election to prepay the Term Loans at least seven Business Days prior to such prepayment, and (ii) pays to Lenders on the date of such prepayment, payable to each Lender in accordance with its respective Pro Rata Share, an amount equal to the sum of (A) all outstanding principal of the Term Loans plus accrued and unpaid interest thereon through the prepayment date, (B) the Final Fee, (C) the Prepayment Fee, plus (D) all other outstanding Obligations that are due and payable, including, without limitation, Lenders' Expenses and interest at the Default Rate with respect to any past due amounts. At May 30, 2024, the Company recognized the Final Fee of \$4.5 million as additional debt principal and a corresponding debt discount to be amortized over the life of the loan.

In connection with the funding of each of the Term C Loan, the Term D Loan, the Term E Loan and the Term F Loan, the Company agreed to issue to Innovatus and Oxford warrants to purchase that number of shares of the Company's common stock equal to 2.5% of the principal amount of the applicable Term Loan divided by the exercise price, which shall, with respect to the Term C Loan, be equal to the lower of (i) the volume weighted average closing price of the Company's common stock for the five-trading day period ending on the last trading day immediately preceding the execution of the A&R Loan Agreement or (ii) the closing price on the last trading day immediately preceding the execution of the A&R Loan Agreement. Accordingly, on May 30, 2024, the Company issued 103,876 warrants with an exercise price of \$14.84 per share. The relative fair value of the warrants was approximately \$1.2 million. For the additional Term Loans, the exercise price will be based on the lower of (i) the exercise price for the Warrants issued pursuant to the Term C Loan or (ii) the volume weighted average closing price of the Company's common stock for the five-trading day period ending on the last trading day immediately preceding the applicable Term Loan funding. The Warrants may be exercised on a cashless basis and are exercisable through the tenth anniversary of the applicable funding date. The number of shares of common stock for which each Warrant is exercisable and the associated exercise price are subject to certain proportional adjustments as set forth in such Warrant.

We expect that our research and development and general and administrative expenses will increase as we continue to develop gedatolisib, manage the VIKTORIA-1 Phase 3 clinical trial, the CELC-G-201 Phase 1b/2 trial, and the VIKTORIA-2 Phase 3 trial, conduct other studies and clinical trials, and pursue other business development activities. We would also expect to incur sales and marketing expenses as we commercialize gedatolisib. We expect to use cash on hand, together with the funds to be received under the debt and equity financings described above, to fund our research and development expenses, clinical trial costs, capital expenditures, working capital, sales and marketing expenses, and general corporate expenses.

Based on our current business plan, we believe that our current cash, cash equivalents and short-term investments together with available borrowings under the Innovatus Loan Agreement will provide sufficient cash to finance our clinical development program activities through 2026.

Our expectations as to how long our current capital resources will be sufficient to fund our operations are based on assumptions that may not be accurate, and we could use our current capital resources sooner than we currently expect. In addition, we may seek to raise additional capital to finance capital expenditures and operating expenses over the next several years as we launch our integrated therapeutic and companion diagnostic strategy and expand our infrastructure, commercial operations and research and development activities, and to take advantage of financing or other opportunities that we believe to be in the best interests of the Company and our stockholders. Additional capital may be raised through the sale of common or preferred equity or convertible debt securities, entry into debt facilities or other third-party funding arrangements. The sale of equity and convertible debt securities may result in dilution to our stockholders and those securities may have rights senior to those of our common shares. Agreements entered into in connection with such capital raising activities could contain covenants that would restrict our operations or require us to relinquish certain rights. Additional capital may not be available on reasonable terms, or at all.

Cash Flows

The following table sets forth the primary sources and uses of cash for the years ended December 31:

	December 31,	
	2024	2023
Net cash (used in) provided by:		
Operating activities.....	\$ (83,466,743)	\$ (53,812,253)
Investing activities.....	(63,069,283)	(5,008,207)
Financing activities.....	138,388,075	64,911,677
Net (decrease) increase in cash and cash equivalents.....	<u>\$ (8,147,951)</u>	<u>\$ 6,091,217</u>

Operating Activities

Net cash used in operating activities was approximately \$83.5 million for the year ended December 31, 2024 and consisted primarily of a net loss of approximately \$111.8 million, partially offset by working capital changes of \$18.3 million and non-cash expense items of approximately \$10.0 million. Non-cash expense items of approximately \$10.0 million primarily consisting of \$7.0 million of stock-based compensation expense, net non-cash interest income and expense of \$2.8 million, and depreciation expense of \$0.1 million. The approximately \$18.3 million of working capital changes was primarily due to increases in accrued expenses and accounts payable, and a decrease in other current assets.

Net cash used in operating activities was approximately \$53.8 million for the year ended December 31, 2023 and consisted primarily of a net loss of approximately \$63.8 million, partially offset by working capital changes of \$3.9 million and non-cash expense items of approximately \$6.1 million. Non-cash expense items of approximately \$6.1 million primarily consisted of \$4.9 million of stock-based compensation expense, non-cash interest expense of \$2.1 million and depreciation expense of \$0.1 million, partially offset by \$1.0 million of accrued interest income. The approximately \$3.9 million of working capital changes was primarily due to increases in accounts payable and accrued expenses, offset by an increase in other current assets.

Investing Activities

Net cash used in investing activities for the year ended December 31, 2024 was approximately \$63.1 million and consisted of approximately \$62.8 million of net purchases of short-term investments in government securities (U.S. Treasury Bills and U.S. government securities) and approximately \$0.3 million in purchases of property and equipment.

Net cash used in investing activities for the year ended December 31, 2023 was approximately \$5.0 million and consisted of approximately \$4.9 million of net purchases of short-term investments in government securities (U.S. Treasury Bills and U.S. government securities) and approximately \$0.1 million in purchases of property and equipment.

Financing Activities

Net cash provided by financing activities for the year ended December 31, 2024 was approximately \$138.4 million and primarily consisted of net proceeds of approximately \$59.2 million from incremental debt financing, \$56.3 million from an equity offering and \$7.3 million from an at-the market offering. The remaining \$15.6 million consisted of proceeds from the exercise of common stock warrants, the exercise of employee stock options and employee stock purchases, slightly offset by payments for a secondary registration statement costs.

Net cash provided by financing activities for the year ended December 31, 2023 was approximately \$64.9 million and primarily consisted of net proceeds from a pre-funded warrant offering and at-the-market offering, collectively totaling \$64.4 million. The remaining \$0.5 million was the result of proceeds from the exercise of employee stock options, the exercise of warrants, and proceeds from employee stock purchases, slightly offset by payments for secondary registration statement and debt issuance costs.

RECENT ACCOUNTING PRONOUNCEMENTS

From time-to-time new accounting pronouncements are issued by the Financial Accounting Standards Board or other standard setting bodies and adopted by us as of the specified effective date. Unless otherwise discussed in Note 2 to our financial statements included elsewhere in this Annual Report, we believe that the impact of recently issued standards that are not yet effective will not have a material impact on our financial position or results of operations upon adoption.

CRITICAL ACCOUNTING POLICIES AND USE OF ESTIMATES

Our management's discussion and analysis of financial condition and results of operations is based on our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States, or Generally Accepted Accounting Principles ("U.S. GAAP"). The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported expenses during the reporting periods. These items are monitored and analyzed by us for changes in facts and circumstances, and material changes in these estimates could occur in the future. We base our estimates on historical experience and on various other factors that we believe are reasonable under the circumstances; the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Changes in estimates are reflected in reported results for the period in which they become known. Actual results may differ materially from these estimates.

Our significant accounting policies are more fully described in Note 2 to our financial statements included elsewhere in this Annual Report. Of our significant accounting policies, we believe that the following are the most critical:

Stock-Based Compensation

Our stock-based compensation consists of common stock options and restricted stock issued to certain employees and non-employees and our Employee Stock Purchase Plan ("ESPP"). We recognize compensation expense based on an estimated grant date fair value using the Black-Scholes option-pricing method for equity-based awards and the Monte Carlo simulation model for the performance-based awards. We have elected to account for forfeitures as they occur.

The inputs for the Black-Scholes valuation model require management's significant assumptions. Prior to our IPO, the price per share of common stock was determined by our board based on recent prices of common stock sold in private offerings. Subsequent to the IPO, the price per share of common stock is determined by using the closing market price on the Nasdaq Capital Market on the grant date. The risk-free interest rates are based on the rate for U.S. Treasury securities at the date of grant with maturity dates approximately equal to the expected life at the grant date. The expected life was based on the simplified method in accordance with SEC Staff Accounting Bulletin Nos. 107 and 110. The expected volatility was estimated based on historical volatility information of peer companies that are publicly available in combination with our calculated volatility since being publicly traded.

All assumptions used to calculate the grant date fair value of non-employee options are generally consistent with the assumptions used for options granted to employees. In the event we terminate any of our consulting agreements, the unvested options issued in connection with such agreements would also be cancelled.

For grants of restricted stock, we record compensation expense based on the quoted fair value of the shares on the grant date over the requisite service period. Compensation expense for ESPP rights is recorded in line with each respective offering period.

Clinical Trial Costs

The Company records prepaid assets or accrued expenses for prepaid or estimated clinical trial costs conducted by third-party service providers, which includes the conduct of preclinical studies and clinical trials. These costs can be a significant component of the Company's research and development expenses. The Company primarily relies on a compilation of progress reports from third-party service providers, including the respective invoicing, to record actual expenses, along with determining changes to prepaid assets and accrued liabilities. To date, the Company believes utilization of third-party reports most accurately reflects expenses incurred. With the ongoing VIKTORIA-1 Phase 3 trial and the CELC-G-201 Phase 1b/2 trial, and the commencement of the VIKTORIA-2 Phase 3 trial site activation and patient enrollment, the Company's estimated expenses in future periods and the actual services performed may vary from these estimates, and these estimates may become more significant. Changes in these estimates that result in material changes to the Company's prepaid assets or accrued expenses could materially affect the Company's results of operations.

ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk

As a smaller reporting company, we are not required to provide disclosure pursuant to this item.

ITEM 8. Financial Statements and Supplementary Data

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and
Stockholders of Celcuity Inc.

Opinion on the Financial Statements

We have audited the accompanying balance sheets of Celcuity Inc. (the Company) as of December 31, 2024 and 2023, and the related statements of operations, changes in stockholders' equity, and cash flows for each of the years in the two-year period ended December 31, 2024, and the related notes (collectively referred to as the financial statements). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2024, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

Critical audit matters are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. We determined that there were no critical audit matters.

/s/ Boulay LLP

We have served as the Company's auditor since 2017.

CELCUITY INC.
NOTES TO FINANCIAL STATEMENTS

1. Organization

Nature of Business

Celcuity Inc., a Delaware corporation (the “Company”) is a clinical-stage biotechnology company focused on the development of targeted therapies for the treatment of multiple solid tumor indications. The Company’s lead therapeutic candidate is gedatolisib, a potent, well-tolerated, small molecule reversible inhibitor, administered intravenously, that selectively targets all Class I isoforms of phosphatidylinositol-3-kinase (“PI3K”) and the two mechanistic targets of rapamycin (“mTOR”) sub-complexes, mTORC1 and mTORC2. Gedatolisib’s mechanism of action and pharmacokinetic properties are differentiated from other currently approved and investigational therapies that target PI3K or mTOR alone or together. A Phase 3 clinical trial, VIKTORIA-1, evaluating gedatolisib in combination with fulvestrant with or without palbociclib in patients with HR+/HER2- advanced breast cancer is currently enrolling patients. Site selection and activation activities for a Phase 3 clinical trial, VIKTORIA-2, evaluating gedatolisib in combination with a CDK4/6 inhibitor and fulvestrant as first-line treatment for patients with HR+/HER2- advanced breast cancer has commenced. The first patient is expected to be dosed in the second quarter of 2025. A Phase 1b/2 clinical trial, CELC-G-201, evaluating gedatolisib in combination with darolutamide in patients with metastatic castration resistant prostate cancer, is currently underway. The Company was co-founded in 2012 by Brian F. Sullivan and Dr. Lance G. Laing and is based in Minnesota. The Company has not generated any revenues to date.

2. Basis of Presentation, Summary of Significant Accounting Policies and Recent Accounting Pronouncements

Basis of Presentation

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”) and pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). Operating results for the year ended December 31, 2024 are not necessarily indicative of results to be expected for any future year.

Accounting Estimates

Management uses estimates and assumptions in preparing these financial statements in accordance with U.S. GAAP. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Actual results could differ from those estimates and the difference could be material. Significant items subject to such estimates and assumptions include the valuation of stock-based compensation and prepaid or accrued clinical trial costs.

Cash and Cash Equivalents

The Company maintains its accounts at two financial institutions. At times throughout the year, the Company’s cash balances may exceed amounts insured by the Federal Deposit Insurance Corporation. At December 31, 2024 and December 31, 2023, the Company had \$22,514,823 and \$30,662,774, respectively, in business checking accounts and money market funds that are considered cash equivalents and not insured by the Federal Deposit Insurance Corporation.

Investments

The Company maintains its investments in U.S. governmental agency securities and U.S. treasury bills and has classified them as held-to-maturity at the time of purchase. Held-to-maturity purchases are those securities in which the Company has the ability and intent to hold until maturity. Held-to-maturity securities are recorded at amortized cost, adjusted for the amortization or accretion of premiums and discounts. Premiums and discounts are amortized or accreted over the life of the related held-to-maturity security using a straight-line method. The difference between the carrying value, which is based on cost, and the aggregate fair value of the held-to-maturity securities, was immaterial as of December 31, 2024. At December 31, 2024 and December 31, 2023, the Company had \$212,588,960 and \$149,919,974, respectively, of short-term investments.

Property and Equipment

Property and equipment are stated at cost. Depreciation is provided over estimated useful lives using the straight-line method. Maintenance and repairs are expensed as incurred; major improvements and betterments are capitalized.

Estimated useful lives of property and equipment are as follows for the major classes of assets:

<u>Asset Description</u>	<u>Estimated Lives</u>
Furniture and Equipment	4-5
Leasehold Improvements	2-3

Long-Lived Assets

Long-lived assets, such as property and equipment, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If circumstances require a long-lived asset or asset group be tested for possible impairment, the Company first compares undiscounted cash flows expected to be generated by that asset or asset group to its carrying value. If the carrying value of the long-lived asset or asset group is not recoverable on an undiscounted cash flow basis, an impairment is recognized to the extent that the carrying value exceeds its fair value. Fair value is determined through various valuation techniques including discounted cash flow models, quoted market values, and third-party independent appraisals, as considered necessary.

Deferred Transaction Costs

Deferred transaction costs primarily consist of legal fees that are capitalized as incurred and will be offset against the proceeds from future equity financing arrangements. The deferred transaction costs will be reviewed periodically to assess the probability that future securities will be offered. In the event that no future offering will occur, any deferred transaction costs will be expensed. Total costs incurred, but not accounted for as a reduction in equity, were \$235,379 and \$0 as of December 31, 2024 and 2023, respectively.

Debt Issuance Costs

The Company recognizes debt issuance costs as deferred costs, which are capitalized and amortized over the term of the related debt using the effective interest method. These costs primarily consist of fees, commissions, legal, and other costs directly attributable to securing debt financing. Debt issuance costs are reported as a direct reduction of the carrying amount of the related debt on the balance sheets. Amortization of these costs is recorded as interest expense in the statements of operations over the life of the debt instrument.

Comprehensive Loss

Comprehensive loss includes net loss as well as other changes in stockholders' equity that result from transactions and economic events other than those with stockholders. For all periods presented, there was no difference between net loss and comprehensive loss.

Risks and Uncertainties

The Company is subject to risks common to companies in the development stage including, but not limited to, dependency on the clinical and commercial success of its initial drug product, gedatolisib, the ability to obtain regulatory approval for gedatolisib, the need for substantial additional financing to achieve its goals, uncertainty of broad adoption of its approved products, if any, by physicians and consumers, and significant competition.

Fair Value of Financial Instruments

The Company's accounting for fair value measurements of assets and liabilities that are recognized or disclosed at fair value in the financial statements on a recurring or nonrecurring basis adheres to the Financial Accounting Standards Board ("FASB") fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to measurements involving significant unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1 Inputs: Unadjusted quoted prices in active markets for identical assets or liabilities accessible to the Company at the measurement date.
- Level 2 Inputs: Other than quoted prices included in Level 1 inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.
- Level 3 Inputs: Unobservable inputs for the asset or liability used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at measurement date.

The level in the fair value hierarchy within which a fair value measurement in its entirety falls, is based on the lowest level input that is significant to the fair value measurement in its entirety.

The carrying values of cash equivalents, accounts payable, accrued expenses and other financial working capital items approximate fair value at December 31, 2024 and December 31, 2023, due to the short maturity nature of these items.

Income Taxes

The Company accounts for income taxes using the asset and liability method, as required by the accounting standard for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, as well as net operating loss and tax credit carryforwards. Deferred taxes are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred taxes of a change in tax rates is recognized in results of operations in the period that includes the enactment date. The effects of any future changes in tax laws or rates have not been considered. The Company regularly reviews deferred tax assets to assess their potential realization and establish a valuation allowance for portions of such assets to reduce the carrying value if the Company does not consider it to be more likely than not that the deferred tax assets will be realized.

The Company recognizes the impact of an uncertain tax position in its financial statements if, in management's judgment, the position is more-likely-than-not sustainable upon audit based on the position's technical merits. This involves the identification of potential uncertain tax positions, the evaluation of applicable tax laws and an assessment of whether a liability for an uncertain tax position is necessary.

Stock-Based Compensation

The Company's stock-based compensation consists of stock options and restricted stock issued to certain employees and non-employees of the Company and the Company's 2017 Employee Stock Purchase Plan. The Company recognizes compensation expense based on an estimated grant date fair value using the Black-Scholes option-pricing method for equity-based awards and the Monte Carlo simulation model for performance-based awards. If the factors change and different assumptions are used, the Company's stock-based compensation expense could be materially different in the future. The Company recognizes stock-based compensation expense for these options on a straight-line basis over the requisite service period. The Company has elected to account for forfeitures as they occur.

Research and Development

Research and development costs are expensed as incurred. Research and development costs amounted to \$104,203,230 for the year ended December 31, 2024 and \$60,594,005 for the year ended December 31, 2023.

Clinical Trial Costs

The Company relies on third parties to conduct certain aspects of clinical studies and to formulate and manufacture our drug product. While there are alternative vendors that can perform these functions, any disruption or delay by the Company's current third parties in carrying out their contractual duties could delay the clinical trials. The Company records prepaid assets or accrued expenses for prepaid or estimated clinical trial costs conducted by third-party service providers, which includes the conduct of preclinical studies and clinical trials. These costs can be a significant component of the Company's research and development expenses. The Company primarily relies on a compilation of progress reports from third-party service providers, including the respective invoicing, to record actual expenses, along with determining changes to prepaid assets and accrued liabilities. To date, the Company believes utilization of third-party reports most accurately reflects expenses incurred. With the ongoing VIKTORIA-1 Phase 3 trial and the CELC-G-201 Phase 1b/2 trial, and the commencement of the VIKTORIA-2 Phase 3 clinical trial site activation and patient enrollment anticipated in Q2 2025, the Company's estimated expenses in future periods and actual services performed may vary from these estimates, and these estimates may become more significant. Changes in these estimates that result in material changes to the Company's prepaid assets or accrued expenses could materially affect the Company's results of operations and financial position.

Segment Data

In November 2023, the FASB issued ASU 2023-07: Improvements to Reportable Segment Disclosures. This ASU, which amends Topic 280: *Segment Reporting*, improves disclosure requirements for reportable segments and enhances disclosures for companies with single reportable segments. The Company has a single reportable segment based on the nature of its operations. The nature of business and the accounting policies of the segment are the same as described throughout Notes 1 and 2. The Company's Chief Operating Decision Maker ("CODM") is its executive team. The CODM assesses the reportable segment's performance and allocates resources for the reportable segment based on net income and total assets, which are the same amounts in all material respects as those reported on the statements of operations and balance sheets. The Company adopted the standard on January 1, 2024. The adoption did not have a material impact on the Company's financial statements.

3. Liquidity

Based on the Company's cash and cash equivalents and short-term investments on hand at December 31, 2024 of \$22,514,823 and \$212,588,960, respectively, the Company believes that its cash and short-term investments will be sufficient to fund the Company's current operating plan through at least the next 12 months from the issuance date of this Annual Report.

4. Net Loss Per Common Share

Basic and diluted net loss per common share is determined by dividing net loss attributable to common stockholders by the weighted-average common shares outstanding during the period. For all periods presented, the common shares underlying the preferred stock, options, warrants, and restricted stock have been excluded from the calculation because their effect would be anti-dilutive. Therefore, the weighted-average shares outstanding used to calculate both basic and diluted loss per common share are the same.

The following table summarizes the potentially-dilutive shares excluded from the diluted weighted-average shares outstanding:

	December 31,	
	2024	2023
Potentially-dilutive shares excluded from diluted weighted-average shares outstanding:		
Preferred stock on an as-if-converted to common stock	3,175,770	8,541,340
Options to purchase common stock	4,306,977	2,815,392
Warrants to purchase common stock	5,521,152	7,263,733
Restricted common stock	1,079	1,958
Total	<u>13,004,978</u>	<u>18,622,423</u>

Pre-funded warrant shares of 5,747,787 are included in the computation of basic and diluted net loss per share for the years ended December 31, 2024 and 2023, as the pre-funded warrants are issuable for nominal consideration.

5. Investments

The following table summarizes the Company's held-to-maturity investment securities at amortized cost as of December 31, 2024 and 2023:

December 31, 2024				
	Amortized Cost, as Adjusted	Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Estimated Fair Value
U.S. Treasury Bills	\$ 212,588,960	\$ 82,251	\$ -	\$ 212,671,211
Total	<u>\$ 212,588,960</u>	<u>\$ 82,251</u>	<u>\$ -</u>	<u>\$ 212,671,211</u>

December 31, 2023				
	Amortized Cost, as Adjusted	Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Estimated Fair Value
U.S. Treasury Bills	\$ 149,919,974	\$ 30,995	\$ -	\$ 149,950,969
Total	<u>\$ 149,919,974</u>	<u>\$ 30,995</u>	<u>\$ -</u>	<u>\$ 149,950,969</u>

The fair value of the Company's held-to-maturity debt securities is determined based upon inputs, other than the quoted prices in active markets, that are observable either directly or indirectly, and are classified as Level 2 fair value instruments.

6. Other Current Assets

Other current assets consisted of the following at December 31:

	2024	2023
Current:		
Prepaid clinical trial costs.....	\$6,768,668	\$ 8,763,150
Miscellaneous receivable.....	1,600,621	805,882
Directors & officers' insurance	256,629	157,453
Other.....	841,329	281,364
Total.....	<u>\$9,467,247</u>	<u>\$10,007,849</u>

7. Property and Equipment

Property and equipment consisted of the following at December 31:

	2024	2023
Furniture and equipment	\$ 2,025,875	\$ 1,788,195
Leasehold improvements	302,577	302,577
	<u>2,328,452</u>	<u>2,090,772</u>
Less: Accumulated depreciation	(1,991,937)	(1,861,990)
Total	<u>\$ 336,515</u>	<u>\$ 228,782</u>

Depreciation expense was \$129,947 and \$142,772 for the years ended December 31, 2024 and 2023, respectively.

8. Accrued Expenses

Accrued expenses consisted of the following at December 31:

	2024	2023
Clinical trial costs	\$ 16,708,499	\$ 6,464,772
Accrued compensation	3,987,786	1,763,316
Other	1,384,803	641,512
Employee stock purchase plan	103,860	57,494
Total	<u>\$ 22,184,948</u>	<u>\$ 8,927,094</u>

9. Commitments

Operating and Finance Leases

The Company leases its corporate space in Minneapolis, Minnesota, with an operating lease in place through April 30, 2026. The lease provides for monthly rent, real estate taxes, and operating expenses. Rent expense is recorded on a straight-line basis over the lease term. In March 2023, the Company signed the fourth amendment to extend this lease through April 30, 2026. This amendment provides for monthly rent, real estate taxes and operating expenses.

In May 2018, the Company entered into a non-cancelable finance lease agreement for office equipment with a five-year term. The underlying assets are included in furniture and equipment. The lease contains a bargain purchase option at the end of the lease. The finance lease expired in May 2023 and the equipment was acquired for the bargain purchase option price.

When an implicit rate is not provided, the Company uses its incremental borrowing rate based on the information available at the lease commencement date in determining the present value of the lease payments.

Supplemental balance sheet information consisted of the following at December 31, 2024:

Operating Lease	
Right-of-use assets	\$ 215,502
Operating lease liability	\$ 225,921
Less: short term portion	(171,952)
Long term portion	<u>\$ 53,969</u>

Maturity analysis under lease agreements consisted of the following as of December 31, 2024:

	Operating Leases
2025	\$ 220,389
2026	74,170
Total minimum lease payments	<u>294,559</u>
Less: Present value discount	(68,638)
Present value of net minimum lease payments	<u>\$ 225,921</u>

Financing cash outflow from finance leases	-	2,449
	<u>\$ 324,783</u>	<u>\$ 311,367</u>

Clinical Research Studies

The Company enters into contracts in the normal course of business to conduct research and development programs internally and through third parties that include, among others, arrangements with vendors, consultants, CMOs, and CROs. The Company has a license agreement in place with Pfizer to research, develop, manufacture and commercialize gedatolisib. In conjunction with the license agreement, the Company completed a Phase 1b clinical trial – B2151009 related to gedatolisib. These patients subsequently transitioned to an Expanded Access study – CELC-G-001. Contracts related to the Expanded Access study are generally based on time and material. In addition, contracts related to the Company's Phase 3 clinical studies (VIKTORIA-1 and VIKTORIA-2) and the Phase 1b/2 clinical trial (CELC-G-201) are generally cancelable with reasonable notice within 120 days and the Company's obligations under these contracts are primarily based on services performed through termination dates plus certain cancellation charges, if any, as defined in each of the respective agreements. In addition, these agreements may, from time to time, be subjected to amendments as a result of any change orders executed by the parties. As of December 31, 2024, the Company had five material non-cancelable contractual commitments with respect to these arrangements, which totaled approximately \$9.7 million.

10. Stockholders' Equity

Capital Stock

At December 31, 2023, the Company's authorized capital stock consisted of 65,000,000 shares of \$.001 par value common stock, of which 25,506,012 shares were outstanding, and 2,500,000 shares of \$.001 par value preferred stock, of which 854,134 shares were outstanding.

In 2024, several of the Company's preferred shareholders elected to convert 536,557 shares of Series A Convertible Preferred Stock into 5,365,570 shares of common stock, in accordance with the Securities Purchase Agreement dated May 15, 2022. The cost basis of the shares transferred is \$5.75 per share.

In 2024, several of the Company's investors exercised 1,827,357 common stock warrants at exercise prices ranging between \$8.05 and \$9.50 per share, which generated approximately \$14.7 million in cash. The 1,827,357 common stock warrants were net of shares withheld for exercise price.

At December 31, 2024, the Company's authorized capital stock consisted of 95,000,000 shares of common stock, of which 37,143,242 shares were outstanding, and 2,500,000 shares of preferred stock, including 1,850,000 shares designated as Series A Preferred Stock, of which 317,577 shares were outstanding. As of December 31, 2024, no dividends have been declared on the Company's capital stock.

Sale and Issuance of Stock

On April 22, 2024, pursuant to an Open Market Sale AgreementSM with Jefferies LLC, as agent, the Company sold 285,714 shares of common stock in a single transaction at a price of \$17.50 per share, generating gross proceeds of \$5.0 million.

On May 8, 2024, pursuant to an Open Market Sale Agreement with Jefferies LLC, as agent, the Company sold 149,700 shares of common stock in a single transaction at a price of \$17.65 per share, generating gross proceeds of \$2.6 million.

Commissions and other offering expenses related to the Open Market Sale Agreement transactions in April and May 2024 were \$0.3 million.

On May 30, 2024, the Company entered into an underwriting agreement with Leerink Partners LLC, TD Securities (USA) LLC and Stifel, Nicolaus & Company, Incorporated as representatives of the several underwriters relating to the issuance and sale of 3,871,000 shares of common stock, at a price to the public of \$15.50, generating gross proceeds of approximately \$60.0 million. The offering closed on May 31, 2024 and resulted in net proceeds to the Company of approximately \$56.3 million after deducting underwriting discounts and other offering expenses payable by the Company. The Company intends to use the net proceeds from the offering for working capital and general corporate purposes, which may include capital expenditures, research and development expenditures, clinical trial expenditures, expansion of business development activities and other general corporate purposes.

Pre-Funded Warrants

On October 18, 2023, the Company entered into a securities purchase agreement (the “Securities Purchase Agreement”) with certain investors (the “Investors”) pursuant to which the Company agreed to sell to the Investors in a private placement pre-funded warrants to purchase up to 5,747,787 shares of the Company’s common stock, par value \$0.001 per share. Each Warrant to purchase one share had a purchase price of \$8.699 per share, and an exercise price of \$0.001 per share for the common stock issuable upon exercise of the Warrant.

The closing of the Private Placement occurred on October 20, 2023, and resulted in gross proceeds to the Company of approximately \$50.0 million, before deducting offering expenses of approximately \$0.1 million.

Each Warrant is immediately exercisable and will not expire. Under the terms of the Warrants, the Company may not effect the exercise of any such Warrant, and a holder will not be entitled to exercise any portion of any Warrant, if, upon giving effect to such exercise, the aggregate number of shares of common stock beneficially owned by the holder (together with its affiliates, other persons acting or who could be deemed to be acting as a group together with the holder or any of the holder’s affiliates, and any other persons whose beneficial ownership of common stock would or could be aggregated with the holder’s or any of the holder’s affiliates for purposes of Section 13(d) or Section 16 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) would exceed 4.99% of the number of shares of common stock outstanding immediately after giving effect to the exercise, as such percentage ownership is calculated in accordance with Section 13(d) of the Exchange Act and the applicable regulations of the SEC (the “Maximum Percentage”). A holder may reset the Maximum Percentage to a higher percentage (not to exceed 19.99%), effective 61 days after written notice to the Company, or a lower percentage, effective immediately upon written notice to the Company. Any such increase or decrease will apply only to that holder and not to any other holder of Warrants.

The Securities Purchase Agreement contains customary representations, warranties and agreements by the Company, customary conditions to closing, indemnification obligations of the Company, other obligations of the parties and termination provisions.

Warrants

**At December 31,
2024:**

Total Warrants Outstanding		11,268,939		

At December 31, 2024 and 2023, the Company had warrants to purchase 11,268,939 and 13,011,520 shares of common stock outstanding, at a weighted average exercise price of \$4.04 and \$4.53, respectively. A total of 1,842,913 and 2,369 warrants were exercised in the years ended December 31, 2024 and 2023, respectively. There were 3,544 warrants that expired in 2024.

11. Stock-Based Compensation

2012 Equity Incentive Plan

The 2012 Equity Incentive Plan, as amended, was adopted by the Company’s board and approved by the members of Celcuity LLC on August 10, 2012. The Company reserved a maximum of 625,000 shares of common stock for issuance under the 2012 Equity Incentive Plan. The 2012 Equity Incentive Plan provides for options, restricted stock awards, performance stock awards or stock bonuses. The exercise price of each option granted under the 2012 Equity Incentive Plan is not less than 100% of the

fair market value of one share on the date of grant. The maximum permitted term of options granted under the 2012 Equity Incentive Plan is ten years. The Company's board administers the 2012 Equity Incentive Plan and determines the provisions of incentive awards, including eligible recipients, number of shares subject to an incentive award, exercise price, vesting schedule, duration of an incentive award and other restrictions an incentive award may be subject to. The 2012 Equity Incentive Plan was frozen on September 6, 2017 and new awards are issued under the terms of the 2017 Amended and Restated Stock Incentive Plan.

2017 Stock Incentive Plan

The 2017 Amended and Restated Stock Incentive Plan (the "2017 Plan") was adopted by the Company's board on September 6, 2017, became effective following the corporate conversion on September 15, 2017, and was approved by stockholders at the Company's annual stockholder meeting on May 10, 2018. The 2017 Plan was amended and approved by stockholders at the Company's annual stockholder meeting on May 14, 2020. The Company initially reserved a maximum of 750,000 shares of common stock for issuance under the 2017 Plan. The number of shares reserved for issuance was automatically increased by 255,060 and 216,673 shares on January 1, 2024 and 2023, respectively, and will increase automatically on January 1 of each of 2025 through 2027 by the number of shares equal to 1.0% of the aggregate number of outstanding shares of Company common stock as of the immediately preceding December 31. However, the Company's board may reduce the amount of the increase in any particular year. At each of the Annual Meetings held on May 12, 2021 and May 12, 2022, the stockholders approved a 500,000 increase for a total of 1,000,000 increase, to the number of shares reserved for issuance under the 2017 Plan. At each of the Annual Meetings held on May 11, 2023 and May 9, 2024, the stockholders approved 1,500,000 increases for a total increase of 3,000,000 to the number of shares reserved for issuance under the 2017 Plan. The 2017 Plan provides for options, restricted stock awards, stock appreciation rights, restricted stock units, performance awards and stock bonuses. The exercise price of each option granted under the 2017 Plan is not less than 100% of the fair market value of one share on the date of grant. The maximum permitted term of options granted under the 2017 Plan is ten years. The 2017 Plan is generally administered by the compensation committee of the Company's board, which has the authority to interpret the 2017 Plan, grant awards and make all other determinations necessary for the administration of the 2017 Plan.

The following table summarizes the activity for all stock options outstanding for the years ended December 31:

	2024		2023	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Options outstanding at beginning of year	2,815,392	\$ 7.95	1,976,586	\$ 6.34
Granted	1,716,729	16.14	1,003,298	10.69
Exercised	(103,245)	7.45	(98,695)	3.94
Forfeited	(121,899)	11.57	(65,797)	7.45
Balance at December 31:	<u>4,306,977</u>	<u>\$ 11.13</u>	<u>2,815,392</u>	<u>\$ 7.95</u>
Options exercisable at December 31:	<u>2,011,474</u>	<u>\$ 7.35</u>	<u>1,524,731</u>	<u>\$ 6.44</u>
Weighted Average Grant Date Fair Value for options granted during the year:		\$ 11.22		\$ 7.48

The following table summarizes additional information about stock options outstanding and exercisable at December 31, 2024:

Options Outstanding				Options Exercisable		
Options Outstanding	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Aggregate Intrinsic Value	Options Exercisable	Weighted Average Exercise Price	Aggregate Intrinsic Value
4,306,977	7.96	\$ 11.13	\$ 13,914,458	2,011,474	\$ 7.35	\$ 11,781,660

The Company recognized stock-based compensation expense for stock options of \$6,626,402 and \$4,716,475 for the years ended December 31, 2024 and 2023, respectively. In May 2022, the Company modified the exercise price on 776,324 stock option awards to \$5.50, the closing market price on the Nasdaq Capital Market on May 17, 2022. The effect of this modification on stock-based compensation was \$106,000 and \$134,000 for the years ended December 31, 2024 and 2023, respectively. The effect of this modification on stock-based compensation over the remaining service period will be approximately \$57,000. In December 2021, the Company modified the exercise price on 311,000 stock option awards to \$13.44, the closing market price on the Nasdaq Capital Market on December 15, 2021. No director or officer awards were modified. The effect on stock-based compensation was \$63,000 and \$65,000 for the years ended December 31, 2024 and 2023, respectively. The effect on stock-

based compensation over the remaining service period will be approximately \$35,000. In May 2020, the Company modified the exercise price on 203,750 stock option awards to \$5.10, the closing market price on the Nasdaq Capital Market on May 14, 2020. No director or officer awards were modified. The effect on stock-based compensation was \$696 and \$19,000 for the years ended December 31, 2024 and 2023, respectively. There is no effect on stock-based compensation remaining.

The Black-Scholes option-pricing model was used to estimate the fair value of equity-based awards and the Monte Carlo simulation model was used to estimate the fair value of the performance-based awards, with the following weighted-average assumptions for the years ended December 31:

	<u>2024</u>	<u>2023</u>
Risk-free interest rate	3.48% - 4.71%	3.41% - 4.86%
Expected volatility	71.2% - 76.20%	77.1% - 79.8%
Expected life (years)	5.25 to 10.00	5.25 to 6.08
Expected dividend yield.....	0%	0%

The inputs for the Black-Scholes valuation model and the Monte Carlo simulation model require management's significant assumptions. Prior to the Company's initial public offering, the price per share of common stock was determined by the Company's board based on recent prices of common stock sold in private offerings. Subsequent to the initial public offering, the price per share of common stock is determined by using the closing market price on the Nasdaq Capital Market on the grant date. The risk-free interest rates are based on the rate for U.S. Treasury securities at the date of grant with maturity dates approximately equal to the expected life at the grant date. The expected life is based on the simplified method for the time-based awards and the life of the option for the performance-based awards, in accordance with the SEC Staff Accounting Bulletin Nos. 107 and 110. The expected volatility is estimated based on historical volatility information of peer companies that are publicly available in combination with the Company's calculated volatility since being publicly traded for the time-based awards. For the performance-based awards, the Company's full historical volatility was used to value the options.

All assumptions used to calculate the grant date fair value of non-employee options are generally consistent with the assumptions used for options granted to employees. In the event the Company terminates any of its consulting agreements, the unvested options issued in connection with the agreements would also be cancelled.

The Company had 1,079 and 1,958 shares of restricted stock outstanding at December 31, 2024 and 2023, respectively, and 2,308 and 3,273 shares of restricted stock vested during the years ended December 31, 2024 and 2023, respectively. The Company recognized stock-based compensation expense for restricted stock of \$22,220 and \$18,499 for the years ended December 31, 2024 and 2023, respectively.

The total remaining shares available for grant under the Company's 2017 Plan as of December 31, 2024 was 1,177,450.

Total unrecognized compensation cost related to stock options and restricted stock is estimated to be recognized at December 31:

2025	\$ 7,776,307
2026	6,307,024
2027	5,165,880
2028	1,964,136
Total estimated compensation cost to be recognized	<u>\$21,213,347</u>

2017 Employee Stock Purchase Plan

The Company's 2017 Employee Stock Purchase Plan (the "ESPP") was adopted by the Company's board on September 6, 2017 and approved by stockholders at the Company's annual stockholder meeting on May 10, 2018. The Company initially reserved a total of 100,000 shares for issuance under the ESPP. The number of shares reserved for issuance was automatically increased by 127,530 and 108,337 shares on January 1, 2024 and 2023, respectively and will increase automatically on each subsequent January 1 by the number of shares equal to 0.5% of the total outstanding number of shares of Company common stock as of the immediately preceding December 31. However, the Company's board may reduce the amount of the increase in any particular year. The total remaining shares available for issuance under the employee stock purchase plan as of December 31, 2024 is 360,950.

The ESPP provides participating employees with an opportunity to purchase shares of the Company's common stock at a discount through payroll deductions. The ESPP is available to all employees unless they are employed for less than 20 hours per week or own 5% or more of the total combined voting power or value of the Company's common stock. The ESPP is administered using overlapping 24 month offering periods, referred to as an Offering Period. Each Offering Period has four six-month purchase periods. A new Offering Period and purchase period begin every six months on May 1 and November 1 of each year. Participating employees may purchase common stock, on a voluntary after tax-basis, at a price equal to 85% of the fair market value of a share of common stock on either the offering date or the purchase date, whichever is lower. If the purchase date has a lower price, the employee will automatically be placed in the Offering Period beginning immediately after the purchase date. The Company recognized stock-based compensation expense related to the ESPP of \$339,719 and \$166,460 for the years ended December 31, 2024 and 2023, respectively.

The Company recognized total stock-based compensation expense as follows for the years ended December 31:

	Years Ended December 31:	
	2024	2023
Stock-based compensation expense in operating expenses:		
Research and development	\$ 4,404,518	\$ 2,700,318
General and administrative	2,583,823	2,201,116
Total.....	<u>\$ 6,988,341</u>	<u>\$ 4,901,434</u>

12. Debt

On May 30, 2024, the Company entered into an Amended and Restated Loan and Security Agreement (the "A&R Loan Agreement") with Innovatus Life Sciences Lending Fund I, LP, a Delaware limited partnership ("Innovatus"), as collateral agent, and the Lenders including Innovatus in its capacity as a Lender and Oxford Finance LLC ("Oxford"), pursuant to which Innovatus and Oxford, as Lenders, have agreed to make certain term loans ("Term Loans") to the Company in the aggregate principal amount of up to \$180 million. The A&R Loan Agreement amends and restates, in its entirety, that certain Loan and Security Agreement, dated April 8, 2021, as amended, between the Company and Innovatus, as collateral agent, and the Lenders named therein (the "Prior Loan Agreement").

Funding of the first \$100 million under the A&R Loan Agreement occurred on May 30, 2024, including tranche payments of \$16.8 million (the "Term A Loan") and \$21.5 million (the "Term B Loan") reflecting repayment of the principal amount of loans under the Prior Loan Agreement plus accrued payment-in-kind interest, in addition to \$61.7 million of new borrowings (the "Term C Loan"). The Company will be eligible to draw on a fourth tranche of \$30 million (the "Term D Loan") and fifth tranche of \$50 million (the "Term E Loan"), in each case upon achievement of certain clinical trial milestones and satisfaction of certain financial covenants determined on a pro forma as-funded basis. The Lenders may, in their sole discretion upon the Company's request, make additional term loans to the Company of \$45 million (the "Term F Loan"). Funding of these additional tranches is also subject to other customary conditions and limits on when the Company can request funding for such tranches. Costs associated with the new borrowings was approximately \$2.4 million.

Pursuant to the A&R Loan Agreement, the Company is entitled to make interest-only payments for thirty-six months, or up to forty-eight months if certain conditions are met. The Term Loans will mature on May 1, 2029 and will bear interest at a rate equal to the sum of (a) the greater of (i) the Prime Rate (as defined in the A&R Loan Agreement) or (ii) 7.75%, plus (b) 2.85%, provided that 1.0% of such interest will be payable in-kind by adding an amount equal to such 1.0% of the outstanding principal amount to the then outstanding principal balance on a monthly basis through May 31, 2027. The A&R Loan Agreement is secured by all assets of the Company. Proceeds will be used for working capital purposes and to fund the Company's general business requirements, including the Phase 3 VIKTORIA-2 clinical trial. The A&R Loan Agreement contains customary representations and warranties and covenants, subject to customary carve-outs, and includes financial covenants related to liquidity and other financial measures. Innovatus has the right, at its election and until August 9, 2025, to convert up to 20% of the outstanding principal of the Term A Loan into shares of the Company's common stock at a price per share of \$10.00 (the "Conversion Right"). Innovatus will continue to have the right to exercise a previously disclosed warrant granted to it under the Prior Loan Agreement to purchase 26,042 shares of common stock at a price per share of \$14.40 through April 8, 2031.

The A&R Loan Agreement contains a Final Fee, which is equal to 4.5% of the initial funding of the agreement and is due on the earliest to occur of (a) the Maturity Date, (b) the acceleration of any Term Loan, and (c) the prepayment of the Term Loans. There is also a contingent non-utilization fee for both the Term D and Term E loans. If the Company achieves the Term D Milestone and (i) fails to draw the full amount of the Term D Loan during the Term D Draw Period and (ii) fails to notify

Collateral Agent, at any time before the date that is four weeks after the Company's achievement of the Term D Milestone, of the Company's intent not to draw the full amount of the Term D Loan, a non-utilization fee of \$900,000, with respect to the Term D Loan shall become due and payable on the earliest of (i) the termination of the Term D Draw Period, (ii) the Maturity Date, (iii) the acceleration of any Term Loan, and (iv) the prepayment in whole of the Term Loans. If the Company achieves the Term E Milestone and (i) fails to draw the full amount of the Term E Loan during the Term E Draw Period and (ii) fails to notify Collateral Agent, at any time before the date that is four weeks after the Company's achievement of the Term E Milestone, of the Company's intent not to draw the full amount of the Term E Loan, a non-utilization fee of \$1,500,000, with respect to the Term E Loan shall become due and payable on the earliest of (i) the termination of the Term E Draw Period, (ii) the Maturity Date, (iii) the acceleration of any Term Loan, and (iv) the prepayment in whole of the Term Loans. After the 18-month anniversary of the Effective Date, the Company shall have the option to prepay all, but not less than all, of the Term Loans advanced by the Lenders under the A&R Loan Agreement, provided the Company (i) provides written notice to Collateral Agent of its election to prepay the Term Loans at least seven Business Days prior to such prepayment, and (ii) pays to Lenders on the date of such prepayment, payable to each Lender in accordance with its respective Pro Rata Share, an amount equal to the sum of (A) all outstanding principal of the Term Loans plus accrued and unpaid interest thereon through the prepayment date, (B) the Final Fee, (C) the Prepayment Fee, plus (D) all other outstanding Obligations that are due and payable, including, without limitation, Lenders' Expenses and interest at the Default Rate with respect to any past due amounts. At May 30, 2024, the Company recognized the Final Fee of \$4.5 million as additional debt principal and a corresponding debt discount to be amortized over the life of the loan.

In connection with the funding of each of the Term C Loan, the Term D Loan, the Term E Loan and the Term F Loan, the Company agreed to issue to Innovatus and Oxford warrants to purchase that number of shares of the Company's common stock equal to 2.5% of the principal amount of the applicable Term Loan divided by the exercise price, which shall, with respect to the Term C Loan, be equal to the lower of (i) the volume weighted average closing price of the Company's common stock for the five-trading day period ending on the last trading day immediately preceding the execution of the A&R Loan Agreement or (ii) the closing price on the last trading day immediately preceding the execution of the A&R Loan Agreement. Accordingly, on May 30, 2024, the Company issued 103,876 warrants with an exercise price of \$14.84 per share. The relative fair value of the warrants was approximately \$1.2 million. For the additional Term Loans, the exercise price will be based on the lower of (i) the exercise price for the Warrants issued pursuant to the Term C Loan or (ii) the volume weighted average closing price of the Company's common stock for the five-trading day period ending on the last trading day immediately preceding the applicable Term Loan funding. The Warrants may be exercised on a cashless basis and are exercisable through the tenth anniversary of the applicable funding date. The number of shares of common stock for which each Warrant is exercisable and the associated exercise price are subject to certain proportional adjustments as set forth in such Warrant.

The Company evaluated the change of terms under ASC 470-50, "Debt – Modification and Extinguishment", and concluded the change in terms did not result in significant and consequential changes to the economic substance of the debt and thus resulted in a modification of the debt and not an extinguishment of the debt.

Long-term debt consisted of the following at December 31, 2024 and 2023:

	2024	2023
Note payable	\$ 100,000,000	\$ 35,000,000
Add: Final fee	4,500,000	-
Add: PIK interest (added to principal)	593,288	2,565,660
Less: unamortized debt issuance costs	(1,613,734)	(480,810)
Less: unamortized debt discount	(5,752,418)	(49,439)
Total long-term debt	<u>\$ 97,727,136</u>	<u>\$ 37,035,411</u>

Future principal payments, including the incurred PIK interest and Final Fee, are as follows:

	<u>Years Ending December 31,</u>
2027	\$ 30,615,349
2028	52,483,455
2029	21,994,484
Total	<u>\$ 105,093,288</u>

13. Income Taxes

Following the conversion of Celcuity LLC to Celcuity Inc. on September 15, 2017, Celcuity Inc. began filing federal and state returns where required. No income tax benefit was recorded for the years 2024 and 2023, due to net losses and recognition of a valuation allowance. The following table presents a reconciliation of the tax expense computed at the statutory federal rate and the Company's tax expense for the years ended December 31:

	<u>2024</u>	<u>2023</u>
Tax benefit at statutory federal rate.....	\$ (23,474,000)	\$ (13,394,000)
State income tax benefit, net of federal tax effect	(95,000)	(82,000)
Change in valuation allowance on deferred tax assets	24,081,000	13,542,000
Research & Development Credits	(1,236,000)	(550,000)
Other permanent items	724,000	484,000
Income tax benefits.....	<u>\$ -</u>	<u>\$ -</u>

Deferred income taxes reflect the net effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company's deferred tax assets relate primarily to its net operating loss carryforwards and other balance sheet basis differences. In accordance with ASC 740, "Income Taxes," the Company recorded a valuation allowance to fully offset the net deferred tax asset, because it is more likely than not that the Company will not realize future benefits associated with these deferred tax assets at December 31, 2024. The tax effects of temporary differences and carryforwards that give rise to significant portions of the deferred tax assets are at December 31:

	<u>2024</u>	<u>2023</u>
Deferred tax assets (liabilities):		
Accrued expenses.....	\$ 459,000	\$ 207,000
Share-based compensation	2,861,000	2,141,000
Property and equipment	420,000	393,000
Right-of-use assets	(45,000)	(85,000)
Lease liability.....	48,000	87,000
IRC 174 Expenditures.....	30,133,000	13,900,000
Start-up expenditures	12,998,000	11,029,000
Net operating losses and tax credits	13,340,000	8,461,000
Valuation allowance.....	(60,214,000)	(36,133,000)
Net deferred tax assets	<u>\$ -</u>	<u>\$ -</u>

At December 31, 2024, the Company had federal and state net operating loss carryforwards of approximately \$43.2 million and \$0.8 million, respectively. The federal and state net operating loss carryforwards for 2017 will begin to expire in the year ending December 31, 2037. The federal net operating loss carryforwards starting in 2018 have no expiration. These deferred tax assets were subject to a full valuation allowance as of December 31, 2024 and December 31, 2023.

At December 31, 2024, the Company had federal and state research and development tax credit carryforwards resulting in deferred tax assets of approximately \$2.9 million and \$1.6 million, respectively. The federal and state credit carryforwards will begin to expire in the years ending December 31, 2038 and December 31, 2033, respectively. These deferred tax assets were subject to a full valuation allowance as of December 31, 2024 and December 31, 2023.

Under the provisions of Section 382 of the Internal Revenue Code of 1986, certain substantial changes in the Company's ownership, including a sale of the Company, or significant changes in ownership due to sales of equity, may limit in the future the amount of net operating loss carryforwards available to offset future taxable income.

The Company recognizes uncertain tax positions in accordance with ASC 740 on the basis of evaluating whether it is more-likely-than not that the tax positions will be sustained upon examination by tax authorities. For those tax positions that meet the more-likely-than not recognition threshold, we recognize the largest amount of tax benefit that is more than 50 percent likely to be realized upon ultimate settlement. As of December 31, 2024, and 2023, the Company has no significant uncertain tax positions. There are no unrecognized tax benefits included on the balance sheet that would, if recognized, impact the effective tax rate. The Company does not anticipate there will be a significant change in unrecognized tax benefits within the next 12 months.

Prior to the conversion, Celcuity was a limited liability company and therefore was taxed as a partnership for income tax purposes. Accordingly, no benefit for income taxes was recorded prior to the conversion.

For years prior to 2021, the Company is no longer subject to U.S. federal or state income tax examinations and remains open for the unutilized tax attributes as of December 31, 2024, carried forward from these years. The Company's policy is to recognize interest and penalties related to uncertain tax positions as a component of general and administrative expenses.

14. Subsequent Event

In January 2025, the Board of Directors approved a repricing of certain outstanding stock options previously granted to employees. As of the repricing date, the exercise prices of these options were reduced to \$11.92 per share, from their previous exercise prices ranging from \$12.80 to \$18.73 per share. This adjustment was made in response to the decline in the company's stock price, with the intent of retaining and motivating key employees. As a result of this repricing, approximately 837,000 stock options held by 44 employees were affected. The repriced options will continue to vest according to their original schedule.

In March 2025, an investor exercised 695,650 warrants at an exercise price of \$8.05, which generated approximately \$5.6 million in cash. The warrants were issued pursuant to a private placement that closed and was funded on December 9, 2022.

ITEM 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

ITEM 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of December 31, 2024. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Based on the evaluation of our disclosure controls and procedures as of December 31, 2024, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective.

Management Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. Management has assessed the effectiveness of our internal control over financial reporting as of December 31, 2024 based on criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO – 2013”) in Internal Control-Integrated Framework. Based on this assessment, our Chief Executive Officer and Chief Financial Officer concluded that our system of internal control over financial reporting was effective as of such date.

This Annual Report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management’s report was not subject to attestation by our registered public accounting firm pursuant to our designation as a small reporting company or SRC and Non-Accelerated filer.

Changes in Internal Control over Financial Reporting

There were no changes to our system of internal control over financial reporting during the three months ended December 31, 2024 that have materially affected, or are reasonably likely to materially affect, our system of internal controls over financial reporting.

ITEM 9B. Other Information

On November 19, 2024, Brightstone Venture Capital Fund, LP (“Brightstone”) adopted a 10b5-1 plan that provided for the sale of up to 220,000 shares of Celcuity Inc. common stock through November 19, 2025. This plan was terminated on December 12, 2024. On December 13, 2024, Brightstone adopted a 10b5-1 plan that provides for the sale of up to 229,325 shares of Celcuity Inc. common stock through December 13, 2025. David Dalvey is a General Partner at Brightstone.

During the three months ended December 31, 2024, none of our other directors or officers (as defined in Rule 16a-1(f) of the Exchange Act) adopted or terminated a “Rule 10b5-1 trading arrangement” or “non-Rule 10b5-1 trading arrangement,” as each term is defined in Item 408 of Regulation S-K.

On March 28, 2025, the Compensation Committee of the Board of Directors (the “Committee”) of the Company adopted the Celcuity Inc. Change in Control and Severance Plan (the “Severance Plan”). The purpose of the Severance Plan is to provide assurances to employees of the Company of specified benefits in the event of a Change in Control of the Company (as defined in the Company’s equity plan) or certain terminations of employment following a Change in Control. The Severance Plan covers all regular full or part-time employees of the Company, including each executive officer of the Company. The Committee is responsible for administering the Severance Plan. The Severance Plan may be amended or terminated at any time prior to a Change in Control.

In the event of a participant’s involuntary termination of employment without cause or resignation for good reason (as such terms are defined in the Severance Plan) within the twelve-month period following a Change in Control, the Severance Plan provides for: (i) a severance payment in an amount ranging from three months to three years of the participant’s base salary and target cash bonus, plus (ii) COBRA premiums for the participant and their enrolled dependents for the same time period, but no greater than eighteen months, both payable in a lump sum.

The amount of severance provided under the Severance Plan is: three years for the Company’s chief executive officer; two years for the Company’s other executive officers; one year for the Company’s other executives that are not executive officers; six months for the Company’s vice presidents; and for all other participants, the greater of (i) three months or (ii) two weeks per each full year of employment, with a maximum of six months.

In addition, the Severance Plan provides that in the event of a Change in Control, all outstanding equity awards held by any participant will fully vest (with performance awards vesting at the greater of target or actual performance levels) immediately upon the effective date of such change in control.

The foregoing description of the Severance Plan does not purport to be complete and is qualified in its entirety by reference to the full text of the Severance Plan, which is filed as Exhibit 10.35 hereto and is incorporated herein by reference.

ITEM 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

ITEM 10. Directors, Executive Officers and Corporate Governance

Directors

Brian F. Sullivan, age 63, is our co-Founder and has served as Chairman of the Board and Chief Executive Officer since we commenced operations in 2012. Mr. Sullivan has over 30 years of experience founding and building successful, high-growth technology companies. He was Chairman and CEO of SterilMed, a medical device reprocessing company, from 2003, when he led an investment group to acquire a majority interest, until its sale to Ethicon Endo-Surgery Inc., a Johnson & Johnson company, for \$330 million in 2011. Previously, he was co-founder and Chief Executive Officer of Recovery Engineering, a filtration company, which he took public and subsequently sold to Procter & Gamble for \$265 million in 1999. Mr. Sullivan previously served on the board of directors of two publicly-held companies, Entegris, Inc. and Virtual Radiologic Inc. Mr. Sullivan has received nine U.S. patents and has several pending. He graduated *magna cum laude* with distinction from Harvard College with an A.B. in economics. Among other attributes, skills, and qualifications, the board of directors believes Mr. Sullivan is uniquely qualified to serve as a director based on his extensive operational and business development experience, and his knowledge in building stockholder value, growing a company from inception and navigating significant corporate transactions and the public company process.

Lance G. Laing, Ph.D., age 63, is our co-Founder and has served as Chief Science Officer, Vice President, Secretary and Director since we commenced operations in 2012. Dr. Laing's career spans more than 20 years in drug discovery research and technology development. He received his doctorate in biophysics and biochemistry from The Johns Hopkins University and completed a National Institutes of Health post-doctoral fellowship at Washington University Medical School. He has received 24 U.S. patents and has several U.S. patents pending. His drug discovery research career began at Scriptgen/Anadys Pharmaceuticals (purchased by Novartis), where he worked under Professor Peter Kim, who became President of Merck Research. He also was Director of Chemistry and Bioapplications and Director of Detection Product Development for two companies that each developed instruments similar to those Celcuity uses to perform the CELsignia tests. His work at these two instrument companies gave him unique expertise and experience in developing a variety of patented applications for these instruments. Most recently, he served as an executive director for an international drug discovery and development company. Among other attributes, skills, and qualifications, the board of directors believes Dr. Laing is uniquely qualified to serve as a director based on his significant research, medical and scientific expertise.

Richard E. Buller, M.D., Ph.D., age 75, was appointed to Celcuity's board of directors in December 2019. Dr. Buller has over 15 years of experience leading oncology clinical development and translational medicine departments at major pharmaceutical companies. He has participated in the development of 15 drugs and several companion diagnostics that received U.S. FDA approval. Dr. Buller most recently served as Head Oncology Clinical Development and Vice President of Translational Oncology at Pfizer, Inc., one of the world's largest pharmaceutical companies, until he retired in 2016. He had previously served as Vice President of Translational Medicine at Exelixis, a leading biopharmaceutical company, where he led efforts to study patients selected by molecular testing for inclusion in their phase 2 and phase 3 clinical trials. He began his pharmaceutical company career at GlaxoSmithKline as Director of the Oncology Medicine Development Center. Prior to his leadership positions in drug development, he was Professor of Gynecologic Oncology at the University of Iowa, where he led laboratory research focused on identifying genomic variants involved in ovarian cancer. He received his M.D. from the Baylor College of Medicine, where he also received his Ph.D. in cell biology. Among other attributes, skills, and qualifications, the board of directors believes Dr. Buller is uniquely qualified to serve as a director based on his oncology drug and diagnostic development expertise.

David F. Dalvey, age 66, has served as a member of Celcuity's board of directors since February 2014. Mr. Dalvey has more than 30 years of experience in the fields of corporate finance and venture capital, working primarily with growth-oriented technology and life-science businesses. He has over 10 years of corporate finance advisory experience with two national investment banks, completing over 150 individual transactions. He has been the General Partner of Brightstone Venture Capital, a venture capital management company, since September 2000. Brightstone is a 25-year old venture capital management company that has raised and managed ten venture partnerships. Previously, he held management positions with R.J. Steichen and Company, an investment bank, from 1995 to 2000, The Food Fund LP, a venture capital firm, from 1992 to 1995 and Wessels, Arnold & Henderson, an investment bank, from 1987 to 1992. Mr. Dalvey served on the board of directors for Navarre Corporation (now Speed Commerce, Inc.) from 2009 until November 2012, on the board of managers for Blue Rock Market Neutral Fund, a mutual fund registered under the Investment Company Act of 1940 from 2000 to 2014 and on the board of directors for Digitiliti, Inc. from July 2011 until October 2012. Mr. Dalvey has significant operational exposure as a board director or advisor to many other public and privately held growth businesses and has served on these companies' audit,

strategic or governance committees, including companies such as HomeSpotter, Definity Health, AppTec Laboratories, CHF Solutions, BiteSquad, Agiliti, and Nature Vision. Mr. Dalvey received a B.S. in Business/Management Economics from University of Minnesota. Among other attributes, skills, and qualifications, the board of directors believes Mr. Dalvey is uniquely qualified to serve as a director based on his leadership experience in operating both public and private companies and his experience working in the investment community and with investment firms, which enable him to bring valuable insight and knowledge to our board of directors.

Leo T. Furcht, M.D., age 78, was appointed to Celcuity's board of directors in May 2019. Dr. Furcht is currently Allen-Pardee Professor of Cancer Biology and Head of the Department of Laboratory Medicine and Pathology at the University of Minnesota and a member of the Division of Molecular Pathology and Genomics. He served as Chairman of the Board of Directors for University of Minnesota Physicians, the Medical School practice plan with approximately 700 physicians, from 2004-2014. He was also the founding Director of the Biomedical Engineering Center from 1990-2001, where he led efforts to establish stem cell and molecular diagnostics expertise at the University of Minnesota. He has published more than 180 scientific papers and holds more than 30 patents in the fields of polypeptides, biomaterials, and adult stem cells. His business experience includes co-founding two medical technology companies, South Bay Medical, a medical device company that was acquired by Mentor Corporation, and Diascreen, a diagnostics company, which was later acquired by Chronimed. Among other attributes, skills, and qualifications, the board of directors believes Dr. Furcht is uniquely qualified to serve as a director based on his research in tumor cell behavior and extracellular matrix proteins, Head of the University of Minnesota's Department of Laboratory Medicine and Pathology, and his experience in several biotechnology start-ups.

Polly A. Murphy, D.V.M., Ph.D., age 60, was appointed to Celcuity's board of directors in September 2022. Dr. Murphy has served as Chief Business Officer at Avadel Pharmaceuticals plc since May 2024. Prior to that, Dr. Murphy was Chief Business Officer at UroGen Pharma, Inc. from August 2020 through May 2024 and served in various leadership roles at Pfizer Inc. from September 2008 to August 2020, including as Vice President and Head of Early Commercial Development, Pfizer Oncology Business Unit from January 2019 to August 2020, Vice President and Head of Global Marketing and Commercial Development, Pfizer Oncology Business Unit from June 2017 to December 2018, and Vice President and Head of Strategy and Business Development for Pfizer China from November 2013 to May 2018. Since August 2020, Dr. Murphy has served on the board of directors of Atea Pharmaceuticals, Inc., a publicly held company. Dr. Murphy received her D.V.M. and Ph.D. from Iowa State University and her M.B.A. from Nova Southeastern University. Among other attributes, skills, and qualifications, the board of directors believes Dr. Murphy is uniquely qualified to serve as a director based on her significant medical and scientific expertise and experience in the pharmaceutical industry in business development and commercialization.

Richard J. Nigon, age 77, is currently Senior Vice President of Cedar Point Capital, LLC., a private company that raises capital for early-stage companies, where he has served since 2007. Mr. Nigon has also been a board member for Northern Technologies International Corp. since February 2010, including its non-executive Chairman of the board of directors since November 2012. Mr. Nigon also serves as a director of several private companies. Mr. Nigon previously served as a board member for Tactile Systems Technology from September 2012 to May 2022, Vascular Solutions, Inc. from November 2000 to February 2017, when it was acquired by Teleflex, Incorporated and as a board member for Virtual Radiologic Corporation from May 2007 until it was acquired in July 2010. From February 2001 until December 2006, Mr. Nigon was a Director of Equity Corporate Finance for Miller Johnson Steichen Kinnard, a privately held investment firm, which was acquired in December 2006 by Stifel Nicolaus, a brokerage and investment banking firm. After that acquisition, Mr. Nigon became a Managing Director of Private Placements of Stifel Nicolaus until May 2007. From February 2000 to February 2001, Mr. Nigon served as the Chief Financial Officer of Dantis, Inc., a web hosting company. Prior to joining Dantis, Mr. Nigon was employed by Ernst & Young LLP from 1970 to 2000, where he served as a partner from 1981 to 2000. While at Ernst & Young, Mr. Nigon served as the Director of Ernst & Young's Twin Cities Entrepreneurial Services Group and was the coordinating partner on several publicly-traded companies in the consumer retailing and manufacturing sectors. Among other attributes, skills, and qualifications, the board of directors believes Mr. Nigon is qualified to serve as a director because of his extensive public accounting and auditing experience, including particular experience with emerging growth companies. The board of directors also believes that Mr. Nigon will bring to the board of directors a strong background in financial controls and reporting, financial management, financial analysis, SEC reporting requirements and mergers and acquisitions. His strategic planning expertise gained through his management and leadership roles at private investment firms also makes him well-suited to serve as a member of the board of directors.

Executive Officers

Information regarding our Chief Executive Officer, Brian F. Sullivan, and our Chief Science Officer, Lance G. Laing, PhD., is included above under the heading "Directors".

Vicky Hahne, age 58, joined as our Chief Financial Officer in July 2017. She has more than 25 years of financial leadership experience, including the most recent 15 years in the healthcare industry. Prior to joining Celcuity, Ms. Hahne served as Controller of Respiratory Technologies Inc., a medical device manufacturer, from 2015 to 2017. While at Respiratory Technologies, she played a key role in the due diligence process to sell the company to Koninklijke Philips. In 2014, she served as Controller for Ability Network Inc., a healthcare information technology company. From 2007 to 2012, Ms. Hahne served as Controller of SterilMed Inc., a medical device reprocessing company, where she was significantly involved in the sale of the company to Johnson & Johnson. Prior to these roles, Ms. Hahne held several senior financial positions at SimonDelivers Inc., including Chief Financial Officer. Ms. Hahne has extensive experience in early stage, high growth companies with responsibilities including financial controls and stewardship, financial analysis, mergers and acquisitions, building infrastructure and systems. She received a B.S. degree in Finance and Accounting from Northern State University and received her CPA certificate in 1990.

Corporate Governance

Our board of directors has adopted a Code of Ethical Business Conduct that applies to our directors, officers and employees. In addition, our CEO, CFO and other senior financial officers of the company are subject to a Code of Ethical Business Conduct for Senior Financial Officers. These Codes are available on the corporate governance section of our website (which is a subsection of the investor relations section of our website) at the following address: www.celcuity.com. We intend to disclose on our website any amendments or waivers to these codes that are required to be disclosed by SEC or Nasdaq rules.

Additional information required by this Item 10 will be contained in our definitive proxy statement for our 2025 Annual Meeting of Stockholders (the “Definitive Proxy Statement”) under the captions “Corporate Governance,” and “Meetings and Committees of the Board of Directors” and is incorporated herein by reference.

ITEM 11. Executive Compensation

The information required by this Item 11 will be contained in the Definitive Proxy Statement under the captions “Corporate Governance,” “Executive Compensation” and “Director Compensation” and is incorporated herein by reference.

ITEM 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item 12 will be contained in the Definitive Proxy Statement under the captions “Beneficial Ownership of Common Stock” and “Securities Authorized for Issuance under Equity Compensation Plans” and is incorporated herein by reference.

ITEM 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this Item 13 will be contained in the Definitive Proxy Statement under the captions and “Corporate Governance” and “Certain Relationships and Related Transactions” and is incorporated herein by reference.

ITEM 14. Principal Accountant Fees and Services

The information required by this Item 14 will be contained in the Definitive Proxy Statement under the caption “Proposal No. 2, Ratification of Appointment of Independent Registered Public Accounting Firm” and is incorporated herein by reference.

**Description of Registrant's Securities
Registered Pursuant to Section 12 of the
Securities Exchange Act of 1934, as amended**

The following summary of the terms of our capital stock is subject to and qualified in its entirety by reference to our certificate of incorporation, as amended, and bylaws, copies of which are on file with the SEC as exhibits to previous SEC filings.

As of December 31, 2024, Celcuity Inc. (“we,” “us,” “our,” and the “Company”) had one class of securities registered under Section 12 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”): common stock, par value \$0.001 per share. In addition, we have certain equity interests outstanding that are convertible into common stock, which are described in more detail below.

As of December 31, 2024, we were authorized to issue 95,000,000 shares of common stock and 2,500,000 shares of preferred stock, \$0.001 par value per share.

Common Stock

Fully Paid and Nonassessable

The outstanding shares of our common stock are fully paid and nonassessable.

Voting Rights

Each holder of common stock is entitled to one vote for each share on all matters submitted to a vote of the stockholders.

Dividend Rights

Holders of our common stock are entitled to receive ratably any dividends that our board of directors may declare out of funds legally available for that purpose.

Rights and Preferences

Holders of our common stock have no preemptive, conversion, subscription or other rights, and there are no redemption or sinking fund provisions applicable to our common stock.

Right to Liquidation Distributions

Upon our liquidation, dissolution or winding-up, the assets legally available for distribution to our stockholders would be distributable ratably among the holders of our common stock and any participating preferred stock outstanding at that time, subject to prior satisfaction of all outstanding debt and liabilities and the preferential rights of and the payment of liquidation preferences, if any, on any outstanding shares of preferred stock, including the liquidation preference of our Series A Preferred Stock.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is Continental Stock Transfer & Trust Company. The transfer agent and registrar’s address is One State Street Plaza, 30th Floor, New York, NY 10004.

The Nasdaq Capital Market

Our common stock is listed for quotation on The Nasdaq Capital Market under the symbol “CELC”.

Preferred Stock

Our board of directors is authorized, without action by the stockholders, to designate and issue up to an aggregate of 2,500,000 shares of preferred stock in one or more series. Our board of directors is authorized to designate the rights, preferences and privileges of the shares of each series and any of its qualifications, limitations or restrictions. Our board of directors is able to authorize the issuance of preferred stock with voting or conversion rights that could adversely affect the voting power or other rights of the holders of common stock. The issuance of preferred stock, while providing flexibility in connection with possible future financings and acquisitions and other corporate purposes, could, under certain circumstances, have the effect of restricting dividends on our common stock, diluting the voting power of our common stock, impairing the liquidation rights of our common stock, or delaying, deferring or preventing a change in control of the Company, which might harm the market price of our common stock. See also “Anti-Takeover Effect of Delaware Law and Certain Charter and Bylaw Provisions” below.

On May 16, 2022, in connection with a Securities Purchase Agreement, dated May 15, 2022, by and among the Company and the Investors named therein (the “2022 Investors,” and such Securities Purchase Agreement, the “2022 Securities Purchase Agreement”), the Company filed a Certificate of Designations (the “Certificate of Designations”) with the Secretary of State of the State of Delaware, designating 1,850,000 shares out of the authorized but unissued shares of its preferred stock as Series A Convertible Preferred Stock (“Series A Preferred Stock”). The following is a summary of the principal terms of the Series A Preferred Stock:

Dividend Rights

Holders of Series A Preferred Stock shall be entitled to receive dividends or distributions on shares of Series A Preferred Stock equal (on an as-if-converted-to-common stock basis) to and in the same form as dividends or distributions actually paid on shares of the common stock when, as and if such dividends or distributions are paid on shares of the common stock. No other dividends or distributions shall be paid on shares of Series A Preferred Stock.

Right to Liquidation Distributions

In the event of any voluntary or involuntary liquidation, dissolution or winding up of the Company, the holders of shares of Series A Preferred Stock then outstanding shall be entitled to be paid out of the assets of the Company available for distribution to its stockholders, and in the event of a Deemed Liquidation Event (as defined in the Certificate of Designations), the holders of shares of Series A Preferred Stock then outstanding shall be entitled to be paid out of the consideration payable to stockholders in such Deemed Liquidation Event or out of the Available Proceeds (as defined in the Certificate of Designations), as applicable, before any payment shall be made to the holders of common stock by reason of their ownership thereof, an amount per share equal to the greater of (i) the Series A Original Issue Price (as defined in the Certificate of Designations), plus any dividends declared but unpaid thereon, or (ii) such amount per share as would have been payable had all shares of Series A Preferred Stock been converted into common stock pursuant to the Certificate of Designations immediately prior to such liquidation, dissolution, winding up or Deemed Liquidation Event.

Voting Rights

The Series A Preferred Stock is non-voting stock and does not entitle the holder thereof to vote on any matter submitted to the stockholders of the Company for their action or consideration, except as otherwise provided by the General Corporation Law of the State of Delaware or the other provisions of the Certificate of Incorporation or the Certificate of Designations.

As long as any shares of Series A Preferred Stock are outstanding, the Company may not, without the approval of the holders of a majority of the outstanding shares of Series A Preferred Stock, take the following actions: (i) amend, alter or repeal any provision of the Certificate of Incorporation, the Certificate of Designations or Bylaws of the Company in a manner that adversely affects the powers, preferences or rights of the Series A Preferred Stock; (ii) create, or authorize the creation of, or issue or obligate itself to issue shares of, any additional class or series of capital stock unless the same ranks junior to the Series A Preferred Stock with respect to the distribution of assets on the liquidation, dissolution or winding up of the Company, the payment of dividends and rights of redemption, or increase the authorized number of shares of Series A Preferred Stock or increase the authorized number of shares of any additional class or series of capital stock of the Company unless the same ranks junior to the Series A Preferred Stock with respect to the distribution of assets on the liquidation, dissolution or winding up of the Company, the payment of dividends and rights of redemption; (iii) (A) reclassify, alter or amend any existing security of the Company that is *pari passu* with the Series A Preferred Stock in respect of the distribution of assets on the liquidation, dissolution or winding up of the Company, the payment of dividends or rights of redemption, if such reclassification, alteration

or amendment would render such other security senior to the Series A Preferred Stock in respect of any such right, preference, or privilege or (B) reclassify, alter or amend any existing security of the Company that is junior to the Series A Preferred Stock in respect of the distribution of assets on the liquidation, dissolution or winding up of the Company, the payment of dividends or rights of redemption, if such reclassification, alteration or amendment would render such other security senior to or pari passu with the Series A Preferred Stock in respect of any such right, preference or privilege; or (iv) purchase or redeem (or permit any subsidiary to purchase or redeem) or pay or declare any dividend or make any distribution on, any shares of capital stock of the Company (with exceptions for (i) redemptions of or dividends or distributions on the Series A Preferred Stock as expressly authorized in the Certificate of Designations, and (ii) dividends or other distributions payable on our common stock solely in the form of additional shares of common stock).

Conversion Rights

Subject to the Beneficial Ownership Limitation described below, each share of Series A Preferred Stock shall be convertible, at the option of the holder thereof, at any time and from time to time, and without the payment of additional consideration by the holder thereof, into such number of fully paid and non-assessable shares of common stock as is determined by multiplying one share of Series A Preferred Stock by the Series A Conversion Rate in effect at the time of conversion. The “Series A Conversion Rate” shall initially be ten (10) shares of Common Stock for each share of Series A Preferred Stock. The Series A Conversion Rate shall be subject to adjustment as provided in the Certificate of Designations.

Under the terms of the Certificate of Designations, the Company may not effect the conversion of Series A Preferred Stock into common stock, and a holder will not be entitled to request the conversion of shares of Series A Preferred Stock, if, upon giving effect to such conversion, the aggregate number of shares of common stock beneficially owned by the holder (together with its affiliates, any other persons acting as a group together with the holder or any of the holder’s affiliates, and any other persons whose beneficial ownership of common stock would or could be aggregated with the holder’s for purposes of Section 13(d) or Section 16 of the Exchange Act) would exceed the Beneficial Ownership Limitation, which is 9.9% of the number of shares of common stock outstanding immediately after giving effect to the conversion, as such percentage ownership is calculated in accordance with Section 13(d) of the Exchange Act and the applicable regulations of the Securities and Exchange Commission. A holder may reset the Beneficial Ownership Limitation percentage to a higher percentage (not to exceed 19.9%), effective 61 days after written notice to the Company, or a lower percentage, effective immediately upon written notice to the Company. Any such increase or decrease will apply only to that holder and not to any other holder of Series A Preferred Stock.

The Series A Preferred Stock does not have, nor is subject to, any preemptive or similar rights.

Warrants

2024 Warrants

Under the Amended and Restated Loan and Security Agreement, dated as of May 30, 2024, by and among the Company, Innovatus Life Sciences Lending Fund I, LP (“Innovatus”), as collateral agent, and the Lenders named therein, including Innovatus in its capacity as a Lender and Oxford Finance LLC (“Oxford”) (the “A&R Loan Agreement”), pursuant to which Innovatus and Oxford, as Lenders, have agreed to make certain term loans, including the Term C Loan, the Term D Loan, the Term E Loan, and the Term F Loan (as such terms are defined in the A&R Loan Agreement and, each, a “Term Loan”) to the Company, the Company issued to Innovatus and Oxford warrants (the “2024 Warrants”) to purchase that number of shares of common stock equal to 2.5% of the principal amount of the applicable Term Loan divided by the exercise price, which was, with respect to the Term C Loan, be equal to the lower of (i) the volume weighted average closing price of the Company’s common stock for the five-trading day period ending on the last trading day immediately preceding the execution of the A&R Loan Agreement or (ii) the closing price on the last trading day immediately preceding the execution of the A&R Loan Agreement. Accordingly, on May 30, 2024, the Company issued 103,876 2024 Warrants with an exercise price of \$14.84 per share. For the additional Term Loans, the exercise price will be based on the lower of (i) the exercise price for the 2024 Warrants issued pursuant to the Term C Loan or (ii) the volume weighted average closing price of the Company’s common stock for the five-trading day period ending on the last trading day immediately preceding the applicable Term Loan funding. The 2024 Warrants may be exercised on a cashless basis and are exercisable through the tenth anniversary of the applicable funding date. The number of shares of common stock for which each 2024 Warrant is exercisable and the associated exercise price are subject to certain proportional adjustments as set forth in such 2024 Warrant.

2023 Pre-Funded Warrants

Under the Securities Purchase Agreement, dated October 18, 2023, by and among the Company and the Investors named therein (the “2023 Investors,” and such Securities Purchase Agreement, the “2023 Securities Purchase Agreement”), the Company issued pre-funded warrants (the “2023 Warrants”) to purchase 5,747,787 shares of common stock. Each 2023 Warrant to purchase one share was sold for a purchase price of \$8.699 per Warrant and has an exercise price of \$0.001 per share (for aggregate consideration equating to \$8.70 per share of common stock issuable upon exercise of the 2023 Warrants).

Each 2023 Warrant is immediately exercisable and will not expire. Under the terms of the 2023 Warrants, the Company may not effect the exercise of any such 2023 Warrant, and a holder will not be entitled to exercise any portion of any 2023 Warrant, if, upon giving effect to such exercise, the aggregate number of shares of common stock beneficially owned by the holder (together with its affiliates, other persons acting or who could be deemed to be acting as a group together with the holder or any of the holder’s affiliates, and any other persons whose beneficial ownership of common stock would or could be aggregated with the holder’s or any of the holder’s affiliates for purposes of Section 13(d) or Section 16 of the Exchange Act) would exceed 4.99% of the number of shares of common stock outstanding immediately after giving effect to the exercise, as such percentage ownership is calculated in accordance with Section 13(d) of the Exchange Act and the applicable regulations of the Securities and Exchange Commission (the “Maximum Percentage”). A holder may reset the Maximum Percentage to a higher percentage (not to exceed 19.99%), effective 61 days after written notice to the Company, or a lower percentage, effective immediately upon written notice to the Company. Any such increase or decrease will apply only to that holder and not to any other holder of 2023 Warrants.

2022 Warrants

Under the 2022 Securities Purchase Agreement, the Company issued Warrants (the “2022 Warrants”) to purchase 695,645 shares of Series A Preferred Stock, each 2022 Warrant having an exercise price of \$85.50 per share. The exercise price of the 2022 Warrants is at a 40% premium to the price (on an as converted to common stock basis) paid by the 2022 Investors for the initial shares of common stock purchased under the 2022 Securities Purchase Agreement.

On September 1, 2022, the Company amended its Certificate of Incorporation to increase the aggregate authorized number of shares of capital stock and the number of shares of common stock such that the Company has available, and has reserved, such number of its duly authorized but unissued shares of common stock as shall be sufficient to effect the conversion of all shares of Series A Preferred Stock then outstanding or available for issuance upon the exercise of the 2022 Warrants (the “Authorized Share Increase”). Following this Authorized Share Increase, and notice to the 2022 Investors, the 2022 Warrants became exercisable for an aggregate 6,956,450 shares of common stock with an exercise price per share adjusted of \$8.05.

Each 2022 Warrant, when issued, is immediately exercisable and will remain exercisable until the earlier of (i) five years from the date of issuance and (ii) seventy-five (75) days after the Company announces (x) whether the progression-free survival (“PFS”) of gedatolisib in combination with Palbociclib and fulvestrant (Arm A) to fulvestrant (Arm C) in the Phase 3 study met its primary endpoint target, (y) whether the PFS of gedatolisib in combination with fulvestrant (Arm B) to fulvestrant (Arm C) in the Phase 3 study met its primary endpoint target, and (z) the associated hazard ratios and median PFS values for each of Arm A, Arm B, and Arm C.

Under the terms of the 2022 Warrants, the Company may not effect the exercise of any such 2022 Warrant, and a holder will not be entitled to request the exercise any portion of any 2022 Warrant, if, upon giving effect to such exercise, the aggregate number of shares of common stock beneficially owned by the holder (together with its affiliates, any other persons acting as a group together with the holder or any of the holder’s affiliates, and any other persons whose beneficial ownership of common stock would or could be aggregated with the holder’s for purposes of Section 13(d) or Section 16 of the Exchange Act) would exceed the Beneficial Ownership Limitation as described in the “Preferred Stock—Conversion Rights” section above. A holder may reset the Beneficial Ownership Limitation percentage to a higher percentage (not to exceed 19.9%), effective 61 days after written notice to the Company, or a lower percentage, effective immediately upon written notice to the Company. Any such increase or decrease will apply only to that holder and not to any other holder of 2022 Warrants.

Registration Rights Agreement

2023 Registration Rights Agreement

In connection with the 2023 Securities Purchase Agreement, the Company entered into a Registration Rights Agreement (the “2023 Registration Rights Agreement”) with the 2023 Investors, pursuant to which the Company agreed to register for resale the Registrable Securities (the “2023 Registrable Securities”), which include: (i) the shares of common stock then issued or issuable upon exercise of the 2023 Warrants (assuming the 2023 Warrants are exercisable in full without regard to any exercise limitation therein) (the “2023 Warrant Shares”), and (ii) any other securities issued or issuable with respect to, in exchange for or in replacement of, the 2023 Warrant Shares issued and sold pursuant to the 2023 Securities Purchase Agreement. Under the 2023 Registration Rights Agreement, the Company agreed to file a registration statement covering the resale by the 2023 Investors of the 2023 Registrable Securities no later than 30 days following the Closing Date (as defined in the 2023 Registration Rights Agreement). The Company agreed to use commercially reasonable efforts to cause the registration statement to become effective and to keep such registration statement effective until such time as there are no longer 2023 Registrable Securities held by the 2023 Investors. The Company agreed to be responsible for all fees and expenses incurred in connection with the registration of the 2023 Registrable Securities. The Company filed a registration statement on Form S-3 registering for resale the 2023 Registrable Securities, which was declared effective on November 28, 2023.

The Company granted the 2023 Investors customary indemnification rights in connection with the registration statement, including for liabilities arising under the Securities Act of 1933, as amended (the “Securities Act”). The 2023 Investors also granted the Company customary indemnification rights in connection with the registration statement.

2022 Registration Rights Agreement

In connection with the 2022 Securities Purchase Agreement, the Company entered into a Registration Rights Agreement (the “2022 Registration Rights Agreement”) with the 2022 Investors, pursuant to which the Company agreed to register for resale the Registrable Securities (the “2022 Registrable Securities”), which include: (i) the common stock, (ii) the shares of common stock then issued or issuable upon conversion of the Series A Preferred Stock (assuming on such date the shares of Series A Preferred Stock are convertible in full without regard to any conversion limitations in the Certificate of Designations), and (iii) the common stock then issued or issuable upon exercise of the 2022 Warrants (assuming the 2022 Warrants are exercisable in full without regard to any exercise limitations therein). Under the 2022 Registration Rights Agreement, the Company agreed to file a registration statement covering the resale by the 2022 Investors of the 2022 Registrable Securities no later than 30 days following (i) the Closing Date (as defined in the 2022 Registration Rights Agreement) and (ii) the date the Company obtained the necessary stockholder approval to effect the Authorized Share Increase. The Company agreed to use commercially reasonable efforts to cause the registration statement to become effective and to keep such registration statement effective until such time as there are no longer 2022 Registrable Securities held by the 2022 Investors. The Company agreed to be responsible for all fees and expenses incurred in connection with the registration of the 2022 Registrable Securities. The Company filed a registration statement on Form S-3 registering for resale the 2022 Registrable Securities, which was declared effective on January 11, 2023.

The Company granted the 2022 Investors customary indemnification rights in connection with the registration statement, including for liabilities arising under the Securities Act. The 2022 Investors also granted the Company customary indemnification rights in connection with the registration statement.

The representations, warranties and covenants contained in each of the 2023 Warrants, the 2022 Warrants, the 2023 Securities Purchase Agreement, the 2022 Securities Purchase Agreement, the 2023 Registration Rights Agreement and the 2022 Registration Rights Agreement were made solely for the benefit of the parties thereto and may be subject to limitations agreed upon by the contracting parties.

Anti-Takeover Effect of Delaware Law and Certain Charter and Bylaw Provisions

Our certificate of incorporation, as amended, and bylaws contain provisions that could have the effect of discouraging potential acquisition proposals or tender offers or delaying or preventing a change of control of our Company. A summary of these provisions is as follows:

- **Board of directors vacancies.** Our bylaws authorize only our board of directors to fill vacant directorships, including newly created seats. In addition, the number of directors constituting our board of directors will be permitted to be set only by a resolution adopted by our board of directors. These provisions would prevent a stockholder from increasing

the size of our board of directors and then gaining control of our board of directors by filling the resulting vacancies with its own nominees. This makes it more difficult to change the composition of our board of directors but promotes continuity of management.

- ***Advance notice requirements for stockholder proposals and director nominations.*** Our bylaws provide advance notice procedures for stockholders seeking to bring business before our annual meeting of stockholders or to nominate candidates for election as directors at our annual meeting of stockholders. Our bylaws also specify certain requirements regarding the form and content of a stockholder's notice. These provisions might preclude our stockholders from bringing matters before our annual meeting of stockholders or from making nominations for directors at our annual meeting of stockholders if the proper procedures are not followed. These provisions may also discourage or deter a potential acquirer from conducting a solicitation of proxies to elect the acquirer's own slate of directors or otherwise attempting to obtain control of the Company.
- ***No cumulative voting.*** The Delaware General Corporation Law, or DGCL, provides that stockholders are not entitled to the right to cumulate votes in the election of directors unless a corporation's certificate of incorporation provides otherwise. Our certificate of incorporation, as amended, does not provide for cumulative voting.
- ***Stockholder action; special meetings of stockholders.*** Our certificate of incorporation, as amended, provides that our stockholders may not take action by written consent, but may only take action at annual or special meetings of our stockholders. As a result, a holder controlling a majority of our capital stock would not be able to amend our bylaws or remove directors without holding a meeting of our stockholders called in accordance with our bylaws. Further, our bylaws provide that special meetings of our stockholders may be called only by a majority of our board of directors, the chairperson of our board of directors, or our Chief Executive Officer, thus prohibiting a stockholder from calling a special meeting. These provisions might delay the ability of our stockholders to force consideration of a proposal or for stockholders controlling a majority of our capital stock to take any action, including the removal of directors.
- ***Issuance of undesignated preferred stock.*** We have 650,000 shares of undesignated preferred stock. Subject to certain limitations and approval requirements with respect to our Series A Preferred Stock as described in "Preferred Stock—Voting Rights" above, our board of directors has the authority, without further action by the stockholders, to issue this preferred stock with rights and preferences, including voting rights, designated from time to time by our board of directors. The existence of authorized but unissued shares of preferred stock would enable our board of directors to render more difficult or to discourage an attempt to obtain control of us by means of a merger, tender offer, proxy contest or other means.
- ***Amendment of charter and bylaw provisions.*** The affirmative vote of stockholders representing at least two-thirds of the voting power of all then-outstanding capital stock, and in certain instances, the vote of the holders of a majority of the then-outstanding Series A Preferred Stock, is required to amend, alter or repeal certain provisions of our certificate of incorporation, as amended, including the provision noted above regarding stockholders not being able to act by written consent. Subject to certain limitations and approval requirements with respect to our Series A Preferred Stock as described in "Preferred Stock—Voting Rights" above, a majority of our board of directors has authority to adopt, amend or repeal provisions of our bylaws. Stockholders also have the authority to adopt, amend or repeal provisions of our bylaws, but only with the affirmative vote of stockholders representing at least two-thirds of the voting power of all then-outstanding capital stock and in certain instances, the vote of the holders of a majority of the then-outstanding Series A Preferred Stock.

We are subject to the provisions of Section 203 of the DGCL, an anti-takeover law. In general, Section 203 prohibits a publicly held Delaware corporation from engaging in a "business combination" with an "interested stockholder" for a period of three years after the date of the transaction in which the person became an interested stockholder, unless the business combination is approved in a prescribed manner. For purposes of Section 203, a "business combination" includes a merger, asset sale or other transaction resulting in a financial benefit to the interested stockholder, and an "interested stockholder" is a person who owns 15% or more of the voting stock of a corporation, or any affiliate or associate of a corporation who, within three years prior, did own 15% or more of the voting stock of that corporation.

CELCUITY INC.
CHANGE IN CONTROL AND SEVERANCE PLAN
AND
SUMMARY PLAN DESCRIPTION

1. Introduction. The purpose of this Celcuity Inc. Change in Control and Severance Plan is to provide assurances of specified benefits to employees of the Company in the event of a Change in Control or certain terminations of employment following a Change in Control as described in this Plan (as such terms are defined below). This Plan is governed by ERISA. With respect to Plan benefits provided to Eligible Employees other than the Chief Executive Officer, the Plan is considered a “welfare benefit plan”, as defined in Section 3(1) of ERISA, and with respect to Plan benefits provided to the Chief Executive Officer, this Plan is considered a “pension plan”, as defined in Section 3(2) of ERISA, which is established solely for the purpose of providing severance benefits to a select group of management or highly compensated employees (i.e., a “top hat” plan), and will be construed accordingly. This document constitutes both the written instrument under which this Plan is maintained and the required summary plan description for this Plan.

2. Definitions. As used herein, the following definitions will apply:

2.1 “Administrator” means (a) the Compensation Committee of the Board or, (b) solely with respect to Participants who are not Executive Officers of the Company, (i) the Chief Executive Officer of the Company; or (ii) any other officer of the Company to whom the Board has delegated any authority or responsibility with respect to this Plan pursuant to Section 11, but only to the extent of such delegation.

2.2 “Affiliate” means any corporation or any other entity (including, but not limited to, partnerships and joint ventures) controlling, controlled by, or under common control with the Company.

2.3 “Annual Base Salary” means the greater of Participant’s annual base salary as in effect as of the date of the Participant’s Involuntary Termination or the Change in Control (without regard to any reduction that would constitute Good Reason). Annual Base Salary does not include bonuses, commissions, overtime pay, incentive pay, performance awards, equity compensation, or any other additional compensation, payments and/or benefits provided by the Company.

2.4 “Board” means the board of directors of the Company.

2.5 “Bonus Payment Date” means the date when a Participant’s actual bonus is paid to such Participant pursuant to the Company’s annual cash bonus program.

2.6 “Cause” has the meaning set forth in the Equity Plan.

2.7 “Change in Control” has the meaning set forth in the Equity Plan. Notwithstanding this definition, no Change in Control shall be deemed to have occurred for purposes of this Plan unless the event would also constitute a change in ownership or effective control of, or a change in the ownership of a substantial portion of the assets of, the Company under Section 409A.

2.8 “Change in Control Period” means the time period beginning on the date of the Change in Control and ending on the date that is twelve (12) months following a Change in Control.

2.9 “CIC Severance Multiplier” means the following based on the Participant’s position with the Company (if a Participant holds more than one position, only the higher level CIC Severance Multiplier will apply):

Participant's Position	CIC Severance Multiplier
Chief Executive Officer	36
Executive Officers	24
All Other Executives (Chief Commercial Officer, Chief Medical Officer, VP Pharmaceutical Operations, VP Quality, General Counsel)	12
Other Vice Presidents	6
All Other Eligible Employees	3, or if greater, the lesser of (a) .5 months multiplied by full years of continuous employment and (b) 6

2.10 “COBRA” means the Consolidated Omnibus Budget Reconciliation Act of 1985, as amended.

2.11 “Code” means the U.S. Internal Revenue Code of 1986, as amended and in effect from time to time. For purposes of the Plan, references to sections of the Code shall be deemed to include any applicable treasury regulations and guidance promulgated thereunder and any successor or similar statutory provisions.

2.12 “Committee” means the Compensation Committee of the Board.

2.13 “Company” means Celcuity Inc., a Delaware corporation, or any successor thereto, which, for the avoidance of doubt, includes any successor to the Company of all or substantially all of the Company’s business and/or assets (whether direct or indirect and whether by purchase, merger, consolidation, liquidation or other transaction).

2.14 “Disability” has the meaning set forth in the Equity Plan.

2.15 “Eligible Employee” means any regular full or part-time employee of the Company, excluding seasonal and temporary employees.

2.16 “Equity Awards” means a Participant’s outstanding stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance stock units and other equity-based awards.

2.17 “Equity Plan” means the Celcuity Inc. Amended and Restated 2017 Stock Incentive Plan.

2.18 “ERISA” means the Employee Retirement Income Security Act of 1974, as amended, including the rules and regulations promulgated thereunder.

2.19 “Exchange Act” means the U.S. Securities Exchange Act of 1934, as amended, including the rules and regulations promulgated thereunder.

2.20 “Executive Officer” means an “officer” of the Company within the meaning of Rule 16a-1(f) of the Exchange Act.

2.21 “Good Reason” means, with respect to a Participant, the occurrence of one or more of the following (through a single action or series of actions) without the Participant’s written consent: (i) a material reduction in the Participant’s duties, authority or responsibilities; (ii) a material diminution in the authority, duties, or responsibilities of the supervisor to whom the Participant is required to report, including, as applicable, a requirement that the Participant report to a corporate officer or employee instead of reporting directly to the Chief Executive Officer or the Board; (iii) a material reduction in the Participant’s Annual Base Salary from the Participant’s Annual Base Salary at the time of the Change in Control; or (iv) a change in the geographic location of the Participant’s primary work facility or location, including (A) a change from working remotely, if remote work is permitted for such Participant, to requiring the Participant to work on-site or in a hybrid arrangement, or (B) by more than 25 miles from its current primary location, other than travel reasonably required in the performance of the Participant’s responsibilities. Notwithstanding the foregoing, the Participant will not be entitled to resign for Good Reason without first providing the Company with written notice of the acts or omissions constituting the grounds for “Good Reason” within 60 days of the initial existence of the grounds for “Good Reason” and the Company fails to reasonably cure such grounds within a reasonable cure period of not less than 30 days following the date of such notice. In addition, the Participant’s resignation will qualify as a resignation for “Good Reason” only if (x) the grounds for “Good Reason” are not reasonably cured within the cure period specified in the preceding sentence and (y) the Participant resigns within 60 days following the end of such cure period.

2.22 “Involuntary Termination” means a termination of the Participant’s employment with the Company and its Affiliates (a) by the Participant for Good Reason, or (b) by the Company and its Affiliates for a reason other than Cause, death or Disability. For the avoidance of doubt, a transfer of the Participant’s employment or service from one business group, including corporate groups, or Affiliate of the Company to another business group or Affiliate of the Company, shall not be considered an Involuntary Termination of the Participant’s employment with the Company and its Affiliates unless the circumstances of such transfer meet the definition of Good Reason.

2.23 “Participant” means any Eligible Employee.

2.24 “Plan” means the Celcuity Inc. Change in Control and Severance Plan, as set forth in this document, and as hereafter amended from time to time.

2.25 “Section 280G” means Section 280G of the Code, including the rules and regulations promulgated thereunder.

2.26 “Section 409A” means Section 409A of the Code.

2.27 “Separation from Service” means a “separation from service” as such term is defined for purposes of Section 409A.

2.28 “Severance Benefits” means the compensation and other benefits that the Participant will be eligible to receive under this Plan in the event of an Involuntary Termination as provided in Section 5, subject to the terms and conditions of this Plan.

2.29 “Target Annual Bonus” means the Participant’s target annual cash bonus amount pursuant to the Company’s annual cash bonus program (without regard to any reduction that would constitute Good Reason).

3. Equity Acceleration. In the event of a Change in Control, all outstanding Equity Awards held by any Participant in the Plan will fully vest (with performance awards vesting at the greater of target or actual performance levels) immediately upon the effective date of such Change in Control (the “Equity Acceleration”). For the avoidance of doubt, the Equity Acceleration will occur immediately upon the effective date of a Change in Control regardless of whether the Participant experiences an Involuntary Termination.

4. Eligibility for Severance Benefits. A Participant is eligible for Severance Benefits, as described in Section 5, only if the Participant experiences an Involuntary Termination.

5. Involuntary Termination during the Change in Control Period. Subject to the Participant’s compliance with Section 6, upon an Involuntary Termination that is within the Change in Control Period, the Participant will be eligible to receive the following Severance Benefits, subject to the terms and conditions of this Plan:

5.1 Cash Severance. An amount in cash equal to the product of (a) the Participant’s (i) Annual Base Salary plus (ii) Target Annual Bonus, (b) divided by twelve (12), and (c) multiplied by the CIC Severance Multiplier, payable, subject to Section 6, in a single lump sum on the 60th day after the Participant’s Involuntary Termination.

5.2 COBRA Premiums. If the Participant timely elects COBRA continuation coverage, a lump sum amount in cash equal to the monthly COBRA premiums (on an after-tax basis) that the Participant would be required to pay to continue the group health and prescription drug (but not dental or vision) coverage in effect on the date of the Participant’s Involuntary Termination (which amount will be based on the premium for the first month of COBRA coverage) for the Participant and any dependents of the Participant who are enrolled in Company benefits at the time of termination, multiplied by the lesser of the CIC Severance Multiple or 18, payable, subject to Section 9, in a single lump sum on the 75th day after the Participant’s Involuntary Termination.

6. Conditions to Receipt of Severance.

6.1 Release Agreement. As a condition to receiving the Severance Benefits, each Participant will be required to sign and not revoke a separation and release of claims in favor of the Company in a form of agreement provided by the Company (the “Release”). In all cases, the Release must become effective and irrevocable no later than the 55th day following the Participant’s Involuntary Termination (the “Release Deadline Date”). If the Release does not become effective and irrevocable by the Release Deadline Date, the Participant will forfeit any right to the Severance Benefits. In no event will the Severance Benefits be paid or provided until the Release becomes effective and irrevocable.

6.2 Restrictive Covenants. A Participant’s receipt of Severance Benefits will be subject to the Participant continuing to comply with the terms of any enforceable non-compete, non-solicit, employee invention and confidentiality agreement or similar agreement or policy. Any unpaid Severance Benefits under this Plan will be forfeited immediately if the Participant violates any such agreement and/or the provisions of this Section 6.

7. Limitation on Payments. In the event that the Severance Benefits, Equity Acceleration, and any other severance or benefits otherwise payable to a Participant (i) constitute “parachute payments” within the meaning of Section 280G (the “280G Payments”) and (ii) but for this Section 7, would be subject to the excise tax imposed by Section 4999 of the Code (the “Excise Tax”), then the 280G Payments will be either:

(a) delivered in full; or

(b) delivered as to such lesser extent which would result in no portion of such benefits being subject to the Excise Tax, whichever of the foregoing amounts, taking into account the applicable federal, state and local income taxes and the excise tax imposed by Section 4999 of the Code, results in the receipt by the Participant on an after-tax basis, of the greatest amount of benefits, notwithstanding that all or some portion of such benefits may be taxable under Section 4999 of the Code. If a reduction in the 280G Payments is necessary so that no portion of such benefits is subject to the Excise Tax, such reduction will be first applied to reduce any cash payments and will thereafter be applied to reduce noncash payments and benefits, in each case, in reverse order beginning with the payments or benefits that are to be paid the furthest in time from the date of such determination; provided, however, that, in no event may the 280G Payments be reduced in a manner that would result in subjecting the Participant to additional taxation or penalties under Section 409A.

Any determination required under this Section 7 will be made in writing by the Company’s independent public accountants immediately prior to the Change in Control or such other independent accountant as determined in good faith by the Company (the “Accounting Firm”), whose determination will be conclusive and binding upon the Participant and the Company. For purposes of making the calculations required by this Section 7, the Accounting Firm may make reasonable assumptions and approximations concerning applicable taxes and may rely on reasonable, good faith interpretations concerning the application of Sections 280G and 4999 of the Code. The Participant and the Company will furnish to the Accounting Firm such information and documents as the Accounting Firm may reasonably request in order to make a determination under this Section 7. The Company will bear all costs the Accounting Firm may incur in connection with any calculations contemplated by this Section 7.

8. Other Arrangements. Except as otherwise provided by the Company in writing, (i) in the event that the Participant is eligible for any other arrangement of the Company regarding severance or severance-type benefits in connection with a Change in Control (“Change in Control Severance Benefits”), the Eligible Employee will be entitled to receive the better of the Change in Control Severance Benefits and the benefits under this Plan; and (ii) the Plan shall not provide duplicative benefits with other Change in Control Severance Benefits, provided, however, that this nonduplication provision will not apply to any Change in Control bonus or retention arrangement which provides for benefits not in connection with an Involuntary Termination.

9. Section 409A.

9.1 This Plan and the Severance Benefits and Equity Acceleration are intended to comply with or be exempt from the requirements of Section 409A and will be construed and interpreted in accordance with such intent.

9.2 Except as permitted under Section 409A, any deferred compensation (within the meaning of Section 409A) payable to any Participant or for the benefit of any Participant under this Plan may not be reduced by, or offset against, any amount owing by any such Participant to the Company or any of its Affiliates to the extent such offset would result in taxes or penalties under Section 409A. Amounts reimbursable to Participant under this Plan shall be paid to Participant on or before the last day of the year following the year in which the expense was incurred and the amount of expenses eligible for reimbursement (and in-kind benefits provided to Participant) during one year may not affect amounts reimbursable or provided in any subsequent year);

9.3 To the extent required to avoid accelerated taxation and/or tax penalties under Section 409A, amounts that would otherwise be payable and benefits that would otherwise be provided pursuant to this Plan during the six (6) month period immediately following Participant's Separation from Service shall instead be paid on the first business day after the date that is six (6) months following Participant's Separation from Service (or, if earlier, Participant's date of death). Such amount will be paid without interest.

9.4 Participant will be solely responsible and liable for the satisfaction of all taxes and penalties that may be imposed on such Participant in connection with any Severance Benefits or Equity Acceleration (including any taxes and penalties under Section 409A), and neither the Company nor any of its Affiliates will have any obligation to indemnify or otherwise hold such Participant harmless from any or all of such taxes or penalties.

9.5 Each payment and benefit payable under this Plan is intended to constitute a separate payment for purposes of Section 409A. For purposes of Section 409A, the right to receive payments in the form of installment payments shall be treated as a right to receive a series of separate payments and, accordingly, each installment payment shall at all times be considered a separate and distinct payment. In addition, to the extent necessary to comply with Section 409A of the Code, if the period during which a Release must be executed and become irrevocable spans two calendar years, payment of the Severance Benefits will commence in the second calendar year.

9.6 For purposes of any provision of this Plan providing for the payment of any amount or benefit upon or following a termination of employment that constitutes "nonqualified deferred compensation" Section 409A, a termination of employment shall not be deemed to have occurred unless such termination is also a Separation from Service and, for purposes of any such provision of this Plan, references to a "termination," "termination of employment" or like terms shall mean Separation from Service.

10. Withholdings. The Company or any Affiliate will have the right and is hereby authorized to withhold from any Severance Benefits or Equity Acceleration due under this Plan or from any compensation or other amount owing to a Participant, the amount (in cash, shares, other securities or other property) of any applicable withholding taxes in respect of the amounts payable under this Plan and to take such other action as may be necessary in the opinion of the Administrator or the Company to satisfy all obligations for the payment of such taxes.

11. Administration. This Plan will be administered and interpreted by the Administrator (in his or her sole discretion). The Administrator is the "named fiduciary" of this Plan for purposes of ERISA and will be subject to the fiduciary standards of ERISA when acting in such capacity. Any decision made or other action taken by the Administrator with respect to this Plan, and any interpretation by the Administrator of any term or condition of this Plan, or any related document, will be conclusive and binding on all persons and be given the maximum possible deference allowed by law. In accordance with Section 2.1, the Administrator (a) may, in its sole discretion and on such terms and conditions as it may provide, delegate in writing to one or more officers of the Company all or any portion of its authority or responsibility with respect to this Plan and (b) has the authority to act for the Company (in a non-fiduciary capacity) as to any matter pertaining to this Plan.

12. Eligibility to Participate. To the extent that the Administrator has delegated administrative authority or responsibility to one or more officers of the Company in accordance with Sections 2.1 and 11, each such officer will not be excluded from participating in this Plan if otherwise eligible, but he or she is not entitled to act upon or make determinations regarding any matters pertaining specifically to his or her own benefit or eligibility under this Plan. The Committee will act upon and make determinations regarding any matters pertaining specifically to the benefit or eligibility of each such officer under this Plan.

13. Amendment or Termination. The Committee reserves the right to amend or terminate this Plan or the benefits provided hereunder at any time, subject to the provisions of this Section 13. Any amendment or termination will be effective, with or without advance notice, as of the date determined by the Committee. Notwithstanding the foregoing, beginning on the date that a Change in Control occurs, the Company may not, without a Participant's written consent, amend or terminate this Plan in any way, nor take any other action under this Plan, which (a) prevents the Participant from becoming eligible for

Severance Benefits or Equity Acceleration or (b) reduces or alters to the detriment of the Participant the Severance Benefits or Equity Acceleration payable, or potentially payable, to the Participant (including, without limitation, imposing additional conditions). Unless and until a Change of Control occurs, the Participants' rights under this Plan are unvested and may be amended or revoked at any time. Any action of the Company in amending or terminating this Plan will be taken in a non-fiduciary capacity.

14. Claims and Appeals.

14.1 Claims Procedure. Any employee or other person (or his or her authorized representative) who believes he or she is entitled to any Severance Benefits or Equity Acceleration ("Claimant") may submit a claim in writing to the Administrator within 90 days of the earlier of (a) the date the Claimant learned the amount of his or her Severance Benefits or Equity Acceleration or (b) the date the Claimant learned that he or she will not be entitled to any Severance Benefits or Equity Acceleration. If the claim is denied (in full or in part), the Claimant will be provided a written notice explaining the specific reasons for the denial and referring to the provisions of this Plan on which the denial is based. The notice also will describe any additional information needed to support the claim and this Plan's procedures for appealing the denial. The denial notice will be provided within 90 days after the claim is received. If special circumstances require an extension of time (up to 90 days), written notice of the extension will be given within the initial 90-day period. This notice of extension will indicate the special circumstances requiring the extension of time and the date by which the Administrator expects to render its decision on the claim.

14.2 Appeal Procedure. If the Claimant's claim is denied, the Claimant may apply in writing to the Administrator for a review of the decision denying the claim. Review must be requested within 60 days following the date the Claimant received the written notice of their claim denial or else the Claimant loses the right to review. The Claimant then has the right to review and obtain copies of all documents and other information relevant to the claim, upon request and at no charge, and to submit issues and comments in writing. The Administrator will provide written notice of its decision on review within 60 days after it receives a review request. If additional time (up to 60 days) is needed to review the request, the Claimant will be given written notice of the reason for the delay. This notice of extension will indicate the special circumstances requiring the extension of time and the date by which the Administrator expects to render its decision. If the claim is denied (in full or in part), the Claimant will be provided a written notice explaining the specific reasons for the denial and referring to the provisions of this Plan on which the denial is based. The notice also will include a statement that the Claimant will be provided, upon request and free of charge, reasonable access to, and copies of, all documents and other information relevant to the claim and a statement regarding the Claimant's right to bring an action under Section 502(a) of ERISA. The decision of the Administrator will be made in its sole discretion and is final and binding on all parties.

14.3 Limitations Period. The claims and appeals procedure above is mandatory. If a Claimant has completed the entire claims and appeals procedure and still disagrees with the outcome of his or her claim, the Claimant may commence a civil action under ERISA. The Claimant must commence such civil action within one year of the date of the final denial, or the Claimant will waive all rights to relief under ERISA.

15. Source of Payments. All payments under this Plan will be paid from the general funds of the Company; no separate fund will be established under this Plan, and this Plan will have no assets. No right of any person to receive any payment under this Plan will be any greater than the right of any other general unsecured creditor of the Company.

16. Benefits Nontransferable. In no event may any current or former employee of the Company or any of its Affiliates sell, transfer, anticipate, assign or otherwise dispose of any right or interest under this Plan. At no time will any such right or interest be subject to the claims of creditors nor liable to attachment, execution or other legal process.

17. No Right to Continued Employment. Neither the establishment or maintenance or amendment of this Plan, nor the making of any benefit payment hereunder, will be construed to confer upon any individual any right to continue to be an employee of the Company. This Plan in no way alters a Participant's at-will employment arrangement with the Company, and the Company expressly reserves the right to discharge any of its employees, including the Participant, at any time, with or without cause. However, as described in this Plan, a Participant may be eligible for Severance Benefits depending upon the circumstances of his or her termination of employment.

18. Successors. Any successor to the Company of all or substantially all of the Company's business and/or assets (whether direct or indirect and whether by purchase, merger, consolidation, liquidation or other transaction) will assume the obligations under this Plan and agree expressly to perform the obligations under this Plan in the same manner and to the same extent as the Company would be required to perform such obligations in the absence of a succession. For all purposes under this Plan, the term "Company" will include any successor to the Company's business and/or assets which become bound by the terms of this Plan by operation of law, or otherwise.

19. Applicable Law. This Plan will be governed by, and construed in accordance with, ERISA. For purposes of any action, lawsuit or other proceedings brought to enforce this Plan, relating to it, or arising from it, the parties hereby submit to and consent to the sole and exclusive jurisdiction of the federal courts for the United States for the District of Minnesota.

20. Severability. If any provision of this Plan is or becomes or is deemed to be invalid, illegal, or unenforceable for any reason in any jurisdiction or as to any Participant, such invalidity, illegality or unenforceability will not affect the remaining parts of this Plan, and this Plan will be construed and enforced as to such jurisdiction or Participant as if the invalid, illegal or unenforceable provision had not been included.

21. Headings and Construction. Headings are given to the Sections and subsections of this Plan solely as a convenience to facilitate reference. Such headings will not be deemed in any way material or relevant to the construction or interpretation of this Plan or any provision thereof. Whenever the words "include", "includes" or "including" are used in this Plan, they will be deemed to be followed by the words "but not limited to", and the word "or" will not be deemed to be exclusive. Pronouns and other words of gender will be read as gender neutral. Words importing the plural will include the singular and the singular will include the plural.

22. Indemnification. The Company hereby agrees to indemnify and hold harmless the officers and employees of the Company, and the members of its Board, from all losses, claims, costs or other liabilities arising from their acts or omissions in connection with the administration, amendment or termination of this Plan, to the maximum extent permitted by applicable law. This indemnity will cover all such liabilities, including judgments, settlements and costs of defense. The Company will provide this indemnity from its own funds to the extent that insurance does not cover such liabilities. This indemnity is in addition to and not in lieu of any other indemnity provided to such person by the Company.

Appendix

STATEMENT OF ERISA RIGHTS

As a participant in this Plan, you are entitled to certain rights and protections under the Employee Retirement Income Security Act of 1974 (ERISA). ERISA provides that all plan participants shall be entitled to:

■ Receive Information About Your Plan and Benefits

Examine, without charge, at the Administrator's office and at other specified locations all documents governing the plan and a copy of the latest annual report (Form 5500 Series) required to be filed by the plan with the U.S. Department of Labor and available at the Public Disclosure Room of the Employee Benefits Security Administration.

Obtain, upon written request to the Administrator, copies of documents governing the operation of the plan and copies of the latest annual report (Form 5500 Series), if any required, and updated summary plan description. The administrator may make a reasonable charge for the copies.

■ Prudent Actions by Plan Fiduciaries

In addition to creating rights for plan participants ERISA imposes duties upon the people who are responsible for the operation of the employee benefit plan. The people who operate your plan, called "fiduciaries" of the plan, have a duty to do so prudently and in the interest of you and other plan participants and beneficiaries. No one, including your employer, or any other person, may fire you or otherwise discriminate against you in any way to prevent you from obtaining a welfare benefit or exercising your rights under ERISA.

■ Enforce Your Rights

If your claim for a severance benefit is denied or ignored, in whole or in part, you have a right to know why this was done, to obtain copies of documents relating to the decision without charge, and to appeal any denial, all within certain time schedules.

Under ERISA, there are steps you can take to enforce the above rights. For instance, if you request a copy of plan documents or the latest annual report from the plan and do not receive them within 30 days, you may file suit in a Federal court. In such a case, the court may require the Administrator to provide the materials and pay you up to \$110 a day until you receive the materials, unless the materials were not sent because of reasons beyond the control of the administrator. If you have a claim for benefits which is denied or ignored, in whole or in part, you may file suit in a state or Federal court. If it should happen that plan fiduciaries misuse the plan's money, or if you are discriminated against for asserting your rights, you may seek assistance from the U.S. Department of Labor, or you may file suit in a Federal court. The court will decide who should pay court costs and legal fees. If you are successful the court may order the person you have sued to pay these costs and fees. If you lose, the court may order you to pay these costs and fees, for example, if it finds your claim is frivolous.

■ Assistance with Your Questions

If you have any questions about your plan, you should contact the Administrator. If you have any questions about this statement or about your rights under ERISA, or if you need assistance in obtaining documents from the Administrator, you should contact the nearest office of the Employee Benefits Security Administration, U.S. Department of Labor, listed in your telephone directory or the Division of Technical Assistance and Inquiries, Employee Benefits Security Administration, U.S. Department of Labor, 200 Constitution Avenue N.W., Washington, D.C. 20210. You may also obtain certain publications about your rights and responsibilities under ERISA by calling the publications hotline of the Employee Benefits Security Administration.

ADDITIONAL INFORMATION

Employer and Plan Sponsor:	Celcuity Inc. 16305 36th Avenue North; Suite 100 Minneapolis, Minnesota 55446

Funding	Unfunded; benefits are paid solely from the Employer's general assets

CELCUITY INC.

POLICY TO PROHIBIT INSIDER TRADING

As Amended & Restated February 13, 2025

Executive Summary

This Policy to Prohibit Insider Trading (the “**Insider Trading Policy**” or the “**Policy**”) provides guidelines for directors, officers, employees, or other representatives of Celcuity Inc. (“**Celcuity**” or the “**Company**”) who may have access to material non-public information about the Company or its customers, suppliers and other business partners.

Both federal securities laws and Company policy prohibit transactions in Company Securities at a time when you may be in possession of material information about the Company that has not been publicly disclosed. “**Company Securities**” means the Company’s common stock, options to purchase common stock, or any other type of securities that the Company may issue, including (but not limited to) preferred stock, convertible debentures and warrants, as well as derivative securities that are not issued by the Company, such as exchange-traded put or call options or swaps relating to the Company’s Securities.

You are similarly prohibited from buying or selling securities of Company customers, suppliers or other business partners when you have received, through your employment or other relationship with the Company, material non-public information about such customers, suppliers or business partners. These prohibitions also apply to members of your household as well as all others whose transactions may be attributable to you. Anyone who violates these prohibitions can face severe civil and criminal penalties.

“**Material information**” is any information that a reasonably prudent investor would consider to be important in making a decision to buy or sell a security. It specifically includes any information that would affect the public market price for the Company’s common stock. Either positive or negative information may be material. Once a public announcement has been made of the material information, you should wait at least 24 hours following the announcement before engaging in any market trade of Company stock (e.g., announcement at 10:00 a.m. on Monday, trade after 10:00 a.m. on Tuesday; announcement at 2:00 p.m. on Friday, trade after 2:00 p.m. on Monday), assuming at the time of the transaction you do not have other material information that has not been made public.

Securities laws and Company policy also prohibit disclosure of material non-public information except on a need-to-know basis. Even if you are not engaging in any stock trading activity, you must not disclose material information to others, especially to those outside the Company. This information is owned by the Company and must be protected as such. **Any questions from brokers, securities analysts or the media regarding the Company should be directed to the Chief Executive Officer, the Chief Financial Officer, or the General Counsel.**

This is only a summary. Please refer to the entire Insider Trading Policy set forth below for additional restrictions and requirements. If you have any questions about this Policy or your ability to share information or engage in a transaction involving Company Securities, please contact our General Counsel.

Insider Trading Policy

The Need for an Insider Trading Policy: The Company’s stock is publicly-traded; therefore, the Company is required to take active steps to prevent violations of insider trading laws by Company personnel, and members of the Board of Directors (each, a “**Director**”). Although insider trading has long been illegal, over the years Congress has expanded the enforcement authority of the Securities and Exchange Commission (the “**SEC**”) and the Justice Department, increased substantially the penalties for insider trading, and created potential liability for companies and other “controlling persons,” such as directors and managers, for violations by anyone under their supervision, influence or control. We are adopting this Insider Trading Policy to protect the Company and its Directors and personnel from liability and reputational harm, and to avoid even the appearance of improper conduct on the part of anyone employed by or associated with Celcuity (because anyone with material non-public information could be considered an “insider”). We cannot afford to have our reputation for integrity and ethical conduct damaged.

The Consequences: The consequences of insider trading violations can be severe. For individuals who trade on inside information (or tip information to others), the consequences can include a civil penalty of up to three times the profit gained or loss avoided, a criminal penalty (no matter how small the profit) of up to \$5 million, and a prison sentence of up to 20 years. For a company (as well as possibly any supervisory person) that fails to take appropriate steps to prevent illegal trading, the consequences can include a civil penalty of the greater of \$1 million or three times the profit gained or loss avoided as a result of the individual's violation, and a criminal penalty of up to \$25 million. In addition, any employee or consultant who violates this Policy faces discipline or even termination of employment for cause.

Any of the above consequences, even an SEC investigation that does not result in prosecution, can tarnish one's reputation and irreparably damage a career. Regulators use sophisticated surveillance techniques to identify transactions that may appear illegal, so you should assume that any suspicious trading activity, even if it is through foreign accounts or family members or friends or relates to only a small number of shares, will be detected and vigorously prosecuted.

Administration of the Policy: Our General Counsel will administer the Policy, provided that with respect to the General Counsel, the Chief Financial Officer will administer the Policy. All determinations by such individuals will be final and not subject to further review.

Our Policy: It is the policy of the Company that no Director, employee or other Company personnel (including contractors) who is aware of material non-public information relating to the Company (so-called "inside" information of a nature which could affect the Company's stock price or affect an investor's decision to buy or sell the Company Securities) may, directly or indirectly through family members or other persons or entities:

- Engage in any transaction in Company Securities (including sales, purchases and bona fide gifts), unless this Policy provides a specific exception;
- Recommend that others engage in transactions in Company Securities;
- Disclose material non-public information to persons within the Company whose jobs do not require them to have that information, or outside of the Company to anyone; or
- Engage in any other action to take advantage of material non-public information, including assisting anyone engaged in the above activities.

Small transactions, and transactions that may be necessary or justifiable for independent reasons (such as the need to sell Company stock to raise money for an emergency expenditure), are no exception. The securities laws do not recognize any mitigating circumstances, and even the appearance of an improper transaction must be avoided to preserve our reputation for adhering to the highest standards of conduct.

- Material Information. Material information is any information that a reasonable investor would consider important in a decision to buy, hold or sell securities. In short, any information that could reasonably affect a company's stock is deemed to be "material."
- Examples. Common examples of information that will frequently be regarded as material are: projections of future earnings or losses; changes in projections; news of a pending or proposed merger, acquisition, or tender offer; news of a significant product development or clinical trial results; changes in dividend policies, the declaration of a stock split or the offering of additional securities; changes in management; impending bankruptcy or financial liquidity problems; significant licensing or collaboration agreements; significant cybersecurity incidents or other significant disruptions in our business, reputation or assets; and the gain or loss of a substantial customer, supplier or other business partner. This is not an exhaustive list. Either positive or negative information may be material.
- "Non-public" Information. As you can appreciate, it is also improper for Company personnel to enter a trade immediately after Celcuity has made a public announcement of material information, including earnings releases. Because Company stockholders and the investing public should be afforded the time to receive the information and act upon it, as a general rule you should not engage in any transactions until at least 24 hours after the information has been released. Thus, if an announcement is made at 10:00 a.m. on Monday, after 10:00 a.m. on Tuesday generally would be the first time you should trade, assuming you do not have other material information that has not been made public. If an announcement is made at 2:00 p.m. on Friday, the first time trading would be permitted would generally be after 2:00 p.m. on the following Monday.
- 20/20 Hindsight. Remember, if your securities transactions become the subject of scrutiny, they will be viewed after-the-fact with the benefit of hindsight. As a result, before engaging in any securities transaction, you should carefully consider how regulators and others might view your transaction in hindsight.

- Transactions by Dependents & Household Members. This Policy also applies to anyone living in your household (other than an unrelated person who the applicable Administrator of this Policy determines should not be covered by this Policy) and anyone financially dependent upon you or whose transactions in Company Securities are directed by you or are subject to your influence or control, even if they do not live in your household (such as parents, siblings or adult children who consult with you before they trade in Company Securities). Company personnel are expected to be responsible for compliance by their dependents and personal household, and you should treat all transactions by such persons as if the transactions were for your own account.

This Policy does not, however, apply to personal securities transactions of family members, financial dependents, or household members where the purchase or sale decision is made by a third party not controlled by, influenced by, or related to you or your family members.

- Transactions by Entities That You Influence or Control. This Policy applies to any entities that you influence or control, including any corporations, partnerships or trusts (collectively referred to as “**Controlled Entities**”), and transactions by these Controlled Entities should be treated for the purposes of this Policy and applicable securities laws as if they were for your own account. However, nothing in this Policy is intended to limit the ability of a venture capital partnership or other similar entity with which a director is affiliated to distribute Company Securities to its partners, members or other similar persons. It is the responsibility of each affected Director and the affiliated entity, in consultation with their own counsel (as appropriate), to determine the timing of any distributions, based on all relevant facts and circumstances and applicable securities laws.
- Disclosing Information to Others. Whether the information is proprietary information about the Company or one of its customers, suppliers or other business partners, or information that could have an impact on the market price of the Company’s or its customer’s, supplier’s or other business partner’s stock, Company personnel must not pass the information on to others. The above penalties apply whether or not you derive any benefit from another’s actions. In order to prevent unintentional disclosure, all inquiries and requests for information regarding the Company or the Company’s customers, suppliers or other business partners (e.g., from the media, stockbrokers or securities analysts) should be referred to our General Counsel.

This Policy also applies to information relating to any other organization, including our customers, suppliers, and other business partners, and organizations that are involved in a potential transaction or business relationship with the Company, obtained in the course of your employment or other relationship with Celcuity. For example, you must keep information about that other company confidential and cannot engage in transactions in that other company’s securities if you are aware of non-public information that is material to that company. Note that what constitutes “material non-public information” differs by company. Information that is not material to Celcuity may be material to another company. Please consult with our General Counsel if you have any questions.

Exceptions: This Policy does not apply to the following transactions, except as specifically noted:

- The exercise of stock options, except this Policy **does apply** to both the cashless exercise of such options and open market sales of shares acquired through the exercise of any options. Furthermore, stock option exercises are subject to the terms of the Company’s governing stock option plans and any agreements entered into between the Company and the holders of such options.
- The purchase of Company Securities under the Company’s employee stock purchase plan resulting from the periodic contribution of money to the plan pursuant to a payroll deduction election, including any decision to terminate contributions made during any pay period, except that this Policy **does apply** to the sale of Company Securities purchased pursuant to the employee stock purchase plan.
- The initial election to participate in the employee stock purchase plan for any enrollment period or any modifications following such initial election (i.e., to increase or decrease the contributions made during any pay period), if such election or modification was made at a time when the Covered Person does not possess material non-public information.
- The purchase of Company Securities in the Company’s 401(k) plan resulting from the periodic contribution of money to the plan pursuant to a payroll deduction election. This Policy **does apply**, however, to certain elections you may make under the 401(k) plan, including: (a) an election to increase or decrease the percentage of your periodic contributions that will be allocated to the Company Securities fund; (b) an election to make an intra-plan transfer of an existing account balance into or out of the Company Securities fund; (c) an election to borrow money against your 401(k) plan account if the loan will result in a liquidation of some or all of your Company Securities fund balance;

and (d) an election to pre-pay a plan loan if the pre-payment will result in the allocation of loan proceeds to the Company stock fund. It should be noted that sales of Company Securities from a 401(k) account are also subject to Rule 144, and therefore “affiliates” of the Company (typically officers and Directors) should ensure that a Form 144 is filed when required.

- Any other purchase of Company Securities from the Company or sales of Company Securities to the Company.

Additional Prohibited Transactions: Celcuity prohibits Company personnel from engaging in any of the following activities with respect to Company Securities:

- Trading in Company Securities on a short-term basis. Any Company stock purchased in the open market must be held for a minimum of six months. Subject to the terms of the applicable awards, stock received from the Company as a compensatory equity award that is registered with the SEC on a Form S-8 need not be held for six months and can be sold at any time, assuming you do not have any material non-public information.
- Margin accounts and pledged securities. This Policy prohibits holding Company Securities in a margin account or otherwise pledging Company Securities as collateral for a loan. Securities held in a margin account as collateral for a margin loan may be sold by the broker without the customer’s consent if the customer fails to meet a margin call. Similarly, securities pledged (or hypothecated) as collateral for a loan may be sold in foreclosure if the borrower defaults on the loan.
- Hedging Transactions. This Policy prohibits engaging in any hedging transactions with respect to Company Securities. Hedging transactions include transactions for which the value of the trade is tied to the value of Company Securities. Examples are put options, call options, and other derivative and financial instruments such as prepaid variable forwards, equity swaps, collars and exchange funds. Such transactions may permit a director, officer or employee to continue to own Company Securities obtained through employee benefit plans or otherwise, but without the full risks and rewards of ownership. When that occurs, the director, officer or employee may no longer have the same objectives as the Company’s other shareholders.
- Short Sales. This Policy prohibits short sales of Company Securities. Short sales (i.e., the sale of a security that the seller does not own) may evidence an expectation on the part of the seller that the securities will decline in value, and therefore have the potential to signal to the market that the seller lacks confidence in the Company’s prospects. In addition, short sales may reduce a seller’s incentive to seek to improve the Company’s performance. Section 16(c) of the Securities Exchange Act of 1934, as amended (the “**Exchange Act**”), also prohibits officers and directors from engaging in short sales.
- Standing and Limit Orders. Standing and limit orders (except standing and limit orders under approved Rule 10b5-1 Plans, as described below) create heightened risks for insider trading violations similar to the use of margin accounts. There is no control over the timing of purchases or sales that result from standing instructions to a broker, and as a result the broker could execute a transaction when a director, officer or other employee is in possession of material non-public information. The Company therefore discourages placing standing or limit orders on Company Securities. If a person subject to this Policy determines that they must use a standing order or limit order, the order should be limited to short duration and should otherwise comply with the restrictions and procedures outlined below under the heading “Trading Windows and Advance Notice Procedure for Directors, Executive Officers and Certain Other Key Employees.” In addition, if you are a Covered Person under this Policy, you should inform any broker with whom you place a standing or limit order of that designation at the time the order is placed.

Trading Windows and Advance Notice Procedure for Directors, Executive Officers and Certain Other Key Employees:

Because the Company’s directors, executive officers and certain other key employees listed below (the “**Covered Persons**”) have regular access to material non-public information, this Policy requires that such persons comply with the trading window and advance notice procedures described below for all transactions in Company Securities. A “**Covered Person**” is any of the following persons subject to this Policy: (a) all executive officers and Directors of Celcuity Inc., (b) all administrative assistants supporting executive officers, (c) all members of the senior management team of Celcuity, (d) those persons within Celcuity identified by the Company’s General Counsel as a Covered Person for purposes of this Insider Trading Policy, and (e) if they are otherwise subject to this Policy, the household members, dependents and Controlled Entities of the individuals identified in (a), (b), (c), or (d) of this sentence. The Company may amend the list from time to time as it deems necessary to add or subtract from the list of Covered Persons.

The trading window and advance notice procedures are not applicable to employees other than the Covered Persons. However, even if you are not subject to these additional restrictions, you should exercise caution when engaging in transactions outside of the trading window because of the heightened risk that those transactions will attract regulatory scrutiny and may expose you to accusations of improper behavior.

Trading Window: Transactions in Company Securities by Covered Persons will be restricted to certain window periods following the end of each quarter. The window during which trades generally will be permitted, provided such trades comply with advance notice procedures (see below) and provided you possess no material non-public information, will begin 24 hours (not including weekends and other non-business days) after the public release of all material information with respect to the financial results of the most recently completed quarter and will end at the close of market on the 15th day of the third month following the end of the most recent fiscal quarter.

Event-Specific Restricted Periods: From time to time, there may be a material event that is known only to certain Covered Persons. In such instances, to avoid the appearance of impropriety, the General Counsel, together with the Chief Financial Officer, may not allow any Covered Persons to engage in transactions in Company Securities, regardless of whether the trading window is open. The General Counsel also has discretion to close the trading window early in any particular quarter. In either of these situations, the General Counsel may notify Covered Persons that they should not trade in Company Securities, without disclosing the reason for the restriction. The existence of an event-specific restricted period or shortening of the trading window will not be announced to the Company as a whole and should not be communicated to any other person. Even if the General Counsel has not designated you as a person who should not trade due to an event-specific restriction, you should not trade while aware of material non-public information.

Pre-Clearance of Transactions: To provide assistance in avoiding even the appearance of an improper transaction (which could result, for example, where a person engages in a trade while unaware of a pending major development), all transactions in Company Securities by “Covered Persons” (as defined above) must notify the General Counsel of the proposed transaction by submitting the Transaction Pre-Clearance Form set forth in Attachment 1, as updated from time to time by the Company, and await pre-clearance from the General Counsel. The pre-clearance request should be submitted at least two business days in advance of the proposed transaction and must be effected within five business days of receipt of pre-clearance, unless an exception is granted. Covered Persons should also notify the General Counsel once the pre-cleared transaction is completed.

The pre-clearance will serve only to confirm the status of the trading window. Even if you receive pre-clearance of an open trading window from the General Counsel, you are still prohibited under this Policy from effecting the transaction if you possess material non-public information or it would violate any other provision of this Policy or any applicable securities law or regulation. Pre-clearance is not a defense to a claim of insider trading and does not excuse you from otherwise complying with securities laws or this Policy. You may want to consult outside counsel regarding the proposed transaction. Transactions by the General Counsel must receive pre-clearance by the Chief Financial Officer.

Rule 10b5-1 Plans and Exceptions: The trading window restrictions and pre-clearance procedures set forth above do not apply to the transactions to which this Policy does not apply, as described under the heading “Exceptions.” Further, the trading window restrictions, event-specific restricted periods, and pre-clearance procedures do not apply to transactions conducted pursuant to a binding contract, written plan or specific instruction that is adopted and operated in compliance with Rule 10b5-1(c) of the Exchange Act and is adopted at a time when such Covered Person does not possess material non-public information, so long as the underlying contract, instruction or plan also complies with the Company’s Rule 10b5-1 Plan Guidelines set forth in Attachment 2 (“**Rule 10b5-1 Plan Guidelines**”). Any adoption, modification or termination of a Rule 10b5-1 Plan must be submitted to the General Counsel for approval, at least five business days prior to entering into, modifying or terminating the Rule 10b5-1 Plan.

In addition, Covered Persons who enter into any written contract, plan, instruction or arrangement at a time that they are not aware of material non-public, which (i) specifies the amount of Company Securities to be purchased or sold and the price at which and the date on which they are to be purchased or sold, or (ii) includes a written formula or algorithm to determine those transactions, or (iii) does not permit the Covered Person to exercise any subsequent influence over the transactions, must also submit a request for approval at least five business days prior to entering into, modifying or terminating the contract, plan, instruction or arrangement, even if it does not meet the specific criteria of Rule 10b5-1(c) or the Company’s Rule 10b5-1 Plan Guidelines.

Post-Termination Transactions: This Policy continues to apply to transactions in Company Securities even after termination of service to the Company. If an individual is in possession of material non-public information when his or her service terminates, that individual may not engage in transactions in Company Securities until that information has become public or is no longer material.

Certification: Company personnel may be required from time to time to re-certify their understanding of and intent to comply with this Policy.

Company Assistance: Any person who has any general questions about this Policy or questions about specific transactions should contact the General Counsel. Remember, however, the ultimate responsibility for adhering to this Policy and avoiding improper transactions rests with you. In this regard, it is imperative that you use your best judgment and consult with your legal and financial advisors, as needed. We advise you to seek assistance if you have any questions at all. The rules relating to insider trading can be complex, and a violation can carry severe consequences.

ATTACHMENT 1

CELCUITY INC. TRANSACTION PRE-CLEARANCE FORM

Name of Covered Person: _____

Date of Notice: _____

Anticipated Date of Transaction: _____

Please describe the proposed transaction, including the type of transaction (purchase, sale, option exercise, gift, etc.), the number of shares, and any third parties involved in the transaction:

Please list any transactions in the securities of Celcuity Inc. ("Celcuity") in which you have engaged during the six months prior to the date of this notice, including, but not limited to, purchases or sales in the open market, exercises of options or warrants, gifts, or receipt of grants of restricted stock or other equity, OR if you have not had any such transactions in the preceding six months, please so indicate by checking this box. ☐

Date

Type of Transaction

Please check the following box to indicate that you are not in possession of material non-public information regarding Celcuity.
☐

Signature of Covered Person

NOTICE: This Form relates only to certain aspects of Celcuity's Policy to Prohibit Insider Trading. Pre-clearance by the Company only indicates that a trading window is open. It does not indicate whether the transaction is allowable under applicable securities laws or Celcuity policies. YOU are responsible for compliance with all applicable securities laws and Celcuity policies. You are encouraged to consult outside counsel before engaging in the proposed transaction. Failure to receive pre-clearance at all or on a timely basis shall not give rise to any claims against the General Counsel, Chief Financial Officer, Chief Executive Officer or Celcuity.

To be completed by the Company:

Pre-cleared this ____ day of _____, 20____.

Signature: _____

Title: General Counsel

ATTACHMENT 2

CELCUITY INC. RULE 10b5-1 PLAN GUIDELINES

Rule 10b5-1 under the Securities Exchange Act of 1934, as amended (the “**Exchange Act**”), provides a defense from insider trading liability if transactions occur pursuant to a plan that complies with the conditions set forth in Rule 10b5-1(c) of the Exchange Act (a “**Rule 10b5-1 Plan**”). If the plan meets the requirements of Rule 10b5-1, transactions in Company Securities may occur without regard to certain insider trading restrictions. In order to avoid a violation of securities laws and to comply with the Celcuity Inc. Policy to Prohibit Insider Trading (the “**Policy**”), any person subject to the Policy that intends to use a Rule 10b5-1 Plan must comply with these Rule 10b5-1 Guidelines. Please note that brokers may apply additional procedures, which may be more stringent.

In general, a Rule 10b5-1 Plan must be entered into at a time when the person entering into the plan is not aware of material non-public information. Once the plan is adopted, the person must not exercise any influence over the amount of securities to be traded, the price at which they are to be traded or the date of the trade. The Rule 10b5-1 Plan must either specify the amount, pricing and timing of transactions in advance or delegate discretion on these matters to an independent third party.

As specified in the Policy, a Rule 10b5-1 Plan must be approved by the General Counsel and meet the requirements of Rule 10b5-1 and these Guidelines. Any Rule 10b5-1 Plan must be submitted for approval five business days prior to entering into, modifying or terminating the Rule 10b5-1 Plan. Following approval of entry into the Rule 10b5-1 Plan, no further pre-approval of transactions conducted under the Rule 10b5-1 Plan will be required.

The following guidelines apply to all Rule 10b5-1 Plans:

- You may enter into, modify or terminate a Rule 10b5-1 Plan only during a trading window. In addition, you may not enter into, modify or terminate a Rule 10b5-1 Plan during an event-specific restricted period or otherwise while you are aware of material non-public information.
- Unless otherwise determined by the General Counsel, all Rule 10b5-1 Plans must have a duration of at least 6 months and no more than 2 years.
- For officers and directors, no transaction may take place under a Rule 10b5-1 Plan until the later of (a) 90 days after adoption or modification (as specified in Rule 10b5-1) of the Rule 10b5-1 Plan or (b) two business days following the disclosure of the Company’s financial results in a Form 10-Q or Form 10-K for the fiscal quarter (the Company’s fourth fiscal quarter in the case of a Form 10-K) in which the Rule 10b5-1 Plan was adopted or modified (as specified in Rule 10b5-1). In any event, the cooling-off period is subject to a maximum of 120 days after adoption of the plan.
- For persons other than officers and directors, no transaction may take place under a Rule 10b5-1 Plan until 30 days following the adoption or modification (as specified in Rule 10b5-1) of a Rule 10b5-1 Plan.
- Subject to certain limited exceptions specified in Rule 10b5-1, you may not enter into more than one Rule 10b5-1 Plan at the same time.
- Subject to certain limited exceptions specified in Rule 10b5-1, you are limited to only one “single trade” Rule 10b5-1 Plan during any 12-month period (i.e., a Rule 10b5-1 Plan designed to effect an open market purchase or sale of the total amount of securities subject to the Rule 10b5-1 Plan as a single transaction).
- You must act in good faith with respect to a Rule 10b5-1 Plan. A Rule 10b5-1 Plan cannot be entered into as part of a plan or scheme to evade the prohibition of Rule 10b-5. Therefore, although modifications to an existing Rule 10b5-1 Plan are not prohibited, a Rule 10b5-1 Plan should be adopted with the intention that it will not be amended or terminated prior to its expiration.
- Officer and directors must include a representation in the Rule 10b5-1 Plan at the time of its adoption or modification that (i) the person is not aware of material non-public information about the Company or Company Securities and (ii) the person is adopting the plan in good faith and not as part of a plan or scheme to evade the prohibitions of Rule 10b-5.

The Company and the Company’s officers and directors must make certain disclosures in SEC filings concerning Rule 10b5-1 Plans. Officers and directors of the Company must undertake to provide any information requested by the Company regarding Rule 10b5-1 Plans for the purpose of providing the required disclosures or any other disclosures that the Company deems to be appropriate under the circumstances. Each director, officer and other Section 16 insider understands that the approval or adoption of a pre-planned selling program in no way reduces or eliminates such person’s obligations under Section 16 of the Exchange Act, including such person’s disclosure and short-swing trading liabilities thereunder. If any questions arise, such person should consult with their own counsel in implementing a Rule 10b5-1 Plan.

CELCUITY INC.

DIRECTOR AND EXECUTIVE OFFICER ADDENDUM TO POLICY TO PROHIBIT INSIDER TRADING

In addition to the provisions of Celcuity Inc.'s Policy to Prohibit Insider Trading (the "**Policy**"), all Celcuity Inc. ("**Celcuity**" or the "**Company**") directors and executive officers, and in some cases also significant stockholders, are subject to additional legal restrictions, including under Sections 16 and 13 of the Securities Exchange Act of 1934 and the rules promulgated thereunder (the "**Exchange Act**"). This Addendum summarizes the regulations that directors and executive officers are most likely to encounter. In addition, this Addendum serves as a reminder that you are required to comply with the Policy's pre-clearance and trading window requirements. **In light of the Securities and Exchange Commission (the "SEC") regulations that apply to you, it is particularly important to comply with the pre-clearance procedures under the Policy.** Please refer to the full Policy for additional details and exceptions.

Trading Window: Under the Policy, you, as well as any of your household members, dependents and Controlled Entities who are subject to the Policy, may engage in transactions in Company Securities only during the "window periods" following the end of each quarter. The window during which trades generally will be permitted, provided the trades comply with advance notice procedures (see below) and provided you possess no material non-public information, will begin 24 hours (not including weekends and other non-business days) after the public release of all material information with respect to the financial results of the most recently completed quarter and will end at the close of market on the 15th day of the third month following the end of the most recent fiscal quarter.

Event-Specific Restricted Periods: From time to time, there may be a material event that is known only by a few of the Company's officers, directors or employees. In those instances, to avoid the appearance of impropriety, you should not engage in transactions in Company Securities, regardless of whether the trading window is open. The General Counsel also has discretion to close the trading window early in any particular quarter. In these situations, the General Counsel may notify you that you should not trade in the Company's Securities, without disclosing the reason for the restriction. The existence of an event-specific restricted period or shortening of the trading window will not be announced to the Company as a whole and should not be communicated to any other person. Even if the General Counsel has not designated you as a person who should not trade due to an event-specific restriction, you should not trade while aware of material non-public information.

Pre-Clearance: The Policy prohibits you, as well as any of your household members, dependents and Controlled Entities who are subject to the Policy, from engaging in any transaction in Company Securities without first obtaining pre-clearance of the transaction from the General Counsel. The pre-clearance request should be submitted to the General Counsel, with a copy to the Chief Financial Officer, at least two business days in advance of the proposed transaction, using the Company's Transaction Pre-Clearance Form, and must be effected within five business days of receipt of pre-clearance, unless an exception is granted. You should also notify the General Counsel once the pre-cleared transaction is completed.

The General Counsel is not required to approve pre-clearance requests, and may determine not to permit a transaction. If you are denied permission to engage in a transaction, then you should not initiate any transaction in Company Securities, and you should not inform any other person of the restriction.

The pre-clearance will serve only to confirm the status of the trading window. Even if you receive pre-clearance of an open trading window from the General Counsel, you are still prohibited under this Policy from effecting the transaction if you possess material non-public information or if it would violate any other provision of this Policy or any applicable securities law or regulation. Therefore, when making a pre-clearance request, you should carefully consider whether you are aware of material non-public information that you have obtained pursuant to your role with the Company.

Pre-clearance is not a defense to a claim of insider trading and does not excuse you from otherwise complying with securities laws or this Policy. For example, you should be prepared to comply with the SEC rules described below. You may want to consult outside counsel regarding the proposed transaction. Transactions by the General Counsel must receive pre-clearance by the Chief Financial Officer.

Section 16: Section 16 applies to directors, executive officers and more-than-10% stockholders of the Company.

Liability. In general, Section 16(b) provides that any profit realized on a purchase and a sale of Company stock within a six-month period is recoverable by the Company. For this purpose, it does not matter whether the purchase or the sale occurs first. It is not necessary for the same shares to be involved in each of the matched transactions. Losses cannot be offset against gains. Transactions are paired so as to match the lowest purchase price and the highest sale price within a six-month period, resulting in the maximum amount of recoverable profit. Good faith on the part of the insider is no defense. If the Company itself does not press a claim, a claim for recovery of the profit may be asserted by any stockholder for the benefit of the Company.

There are many types of transactions that constitute a “purchase” or a “sale” for Section 16 purposes, in addition to normal open market transactions. The receipt of an option, warrant or other right to acquire common stock (a “derivative security”) is generally a “purchase” unless received under certain employee plans and approved by independent directors. Many unusual corporate reorganizations may be “purchases” or “sales.” “Beneficial” ownership for Section 16 purposes may include indirect ownership, for example, through trusts or estates. In some circumstances, stock held by close relatives of a person may be considered to be owned beneficially by such person, and a purchase (or sale) by one individual may be matched with a sale (or purchase) by his or her close relative to produce a recoverable profit. The provisions also apply to stock held by a broker on your behalf through a brokerage account (i.e., in “street name”).

Reports. As a supplement to the profit recapture provisions of Section 16(b), Section 16(a) includes beneficial ownership reporting provisions. Each insider is responsible for filing Forms 3, 4 and 5 as required under Section 16(a).

- *Form 3.* Within 10 days of a person becoming an officer, director or 10% stockholder of an Exchange Act reporting company, such person must file an Initial Statement of Beneficial Ownership of Securities, or a Form 3, as it is more commonly known, with the SEC. A Form 3 is a statement by each reporting person of the amount of his or her beneficial ownership of each class of non-derivative securities (e.g., common stock) and derivative securities (e.g., options and warrants) of the Company. Generally, an individual is deemed a “beneficial owner” of a security if the individual has or shares the opportunity, directly or indirectly, to profit or share in any profit derived from a transaction in the securities. Special rules apply for the application of the beneficial ownership definition to trust holdings and transactions. In stating the amount of securities owned indirectly through a partnership, corporation, trust or other entity, the reporting person may report the entire amount owned by such entity or, alternatively, his or her proportionate interest in the securities beneficially owned by that entity.
- *Form 4.* When there is a change in an insider’s beneficial ownership of Company Securities, a Form 4 must be filed with the SEC on or before the second business day following most transactions, including the following:
 - Purchases and sales;
 - Stock option exercises;
 - Stock option grants;
 - Restricted stock grants;
 - Other grants, awards and any other acquisitions from the Company (including small acquisitions);
 - Gifts;
 - Dispositions to the Company that satisfy the requirements of Rule 16b-3(e), which includes (i) shares delivered to pay tax withholding amounts or an option exercise price, (ii) surrender of an option in a repricing and (iii) sale of shares;
 - Discretionary transactions pursuant to employee benefit plans where the insider controls a trade date; and
 - Changes in form of ownership (direct to indirect or indirect to direct), accompanied by a change in pecuniary interest.
- *Form 5.* A Form 5 must be filed each year (within 45 days after the end of the Company’s fiscal year) by insiders to report any exempt transactions, unless voluntarily reported earlier on a Form 4, including the following:

- Acquisitions pursuant to stock allocations under ERISA profit sharing plans and employee stock ownership plans, purchases under 401(k) plans and employee stock purchase plans;
- Inheritances;
- Small acquisitions (other than from the Company) that total \$10,000 or less during a six-month period; and
- Changes in form of ownership from indirect to direct or direct to indirect if no change in pecuniary interest.

Another purpose of the Form 5 is to promote compliance with Section 16 by requiring insiders to report any transactions required to be reported on a Form 4 but which had not been reported during the year. At year-end officers and directors who have no Form 5 items to report will be required to provide the Company with a written representation that no Form 5 filing is due (i.e., there are no unreported transactions).

Some events, like the acquisition of shares through an employee stock purchase plan or in connection with a stock dividend, are not reportable; however, the holdings must be updated to reflect the change on the next Form 4 or 5 otherwise filed. In addition, officers and directors (but not 10% owners) must report any changes which occur after they are no longer insiders if such change takes place within six months of any opposite way transaction while an insider.

All changes in beneficial ownership (unless covered by a specific exemption) are reportable, not only transactions which are purchases or sales, including sales pursuant to a Rule 10b5-1 trading plan. Reports may be due even though the reported change in beneficial ownership is not a transaction of a type which can be “matched” for purposes of short-swing profit liability under Section 16(b).

Power of Attorney. It should be noted that the SEC will not excuse a late filing simply because the individual is unavailable. If an individual is unable to personally sign a Form 4 or 5 (e.g., if you are out of town), the SEC permits the form to be signed on behalf of the individual by another person pursuant to a power of attorney as long as a power is filed with the SEC as soon as practicable thereafter. We have designed a standing power of attorney giving certain officers of the Company the authority to sign Forms 4 and 5 on your behalf in order to facilitate timely filings in your absence. Please sign and return this if you have not done so already.

Short Sales. In addition to the foregoing, Section 16(c) prohibits the Company’s directors, officers and more-than-10% stockholders from making “short sales” of any equity security of the Company. A “short sale” is a sale of securities which the seller does not own at the time or, if owned, securities that will not be delivered for a period longer than 20 days after the sale.

Section 13: All more-than-5% stockholders of the Company are required to file initial reports under Section 13 of the Exchange Act. Follow-up reports will be required if any material changes in their stockholdings occur. No filing is required where a change in the percentage of shares owned by a reporting person is caused solely by a change in the number of outstanding shares. Material changes in stockholdings in the interim will trigger additional Section 13 filing requirements, including potentially a Schedule 13D, which is a lengthier form that requires amendments within two business days to report any material acquisitions or dispositions.

Rule 144: Rule 144 provides a safe harbor for sales of shares by Company affiliates that may otherwise be considered a “distribution” that requires registration under securities laws. Company officers and directors are strongly encouraged to comply with Rule 144 in connection with any transfers of Company securities – which include abiding by volume and manner-of-sale restrictions and filing a Form 144 if the securities to be sold during a three-month period exceed 5,000 shares or have an aggregate sale price in excess of \$50,000.

Regulation BTR: Directors and executive officers may also be subject to trading blackouts pursuant to Regulation Blackout Trading Restriction, or Regulation BTR, under U.S. federal securities laws. In general, Regulation BTR prohibits any director or executive officer from engaging in certain transactions involving Company securities during periods when 401(k) plan participants are prevented from purchasing, selling or otherwise acquiring or transferring an interest in certain securities held in individual account plans. Any profits realized from a transaction that violates Regulation BTR are recoverable by the Company, regardless of the intentions of the director or officer effecting the transaction. In addition, individuals who engage in such transactions are subject to sanctions by the SEC as well as potential criminal liability. The Company has provided, or will provide, separate memoranda and other appropriate materials to its directors and executive officers regarding compliance with Regulation BTR.

The Company will notify directors and officers if they are subject to a blackout trading restriction under Regulation BTR. Failure to comply with an applicable trading blackout in accordance with Regulation BTR is a violation of law and our Policy.

Regulation M: Regulation M is a set of anti-market manipulation rules under the Exchange Act. Depending on the circumstances, this rule may at times restrict directors and executive officers from bidding or purchasing Company Securities.

Annual Certification and Compliance: Directors and executive officers may be required, on an annual basis, to certify compliance with the attached Policy to Prohibit Insider Trading and the additional provisions of this Director and Executive Officer Addendum. In addition, the Company's directors and executive officers are subject to the Company's other policies and procedures concerning confidential information and securities in effect from time to time.

DO NOT FORGET: ALL TRANSACTIONS IN COMPANY SECURITIES BY DIRECTORS AND EXECUTIVE OFFICERS MUST BE PRE-CLEARED BY CONTACTING OUR GENERAL COUNSEL.

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We have issued our report dated March 31, 2025, with respect to the financial statements included in the Annual Report of Celcuity Inc. on Form 10-K for the year ended December 31, 2024. We hereby consent to the incorporation by reference in the Registration Statements of Celcuity Inc. on Form S-8 (Reg. Nos. 333-279556, 333-271976, 333-270238, 333-265328, 333-256500, 333-253940, 333-238787, and 333-221117) and on Form S-3 (Reg. No. 333-281887 and 333-275551).

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Brian F. Sullivan, certify that:

1. I have reviewed this annual report on Form 10-K of Celcuity Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
