UNITED STATES SECURITIES AND EXCHANGE COMMISSION Washington, D.C. 20549 FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2024.

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from ______ to _____

Commission file number: 1-11311

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

13-3386776 (I.R.S. Employer Identification No.)

21557 Telegraph Road, Southfield, MI 48033

(Address of principal executive offices)

(248) 447-1500

(Registrant's telephone number including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, par value \$0.01 per share	LEA	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes 🗵 No 🗆

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes 🗆 No 🗷

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Act during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes \boxtimes No \square

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (\$232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes \boxtimes No \square

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	X	Accelerated filer	Emerging growth company	
Non-accelerated filer		Smaller reporting company		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. \Box

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. \blacksquare

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to \$240.10D-1(b).

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes 🗆 No 🗷

As of June 29, 2024, the aggregate market value of the registrant's common stock, par value \$0.01 per share, held by non-affiliates of the registrant was \$6,431,462,617. The closing price of the common stock on June 29, 2024, as reported on the New York Stock Exchange, was \$114.21 per share.

As of February 12, 2025, the number of shares outstanding of the registrant's common stock was 53,637,383 shares.

DOCUMENTS INCORPORATED BY REFERENCE

Certain sections of the registrant's Notice of Annual Meeting of Shareholders and Definitive Proxy Statement on Schedule 14A for its Annual Meeting of Shareholders to be held in May 2025, as described in the Cross Reference Sheet and Table of Contents included herewith, are incorporated by reference into Part III of this Annual Report on Form 10-K.

⁽¹⁾ Certain information is incorporated by reference, as indicated below, to the registrant's Definitive Proxy Statement on Schedule 14A for its Annual Meeting of Shareholders to be held in May 2025 (the "Proxy Statement").

⁽²⁾ A portion of the information required is incorporated by reference to the Proxy Statement sections entitled "Election of Directors" and "Directors and Corporate Governance."

⁽³⁾ Incorporated by reference to the Proxy Statement sections entitled "Directors and Corporate Governance — Director Compensation," "Compensation Discussion and Analysis," "Executive Compensation," "Compensation Committee Interlocks and Insider Participation" and "Compensation Committee Report."

⁽⁴⁾ A portion of the information required is incorporated by reference to the Proxy Statement section entitled "Directors and Corporate Governance — Security Ownership of Certain Beneficial Owners, Directors and Management."

⁽⁵⁾ Incorporated by reference to the Proxy Statement sections entitled "Certain Relationships and Related Party Transactions" and "Directors and Corporate Governance — Independence of Directors."

⁽⁶⁾ Incorporated by reference to the Proxy Statement section entitled "Fees of Independent Accountants."

PART I

ITEM 1 – BUSINESS

In this Annual Report on Form 10-K (this "Report"), when we use the terms the "Company," "Lear," "we," "us" and "our," unless otherwise indicated or the context otherwise requires, we are referring to Lear Corporation and its consolidated subsidiaries. A substantial portion of the Company's operations are conducted through subsidiaries controlled by Lear Corporation. The Company is also a party to various joint venture arrangements. Certain disclosures included in this Report constitute forward-looking statements that are subject to risks and uncertainties. See Item 1A, "Risk Factors," and Part II — Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations — Forward-Looking Statements."

BUSINESS OF THE COMPANY

General

Lear Corporation is a global automotive technology leader in Seating and E-Systems, enabling superior in-vehicle experiences for consumers around the world. We supply complete seat systems, key seat components, complete electrical distribution and connection systems, high-voltage power distribution products, including battery disconnect units ("BDUs"), low-voltage power distribution products and electronic controllers to all of the world's major automotive manufacturers. At Lear, we are *Making every drive better*TM by providing technology for safer, smarter and more comfortable journeys, while adhering to our values — *Be Inclusive. Be Inventive. Get Results the Right Way.*

We have 255 manufacturing, engineering and administrative locations in 37 countries. We continue to grow our business in every major automotive producing region of the world, both organically and through complementary acquisitions. We continue to restructure our manufacturing footprint to optimize our cost structure with 68% of our manufacturing facilities and 86% of our employees located in low-cost countries.

Lear is built on a foundation and strong culture of innovation, operational excellence, and engineering and program management capabilities. We use our product and process design and technological expertise, as well as our global reach and competitive manufacturing footprint, to achieve the following financial goals and objectives:

- Continue to deliver profitable growth, balancing risks and returns;
- Invest in product and process innovations to drive business growth and profitability;
- Maintain a strong balance sheet with investment grade credit metrics; and
- Consistently return capital to our shareholders.

Our business is organized under two reporting segments: Seating and E-Systems. Each of these segments has a varied product and technology portfolio across a number of component categories. Further, we continuously evaluate this portfolio, aligning it with industry trends while balancing risk-adjusted returns, which allows us to offer value-added solutions to our customers.

• Seating — Our Seating segment consists of the design, development, engineering and manufacture of complete seat systems and key seat components. Our capabilities in operations and supply chain management enable synchronized assembly and just-in-time delivery of complex complete seat systems at high volumes to our customers.

As the most vertically integrated global seat supplier, our key seat component product offerings include seat trim covers; surface materials such as leather and fabric; seat mechanisms; seat foam; headrests; and thermal comfort systems such as seat heating, ventilation, active cooling, pneumatic lumbar and massage products. All of these products are compatible with traditional internal combustion engine ("ICE") architectures and electrified powertrains, including the full range of hybrid, plug-in hybrid and battery electric architectures. Our thermal comfort systems are facilitated by our seat system, component and integration capabilities, together with our competencies in electronics, sensors, software and algorithms.

• **E-Systems** — Our E-Systems segment consists of the design, development, engineering and manufacture of complete electrical distribution and connection systems; high-voltage power distribution products, including BDUs; and low-voltage power distribution products and electronic controllers. These capabilities enable us to provide our customers with customizable solutions with optimized designs at competitive costs for both low-voltage and high-voltage vehicle architectures.

Electrical distribution and connection systems utilize low-voltage and high-voltage wire, high-speed data cables and flat wiring to connect networks and electrical signals and manage electrical power within the vehicle for all types of powertrains – from traditional ICE architectures to the full range of electrified powertrains that require management of higher voltage and power. Key components of our electrical distribution and connection systems portfolio include wire harnesses, terminals and connectors, high-voltage battery connection systems and engineered components. High-voltage

battery connection systems include intercell connect boards, bus bars and main battery connection systems. High-voltage power distribution products control the flow and distribution of high-voltage power throughout electrified vehicles and include BDUs which control all electrical energy flowing into and out of high-voltage batteries in electrified vehicles. Low-voltage power distribution products and electronic controllers facilitate signal, data and/or power management within the vehicle and include the associated software required to facilitate these functions. Key components of this portfolio include zonal controllers, body domain control modules and low-voltage and high-voltage power distribution modules. Our software offerings include embedded control, cybersecurity software and software to control hardware devices. Our customers traditionally have sourced our electronic hardware together with the software that we integrate and embed in it.

We serve all of the world's major automotive manufacturers through both our Seating and E-Systems businesses, and we have automotive content on more than 480 vehicle nameplates worldwide. It is common for us to have both seating and electrical and/or electronic content on the same vehicle platform.

Our businesses benefit globally from leveraging common operating standards and disciplines, including world-class product development and manufacturing processes, as well as common customer support and regional infrastructures, all of which contribute to our reputation for operational excellence. Our core capabilities are shared across component categories and include high-precision manufacturing and assembly with short lead times, complex, global supply chain management, global engineering and program management, the agility to establish and/or transfer production between facilities quickly, and a unique, customer-focused culture. In select instances, we are able to manufacture both Seating and E-Systems components in the same facility. Our businesses also utilize proprietary, industry-specific processes and standards, leverage common low-cost engineering centers and share centralized operating support functions. These functions include health and safety, logistics, quality, supply chain management and all major administrative functions, such as corporate finance, executive administration, human resources, information technology and legal. We continue to build on our reputation for operational excellence through organic and inorganic investments in automation and other advanced manufacturing technologies and the digital transformation of both our operations and administrative functions. It involves the integration of new technologies, such as Industrial Internet of Things (IIoT), cloud computing, artificial intelligence (AI), machine learning and advanced automation, into production facilities and business operations. These technologies enable smart and automated machines and smart factories to communicate, analyze and optimize products and processes, resulting in higher efficiency, quality and responsiveness to customers.

Available Information on our Website

Our website address is http://www.lear.com. We make available on our website, free of charge, the periodic reports that we file with or furnish to the Securities and Exchange Commission ("SEC"), as well as all amendments to these reports, as soon as reasonably practicable after such reports are filed with or furnished to the SEC. We also make available on our website or in printed form upon request, free of charge, our Corporate Governance Guidelines, Code of Business Conduct and Ethics, charters for the standing committees of our Board of Directors (the "Board") and other information related to the Company. We are not including the information contained on our website as part of, or incorporating it by reference into, this Report.

The SEC maintains an internet site (http://www.sec.gov) that contains reports, proxy and information statements and other information related to issuers that file electronically with the SEC.

History

Lear was founded in Detroit in 1917 as American Metal Products, a manufacturer of seating assemblies and other components for the automotive and aircraft industries, and was incorporated in Delaware in 1987. Through a management-led buyout in 1988, Lear Corporation established itself as a privately held seat assembly operation for the North American automobile market with annual sales of approximately \$900 million. We completed an initial public offering in 1994 and developed into a global supplier through organic growth and a series of acquisitions.

In May 1999, we acquired UT Automotive, Inc. ("UT Automotive") from United Technologies Corporation. UT Automotive was a leading supplier of automotive electrical distribution systems. The acquisition of UT Automotive represented our entry into automotive electrical and electronic systems and formed the basis for our current E-Systems segment.

We have subsequently augmented our organic growth plans with selective acquisitions and investments to expand our component capabilities and global footprint, as well as our automation and other advanced manufacturing technologies, including the following:

- In May 2012, we acquired Guilford Mills, a leading supplier of automotive seat and interior fabric, for approximately \$243 million.
- In January 2015, we acquired Everett Smith Group, Ltd., the parent company of Eagle Ottawa, LLC ("Eagle Ottawa"), the world's leading provider of leather for the automotive industry, for approximately \$844 million.

- In April 2017, we acquired Grupo Antolin's automotive seating business for approximately \$292 million.
- In March 2021, we acquired M&N Plastics, an injection molding specialist and manufacturer of engineered plastic components for automotive electrical distribution applications. This acquisition enabled the significant expansion of our footprint and capabilities with respect to engineered components and enhanced our vertical integration capabilities in connection systems.
- In February 2022, we acquired substantially all of Kongsberg Automotive's Interior Comfort Systems business unit ("Kongsberg ICS") for approximately \$188 million. Kongsberg ICS specializes in thermal comfort systems, including seat massage, lumbar, heat and ventilation products. This acquisition enhances our seat component capabilities by adding specialized thermal comfort seating solutions and further differentiates our product offerings by improving the seat system's performance and packaging.
- In May 2022, we acquired Romanian-based Thagora Technology SRL ("Thagora") to access scalable smartmanufacturing technology. Thagora's proprietary solutions complement our sustainable manufacturing processes by improving the production yield of our Seating segment's surface materials operations and lowering energy usage during production. In addition, Thagora's manufacturing automation technologies bring significant advances to our manufacturing operations through engineering and logistics enhancements, including improved material traceability and facility footprint utilization capabilities.
- In November 2022, we acquired InTouch Automation ("InTouch"), a supplier of manufacturing automation technologies and complex automated testing equipment critical in the production of automotive seats. InTouch's product portfolio is aligned with our manufacturing automation strategy to implement technologies designed to automate the testing and validation of seat components and complete seats.
- In April 2023, we acquired I.G. Bauerhin ("IGB"), a privately held supplier of automotive seat heating, ventilation and active cooling, steering wheel heating, seat sensors and electronic control modules, headquartered in Grundau-Rothenbergen, Germany, for approximately \$175 million. Our acquisition furthers our comprehensive strategy to develop and integrate a complete portfolio of thermal comfort systems for automotive seating. IGB provides active cooling, as well as additional scale to our seat heating and ventilation capabilities and complements the lumbar and massage capabilities obtained with our acquisition of Kongsberg ICS.
- In July 2024, we acquired WIP Industrial Automation ("WIP"), a privately held company based in Valladolid, Spain. WIP develops, integrates and deploys cutting-edge technologies to create customized automation solutions for production applications used in our business. Our acquisition of WIP further strengthens our robotics and AI-based capabilities, which are important for production efficiency, quality and safety in a modern manufacturing environment.
- In February 2025, we acquired StoneShield Engineering ("StoneShield"), a privately held company based in Castelo Branco, Portugal. StoneShield specializes in the design and development of automation technology for the wire harness industry with expertise in robotics, automated taping applications and high voltage harness assembly. Our acquisition of StoneShield will accelerate the automation of our production processes throughout our E-Systems business, further improving our efficiency and operational excellence.

Industry

We supply all vehicle segments of the automotive light vehicle original equipment market in every major automotive producing region in the world. Our sales are driven by the number of vehicles produced by the automotive manufacturers and our content per vehicle. Although 2023 industry production returned to pre-pandemic levels, 2024 industry production remained approximately 6% below 2017 peak levels (based on January 2025 S&P Global Mobility projections), and 2024 industry production in North America and Europe, our two largest markets, remained approximately 9% and 24%, respectively, below prior peak levels (based on January 2025 S&P Global Mobility projections). Since 2020, the global economy, as well as the automotive industry, have been influenced directly and indirectly by macroeconomic events resulting in unfavorable conditions, including shortages of semiconductor chips and other components, elevated inflation levels on commodities and labor, higher interest rates, and labor and energy shortages in certain markets. Certain of these factors, among others, continue to impact consumer demand. Our strategy to mitigate these impacts encompasses our comprehensive cost management process, including cost technology optimization, actions to further align our manufacturing capacity to the current industry production environment and investments in automation and other advanced manufacturing technologies, as well as commercial recovery mechanisms. This will allow us to enhance operational efficiencies, improve the utilization of risks related to macroeconomic events, see Item 1A, "Risk Factors."

Details on light vehicle production volumes in certain key regions for 2024 and 2023 are provided below. Our actual results are impacted by the specific volume mix of products within each market, as well as other factors described in Item 1A, "Risk Factors."

(In thousands of units)	2024 (1)	2023(1)(2)	% Change
North America	15,467.2	15,682.8	(1%)
Europe and Africa	17,543.2	18,390.8	(5%)
Asia	50,545.6	50,415.3	%
South America	2,891.5	2,817.9	3%
Other	1,686.4	1,766.9	(5%)
Total	88,133.9	89,073.7	(1%)

⁽¹⁾ Production data based on S&P Global Mobility.

⁽²⁾ Production data for 2023 has been updated from our 2023 Annual Report on Form 10-K to reflect actual production levels.

Automotive sales and production can also be affected by the age of the vehicle fleet and related scrappage rates, labor relations issues, labor shortages, fuel prices, regulatory requirements, government initiatives and incentives, trade agreements, tariffs and other non-tariff trade barriers (including recent U.S. tariffs imposed or threatened to be imposed on Mexico, Canada and China, as well as other countries and any retaliatory actions taken by such countries), the availability and cost of credit, the availability and cost of raw materials and critical components, and logistics issues, as well as vehicle affordability and consumer preferences regarding vehicle powertrains (including preferences regarding hybrid and electric vehicles), size, configuration and features, among other factors. The impact of potential tariffs on our business and financial condition, if any, is subject to a number of factors that are not vet known, including the effective date and duration of such tariffs, the scope and nature of any tariffs, the amount of any tariffs, any countermeasures that the target countries may take in response to such tariffs. In light of these uncertainties, we can provide no assurance that any mitigating actions that may become available to us, such as our ability to pass along some or all of the costs of any tariffs to some or all of our customers, will be successful. Our sales and production may be further affected by new entrants to the industry, including domestic automakers in certain regions and non-traditional automakers, and the restructuring actions, including facility closures, of our customers and suppliers. Our operating results are also significantly impacted by the overall commercial success of the vehicle platforms for which we supply particular products, as well as the profitability of the products that we supply for these platforms, which is determined, in part, by the level of vertical integration. The loss of business with respect to any vehicle model for which we are a significant supplier, or a decrease in the production levels of any such models, could adversely affect our operating results. In addition, larger cars and light trucks, as well as vehicle platforms that offer more features and functionality, such as luxury, sport utility and crossover vehicles, typically have more content and, therefore, tend to have a more significant impact on our operating results.

Details on our sales in certain key regions for 2024 and 2023 are provided below:

(In millions)	2024 2023		2023	% Change
North America	\$ 9,749.1	\$	9,503.4	3%
Europe and Africa	8,298.4		8,612.6	(4%)
Asia	4,392.4		4,445.0	(1%)
South America	866.1		905.9	(4%)
Total	\$ 23,306.0	\$	23,466.9	(1%)
China (consolidated)	\$ 2,969.5	\$	3,044.9	(2%)
China (non-consolidated)	2,104.0		1,867.4	13%

The automotive industry, and our business, continue to be shaped by the broad trend of electrification. Although the adoption of electrified vehicles has been slower than anticipated in certain regions, demand for, and regulatory developments related to, improved energy efficiency and sustainability (e.g., government mandates related to fuel economy and carbon emissions) remain significant drivers of this trend.

In 2025, the battery electric vehicle market is expected to represent 17% of global light vehicle production (based on January 2025 S&P Global Mobility projections), as compared to 13% in 2024 and 12% in 2023. Battery electric vehicle production increased to 11.5 million units in 2024 from 10.5 million units in 2023, primarily driven by growth in China. Increasing demand for electrified vehicles is driven by numerous product offerings from both traditional and non-traditional automotive manufacturers, government requirements and incentives, automotive manufacturers' internal targets and a growing segment of end consumers who are seeking alternatives to vehicles with traditional ICE architectures. Meeting this demand requires further

use of electronically controlled and assisted powertrains and related components to improve fuel efficiency; the adoption of alternative energy powertrains, such as 48-volt mild hybrid, full hybrid, plug-in hybrid and pure battery electric powertrains that facilitate electrification of the vehicle; and the use of lighter weight materials throughout the vehicle.

Our business is also influenced by vehicle segment trends that continue to experience a shift in consumer preference toward crossover and sport utility vehicles. This trend positively impacts our business as content per vehicle on such vehicles, especially within our Seating business, can be significantly higher. Crossover and sport utility vehicle production has grown to approximately 48% of total vehicle production in 2024, up from 37% five years ago.

Strategy

Through our products, processes, technology and strategic initiatives, we are well-positioned to capitalize on business growth opportunities. We are focused on profitably growing our businesses and have implemented a strategy designed to deliver industry-leading, long-term financial returns. This strategy is based on the following four pillars designed to drive growth and profitability in both of our business segments:

- Extend our market leadership position in Seating with priceable features, including modularity and thermal comfort systems;
- Transform our E-Systems business through accelerated growth in connection systems and vehicle architecture evolution and electrification;
- Build on our reputation for operational excellence through organic and inorganic investments in automation and digital technologies; and
- Prioritize people and the planet through our sustainability initiatives to drive business growth, cost reductions and improved employee retention.

In our Seating business, our unique product offerings are providing us with an opportunity to offer value added solutions to our customers and to use our leading market position to capture additional market share. Our key seat component products include seat trim covers; surface materials such as leather and fabric; seat mechanisms; seat foam; headrests; thermal comfort systems such as seat heating, ventilation, active cooling, pneumatic lumbar and massage products; and seat reconfigurability through Configurable Seating Architecture (ConfigurE+TM). Further, we are leveraging our distinct combination of complete seat system, seat component and thermal comfort expertise and capabilities with our ComfortFlex by LearTM module, an architecture of modular designs combining two or more thermal comfort functions, and our ComfortFlexTM and ComfortMax SeatTM module, the integration of one or more thermal comfort features into the seat trim cover. These ComfortFlexTM and ComfortMax SeatTM modules can reduce sub-components by up to 50% and increase airflow directly to the occupant by up to 40%, as compared to currently available designs. With our thermal comfort systems expertise, we are poised to capitalize on the market trends in electric vehicles, second and third row comfort, and ride sharing, while also providing greater design, cost, production and energy efficiency for our customers.

In our E-Systems business, our broad capabilities in electrical distribution and connection systems; high-voltage power distribution products, including BDUs; and low-voltage power distribution products and electronic controllers support the trend toward electrification, as well as the evolution toward zone-based vehicle electrical architectures for both ICE and electrified powertrains. We are investing in and expanding our electrical distribution and connection systems business. This business is benefiting from expanded content per vehicle in line with higher circuit counts supporting high-speed data movement within the vehicle, as well as high-voltage wire harnesses and high-voltage battery components such as intercell connect boards on electrified powertrains. In addition, we have enhanced our vertical integration capabilities in connection systems through the acquisition of M&N Plastics. Our high-voltage power distribution business, including our BDU business, and our low-voltage power distribution business are benefiting from the increased adoption of electrified powertrains and the expansion of longer range, larger format (trucks and SUVs) and higher performance electrified vehicles, where we provide market-leading solutions. Differentiation through higher power management capacity, lighter weight solutions, and optimized and vertically integrated manufacturing solutions provide us with a competitive advantage in the electrification market. Our electronic controllers business is benefiting from the adoption of new vehicle electrical architectures with more integrated power management and control, which is aligned with our strong history of providing highly complex and integrated electronics to our customers. We are focusing future investments on those products where we believe that we have a competitive advantage and we can achieve industry-leading financial returns.

IDEA by Lear - Innovative. Digital. Engineered. Automated. - supports our strategy to drive growth and improve profitability. IDEA reflects our commitment to continue to strengthen our competitive position in both of our business segments through the development of innovative products and the utilization of process automation and other advanced technologies that improve our profitability through increased efficiency and extend our leadership position in operational excellence. Our investments in these technologies and the digital transformation of both our operations and administrative functions aim to improve profitability through process improvements and further efficiency gains. Our 2022 acquisition of Thagora provides us with scalable smartmanufacturing technology that improves the production yield of our Seating segment's surface materials operations and lowers

energy usage during production. Our 2022 acquisition of InTouch provides us with automated end-of-line seat function testing, equipment and software integration capabilities and vision system technologies. Our acquisition of WIP in 2024 further strengthened our robotics and AI- based capabilities which are important for production efficiency, safety and quality in a modern manufacturing environment. Our recent acquisition of StoneShield in 2025 will accelerate the automation of our production processes throughout our E-Systems business. These acquisitions enable us to further our in-house product and process capabilities and strengthen our competitive differentiation.

We continue to embed responsible and sustainable principles into our key business processes and operations. We have developed products such as FlexAirTM, a 100% recyclable alternative to traditional foam, ReNewKnitTM, a sustainable sueded alternative material that is fully recyclable at its end of life and composed of 100% recycled plastic bottles, and SoyFoamTM, a substitute for certain petroleum-based products. We also have improved energy efficiency in our operations and established climate goals to reduce carbon emissions and increase the use of renewable energy.

Seating Segment

Lear is a recognized global leader in complete seat systems. Based on independent market studies and management estimates, we believe we are one of the two largest suppliers of complete seat systems globally on the basis of revenue with strong positions in all major markets and a 26% global market share in 2024. We are also a recognized leader in key individual seat components produced for complete seat systems.

Our Seating segment consists of the design, development, engineering, assembly and just-in-time delivery of complete seat systems, as well as all major seat components, including seat trim covers; surface materials such as leather and fabric; seat mechanisms; seat foam; headrests; and thermal comfort systems such as seat heating, ventilation, active cooling, pneumatic lumbar and massage products. Our extensive system-level knowledge and component-level capabilities, including internal development of sensor and control algorithms, have provided a strong foundation for innovation and commercialization of thermal comfort systems and convenience features. We believe that with our comprehensive set of component offerings, we are a leader in the global market. Overall, our global manufacturing and engineering expertise, low-cost footprint, complete component capabilities, quality leadership and strong customer relationships provide us with a catalyst for both organic and inorganic growth opportunities to enable us to reach our mid-term target global market share of 29% in complete automotive seat systems.

We produce seat systems that are fully assembled and ready for installation in light vehicles globally. Seat systems are generally designed and engineered for specific vehicle models or platforms. We develop seat systems and components for all vehicle segments from compact cars to pick-up trucks and full-size sport utility vehicles. We are the world leader in luxury and performance automotive seating, providing craftsmanship, elegance in design, use of innovative materials and industry-leading technology required by premium brands and vehicles, including those produced by Alfa Romeo, Aston Martin, Audi, BMW, Cadillac, Chevrolet, Ferrari, GMC, Jaguar, Lamborghini, Land Rover, Lincoln, Maserati, Mercedes-Benz, NIO, Polestar, Porsche and Volvo.

We are executing on our strategy to extend our leadership position in the market through unique product offerings and selective vertical integration. Our acquisition of Kongsberg ICS provided us with capabilities in seat massage, lumbar, heating and ventilation. Our acquisition of IGB provided us with capabilities in seat heating, ventilation and active cooling, steering wheel heating, seat sensors and electronic control modules. ConfigurE+ is a wireless powered rail system that allows for easy repositioning of seats within vehicles. Further, selective vertical integration of key seat components is enhancing growth and increasing profitability, as well as improving quality. In this regard, we have developed standardized seat mechanisms that can be used across multiple vehicle programs to minimize investment costs. Our seat mechanisms are developed and manufactured in key locations to supply every major automotive producing region in the world. We believe that our precision-engineered seat mechanism expertise and low-cost manufacturing footprint provide us with a competitive advantage.

Our seat cover operations have continued to expand in low-cost markets, including precision cutting, assembly, sewing and lamination. Our acquisition of Eagle Ottawa provided us an industry-leading market share in automotive leather globally. Our capabilities in leather design, development and manufacturing allow us to deliver the most luxurious, durable and performance-tested leathers to our customers. Our acquisition of Guilford Mills provided us with Guilford Performance Textiles, a line of automotive seat and interior fabrics. On a global basis, we can provide a full range of seat cover capabilities, including design and surface coating solutions, as well as unique leather and fabric applications. We believe that the combination of these capabilities in seat surface materials differentiates us and provides us with a competitive advantage facilitating our leadership position in the industry.

We are committed to reducing the environmental footprint of our products, operations and supply chain as a means to drive business growth and reduce costs. We are working to improve the sustainability of our operations through identification and reduction of generated waste, reuse of materials whenever possible and recycling. Our sustainability efforts leverage available technology to replace certain petroleum-based products with more sustainable alternatives, such as SoyFoamTM and, more

recently, FlexAirTM, our 100% recyclable non-foam alternative that reduces both CO2 emissions and mass and is being integrated into our customized and innovative portfolio of products. In addition, we have focused development efforts on commercializing a range of fabrics that contain recycled, renewable or recyclable yarns that reduce our environmental impact. These fabrics include our ReNewKnitTM sustainable sueded alternative material, which is a first-to-market automotive textile that is fully recyclable at its end of life and composed of 100% recycled plastic bottles. ReNewKnitTM fibers are spun from polyester yarn and finished with a foam-free recycled fleece backing.

Thermal Comfort Systems

Our thermal comfort systems consist largely of seat heating, ventilation, active cooling, pneumatic lumbar and massage products, together with other thermal products such as panel and steering wheel heating. Over the past decade, we have dedicated significant engineering resources to designing, developing and advancing the future of thermal comfort systems. Our recent acquisitions of Kongsberg ICS and IGB further expanded our unique capabilities with experienced engineering and manufacturing leaders to accelerate the execution of our thermal comfort systems strategy and provide purchasing, logistics, administrative and footprint synergies to improve our cost competitiveness. Through component modularity efforts, we are innovating and enhancing product design by combining multiple functions that were previously provided across multiple components into modular solutions. Traditionally, heating, ventilation, lumbar and massage products have been designed as independent systems in a multi-layered model. We are redefining comfort, design and performance through ComfortFlexTM and ComfortMax SeatTM. These revolutionary designs further reduce part complexity, mass and package size (allowing for easier adoption in second and third rows) and significantly improves the final seat assembly process by reducing the number of components assembled into our seats in the just-in-time facilities, while providing a more efficient system with improved performance (including reduced time to sensation) and enhanced comfort for the occupant. In addition, our complete thermal comfort module can be supplied to any seat supplier and is compatible with any seat structure with traditional foam or FlexAirTM. We believe that we are the only supplier with the complete capabilities necessary to realize these modular concepts, providing a unique value proposition to our customers.

Advanced Seating Craftsmanship and Innovation

We believe that our broad capabilities, including advanced design and material integration skills, provide us with a competitive advantage. Our team has developed a portfolio of technologies that deliver sustainable products, differentiated design, craftsmanship and comfort. We are leveraging our unique position to be an industry leader in design and facilitating customer interactions with designers and engineers working collaboratively to create innovative solutions early in the design process. The breadth of our portfolio and depth of our design expertise allows us to better integrate all seat components and bring innovative designs into production with the highest level of craftsmanship, providing differentiated design comfort, quality and overall value to the end consumer. We believe that our unmatched component capabilities, design expertise, global manufacturing presence, and portfolio of enabling and sustainable technologies provide a unique value proposition to our customers and will drive market share gains for our business.

We believe that we are the only fully integrated seat supplier with global capabilities in critical seat components, together with software design, integration and manufacturing expertise. To maintain our competitive advantage, we continue to drive advanced seating innovations through a combination of comprehensive product capabilities aligned with industry trends and early customer engagement. The result is a broad portfolio of innovative, sustainable solutions enabling our intelligent seating offerings for consumers.

Intelligent Seating (INTUTM Seating)

The seat offers a direct connection between the driver, passengers and vehicle systems. Our development of $INTU^{TM}$ technologies provides the driver and passengers with intelligent, intuitive seat system options that offer advanced comfort solutions, including thermal products, as well as configurable seating product technologies. Our extensive knowledge in consumer ergonomics and comfort, in combination with our electronics capabilities, facilitated the development of our $INTU^{TM}$ seat features, which are capable of being programmed to identify certain key occupant inputs and automatically adjust the appropriate seat parameters to provide consumers with a better, highly personalized, in-vehicle experience.

Our INTUTM Comfort features were developed to improve comfort throughout long drives. Derived from our research, INTUTM Comfort deploys proprietary technology and in-house developed analytical processes to identify the optimal seat position for the occupant given certain conditions. For example, on extended trips, the lumbar support is continuously adjusted for optimal comfort, and seat bolsters automatically adjust during sharp curves to provide the driver with optimal support. We received our first production award incorporating these advanced features which is expected to launch in 2027 with a luxury European automaker. We have developed and designed efficiencies into individual seat components and full system integration to outperform existing systems.

Other Core Capabilities

With capabilities unmatched by any seat supplier in the industry, we consistently produce world-class seat systems to meet or exceed the expectations of every type of driver and passenger. Our designs incorporate intelligent features, and our patented modular sub-assemblies with embedded technologies have the potential to transform the seating market.

We maintain state-of-the-art testing, instrumentation and data analysis capabilities. We have in-house, industry-leading seat validation test centers featuring crash worthiness, durability and full acoustic and sound quality testing capabilities. Together with computer-controlled data acquisition and analysis capabilities, these centers provide precisely controlled laboratory conditions for sophisticated testing of parts, materials and systems. In addition, we incorporate many convenience, comfort and safety features into our designs, including advanced whiplash prevention concepts, integrated restraint seat systems and side impact airbags. We also invest in our computer-aided engineering design and computer-aided manufacturing systems to facilitate a more efficient design process.

We have developed products and materials to improve comfort and ease of adjustment, promote customization and styling flexibility, increase durability and reliability, enhance safety, expand the usage of environmentally friendly materials and reduce cost and weight.

Our core capabilities extend into key seat components serving as a platform for innovation as well, including:

Leather and Fabric – We deliver the most luxurious, durable and performance-tested leathers to more automotive brands globally than any other automotive leather supplier, while promoting sustainable and responsible sourcing practices. Our premium leathers are designed for seamless integration with our industry-leading secondary operations, exceeding customer expectations for quality and service. Our Eagle Ottawa premium leather group has developed and launched, in both Europe and North America, a new technology that allows for the creation of highly customizable designs with new levels of definition and pillowing, improving the comfort and style of the seat while enabling the necessary air flow for ventilated seats. Additionally, our proprietary anti-soiling performance leather finishing technology, AnsoléTM, improves durability and protects against staining and fading.

With respect to fabrics, we have focused development efforts on commercializing a range of fabrics that contain recycled, renewable or recyclable yarns that reduce our environmental impact. These fabrics include our ReNewKnitTM sustainable sueded alternative material that is fully recyclable at its end of life and composed of 100% recycled plastic bottles, which launched with a global automotive manufacturer in 2024. Our branded TeXstyleTM surface material coatings and treatment technologies enhance cleanability by releasing and repelling stains; prevent the growth of bacteria and mildew through the addition of antimicrobial treatments, including silver ion technologies; protect fabric against water and oil-based stains; minimize soiling of light colors; and are anti-static and anti-dusting.

• Seat Mechanisms – We supply world-class front and rear seat systems, recliners, tracks, latches and other products in a scalable modular family. Our seat architectures are a core component of our industry-leading vertical integration capabilities around the world. Smaller, low-weight and low-noise materials deliver high performance, safety and functionality.

Our high-speed smart fold technology is a folding adjustment mechanism that delivers premium convenience while maintaining leading safety and comfort benefits. Our mini recliners and micro adjust tracks are seat mechanisms that provide precision movement and facilitate interior packaging space flexibility. Our ECO Structures utilize an innovative hub and spoke concept offering economic solutions for developing markets.

- Zero Gravity Seat Zero gravity seats (i.e., seats designed to replicate the sensation of weightlessness) have become
 increasingly more important in the local China market as they provide an enhanced comfort experience for the second row
 occupants. We have developed and launched a zero gravity seat for second row occupants that includes a 65 degree
 recline, a raising calf rest for lower leg support, an adaptive arm rest and occupant body pressure distribution, together
 with various comfort features, including integrated pneumatic neck support and heated back massage.
- Foam and Comfort Our FlexAir[™] technologies offer a 100% recyclable non-foam alternative to traditional foam. Our highly engineered low-profile foam, low-emission foam and our first-to-market, U.S.-sourced SoyFoam[™] are break-through innovations in comfort, safety and sustainability. Our first production award incorporating this application launched in 2024.

Manufacturing Leadership

Our continued focus on expanding our expertise and capabilities in materials, logistics and manufacturing is a key enabler in providing our customers with world-class seat system products. Our unique proprietary processes and employee engagement initiatives will continue to provide us with a competitive advantage.

We pioneered just-in-time seat assembly. Typically located adjacent to or near our customers' manufacturing and assembly sites, our just-in-time facilities deliver assembled seats matching our customers' exact build specifications for a particular day,

shift and sequence. Our expertise in logistics and lean manufacturing processes enable us to meet our customers' delivery requirements while maintaining inventories at optimum levels.

We believe that we are the world's most vertically integrated manufacturer of complete seat systems, providing us with a competitive advantage in terms of cost and quality. We utilize the latest industry innovations and automated technologies to facilitate our continuous improvement efforts. Our recent investments in automation and other advanced manufacturing technologies, including the 2022 acquisitions of Thagora and InTouch and the 2024 acquisition of WIP, have resulted in lower manufacturing costs, improved safety and ergonomics, and higher production reliability. Moreover, we have continued to expand our employee engagement initiatives, achieving global scalability and successfully driving cultural advances. Our initiatives have resulted in improvements in quality, lower employee absenteeism, material cost savings and a reduction in average assembly build times per seat set.

Customers

The top five customers of our Seating segment are: General Motors, Mercedes-Benz, Volkswagen, Stellantis and BMW.

Competition

Our primary competitors in this segment globally are Adient plc, Forvia SE, Magna International Inc., Toyota Boshoku Corporation, TS Tech Co., Ltd. and Yanfeng Automotive Systems Co., Ltd., which have varying market presence depending on the region, country or automotive manufacturer. Toyota Motor Corporation and Honda Motor Co. Ltd. hold equity ownership positions in Toyota Boshoku Corporation and TS Tech Co., Ltd., respectively. A limited number of other automotive manufacturers maintain a presence in the seat system market through wholly owned subsidiaries or in-house operations. In seat components, we compete with the seat system suppliers identified above, as well as certain suppliers that specialize in particular components.

For additional factors that may impact our Seating segment's business, financial condition, operating results and/or cash flows, see Item 1A, "Risk Factors."

E-Systems Segment

Our E-Systems segment consists of the design, development, engineering and manufacture of complete electrical distribution and connection systems; high-voltage power distribution products, including BDUs; and low-voltage power distribution products and electronic controllers for light vehicles globally. We are a leader in signal distribution and power management within the vehicle for all types of powertrains – from traditional ICE architectures to the full range of electrified powertrains. Our expertise and product portfolio support new vehicle electrical architectures, including the adoption of high-voltage electrified vehicle architectures and the transition to zone-based vehicle electrical architectures. We are expanding our capabilities and introducing new product lines, primarily within our electrical distribution and connections systems business and including intercell connect boards, BDUs, engineered components, high-voltage wire, high-speed data cables and zonal controllers. Further, we are de-emphasizing and exiting certain electronics product lines, including audio modules, lighting modules, on-board chargers, telematics control units and niche electronic controllers, where we do not see a path to sustainable risk-adjusted financial returns.

In our E-Systems business, the electrification of the vehicle powertrain adds significant content per vehicle for our products, including high-voltage wire harnesses, high-voltage battery connection systems (intercell connect boards, bus bars and main battery connection systems) and BDUs. Higher performance and larger format electrified vehicles, including trucks and SUVs, as well as electrified vehicles with longer range, further increase content per vehicle and aligns favorably with our products, including high power-to-size ratio terminal systems, high performance BDUs and intercell connect boards.

In addition, the continuing evolution of the vehicle electrical architecture is introducing more highly integrated power management and control electronics (or zonal controllers) and greatly expanding the use of high-speed data within the vehicle. Our customers are adopting these new architectures on both ICE and electrified powertrains to enable continued integration of more electrical and electronic content and to enable future software-defined functionality. These market demands align favorably with our expertise in zonal controllers and high-speed data cables.

Our product portfolio strategy enables increased leverage of our investments across a focused product portfolio and creates a competitive advantage as we are able to offer our customers customized solutions optimized to provide complete architecture benefits. Our component designs consider the performance of the complete architecture, creating superior value for our customers. Our investments in electrification over the past sixteen years are providing us with a significant growth opportunity with respect to this trend. Further, electrified vehicle architectures represent a significant content per vehicle expansion opportunity for us.

Electrical Distribution and Connection Systems

Electrical distribution and connection systems route network and electrical signals and manage electrical power within the vehicle for all types of powertrains, including traditional ICE architectures and the full range of electrified powertrains, supporting the current industry trend toward electrification. Key components of electrical distribution and connection systems include wire harnesses, terminals and connectors, high voltage battery connection systems and engineered components for both ICE architectures and electrified powertrains that require management of higher voltage and power.

Wire harness assemblies, together with connection systems, link all of the various electrical and electronic devices within the vehicle to each other and/or to a power source. Our wire harnesses provide low-voltage (12 volts and 48 volts) and high-voltage (60 volts – 800 volts) power distribution. Low-voltage wire harnesses are used on all light duty vehicles, and high voltage wire harnesses are used on vehicles with electrified powertrains. Wire harness assemblies are a collection of individual circuits fabricated from raw and insulated wire, which is automatically cut to length and terminated during the manufacturing process. Individual circuits are assembled together, inserted into connectors and wrapped or taped to form wire harness assemblies. The assembly process is labor intensive, and as a result, production is generally performed in low-cost labor sites in Mexico, Honduras, Brazil, Eastern Europe, Africa, China and the Philippines.

Connection systems include terminals and connectors, high-voltage battery connection systems and engineered components that join wire harnesses together at their respective end points or connect electronic devices to wire harnesses. Connection systems can vary significantly in size and complexity depending on the amount of power or data being transferred and the number of connections being made at any particular point in the electrical distribution system. Connection systems support both low-voltage and high-voltage power distribution. Low-voltage connection systems are used on all light duty vehicles and high-voltage connection systems are used on vehicles with electrified powertrains. Our connection systems are produced using highly automated processes, including stamping, injection molding and automated assembly processes. In 2021, we entered into a partnership with Hu Lane Associate Inc., a world-class manufacturer of automotive connector products, to expand our business opportunities in connection systems are currently manufactured in Germany, the Czech Republic, Morocco, China and the United States. Key material inputs to our connection systems business include metals, such as copper and aluminum, and various resins.

High voltage battery connection systems consist of stamped and molded components and assemblies that provide connections between battery cells, from the battery pack to the vehicle electrical architecture, and between other electrical components within the high-voltage battery pack. High-voltage battery connection systems can vary in size and design to accommodate various high-voltage battery architectures and enable safe and efficient electrified powertrain battery packs. Specific products include intercell connect boards, bus bars and main battery connection systems. These products are produced using highly automated processes, including stamping, bending, molding and assembly. We leverage our metal stamping capabilities in our Seating business to provide a competitive advantage for these products through vertical integration and supply chain management. Our established capabilities in connection systems are produced in Germany, the United States, the Czech Republic, Mexico and China. Key material inputs to our high-voltage battery connection systems business include metals, such as copper, aluminum, and steel, and various resins.

Engineered components consist of molded components included in wire harness assemblies. These components perform specific functions, such as protection, routing, sealing or covering, to ensure that the wire harness assembly properly performs its function. In 2021, we acquired M&N Plastics, a privately owned injection molding specialist and manufacturer of engineered plastic components for automotive electrical distribution applications, which enabled the significant expansion of our footprint and capabilities with respect to engineered components. Engineered component capabilities are a significant contributor to vertically integrated product assemblies and enable business growth across electrical distribution and connection systems and our Seating business due to increased control of product cost and quality, as well as the supply chain. Engineered components are applicable to all vehicle architectures and are produced using molding processes. Our engineered components are currently manufactured in Germany, the Czech Republic, Morocco, China and the United States. Key material inputs to our engineered components are various resins.

High-Voltage Power Distribution Products, including BDUs

In our E-Systems segment, we also design, develop, engineer and manufacture high-voltage power distribution products, including BDUs. These products control the flow and distribution of high-voltage power throughout electrified vehicles and include BDUs which control all electrical energy flowing into and out of high-voltage batteries in electrified vehicles. More than fifteen years of experience in high-voltage power distribution products, together with our expertise in areas integral to the performance of BDUs, such as power and thermal management and electrical architecture integration, have contributed to our well-established market position and our ability to effectively and competitively supply BDUs. High-voltage power distribution products are applicable to all electrified powertrain vehicles, but the size, complexity and configuration can vary widely

dependent upon the power requirements of individual vehicle platforms. Our high-voltage power distribution products are currently manufactured in Mexico, China, Spain and Morocco. Key material inputs to our high-voltage power distribution products include metals, including copper and aluminum, various resins, and power components, such as fuses, e-fuses and contactors.

Low-Voltage Power Distribution Products and Electronic Controllers

In our E-Systems segment, we also design, develop, engineer and manufacture low-voltage power distribution products and electronic controllers that control various functions and power distribution within the vehicle. Our electronic product offerings include zonal controllers, body domain modules and low-voltage power distribution units. These units are typically purchased with embedded software to manage vehicle functions, control power distribution and ensure vehicle network connection. We assemble these modules using specialized, high-speed surface mount placement equipment and assembly processes in Mexico, Europe, Northern Africa and China.

Technology

Our complete electrical distribution and connection system design capabilities, coupled with market-leading component technologies, allow early access to our customers' product development teams, which provides an indication of our customers' product needs and enables us to develop system design efficiencies. Our expertise is developed and delivered by approximately 2,100 engineers across fourteen countries and is led by four global technology centers of excellence in China, Germany, Spain and the United States for each of our major product lines in this segment.

In electrical distribution and connection systems, our technology includes expertise in the design and use of alternative conductor materials, such as aluminum, copper-clad steel and other hybrid alloys. Alternative conductor materials can enable the use of ultra small gauge conductors, which reduce the weight and packaging size of electrical distribution and connection systems. We also have developed proprietary manufacturing process technologies, such as our vertical manufacturing system that features three dimensional wire harness assembly boards. Our expertise in connection system technology facilitates our ability to implement these small gauge and alternative alloy conductors. We have developed advanced capabilities in aluminum terminals and aluminum wire termination, ultra small gauge termination and high-voltage terminals and connectors. We have developed high density in-line connectors and new small gauge terminals that will enable wire gauge reduction and provide our customers with smaller and lower cost solutions. In high-voltage battery connection systems, we have established a leading capability in power density (power per packaging size) that is being adopted by multiple automotive manufacturers. In addition, we have developed highly integrated and highly automated solutions to improve the performance of high-voltage batteries. These technologies are supported by our proprietary virtual proving grounds, which is an industry-leading suite of in-house developed tools and processes to significantly reduce design, development and validation testing time and expense. Our ongoing and accelerating investments in automation and other advanced manufacturing technologies, including the automation of wire harness manufacturing, design for automation and digital transformation, will yield future efficiencies and flexibility to our operations.

In high-voltage power distribution products, including BDUs, and low-voltage power distribution products, we have developed many patented or patent pending technologies that enable management of higher power levels and efficient thermal management. Our technology and capabilities were awarded an Automotive News PACE Award for technological excellence in 2021. In addition, we partnered with BASF and General Motors to develop the BDU in the 2022 GMC Hummer EV and won the Society of Plastics Engineers Automotive Innovation Award for the electric and autonomous vehicle systems category in 2023. Our BDU capabilities enable the highest power large-format vehicles by utilizing innovative technologies, including flat-flex wires to quickly dissipate heat. Our product achieves a 20% weight reduction, 32% size reduction and 135% gain in current-carrying capability across 400 volt and 800 volt architectures, as compared to currently available architecture offerings. These technologies are also scalable to achieve superior performance for vehicles with lower power requirements.

In electronic controllers, we are a market leader in zone control, body domain control and power distribution technology. Further, our expertise in e-fuse technology is leading to new power distribution business awards as new architectures are adopted and functional safety requirements increase. Software is a critical element of this part of our business. Software capabilities are becoming more important in the management of complex and highly sophisticated electronic architectures. Software within the vehicle is rapidly growing as a key element of technological innovation and a cost effective way to provide new features and functions.

For additional factors that may impact our E-Systems segment's business, financial condition, operating results and/or cash flows, see Item 1A, "Risk Factors."

Customers

The top five customers of our E-Systems segment are: Ford, General Motors, Jaguar Land Rover, Geely (including Polestar and Volvo) and Volkswagen.

Competition

Our major competitors in electrical distribution and connection systems include Aptiv PLC, Leoni AG, Molex Incorporated (a subsidiary of Koch Industries Inc.), Sumitomo Corporation, TE Connectivity and Yazaki Corporation. Our major competitors in BDUs include Contemporary Amperex Technology Co. Limited, Delta Electronics, Inc., LG Energy Systems, Ltd., Panasonic Holdings Corporation and Yazaki Corporation. Our major competitors in electronic controllers include Aptiv PLC, Continental AG, Denso Corporation, Harman International Industries, Incorporated (a subsidiary of Samsung Electronics Co. Ltd.), Hella (a subsidiary of Forvia SE), Robert Bosch GmbH, Valeo S.A. and Visteon Corporation.

Sustainability

Sustainability initiatives provide the opportunity to gain competitive advantages. For example, we believe that growing customer and consumer demand for sustainable products provides opportunities for growth, and the more efficient use of energy and natural resources provides the potential to lower our operating costs while reducing our impact on the environment. We are continuously working to embed responsible and sustainable principles into our key business processes and operations, including enterprise risk management, innovation, procurement, product and process development, and sales. Our sustainability strategy and initiatives are developed by a cross-functional team of senior subject matter experts, reviewed and approved by senior management and overseen by the Governance and Sustainability Committee of our Board. We actively communicate our goals and activities to our investors in our public disclosures available on our website and in our SEC filings. Our sustainability efforts demonstrate how we live our core value to *Get Results the Right Way*, which we have reinforced by recommitting to the United Nations Global Compact each year since becoming a participant in 2020.

Energy Efficiency and Carbon Reduction Efforts at Lear

• How We Are Driving Sustainability in Our Production Processes

We employ standardized processes globally that are designed to drive the efficient use of energy to reduce energy costs and greenhouse gas emissions, prevention of pollution and use of safe and sustainable production processes. We have published carbon reduction goals that we intend to achieve by 2030, including 100% usage of renewable energy for electric power consumed at our facilities and a 50% reduction in our Scope 1 (direct) and Scope 2 (indirect) carbon emissions at our facilities globally, as well as an aspiration to be carbon neutral by 2050.

We are implementing a multifaceted approach to achieve these goals. In our internal operations, we are focused in large part on increasing our usage of renewable energy, as well as on efforts to reduce energy consumption and use energy more efficiently. In particular, we have developed, and are implementing, a comprehensive renewable energy strategy which includes the following:

- On-site renewable energy generation at certain sites (we currently have solar arrays operating at 20 sites in Europe, South America and China);
- Virtual power purchase agreements, where viable, to support new renewable energy projects; and
- Purchasing energy attribution certifications from energy providers, whether bundled with existing energy purchases
 or unbundled in certain regions.

Our operations globally use our Energy Efficiency, Water Usage and Waste Generation Playbooks to promote sustainable practices within our facilities, while at the same time increasing operational efficiency and reducing costs. In addition, our facilities' specifications for new construction and significant building refurbishments require the consideration of more energy efficient systems, such as heating and cooling systems, wherever practicable.

While the foregoing efforts will help us drive toward the elimination of carbon emissions in those areas we directly control (Scope 1 and 2 emissions), we are also progressing toward our longer-term overall goal of carbon neutrality across our value chain (including Scope 3 emissions). In terms of our supply chain, we are communicating our carbon and renewable energy goals, as well as our expectation that our suppliers have, and follow, their own internal policies regarding the conservation and efficient use of natural resources, including energy.

• How We Are Driving Sustainable Products

The automotive industry remains focused on the development of sustainable transportation solutions, particularly in light of the continued focus on climate change and environmental sustainability among governments, non-governmental organizations, consumers and other stakeholders. This focus is increasing the expectations, and in some cases, leading to regulatory requirements, that the automotive industry reduce the carbon emissions generated by vehicles.

Certain of our product offerings are designed to capitalize on these evolving regulatory requirements and consumer preferences, such as electrical distribution and connection systems and BDUs designed for high-voltage applications, providing growth opportunities for our business. Our ComfortFlexTM and ComfortMax SeatTM modules can increase the efficiency of a vehicle's HVAC system and, in turn, potentially facilitate an increased range for electric vehicles. In addition, our lightweight components and vertical integration capabilities can facilitate weight reductions and other performance efficiencies in our products, in turn enabling lower emissions and increased battery driving range.

Our customers' focus on sustainability is aligned with our efforts to develop products that are more environmentally sustainable and that promote circularity in the automotive industry. These products include, without limitation, FlexAirTM, our 100% recyclable non-foam alternative, and ReNewKnitTM, our sustainable wrap-knit textile alternative that is fully recyclable at its end of life and composed of 100% recycled material.

We are also committed to working with our suppliers and customers to source raw materials, including leather, in a sustainable manner. Our leather operations source cattle hides as a byproduct of the beef industry and are helping to protect forests by working to eliminate purchases of such hides from cattle farms involved in deforestation and forest degradation. Our No Deforestation Policy aligns with industry standards and requires of our suppliers:

- Supply chain transparency, so that all materials supplied to us are from legal sources;
- Land is not clear-cut or burned for production or development; and
- Compliance with governmental laws, regulations and guidelines regarding deforestation.

With respect to the Amazon rainforest, 100% of the direct Brazilian suppliers to our leather operations use georeferencing technology to confirm that their suppliers did not directly buy cattle from farms involved in deforestation, invasion of indigenous and protected areas or other human rights violations. To monitor our suppliers' compliance with these requirements, we may conduct audits or assessments and/or require third-party verification.

Other Sustainability And Governance Initiatives

We are especially proud of our employees' efforts to support our global communities. Through our Operation GIVE campaign at our Southfield, Michigan headquarters, over \$750,000 in employee contributions benefited local programs focused on economic well-being, education and the environment in 2024. In addition, our teams completed numerous volunteer projects to support the global communities where we live and work.

Our commitment to human rights is set forth in our Human Rights Policy which clearly defines how we approach, govern and defend the dignity of people throughout our operations, our global supply chain and our communities.

Our governance activities help ensure that our business and operations are conducted in compliance with all applicable laws, as well as Lear's policies and procedures, particularly our Code of Business Conduct and Ethics. Our Board and its Audit and Governance and Sustainability Committees oversee our compliance and governance activities. Our expectations related to conducting business in a sustainable and ethical manner extend to our supply base. Suppliers must meet the requirements of our Supplier Sustainability Policy and Global Requirements Manual and Code of Conduct for Suppliers. We monitor and assess their compliance both internally and through the use of a third party.

Human Capital Management

Our human capital management strategy is based on our belief that an important factor in delivering the highest quality products and services is to maintain a work environment that prioritizes safety and fosters collaboration, inclusion, tolerance and respect for our 173,700 employees around the world. Our Board and its People and Compensation Committee oversee this strategy.

As of December 31, 2024 and 2023, our employment levels worldwide were approximately as follows:

Region	2024	2023
United States and Canada	10,400	11,600
Mexico	51,900	56,400
Central and South America	23,500	23,700
Europe and Africa	64,500	68,400
Asia	23,400	26,500
Total	173,700	186,600

Our compensation and benefits strategy are designed to be competitive in the countries in which we operate to motivate our employees to perform to the best of their abilities, to achieve our objectives and to align the interests of our employees with the interests of our stakeholders. Our compensation package includes salary and both performance-based and long-term incentive programs, as appropriate for each role. We also provide a multitude of market-competitive benefits, which may include medical, life and disability insurance, contributory retirement savings plan, paid time off, paid parental leave and tuition reimbursement.

A substantial number of our employees are members of industrial trade unions or national trade organizations. We have collective bargaining agreements with several North American unions, including the United Auto Workers, Unifor, International Brotherhood of Electrical Workers and Workers United. In the United States and Canada, each of our unionized facilities has a separate collective bargaining agreement with the union that represents the workers at such facility, with each such agreement having an expiration date that is independent of the other agreements. The majority of our employees in Mexico and Europe are members of industrial trade union organizations or confederations within their respective countries. Many of these organizations and confederations operate under national contracts, which are not specific to any one employer. We have infrequently experienced labor disputes at our plants. We have been able to resolve all such labor disputes and believe that our relations with our employees are generally good.

See Item 1A, "Risk Factors — A significant labor dispute involving us or one or more of our customers or suppliers or that could otherwise affect our operations could adversely affect our financial performance," and Part II — Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations — Forward-Looking Statements."

Employee Engagement

Launched in 2017, *Together We Win ("TWW")* is Lear's global employee engagement program designed to drive cultural change in our operations. Plants advance through four segments of the program — leadership, work environment, employee involvement and team empowerment. *TWW* unites manufacturing employees across the globe in aiming to achieve excellence based on key operational and employee engagement metrics, such as quality, absenteeism, health and safety performance, and operational efficiency. Our approach towards employee engagement focuses on the employee experience through the three main chapters of the employee lifecycle: attract and recruit, learn and grow, and perform and reward.

Champions of Lear is a recognition program that celebrates our global operations and our hourly and salaried employees who represent the best-of-the-best in our company. Individuals, teams or plants submit an application which is reviewed by a diverse panel of judges, including Lear leadership. Award categories honor achievements in engagement, customer appreciation, innovation, supply chain, quality, safety, operational excellence, sustainability and continuous improvement.

Health and Safety

Our health and safety programs are designed around global standards with appropriate variations to address the multiple jurisdictions and unique working environments of our manufacturing operations. Our health and safety management system is compliant with the International Organization for Standardization ("ISO") 45001 standard, and we implemented a more comprehensive program which combines ISO 14001 and 45001 requirements to improve efficiency and performance. Each of our locations performs regular safety audits to ensure that proper safety policies are in place and appropriate safety training is provided. In addition, we engage an independent third-party conformity assessment and certification vendor to audit selected operations for adherence to our global health and safety standards.

Our employees also support healthier lifestyles through our Driving Wellness campaign. Local teams around the world plan activities, such as mental health awareness events, first aid training and on-site physical fitness initiatives, that are focused on promoting increased physical, emotional and mental wellness. This program has been expanded globally since its inception in 2022.

Talent Development and Culture

We are committed to the continued development of our employees. In 2023, we delivered more than six million hours of safety, development, leadership, quality, continuous improvement, lean manufacturing, and ISO and IATF certification training. We offer several professional development and leadership programs in the United States, Europe, Asia, Mexico and South America. Our CEO Academy is our premier leadership development opportunity in which a select group of leaders representing diverse functions and backgrounds participate in a week-long leadership immersion event. Our Together We Grow merit-based program helps diverse high-potential future leaders build their networks and careers at Lear with an emphasis on engagement and relationship development. In 2024, we expanded programming to include cohorts in Europe and in Mexico/Honduras.

In 2023, we launched our JumpStart "returnship" program in the United States, attracting mid-career professionals who had previously chosen to pause their careers for a variety of reasons. Leveraging our internal referral process, we identified participants that were eager to update their skills and, with support, ready to return to full-time employment. During the 12-

week paid pilot program, participants received custom onboarding, attended professional development and technical training workshops, and were assigned a job coach. In 2024, JumpStart expanded globally with programs in Asia, Europe/Africa, Mexico and South America.

We strive to build a culture of diversity, equity and inclusion not only through our human resource policies and practices but also by actively monitoring pay equity and working to eliminate discrimination and harassment in all of its forms. In 2024, we enhanced our Expect Respect / Expect Inclusion anti-harassment training for our global workforce, including a significant focus on bystander intervention, equipping our employees with strategies to safely support colleagues who may be experiencing harassment. We expect this training to be completed at all of our locations by the end of the first quarter 2025.

We are also proud of our six employee resource groups, representing 23 countries. Each employee-led resource group is supported by an executive sponsor and is open to all employees, with a goal of fostering a culture where everyone in our diverse and global workforce feels engaged, accepted and valued. In 2024, the employee resource groups held more than 400 events globally, including lunch and learns, trainings, and volunteer and social activities.

Ethics and Compliance

We are committed to conducting our business with integrity and in compliance with all applicable laws of the cities, states and countries in which we operate, and we have established a Code of Business Conduct and Ethics to assist employees in this regard. In 2022, we updated our Code of Business Conduct and Ethics to include additional or enhanced sections on certain of these topics, as well as on topics such as social media, human rights, and diversity and inclusion. We encourage employees to report concerns through a variety of channels, including a compliance and ethics toll-free number, an online form and a mobile app, each of which allows for anonymous reporting. Our ethics and compliance team reviews every report and, when appropriate, conducts an investigation. We also maintain an Anti-Retaliation Policy such that any employee who reports a concern in good faith is protected from harassment, retaliation or adverse employment consequences.

Customers

In 2024, General Motors, one of the largest automotive and light truck manufacturers in the world, accounted for 22% of our net sales. In addition, Ford, Volkswagen and Mercedes-Benz each accounted for 11% and Jaguar Land Rover and Stellantis each accounted for 9% of our 2024 net sales. Through acquisitions and organic growth, we strive to diversify our customer base to be reflective of the evolving regional markets in which we operate. We supply and have expertise in all vehicle segments of the automotive market. Our sales content tends to be higher on those vehicle platforms and segments which offer more features and functionality. The popularity of particular vehicle platforms and segments varies over time and by regional market. We expect to continue to win new business and grow sales at a greater rate than overall automotive industry production. For further information related to our customers and domestic and foreign sales and operations, see Note 14, "Segment Reporting," to the consolidated financial statements included in this Report.

Our customers award business to their suppliers in a number of ways, including the award of complete systems, which allows suppliers either to manufacture components internally or to purchase components from other suppliers at their discretion. Certain of our customers also elect to award certain components directly to component suppliers and independent of the award of the complete system. We have selectively expanded certain of our product offerings and component capabilities and continue to invest in manufacturing capacity in low-cost regions to enhance our cost structure and increase our vertical integration opportunities and participation in our customers' direct component sourcing.

Our customers typically award contracts several years before actual production is scheduled to begin. Each year, the automotive manufacturers introduce new models, update existing models and discontinue certain models and, periodically, even complete brands. In this process, we may be selected as the supplier on a new model, we may continue as the supplier on an updated model or we may lose the business on a new or updated model to a competitor.

Our core sales backlog reflects our estimated net sales over the next two years from formally awarded new programs, less lost and discontinued programs. This measure excludes the sales backlog at our non-consolidated joint ventures and the impact of the wind down of non-core products in our E-Systems business. As of February 2025, our 2025 to 2026 sales backlog is \$1.3 billion. Our current sales backlog reflects \$0.2 billion related to 2025, of which 11% and 89% are related to our Seating and E-Systems segments, respectively. In addition, our 2025 to 2026 sales backlog at our non-consolidated joint ventures is approximately \$0.5 billion. Our current sales backlog assumes volumes based on the independent industry projections of S&P Global Mobility as of January 2025 and internal estimates, a Euro exchange rate of \$1.04/Euro and a Chinese renminbi exchange rate of 7.30/\$. This sales backlog is generally subject to a number of risks and uncertainties, including vehicle production volumes on new and replacement programs and foreign exchange rates, as well as the timing of production launches and changes in customer development plans. For additional information regarding risks that may affect our sales backlog, see Item 1A, "Risk Factors," and Part II — Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations — Forward-Looking Statements." We receive purchase orders from our customers that generally provide for the supply of a customer's annual requirements for a particular vehicle model and assembly plant, or in some cases, for the supply of a customer's requirements for the life of a particular vehicle model, rather than for the purchase of a specified quantity of products. Although most purchase orders may be terminated by our customers at any time, such terminations have been infrequent and have not had a material impact on our operating results. We are subject to risks that an automotive manufacturer will produce fewer units of a vehicle model than anticipated or that an automotive manufacturer will not award us a replacement program following the life of a vehicle model. To reduce our reliance on any one vehicle model, we produce automotive systems and components for a broad cross-section of both new and established models. However, larger cars and light trucks, as well as vehicle platforms that offer more features and functionality, such as luxury, sport utility and crossover vehicles, typically have more content and, therefore, tend to have a more significant impact on our operating performance. Our net sales for the year ended December 31, 2024, consisted of 23% passenger cars, 56% crossover and sport utility vehicles and 21% trucks and vans.

Our agreements with our major customers generally provide for an annual productivity price reduction. Historically, cost reductions through product design changes, increased manufacturing productivity and similar programs with our suppliers have generally offset these customer-imposed price reduction requirements. However, raw material, energy, commodity, product component and labor costs can be volatile. Although we have developed and implemented strategies to mitigate the impact of such costs, these strategies, together with commercial negotiations with our customers and suppliers, do not typically offset all of the adverse impact. Certain of these strategies also may limit our opportunities in a declining price environment. In addition, we are exposed to market risk associated with fluctuations in foreign exchange as a result of our low-cost footprint and vertical integration strategies. We use derivative financial instruments to reduce our exposure to fluctuations in foreign exchange rates. For additional information regarding our foreign exchange and commodity price risk, see Part II — Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Commodity Prices" and Item 7A, "Quantitative and Qualitative Disclosures about Market Risk — Market Risk Sensitivity — Foreign Exchange."

Seasonality

Our principal operations are directly related to the automotive industry. Consequently, we may experience seasonal fluctuations to the extent automotive vehicle production slows, such as in the summer months when many customer plants close for holidays and/or model year changeovers, as well as in December when many customer plants close for the holidays.

Raw Materials

The principal raw materials used in our seat systems, electrical distribution and connection systems, BDUs and electronic controllers are generally available and obtained from multiple suppliers under various types of supply agreements. Components such as seat trim covers, surface materials such as leather and fabric, seat mechanisms, seat foam, thermal comfort systems such as seat heating, ventilation, active cooling, pneumatic lumbar and massage products, headrests, connection systems and certain other components are either manufactured by us internally or purchased from multiple suppliers under various types of supply agreements (certain of which are sourced by our customers and certain of which are sourced by us). The majority of the steel used in our products is comprised of fabricated components that are integrated into a seat system, such as seat frames, recliner mechanisms, seat tracks and other mechanical components. Therefore, our exposure to changes in steel prices is primarily indirect, through these purchased components. With the exception of certain connection systems, the materials that we use to manufacture wire harness assemblies are substantially purchased from suppliers, including extruded and insulated wire and cable. The majority of our copper purchases, as well as a significant portion of our leather purchases, are subject to price index agreements with our customers and suppliers. We utilize a combination of short-term and long-term supply contracts to purchase key components. We generally retain the right to terminate these agreements if our supplier does not remain competitive in terms of cost, quality, delivery, technology or customer support.

Intellectual Property

Worldwide, we have approximately 2,800 patents and patent applications pending. While we believe that our patent portfolio is a valuable asset, no individual patent or group of patents is critical to the success of our business. We also license selected technologies to automotive manufacturers and to other automotive suppliers. We continually strive to identify and implement new technologies for use in the design and development of our products.

Advanced technology development is conducted worldwide at our seven advanced technology centers and at our product engineering centers. At these centers, we engineer our products to comply with applicable safety standards, meet quality and durability standards, respond to environmental conditions and conform to customer and consumer requirements. Our global innovation and technology center located in Southfield, Michigan, develops and integrates new concepts and is our central location for consumer research, benchmarking, craftsmanship and industrial design activity.

We have numerous registered trademarks in the United States and in many foreign countries. The most important of these marks include LEAR CORPORATION[®] (including our stylized version thereof) and LEAR[®], which are widely used in connection with our products and services. Our other principal brands include GUILFORD[®] and EAGLE OTTAWA[®]. ComfortFlex by LearTM, ComfortMax Seat by LearTM, ConfigurE+TM seating, FlexAirTM non-foam alternative, INTUTM seating, ProTec[®] active head restraints, ReNewKnitTM fabrics, SMART JUNCTION BOXTM technology, SoyFoamTM foam substitute and TeXstyleTM fabrics are some of our other trademarks used in connection with certain of our product lines.

Government Regulations and Environmental Matters

We are subject to a variety of federal, state, local and foreign laws and regulations, including those related to health, safety and, increasingly, sustainability matters. Costs incurred to comply with these governmental regulations are not material to our capital expenditures, financial performance or competitive position. Additional information about the impact of government regulations on our business is included in Item 1A, "Risk Factors," under the heading "Legal and Regulatory Risks."

We are committed to sustainability in our operations and products. We adhere to local, state, federal and foreign laws, regulations and ordinances which govern activities or operations that may have adverse environmental effects. These laws, regulations and ordinances may impose liability for clean-up costs resulting from past spills, disposals or other releases of hazardous wastes. For a description of our outstanding environmental matters and other legal proceedings, see Note 13, "Legal and Other Contingencies," to the consolidated financial statements included in this Report.

In addition, our customers are subject to significant environmentally focused state, federal and foreign laws and regulations that regulate vehicle emissions, fuel economy and other matters related to the environmental impact of vehicles. To the extent that such laws and regulations ultimately increase or decrease automotive vehicle production, such laws and regulations would likely impact our business. See Item 1A, "Risk Factors."

Furthermore, we currently offer products that advance sustainability, such as ReNewKnitTM and FlexAirTM, and are creating technologies that facilitate environmentally friendly transportation alternatives, such as hybrid and electric vehicles. Our expertise, capabilities and environmental leadership are allowing us to expand our product offerings in this area.

Joint Ventures and Noncontrolling Interests

We form joint ventures in order to gain entry into new markets, expand our product offerings and broaden our customer base. In particular, we believe that certain joint ventures have provided us, and will continue to provide us, with the opportunity to expand our business relationships with Asian automotive manufacturers, particularly in emerging markets. We also partner with companies having significant local experience in commerce and customs, as well as capacity, to reduce our financial risk and enhance our potential for achieving expected financial returns. In some cases, these joint ventures may be located in North America and used to expand our customer relationships.

As of December 31, 2024, we had sixteen operating joint ventures located in five countries. Of these joint ventures, six are consolidated, and ten are accounted for using the equity method of accounting. Fourteen of the joint ventures operate in Asia, and two operate in North America (both of which are dedicated to serving Asian automotive manufacturers). Net sales of our consolidated joint ventures accounted for approximately 8% of our net sales in 2024. As of December 31, 2024, our investments in non-consolidated joint ventures totaled \$221 million.

A summary of our non-consolidated operating joint ventures, including ownership percentages, is shown below. For further information related to our joint ventures, see Note 5, "Investments in Affiliates and Other Related Party Transactions," to the consolidated financial statements included in this Report.

Country	Name	Ownership Percentage
China	Beijing BHAP Lear Automotive Systems Co., Ltd.	50%
China	Beijing Lear Hyundai Transys Co., Ltd.	50
China	Guangzhou Lear Automotive Components Co., Ltd.	50
China	Jiangxi Jiangling Lear Interior Systems Co., Ltd.	50
China	Lear Dongfeng Automotive Seating Co., Ltd.	50
China	Changchun Lear FAWSN Automotive Seat Systems Co., Ltd.	49
China	Shenyang Jinbei Lear Automotive Seating Co. Ltd.	49
Honduras	Honduras Electrical Distribution Systems S. de R.L. de C.V.	49
United States / Mexico	Kyungshin-Lear Sales and Engineering LLC	49
India	Hyundai Transys Lear Automotive Private Limited	35

ITEM 1A – RISK FACTORS

Our business, financial condition, operating results and cash flows may be impacted by a number of factors. In addition to the factors affecting our business identified elsewhere in this Report, the material risk factors affecting our operations include the following:

Risks Related to Our Business

• Our industry is cyclical and a decline in the production levels of our major customers, particularly with respect to models for which we are a significant supplier, or the financial distress of one or more of our major customers could adversely affect our financial performance.

Our sales are driven by the number of vehicles produced by our automotive manufacturer customers and our content per vehicle. The automotive industry is cyclical and sensitive to general economic conditions, including interest rates, inflation, consumer demand and spending levels, and geopolitical issues. Automotive sales and production can also be affected by the age of the vehicle fleet and related scrappage rates, labor relations issues, labor shortages, fuel prices, regulatory requirements, government initiatives and incentives, trade agreements, tariffs and other non-tariff trade barriers, the availability and cost of credit, the availability and cost of raw materials and critical components, and logistics issues, as well as vehicle affordability and consumer preferences regarding vehicle powertrains (including preferences regarding hybrid and electric vehicles), size, configuration and features, among other factors. Our sales and production may be further affected by new entrants to the industry, including domestic automakers in certain regions and non-traditional automakers, and the restructuring actions, including facility closures, of our customers and suppliers.

An economic downturn or other adverse industry conditions that result in a decline in the production levels of our major customers, particularly with respect to models for which we are a significant supplier, or the financial distress of one or more of our major customers could reduce our sales or otherwise adversely affect our financial condition, operating results and cash flows. Further, our ability to reduce the risks inherent in certain concentrations of business, and thereby maintain our financial performance in the future, will depend, in part, on our ability to continue to diversify our sales on a customer, product, platform and geographic basis to reflect the market overall. We may not be successful in such diversification.

• Increases in the costs and restrictions on the availability of raw materials, energy, commodities, product components and labor could adversely affect our financial performance.

Raw material, energy, commodity, product component and labor costs can be volatile. Although we have developed and implemented strategies to mitigate the impact of increases in such costs, these strategies, together with commercial negotiations with our customers and suppliers, do not typically offset all of the adverse impact. Certain of these strategies also may limit our opportunities in a declining price environment. In addition, the availability of raw materials, energy, commodities, product components and labor fluctuates from time to time due to factors outside of our control, including regulatory requirements and restrictions, natural disasters and other supply chain disruptions, which may impact our ability to meet the production demands of our customers. Increases in the costs of raw materials, energy, commodities, product

components and labor, or restrictions on the availability thereof, could adversely affect our financial condition, operating results and cash flows.

• The lack of commercial success of or an increase in directed component sourcing for a vehicle model for which we are a significant supplier could adversely affect our financial performance.

We receive purchase orders from our customers that generally provide for the supply of a customer's requirements for a particular vehicle model and assembly plant for the life of a particular vehicle program, rather than for the purchase of a specific quantity of products. It is possible that a particular vehicle model is not successful with consumers or that our customers elect to manufacture our products internally, purchase our products from other suppliers or increase the extent to which they require us to utilize specific suppliers or materials in the manufacture of our products. The loss of business due to these factors occurring could reduce our sales or margins and thereby adversely affect our financial condition, operating results and cash flows.

Our inability to achieve product cost reductions to offset customer-imposed price reductions could adversely affect our financial performance.

Downward pricing pressure by automotive manufacturers is a characteristic of the automotive industry. Our customer contracts generally provide for annual price reductions over the production life of the vehicle, while requiring us to assume significant responsibility for the design, development and engineering of our products. Prices may also be adjusted on an ongoing basis to reflect changes in product content/costs and other commercial factors. Our financial performance is largely dependent on our ability to achieve product cost reductions through product design enhancements, supply chain management, manufacturing efficiencies and restructuring actions. We also seek to enhance our financial performance by investing in product development, design capabilities and new product initiatives that respond to and anticipate the needs of our customers and consumers. We continually evaluate operational and strategic alternatives to improve our business structure and align our business with the changing needs of our customers and major industry trends affecting our business. Our inability to achieve product cost reductions that offset customer-imposed price reductions could adversely affect our financial condition, operating results and cash flows.

International trade policies, including protectionist trade policies, such as tariffs and sanctions, could adversely affect our financial performance.

Due to the interconnectedness of the global economy, policy changes in one area of the world can have an immediate and material adverse impact on markets around the world. Changes in international trade policies, including: (i) changes to existing trade agreements; (ii) greater restrictions on free trade generally; and (iii) significant increases in customs duties and tariffs on goods imported into the United States and reciprocal actions by other countries, can adversely affect our financial condition and operating results.

On February 1, 2025, President Trump announced the imposition of new tariffs on imports from Mexico, Canada and China, to take effect on February 4, 2025. On February 3, 2025, President Trump announced that the tariffs imposed on imports from Mexico and Canada would be paused for thirty days. The impact of these potential tariffs on our business and financial condition, if any, is subject to a number of factors that are not yet known, including the effective date and duration of such tariffs, the scope and nature of any tariffs, the amount of any tariffs, any countermeasures that the target countries may take in response to such tariffs. In light of these uncertainties, we can provide no assurance that any mitigating actions that may become available to us, such as our ability to pass along some or all of the costs of any tariffs to some or all of our customers, will be successful.

In addition to potential increases in customs duties and tariffs in the United States and other countries, the United States-Mexico-Canada Agreement ("USMCA") is subject to renewal in 2026. There can be no assurance that any newly negotiated terms in the USMCA will not adversely affect our business. Also, China presents unique risks to U.S. automotive manufacturers due to the strain in U.S.-China relations and the level of integration with key components in our global supply chain. It remains unclear what specific actions the current U.S. administration may take to resolve traderelated issues with China and other countries.

Further, the U.S. and other governments could impose additional sanctions or export controls that could restrict us from doing business directly or indirectly in or with certain countries or parties, which could include affiliates. Any of the above factors could impact our supply chain, as well as our operations, and adversely affect our financial condition and operating results.

Adverse developments affecting or the financial distress of one or more of our suppliers could adversely affect our financial performance.

We obtain components and other products and services from numerous automotive suppliers and other vendors throughout the world. We are responsible for managing our supply chain, including suppliers that may be the sole sources of products that we require, that our customers direct us to use or that have unique capabilities that would make it difficult and/or expensive to re-source. In certain instances, entire industries may experience short-term capacity constraints. Additionally, our production capacity and costs, and that of our customers and suppliers, may be adversely affected by force majeure events, such as natural disasters, as well as tariffs, sanctions or other significant events. Any such significant event could adversely affect our financial performance. Furthermore, unfavorable economic or industry conditions in one or more of the regions in which we operate could result in financial distress within our supply base, which could cause a supply disruption and thereby adversely affect our financial condition, operating results and cash flows.

A significant labor dispute involving us or one or more of our customers or suppliers or that could otherwise affect our operations could adversely affect our financial performance.

A substantial number of our employees and the employees of our largest customers and suppliers are members of industrial trade unions and are employed under the terms of various labor agreements. We have labor agreements covering approximately 81,500 employees globally. In the United States and Canada, each of our unionized facilities has a separate collective bargaining agreement with the union that represents the workers at such facility, with each such agreement having an expiration date that is independent of the other agreements. Labor agreements covering approximately 84% of our global unionized work force, including labor agreements in the United States and Canada covering approximately 5% of our global unionized workforce, are scheduled to expire in 2025. There can be no assurances that these upcoming negotiations or any other future negotiations with the unions will be resolved favorably or that we will not experience a work stoppage or disruption that could adversely affect our financial condition, operating results and cash flows. A labor dispute involving us, any of our customers or suppliers or any other suppliers to our customers or that otherwise affects our operations, or the inability by us, any of our customers or suppliers or any other suppliers to our customers to negotiate, upon the expiration of a labor agreement, an extension of such agreement or a new agreement on satisfactory terms could adversely affect our financial condition, operating results and cash flows. In addition, if any of our significant customers experience a material work stoppage, the customer may halt or limit the purchase of our products. This could require us to shut down or significantly reduce production at facilities relating to such products, which could adversely affect our financial condition and operating results.

Our ability to attract, develop, engage and retain qualified employees could affect our ability to execute our strategy.

Our success depends, in part, on our ability to identify and attract qualified candidates with the requisite education, background and experience, as well as our ability to develop, engage and retain qualified employees. Failure to attract, develop, engage and retain qualified employees, whether as a result of an insufficient number of qualified applicants, difficulty in recruiting new employees or inadequate resources to train, integrate and retain qualified employees, could impair our ability to execute our business strategy and could adversely affect our business. In addition, while we strive to reduce the impact of the departure of employees, our operations and our ability to execute our business strategy and meet our business objectives may be affected by the loss of employees, particularly when departures involve larger numbers of employees. Higher rates of employees and the devotion of resources to recruiting and onboarding new employees.

Our substantial international operations make us vulnerable to risks associated with volatile economic and political environments.

We have substantial international operations, with manufacturing and distribution facilities in many foreign countries, including Mexico and countries in Africa, Asia, Central and South America, and Europe. Some of the markets in which we do business may have volatile economic and/or political environments. This may expose us to heightened risks as a result of economic, geopolitical or other events, including:

- exposure to local economic conditions;
- political, economic and civil instability and uncertainty (including acts of terrorism, civil unrest, drug cartel-related and other forms of violence, and outbreaks of war);
- labor scarcity and unrest;
- expropriation, governmental takeover and nationalization;
- currency exchange rate fluctuations, currency controls and the ability to economically hedge currencies;

- withholding and other taxes on remittances and other payments by subsidiaries;
- investment restrictions or requirements;
- repatriation restrictions or requirements;
- trade wars, tariffs or sanctions;
- concerns about human rights, working conditions and other labor rights and conditions and the environmental impact in foreign countries where our products are produced and raw materials and/or components are sourced, as well as changing labor, environmental and other laws in these countries;
- pandemic illness and limited access to vaccines;
- increases in working capital requirements related to long supply chains; and
- global sovereign fiscal matters and creditworthiness, including potential defaults and the related impacts on economic activity, including the possible effects on credit markets, currency values, monetary unions, international treaties and fiscal policies.

Expanding our sales and operations in lower-cost regions are important elements of our strategy. As a result, our exposure to the risks described above is substantial. The likelihood of such occurrences and their potential effect on us vary from country to country and are unpredictable. However, any such occurrences could adversely affect our financial condition, operating results and cash flows.

Certain of our operations are conducted through joint ventures which have unique risks.

Certain of our operations, particularly in Asia, are conducted through joint ventures. With respect to our joint ventures, we may share ownership and management responsibilities with one or more partners that may not share our goals and objectives. Operating a joint venture requires us to operate the business pursuant to the terms of the agreement that we entered into with our partners, which may require additional organizational formalities, as well as the sharing of information and decision making. Additional risks associated with joint ventures include one or more partners failing to satisfy contractual obligations, the ability to enforce such obligations, conflicts arising between us and any of our partners, a change in the ownership of any of our partners and less of an ability to control compliance with applicable rules and regulations, including the Foreign Corrupt Practices Act and related rules and regulations. Additionally, our ability to sell our interest in a joint venture may be subject to contractual and other limitations. Accordingly, any such occurrences could adversely affect our financial condition, operating results and cash flows.

Our failure to execute our strategic objectives could adversely affect our financial performance.

Our financial performance depends, in part, on our ability to successfully execute our strategic objectives. Our strategy is based on four pillars designed to drive growth and profitability: (1) extend our market leadership position in Seating with priceable features, including modularity and thermal comfort systems; (2) transform our E-Systems business through accelerated growth in connection systems and vehicle architecture evolution and electrification; (3) build on our reputation for operational excellence through organic and inorganic investments in automation and digital technologies; and (4) prioritize people and the planet through our sustainability initiatives to drive business growth, cost reductions and in Part II — Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," including "— Forward-Looking Statements," could adversely affect our ability to execute our strategic objectives. These risk factors include our failure to identify suitable opportunities for organic investment and/or acquisitions, our inability to successfully develop such opportunities or complete such acquisitions or our inability to successfully utilize or integrate the investments in our operations. Our failure to execute our strategic objectives could adversely affect our financial condition, operating results and cash flows. Moreover, there can be no assurances that, even if implemented, our strategic objectives will be successful.

Our inability to effectively manage the timing, quality and costs of new program launches could adversely affect our financial performance.

In connection with the award of new business, we obligate ourselves to deliver new products and services that are subject to our customers' timing, performance and quality standards. Additionally, as a Tier 1 supplier, we must effectively coordinate the activities of numerous suppliers in order for the program launches of our products to be successful. Given the complexity of new program launches, we may experience difficulties managing product quality, timeliness and associated costs. In addition, new program launches require a significant ramp up of costs; however, our sales related to these new programs generally are dependent upon the timing and success of our customers' introduction of new vehicles. Customer decisions on program launch timing may be impacted by industry conditions, government regulations and consumer preferences, and therefore, the timing of such launches may also be subject to change. Our inability to effectively anticipate and manage the timing, quality and costs of these new program launches could adversely affect our financial condition, operating results and cash flows.

• We operate in a highly competitive industry and efforts by our competitors, as well as new entrants to the industry, to gain market share could adversely affect our financial performance.

We operate in a highly competitive industry. We and most of our competitors are seeking to expand market share with new and existing customers, including in high growth regions. Our customers award business based on, among other things, price, quality, service and technology. Our competitors' efforts to grow market share could exert downward pressure on our product pricing and margins. In addition, the automotive industry has attracted, and will continue to attract, new entrants, including domestic automakers in certain regions and non-traditional automakers as a result of the evolving nature of the automotive vehicle market, including the increasing adoption of hybrid and electric vehicles. Further, the global automotive industry is experiencing a period of significant technological change, including a focus on electrification and digitization. If we are unable to differentiate our products, maintain a low-cost footprint or compete effectively to win business with new domestic automakers and other new entrants, we may lose market share or be forced to reduce prices, thereby lowering our margins. Any such occurrences could adversely affect our financial condition, operating results and cash flows.

• If we do not respond appropriately, the evolution of the global transportation industry toward electrification could adversely affect our business.

The global transportation industry is increasingly focused on the development of more fuel-efficient solutions to meet demands from consumers and governments worldwide to address climate change and an increased desire for environmentally sustainable solutions. The impacts of these changes on us are uncertain and could ultimately prove dramatic. If we do not respond appropriately, the evolution toward electrification and other energy sources, including the timing of such evolution, could adversely affect our business. The increased adoption of hybrid and fully electrified powertrains may result in lower demand for some of our products. The evolution of the industry toward electrification has also attracted increased competition from new entrants to the light vehicle industry. Failure to innovate and to develop or acquire new and compelling products that capitalize upon new technologies in response to evolving consumer preferences and customer landscape could adversely affect our financial condition, operating results and cash flows.

A disruption in our information technology systems, or those of our customers, suppliers, sub-suppliers or other contract parties, including a disruption related to cybersecurity, and other cybersecurity risks, such as a security incident resulting in unauthorized access to or theft of personal or other sensitive information, could adversely affect our financial performance.

We rely on the accuracy, capacity, availability and security of our information technology networks. Despite the security and business continuity measures that we have implemented, including those measures related to cybersecurity, our operational systems (including business, financial, accounting, human resources, product development and manufacturing processes), as well as those of our customers, suppliers and other service providers, and certain of our connected vehicle systems and components that may collect and store sensitive end-user data (which could include personal information) could be breached, disabled or damaged by, without limitation, internal or external threat actors, computer viruses, malware, phishing attacks, denial-of-service attacks, supply chain attacks, human error, ransomware attacks, software bugs, server malfunctions, software or hardware failures, natural or man-made incidents or disasters, or unauthorized physical or electronic access. These types of incidents have become more prevalent and pervasive across industries, including our industry, and are expected to continue, if not increase, in the future. In particular, ransomware or other attacks that are intended to disrupt our business operations are becoming increasingly prevalent, particularly for manufacturing companies, and can lead to significant interruptions in operations and the ability to provide products or services, loss of sensitive data and income, reputational harm and diversion of funds. Extortion payments may alleviate the negative impact of a disruptive event, but we may be unwilling or unable to make such payments due to, for example, applicable laws or regulations prohibiting such payments.

We are incorporated into the supply chain of a large number of companies globally. As a result, if our products or services are compromised, unavailable or unable to be manufactured or delivered, a significant number or, in some instances, all of our customers' operations and their data could be simultaneously affected. Our contracts with customers and others may not contain limitations of liability, and even where they do, there can be no assurance that limitations of liability in our contracts are sufficient to protect us from liabilities, damages or claims related to our security obligations. The potential

liability and associated consequences we could suffer as a result of such a large-scale event impacting multiple customers could be catastrophic and result in irreparable harm.

The secure operation of our information technology networks, and the processing and maintenance of information by these networks, is critical to our operations and strategy. A security incident could result in business disruption, including interruptions of manufacturing and distribution of vehicle systems and components that we supply to our customers or our plant operations, theft of our intellectual property, trade secrets or customer information, or unauthorized access to or theft of personal information, such as that of our employees or end consumers of vehicles that contain certain of our connected vehicle systems or components. Although cybersecurity and the continued development and enhancement of our controls, processes and practices designed to protect our operational systems and products from attack, damage or unauthorized access are a high priority for us, our actions and investments may not be deployed quickly enough or successfully protect our systems against all vulnerabilities, including technologies developed to bypass our security measures. In addition, outside parties may attempt to fraudulently induce employees, vendors or customers to disclose access credentials or other sensitive information in order to gain access to our secure systems and networks, or to divert funds or wire transfers. There are no assurances that our actions and investments to improve the maturity of our systems, processes and risk management framework or remediate vulnerabilities will be sufficient or deployed quickly enough to prevent or limit the impact of any cyber intrusion or security incident. We maintain cyber liability insurance to provide additional support during significant events, as well as a level of financial protection in the event of certain cybersecurity-related losses, but there is no guarantee that our coverage will be sufficient or applicable in all cases.

Moreover, because the techniques used to gain access to or adversely impact systems often are not recognized until launched against a target, we may be unable to anticipate the methods necessary to defend against these types of attacks, and we cannot predict the extent, frequency or impact these attacks may have on us. It may also be difficult and/or costly to detect, investigate, mitigate, contain and remediate a security incident. Our efforts to do so may not be successful. Actions taken by us or the third parties with whom we work to detect, investigate, mitigate, contain and remediate a security incident could result in outages, data losses and disruptions of our business. In addition, the information technology systems and software that we and our vendors use are vulnerable to outages, breakdowns, software vulnerabilities, coding errors and other damage from service interruptions, system malfunctions, natural disasters, terrorism, war, and telecommunication and electrical failures. For example, our business operations suffered temporary interruptions and impacts from the global CrowdStrike Holdings, Inc. event in July 2024. To the extent that our business is interrupted, including the vehicle systems and components that we supply to our customers or our plant operations, or data is lost, destroyed or inappropriately accessed, used or disclosed, such disruptions could adversely affect our competitive position, operating capacity, ability to provide our goods and services, relationships with our customers, financial condition, operating results and cash flows and/or subject us to regulatory actions, including those contemplated by data privacy laws and regulations such as European Union General Data Privacy Regulation, China Cyber Security Laws including the China Personal Information Protection Law, India's Information Technology Act and supplementary rules, and the California Consumer Privacy Act, or litigation. In addition, we may be required to incur significant costs to protect against the damage caused by these disruptions or security breaches in the future.

We are also dependent on security measures that some of our customers, suppliers and other third party service providers take to protect their own systems and infrastructures. Any security incident of any of these third parties' systems could result in unauthorized access to our or our customers' or suppliers' sensitive data or our own information technology systems, cause us to be non-compliant with applicable laws or regulations, subject us to legal claims or proceedings, disrupt our operations, damage our reputation or cause a loss of confidence in our products or services, any of which could adversely affect our financial performance. Our ability to monitor these third parties' information security practices is limited, and these third parties may not have adequate information security measures in place. If the third parties with whom we work experience a security incident or other interruption, we could experience adverse consequences. While we may be entitled to damages if the third parties with whom we work fail to satisfy their privacy or security-related obligations to us, any award may be insufficient to cover our damages, or we may be unable to recover such award.

Pandemics, epidemics, disease outbreaks and other public health crises have disrupted our business and operations, and future public health crises could adversely affect our business, financial condition and operating results.

Pandemics, epidemics or disease outbreaks in the United States or globally have disrupted, and may disrupt in the future, our business, which could materially affect our financial condition including liquidity, operating results and future expectations. Any such events may adversely impact our global supply chain and global manufacturing operations and cause us to again suspend our operations. In particular, we could experience among other things: (1) continued or additional global supply disruptions, including component and material shortages; (2) labor disruptions; (3) an inability to manufacture; (4) a decline in consumer demand; and (5) an impaired ability to access credit and capital markets. Any future

public health crises, could adversely affect our business, financial condition, operating results and cash flows going forward.

• Perspectives on global climate change and other sustainability matters by various stakeholders could adversely affect our business.

Customer, investor, employee and other stakeholder expectations of us and our supply base in matters involving sustainability continue to evolve. The enhanced stakeholder focus on sustainability requires continuous monitoring of various and evolving standards and their associated requirements, and may result in potentially differing perspectives on these topics among stakeholders. Our failure, or that of our supply base, to adequately meet stakeholder expectations or address stakeholder concerns, including concerns about environmental impacts and similar matters, may result in, among other things, negative sentiment toward us or our products, the loss of business, diluted market valuation, an inability to attract customers or an inability to attract and retain top talent.

Global climate change could adversely affect our business.

The effects of climate change, such as extreme weather conditions, could impact our business. Such effects could disrupt our operations by, among other things, impacting the availability and cost of materials needed for manufacturing and could increase insurance and other operating costs. These factors may impact our decisions to construct new facilities or maintain existing facilities in areas most prone to physical climate risks, as well as our decisions regarding business strategy, capital allocation and innovation. We could also experience indirect financial risks passed through the supply chain and disruptions that could result in increased prices for our products and the resources needed to produce them.

• Impairment charges relating to our goodwill and long-lived assets could adversely affect our financial performance.

We regularly monitor our goodwill and long-lived assets for impairment indicators. In conducting our goodwill impairment testing, we may first perform a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount. If not, no further goodwill impairment testing is required. If it is more likely than not that a reporting unit's fair value is less than its carrying amount, or if we elect not to perform a qualitative assessment of a reporting unit, we then compare the fair value of the reporting unit to the related net book value. If the net book value of a reporting unit exceeds its fair value, an impairment loss is measured and recognized. In conducting our impairment analysis of long-lived assets, we compare the undiscounted cash flows expected to be generated from the long-lived assets to the related net book values. Changes in economic or operating conditions impacting our estimates and assumptions could result in the impairment of our goodwill or long-lived assets. In the event that we determine that our goodwill or long-lived assets are impaired, we may be required to record a significant charge to earnings that could adversely affect our financial condition and operating results.

Significant changes in discount rates, the actual return on pension assets and other factors related to our global defined benefit plans could adversely affect our financial performance.

Our earnings may be positively or negatively impacted by the amount of income or expense recorded related to our global defined benefit plans. Accounting principles generally accepted in the United States require that income or expense related to the defined benefit plans be calculated at the annual measurement date using actuarial calculations, which reflect certain assumptions. The most significant of these assumptions relate to interest rates, the capital markets and other economic conditions. These assumptions, as well as the actual value of pension assets at the measurement date, will impact the calculation of pension and other postretirement benefit expense for the year. Although pension expense and pension contributions are not directly related, the key economic indicators that affect pension expense also affect the amount of cash that we will contribute to our pension plans. Because interest rates and the values of these pension assets have fluctuated and will continue to fluctuate in response to changing market conditions, pension and other postretirement benefit expense in subsequent periods, the funded status of our pension plans and the future minimum required pension contributions, if any, could adversely affect our financial condition, operating results and cash flows.

Unanticipated changes in our effective tax rate, the adoption of new tax legislation or exposure to additional income tax liabilities could adversely affect our profitability.

We are subject to income taxes in the United States and numerous international jurisdictions. Our effective tax rate and cash tax liability in the future could be adversely affected by the enactment of new tax legislation, changes in the level and mix of earnings in countries with differing statutory tax rates, changes in the valuation of deferred tax assets and liabilities, and changes in tax holiday status. The carrying value of deferred tax assets, which are predominantly in the United States, is dependent on our ability to generate future taxable income in the United States. We are also subject to ongoing tax audits globally. These audits can involve complex issues, which may require an extended period of time to resolve and can be

highly judgmental. Tax authorities may disagree with certain of our tax reporting positions and, as a result, assess additional taxes against us. We regularly assess the likely outcomes of these audits to determine the appropriateness of our gross unrecognized tax benefits. The amounts ultimately paid upon resolution of current and future tax audits could be materially different from the amounts previously included in our income tax provision and, therefore, could have a material impact on our income tax provision.

The Organization for Economic Cooperation and Development ("OECD") issued new guidelines, known as "Pillar Two," to implement a 15% global corporate minimum tax to address gaps in current tax laws and ensure that large multinational enterprises pay a minimum level of tax in the countries in which they operate. Countries may implement the OECD Pillar Two model rules as issued, in a modified form or not at all. A number of countries have passed legislation enacting certain parts of the OECD's Pillar Two framework effective in 2024. As a result of the uncertainty, OECD Pillar Two could have a material impact on our effective tax rate and result in higher cash tax liabilities depending on which countries enact minimum tax legislation and in what manner.

Risks Related to Our Indebtedness

Our existing indebtedness and the inability to access capital markets could restrict our business activities or our ability to execute our strategic objectives or adversely affect our financial performance.

As of December 31, 2024, we had approximately \$2.7 billion of outstanding indebtedness, as well as \$2.0 billion available for borrowing under our revolving credit facility. As of December 31, 2024, there were no amounts outstanding under our revolving credit facility. The debt instruments governing our indebtedness contain covenants that may restrict our business activities or our ability to execute our strategic objectives, and our failure to comply with these covenants could result in a default under our indebtedness. We also lease certain buildings and equipment under non-cancelable lease agreements with terms exceeding one year, which are accounted for as operating leases. Additionally, any downgrade in the ratings that rating agencies assign to us and our debt may ultimately impact our access to capital markets. Our inability to generate sufficient cash flow to satisfy our debt and lease obligations, to refinance our debt obligations or to access capital markets on commercially reasonable terms could adversely affect our financial condition, operating results and cash flows.

Legal and Regulatory Risks

• A significant product liability lawsuit, warranty claim or product recall involving us or one of our major customers could adversely affect our financial performance.

In the event that our products fail to perform as expected, regardless of fault, and such failure results in, or is alleged to result in, bodily injury and/or property damage or other losses, we may be subject to product liability lawsuits and other claims. Our customers may also pursue claims against us for contribution of all or a portion of the amounts sought in connection with product liability, warranty and recall claims related to our products. We carry insurance for certain product liability claims, but such coverage may be limited. We do not maintain insurance for warranty or recall matters. In addition, we may not be successful in recovering amounts from third parties, including sub-suppliers, in connection with these claims. These types of claims could adversely affect our financial condition, operating results and cash flows.

• We are involved from time to time in various legal and regulatory proceedings and claims, which could adversely affect our financial performance.

We are involved in various legal and regulatory proceedings and claims that, from time to time, are significant. These are typically claims that arise in the normal course of business, including, without limitation, commercial or contractual disputes, including disputes with our customers, suppliers or competitors, intellectual property matters, personal injury claims, environmental matters, tax matters, employment matters and antitrust matters. No assurances can be given that such proceedings and claims will not adversely affect our financial condition, operating results and cash flows.

• The continuing focus on human rights and environmental laws and regulations, as well as related customer requirements, globally could cause us to incur significant costs.

Concerns over human rights, environmental pollution and climate change have produced significant legislative and regulatory efforts globally. In addition, our customers have imposed various requirements on their suppliers, including us, in response to these concerns. We expect that these regulatory and customer requirements will continue to increase in number and breadth of scope for the foreseeable future, thereby affecting our business. Complying with these requirements will likely require us to incur costs, make investments in new innovations, change product and production processes and/or modify product supply chains, certain of which actions could be significant. Significant challenges may exist to comply with new legislative efforts around supply chain transparency due to the inherent complexity of global automotive supply

chains. If we fail to comply with these requirements, we could be subject to lost business opportunities and/or future liabilities, which could adversely affect our reputation, business, financial condition, operating results and cash flows.

• New laws or regulations or changes in existing laws or regulations could adversely affect our financial performance.

We and the automotive industry are subject to a variety of federal, state, local and foreign laws and regulations, including those related to health, safety and, increasingly, sustainability matters. Governmental regulations also affect taxes and levies, capital markets, healthcare costs, energy usage, data privacy, international trade, including tariffs and sanctions, human rights, immigration and other labor issues (including labor costs), all of which may have a direct or indirect effect on our business and the businesses of our customers and suppliers. We cannot predict the substance or impact of pending or future legislation or regulations, including those in connection with the new U.S. administration, or the interpretation thereof, could increase the costs of doing business for us or our customers or suppliers or restrict our actions and adversely affect our financial condition, operating results and cash flows.

We may incur fines or penalties, damage to our reputation or other adverse consequences if our employees, suppliers, sub-suppliers or other contract parties, agents or business partners violate anti-bribery, competition, export and import, trade sanctions, data privacy, environmental, human rights or other laws.

We are subject to regulation under a wide variety of U.S. federal and state and non-U.S. laws, regulations and policies, including laws related to anti-corruption, human rights, anti-bribery, export and import compliance, trade sanctions, data privacy, anti-trust and money laundering, due to our domestic and global operations. In particular, the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act and similar anti-bribery laws in other jurisdictions generally prohibit companies and their intermediaries from making improper payments to government officials for the purpose of obtaining or retaining business, and we operate in many parts of the world that have experienced government corruption to some degree. We cannot provide assurance our internal controls will always protect us from the improper conduct of our employees, suppliers, sub-suppliers or other contract parties, agents and business partners. Violations of these laws, which are complex, may conflict with laws of other jurisdictions and often are difficult to interpret and apply, could subject us to civil or criminal investigations in the United States and other jurisdictions, could lead to substantial civil or criminal, monetary and non-monetary penalties and related shareholder lawsuits, could lead to increased costs of compliance and could damage our reputation, business, financial condition, operating results and cash flows.

We are required to comply with environmental laws and regulations that could cause us to incur significant costs.

Our manufacturing facilities are subject to numerous laws and regulations designed to protect the environment, and we expect that additional requirements with respect to environmental matters will be imposed on us and our customers in the future. Material future expenditures may be necessary if compliance standards change or material unknown conditions that require remediation are discovered. Environmental laws could also restrict our ability to expand our facilities or could require us to acquire costly equipment or to incur other significant expenses in connection with our business. If we fail to comply with present and future environmental laws and regulations, we could be subject to future liabilities, which could adversely affect our financial condition, operating results and cash flows.

Developments or assertions by or against us relating to intellectual property rights could adversely affect our financial performance.

We own significant intellectual property, including a large number of patents, trademarks, copyrights and trade secrets, and we are involved in numerous licensing arrangements. Our intellectual property plays an important role in maintaining our competitive position in a number of the markets that we serve. Failure to successfully protect our intellectual property could adversely impact our business. Furthermore, we may not be able to readily identify unauthorized use or take appropriate and timely steps to enforce our intellectual property rights. Also, while we believe we have the necessary rights to use all of the intellectual property we use, if we are found to infringe on the rights of others, we could be adversely impacted. Developments or assertions by or against us relating to intellectual property rights could adversely affect our financial condition, operating results and cash flows.

ITEM 1B – UNRESOLVED STAFF COMMENTS

None.

ITEM 1C – CYBERSECURITY

Risk Management and Strategy

We have implemented and maintain multiple layers of physical, administrative and technical security processes designed to protect our manufacturing facilities from disruptions that may result from cybersecurity incidents, as well as safeguard the confidentiality of our critical systems, and data residing on those systems, including employee data, customer data and intellectual property. Our risk assessment and management of material risks from cybersecurity threats is integrated into our overall enterprise risk management process, as well as our information systems processes. Our strategy includes regular formal risk assessments, dynamic risk and threat analysis, utilization of security tools, regular cybersecurity-related tabletop and phishing exercises designed to simulate cybersecurity incidents, and frequent security awareness and technical security trainings. We conduct periodic internal and third-party assessments to evaluate our cybersecurity posture and test and assess our incident response program, incident roles and responsibilities, material impact evaluation, and decision-making processes in the event of a cybersecurity incident. We use our risk and security assessments to enhance our information security capabilities. We also have an internal employee network of hundreds of security awareness ambassadors from diverse functions throughout our global locations who inform our personnel concerning threat awareness and cybersecurity risk mitigation.

Depending on the environment, we implement and maintain various technical, physical and organizational measures, processes, standards and policies designed to manage and mitigate material risks from cybersecurity threats to our information systems and data, including an incident response policy and scenario-based playbooks, an incident detection program, a vulnerability management program, disaster recovery and business continuity plans, risk assessment processes, security standards, network security controls, access controls, systems monitoring, employee awareness training and cyber insurance.

Our internal information security team oversees and works collaboratively with various information security service providers. Our cybersecurity program and practices are supported through the use of third-party service providers to assist in the identification, assessment and management of risks specific to cybersecurity threats, including vendors providing threat intelligence, risk mitigation, dark web monitoring, external scanning and scoring, threat and reputation monitoring, forensics, cyber insurance, advisory services and legal counsel. We use a managed security service provider to augment our internal information security team and to provide additional monitoring capabilities.

We also have a vendor management program addressing cybersecurity risk associated with third-party application providers, hosting services and information technology support services we may retain. This program includes security questionnaires, review of vendor security programs, review of security assessments and assurance reports, vulnerability scans, and direct inquiries and collaboration with our vendors' security personnel. Our vendor management process involves different levels of assessment depending on the services provided by the vendor, the sensitivity of the related information systems and data, and the identity of the provider. It is designed to help identify cybersecurity risks associated with a provider and impose contractual obligations related to cybersecurity on the provider.

We have an incident response plan that includes scenario-based playbooks for addressing cybersecurity incidents and associated crisis communication procedures designed to facilitate coordination across the Company and with our partners, customers, the public and others.

For the year ended December 31, 2024, there have been no risks from cybersecurity threats that have materially affected or are reasonably likely to materially affect our business strategy, financial condition or results of operations. For a description of risks related to our information technology systems, including cybersecurity threats, see Item 1A, "Risk Factors."

Governance

Our Board of Directors (the "Board") addresses our cybersecurity risk management as part of its general oversight function. The Audit Committee of the Board (the "Audit Committee") is responsible for overseeing our cybersecurity risk management processes, including our assessment and mitigation of material risks from cybersecurity threats. The Audit Committee receives regular reports, summaries or presentations related to cybersecurity threats, risk, mitigation and related processes from the Chief Information Officer ("CIO") and Chief Information Security Officer ("CISO"). In addition, on at least an annual basis, the Board receives reports, summaries or presentations related to cybersecurity threats, risk, mitigation and related processes.

Our cybersecurity risk assessment and management processes are implemented and maintained by our CIO and CISO, who are supported by other members of management, as necessary. Our CIO and CISO are responsible for approving budgets, cybersecurity incident preparedness, approving cybersecurity processes, reviewing security assessments and other security-related reports, and providing the Chief Financial Officer ("CFO") with regular updates on cybersecurity-related matters. Our CIO has served in this role for four years and has more than twenty-nine years of relevant experience, including previous roles as the CIO for two companies and the divisional information technology leader for two companies. Our CISO, who reports to the CIO, has served in this role for three years and has more than twenty-nine years of relevant experience, including a focus on information security and cybersecurity for the last sixteen years. He previously served as the CISO for another automotive

supplier. In addition, our CISO is engaged with the cybersecurity community through current and past involvement with organizations such as Automotive Information Sharing and Analysis Center, Michigan Infragard, Domestic Security Alliance Council and the European Association of Automotive Suppliers cybersecurity workgroup. In addition, we have an information security team comprised of dozens of experienced employees who address cybersecurity matters. The CIO and CISO are also responsible for hiring appropriate personnel, assisting with the integration of cybersecurity risk considerations into our overall risk management strategy, communicating key priorities to relevant personnel, and mitigating and remediating cybersecurity incidents.

Our cybersecurity incident response program is designed to escalate certain cybersecurity incidents to various levels of management depending on the circumstances, including our CIO, CISO, General Counsel, Division Presidents, CFO and/or Chief Executive Officer (collectively, "Senior Management") and, in the instance of product cybersecurity incidents, our E-Systems Safety Committee. Senior Management works with our incident response team to help mitigate and remediate certain escalated cybersecurity incidents. In addition, our incident response program includes reporting certain cybersecurity incidents to the Audit Committee and, in certain circumstances, to the Board.

ITEM 2 – PROPERTIES

As of December 31, 2024, our properties include just-in-time manufacturing facilities, component manufacturing facilities, sequencing and distribution sites, and dedicated administrative/technical support facilities in 37 countries. A summary of these properties by operating segment and by region is shown below:

	North America	Europe and Africa	Asia	South America	Total
Seating	59	73	39	9	180
E-Systems	16	26	16	4	62
	75	99	55	13	242

In addition, we have 13 general administrative/technical support facilities. Our properties include seven advanced technology centers (one at our corporate headquarters in Southfield, Michigan, one additional in North America, two in Europe and three in Asia). Of our 255 total properties, 92 are owned and 163 are leased.

ITEM 3 – LEGAL PROCEEDINGS

Legal and Environmental Matters

We are involved from time to time in various legal proceedings and claims, including, without limitation, commercial or contractual disputes, product liability claims, and environmental and other matters. For a description of risks related to various legal proceedings and claims, see Item 1A, "Risk Factors." For a description of our outstanding material legal proceedings, see Note 13, "Legal and Other Contingencies," to the consolidated financial statements included in this Report.

ITEM 4 – MINE SAFETY DISCLOSURES

Not applicable.

SUPPLEMENTARY ITEM – INFORMATION ABOUT OUR EXECUTIVE OFFICERS

The following table sets forth the names, ages and positions of our executive officers. Executive officers are appointed annually by our Board of Directors (the "Board") and serve at the pleasure of our Board.

Name	Age	Position
Jason M. Cardew	54	Senior Vice President and Chief Financial Officer
Alicia J. Davis	54	Senior Vice President and Chief Strategy Officer
Amy A. Doyle	57	Vice President and Chief Accounting Officer
Harry A. Kemp	49	Senior Vice President, Chief Administrative Officer and General Counsel
Frank C. Orsini	52	Executive Vice President and President, Seating
Nicholas J. Roelli	53	Senior Vice President and President, E-Systems
Raymond E. Scott	59	President and Chief Executive Officer
Marianne Vidershain	45	Vice President, Treasurer and Head of Investor Relations

Set forth below is a description of the business experience of each of our executive officers.

Jason M. Cardew Mr. Cardew is the Company's Senior Vice President and Chief Financial Officer, a position he has held since November 2019. Mr. Cardew most recently served as the Company's Vice President, Finance - Seating and E-Systems since September 2018. Prior to that, he served as the Company's Vice President, Finance - Seating since April 2012. Previously, he served as the Company's Vice President and Interim Chief Financial Officer since September 2011, Vice President, Finance - Financial Planning and Analysis since April 2010, Vice President, Finance - Seating since 2003 and in various financial positions since joining the Company in 1992.

- Alicia J. Davis Ms. Davis is the Company's Senior Vice President and Chief Strategy Officer, a position she has held since May 2021. Ms. Davis most recently served as the Company's Senior Vice President, Corporate Development and Investor Relations since September 2019. Prior to that, she served as the Company's Vice President, Investor Relations since joining the Company in August 2018. Prior to joining the Company, Ms. Davis was on the faculty at the University of Michigan Law School since June 2004, where she most recently served as a Professor and the Associate Dean for Strategic Initiatives. Ms. Davis continues to teach at the University of Michigan Law School as a Professor from Practice. Previous to that, she was a lawyer at Kirkland & Ellis since June 2002, a Vice President at Raymond James & Associates since August 1999 and an Investment Banking Analyst at Goldman Sachs from August 1993 to June 1995.
- Amy A. Doyle
 Ms. Doyle is the Company's Vice President and Chief Accounting Officer, a position she has held since May 2017. Ms. Doyle most recently served as the Company's Assistant Corporate Controller since September 2006. Previously, she served in positions of increasing responsibility at the Company, including Director, Financial Reporting since 2003 and Manager, Financial Reporting since joining the Company in 1999. Prior to joining the Company, Ms. Doyle served as an audit manager for Arthur Andersen LLP.
- Harry A. Kemp
 Mr. Kemp is the Company's Senior Vice President, Chief Administrative Officer and General Counsel, a position he has held since January 2023. Mr. Kemp most recently served as the Company's Senior Vice President, General Counsel and Corporate Secretary since August 2019. Prior to that, Mr. Kemp served as the Company's Vice President and Corporate Counsel since January 2019. Previously, he served as the Company's Vice President and Divisional Counsel Seating since September 2016 and Vice President and Divisional Counsel E-Systems since joining the Company in December 2009. Prior to joining the Company, Mr. Kemp was a partner at Bodman PLC since 2003 and served as an engagement manager at McKinsey and Company, a global management consulting firm, since 2000.
- *Frank C. Orsini* Mr. Orsini is the Company's Executive Vice President and President, Seating, a position he has held since March 2018. Mr. Orsini most recently served as the Company's Senior Vice President and President, E-Systems since September 2012. Prior to that, he served as the Company's Vice President and Interim President, E-Systems since October 2011. Previously, he served as the Company's Vice President, Operations, E-Systems since 2009, Vice President, Sales, Program Management & Manufacturing, E-Systems since 2008, Vice President, North America Seating Operations since 2005 and in various other management positions since joining the Company in 1994.

- Nicholas J. Roelli Mr. Roelli is the Company's Senior Vice President and President, E-Systems, a position he has held since May 2024. Mr. Roelli most recently served as the Company's Vice President, North America Seating since May 2022. Prior to that, he served as the Company's Vice President, North America Structures since May 2019. Previously, he served as the Company's Vice President, Global Seating Structures since August 2016 and in various other positions of increasing responsibility since joining the Company in 1994.
- *Raymond E. Scott* Mr. Scott is the Company's President and Chief Executive Officer, a position he has held since March 2018. Mr. Scott most recently served as the Company's Executive Vice President and President, Seating since November 2011. Prior to that, he served as the Company's Senior Vice President and President, E-Systems since February 2008. Previously, he served as the Company's Senior Vice President and President and President, North American Seat Systems Group since August 2006, Senior Vice President and President and President, North American Customer Group since June 2005, President, European Customer Focused Division since June 2004 and President, General Motors Division since November 2000.
- Marianne Vidershain Ms. Vidershain is the Company's Vice President, Treasurer and Head of Investor Relations, a position she has held since May 2024. Ms. Vidershain most recently served as the Company's Vice President and Treasurer since February 2021. Prior to that, she served as the Company's Assistant Treasurer since January 2018. Previously, she served as the Company's Director, Global Financial Planning & Analysis since January 2015, Director, Finance Global Purchasing since February 2014, Director, Capital Markets and Subsidiary Finance since April 2010, Treasury Manager since January 2007 and in various other treasury positions since joining the Company in 2004.

PART II

ITEM 5 – MARKET FOR THE COMPANY'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock is listed on the New York Stock Exchange under the symbol "LEA."

Dividends

We currently expect to pay quarterly cash dividends in the future, although such payments are at the discretion of our Board of Directors (the "Board") and will depend upon our financial condition, results of operations, capital requirements, alternative uses of capital and other factors that our Board may consider at its discretion. See Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations — Forward-Looking Statements," and Note 11, "Capital Stock, Accumulated Other Comprehensive Loss and Equity," to the consolidated financial statements included in this Report.

Holders of Common Stock

The Transfer Agent and Registrar for our common stock is Computershare Trust Company, N.A., located in Canton, Massachusetts. On February 12, 2025, there were 109 registered holders of record of our common stock.

For certain information regarding our equity compensation plans, see Part III — Item 12, "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters — Equity Compensation Plan Information."

Common Stock Share Repurchase Program

Since the first quarter of 2011, our Board has authorized \$6.7 billion in share repurchases under our common stock share repurchase program. As of December 31, 2024, we have repurchased, in aggregate, \$5.6 billion of our outstanding common stock, at an average price of \$94.54 per share, excluding commissions and related fees, and have a remaining repurchase authorization of \$1.1 billion, which expires on December 31, 2026.

We may implement share repurchases through a variety of methods, including, but not limited to, open market purchases, accelerated stock repurchase programs and structured repurchase transactions. The extent to which we may repurchase our outstanding common stock and the timing of such repurchases will depend upon our financial condition, results of operations, capital requirements, prevailing market conditions, alternative uses of capital and other factors. See Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations — Forward-Looking Statements," and Note 11, "Capital Stock, Accumulated Other Comprehensive Loss and Equity," to the consolidated financial statements included in this Report.

A summary of the shares of our common stock repurchased during the fiscal quarter ended December 31, 2024, is shown below:

 Approximate Dollar

 Approximate Dollar

Period	Total Number of Shares Purchased	P	Average rice Paid er Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Va Ma	pproximate Dollar alue of Shares that y Yet be Purchased nder the Program (in millions)
September 29, 2024 through October 26, 2024	239,935	\$	108.08	239,935	\$	1,174.8
October 27, 2024 through November 23, 2024	135,135	\$	96.20	135,135		1,161.8
November 24, 2024 through December 31, 2024	634,009	\$	97.65	634,009		1,099.9
Total	1,009,079	\$	99.94	1,009,079	\$	1,099.9

Performance Graph

The following graph compares the cumulative total shareholder return from December 31, 2019 through December 31, 2024, for our common stock, the S&P 500 Index and a peer group ⁽¹⁾ of companies that we have selected for purposes of this comparison. We have assumed that dividends have been reinvested, and the returns of each company in the S&P 500 Index and the peer group have been weighted to reflect relative stock market capitalization. The graph below assumes that \$100 was invested on December 31, 2019, in each of our common stock, the stocks comprising the S&P 500 Index and the stocks comprising the peer group.

	De	cember 31, 2019	De	cember 31, 2020	De	cember 31, 2021	De	cember 31, 2022	De	cember 31, 2023	De	cember 31, 2024
Lear Corporation	\$	100.00	\$	116.90	\$	135.83	\$	94.14	\$	109.57	\$	75.42
S&P 500	\$	100.00	\$	118.39	\$	152.34	\$	124.73	\$	157.48	\$	196.85
Peer Group ⁽¹⁾	\$	100.00	\$	117.80	\$	128.37	\$	85.94	\$	95.41	\$	72.31

⁽¹⁾ We do not believe that there is a single published industry or line of business index that is appropriate for comparing shareholder returns. As a result, we have selected a peer group comprised of representative independent automotive suppliers whose common stock is publicly traded. Our peer group, referenced in the graph above, consists of Adient plc, American Axle & Manufacturing Holdings Inc., Aptiv PLC, Autoliv, Inc., BorgWarner Inc., Continental AG, Dana Incorporated, Forvia SE (formerly known as Faurecia), Gentex Corporation, Gentherm Incorporated, Magna International, Inc., Valeo and Visteon Corporation, which we believe provides a more meaningful comparison of stock performance than our previous peer group.

ITEM 6 – RESERVED

ITEM 7 – MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Executive Overview

Lear Corporation is a global automotive technology leader in Seating and E-Systems, enabling superior in-vehicle experiences for consumers around the world. We supply complete seat systems, key seat components, complete electrical distribution and connection systems, high-voltage power distribution products, including battery disconnect units ("BDUs"), low-voltage power distribution products and electronic controllers to all of the world's major automotive manufacturers.

Lear is built on a foundation and strong culture of innovation, operational excellence, and engineering and program management capabilities. We use our product and process design and technological expertise, as well as our global reach and competitive manufacturing footprint, to achieve our financial goals and objectives. These include continuing to deliver profitable growth balancing risks and returns, investing in product and process innovations to drive business growth and profitability, maintaining a strong balance sheet with investment grade credit metrics, and consistently returning capital to our shareholders. Further, we have aligned our strategy with key trends affecting our business. At Lear, we are *Making every drive better*TM by providing technology for safer, smarter and more comfortable journeys, while adhering to our values — *Be Inclusive. Be Inventive. Get Results the Right Way.*

Our business is organized under two reporting segments: Seating and E-Systems. Each of these segments has a varied product and technology portfolio across a number of component categories. Further, we continuously evaluate this portfolio, aligning it with industry trends while balancing risk-adjusted returns, which allows us to offer value-added solutions to our customers.

Our Seating business consists of the design, development, engineering and manufacture of complete seat systems and key seat components. Our capabilities in operations and supply chain management enable synchronized assembly and just-in-time delivery of complex complete seat systems at high volumes to our customers. As the most vertically integrated global seat supplier, our key seat component product offerings include seat trim covers; surface materials such as leather and fabric; seat mechanisms; seat foam; headrests; and thermal comfort systems such as seat heating, ventilation, active cooling, pneumatic lumbar and massage products. All of these products are compatible with traditional internal combustion engine ("ICE") architectures and electrified powertrains, including the full range of hybrid, plug-in hybrid and battery electric architectures. Our thermal comfort systems are facilitated by our seat system, component and integration capabilities, together with our competencies in electronics, sensors, software and algorithms.

Our E-Systems business consists of the design, development, engineering and manufacture of complete electrical distribution and connection systems; high-voltage power distribution products, including BDUs; and low-voltage power distribution products and electronic controllers. These capabilities enable us to provide our customers with customizable solutions with optimized designs at competitive costs for both low-voltage and high-voltage vehicle architectures.

- Electrical distribution and connection systems utilize low-voltage and high-voltage wire, high-speed data cables and flat wiring to connect networks and electrical signals and manage electrical power within the vehicle for all types of powertrains from traditional ICE architectures to the full range of electrified powertrains that require management of higher voltage and power. Key components of our electrical distribution and connection systems portfolio include wire harnesses, terminals and connectors, high-voltage battery connection systems and engineered components.
- High-voltage battery connection systems include intercell connect boards, bus bars and main battery connection systems. High-voltage power distribution products control the flow and distribution of high-voltage power throughout electrified vehicles and include BDUs which control all electrical energy flowing into and out of high-voltage batteries in electrified vehicles.
- Low-voltage power distribution products and electronic controllers facilitate signal, data and/or power management within the vehicle and include the associated software required to facilitate these functions. Key components of this portfolio include zonal controllers, body domain control modules and low-voltage and high-voltage power distribution modules. Our software offerings include embedded control, cybersecurity software and software to control hardware devices. Our customers traditionally have sourced our electronic hardware together with the software that we integrate and embed in it.

We serve all of the world's major automotive manufacturers through both our Seating and E-Systems businesses, and we have automotive content on more than 480 vehicle nameplates worldwide. It is common for us to have both seating and electrical and/or electronic content on the same vehicle platform.

Our businesses benefit globally from leveraging common operating standards and disciplines, including world-class product development and manufacturing processes, as well as common customer support and regional infrastructures, all of which contribute to our reputation for operational excellence. Our core capabilities are shared across component categories and include high-precision manufacturing and assembly with short lead times, complex, global supply chain management, global

engineering and program management, the agility to establish and/or transfer production between facilities quickly, and a unique, customer-focused culture. In select instances, we are able to manufacture both Seating and E-Systems components in the same facility. Our businesses also utilize proprietary, industry-specific processes and standards, leverage common low-cost engineering centers and share centralized operating support functions. These functions include health and safety, logistics, quality, supply chain management and all major administrative functions, such as corporate finance, executive administration, human resources, information technology and legal. We continue to build on our reputation for operational excellence through organic and inorganic investments in automation and other advanced manufacturing technologies and the digital transformation of both our operations and administrative functions. It involves the integration of new technologies, such as Industrial Internet of Things (IIoT), cloud computing, artificial intelligence (AI), machine learning and advanced automation, into production facilities and business operations. These technologies enable smart and automated machines and smart factories to communicate, analyze and optimize products and processes, resulting in higher efficiency, quality and responsiveness to customers.

Through our products, processes, technology and strategic initiatives, we are well-positioned to capitalize on business growth opportunities. We are focused on profitably growing our businesses and have implemented a strategy designed to deliver industry-leading, long-term financial returns. This strategy is based on the following four pillars designed to drive growth and profitability in both of our business segments:

- Extend our market leadership position in Seating with priceable features, including modularity and thermal comfort systems;
- Transform our E-Systems business through accelerated growth in connection systems and vehicle architecture evolution and electrification;
- Build on our reputation for operational excellence through organic and inorganic investments in automation and digital technologies; and
- Prioritize people and the planet through our sustainability initiatives to drive business growth, cost reductions and improved employee retention.

IDEA by Lear - Innovative. Digital. Engineered. Automated. - supports our strategy to drive growth and improve profitability. IDEA reflects our commitment to continue to strengthen our competitive position in both of our business segments through the development of innovative products and the utilization of advanced technologies and process automation that improve our profitability through increased efficiency and extend our leadership position in operational excellence.

For further information related to our strategy, see Part 1 — Item 1, "Business — Industry" and "- Strategy."

Industry Overview

We supply all vehicle segments of the automotive light vehicle original equipment market in every major automotive producing region in the world. Our sales are driven by the number of vehicles produced by the automotive manufacturers and our content per vehicle. Although 2023 industry production returned to pre-pandemic levels, 2024 industry production remained approximately 6% below 2017 peak levels (based on January 2025 S&P Global Mobility projections), and 2024 industry production in North America and Europe, our two largest markets, remained approximately 9% and 24%, respectively, below prior peak levels (based on January 2025 S&P Global Mobility projections). Since 2020, the global economy, as well as the automotive industry, have been influenced directly and indirectly by macroeconomic events resulting in unfavorable conditions, including shortages of semiconductor chips and other components, elevated inflation levels on commodities and labor, higher interest rates, and labor and energy shortages in certain markets. Certain of these factors, among others, continue to impact consumer demand. Our strategy to mitigate these impacts encompasses our comprehensive cost management process, including cost technology optimization, actions to further align our manufacturing capacity to the current industry production environment and investments in automation and other advanced manufacturing technologies, as well as commercial recovery mechanisms. This will allow us to enhance operational efficiencies, improve the utilization of existing facilities and equipment to reduce future expenditures, and streamline administrative functions. For a description of risks related to macroeconomic events, see Item 1A, "Risk Factors."
Global automotive industry production volumes in 2024, as compared to 2023, are shown below (in thousands of units):

	2024 (1)	2023 (1) (2)	% Change
North America	15,467.2	15,682.8	(1%)
Europe and Africa	17,543.2	18,390.8	(5%)
Asia	50,545.6	50,415.3	%
South America	2,891.5	2,817.9	3%
Other	1,686.4	1,766.9	(5%)
Global light vehicle production	88,133.9	89,073.7	(1%)

⁽¹⁾ Production data based on S&P Global Mobility.

⁽²⁾ Production data for 2023 has been updated from our 2023 Annual Report on Form 10-K to reflect actual production levels.

Automotive sales and production can also be affected by the age of the vehicle fleet and related scrappage rates, labor relations issues, labor shortages, fuel prices, regulatory requirements, government initiatives and incentives, trade agreements, tariffs and other non-tariff trade barriers (including recent U.S. tariffs imposed or threatened to be imposed on Mexico, Canada and China, as well as other countries and any retaliatory actions taken by such countries), the availability and cost of credit, the availability and cost of raw materials and critical components, and logistics issues, as well as vehicle affordability and consumer preferences regarding vehicle powertrains (including preferences regarding hybrid and electric vehicles), size, configuration and features, among other factors. The impact of potential tariffs on our business and financial condition, if any, is subject to a number of factors that are not yet known, including the effective date and duration of such tariffs, the scope and nature of any tariffs, the amount of any tariffs, any countermeasures that the target countries may take in response to such tariffs. In light of these uncertainties, we can provide no assurance that any mitigating actions that may become available to us, such as our ability to pass along some or all of the costs of any tariffs to some or all of our customers, will be successful. Our sales and production may be further affected by new entrants to the industry, including domestic automakers in certain regions and non-traditional automakers, and the restructuring actions, including facility closures, of our customers and suppliers. Our operating results are also significantly impacted by the overall commercial success of the vehicle platforms for which we supply particular products, as well as the profitability of the products that we supply for these platforms, which is determined, in part, by the level of vertical integration. The loss of business with respect to any vehicle model for which we are a significant supplier, or a decrease in the production levels of any such models, could adversely affect our operating results. In addition, larger cars and light trucks, as well as vehicle platforms that offer more features and functionality, such as luxury, sport utility and crossover vehicles, typically have more content and, therefore, tend to have a more significant impact on our operating results.

Our percentage of consolidated net sales by region in 2024 and 2023 is shown below:

	2024	2023
North America	42 %	40 %
Europe and Africa	36 %	37 %
Asia	19 %	19 %
South America	3 %	4 %
Total	100 %	100 %

Our ability to reduce the risks inherent in certain concentrations of our business, and thereby maintain our financial performance in the future, will depend, in part, on our ability to continue to diversify our sales on a customer, product, platform and geographic basis to better reflect the market overall.

The automotive industry, and our business, continue to be shaped by the broad trend of electrification. Although the adoption of electrified vehicles has been slower than anticipated in certain regions, demand for, and regulatory developments related to, improved energy efficiency and sustainability (e.g., government mandates related to fuel economy and carbon emissions) remain significant drivers of this trend.

Our material cost as a percentage of net sales was 64.2% in 2024, as compared to 65.2% in 2023 and 66.1% in 2022. Raw material, energy, commodity and product component costs can be volatile, reflecting, among other things, changes in supply and demand, logistics issues, global trade and tariff policies (including recent U.S. tariffs imposed or threatened to be imposed on Mexico, Canada and China, as well as other countries and any retaliatory actions taken by such countries), and geopolitical issues. Our primary commodity cost exposures relate to steel, copper and leather. We have developed and implemented strategies to mitigate the impact of increases in such costs through the selective in-sourcing of components, the continued consolidation of our supply base, longer-term purchase commitments, commercial recovery mechanisms and the selective

expansion of low-cost country sourcing and engineering, as well as value engineering and product benchmarking. Further, our exposure to changes in steel prices is primarily indirect, through purchased components, and a significant portion of our copper, leather and direct steel purchases are subject to price index agreements with our customers and suppliers. Certain of these strategies also may limit our opportunities in a declining price environment. In the current environment of elevated raw material, energy, commodity and product component costs, these strategies, together with commercial negotiations with our customers and suppliers, have offset a significant portion of the adverse impact. In addition, the availability of raw materials, energy, commodities and product components fluctuates from time to time due to factors outside of our control. If these costs increase or availability is restricted, it could have an adverse impact on our operating results in the foreseeable future. See Part I — Item 1A, "Risk Factors — Increases in the costs and restrictions on the availability of raw materials, energy, commodities, product components and labor could adversely affect our financial performance" and "Risk Factors — International trade policies, including protectionist trade policies, such as tariffs and sanctions, could adversely affect our financial performance," as well as "— Forward-Looking Statements" below.

Our customers typically require us to reduce our prices over the life of a vehicle model and, at the same time, assume significant responsibility for the design, development and engineering of our products. Our financial performance is largely dependent on our ability to offset these price reductions with product cost reductions through product design enhancements, supply chain management, manufacturing efficiencies and restructuring actions. We also seek to enhance our financial performance by investing in product development, design capabilities and new product initiatives that respond to and anticipate the needs of our customers and consumers. We continually evaluate operational and strategic alternatives to improve our business structure and align our business with the changing needs of our customers and major industry trends affecting our business.

Financial Measures

In evaluating our financial condition and operating performance, we focus primarily on earnings, operating margins, cash flows and return on invested capital. Our strategy includes expanding our business with new and existing customers globally through new products, including those aligned with the trend toward electrification. We also have increased our vertical integration capabilities globally, as well as expanded our component manufacturing capacity in Asia, Central America, Eastern Europe, Mexico and Northern Africa and our low-cost engineering capabilities in Asia, Eastern Europe and Northern Africa.

Our success in generating cash flow will depend, in part, on our ability to manage working capital effectively. Working capital can be significantly impacted by the timing of cash flows from sales and purchases. Historically, we generally have been successful in aligning our supplier payment terms with our customer payment terms. However, our ability to continue to do so may be impacted by adverse automotive industry conditions, including inconsistent production schedules due to supply shortages and lower consumer demand, changes to our customers' payment terms and the financial condition of our suppliers. In addition, our cash flow is impacted by our ability to manage our inventory and capital spending effectively. We utilize return on invested capital as a measure of the efficiency with which our assets generate earnings. Improvements in our return on invested capital will depend on our ability to maintain an appropriate asset base for our business and to increase productivity and operating efficiency.

Acquisitions

2024

In July 2024, we completed the acquisition of WIP Industrial Automation ("WIP"), a privately held company based in Valladolid, Spain. WIP develops, integrates and deploys cutting-edge technologies to create customized automation solutions for production applications used in our business. Our acquisition of WIP further strengthens our robotics and AI-based capabilities, which are important for production efficiency, quality and safety in a modern manufacturing environment.

<u>2023</u>

In April 2023, we completed the acquisition of I.G. Bauerhin ("IGB"), a privately held supplier of automotive seat heating, ventilation and active cooling, steering wheel heating, seat sensors and electronic control modules, headquartered in Grundau-Rothenbergen, Germany. IGB has more than 4,600 employees at nine manufacturing plants in seven countries. The acquisition furthers our comprehensive strategy to develop and integrate a complete portfolio of thermal comfort systems for automotive seating. IGB provides active cooling, as well as additional scale to our seat heating and ventilation capabilities and complements the lumbar and massage capabilities obtained with our acquisition of Kongsberg Automotive's Interior Comfort Systems business unit in February 2022. Further, the vertical integration opportunities provided by this acquisition help support our goal of achieving global market share gains in seat systems. We paid approximately \$175 million, net of cash acquired, in connection with the acquisition. On May 1, 2023, we borrowed \$150 million under our delayed-draw term loan facility (the

"Term Loan") to finance, in part, the acquisition of IGB. For further information, see Note 3, "Acquisition," to the consolidated financial statements included in this Report.

Operational Restructuring

In 2024, we incurred pretax restructuring costs of \$139 million and related manufacturing inefficiency charges of approximately \$6 million, as compared to pretax restructuring costs of \$133 million and related manufacturing inefficiency charges of approximately \$1 million in 2023. None of the individual restructuring actions initiated in 2024 were material. Further, there have been no changes in previously initiated restructuring actions that have resulted (or will result) in a material change to our restructuring costs.

Our restructuring actions include plant closures and workforce reductions and are initiated to maintain our competitive footprint or are in response to customer initiatives or changes in global and regional automotive markets. Our restructuring actions are designed to maintain or improve our operating results and profitability throughout the automotive industry cycles. Restructuring actions are generally funded within twelve months of initiation and are funded by cash flows from operating activities and existing cash balances. We expect to incur approximately \$78 million of additional restructuring costs related to activities initiated as of December 31, 2024, all of which are expected to be incurred in the next twelve months. We plan to implement additional restructuring actions in order to align our manufacturing capacity and other costs with prevailing regional automotive production levels. Such future restructuring actions are dependent on market conditions, customer actions and other factors.

For further information, see Note 4, "Restructuring," to the consolidated financial statements included in this Report.

Financing Transactions

In May 2023, we borrowed \$150 million under our Term Loan to finance, in part, the acquisition of IGB. In December 2024, we made a principal payment of \$50 million under the Term Loan.

In November 2023, we extended the maturity date of our revolving credit facility by one year to October 28, 2027.

For further information related to our acquisition of IGB, see Note 3, "Acquisition," to the consolidated financial statements included in this Report. For further information related to our Term Loan and our revolving credit facility, see "— Liquidity and Capital Resources — Capitalization — Credit Agreement" and "— Term Loan" below and Note 6, "Debt," to the consolidated financial statements included in this Report.

Common Stock Share Repurchase Program and Quarterly Cash Dividends

We may implement share repurchases through a variety of methods, including, but not limited to, open market purchases, accelerated stock repurchase programs and structured repurchase transactions. The extent to which we may repurchase our outstanding common stock and the timing of such repurchases will depend upon our financial condition, results of operations, capital requirements, prevailing market conditions, alternative uses of capital and other factors (see "— Forward-Looking Statements" below).

Since the first quarter of 2011, our Board of Directors (the "Board") has authorized \$6.7 billion in share repurchases under our common stock share repurchase program, including an increase in our share repurchase authorization to \$1.5 billion on February 16, 2024. In 2024, we repurchased \$400 million of shares. As of December 31, 2024, we have a remaining repurchase authorization of \$1.1 billion, which expires on December 31, 2026.

In 2024, 2023 and 2022, our Board declared a quarterly cash dividend of \$0.77 per share of common stock in all quarters.

For further information related to our common stock share repurchase program and our quarterly cash dividends, see Item 5, "Market for the Company's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities," "— Liquidity and Capital Resources — Capitalization" below and Note 11, "Capital Stock, Accumulated Other Comprehensive Loss and Equity," to the consolidated financial statements included in this Report.

Other Matters

In 2024, we recognized net tax benefits of \$25 million related to restructuring charges, the release of tax reserves and audit settlements at foreign subsidiaries, the establishment of a valuation allowance on deferred tax assets of a foreign subsidiary and various other items.

In 2023, we recognized net tax benefits of \$35 million related to restructuring charges, the release of valuation allowances on deferred tax assets of foreign subsidiaries, the release of tax reserves at several foreign subsidiaries and various other items.

In 2022, we recognized net tax benefits of \$34 million related to restructuring charges and various other items.

As discussed above, our results for the years ended December 31, 2024, 2023 and 2022, reflect the following items (in millions):

For the year ended December 31,	2	2024	20	23	2022	
Costs related to restructuring actions, including manufacturing inefficiencies of \$6 million in 2024, \$1 million in 2023 and \$5 million in 2022	\$	145	\$	134	\$	159
Acquisition costs		1		1		10
Acquisition-related inventory fair value adjustment		—		2		1
Non-cash loss related to pending disposal of a non-core business		24				—
Costs related to CrowdStrike Holdings, Inc.		3		—		
Impairments related to Fisker Inc. ("Fisker")		15				—
Impairments (recoveries) related to Russian operations		(2)		2		19
Intangible asset impairment				2		9
Insurance recoveries related to typhoon in the Philippines, net of costs		—		(7)		(1)
Non-cash settlement loss on pension lump-sum payout		7				—
Foreign exchange (gains) losses due to foreign exchange rate volatility related to Russia		(2)		(2)		10
Gain on acquisition-related foreign exchange contracts		—				(2)
Favorable indirect tax ruling in a foreign jurisdiction		—		(1)		
Loss related to affiliates				7		
Tax benefits, net		(25)		(35)		(34)

For further information regarding these items, see Note 2, "Summary of Significant Accounting Policies," Note 3, "Acquisition," Note 4, "Restructuring, Note 7, "Leases," Note 8, "Income Taxes," Note 9, Pension and Other Postretirement Benefit Plans," Note 13, "Legal and Other Contingencies," and Note 15, "Financial Instruments," to the consolidated financial statements included in this Report. This section includes forward-looking statements that are subject to risks and uncertainties. For further information regarding these and other factors that have had, or may have in the future, a significant impact on our business, financial condition or results of operations, see Part I — Item 1A, "Risk Factors," and "— Forward-Looking Statements" below.

Results of Operations

A summary of our operating results in millions of dollars and as a percentage of net sales is shown below:

For the year ended December 31,	2024		2023				2022	
Net sales								
Seating	\$ 17,222.1	73.9 %	\$	17,548.8	74.8 %	\$	15,711.2	75.2 %
E-Systems	6,083.9	26.1		5,918.1	25.2		5,180.3	24.8
Net sales	23,306.0	100.0		23,466.9	100.0		20,891.5	100.0
Cost of sales	21,666.7	93.0		21,756.5	92.7		19,481.6	93.3
Gross profit	1,639.3	7.0		1,710.4	7.3		1,409.9	6.7
Selling, general and administrative expenses	702.5	3.0		714.7	3.0		684.8	3.3
Amortization of intangible assets	49.1	0.2		62.5	0.3		70.8	0.3
Interest expense, net	106.2	0.5		101.1	0.4		98.6	0.5
Other expense, net	48.6	0.2		54.9	0.3		46.4	0.2
Provision for income taxes	191.1	0.8		180.8	0.8		133.7	0.6
Equity in net income of affiliates	(50.0)	(0.2)		(49.3)	(0.2)		(33.1)	(0.2)
Net income attributable to noncontrolling interests	85.2	0.3		73.2	0.3		81.0	0.4
Net income attributable to Lear	\$ 506.6	2.2 %	\$	572.5	2.4 %	\$	327.7	1.6 %

Year Ended December 31, 2024, Compared With Year Ended December 31, 2023

Net sales for the year ended December 31, 2024 were \$23.3 billion, as compared to \$23.5 billion for the year ended December 31, 2023. Lower production volumes on Lear platforms in North America, Europe and Africa, and Asia negatively impacted net sales by \$1.1 billion. This decrease was offset by new business in every region, which increased net sales by \$0.9 billion. Commercial recoveries were offset by the impact of selling price reductions and foreign exchange rate fluctuations.

(in millions)	С	ost of Sales
2023	\$	21,756.5
Material cost		(336.2)
Labor cost		98.1
Depreciation		30.6
Other		117.7
2024	\$	21,666.7

Cost of sales in 2024 was \$21.7 billion, as compared to \$21.8 billion in 2023. Lower production volumes on Lear platforms reduced cost of sales. This decrease was offset by new business, which increased cost of sales.

Gross profit and gross margin were \$1.6 billion and 7.0% of net sales in 2024, as compared to \$1.7 billion and 7.3% of net sales in 2023. Lower production volumes on Lear platforms, net of new business, reduced gross profit by \$106 million. Higher restructuring costs and impairment charges related to Fisker also reduced gross profit by \$23 million. The impact of favorable operating performance, including the benefit of restructuring actions, was partially offset by selling price reductions and foreign exchange rate fluctuations. These factors had a corresponding impact on gross margin.

Selling, general and administrative expenses, including engineering and development expenses, were \$703 million for the year ended December 31, 2024, as compared to \$715 million for the year ended December 31, 2023, primarily reflecting lower compensation-related expenses. As a percentage of net sales, selling, general and administrative expenses were 3.0% in 2024 and 2023.

Amortization of intangible assets was \$49 million in 2024, as compared to \$63 million in 2023, as certain of our intangible assets became fully amortized in 2024. Amortization of intangible assets also includes an impairment charge of \$2 million in 2023.

Interest expense, net was \$106 million in 2024, as compared to \$101 million in 2023.

Other expense, net, which includes non-income related taxes, foreign exchange gains and losses, gains and losses related to certain derivative instruments and hedging activities, gains and losses on certain disposals of assets, the non-service cost components of net periodic benefit cost and other miscellaneous income and expense, was \$49 million in 2024, as compared to \$55 million in 2023. In 2024, we recognized a non-cash loss of \$24 million on the pending disposal of a non-core business, a non-cash settlement loss of \$7 million related to our pension lump-sum payout and foreign exchange losses of \$21 million, including \$16 million related to the hyper-inflationary environment and significant currency devaluation in Argentina. In 2024, we also recognized a gain of \$17 million related to the hyper-inflationary environment and significant currency devaluation in Argentina, and losses of \$7 million related to the hyper-inflationary environment and significant currency devaluation in Argentina, and losses of \$7 million related to the hyper-inflationary environment and significant currency devaluation in Argentina, and losses of \$7 million related to impairments of affiliates. In 2023, we also recognized a gain of \$17 million related to the sales of fixed assets and a gain of \$4 million related to insurance recoveries.

For information related to our pension lump-sum payout, see Note 9, "Pension and Other Postretirement Benefit Plans," to the consolidated financial statements included in this Report.

In 2024, the provision for income taxes was \$191 million, representing an effective tax rate of 26.1% on pretax income before equity in net income of affiliates of \$733 million. In 2023, the provision for income taxes was \$181 million, representing an effective tax rate of 23.3% on pretax income before equity in net income of affiliates of \$777 million.

In 2024 and 2023, the provision for income taxes was primarily impacted by the level and mix of earnings among tax jurisdictions. In 2024, we recognized net tax benefits of \$25 million related to restructuring charges, the release of tax reserves and audit settlements at foreign subsidiaries, the establishment of a valuation allowance on deferred tax assets of a foreign subsidiary and various other items. In 2023, we recognized net tax benefits of \$35 million related to restructuring charges, the release of valuation allowances on deferred tax assets of foreign subsidiaries, the release of tax reserves at several foreign subsidiaries and various other items.

For information related to our valuation allowances, see "— Other Matters — Significant Accounting Policies and Critical Accounting Estimates — Income Taxes" below.

Equity in net income of affiliates was \$50 million for the year ended December 31, 2024, as compared to \$49 million for the year ended December 31, 2023.

Net income attributable to Lear was \$507 million, or \$8.97 per diluted share, in 2024, as compared to \$573 million, or \$9.68 per diluted share, in 2023. Net income and diluted net income per share decreased for the reasons described above.

Reportable Operating Segments

We have two reportable operating segments: Seating and E-Systems. For a description of our reportable operating segments, see "Executive Overview" above.

The financial information presented below is for our two reportable operating segments and our other category for the periods presented. The other category includes unallocated costs related to corporate headquarters, regional headquarters and the elimination of intercompany activities, none of which meets the requirements for being classified as an operating segment. Corporate and regional headquarters costs include various support functions, such as information technology, advanced research and development, corporate finance, legal, executive administration and human resources. Financial measures regarding each segment's pretax income before equity in net income of affiliates, interest expense, net and other expense, net ("segment earnings") and segment earnings divided by net sales ("margin") are not measures of performance under accounting principles generally accepted in the United States ("GAAP"). Segment earnings should not be considered in isolation or as a substitute for net income attributable to Lear, net cash provided by operating activities or other income statement or cash flow statement data prepared in accordance with GAAP or as measures of profitability or liquidity. In addition, segment earnings, as we determine it, may not be comparable to related or similarly titled measures reported by other companies.

For a reconciliation of consolidated segment earnings to consolidated income before provision for income taxes and equity in net income of affiliates, see Note 14, "Segment Reporting," to the consolidated financial statements included in this Report.

Seating —

A summary of financial measures for our Seating segment is shown below (dollar amounts in millions):

For the year ended December 31,		2024		2023
Net sales	\$	17,222.1	\$	17,548.8
Segment earnings ⁽¹⁾		988.5		1,066.9
Margin	5.7 %			6.1 %

⁽¹⁾ See definition above.

Seating net sales were \$17.2 billion for the year ended December 31, 2024, as compared to \$17.5 billion for the year ended December 31, 2023, a decrease of \$327 million or 2%. Lower production volumes on Lear platforms negatively impacted net sales by \$922 million. This decrease was offset by new business, which increased net sales by \$544 million. Commercial recoveries were offset by the impact of selling price reductions and foreign exchange rate fluctuations.

Segment earnings, including restructuring costs, and the related margin on net sales were \$1.0 billion and 5.7% in 2024, as compared to \$1.1 billion and 6.1% in 2023. Lower production volumes on Lear platforms, net of new business, reduced segment earnings by \$114 million. The impact of favorable operating performance, including the benefit of operational restructuring actions, was partially offset by selling price reductions and foreign exchange rate fluctuations.

E-Systems ----

A summary of financial measures for our E-Systems segment is shown below (dollar amounts in millions):

For the year ended December 31,	2024		2023
Net sales	\$ 6,083.9	\$	5,918.1
Segment earnings ⁽¹⁾	247.4		228.9
Margin	4.1 %	Ď	3.9 %

⁽¹⁾ See definition above.

E-Systems net sales were \$6.1 billion for the year ended December 31, 2024, as compared to \$5.9 billion for the year ended December 31, 2023, an increase of \$166 million or 3%. New business favorably impacted net sales by \$336 million. This increase was offset by lower production volumes on Lear platforms, which decreased net sales by \$167 million. Commercial recoveries were offset by the impact of selling price reductions and foreign exchange rate fluctuations.

Segment earnings, including restructuring costs, and the related margin on net sales were \$247 million and 4.1% in 2024, as compared to \$229 million and 3.9% in 2023. New business, net of lower production volumes on Lear platforms, increased segment earnings by \$8 million. The impact of favorable operating performance, including the benefit of operational restructuring actions, was largely offset by selling price reductions and impairment charges related to Fisker.

Other —

A summary of financial measures for our other category, which is not an operating segment, is shown below (dollar amounts in millions):

For the year ended December 31,	2024	2023
Net sales	\$ — \$	_
Segment earnings ⁽¹⁾	(348.2)	(362.6)
Margin	N/A	N/A

⁽¹⁾ See definition above.

Segment earnings related to our other category were (\$348) million in 2024, as compared to (\$363) million in 2023, reflecting lower compensation-related expenses.

Year Ended December 31, 2023, Compared With Year Ended December 31, 2022

For a discussion of our results of operations for the year ended December 31, 2023, compared with the year ended December 31, 2022, refer to our Annual Report on Form 10-K for the year ended December 31, 2023.

Liquidity and Capital Resources

Our primary liquidity needs are to fund general business requirements, including working capital requirements, capital expenditures, operational restructuring actions and debt service requirements. Our principal sources of liquidity are cash flows from operating activities, borrowings under available credit facilities and our existing cash balance.

Cash Provided by Subsidiaries

A substantial portion of our operating income is generated by our subsidiaries. As a result, we are dependent on the earnings and cash flows of and the combination of dividends, royalties, intercompany loan repayments and other distributions and advances from our subsidiaries to provide the funds necessary to meet our obligations.

As of December 31, 2024 and 2023, cash and cash equivalents of \$705 million and \$803 million, respectively, were held in foreign subsidiaries and can be repatriated, primarily through the repayment of intercompany loans and the payment of dividends. There are no restrictions on the ability of our subsidiaries to pay dividends or make other distributions to Lear that would have a material impact on Lear.

For further information regarding potential dividends from our non-U.S. subsidiaries, see "— Adequacy of Liquidity Sources" below and Note 8, "Income Taxes," to the consolidated financial statements included in this Report.

Adequacy of Liquidity Sources

As of December 31, 2024, we had approximately \$1.1 billion of cash and cash equivalents on hand and \$2.0 billion in available borrowing capacity under our credit agreement. Together with cash provided by operating activities, we believe that this will enable us to meet our liquidity needs for the foreseeable future and to satisfy ordinary course business obligations. In addition, we expect to continue to pay quarterly cash dividends and repurchase shares of our common stock pursuant to our authorized common stock share repurchase program, although such actions are at the discretion of our Board and will depend upon our financial condition, results of operations, capital requirements, prevailing market conditions, alternative uses of capital and other factors that our Board may consider at its discretion.

Our future financial results and our ability to continue to meet our liquidity needs are subject to, and will be affected by, cash flows from operations, as well as restructuring activities, automotive industry conditions, the financial condition of our customers and suppliers, supply chain disruptions and other related factors. Additionally, an economic downturn or further reduction in production levels could negatively impact our financial condition.

For further discussion of the risks and uncertainties affecting our cash flows from operations and our overall liquidity, see Part I — Item 1A, "Risk Factors," and "— Executive Overview" above and "— Forward-Looking Statements" below.

Cash Flows

Year Ended December 31, 2024, Compared with Year Ended December 31, 2023

A summary of net cash provided by operating activities is shown below (in millions):

For the year ended December 31,		2024	2023	(D	Increase ecrease) in ash Flow
Consolidated net income and depreciation and amortization	\$	1,213	\$ 1,250	\$	(37)
Net change in working capital items:					
Accounts receivable		(73)	(148)		75
Inventories		77	(118)		195
Other current assets		11	(17)		28
Accounts payable		(49)	162		(211)
Accrued liabilities		(95)	165		(260)
Net change in working capital items		(129)	44		(173)
Other		36	(45)		81
Net cash provided by operating activities	\$	1,120	\$ 1,249	\$	(129)
Net cash used in investing activities	\$	(543)	\$ (762)	\$	219
Net cash used in financing activities	\$	(694)	\$ (420)	\$	(274)

Net cash provided by operating activities was \$1.1 billion in 2024, as compared to \$1.2 billion in 2023. The overall decrease in operating cash flow reflects incremental cash used related to accrued liabilities (reflecting higher cash restructuring costs and higher cash taxes) and accounts payable. These decreases were partially offset by improvements in inventories and accounts receivable.

Net cash used in investing activities was \$543 million in 2024, as compared to \$762 million in 2023. In 2023, we paid \$175 million for our IGB acquisition. In 2024, capital spending was \$559 million, as compared to \$627 million in 2023. Capital spending is estimated to be approximately \$625 million in 2025.

Net cash used in financing activities was \$694 million in 2024, as compared to \$420 million in 2023. In 2024, we made a principal payment under our Term Loan of \$50 million and paid \$417 million for repurchases of our common stock, \$174 million in dividends to Lear shareholders and \$75 million in dividends to noncontrolling interest holders. In 2023, we borrowed \$150 million under our Term Loan and paid \$297 million for repurchases of our common stock, \$182 million in dividends to Lear shareholders and \$79 million in dividends to noncontrolling interest holders.

For further information regarding our 2024 and 2023 financing transactions, see "— Capitalization" below and Note 6, "Debt," and Note 11, "Capital Stock, Accumulated Other Comprehensive Loss and Equity," to the consolidated financial statements included in this Report.

Year Ended December 31, 2023, Compared with Year Ended December 31, 2022

For a discussion of our cash flows for the year ended December 31, 2023, compared with the year ended December 31, 2022, refer to our Annual Report on Form 10-K for the year ended December 31, 2023.

Capitalization

Short-Term Borrowings

We utilize uncommitted lines of credit as needed for our short-term working capital fluctuations. As of December 31, 2024 and 2023, we had lines of credit from banks totaling \$343 million and \$338 million, respectively. As of December 31, 2024 and 2023, we had short-term debt balances outstanding related to draws on our lines of credit of \$27 million and \$28 million, respectively.

The availability of uncommitted lines of credit may be affected by our financial performance, credit ratings and other factors.

Senior Notes

As of December 31, 2024, our senior notes (collectively, the "Notes") consist of the amounts shown below (in millions, except stated coupon rates):

Note		ggregate rincipal nount at laturity	Stated Coupon Rate
Senior unsecured notes due 2027 (the "2027 Notes")	\$	550	3.80%
Senior unsecured notes due 2029 (the "2029 Notes")		375	4.25%
Senior unsecured notes due 2030 (the "2030 Notes")		350	3.50%
Senior unsecured notes due 2032 (the "2032 Notes")		350	2.60%
Senior unsecured notes due 2049 (the "2049 Notes")		625	5.25%
Senior unsecured notes due 2052 (the "2052 Notes")		350	3.55%
	\$	2,600	

The issue, maturity and interest payment dates of the Notes are shown below:

Note	Issuance Date	Maturity Date	Interest Payment Dates
2027 Notes	August 2017	September 15, 2027	March 15 and September 15
2029 Notes	May 2019	May 15, 2029	May 15 and November 15
2030 Notes	February 2020	May 30, 2030	May 30 and November 30
2032 Notes	November 2021	January 15, 2032	January 15 and July 15
2049 Notes	May 2019 and February 2020	May 15, 2049	May 15 and November 15
2052 Notes	November 2021	January 15, 2052	January 15 and July 15

The indentures governing the Notes contain certain restrictive covenants and customary events of default. As of December 31, 2024, we were in compliance with all covenants under the indentures governing the Notes.

For further information related to the Notes, including information on early redemption, covenants and events of default, see Note 6, "Debt," to the consolidated financial statements included in this Report and the indentures governing the Notes, which have been incorporated by reference as exhibits to this Report.

Credit Agreement

Our amended and restated unsecured credit agreement (the "Credit Agreement") consists of a \$2.0 billion revolving credit facility (the "Revolving Credit Facility") and matures on October 28, 2027.

In 2024 and 2023, there were no borrowings or repayments under the Revolving Credit Facility. As of December 31, 2024 and 2023, there were no borrowings outstanding under the Revolving Credit Facility.

The Credit Agreement contains various financial and other covenants, including a maximum leverage coverage ratio. As of December 31, 2024, we were in compliance with all covenants under the Credit Agreement.

For further information related to the Credit Agreement, including information on pricing, covenants and events of default, see Note 6, "Debt," to the consolidated financial statements included in this Report and the Credit Agreement, which has been incorporated by reference as an exhibit to this Report.

Term Loan

In 2023, we borrowed \$150 million under our Term Loan to finance, in part, the acquisition of IGB. In 2024, we made a principal payment under the Term Loan of \$50 million.

The Term Loan contains the same covenants as the Credit Agreement. As of December 31, 2024, we were in compliance with all covenants under the Term Loan.

For further information related to our acquisition of IGB, see Note 3, "Acquisition," to the consolidated financial statements included in this Report. For further information related to our Term Loan, see Note 6, "Debt," to the consolidated financial statements included in this Report.

Common Stock Share Repurchase Program

See Item 5, "Market for the Company's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities."

Dividends

In 2024, 2023 and 2022, our Board declared a quarterly cash dividend of \$0.77 per share of common stock in all quarters.

We expect to continue to pay quarterly cash dividends in the future, although such payments are at the discretion of our Board and will depend upon our financial condition, results of operations, capital requirements, prevailing market conditions, alternative uses of capital and other factors that our Board may consider at its discretion. See "— Forward-Looking Statements" below and Note 6, "Debt," to the consolidated financial statements included in this Report.

Commodity Prices

Raw material, energy and commodity costs can be volatile, reflecting, among other things, changes in supply and demand, logistics issues, global trade and tariff policies (including recent U.S. tariffs imposed or threatened to be imposed on Mexico, Canada and China, as well as other countries and any retaliatory actions taken by such countries), and geopolitical issues. We have commodity price risk with respect to purchases of certain raw materials, including steel, copper, diesel fuel, chemicals, resins and leather. Our primary commodity cost exposures relate to steel, copper and leather. We have developed and implemented strategies to mitigate the impact of increases in such costs through the selective in-sourcing of components, the continued consolidation of our supply base, longer-term purchase commitments, commercial recovery mechanisms and the selective expansion of low-cost country sourcing and engineering, as well as value engineering and product benchmarking. Further, the majority of the steel used in our products is comprised of fabricated components that are integrated into a seat system, such as seat frames, recliner mechanisms, seat tracks and other mechanical components. Therefore, our exposure to changes in steel prices is primarily indirect, through purchased components. Additionally, approximately 89% of our copper purchases and a significant portion of our leather and direct steel purchases are subject to price index agreements with our customers and suppliers. Certain of these strategies also may limit our opportunities in a declining commodity price environment. In the current environment of elevated raw material, energy and commodity costs, these strategies, together with commercial negotiations with our customers and suppliers, have offset a significant portion of the adverse impact. If these costs increase, it could have an adverse impact on our operating results in the foreseeable future.

See Part I — Item 1A, "Risk Factors — Increases in the costs and restrictions on the availability of raw materials, energy, commodities, product components and labor could adversely affect our financial performance," and "— Forward-Looking Statements" below.

For further information related to the financial instruments described above, see Note 15, "Financial Instruments," to the consolidated financial statements included in this Report.

Contractual Obligations and Cash Requirements

Our material cash requirements include the following contractual and other obligations:

Debt obligations and interest expense associated with debt obligations

As of December 31, 2024, we had \$2.6 billion of outstanding senior unsecured notes maturing in 2027 through 2052 and \$100 million outstanding under our Term Loan maturing in 2026, as well as \$2.0 billion in available borrowing capacity under our Revolving Credit Facility maturing in 2027.

Interest on the Notes is due biannually at varying dates. The scheduled interest payments on the Notes are shown below (in millions):

	2025	2026	2027	2028	2029	Т	hereafter	Total
Scheduled interest payments	\$ 103	\$ 103	\$ 103	\$ 83	\$ 75	\$	949	\$ 1,416

For further information related to our debt, see "— Capitalization — Senior Notes," "— Credit Agreement" and "— Term Loan" above and Note 6, "Debt," to the consolidated financial statements included in this Report.

Purchase obligations

We enter into agreements with our customers to produce products at the beginning of a vehicle's life cycle. Although these agreements do not provide for a specified quantity of products, once entered into, we are generally required to fulfill our customers' purchasing requirements for the production life of the vehicle. Prior to being formally awarded a program, we typically work closely with our customers in the early stages of the design and engineering of a vehicle's systems. Failure to complete the design and engineering work related to a vehicle's systems, or to fulfill a customer agreement, could have a material adverse impact on our business.

We also enter into agreements with suppliers to assist us in meeting our customers' production needs. These agreements vary as to duration and quantity commitments. Historically, most have been short-term agreements, which do not provide for minimum purchases, or are requirements-based agreements.

Leases

The Company has operating leases for production, office and warehouse facilities, manufacturing and office equipment, and vehicles with future lease obligations ranging from 2025 through 2047. Maturities of undiscounted operating lease obligations are shown below (in millions):

	2025	2026	2027	2028	2029		Tł	nereafter	Total		
Operating lease obligations	\$ 180	\$ 157	\$ 130	\$ 105	\$	77	\$	188	\$	837	

For further information related to our lease obligations, see Note 7, "Leases," to the consolidated financial statements included in this Report.

<u>Taxes</u>

We may be required to make significant cash outlays related to our unrecognized tax benefits, including interest and penalties. As of December 31, 2024, we had unrecognized tax benefits, including interest and penalties, of \$45 million. However, due to the uncertainty of the timing of future cash flows associated with our unrecognized tax benefits, we are unable to make reasonably reliable estimates of the period of cash settlement, if any, with the respective taxing authorities.

For further information related to our unrecognized tax benefits, see Note 8, "Income Taxes," to the consolidated financial statements included in this Report.

Pension and postretirement obligations

We have minimum funding requirements with respect to certain of our pension benefit obligations. We may elect to make contributions in excess of the minimum funding requirements in response to investment performance or changes in interest rates or when we believe that it is financially advantageous to do so and based on our other cash requirements. Our minimum funding requirements after 2025 will depend on several factors, including investment performance and interest rates. Our minimum funding requirements may also be affected by changes in applicable legal requirements. Required contributions to our defined benefit pension plans are expected to be approximately \$4 million in 2025.

We do not fund our postretirement benefit obligations and certain of our pension benefit obligations. Rather, benefit payments are made to eligible participants as incurred. We expect benefit payments related to our unfunded pension and postretirement benefit obligations to be approximately \$7 million and \$4 million, respectively, in 2025.

For further information related to our pension and other postretirement benefit plans, see Note 9, "Pension and Other Postretirement Benefit Plans," to the consolidated financial statements included in this Report.

Other Matters

Legal and Environmental Matters

We are involved from time to time in various legal proceedings and claims, including, without limitation, commercial and contractual disputes, product liability claims, and environmental and other matters. As of December 31, 2024, we had recorded reserves for pending legal disputes, including commercial and contractual disputes, product liability claims and other legal matters, of \$13 million. In addition, as of December 31, 2024, we had recorded reserves for warranty and recall matters of \$27 million and environmental matters of \$5 million. We carry insurance for certain legal matters, including product liability claims, but such coverage may be limited. We do not maintain insurance for warranty and recall matters. Although these reserves were determined in accordance with GAAP, the ultimate outcomes of these matters are inherently uncertain, and actual results may differ significantly from current estimates. For a description of risks related to various legal proceedings and claims,

see Part I — Item 1A, "Risk Factors." For a more complete description of our outstanding material legal proceedings, see Note 13, "Legal and Other Contingencies," to the consolidated financial statements included in this Report.

Critical Accounting Estimates

Certain of our accounting policies require management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions are based on our historical experience, the terms of existing contracts, our evaluation of trends in the industry, information provided by our customers and suppliers and information available from other outside sources, as appropriate. However, these estimates and assumptions are subject to an inherent degree of uncertainty. Accordingly, actual results in these areas may differ significantly from our estimates.

We consider an accounting estimate to be critical if it requires us to make assumptions about matters that were uncertain at the time the estimate was made and changes in the estimate would have had a significant impact on our consolidated financial position or results of operations.

Revenue Recognition

We enter into contracts with our customers to provide production parts generally at the beginning of a vehicle's life cycle. Typically, these contracts do not provide for a specified quantity of products, but once entered into, we are often expected to fulfill our customers' purchasing requirements for the production life of the vehicle. Many of these contracts may be terminated by our customers at any time. Historically, terminations of these contracts have been infrequent. We receive purchase orders from our customers, which provide the commercial terms for a particular production part, including price (but not quantities). Contracts may also provide for annual price reductions over the production life of the vehicle, and prices may be adjusted on an ongoing basis to reflect changes in product content/cost and other commercial factors.

Revenue is recognized at a point in time when control of the product is transferred to the customer under standard commercial terms, as we do not have an enforceable right to payment prior to such transfer. The amount of revenue recognized reflects the consideration that we expect to be entitled to in exchange for those products based on the current purchase orders, annual price reductions and ongoing price adjustments. Our customers pay for products received in accordance with payment terms that are customary within the industry. Our contracts with our customers do not have significant financing components. We record a contract liability for advances received from our customers.

Amounts billed to customers related to shipping and handling costs are included in net sales in the consolidated statements of income. Shipping and handling costs are accounted for as fulfillment costs and are included in cost of sales in the consolidated statements of income.

Taxes assessed by a governmental authority that are both imposed on and concurrent with a specific revenue-producing transaction that we collect from a customer are excluded from revenue.

Impairment of Goodwill

Goodwill is not amortized but is tested for impairment on at least an annual basis. Impairment testing is required more often than annually if an event or circumstance indicates that an impairment is more likely than not to have occurred. In conducting our annual impairment testing, we may first perform a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount. If not, no further goodwill impairment testing is required. If it is more likely than not that a reporting unit's fair value is less than its carrying amount, or if we elect not to perform a qualitative assessment of a reporting unit, we then compare the fair value of the reporting unit to the related net book value. If the net book value of a reporting unit exceeds its fair value, an impairment loss is measured and recognized.

We utilize an income approach to estimate the fair value of each of our reporting units and a market valuation approach to further support this analysis. The income approach is based on projected debt-free cash flow which is discounted to the present value using discount factors that consider the timing and risk of cash flows. We believe that this approach is appropriate because it provides a fair value estimate based upon the reporting unit's expected long-term operating cash flow performance. This approach also mitigates the impact of cyclical trends that occur in the industry. Fair value is estimated using recent automotive industry and specific platform production volume projections, which are based on both third-party and internally developed forecasts, as well as commercial and discount rate assumptions. The discount rate used is the value-weighted average of our estimated cost of equity and of debt ("cost of capital") derived using both known and estimated customary market metrics. Our weighted average cost of capital is adjusted by reporting unit to reflect a risk factor, if necessary. Other significant assumptions include terminal value growth rates, terminal value margin rates, future capital expenditures and changes in future working capital requirements. While there are inherent uncertainties related to the assumptions used and to management's application of these assumptions to this analysis, we believe that the income approach provides a reasonable estimate of the fair

value of our reporting units. The market valuation approach is used to further support our analysis and is based on recent transactions involving comparable companies.

The annual goodwill impairment assessment is completed as of the first day of our fourth quarter. We performed a qualitative assessment for each reporting unit, except for one within the E-Systems operating segment and two within the Seating operating segment where quantitative analyses were performed. The qualitative assessments indicated that it was more likely than not that the fair value of each reporting unit exceeded its respective carrying value. The quantitative analyses indicated that the fair value of the respective reporting units exceeded its respective carrying value.

Income Taxes

We account for income taxes in accordance with GAAP. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between financial statement carrying amounts of existing assets and liabilities and their respective tax bases and tax loss and credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income for the years in which those temporary differences are expected to be recovered or settled.

Our current and future provision for income taxes is impacted by the initial recognition of and changes in valuation allowances in certain countries. We intend to maintain these allowances until it is more likely than not that the deferred tax assets will be realized. Our future provision for income taxes will include no tax benefit with respect to losses incurred and, except for certain jurisdictions, no tax expense with respect to income generated in these countries until the respective valuation allowances are eliminated. Accordingly, income taxes are impacted by changes in valuation allowances and the mix of earnings among jurisdictions. We evaluate the realizability of our deferred tax assets on a quarterly basis. In completing this evaluation, we consider all available evidence in order to determine whether, based on the weight of the evidence, a valuation allowance for our deferred tax assets is necessary. Such evidence includes historical results, future reversals of existing taxable temporary differences and expectations for future taxable income (exclusive of the reversal of temporary differences and carryforwards), as well as the implementation of feasible and prudent tax planning strategies. If, based on the weight of the evidence, it is more likely than not that all or a portion of our deferred tax assets will not be realized, a valuation allowance is recorded.

As of December 31, 2024, we had a valuation allowance related to tax loss and credit carryforwards and other deferred tax assets of \$32 million in the United States and \$367 million in several international jurisdictions. If operating results improve or decline on a continual basis in a particular jurisdiction, our decision regarding the need for a valuation allowance could change, resulting in either the initial recognition or reversal of a valuation allowance in that jurisdiction, which could have a significant impact on income tax expense in the period recognized and subsequent periods. In determining the provision for income taxes for financial statement purposes, we make certain estimates and judgments, which affect our evaluation of the carrying value of our deferred tax assets, as well as our calculation of certain tax liabilities.

The calculation of our gross unrecognized tax benefits and liabilities includes uncertainties in the application of, and changes in, complex tax regulations in a multitude of jurisdictions across our global operations. We recognize tax benefits and liabilities based on our estimate of whether, and the extent to which, additional taxes will be due. We adjust these benefits and liabilities based on changing facts and circumstances; however, due to the complexity of these uncertainties and the impact of tax audits, the ultimate resolutions may differ significantly from our estimates.

For further information, see "- Forward-Looking Statements" below and Note 8, "Income Taxes," to the consolidated financial statements included in this Report.

Use of Estimates

The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. During 2024, there were no material changes in the methods or policies used to establish estimates and assumptions. Other matters subject to estimation and judgment include amounts related to accounts receivable realization, inventory obsolescence, asset impairments, useful lives of fixed and intangible assets, unsettled pricing discussions with customers and suppliers, restructuring accruals, deferred tax asset valuation allowances and income taxes, pension and other postretirement benefit plan assumptions, accruals related to litigation, and warranty and environmental remediation costs. Actual results may differ significantly from our estimates.

Recently Issued Accounting Pronouncements

For information on the impact of recently issued accounting pronouncements, see Note 16, "Accounting Pronouncements," to the consolidated financial statements included in this Report.

Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements made by us or on our behalf. The words "will," "may," "designed to," "outlook," "believes," "should," "anticipates," "plans," "expects," "intends," "estimates," "forecasts" and similar expressions identify certain of these forward-looking statements. We also may provide forward-looking statements in oral statements or other written materials released to the public. All such forward-looking statements or developments that we expect or anticipate may occur in the future, including, without limitation, statements related to business opportunities, awarded sales contracts, sales backlog and ongoing commercial arrangements, or statements expressing views about future operating results, are forward-looking statements. Actual results may differ materially from any or all forward-looking statements made by us. Important factors, risks and uncertainties that may cause actual results to differ materially from anticipated results include, but are not limited to:

- general economic conditions in the markets in which we operate, including changes in interest rates or currency exchange rates;
- changes in actual industry vehicle production levels from our current estimates;
- fluctuations in the production of vehicles or the loss of business with respect to, or the lack of commercial success of, a vehicle model for which we are a significant supplier;
- the outcome of customer negotiations and the impact of customer-imposed price reductions;
- increases in the costs and restrictions on the availability of raw materials, energy, commodities, product components and labor and our ability to mitigate such costs and insufficient availability;
- disruptions in relationships with our suppliers;
- the financial condition of and adverse developments affecting our customers and suppliers;
- risks associated with conducting business in foreign countries, including the risk of war or other geopolitical conflicts;
- · currency controls and the ability to economically hedge currencies;
- global sovereign fiscal matters and creditworthiness, including potential defaults and the related impacts on economic activity, including the possible effects on credit markets, currency values, monetary unions, international treaties and fiscal policies;
- competitive conditions impacting us and our key customers and suppliers;
- labor disputes, including disruptions, involving us or our significant customers or suppliers or that otherwise affect us;
- the consequences of violations of law by our employees, agents or business partners, including violations related to antibribery, competition, export and import, trade sanctions, data privacy, environmental, human rights and other laws;
- the operational and financial success of our joint ventures;

The forward-looking statements in this Report are made as of the date hereof, and we do not assume any obligation to update, amend or clarify them to reflect events, new information or circumstances occurring after the date hereof.

ITEM 7A — QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk Sensitivity

In the normal course of business, we are exposed to market risks associated with fluctuations in foreign exchange rates, interest rates and commodity prices. We manage a portion of these risks through the use of derivative financial instruments in accordance with our policies. We enter into all hedging transactions for periods consistent with the underlying exposures. We do not enter into derivative instruments for trading purposes.

Foreign Exchange

Operating results may be impacted by our buying, selling and financing in currencies other than the functional currency of our operating companies ("transactional exposure"). We may mitigate a portion of this risk by entering into forward foreign exchange, futures and option contracts. The foreign exchange contracts are executed with banks that we believe are creditworthy. Gains and losses related to foreign exchange contracts are deferred where appropriate and included in the measurement of the foreign currency transaction subject to the hedge. Gains and losses incurred related to foreign exchange contracts are generally offset by the direct effects of currency movements on the underlying transactions.

A summary of the notional amount and estimated aggregate fair value of our outstanding foreign exchange contracts is shown below (in millions):

December 31,	2024	2023
Notional amount (contract maturities < 36 months)	\$ 3,087	\$ 2,922
Fair value	(154)	159

Currently, our most significant foreign currency transactional exposures relate to the Mexican peso, various European currencies, the Honduran lempira, the Chinese renminbi, the Japanese yen and the Philippine peso. A sensitivity analysis of our net transactional exposure is shown below (in millions):

December 31,	Hypothetical Strengthening $\%$ ⁽¹⁾		2024 202				
U.S. dollar	10%	\$	1	19	\$		15
Euro	10%		3	38			34

⁽¹⁾Relative to all other currencies to which it is exposed for a twelve-month period.

A sensitivity analysis related to the aggregate fair value of our outstanding foreign exchange contracts is shown below (in millions):

		Esti	Estimated Change in Fair Value					
December 31,	Hypothetical Change $\%$ ⁽²⁾	2	2024		2023			
U.S. dollar	10%	\$	187	\$	156			
Euro	10%		68		98			

⁽²⁾ Relative to all other currencies to which it is exposed.

There are certain shortcomings inherent in the sensitivity analyses above. The analyses assume that all currencies would uniformly strengthen or weaken relative to the U.S. dollar or Euro. In reality, some currencies may strengthen while others may weaken, causing the earnings impact to increase or decrease depending on the currency and the direction of the rate movement.

In addition to the transactional exposure described above, our operating results are impacted by the translation of our foreign operating income into U.S. dollars ("translational exposure"). In 2024, net sales outside of the United States accounted for 78% of our consolidated net sales, although certain non-U.S. sales are U.S. dollar denominated. We do not enter into foreign exchange contracts to mitigate our translational exposure.

Interest Rates

Our variable rate obligations are sensitive to changes in interest rates. As of December 31, 2024, we had \$100 million outstanding under our Term Loan. Advances under the Term Loan generally bear interest based on the Daily or Term SOFR (as defined in the Term Loan agreement) plus a margin, determined in accordance with a pricing grid, that ranges from 1.00% to 1.525%. As of December 31, 2024, the interest rate was 5.835%.

A hypothetical 100 basis point increase in the interest rate on our Term Loan would increase annual interest expense and related cash interest payments by approximately \$1 million.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Lear Corporation

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Lear Corporation and subsidiaries (the Company) as of December 31, 2024 and 2023, the related consolidated statements of income, comprehensive income, equity and cash flows for each of the three years in the period ended December 31, 2024, and the related notes and financial statement schedule listed in the Index at Item 15(a) (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated February 14, 2025 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the account or disclosure to which it relates.

Revenue recognition

Description of the As discussed in Note 2, Summary of Significant Accounting Policies, the Company's sales contracts with *Matter* also be adjusted on an ongoing basis to reflect changes in product content, product cost and other commercial factors. Some of these price adjustments are non-routine in nature. The amount of revenue recognized by the Company reflects the consideration that the Company expects to be entitled to in exchange for its products based on the current purchase orders, annual price reductions and ongoing price adjustments.

Auditing the consideration that the Company expects to be entitled to in exchange for certain of its products which are subject to non-routine price adjustments is highly judgmental as it relates to evaluating the sufficiency of evidence available from commercial negotiations to support the ultimate consideration that the Company is entitled to in exchange for those products.

How We Addressed the Matter in Our Audit We obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the identification and evaluation of product sales with non-routine price adjustments, including management's review of the evidence to support the Company's measurement of revenue related to those product sales.

Our audit procedures included, among others, inspecting communications between the Company and its customers related to the pricing arrangements, auditing adjustments related to those product sales, performing retrospective reviews of management's estimates to identify contrary evidence, if any, and performing inquiries of and obtaining written representations from executives, within the Company, responsible for the respective customer relationships.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 2002.

Detroit, Michigan February 14, 2025

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Lear Corporation

Opinion on Internal Control Over Financial Reporting

We have audited Lear Corporation and subsidiaries' internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Lear Corporation and subsidiaries (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the 2024 consolidated financial statements of the Company and our report dated February 14, 2025 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

(1) Basis of Presentation

Lear Corporation ("Lear," and together with its consolidated subsidiaries, the "Company") and its affiliates design and manufacture automotive seating and electrical distribution systems and related components. The Company's main customers are automotive original equipment manufacturers. The Company operates facilities worldwide.

The accompanying consolidated financial statements include the accounts of Lear, a Delaware corporation, and the wholly owned and less than wholly owned subsidiaries controlled by Lear.

(2) Summary of Significant Accounting Policies

Consolidation

Lear consolidates all entities, including variable interest entities, in which it has a controlling financial interest. Investments in affiliates in which Lear does not have control, but does have the ability to exercise significant influence over operating and financial policies, are accounted for under the equity method (Note 5, "Investments in Affiliates and Other Related Party Transactions").

Fiscal Period Reporting

The Company's annual financial results are reported on a calendar year basis, and quarterly interim results are reported using a thirteen week reporting calendar.

Cash, Cash Equivalents and Restricted Cash

Cash and cash equivalents include all highly liquid investments with original maturities of ninety days or less. Restricted cash includes cash that is legally restricted as to use or withdrawal.

Accounts Receivable

The Company records accounts receivable as title is transferred to its customers. The Company's customers are the world's major automotive manufacturers. Generally, the Company does not require collateral for its accounts receivable.

The Company's allowance for credit losses on financial assets measured at amortized cost, primarily accounts receivable, reflects management's estimate of credit losses over the remaining expected life of such assets, measured primarily using historical experience, as well as current conditions and forecasts that affect the collectability of the reported amount. Expected credit losses for newly recognized financial assets, as well as changes to expected credit losses during the period, are recognized in earnings. The Company also considers geographic and segment specific risk factors in the development of expected credit losses. As of December 31, 2024 and 2023, accounts receivable are reflected net of reserves of \$27.3 million and \$35.6 million, respectively. Changes in expected credit losses were not significant during the year ended December 31, 2024.

The Company receives bank notes from its customers, which are classified as other current assets in the consolidated balance sheets, for certain amounts of accounts receivable, primarily in Asia. The Company may hold such bank notes until maturity, exchange them with suppliers to settle liabilities or sell them to third-party financial institutions in exchange for cash.

Inventories

Inventories are stated at the lower of cost or net realizable value. Cost is determined using standard costing, which approximates actual cost on a first-in, first-out method. Finished goods and work-in-process inventories include material, labor and manufacturing overhead costs. The Company records reserves for inventory in excess of production and/or forecasted requirements and for obsolete inventory in production and service inventories.

A summary of inventories is shown below (in millions):

December 31,	2024	2023
Raw materials	\$ 1,206.7	\$ 1,260.7
Work-in-process	124.3	141.0
Finished goods	477.0	540.8
Reserves	(206.9)	(184.5
Inventories	\$ 1,601.1	\$ 1,758.0

Engineering and Development ("E&D") and Tooling Costs

In 2024, the Company incurred E&D costs of \$634.8 million, including \$413.9 million (or 2% of related sales) in its Seating segment, \$215.7 million (or 4% of related sales) in its E-Systems segment and \$5.2 million at its headquarters location.

Pre-Production Costs Related to Long-Term Supply Agreements

The Company incurs pre-production E&D and tooling costs related to the products produced for its customers under long-term supply agreements. The Company expenses all pre-production E&D costs for which reimbursement is not contractually guaranteed by the customer. In addition, the Company expenses all pre-production tooling costs related to customer-owned tools for which reimbursement is not contractually guaranteed by the customer or for which the Company does not have a non-cancelable right to use the tooling.

During 2024 and 2023, the Company capitalized \$298.0 million and \$291.8 million, respectively, of pre-production E&D costs for which reimbursement is contractually guaranteed by the customer. During 2024 and 2023, the Company also capitalized \$173.4 million and \$162.8 million, respectively, of pre-production tooling costs related to customer-owned tools for which reimbursement is contractually guaranteed by the customer or for which the Company has a non-cancelable right to use the tooling. These amounts are included in other current and long-term assets in the accompanying consolidated balance sheets as of December 31, 2024 and 2023. During 2024 and 2023, the Company collected \$450.4 million and \$417.0 million, respectively, of cash related to E&D and tooling costs.

The classification of recoverable customer E&D and tooling costs related to long-term supply agreements is shown below (in millions):

December 31,	2024	2023
Current	\$ 248.3	\$ 220.2
Long-term	141.6	164.3
Recoverable customer E&D and tooling	\$ 389.9	\$ 384.5

Other E&D Costs

Costs incurred in connection with product launches, to the extent not recoverable from the Company's customers, are recorded in cost of sales as incurred and totaled \$153.3 million, \$138.8 million and \$145.2 million for the years ended December 31, 2024, 2023 and 2022, respectively.

All other E&D costs are recorded in selling, general and administrative expenses as incurred and totaled \$183.5 million, \$180.8 million and \$173.6 million for the years ended December 31, 2024, 2023 and 2022, respectively.

Property, Plant and Equipment

Property, plant and equipment is stated at cost. Costs associated with the repair and maintenance of the Company's property, plant and equipment are expensed as incurred. Costs associated with improvements which extend the life, increase the capacity or improve the efficiency or safety of the Company's property, plant and equipment are capitalized and depreciated over the remaining useful life of the related asset. Depreciable property is depreciated over the estimated useful lives of the assets, using principally the straight-line method as follows:

Buildings and improvements	10 to 40 years
Machinery and equipment	5 to 15 years

A summary of property, plant and equipment is shown below (in millions):

December 31,	2024	2023
Land	\$ 98.6	\$ 105.6
Buildings and improvements	898.3	919.4
Machinery and equipment	5,485.2	5,324.4
Construction in progress	335.8	408.7
Total property, plant and equipment	6,817.9	6,758.1
Less – accumulated depreciation	(3,984.5)	(3,780.7)
Net property, plant and equipment	\$ 2,833.4	\$ 2,977.4

For the years ended December 31, 2024, 2023 and 2022, depreciation expense was \$571.6 million, \$541.9 million and \$505.7 million, respectively. As of December 31, 2024, 2023 and 2022, capital expenditures recorded in accounts payable totaled \$158.4 million, \$133.1 million and \$150.2 million, respectively.

Assets Held for Sale

As of December 31, 2024 and 2023, the Company has assets classified as held for sale of \$47.4 million and \$4.6 million, respectively. The criteria for classification as held for sale have been met, as management is committed to a plan to sell the assets, the assets are available for immediate sale in their present condition, an active program to locate a buyer has been initiated, the sale is probable and expected to be completed within one year, and the assets are being marketed at a price that is reasonable in relation to their current fair value.

As of December 31, 2024, \$42.0 million of the assets held for sale relate to the pending disposal of a non-core business in the Company's Seating segment. The assets held for sale were measured at the lower of their carrying amount or fair value less costs to sell. The carrying value of the net asset disposal group was \$66.4 million. A loss of \$24.4 million was recognized as the carrying value exceeded the fair value less costs to sell. The loss is included in other expense, net in the accompanying consolidated statement of income for the year ended December 31, 2024.

The remaining assets held for sale as of December 31, 2024 and 2023, are primarily buildings and improvements.

The classification of assets held for sale is shown below (in millions):

December 31,	2024	2023	
Other current assets	59.3	\$	4.6
Accrued liabilities	11.9		—
Net assets held for sale	\$ 47.4	\$	4.6

Assets held for sale by segment is shown below (in millions):

December 31,	2024	2023
Seating	\$ 45.3	\$ 1.1
E-Systems	2.1	3.5
Net assets held for sale	\$ 47.4	\$ 4.6

Impairment of Goodwill

Goodwill is not amortized but is tested for impairment on at least an annual basis. Impairment testing is required more often than annually if an event or circumstance indicates that an impairment is more likely than not to have occurred. In conducting its annual impairment testing, the Company may first perform a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount. If not, no further goodwill impairment testing is required. If it is more likely than not that a reporting unit's fair value is less than its carrying amount, or if the Company elects not to perform a qualitative assessment of a reporting unit, the Company then compares the fair value of the reporting unit to the related net book value. If the net book value of a reporting unit exceeds its fair value, an impairment loss is measured and recognized.

The Company utilizes an income approach to estimate the fair value of each of its reporting units and a market valuation approach to further support this analysis. The income approach is based on projected debt-free cash flow which is discounted to the present value using discount factors that consider the timing and risk of cash flows. The Company believes that this

approach is appropriate because it provides a fair value estimate based upon the reporting unit's expected long-term operating cash flow performance. This approach also mitigates the impact of cyclical trends that occur in the industry. Fair value is estimated using recent automotive industry and specific platform production volume projections, which are based on both third-party and internally developed forecasts, as well as commercial and discount rate assumptions. The discount rate used is the value-weighted average of the Company's estimated cost of equity and of debt ("cost of capital") derived using both known and estimated customary market metrics. The Company's weighted average cost of capital is adjusted by reporting unit to reflect a risk factor, if necessary. Other significant assumptions include terminal value growth rates, terminal value margin rates, future capital expenditures and changes in future working capital requirements. While there are inherent uncertainties related to the assumptions used and to management's application of these assumptions to this analysis, the Company believes that the income approach provides a reasonable estimate of the fair value of its reporting units. The market valuation approach is used to further support the Company's analysis and is based on recent transactions involving comparable companies.

The annual goodwill impairment assessment is completed as of the first day of the Company's fourth quarter. The Company performed a qualitative assessment for each reporting unit, except for one within the E-Systems operating segment and two within the Seating operating segment where quantitative analyses were performed. The qualitative assessments indicated that it was more likely than not that the fair value of each reporting unit exceeded its respective carrying value. The goodwill of the E-Systems reporting unit and Seating reporting units where quantitative analyses were performed account for 16.8% and 11.7%, respectively, of the Company's total goodwill. The quantitative analyses indicated that the fair value of each of the three reporting units exceeded its respective carrying value.

A summary of the changes in the carrying amount of goodwill for each of the periods in the two years ended December 31, 2024, is shown below (in millions):

	 Seating	E-Systems	Total
Balance as of December 31, 2022	\$ 1,261.1	\$ 399.5 \$	1,660.6
Acquisition	73.5		73.5
Foreign currency translation and other	6.9	(3.1)	3.8
Balance as of December 31, 2023	 1,341.5	396.4	1,737.9
Acquisition	3.3	—	3.3
Pending disposal of a non-core business (classified as held for sale)	(11.7)		(11.7)
Foreign currency translation and other	(27.2)	(3.1)	(30.3)
Balance as of December 31, 2024	\$ 1,305.9	\$ 393.3 \$	1,699.2

Intangible Assets

As of December 31, 2024, intangible assets consist primarily of certain intangible assets recorded in connection with the Company's acquisitions, including I.G. Bauerhin ("IGB") in 2023 (Note 3, "Acquisition"). These intangible assets were recorded at their estimated fair value, based on independent appraisals, as of the transaction or acquisition date. The value assigned to technology intangibles is based on the royalty savings method, which applies a hypothetical royalty rate to projected revenues attributable to the identified technologies. Royalty rates were determined based primarily on analysis of market information. The customer-based intangible asset includes the acquired entity's established relationships with its customer-based intangibles is based on the present value of future earnings attributable to the asset group after recognition of required returns to other contributory assets.

A summary of intangible assets as of December 31, 2024, is shown below (in millions):

	Gros	ss Carrying Value	Accumulated Amortization		Net Carrying Value	Weighted Average Useful Life (years)
Amortized intangible assets:						
Customer-based	\$	199.5	\$	(104.1)	\$ 95.4	14
Technology		25.7		(6.2)	19.5	11
Other		0.4		(0.3)	0.1	5
Balance as of December 31, 2024	\$	225.6	\$	(110.6)	\$ 115.0	13

A summary of intangible assets as of December 31, 2023, is shown below (in millions):

	Gro	ss Carrying Value	Accumulated Amortization	Net Carrying Value	Weighted Average Useful Life (years)
Amortized intangible assets:					
Customer-based	\$	518.2	\$ (354.9)	\$ 163.3	12
Licensing agreements		71.0	(66.3)	4.7	5
Technology		24.6	(3.7)	20.9	12
Other		0.4	(0.2)	0.2	5
Balance as of December 31, 2023	\$	614.2	\$ (425.1)	\$ 189.1	11

In 2024 and 2023, intangible assets with a gross carrying value of \$325.6 million and \$1.3 million, respectively, became fully amortized and are no longer included in the gross carrying value or accumulated amortization. Also in 2024, intangible assets with a net carrying value of \$21.0 million are classified as held for sale in connection with a pending disposal of a non-core business.

Excluding the impact of any future acquisitions, the Company's estimated annual amortization expense for the five succeeding years is shown below (in millions):

Year	Expense	
2025	\$	18.0
2026	1	17.3
2027	1	16.9
2028]	16.1
2029]	14.9

Impairment of Long-Lived Assets

The Company monitors its long-lived assets for impairment indicators on an ongoing basis in accordance with accounting principles generally accepted in the United States ("GAAP"). If impairment indicators exist, the Company performs the required impairment analysis by comparing the undiscounted cash flows expected to be generated from the long-lived assets to the related net book values. If the net book value exceeds the undiscounted cash flows, an impairment loss is measured and recognized. An impairment loss is measured as the difference between the net book value and the fair value of the long-lived assets. Fair value estimates of long-lived assets are based on independent appraisals or discounted cash flows, giving consideration to the highest and best use of the assets. Key assumptions used in the appraisals are based on a combination of market and cost approaches, as appropriate.

For the years ended December 31, 2024, 2023 and 2022, the Company recognized fixed asset impairment charges of \$2.9 million, \$5.1 million and \$9.9 million, respectively, in conjunction with its restructuring actions (Note 4, "Restructuring"). For the years ended December 31, 2024, 2023 and 2022, the Company recognized additional fixed asset impairment charges of \$4.4 million, \$6.3 million and \$5.7 million, respectively. For the year ended December 31, 2022, additional asset impairment charges include \$4.4 million related to the Company's Russian operations. Asset impairment charges are recorded in cost of sales in the accompanying consolidated statements of income for the years ended December 31, 2024, 2023 and 2022.

In 2023 and 2022, the Company recognized impairment charges of \$1.9 million and \$8.9 million, respectively, related to certain definite-lived and indefinite-lived intangible assets of its E-Systems segment resulting from a change in the intended use of such assets. The impairment charges are included in amortization of intangible assets in the accompanying consolidated statements of income for the years ended December 31, 2023 and 2022.

For information related to impairments of right-of-use assets, see Note 7, "Leases."

Impairment of Investments in Affiliates

The Company monitors its investments in affiliates for indicators of other-than-temporary declines in value on an ongoing basis in accordance with GAAP. If the Company determines that an other-than-temporary decline in value has occurred, it recognizes an impairment loss, which is measured as the difference between the recorded book value and the fair value of the investment. Fair value is generally determined using an income approach based on discounted cash flows or negotiated transaction values. For the year ended December 31, 2023, the Company recognized impairment charges of \$7.0 million related to its investments

in affiliates. The impairment charges are included in other expense, net in the accompanying consolidated statement of income for the year ended December 31, 2023. There were no impairment charges recognized related to the Company's investments in affiliates for the years ended December 31, 2024 and 2022.

Accrued Liabilities

A summary of accrued liabilities as of December 31, 2024 and 2023, is shown below (in millions):

December 31,	2024	2023
Compensation and employee benefits	\$ 429.5	\$ 514.8
Income and other taxes payable	354.6	384.7
Current portion of lease obligations	152.6	151.9
Current portion of restructuring accrual	81.1	104.7
Other	1,149.8	1,049.1
Accrued liabilities	\$ 2,167.6	\$ 2,205.2

Leases

The Company determines if an arrangement contains a lease at inception. For all asset classes, the Company utilizes the shortterm lease exemption as provided under GAAP. A short-term lease is a lease that, at the commencement date, has a term of twelve months or less and does not include an option to purchase the underlying asset. For all asset classes, the Company accounts for each lease component of a contract and its associated non-lease components as a single lease component, rather than allocating a standalone value to each component of a lease.

For purposes of calculating operating lease obligations under the standard, the Company's lease terms may include options to extend or terminate the lease when it is reasonably certain that the Company will exercise such option. The Company's leases do not contain material residual value guarantees or material restrictive covenants.

Operating lease expense is recognized on a straight-line basis over the lease terms.

The discount rate used to measure a lease obligation should be the rate implicit in the lease; however, the Company's operating leases generally do not provide an implicit rate. Accordingly, the Company uses its incremental borrowing rate at lease commencement to determine the present value of lease payments. The incremental borrowing rate is an entity-specific rate which represents the rate of interest a lessee would pay to borrow on a collateralized basis over a similar term with similar payments.

Revenue Recognition

The Company enters into contracts with its customers to provide production parts generally at the beginning of a vehicle's life cycle. Typically, these contracts do not provide for a specified quantity of products, but once entered into, the Company is often expected to fulfill its customers' purchasing requirements for the production life of the vehicle. Many of these contracts may be terminated by the Company's customers at any time. Historically, terminations of these contracts have been infrequent. The Company receives purchase orders from its customers, which provide the commercial terms for a particular production part, including price (but not quantities). Contracts may also provide for annual price reductions over the production life of the vehicle, and prices may be adjusted on an ongoing basis to reflect changes in product content/cost and other commercial factors.

Revenue is recognized at a point in time when control of the product is transferred to the customer under standard commercial terms, as the Company does not have an enforceable right to payment prior to such transfer. The amount of revenue recognized reflects the consideration that the Company expects to be entitled to in exchange for those products based on the current purchase orders, annual price reductions and ongoing price adjustments. Revenue recognized related to prior years represented approximately 1% of consolidated net sales during the years ended December 31, 2024, 2023 and 2022. The Company's customers pay for products received in accordance with payment terms that are customary within the industry. The Company's contracts with its customers do not have significant financing components.

The Company records a contract liability for advances received from its customers. As of December 31, 2024 and 2023, there were no significant contract liabilities recorded. Further, there were no significant contract liabilities recognized in revenue during the years ended December 31, 2024, 2023 and 2022.

Amounts billed to customers related to shipping and handling costs are included in net sales in the consolidated statements of income. Shipping and handling costs are accounted for as fulfillment costs and are included in cost of sales in the consolidated statements of income.

Taxes assessed by a governmental authority that are both imposed on and concurrent with a specific revenue-producing transaction that are collected by the Company from a customer are excluded from revenue.

Cost of Sales and Selling, General and Administrative Expenses

Cost of sales includes material, labor and overhead costs associated with the manufacture and distribution of the Company's products. Distribution costs include inbound freight costs, purchasing and receiving costs, inspection costs, warehousing costs and other costs of the Company's distribution network. Selling, general and administrative expenses include selling, engineering and development and administrative costs not directly associated with the manufacture and distribution of the Company's products.

Restructuring Costs

Restructuring costs include employee termination benefits, asset impairment charges and contract termination costs, as well as other incremental net costs resulting from the restructuring actions. Employee termination benefits are recorded based on existing union and employee contracts, statutory requirements, completed negotiations and Company policy. Other incremental net costs principally include equipment and personnel relocation costs and gains and losses on the sales of facilities. In addition to restructuring costs, the Company also incurs incremental manufacturing inefficiency costs at the operating locations impacted by the restructuring actions during the related restructuring implementation period. Restructuring costs are recognized in the Company's consolidated financial statements in accordance with GAAP. Generally, charges are recorded as restructuring actions are approved, communicated and/or implemented.

Other Expense, Net

Other expense, net includes non-income related taxes, foreign exchange gains and losses, gains and losses related to certain derivative instruments and hedging activities, gains and losses on certain disposals of assets, the non-service cost components of net periodic benefit cost and other miscellaneous income and expense. A summary of other expense, net is shown below (in millions):

For the year ended December 31,	2024	2023	2022
Other expense	\$ 77.0 \$	83.7	\$ 57.2
Other income	(28.4)	(28.8)	(10.8)
Other expense, net	\$ 48.6 \$	54.9	\$ 46.4

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between financial statement carrying amounts of existing assets and liabilities and their respective tax bases and tax loss and credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income for the years in which those temporary differences are expected to be recovered or settled.

The Company's current and future provision for income taxes is impacted by the initial recognition of and changes in valuation allowances in certain countries. The Company intends to maintain these allowances until it is more likely than not that the deferred tax assets will be realized. The Company's future provision for income taxes will include no tax benefit with respect to losses incurred and, except for certain jurisdictions, no tax expense with respect to income generated in these countries until the respective valuation allowances are eliminated. Accordingly, income taxes are impacted by changes in valuation allowances and the mix of earnings among jurisdictions. The Company evaluates the realizability of its deferred tax assets on a quarterly basis. In completing this evaluation, the Company considers all available evidence in order to determine whether, based on the weight of the evidence, a valuation allowance for its deferred tax assets is necessary. Such evidence includes historical results, future reversals of existing taxable temporary differences and expectations for future taxable income (exclusive of the reversal of temporary difference, it is more likely than not that all or a portion of the Company's deferred tax assets will not be realized, a valuation allowance is recorded. If operating results improve or decline on a continual basis in a particular jurisdiction, the Company's decision regarding the need for a valuation allowance could change, resulting in either the initial recognition or reversal of a valuation allowance in that jurisdiction, which could have a significant impact on income tax expense in the period recognized and subsequent periods. In determining the provision for income taxes for financial statement

purposes, the Company makes certain estimates and judgments, which affect its evaluation of the carrying value of its deferred tax assets, as well as its calculation of certain tax liabilities.

The Company reclassifies taxes from accumulated other comprehensive loss to earnings as the items to which the tax effects relate are similarly reclassified.

The calculation of the Company's gross unrecognized tax benefits and liabilities includes uncertainties in the application of, and changes in, complex tax regulations in a multitude of jurisdictions across its global operations. The Company recognizes tax benefits and liabilities based on its estimates of whether, and the extent to which, additional taxes will be due. The Company adjusts these benefits and liabilities based on changing facts and circumstances; however, due to the complexity of these uncertainties and the impact of tax audits, the ultimate resolutions may differ significantly from the Company's estimates.

Foreign Currency

Assets and liabilities of foreign subsidiaries that use a functional currency other than the U.S. dollar are translated into U.S. dollars at the foreign exchange rates in effect at the end of the period. Revenues and expenses of foreign subsidiaries are translated into U.S. dollars using an average of the foreign exchange rates in effect during the period. Translation adjustments that arise from translating a foreign subsidiary's financial statements from the functional currency to the U.S. dollar are reflected in accumulated other comprehensive loss in the consolidated balance sheets.

Transaction gains and losses that arise from foreign exchange rate fluctuations on transactions denominated in a currency other than the functional currency, except certain long-term intercompany transactions, are included in the consolidated statements of income as incurred.

For the years ended December 31, 2024, 2023 and 2022, other expense, net includes net foreign currency transaction losses of \$21.4 million, \$53.0 million and \$30.4 million, respectively. For the years ended December 31, 2024, 2023 and 2022, net foreign currency transaction losses include \$16.1 million, \$30.6 million and \$10.3 million, respectively, related to the hyper-inflationary environment and significant currency devaluation in Argentina. For the year ended December 31, 2022, net foreign currency transaction losses include \$9.6 million related to foreign exchange rate volatility following Russia's invasion of Ukraine.

Stock-Based Compensation

The Company measures stock-based employee compensation expense at fair value in accordance with GAAP and recognizes such expense over the vesting period of the stock-based employee awards.

Net Income Per Share Attributable to Lear

Basic net income per share attributable to Lear is computed by dividing net income attributable to Lear by the average number of common shares outstanding during the period. Common shares issuable upon the satisfaction of certain conditions pursuant to a contractual agreement are considered common shares outstanding and are included in the computation of basic net income per share attributable to Lear.

Diluted net income per share attributable to Lear is computed using the treasury stock method by dividing net income attributable to Lear by the average number of common shares outstanding, including the dilutive effect of common stock equivalents using the average share price during the period.

A summary of information used to compute basic and diluted net income per share attributable to Lear is shown below (in millions, except share and per share data):

For the year ended December 31,	2024	2023	2022
Net income attributable to Lear	\$ 506.6	\$ 572.5	\$ 327.7
Average common shares outstanding	56,140,962	58,830,334	59,674,488
Dilutive effect of common stock equivalents	335,143	286,041	246,041
Average diluted shares outstanding	56,476,105	59,116,375	59,920,529
Basic net income per share attributable to Lear	\$ 9.02	\$ 9.73	\$ 5.49
Diluted net income per share attributable to Lear	\$ 8.97	\$ 9.68	\$ 5.47

Product Warranty

Losses from warranty obligations are accrued when it is probable that a liability has been incurred and the related amounts are reasonably estimable.

Segment Reporting

The Company is organized under two reportable operating segments: Seating and E-Systems. Each of these segments has a varied product and technology portfolio across a number of component categories. Further, the Company continuously evaluates this portfolio, aligning it with industry trends while balancing risk-adjusted returns, which allows the Company to offer value-added solutions to its customers.

Our Seating segment consists of the design, development, engineering and manufacture of complete seat systems and key seat components. The Company's capabilities in operations and supply chain management enable synchronized assembly and justin-time delivery of complex complete seat systems at high volumes to its customers. Key seat components include seat trim covers; surface materials such as leather and fabric; seat mechanisms; seat foam; headrests; and thermal comfort systems such as seat heating, ventilation, active cooling, pneumatic lumbar and massage products. All of these products are compatible with traditional internal combustion engine ("ICE") architectures and electrified powertrains, including the full range of hybrid, plugin hybrid and battery electric architectures.

Our E-Systems segment consists of the design, development, engineering and manufacture of complete electrical distribution and connection systems; high-voltage power distribution products, including battery disconnect units ("BDUs"); and low-voltage power distribution products and electronic controllers.

- Electrical distribution and connection systems utilize low-voltage and high-voltage wire, high-speed data cables and flat wiring to connect networks and electrical signals and manage electrical power within the vehicle for all types of powertrains from traditional ICE architectures to the full range of electrified powertrains that require management of higher voltage and power. Key components of the Company's electrical distribution and connection systems portfolio include wire harnesses, terminals and connectors, high-voltage battery connection systems and engineered components.
- High-voltage battery connection systems include intercell connect boards, bus bars and main battery connection systems. High-voltage power distribution products control the flow and distribution of high-voltage power throughout electrified vehicles and include BDUs which control all electrical energy flowing into and out of high-voltage batteries in electrified vehicles.
- Low-voltage power distribution products and electronic controllers facilitate signal, data and/or power management
 within the vehicle and include the associated software required to facilitate these functions. Key components of this
 portfolio include zonal controllers, body domain control modules and low-voltage and high-voltage power distribution
 modules. The Company's software offerings include embedded control, cybersecurity software and software to control
 hardware devices. The Company's customers traditionally have sourced the Company's electronic hardware together
 with the software that the Company integrates and embeds in it.

The other category includes unallocated costs related to corporate headquarters, regional headquarters and the elimination of intercompany activities, including intersegment revenues and cost of sales, none of which meets the requirements for being classified as an operating segment. Corporate and regional headquarters costs include various support functions, such as information technology, advanced research and development, corporate finance, legal, executive administration and human resources. Such costs are reflected in the operating segment results to the extent they are directly attributable to an operating segment.

The Company's chief operating decision maker ("CODM") is Raymond E. Scott, President and Chief Executive Officer. Each of the Company's operating segments reports its results from operations and makes its requests for capital expenditures directly to the CODM. The CODM assesses the operating performance of each segment based on segment earnings which is driven primarily by automotive production volumes in the geographic regions in which it operates, as well as by the success of the vehicle platforms for which it supplies products. Also, each operating segment operates in the competitive Tier 1 automotive supplier environment and is continually working with its customers to manage costs and improve quality. The Company's production processes generally make use of an hourly workforce, dedicated facilities, sequential manufacturing and assembly processes and commodity raw materials.

The CODM evaluates the performance of its operating segments based primarily on (i) revenues from external customers, (ii) pretax income before equity in net income of affiliates, interest expense, net and other expense, net ("segment earnings") and (iii) cash flows, being defined as segment earnings less capital expenditures plus depreciation and amortization.

The accounting policies of the Company's operating segments are the same as those described in this note to the consolidated financial statements.

Derivative Instruments and Hedging Activities

The Company has used derivative financial instruments, including forwards, futures, options, swaps and other derivative contracts, to reduce the effects of fluctuations in foreign exchange rates and interest rates and the resulting variability of the Company's operating results. The Company is not a party to leveraged derivatives. The Company's derivative financial instruments are subject to master arrangements that provide for the net settlement of contracts, by counterparty, in the event of default or termination. On the date that a derivative contract for a hedge instrument is entered into, the Company designates the derivative as either (1) a hedge of the exposure to changes in the fair value of a recognized asset or liability or of an unrecognized firm commitment (a fair value hedge), (2) a hedge of the exposure of a forecasted transaction or of the variability in the cash flows of a recognized asset or liability (a cash flow hedge), (3) a hedge of a net investment in a foreign operation (a net investment hedge) or (4) a contract not designated as a hedge instrument.

For a fair value hedge, the change in the fair value of the derivative is recorded in earnings and reflected in the consolidated statements of income on the same line as the gain or loss on the hedged item attributable to the hedged risk. For a cash flow hedge, the change in the fair value of the derivative is recorded in accumulated other comprehensive loss in the consolidated balance sheets. When the underlying hedged transaction is realized, the gain or loss included in accumulated other comprehensive loss is recorded in earnings and reflected in the consolidated statements of income on the same line as the gain or loss on the hedged item attributable to the hedged risk. For a net investment hedge, the change in the fair value of the derivative is recorded in cumulative translation adjustment, which is a component of accumulated other comprehensive loss in the consolidated balance sheets. When the related currency translation adjustment is required to be reclassified, usually upon the sale or liquidation of the investment, the gain or loss included in accumulated other comprehensive loss is recorded in earnings and reflected in other expense, net in the consolidated statements of income. Changes in the fair value of contracts not designated as hedge instruments are recorded in earnings and reflected in other expense, net in the consolidated statements of income. Cash flows attributable to derivatives used to manage foreign currency risks are classified on the same line as the hedged item attributable to the hedged risk in the consolidated statements of cash flows. Upon settlement, cash flows attributable to derivatives designated as net investment hedges are classified as investing activities in the consolidated statements of cash flows. Cash flows attributable to forward starting interest rate swaps are classified as financing activities in the consolidated statements of cash flows.

The Company formally documents its hedge relationships, including the identification of the hedge instruments and the related hedged items, as well as its risk management objectives and strategies for undertaking the hedge transaction. Derivatives are recorded at fair value in other current and long-term assets and other current and long-term liabilities in the consolidated balance sheets. The Company also formally assesses whether a derivative used in a hedge transaction is highly effective in offsetting changes in either the fair value or the cash flows of the hedged item. When it is determined that a hedged transaction is no longer probable to occur, the Company discontinues hedge accounting.

Use of Estimates

The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. During 2024, there were no material changes in the methods or policies used to establish estimates and assumptions. Other matters subject to estimation and judgment include amounts related to accounts receivable realization, inventory obsolescence, asset impairments, useful lives of fixed and intangible assets and unsettled pricing negotiations with customers and suppliers (Note 2, "Summary of Significant Accounting Policies"), acquisitions (Note 3, "Acquisition"), restructuring accruals (Note 4, "Restructuring"), deferred tax asset valuation allowances and income taxes (Note 8, "Income Taxes"), pension and other postretirement benefit plan assumptions (Note 9, "Pension and Other Postretirement Benefit Plans") and accruals related to legal, warranty and environmental matters (Note 13, "Legal and Other Contingencies"). Actual results may differ significantly from the Company's estimates.
(3) Acquisition

I.G. Bauerhin

On April 26, 2023, the Company completed the acquisition of IGB, a privately held supplier of automotive seat heating, ventilation and active cooling, steering wheel heating, seat sensors and electronic control modules, headquartered in Grundau-Rothenbergen, Germany. IGB has more than 4,600 employees at nine manufacturing plants in seven countries with annual sales of approximately \$290 million. The acquisition of IGB furthers the Company's comprehensive strategy to develop and integrate a complete portfolio of thermal comfort systems for automotive seating.

The acquisition of IGB was accounted for as a business combination, and accordingly, the assets acquired and liabilities assumed are included in the accompanying consolidated balance sheets as of December 31, 2024 and 2023. The operating results and cash flows of IGB are included in the accompanying consolidated financial statements from the date of acquisition in the Company's Seating segment.

The final purchase price and related allocation are shown below (in millions):

	D	ecember 31, 2023	Adjustments	De	cember 31, 2024
Purchase price, net of acquired cash	\$	174.5	\$ 0.8	\$	175.3
Property, plant and equipment		47.5	(0.7)	46.8
Other assets purchased and liabilities assumed, net		38.1	(1.8)	36.3
Goodwill		73.5	3.3		76.8
Intangible assets		15.4			15.4
Purchase price allocation	\$	174.5	\$ 0.8	\$	175.3

Goodwill recognized is primarily attributable to the assembled workforce and expected synergies related to future growth.

Intangible assets consist of amounts recognized for the fair value of developed technology and customer-based assets which were both based on an independent appraisal. Developed technology assets have a weighted average useful life of approximately nine years. Customer-based assets include IGB's established relationships with its customers and the ability of these customers to generate future economic profits for the Company and have a weighted average useful life of approximately thirteen years.

For the year ended December 31, 2023, the Company incurred transaction costs of \$0.5 million, which were expensed as incurred and are recorded in selling, general and administrative expenses in the accompanying consolidated statement of income.

The pro-forma effects of this acquisition do not materially impact the Company's reported results for any period presented.

For further information related to acquired assets measured at fair value, see Note 15, "Financial Instruments."

(4) Restructuring

Charges recorded in connection with the Company's restructuring actions are shown below (in millions):

For the year ended December 31,	2024	2023	2022
Employee termination benefits	\$ 129.0	\$ 119.2	\$ 121.9
Asset impairments			
Property, plant and equipment	2.9	5.1	9.9
Right-of-use assets	2.3	10.9	6.5
Contract termination costs	3.7	5.7	4.5
Other related net costs	1.0	(8.2)	11.4
	\$ 138.9	\$ 132.7	\$ 154.2

Restructuring charges by income statement account are shown below (in millions):

For the year ended December 31,	2024	2023	2022
Cost of sales	\$ 133.1 \$	130.2 \$	129.7
Selling, general and administrative expenses	19.3	20.7	24.5
Other income, net	(13.5)	(18.2)	—
	\$ 138.9 \$	132.7 \$	154.2

Restructuring charges by operating segment are shown below (in millions):

For the year ended December 31,	2024	2023	2022	
Seating	\$ 100.8	\$ 99.5	\$	65.3
E-Systems	30.1	30.5		82.8
Other	8.0	2.7		6.1
	\$ 138.9	\$ 132.7	\$	154.2

The Company expects to incur approximately \$67 million and approximately \$11 million of additional restructuring charges in its Seating and E-Systems segments, respectively, related to activities initiated as of December 31, 2024, and expects that the components of such costs will be consistent with its historical experience.

A summary of the changes in the Company's restructuring reserves is shown below (in millions):

	2024	2023
Balance as of January 1,	\$ 121.6 \$	82.9
Provision for employee termination benefits	129.0	119.2
Payments, utilizations and foreign currency	(150.6)	(80.5)
Balance as of December 31,	\$ 100.0 \$	121.6

Income before provision for income taxes	152.0	116.7	102.8
Net income attributable to affiliates	116.8	82.2	64.4

A summary of amounts recorded in the Company's consolidated balance sheets related to its affiliates is shown below (in millions):

December 31,	2024	2023
Aggregate investment in affiliates	\$ 220.5	\$ 217.1
Receivables due from affiliates (including notes and advances)	210.2	170.7
Payables due to affiliates	5.6	0.5

Lear Corporation and Subsidiaries Notes to Consolidated Financial Statements (continued)

A summary of transactions with affiliates accounted for under the equity method and other related parties is shown below (in millions):

For the year ended December 31,	2024	2023	2022
Sales to affiliates	\$ 744.6	\$ 654.6	\$ 783.0
Purchases from affiliates	12.5	2.1	9.0
Management and other fees for services provided to affiliates	28.9	32.7	32.6
Dividends received from affiliates	44.5	21.7	21.1

The Company has certain investments with beneficial ownership interests of less than 20% that are accounted for under the equity method as the Company's beneficial ownership interests in these entities are similar to partnership interests.

(6) Debt

Short-Term Borrowings

The Company utilizes uncommitted lines of credit as needed for its short-term working capital fluctuations. As of December 31, 2024 and 2023, the Company had lines of credit from banks totaling \$342.5 million and \$337.7 million, respectively. As of December 31, 2024 and 2023, the Company had short-term debt balances outstanding related to draws on its lines of credit of \$26.7 million and \$27.5 million, respectively.

Long-Term Debt

A summary of long-term debt, net of unamortized debt issuance costs and unamortized original issue premium (discount) and the related weighted average interest rates is shown below (in millions):

Senior Notes

The issuance, maturity and interest payment dates of the Company's senior unsecured 2027 Notes, 2029 Notes, 2030 Notes, 2032 Notes, 2049 Notes and 2052 Notes (collectively, the "Notes") are shown below:

Note	Issuance Date	Maturity Date	Interest Payment Dates
2027 Notes	August 2017	September 15, 2027	March 15 and September 15
2029 Notes	May 2019	May 15, 2029	May 15 and November 15
2030 Notes	February 2020	May 30, 2030	May 30 and November 30
2032 Notes	November 2021	January 15, 2032	January 15 and July 15
2049 Notes	May 2019 and February 2020	May 15, 2049	May 15 and November 15
2052 Notes	November 2021	January 15, 2052	January 15 and July 15

2027 Notes Issued in 2017

Prior to June 15, 2027, the Company, at its option, may redeem the 2027 Notes, in whole or in part, at a redemption price equal to 100% of the principal amount thereof, plus a "make-whole" premium as of, and accrued and unpaid interest to, the redemption date. On or after June 15, 2027, but prior to the maturity date of September 15, 2027, the Company, at its option, may redeem the 2027 Notes, in whole or in part, at a redemption price equal to 100% of the principal amount thereof, plus a ccrued and unpaid interest to the redemption date.

2029 Notes Issued in 2019

Prior to February 15, 2029, the Company, at its option, may redeem the 2029 Notes, in whole or in part, at a redemption price equal to 100% of the principal amount thereof, plus the applicable premium, if any, as of, and accrued and unpaid interest to, but not including, the redemption date. On or after February 15, 2029, the Company, at its option, may redeem the 2029 Notes, at any time, in whole or in part, on not less than 15 nor more than 60 days' prior notice, at a redemption price equal to 100% of the principal amount thereof, plus accrued and unpaid interest to, but not including, the redemption date.

2049 Notes Issued in 2019 and 2020

Prior to November 15, 2048, the Company, at its option, may redeem the 2049 Notes, in whole or in part, at a redemption price equal to 100% of the principal amount thereof, plus the applicable premium, if any, as of, and accrued and unpaid interest to, but not including, the redemption date. On or after November 15, 2048, the Company, at its option, may redeem the 2049 Notes, at any time, in whole or in part, on not less than 15 nor more than 60 days' prior notice, at a redemption price equal to 100% of the principal amount thereof, plus accrued and unpaid interest to, but not including, the redemption date.

2030 Notes Issued in 2020

Prior to February 28, 2030, the Company, at its option, may redeem the 2030 Notes, in whole or in part, at a redemption price equal to 100% of the principal amount thereof, plus the applicable premium, if any, as of, and accrued and unpaid interest to, but not including, the redemption date. On or after February 28, 2030, the Company, at its option, may redeem the 2030 Notes, at any time, in whole or in part, on not less than 15 nor more than 60 days' prior notice, at a redemption price equal to 100% of the principal amount thereof, plus accrued and unpaid interest to, but not including, the redemption date.

2032 Notes and 2052 Notes Issued in 2021

Prior to October 15, 2031, the Company, at its option, may redeem the 2032 Notes, in whole or in part, at a redemption price equal to 100% of the principal amount thereof, plus the applicable premium, if any, as of, and accrued and unpaid interest to, but not including, the redemption date. On or after October 15, 2031, the Company, at its option, may redeem the 2032 Notes, at any time, in whole or in part, on not less than 15 nor more than 60 days' prior notice, at a redemption price equal to 100% of the principal amount thereof, plus accrued and unpaid interest to, but not including, the redemption date.

Prior to July 15, 2051, the Company, at its option, may redeem the 2052 Notes, in whole or in part, at a redemption price equal to 100% of the principal amount thereof, plus the applicable premium, if any, as of, and accrued and unpaid interest to, but not including, the redemption date. On or after July 15, 2051, the Company, at its option, may redeem the 2052 Notes, at any time, in whole or in part, on not less than 15 nor more than 60 days' prior notice, at a redemption price equal to 100% of the principal amount thereof, plus accrued and unpaid interest to, but not including, the redemption date.

Covenants

Subject to certain exceptions, the indentures governing the Notes contain restrictive covenants that, among other things, limit the ability of the Company to: (i) create or permit certain liens and (ii) consolidate, merge or sell all or substantially all of the Company's assets. The indentures governing the Notes also provide for customary events of default. As of December 31, 2024, the Company was in compliance with all covenants under the indentures governing the Notes.

Credit Agreement

The Company has an amended and restated unsecured credit agreement (the "Credit Agreement"), which consists of a \$2.0 billion revolving credit facility (the "Revolving Credit Facility").

In June 2023, the Company amended the Credit Agreement to implement the transition from the London Interbank Offered Rate to the Secured Overnight Financing Rate ("SOFR") in accordance with the existing terms of the Credit Agreement, adopting SOFR as the reference rate for certain U.S. dollar-denominated borrowings.

In November 2023, the Company entered into an extension agreement (the "Extension Agreement") related to its Credit Agreement to extend the maturity date by one year to October 28, 2027, and replace the Canadian Dollar Offered Rate (CDOR) with term Canadian Overnight Repo Rate Average (CORRA) as the benchmark rate for term rate loans denominated in Canadian dollars. In connection with the Extension Agreement, the Company paid related issuance costs of \$1.2 million.

In 2024 and 2023, there were no borrowings or repayments under the Revolving Credit Facility. In 2022, aggregate borrowings and repayments under the Revolving Credit Facility were \$65.0 million. As of December 31, 2024 and 2023, there were no borrowings outstanding under the Revolving Credit Facility.

Advances under the Credit Agreement generally bear interest based on (i) Term Benchmark, Central Bank Rate and Risk Free Rate ("RFR") (in each case, as defined in the Credit Agreement) or (ii) Alternate Base Rate ("ABR") and Canadian Prime Rate (in each case, as defined in the Credit Agreement). As of December 31, 2024, the ranges and rates are as follows (in percentages):

	Term Benchmark, Central Bank Rate and RFR Loans ABR and Canadian Prime Rate				e Rate Loans	
	Minimum	Maximum	Rate as of December 31, 2024	Minimum	Maximum	Rate as of December 31, 2024
Credit Agreement	0.925 %	1.450 %	1.125 %	0.000 %	0.450 %	0.125 %

The facility fee, which ranges from 0.075% to 0.20% of the total amount committed under the Revolving Credit Facility, is payable quarterly.

Covenants

The Credit Agreement contains various customary representations, warranties and covenants by the Company, including, without limitation, (i) covenants regarding maximum leverage, (ii) limitations on fundamental changes involving the Company or its subsidiaries and (iii) limitations on indebtedness and liens. As of December 31, 2024, the Company was in compliance with all covenants under the Credit Agreement.

Term Loan

In May 2023, the Company borrowed \$150.0 million under its unsecured delayed-draw term loan facility (the "Term Loan") to finance, in part, the acquisition of IGB (Note 3, "Acquisition"). The Term Loan matures on May 1, 2026, three years after the funding date. Advances under the Term Loan generally bear interest based on the Daily or Term SOFR (as defined in the Term Loan agreement) plus a margin determined in accordance with a pricing grid that ranges from 1.00% to 1.525%. As of December 31, 2024, the interest rate was 5.835%. In December 2024, the Company made a principal payment under the Term Loan of \$50.0 million.

Covenants

The Term Loan contains the same covenants as the Credit Agreement. As of December 31, 2024, the Company was in compliance with all covenants under the Term Loan.

Other

As of December 31, 2024, other long-term debt, including the current portion, consisted of amounts outstanding under an unsecured working capital loan and finance lease agreements. As of December 31, 2023, other long-term debt, including the current portion, consisted of amounts outstanding under finance lease agreements.

(7) Leases

The Company has operating leases for production, office and warehouse facilities, manufacturing and office equipment and vehicles. Operating lease assets and obligations included in the accompanying consolidated balance sheet are shown below (in millions):

December 31,	2024	2023
Right-of-use assets under operating leases:		
Other long-term assets	\$ 699.8	\$ 733.5
Lease obligations under operating leases:		
Accrued liabilities	\$ 152.6	\$ 151.9
Other long-term liabilities	582.5	623.0
	\$ 735.1	\$ 774.9

Maturities of lease obligations as of December 31, 2024, are shown below (in millions):

2025	\$ 179.7
2026	156.6
2027	130.0
2028	104.9
2029	76.9
Thereafter	188.9
Total undiscounted cash flows	837.0
Less: Imputed interest	(101.9)
Lease obligations under operating leases	\$ 735.1

In addition to the right-of-use assets obtained in exchange for operating lease obligations shown below, the Company acquired \$14.3 million of right-of-use assets and related lease obligations in conjunction with its acquisition of IGB in 2023 (Note 3, "Acquisition").

Cash flow information related to operating leases is shown below (in millions):

For the year ended December 31,	2024	2023	2022
Non-cash activity:			
Right-of-use assets obtained in exchange for operating lease obligations	\$ 171.1	\$ 181.6	\$ 236.1
Operating cash flows:			
Cash paid related to operating lease obligations	\$ 195.4	\$ 183.2	\$ 164.3

Lease expense included in the accompanying consolidated statement of income is shown below (in millions):

For the year ended December 31,	2024	2023	2022
Operating lease expense	\$ 190.7	\$ 182.9	\$ 164.5
Short-term lease expense	20.0	20.7	22.1
Variable lease expense	8.0	9.7	8.4
Total lease expense	\$ 218.7	\$ 213.3	\$ 195.0

The Company's short-term lease expense excludes leases with a duration of one month or less.

Variable lease expense includes payments based on performance or usage, as well as changes to index and rate-based lease payments. Additionally, the Company evaluated its supply contracts with its customers and concluded that variable lease expense in these arrangements is not material.

For the years ended December 31, 2024, 2023 and 2022, the Company recognized impairment charges of \$2.3 million, \$10.9 million and \$6.5 million, respectively, related to its right-of-use assets in conjunction with its restructuring actions (Note 4, "Restructuring"). For the year ended December 31, 2024, the Company recognized additional right-of-use asset impairment charges of \$0.9 million. For the year ended December 31, 2022, the Company recognized additional right-of-use asset impairment charges of \$7.0 million related to its Russian operations. The impairment charges are included in cost of sales in the accompanying consolidated statements of income.

The weighted average lease term and discount rate for operating leases as of December 31, 2024, are shown below:

Weighted average remaining lease term	Six years
Weighted average discount rate	3.9 %

For the year ended December 31, 2023, the Company recognized net gains of \$11.3 million on the sale of facilities that were subsequently leased back under short-term leases. The gains are included in other expense, net in the accompanying consolidated statement of income.

(8) Income Taxes

A summary of consolidated income before provision for income taxes and equity in net income of affiliates and the components of provision for income taxes is shown below (in millions):

For the year ended December 31,	2024	2023	2022
Consolidated income before provision for income taxes and equity in net income of affiliates:			
Domestic	\$ (31.7) \$	59.9	\$ 87.6
Foreign	764.6	717.3	421.7
	\$ 732.9 \$	777.2	\$ 509.3
Domestic (benefit) provision for income taxes:			
Current provision	\$ 40.0 \$	43.0	\$ 35.3
Deferred benefit	(70.6)	(29.4)	(41.4)
Total domestic (benefit) provision	\$ (30.6) \$	13.6	\$ (6.1)
Foreign provision for income taxes:			
Current provision	\$ 208.0 \$	196.6	\$ 147.8
Deferred (benefit) provision	13.7	(29.4)	(8.0)
Total foreign provision	\$ 221.7 \$	167.2	\$ 139.8
Provision for income taxes	\$ 191.1 \$	180.8	\$ 133.7

The domestic current provision includes withholding taxes related to dividends and royalties paid by the Company's foreign subsidiaries, as well as state and local taxes. In 2024, 2023 and 2022, the provision for income taxes includes the benefit of prior unrecognized net operating loss carryforwards of \$5.1 million, \$8.0 million and \$0.8 million, respectively.

A summary of the differences between the provision for income taxes calculated at the United States federal statutory income tax rate of 21% and the consolidated provision for income taxes is shown below (in millions):

For the year ended December 31,	2024	2023	2022
Consolidated income before provision for income taxes and equity in net income of affiliates multiplied by the United States federal statutory income tax rate	\$ 153.9 \$	163.2 \$	107.0
Differences in income taxes on foreign earnings, losses and remittances	54.3	43.2	24.5
Valuation allowance adjustments ⁽¹⁾	(4.7)	(3.3)	45.2
Research and development and other tax credits ⁽²⁾	4.7	(15.9)	(15.0)
FDII deduction	(17.8)	(20.1)	(16.9)
U.S. tax impact of foreign earnings ⁽³⁾	(12.4)	3.4	(6.3)
Tax audits and assessments	1.1	1.5	3.2
Other	12.0	8.8	(8.0)
Provision for income taxes	\$ 191.1 \$	180.8 \$	133.7

⁽¹⁾ Primarily reflects changes in valuation allowances on the deferred tax assets of foreign subsidiaries.

(2) 2024 includes \$22.1 million of tax expense related to the write-off of a deferred tax asset in a foreign subsidiary that was fully offset by a valuation allowance.

(3) Reflects the impact on the domestic provision for income taxes related to foreign source income, including foreign branch earnings net of the applicable foreign tax credits in the general, foreign branch, GILTI and passive separate limitation categories. This amount includes the U.S. tax impact of apportioning U.S. expenses against the GILTI basket in calculating the foreign tax credit limitation resulting in no tax benefit for these expenses due to the Company's excess foreign tax credit position in the GILTI basket for 2024 and 2023.

For the years ended December 31, 2024, 2023 and 2022, income in foreign jurisdictions with tax holidays was \$64.5 million, \$48.4 million and \$40.5 million, respectively. Such tax holidays generally expire from 2024 through 2036.

Deferred income taxes represent temporary differences in the recognition of certain items for financial reporting and income tax purposes. A summary of the components of the net deferred income tax asset is shown below (in millions):

December 31,	2	024	2023
Deferred income tax assets (liabilities):			
Tax loss carryforwards	\$	385.2 \$	394.3
Tax credit carryforwards		225.8	240.4
Retirement benefit plans		20.9	24.6
Accrued liabilities		257.1	275.2
Current asset basis differences		57.2	50.3
Long-term asset basis differences (1)		23.8	16.4
Deferred compensation		29.3	35.4
Capitalized engineering, research and development		251.7	201.0
Undistributed earnings of foreign subsidiaries		(92.8)	(83.9)
Derivative instruments and hedging activities		29.9	(31.6)
Other		—	1.2
Net deferred income tax asset before valuation allowance		1,188.1	1,123.3
Valuation allowance		(399.4)	(429.0)
Net deferred income tax asset	\$	788.7 \$	694.3

(1) Included in the long-term asset basis differences for the years ended December 31, 2024 and 2023, are deferred tax assets of \$132.0 million and \$157.3 million, respectively, related to lease obligations and deferred tax liabilities of \$132.0 million and \$157.3 million, respectively, related to right-of-use assets.

As of December 31, 2024 and 2023, the valuation allowance with respect to the Company's deferred tax assets was \$399.4 million and \$429.0 million, respectively, a net decrease of \$29.6 million.

Concluding that a valuation allowance is not required is difficult when there is significant negative evidence, such as cumulative losses in recent years, which is objective and verifiable. When measuring cumulative losses in recent years, the Company uses a rolling three-year period of pretax book income, adjusted for permanent differences between book and taxable income and certain other items. As of December 31, 2024, the Company continues to maintain a U.S. valuation allowance of \$32.1 million, primarily related to U.S. state and local deferred tax assets that, due to their nature, are not likely to be realized. In addition, the Company continues to maintain a valuation allowance of \$367.3 million with respect to its deferred tax assets in several international jurisdictions.

The classification of the net deferred income tax asset is shown below (in millions):

December 31,	2024	2023
Long-term deferred income tax assets	\$ 896.4	\$ 798.2
Long-term deferred income tax liabilities	(107.7)	(103.9)
Net deferred income tax asset	\$ 788.7	\$ 694.3

As of December 31, 2024, deferred income taxes have not been provided on the undistributed earnings of the Company's foreign subsidiaries since these earnings will not be taxable upon repatriation to the United States. These earnings will be primarily treated as previously taxed income from either the one-time transition tax or GILTI, or they will be offset with a 100% dividend received deduction. However, the Company continues to provide a deferred tax liability for foreign withholding tax that will be incurred with respect to the undistributed foreign earnings that are not permanently reinvested.

As of December 31, 2024, the Company had tax loss carryforwards of \$1.6 billion. Of the total tax loss carryforwards, \$1.4 billion have no expiration date, and \$215.9 million expire between 2025 and 2040. In addition, the Company had tax credit carryforwards of \$225.8 million, comprised principally of U.S. foreign tax credits of \$71.8 million that expire between 2027 and 2034, U.S. research and development credits of \$141.0 million that expire between 2025 and 2044 and other tax credits primarily in international jurisdictions of \$13.0 million that generally expire between 2025 and 2042.

As of December 31, 2024, 2023 and 2022, the Company's gross unrecognized tax benefits were \$34.0 million, \$33.1 million and \$32.7 million (excluding interest and penalties), respectively, which are recorded in other long-term liabilities in the accompanying consolidated balance sheets. All of the Company's gross unrecognized tax benefits, if recognized, would affect the Company's effective tax rate.

Lear Corporation and Subsidiaries Notes to Consolidated Financial Statements (continued)

A summary of the changes in gross unrecognized tax benefits is shown below (in millions):

For the year ended December 31,	2024	2023	2022
Balance at beginning of period	\$ 33.1 \$	32.7 \$	34.9
Additions based on tax positions related to current year	6.6	5.1	4.8
Settlements			(1.9)
Statute expirations	(4.9)	(5.1)	(6.3)
Foreign currency translation	(0.8)	0.4	1.2
Balance at end of period	\$ 34.0 \$	33.1 \$	32.7

The Company recognizes interest and penalties with respect to unrecognized tax benefits as income tax expense. As of December 31, 2024, 2023 and 2022, the Company had recorded gross reserves of \$10.9 million, \$11.6 million and \$12.3 million, respectively, related to interest and penalties, all of which, if recognized, would affect the Company's effective tax rate.

The Company operates in multiple jurisdictions throughout the world, and its tax returns are periodically audited or subject to review by both domestic and foreign tax authorities. During the next twelve months, it is reasonably possible that, as a result of audit settlements, the conclusion of current examinations and the expiration of the statute of limitations in multiple jurisdictions, the Company may decrease the amount of its gross unrecognized tax benefits by \$4.1 million, all of which, if recognized, would affect the Company's effective tax rate. The gross unrecognized tax benefits subject to potential decrease involve issues related to transfer pricing and various other tax items in multiple jurisdictions. However, as a result of ongoing examinations, tax proceedings in certain countries, additions to the gross unrecognized tax benefits for positions taken and interest and penalties, if any, arising in 2025, it is not possible to estimate the potential net increase or decrease to the Company's gross unrecognized tax benefits during the next twelve months.

The Company considers its significant tax jurisdictions to include China, Germany, Mexico, Morocco, Spain, the United Kingdom and the United States. The Company or its subsidiaries generally remain subject to income tax examination in certain U.S. state and local jurisdictions for years after 2019. Further, the Company or its subsidiaries remain subject to income tax examination in Spain for years after 2007, in Mexico for years after 2016, in Germany for years after 2018, in China, Morocco and the United Kingdom for years after 2020, and in the United States generally for years after 2022.

On August 16, 2022, the Inflation Reduction Act of 2022 ("IRA") was signed into law. The IRA contains a number of revisions to the Internal Revenue Code, including a 15% corporate minimum tax and a 1% excise tax on share repurchases, which are effective for tax years beginning after December 31, 2022. The tax-related provisions of the IRA did not have a material impact on the Company's consolidated financial statements. For the year ended December 31, 2024 and 2023, the Company incurred \$3.8 million and \$2.9 million, respectively, of excise taxes on its share repurchases, which is included in repurchases of shares of common stock in the accompanying consolidated statements of equity.

(9) Pension and Other Postretirement Benefit Plans

The Company has noncontributory defined benefit pension plans covering certain domestic employees and certain employees in foreign countries, principally Canada.

The Company's domestic salaried pension plans provide benefits based on final average earnings formulas. The Company's domestic hourly pension plans provide benefits under flat benefit and cash balance formulas. The Company also has contractual arrangements with certain employees which provide for supplemental retirement benefits. In general, the Company's policy is to fund its pension benefit obligation based on legal requirements, tax and liquidity considerations and local practices.

The Company has postretirement benefit plans covering certain domestic and Canadian retirees. The Company's postretirement benefit plans generally provide for the continuation of medical benefits for eligible retirees. The Company does not fund its postretirement benefit obligation. Rather, payments are made as costs are incurred by covered retirees.

Obligation

A reconciliation of the change in benefit obligation for the years ended December 31, 2024 and 2023, is shown below (in millions):

		Pen	sion			Other Post	tretirement	
	December	31, 2024	Decembe	r 31, 2023	Decembe	er 31, 2024	December	31, 2023
	U.S.	Foreign	U.S.	Foreign	U.S.	Foreign	U.S.	Foreign
Change in benefit obligation:								
Benefit obligation at beginning of period	\$ 405.3	\$ 373.8	\$ 387.9	\$ 339.5	\$ 29.1	\$ 15.7	\$ 29.1	\$ 17.6

Actuarial gains

As of December 31, 2024, the decrease in the U.S. pension benefit obligation attributable to actuarial gains primarily relates to an increase in the discount rate. The decrease in the foreign pension benefit obligation attributable to actuarial gains relates to increases in the discount rate and changes in demographics, partially offset by changes in mortality assumptions. As of December 31, 2024, the increase in the U.S. other postretirement benefit obligation attributable to actuarial losses relates to the plans' biennial valuation update, offset by an increase in the discount rate. The increase in the foreign other postretirement benefit obligation attributable to actuarial losses relates to the plans' biennial valuation update, offset by an increase in the discount rate. The increase in the foreign other postretirement benefit obligation attributable to actuarial losses relates to changes in mortality assumptions.

As of December 31, 2023, the increase in pension and U.S. other postretirement benefit obligations attributable to actuarial losses primarily relates to a decrease in the discount rate. As of December 31, 2023, the decrease in the foreign other postretirement obligation attributable to actuarial gains primarily relates to demographic and claims cost updates (see assumptions below).

Plan Assets and Funded Status

A reconciliation of the change in plan assets for the years ended December 31, 2024 and 2023, and the funded status as of December 31, 2024 and 2023, are shown below (in millions):

			Pen	sion	l					(Other Post	retir	ement

Lump-Sum Payout

In 2024, the Company initiated a limited lump-sum payout offer ("Lump-Sum Payout") to certain terminated vested plan participants of its U.S. qualified defined benefit pension plans. Under the Lump-Sum Payout, eligible plan participants were able to voluntarily elect an early payout of their pension benefits in the form of a lump-sum payment equal to the present value of the participant's pension benefits in satisfaction of all benefits payable to the participant under the plans. In connection with the Lump-Sum Payout, payments of \$52.7 million were distributed from existing defined benefit pension plan assets, and the Company recognized a \$6.6 million non-cash settlement charge, which is included in other expense, net in the consolidated statement of income. Payments under the Lump-Sum Payout are reflected as benefits paid in the reconciliation of the change in benefit obligation and the change in plan assets for the year ended December 31, 2024.

Accumulated Benefit Obligation

As of December 31, 2024 and 2023, the accumulated benefit obligation for all of the Company's pension plans was \$661.5 million and \$769.3 million, respectively.

As of December 31, 2024 and 2023, the majority of the Company's pension plans had accumulated benefit obligations in excess of plan assets. Information related to pension plans with accumulated benefit obligations in excess of plan assets is shown below (in millions):

December 31,	2024	2023
Projected benefit obligation	\$ 316.0	\$ 515.2
Accumulated benefit obligation	308.5	505.5
Fair value of plan assets	187.4	368.2

In addition, the Company recognized tax benefit (expense) in other comprehensive income (loss) related to its defined benefit plans of (\$4.5) million, \$2.2 million and (\$24.9) million for the years ended December 31, 2024, 2023 and 2022, respectively.

The Company uses the corridor approach when amortizing actuarial gains and losses. Under the corridor approach, net unrecognized actuarial gains and losses in excess of 10% of the greater of i) the projected benefit obligation or ii) the fair value of plan assets are amortized over future periods. For plans with little to no active participants, the amortization period is the remaining average life expectancy of the participants. For plans with active participants, the amortization period is the remaining average service period of the active participants. The amortization periods range from 3 to 31 years for the Company's defined benefit pension plans and from 6 to 14 years for the Company's other postretirement benefit plans.

Net Periodic Pension and Other Postretirement Benefit Cost (Credit)

The components of the Company's net periodic pension benefit cost (credit) are shown below (in millions):

Domestic plans	5.1 %	5.5 %	2.8 %
Foreign plans	4.6 %	5.3 %	3.1 %

The expected return on plan assets is determined based on several factors, including adjusted historical returns, historical risk premiums for various asset classes and target asset allocations within the portfolio. Adjustments made to the historical returns are based on recent return experience in the equity and fixed income markets and the belief that deviations from historical returns are likely over the relevant investment horizon.

As of December 31, 2024 and 2023, the weighted-average interest crediting rate used by one of the Company's U.S. pension plans was a minimum of 4.5% and 4.7%, respectively.

Healthcare Trend Rate

The assumed healthcare cost trend rates used to measure the postretirement benefit obligation as of December 31, 2024, are shown below:

	U.S. Plans	Foreign Plans
Initial healthcare cost trend rate	7.0%	4.4%
Ultimate healthcare cost trend rate	5.0%	4.0%
Year ultimate healthcare cost trend rate achieved	2032	2040

For further information on the GAAP fair value hierarchy, see Note 15, "Financial Instruments." Pension plan assets for the foreign plans relate to the Company's pension plans primarily in Canada and the United Kingdom.

The Company's investment policies incorporate an asset allocation strategy that prioritizes reducing volatility in the plans' funded status, while generating moderate long-term growth. The Company believes that this strategy is consistent with the long-term nature of plan liabilities and ultimate cash needs of the plans. For the domestic portfolio, the Company targets a return seeking asset (e.g., equity securities, equity mutual funds, exchange traded funds ("ETFs") and alternative investments) allocation of 20% - 40% and a risk mitigating asset (e.g., fixed income securities, fixed income mutual funds and ETFs) allocation of 60% - 80%. As the funding ratio for the defined benefit pension plans covering certain domestic employees changes, the proportion of return seeking assets will be adjusted accordingly. For the foreign portfolio, the Company targets an equity allocation of 0% - 35% of plan assets, a fixed income allocation of 65% - 100%, an alternative investment allocation of 0% - 10% and a cash allocation of 0% - 10%. Differences in the target allocations of the domestic and foreign portfolios are reflective of differences in the underlying plan liabilities. Diversification within the investment portfolios is pursued by asset class and investment management style. The investment portfolios are reviewed on a quarterly basis to maintain the desired asset allocations, given the market performance of the asset classes and investment management styles. Alternative investments are redeemable in the near term, generally with 90 days' notice.

The Company utilizes investment management firms to manage these assets in accordance with the Company's investment policies. Excluding alternative investments, mutual funds and ETFs, retained investment managers are provided investment guidelines, which restrict the use of certain assets, including commodities contracts, futures contracts, options, venture capital, real estate, interest-only or principal-only strips and investments in the Company's own debt or equity. Derivative instruments are also prohibited without the specific approval of the Company. Investment managers are limited in the maximum size of

individual security holdings and the maximum exposure to any one industry relative to the total portfolio. Fixed income managers are provided further investment guidelines that indicate minimum credit ratings for debt securities and limitations on weighted average maturity and portfolio duration.

The Company evaluates investment manager performance against market indices which the Company believes are appropriate to the investment management style for which the investment manager has been retained. The Company's investment policies incorporate an investment goal of aggregate portfolio returns which exceed the returns of the appropriate market indices by a reasonable spread over the relevant investment horizon.

Contributions

In 2025, the Company's minimum required contributions to its domestic and foreign pension plans are expected to be approximately \$4 million. The Company may elect to make contributions in excess of minimum funding requirements in response to investment performance or changes in interest rates or when the Company believes that it is financially advantageous to do so and based on its other cash requirements. After 2025, the Company's minimum funding requirements will depend on several factors, including investment performance and interest rates. The Company's minimum funding requirements may also be affected by changes in applicable legal requirements.

Benefit Payments

As of December 31, 2024, the Company's estimate of expected benefit payments in each of the five succeeding years and in the aggregate for the five years thereafter are shown below (in millions):

		Pen	sion		(Other Pos	tretirement		
Year	1	U.S. Foreign		U.S.		Fo	reign		
2025	\$	22.6	\$	23.0	\$	2.7	\$	1.2	
2026		23.5		22.2		2.6		1.2	
2027		23.1		23.5		2.6		1.2	
2028		23.6		24.3		2.6		1.2	
2029		24.0		24.9		2.5		1.2	
Five years thereafter		121.9		129.6		11.2		5.1	

Multi-Employer Pension Plans

The Company currently participates in two multi-employer pension plans, the U.A.W. Labor-Management Group Pension Plan (EIN 51-6099782-001) and UNITE Here National Retirement Fund (EIN 13-6130178-001), for certain of its employees. Contributions to these plans are based on four collective bargaining agreements, which expire between April 4, 2025 and July 31, 2028.

Detailed information related to these plans is shown below (amounts in millions):

	Pension Pro Zone			Contri	butions	to Multie	employe	r Pensio	n Plans	
Employer Identification Number ("EIN")	December 31, 2023 Certification	December 31, 2022 Certification	FIP/RP ⁽¹⁾ Pending or Implemented	Surcharge	Year H Decemi 202	ber 31,	Decem	Ended ber 31, 23	Decer	Ended nber 31, 022

⁽¹⁾ Funding improvement plan or rehabilitation plan as defined by Employment Retirement Security Act of 1974.

For its plan years 2024 and 2023, the Company's contributions to the U.A.W. Labor-Management Group Pension Plan represented more than 5% of the plan's total contributions.

Defined Contribution Plan

The Company also sponsors defined contribution plans and participates in government-sponsored programs in certain foreign countries. Contributions are determined as a percentage of each covered employee's salary. For the years ended December 31, 2024, 2023 and 2022, the aggregate cost of the defined contribution plans was \$20.0 million, \$19.7 million and \$18.2 million, respectively.

The Company also has a defined contribution retirement program for its salaried employees. Contributions to this program are determined as a percentage of each covered employee's eligible compensation. For the years ended December 31, 2024, 2023 and 2022, the Company recorded expense of \$26.3 million, \$27.6 million and \$23.5 million, respectively, related to this program.

(11) Capital Stock, Accumulated Other Comprehensive Loss and Equity

Common Stock

The Company is authorized to issue up to 300,000,000 shares of Common Stock. The Company's Common Stock is listed on the New York Stock Exchange under the symbol "LEA" and has the following rights and privileges:

\$ 15,711.2

\$

5,180.3

\$20,891.5

- *Voting Rights* All shares of the Company's common stock have identical rights and privileges. With limited exceptions, holders of common stock are entitled to one vote for each outstanding share of common stock held of record by each shareholder on all matters properly submitted for the vote of the Company's shareholders.
- *Dividend Rights* Subject to applicable law, any contractual restrictions and the rights of the holders of outstanding preferred stock, if any, holders of common stock are entitled to receive ratably such dividends and other distributions that the Company's Board of Directors (the "Board"), in its discretion, declares from time to time.
- *Liquidation Rights* Upon the dissolution, liquidation or winding up of the Company, subject to the rights of the holders of outstanding preferred stock, if any, holders of common stock are entitled to receive ratably the assets of the Company available for distribution to the Company's shareholders in proportion to the number of shares of common stock held by each shareholder.
- *Conversion, Redemption and Preemptive Rights* Holders of common stock have no conversion, redemption, sinking fund, preemptive, subscription or similar rights.

Lear Corporation and Subsidiaries Notes to Consolidated Financial Statements (continued)

Common Stock Share Repurchase Program

The Company may implement share repurchases through a variety of methods, including, but not limited to, open market purchases, accelerated stock repurchase programs and structured repurchase transactions. The extent to which the Company may repurchase its outstanding common stock and the timing of such repurchases will depend upon its financial condition, results of operations, capital requirements, prevailing market conditions, alternative uses of capital and other factors.

The Company has a common stock share repurchase program (the "Repurchase Program") which permits the discretionary repurchase of its common stock. Since its inception in the first quarter of 2011, the Board has authorized \$6.7 billion in share repurchases, including an increase in the Company's share repurchase authorization to \$1.5 billion on February 16, 2024. As of December 31, 2024, the Company has repurchased, in aggregate, \$5.6 billion of its outstanding common stock, at an average price of \$94.54 per share, excluding commissions and related fees, and has a remaining repurchase authorization of \$1.1 billion, which expires on December 31, 2026.

For the year ended December 31,	A Rep	Aggregate Cash paid for Repurchases ⁽¹⁾ Repurchases ^{(1), (2)}			Number of Shares	Average Price per Share ⁽¹⁾		
2024	\$	400.1	\$	416.7	3,578,167	\$	111.81	
2023	\$	313.1	\$	296.5	2,281,723	\$	137.21	
2022	\$	100.3	\$	100.3	763,309	\$	131.37	

Share repurchases are shown below (in millions, except for shares and per share amounts):

⁽¹⁾ Excludes excise tax and commissions

⁽²⁾ Includes \$16.6 million of 2023 share repurchases paid for in the first quarter of 2024

In addition to shares repurchased under the Repurchase Program described above, the Company classifies shares withheld from the settlement of the Company's restricted stock unit and performance share awards to cover tax withholding requirements as common stock held in treasury in the consolidated balance sheet.

Quarterly Dividend

In 2024, 2023 and 2022, the Board declared a quarterly cash dividend of \$0.77 per share of common stock in all quarters.

Dividends declared and paid are shown below (in millions):

For the year ended December 31,	2024	2023	2022		
Dividends declared	\$ 174.7	\$ 184.5	\$	186.2	
Dividends paid	\$ 173.7	\$ 181.9	\$	185.5	

Dividends payable on common shares to be distributed under the Company's stock-based compensation program will be paid when such common shares are distributed.

Comprehensive Income

Comprehensive income is defined as all changes in the Company's net assets except changes resulting from transactions with shareholders. It differs from net income in that certain items recorded in equity are included in comprehensive income.

Accumulated Other Comprehensive Loss

A summary of changes in accumulated other comprehensive loss, net of tax, is shown below (in millions):

For the year ended December 31,	2024	2023	2022
Defined benefit plans:			
Balance at beginning of year	\$ (107.3)	\$ (95.7)	\$ (199.4)
Reclassification adjustments (net of tax benefit (expense) of (\$1.5) million in 2024, \$0.2 million in 2023 and (\$1.0) million in 2022)	4.4	(1.0)	4.0
Other comprehensive income (loss) recognized during the period (net of tax benefit (expense) of (\$3.0) million in 2024, \$2.0 million in 2023 and (\$23.9) million in 2022)	11.8	(10.6)	99.7
Balance at end of year	\$ (91.1)	\$ (107.3)	\$ (95.7)
Derivative instruments and hedge activities:			
Balance at beginning of year	\$ 107.9	\$ 33.4	\$ (18.6)
Reclassification adjustments (net of tax benefit of \$20.0 million in 2024, \$35.1 million in 2023 and \$8.5 million in 2022)	(77.2)	(141.3)	(35.3)
Other comprehensive income (loss) recognized during the period (net of tax benefit (expense) of \$41.1 million in 2024, (\$51.0) million in 2023 and (\$19.1) million in 2022)	(164.4)	215.8	87.3
Balance at end of year	\$ (133.7)	\$ 107.9	\$ 33.4
Currency translation adjustments:			
Balance at beginning of year	\$ (689.4)	\$ (742.8)	\$ (552.2)
Other comprehensive income (loss) recognized during the period (net of tax benefit (expense) of (\$1.7) million in 2024, \$1.2 million in 2023 and (\$4.7) million in 2022)	(219.5)	53.4	(190.6)
Balance at end of year	\$ (908.9)	\$ (689.4)	\$ (742.8)

For the years ended December 31, 2024, 2023 and 2022, other comprehensive income (loss) related to currency translation adjustments includes pretax losses related to intercompany transactions for which settlement is not planned or anticipated in the foreseeable future of \$0.6 million, \$0.1 million and \$2.6 million, respectively.

For the years ended December 31, 2024, 2023 and 2022, other comprehensive income (loss) related to currency translation adjustments also includes net investment hedge gains (losses) of \$8.2 million, (\$5.9) million and \$25.3 million, respectively.

(12) Stock-Based Compensation

As of November 9, 2009, the Company adopted the Lear Corporation 2009 Long-Term Stock Incentive Plan (as amended, the "2009 LTSIP"). The 2009 LTSIP reserved 11,815,748 shares of common stock for issuance under stock option, restricted stock, restricted stock unit, restricted unit, performance share, performance unit and stock appreciation right awards. As of May 16, 2019, the Company adopted the Lear Corporation 2019 Long-Term Stock Incentive Plan (the "2019 LTSIP," and together with the 2009 LTSIP, the "Plans"), after which no awards will be issued under the 2009 LTSIP. The 2019 LTSIP reserves 4,226,858 shares of common stock plus shares of common stock awarded under the 2009 LTSIP that are cancelled subsequent to May 16, 2019, for issuance under stock option, restricted stock, restricted stock unit, restricted unit, performance unit and stock appreciation right awards.

Under the Plans, the Company has granted restricted stock units, performance shares and stock options to certain of its employees, all of which generally vest in one to three years following the grant date. For the years ended December 31, 2024, 2023 and 2022, the Company recognized compensation expense related to these awards of \$62.8 million, \$65.8 million and \$50.3 million, respectively. Unrecognized compensation expense related to these awards of \$66.5 million will be recognized over the next 1.5 years on a weighted average basis. In accordance with the provisions of the awards, the Company withholds shares from the settlement of such awards to cover minimum statutory tax withholding requirements. The withheld shares are classified as common stock held in treasury in the accompanying consolidated balance sheets as of December 31, 2024 and 2023.

A summary of restricted stock units, performance shares and stock options for the year ended December 31, 2024, is shown below:

	Restricted Stock Units	Weighted Average Grant Date Fair Value	Performance Shares	Weighted Average Grant Date Fair Value	Stock Options	Weighted Average Grant Date Fair Value
Outstanding as of December 31, 2023	569,324	\$138.21	914,911	\$161.36	202,702	\$32.65
Granted	278,271	\$124.84	480,890	\$144.60	—	
Distributed (vested)	(153,920)		(125,823)		—	
Cancelled	(8,933)		(117,953)		_	
Outstanding as of December 31, 2024 ⁽¹⁾	684,742	\$130.12	1,152,025	\$151.84	202,702	\$32.65
Vested or expected to vest as of December 31, 2024	684,742		665,248		_	

⁽¹⁾Outstanding performance shares are reflected at the maximum possible payout that may be earned during the relevant performance periods.

The grant date fair value of restricted stock units is based on the share price on the grant date. The weighted average grant date fair value of restricted stock units granted in 2023 and 2022 was \$130.38 and \$164.57, respectively. The grant date fair value of performance shares is based on the share price on the grant date or a Monte Carlo simulation, as applicable. The weighted average grant date fair value of performance shares granted in 2023 and 2022 was \$138.54 and \$196.83, respectively. There were no stock options granted in 2023 or 2022.

(13) Legal and Other Contingencies

Legal and Other Contingencies

As of December 31, 2024 and 2023, the Company had recorded reserves for pending legal disputes, including commercial disputes, product liability claims and other legal matters, of \$13.2 million and \$13.5 million, respectively. Such reserves reflect amounts recognized in accordance with GAAP and typically exclude the cost of legal representation. Reserves for warranty and recall matters are recorded separately from legal reserves, as described below.

Commercial Disputes

The Company is involved from time to time in legal proceedings and claims, including, without limitation, commercial or contractual disputes with its customers, suppliers and competitors. These disputes vary in nature and are usually resolved by negotiations between the parties.

Product Liability, Warranty and Recall Matters

In the event that use of the Company's products results in, or is alleged to result in, bodily injury and/or property damage or other losses, the Company may be subject to product liability lawsuits and other claims. Such lawsuits generally seek compensatory damages, punitive damages and attorneys' fees and costs. In addition, if any of the Company's products are, or are alleged to be, defective, the Company may be required or requested by its customers to support warranty costs or to participate in a recall or other corrective action involving such products. Certain of the Company's customers have asserted claims against the Company for costs related to recalls or other corrective actions involving its products. The Company can provide no assurances that it will not experience material claims in the future or that it will not incur significant costs to defend such claims.

The Company is party to agreements with certain of its customers, whereby these customers may pursue claims against the Company for contribution of all or a portion of the amounts sought in connection with warranty and recall matters.

In certain instances, allegedly defective products may be supplied by the Company's suppliers. The Company may seek recovery from its suppliers of materials or services included within the Company's products that are associated with product liability claims or warranty and recall matters. The Company carries insurance for certain legal matters, including product liability claims, but such coverage may be limited. The Company does not maintain insurance for warranty and recall matters.

The Company records reserves for warranty and recall matters when liability is probable and related amounts are reasonably estimable.

A summary of the changes in reserves for warranty and recall matters for each of the periods in the two years ended December 31, 2024, is shown below (in millions):

Balance as of December 31, 2022	\$ 30.4
Expense, net (including changes in estimates)	9.5
Settlements	(13.2)
Foreign currency translation and other	5.7
Balance as of December 31, 2023	32.4
Expense, net (including changes in estimates)	6.3
Settlements	(13.0)
Foreign currency translation and other	1.6
Balance as of December 31, 2024	\$ 27.3

Environmental Matters

The Company is subject to local, state, federal and foreign laws, regulations and ordinances which govern activities or operations that may have or have had adverse environmental effects. These regulations impose liability for clean-up costs resulting from past spills, disposals or other releases of hazardous wastes and environmental compliance. The Company's policy is to comply with all applicable environmental laws and to maintain an environmental management program based on ISO 14001 to ensure compliance with this standard. However, the Company currently is, has been and in the future may become the subject of formal or informal enforcement actions or procedures.

As of December 31, 2024 and 2023, the Company had recorded environmental reserves of \$4.9 million. The Company does not believe that the environmental liabilities associated with its current and former properties will have a material adverse impact on its business, financial condition, results of operations or cash flows; however, no assurances can be given in this regard.

Other Matters

The Company is involved from time to time in various other legal proceedings and claims, including, without limitation, intellectual property matters, tax claims and employment matters. Although the outcome of any legal matter cannot be predicted with certainty, the Company does not believe that any of the other legal proceedings or claims in which the Company is currently involved, either individually or in the aggregate, will have a material adverse impact on its business, financial condition, results of operations or cash flows. However, no assurances can be given in this regard.

Although the Company records reserves for legal disputes, warranty and recall matters, and environmental and other matters in accordance with GAAP, the ultimate outcomes of these matters are inherently uncertain. Actual results may differ significantly from current estimates.

Insurance Recoveries

The Company incurred losses and incremental costs related to the destruction of assets caused by a typhoon in the Philippines in December 2021. In 2022 and 2023, the Company reached an installment settlement and a final settlement, respectively, for the recovery of such costs under applicable insurance policies. Anticipated proceeds from insurance recoveries related to losses and incremental costs that have been incurred ("loss recoveries") are recognized when receipt is probable. Anticipated proceeds from insurance recoveries in excess of the net book value of destroyed property, plant and equipment ("insurance gain contingencies") are recognized when all contingencies related to the claim have been resolved. Loss recoveries related to the destruction of inventory and incremental costs are included in costs of sales and loss recoveries and insurance gain contingencies related to the destruction of property, plant and equipment are included in other expense, net. Cash proceeds related to the destruction of property, plant and equipment are included in cash flows from operating activities and cash proceeds related to the destruction of property, plant and equipment are included in cash flows from investing activities.

As of December 31, 2023, the Company had incurred cumulative losses and incremental costs of \$27.1 million and received cumulative cash proceeds of \$22.6 million related to the typhoon.

The classification of insurance recoveries included in the accompanying consolidated financial statements is shown below (in millions):

For the year ended December 31,	2023	2022
Consolidated statements of income		
Cost of sales	\$ 3.9 \$	13.3
Other expense, net	4.0	1.4
Consolidated statements of cash flows		
Cash flows from operating activities	8.2	12.8
Cash flows from investing activities	1.1	0.5

Employees

Approximately 47% of the Company's employees are members of industrial trade unions and are employed under the terms of various labor agreements. Labor agreements covering approximately 84% of the Company's global unionized workforce of approximately 81,500 employees (including labor agreements in the United States and Canada covering approximately 5% of the Company's global unionized workforce) are scheduled to expire in 2025. Management does not anticipate any significant difficulties with respect to the renewal of these agreements.

(14) Segment Reporting

(1) Tangible long-lived assets include property, plant and equipment and right-of-use assets.

A summary of revenues from major customers is shown below:

For the year ended December 31,	2024	2023	2022
General Motors	21.8%	19.8%	20.2%
Ford	11.1%	11.4%	13.5%
Volkswagen	10.5%	11.0%	10.8%
Mercedes-Benz	10.5%	10.4%	11.3%
Stellantis	8.6%	10.2%	10.3%

(15) Financial Instruments

Debt Instruments

The carrying values of the Notes vary from their fair values. The fair values of the Notes were determined by reference to the quoted market prices of these securities (Level 2 input based on the GAAP fair value hierarchy). The carrying value of the Term Loan approximates its fair value (Level 3 input based on the GAAP fair value hierarchy). The estimated fair value, as well as the carrying value, of the Company's debt instruments are shown below (in millions):

December 31,	2024	2023
Estimated aggregate fair value ⁽¹⁾	\$ 2,373.2	\$ 2,464.5
Aggregate carrying value ⁽¹⁾⁽²⁾	2,700.0	2,750.0

(1) Excludes "other" debt.

⁽²⁾ Excludes the impact of unamortized debt issuance costs and unamortized original issue premium (discount).

Cash, Cash Equivalents and Restricted Cash

The Company has cash on deposit that is legally restricted as to use or withdrawal. A reconciliation of cash and cash equivalents reported on the accompanying consolidated balance sheets to cash, cash equivalents and restricted cash reported on the accompanying consolidated statements of cash flows is shown below (in millions):

December 31,	2024	2023	2022
Balance sheet — cash and cash equivalents	\$ 1,052.9	\$ 1,196.3	\$ 1,114.9
Restricted cash included in other current assets	0.8	0.6	0.3
Restricted cash included in other long-term assets	1.7	1.6	2.2
Statement of cash flows — cash, cash equivalents and restricted cash	\$ 1,055.4	\$ 1,198.5	\$ 1,117.4

Marketable Equity Securities

Marketable equity securities, which the Company accounts for under the fair value option, are included in the accompanying consolidated balance sheets as shown below (in millions):

December 31,	2024	2023
Other current assets	\$ 6.6	\$ 4.8
Other long-term assets	82.6	68.5
	\$ 89.2	\$ 73.3

Unrealized gains and losses arising from changes in the fair value of the marketable equity securities are recognized in other expense, net in the accompanying consolidated statements of income. The fair value of the marketable equity securities is determined by reference to quoted market prices in active markets (Level 1 input based on the GAAP fair value hierarchy).

Equity Securities Without Readily Determinable Fair Values

As of December 31, 2024 and 2023, investments in equity securities without readily determinable fair values of \$11.2 million are included in other long-term assets in the accompanying consolidated balance sheets. Such investments are valued at cost, less cumulative impairments and adjusted for changes resulting from observable, orderly transactions for identical or similar securities. For the year ended December 31, 2023, the Company recognized impairment charges of \$7.0 million related to certain investments. Investments in equity securities without readily determinable fair values have been reduced for cumulative impairments of \$17.0 million as of December 31, 2024 and 2023.

Derivative Instruments and Hedging Activities

Foreign Exchange

The Company uses forwards, swaps and other derivative contracts to reduce the effects of fluctuations in foreign exchange rates on known foreign currency exposures. Gains and losses on the derivative instruments are intended to offset gains and losses on the hedged transaction in an effort to reduce exposure to fluctuations in foreign exchange rates. The principal currencies hedged

by the Company include the Mexican peso, various European currencies, the Philippine peso, the Japanese yen, the Brazilian real and the Canadian dollar.

Foreign currency derivative contracts not designated as hedging instruments consist principally of hedges of cash transactions, intercompany loans and certain other balance sheet exposures.

Net Investment Hedges

The Company uses cross-currency interest rate swaps which are designated as net investment hedges of the foreign currency rate exposure of its investment in certain Euro-denominated subsidiaries. Contra interest expense on net investment hedges was \$2.3 million for the years ended December 31, 2024 and 2023, and \$4.6 million for the year ended December 31, 2022, and is included in interest expense, net in the accompanying consolidated statements of income.

Balance Sheet Classification

The notional amount, estimated aggregate fair value and related balance sheet classification of the Company's foreign currency and net investment hedge contracts are shown below (in millions, except for maturities):

December 31,	2024	2023
Fair value of foreign currency contracts designated as cash flow hedges:		
Other current assets	\$ 16.1	\$ 137.2
Other long-term assets	0.5	19.9
Other current liabilities	(105.4)	(1.8)
Other long-term liabilities	(61.6)	(0.5)
	 (150.4)	154.8
Notional amount	\$ 2,605.7	\$ 2,352.3
Outstanding maturities in months, not to exceed	36	24
Fair value of derivatives designated as net investment hedges:		
Other long-term assets	\$ 7.1	\$ —
Other long-term liabilities		(1.1)
	7.1	(1.1)
Notional amount	\$ 150.0	\$ 150.0
Outstanding maturities in months, not to exceed	15	27
Fair value of foreign currency contracts not designated as hedge instruments:		
Other current assets	\$ 2.3	\$ 5.8
Other current liabilities	(6.1)	(1.2)
	 (3.8)	4.6
Notional amount	\$ 481.7	\$ 569.9
Outstanding maturities in months, not to exceed	1	1
Total fair value	\$ (147.1)	\$ 158.3
Total notional amount	\$ 3,237.4	\$ 3,072.2

Lear Corporation and Subsidiaries Notes to Consolidated Financial Statements (continued)

Accumulated Other Comprehensive Loss — Derivative Instruments and Hedge Activities

Pretax amounts related to foreign currency contracts and net investment hedges that were recognized in and reclassified from accumulated other comprehensive loss are shown below (in millions):

For the year ended December 31,	2024	2023	2022
Gains (losses) recognized in accumulated other comprehensive loss:			
Foreign currency contracts	\$ (205.5) \$	266.8	5 106.4
Net investment hedges	 8.2	(5.9)	25.3
	(197.3)	260.9	131.7
(Gains) losses reclassified from accumulated other comprehensive loss to:			
Net sales	(4.1)	(1.9)	(12.4)
Cost of sales	(95.5)	(177.3)	(33.8)
Interest expense, net	2.4	2.4	2.4
Other expense, net		0.4	
	(97.2)	(176.4)	(43.8)
Comprehensive income (loss)	\$ (294.5) \$	84.5	8 87.9

As of December 31, 2024 and 2023, pretax net gains (losses) of (\$138.2) million and \$156.3 million, respectively, related to the Company's derivative instruments and hedge activities were recorded in accumulated other comprehensive loss.

During the next twelve month period, net losses expected to be reclassified into earnings are shown below (in millions):

Foreign currency contracts	\$ (89.3)
Interest rate swap contracts	(2.4)
Total	\$ (91.7)

Such losses will be reclassified at the time that the underlying hedged transactions are realized.

For the years ended December 31, 2024, 2023 and 2022, the Company recognized tax benefit (expense) of \$61.1 million, (\$15.9) million and (\$10.6) million, respectively, in other comprehensive income (loss) related to its derivative instruments and hedge activities.

Fair Value Measurements

GAAP provides that fair value is an exit price, defined as a market-based measurement that represents the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Fair value measurements are based on one or more of the following three valuation techniques:

- *Market:* This approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities.
- *Income:* This approach uses valuation techniques to convert future amounts to a single present value amount based on current market expectations.
 - *Cost:* This approach is based on the amount that would be required to replace the service capacity of an asset (replacement cost).

Further, GAAP prioritizes the inputs and assumptions used in the valuation techniques described above into a three-tier fair value hierarchy as follows:

- *Level 1:* Observable inputs, such as quoted market prices in active markets for identical assets or liabilities that are accessible at the measurement date.
- *Level 2:* Inputs, other than quoted market prices included in Level 1, that are observable either directly or indirectly for the asset or liability.
- *Level 3:* Unobservable inputs that reflect the entity's own assumptions about the exit price of the asset or liability. Unobservable inputs may be used if there is little or no market data for the asset or liability at the measurement date.

The Company discloses fair value measurements and the related valuation techniques and fair value hierarchy level for its assets and liabilities that are measured or disclosed at fair value.

Items Measured at Fair Value on a Recurring Basis

Fair value measurements and the related valuation techniques and fair value hierarchy level for the Company's assets and liabilities measured at fair value on a recurring basis as of December 31, 2024 and 2023, are shown below (in millions):

	Frequency	Asset (Liability)	Valuation Technique	Level 1	Level 2	Level 3
Foreign currency contracts, net	Recurring	\$ (154.2)	Market / Income	\$ —	\$ (154.2)	\$ —
Net investment hedges	Recurring	7.1	Market / Income		7.1	_
Marketable equity securities	Recurring	89.2	Market	89.2		

		December 31, 2023						
	Frequency	Asset (Liability)	Valuation Technique	Level 1	Level 2	Level 3		
Foreign currency contracts, net	Recurring	\$ 159.4	Market / Income	\$ —	\$ 159.4	\$ —		
Net investment hedges	Recurring	(1.1)	Market / Income		(1.1)			
Marketable equity securities	Recurring	73.3	Market	73.3	—			

The Company determines the fair value of its derivative contracts using quoted market prices to calculate the forward values and then discounts such forward values to the present value. The discount rates used are based on quoted bank deposit or swap interest rates. If a derivative contract is in a net liability position, the Company adjusts these discount rates, if required, by an estimate of the credit spread that would be applied by market participants purchasing these contracts from the Company's counterparties. If an estimate of the credit spread is required, the Company uses significant assumptions and factors other than quoted market rates, which would result in the classification of its derivative liabilities within Level 3 of the fair value hierarchy. As of December 31, 2024 and 2023, there were no derivative contracts that were classified within Level 3 of the fair value hierarchy. In addition, there were no transfers in or out of Level 3 of the fair value hierarchy during 2024 and 2023.

For further information on fair value measurements and the Company's defined benefit pension plan assets, see Note 9, "Pension and Other Postretirement Benefit Plans."

Items Measured at Fair Value on a Non-Recurring Basis

The Company measures certain assets and liabilities at fair value on a non-recurring basis, which are not included in the table above. As these non-recurring fair value measurements are generally determined using unobservable inputs, these fair value measurements are classified within Level 3 of the fair value hierarchy.

Assets held for sale

In 2024, as a result of a pending disposal of a non-core business (Note 2, "Summary of Significant Accounting Policies — Assets Held for Sale"), Level 3 fair value estimates related to the asset group held for sale are reflected in the accompanying consolidated balance sheet as of December 31, 2024. The fair value estimates of the related asset group were based on the estimated disposal price less costs to sell.

Acquisitions

In 2023, as a result of the acquisition of IGB (Note 3, "Acquisition"), Level 3 fair value estimates related to property, plant and equipment of \$46.8 million, developed technology and customer-based intangible assets of \$15.4 million and right-of-use assets of \$14.3 million are recorded in the accompanying consolidated balance sheets as of December 31, 2024 and 2023.

Fair value estimates of property, plant and equipment were based on independent appraisals, giving consideration to the highest and best use of the assets. Key assumptions used in the appraisals were based on a combination of market and cost approaches, as appropriate. Fair value estimates of developed technology intangible assets were based on a relief from royalty approach. Fair value estimates of customer-based intangible assets were based on the multi-period excess earnings method. Fair value estimates of right-of-use assets were based on a market approach.

Impairments

In 2024, 2023 and 2022, the Company completed impairment assessments related to certain fixed assets in conjunction with its restructuring (Note 4, "Restructuring") and other actions and recorded impairment charges of \$7.3 million, \$11.4 million and \$15.6 million, respectively. Impairment charges in 2022 include \$4.4 million related to the Company's assets in Russia discussed below. The fair value estimates of the related assets were based on management's estimates, using a discounted cash flow method.

In 2024, 2023 and 2022, the Company completed impairment assessments related to certain right-of-use assets in conjunction with its restructuring (Note 4, "Restructuring") and other actions and recorded impairment charges of \$3.2 million, \$10.9 million and \$13.5 million, respectively. Impairment charges in 2022 include \$7.0 million related to the Company's assets in Russia discussed below. The fair value estimates of the related assets were based on management's estimates, using a discounted cash flow method.

In 2023 and 2022, the Company completed impairment assessments related to certain of its intangible assets resulting from changes in the intended uses of such assets and recorded impairment charges of \$1.9 million and \$8.9 million, respectively. The fair value estimate of the related asset group was based on management's estimates, using a discounted cash flow method.

In 2022, the Company completed impairment assessments related to substantially all of its operating assets in Russia and recorded charges of \$19.4 million related to impairments of inventory, property, plant and equipment and right-of-use assets. The fair value estimates of the related assets were based on management's estimates, using a discounted cash flow method.

For further information related to impairment charges, see Note 2, "Summary of Significant Accounting Policies — Impairment of Long-Lived Assets," and Note 7, "Leases."

As of December 31, 2024 and 2023, there were no additional significant assets or liabilities measured at fair value on a non-recurring basis.

(16) Accounting Pronouncements

Accounting Standards Updates ("ASU") Issued But Not Yet Adopted:

ASU 2023-09 (issued December 2023), "Improvements to Income Tax Disclosures." The ASU requires disclosure of specific categories in the effective tax rate reconciliation, as well as additional information for reconciling items that meet a quantitative threshold. It also requires disclosure of income taxes paid, net of refunds, disaggregated by federal, state and foreign taxes, and further disaggregated by jurisdiction based on a quantitative threshold. The update is effective for fiscal years beginning after December 15, 2024, with early adoption permitted. The update is to be adopted prospectively; however, retrospective application is permitted. The ASU will modify the Company's financial statement disclosures but will not have a significant impact on its consolidated financial statements.

ASU 2024-03 (issued November 2024), "Disaggregation of Income Statement Expenses." The ASU requires the disaggregation of certain expenses presented on the face of the income statement in a tabular footnote disclosure. The expense categories include purchases of inventory, employee compensation, depreciation and amortization. It also requires the definition and disclosure of selling expense, a qualitative description of expense amounts not disaggregated and inclusion of existing expense disclosures within the same tabular footnote disclosure. The update is effective for fiscal years beginning after December 15, 2026, with early adoption permitted. The update is to be adopted prospectively; however, retrospective application is permitted. The ASU will modify the Company's financial statement disclosures but will not have a significant impact on its consolidated financial statements.

The Company considers the applicability and impact of all ASUs issued by the Financial Accounting Standards Board. Other recently issued accounting pronouncements are not expected to have a material impact or are not relevant to the Company's consolidated financial statements.

ITEM 9 – CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A – CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

The Company has evaluated, under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer along with the Company's Senior Vice President and Chief Financial Officer, the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this Report. The Company's disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Based on the evaluation described above, the Company's President and Chief Executive Officer along with the Company's Senior Vice President and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were achieved as of the end of the end of the period covered by this Report.

(b) Management's Annual Report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer along with the Company's Senior Vice President and Chief Financial Officer, the Company conducted an evaluation of the effectiveness of internal control over financial reporting based on the Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework). Based on this evaluation, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2024.

(c) Attestation Report of the Registered Public Accounting Firm

The attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting is set forth in Item 8, "Consolidated Financial Statements and Supplementary Data," under the caption "Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting" and incorporated herein by reference.

(d) Changes in Internal Control over Financial Reporting

There was no change in the Company's internal control over financial reporting that occurred during the fiscal quarter and year ended December 31, 2024, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B – OTHER INFORMATION

Rule 10b5-1 Trading Plan

During the three months ended December 31, 2024, no director or officer of the Company adopted or terminated a "Rule 10b5-1 trading arrangement," as each term is defined in item 408(a) of Regulation S-K.

ITEM 9C – DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10 – DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by Item 10 regarding our directors and corporate governance matters is incorporated by reference herein to the Proxy Statement sections entitled "Election of Directors" and "Directors and Corporate Governance." The information required by Item 10 regarding our executive officers appears as a supplementary item following Item 4 under Part I of this Report. The information required by Item 10 regarding compliance with Section 16(a) of the Securities Exchange Act of 1934, as amended, is incorporated by reference herein to the Proxy Statement section entitled "Directors and Corporate Governance."

Code of Ethics

We have adopted a Code of Business Conduct and Ethics that applies to our executive officers, including our Principal Executive Officer, our Principal Financial Officer and our Principal Accounting Officer, which can be found on our website at http://www.lear.com. We will post any amendment to or waiver from the provisions of the Code of Business Conduct and Ethics that applies to the executive officers above on the same website and will provide it to shareholders free of charge upon written request by contacting Lear Corporation at 21557 Telegraph Road, Southfield, Michigan 48033, Attention: Investor Relations.

Insider Trading Policy

We have adopted an Insider Trading Policy applicable to our directors, officers, certain other designated employees, and related persons and controlled entities of the foregoing that governs the purchase, sale and other dispositions of the Company's securities. While the Company is not subject to the Insider Trading Policy itself, the Company will not engage in transactions in its securities while aware of material nonpublic information. We believe that the Company's Insider Trading Policy is reasonably designed to promote compliance with insider trading laws, rules and regulations, and listing standards applicable to the Company. A copy of our Insider Trading Policy is filed as Exhibit 19 to this Annual Report on Form 10-K.

ITEM 11 – EXECUTIVE COMPENSATION

The information required by Item 11 is incorporated by reference herein to the Proxy Statement sections entitled "Directors and Corporate Governance — Director Compensation," "Compensation Discussion and Analysis," "Executive Compensation," "Compensation Committee Interlocks and Insider Participation" and "Compensation Committee Report." Notwithstanding anything indicating the contrary set forth in this Report, the "Compensation Committee Report" section of the Proxy Statement shall be deemed to be "furnished" not "filed" for purposes of the Securities Exchange Act of 1934, as amended.

ITEM 12 – SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Except as set forth herein, the information required by Item 12 is incorporated by reference herein to the Proxy Statement section entitled "Directors and Corporate Governance — Security Ownership of Certain Beneficial Owners, Directors and Management."
