Safe Harbor

The statements in this presentation that are not historical statements are forward-looking statements within the meaning of the federal securities laws. These statements are subject to numerous risks and uncertainties, many of which are beyond the company's control, which could cause actual results to differ materially from the results expressed or implied by the statements. These risks and uncertainties include, but are not limited to: changes in the demand for or price of oil and/or natural gas, including as a result of development of alternative energy sources, general economic conditions such as inflation and recession, the ability of the OPEC+ countries to agree on and comply with production quotas, and other causes; changes in capital spending by our customers; the modification, continuation or suspension of our shareholder return framework, including the payment of dividends and purchases of our stock, which will be subject to the discretion of our Board of Directors and may depend on a variety of factors, including our results of operations and financial condition, growth plans, capital requirements and other conditions existing when any payment or purchase decision is made; potential catastrophic events related to our operations, and related indemnification and insurance; protection of intellectual property rights; cyber-attacks and data security; compliance with environmental laws; changes in government regulations and regulatory requirements, particularly those related to oil and natural gas exploration, the environment, radioactive sources, explosives, chemicals, hydraulic fracturing services, and climate-related initiatives; assumptions regarding the generation of future taxable income, and compliance with laws related to and disputes with taxing authorities regarding income taxes; risks of international operations, including risks relating to unsettled political conditions, war, the effects of terrorism, foreign exchange rates and controls, international trade and regulatory controls and sanctions, and doing business with national oil companies; weather-related issues, including the effects of hurricanes and tropical storms; delays or failures by customers to make payments owed to us; infrastructure issues in the oil and natural gas industry; availability and cost of highly skilled labor and raw materials; completion of potential dispositions, and acquisitions and integration and success of acquired businesses and joint ventures. Halliburton's Form 10-K for the year ended December 31, 2024, recent Current Reports on Form 8-K and other Securities and Exchange Commission filings discuss some of the important risk factors identified that may affect Halliburton's business, results of operations, and financial condition. Halliburton undertakes no obligation to revise or update publicly any forward-looking statements for any reason.

Agenda

Company Overview

4

Strategic Priorities

8

- Deliver Profitable International Growth
- Maximize Value in North America
- Improve Capital Efficiency
- Accelerate Digital and Automation
- Advance Sustainable Energy Future

Halliburton Has Set its Key Strategic **Priorities**

Deliver industry-leading returns and strong free cash flow* for our shareholders

We have a clear sense of purpose – to help our customers satisfy the world’s need for the affordable and reliable energy provided by oil and gas – in a more effective, efficient, safe, and ethical manner – while minimizing environmental impact. We achieve that by:

Deliver Profitable International Growth

- The right global footprint
- Competitive technology portfolio
- Grow integrated offerings

Maximize Value in North America

- The leader in North America
- Integrated premium provider
- Differentiated technology portfolio

Accelerate Digital and Automation

- Leading software provider
- Automation of the value chain
- Drive internal efficiencies

Improve Capital Efficiency

- Structurally lower capital intensity
- Driven by advances in technology
- Strong free cash flow* generation

Advance Sustainable Energy Future

- Support decarbonizing our customers' production base
- Committed to science informed targets
- Advance clean energy solutions through Halliburton Labs

* See slide 27 for reconciliation of Cash Flows from Operating Activities to Free Cash Flow.

Deliver Profitable International Growth

*Balance growth with improved
margins and returns*

Profitable International Growth

Portfolio Strength Drives Market Outperformance

4Q 2024 Revenue

~60% of Halliburton’s 4Q 2024 revenue was generated internationally

International Revenue Performance

Leading Drilling Technology Platforms

iCruise®

Intelligent Rotary Steerable System

- High mechanical specifications enable faster drilling
- Modern electronics allow for accurate steering and improved reliability
- Automated drilling delivers predictable results

iStar™

Intelligent Drilling & Logging Platform

- Industry leading subsurface insights for better reservoir understanding
- Superior drilling performance
- Consistent well delivery

LOGIX®

Autonomous Drilling Platform

- Fully autonomous closed loop system, integrated with geo-steering
- Combines physics-based models and machine learning to drill wells autonomously, consistently, and on-target

Maximize Value in North America

Maximize free cash flow and returns on capital

Zeus™ Electric Fracturing System

Power System

- Grid Power Solutions
- Natural Gas Reciprocating Engines – VoltaGrid®

Patent Portfolio

- 50+ patents and applications

Performance

- Q10™ pump
- Over 4 years operating at scale
- Proven Service Quality
- All-Electric Location
- Robust Supply Chain

Sensori™ Fracture Monitoring Service

Unlocks additional value through adaptive frac designs

Monitoring at Scale

- Continuous subsurface feedback

Optimizes Fracture Effectiveness

- Controls fracture behavior and improves output predictability

Improves Asset Recovery

- Enables dynamic completion designs

Improve Capital Efficiency

Structurally lower capital intensity supports stronger free cash flow generation

Capital Efficiency

Lower Capital Intensity

CAPEX at 5-6% of revenue

- Equipment design enhancements
- New materials
- Higher asset velocity
- Digital technologies
- Changing portfolio mix

Strengthen FCF Profile

~\$1.9B average annual FCF*
(2021-2024)

* See slide 27 for reconciliation of Cash Flows from Operating Activities to Free Cash Flow.

Accelerate Digital and Automation

Transform the way we work to make a quantum leap in productivity

Digital

Operational foundations and solution offerings that further enable Halliburton's value proposition

Open Architecture Infrastructure

iEnergy®, AI, ML, Partnership

Collaboration, innovation, comprehensive solutions

Internal Processes

Workflows, Execution, Controls

Service delivery excellence and customer experience

Automation and Remote Operations

LOGIX® Well Construction OCTIV® Fracturing Intelevate™ Artificial Lift

Reliability, consistency and efficiency in operations

Software

DS365®

Asset performance

DecisionSpace[®]365 powered by iEnergy[®]

Subscription based suite of E&P cloud services

■ Subsurface

- Gain invaluable insights to reduce subsurface risk and uncertainty.

■ Reservoir and Production

- Optimize production and reservoir recovery.

■ Sustainability

- Provide tools for more effective carbon management.

■ Well Construction

- Plan, design and construct safe, cost effective, and productive wells.

■ Agile Field Management

- Optimal asset decisions to reduce exploration to production timeline.

■ DS365.ai

- Augment subsurface, drilling and production decisions with precision AI and ML.

Open architecture, plug and play solutions, with intelligent business processes for efficiency and data driven decisions.

Advance Sustainable Energy Future

Deliver affordable and reliable energy while lowering overall emissions

Commitments

Environmental

- Engage customers on the emissions reduction journey
- Develop low environmental impact solutions and technology
- Provide reliable and data-based approach to reduce emissions

Social

- Provide a diverse and inclusive environment for our employees
- Target to outperform our sector in HSE performance
- Progress our Journey To Zero initiatives

Governance

- Streamline our risk management
- Cultivate a sustainable supply chain
- Maintain qualified and diverse Board of Directors

Environmental Focus

Emissions Reduction Target: reduce Scope 1 and Scope 2 emissions by 40% by 2035 from our baseline year of 2018

- Standardize and operationalize GHG data capture
- Process and governance of emissions sources and calculation
- Emissions data quality assurance and reporting in our [Annual & Sustainability Report](#)
- Use data-based approach to reduce Halliburton's emissions and environmental impact
- Reduce customers' operational emissions by providing lower environmental impact solutions (ex. Zeus™ electric frac)
- Build on progressively achieving emissions target
- Customer-focused transition solutions
- Collaborate in carbon capture and storage and geothermal projects
- Halliburton Labs - clean energy accelerator program for early-stage companies

Financial Results

Fourth Quarter 2024

4Q24 Revenue Breakdown

Middle East/Asia

- 4Q24 revenue of \$1.6 billion, a 7% increase sequentially.
- Primarily driven by higher stimulation activity and increased fluid services in the Middle East, higher completion tool sales in Kuwait and the United Arab Emirates, and improved drilling services throughout Asia.
- Partially offset by decreased drilling services in the Middle East and lower fluid services in Asia.

North America

- 4Q24 revenue of \$2.2 billion, a 7% decrease sequentially.
- Primarily driven lower stimulation activity and decreased fluid services in U.S. land and Canada, along with lower wireline activity in U.S. land.
- Partially offset by increased fluid activities in the Gulf of Mexico, improved drilling services in U. S. land, and higher artificial lift activity and increased completion tool sales in the region..

Europe/Africa

- 4Q24 revenue of \$795 million, a %10 increase sequentially.
- Primarily driven by improved drilling-related services in the North Sea, as well as increased pressure pumping services and higher fluid services in Africa.
- Partially offset by lower cementing activity and decreased pipeline services in the North Sea and decreased drilling services in West Africa.

Latin America

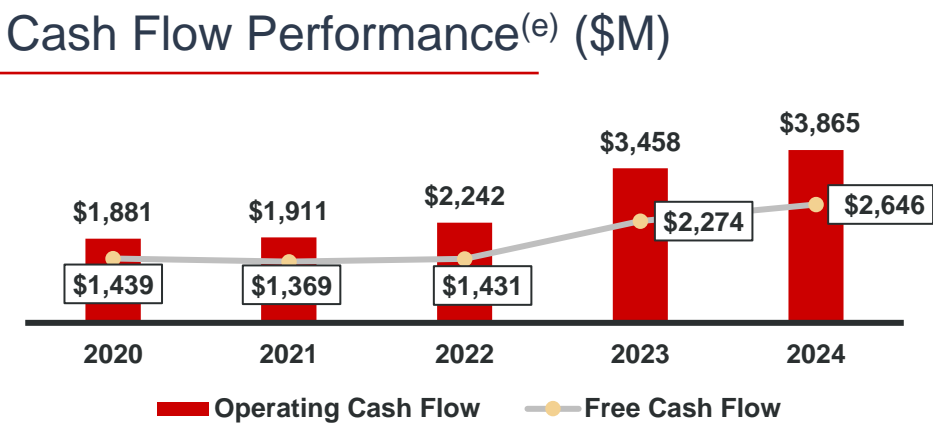

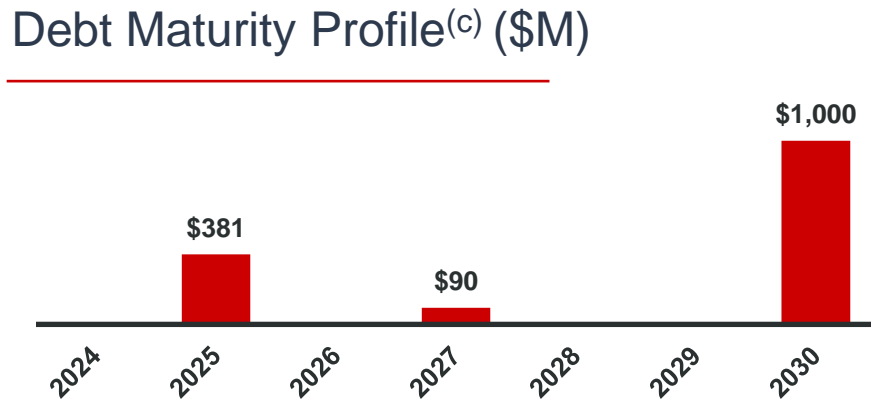

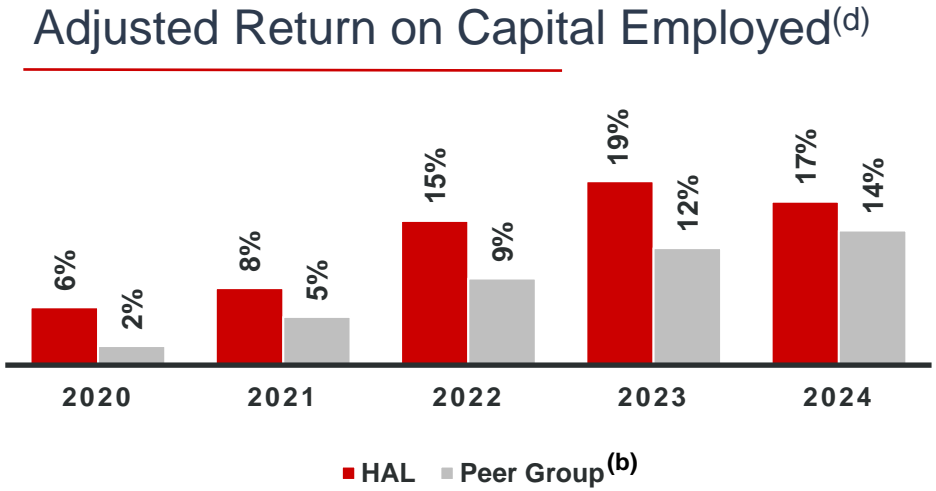

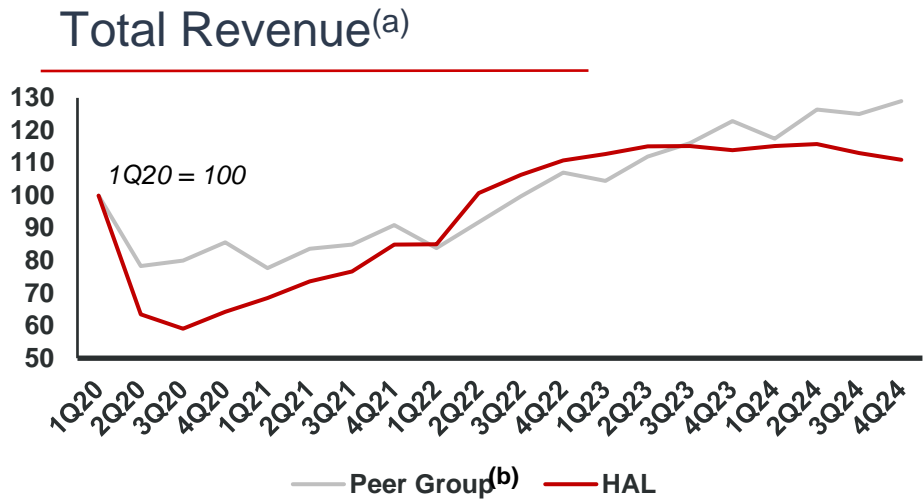

- 4Q24 revenue of \$953 million, a 9% decrease sequentially.
- Driven by lower activity across multiple product lines in Mexico and decreased pressure pumping services and lower wireline activity in Argentina.
- Partially offset by higher activity across multiple product lines in Brazil and increased fluid services in Argentina and the Caribbean.

Financial Metrics

(a) Company and peer group revenue is indexed to 100 for Q1 2020.
(b) Peer Group includes SLB and Baker Hughes Company. Data for peers is from published financial documents.
(c) As of December 31st, 2024, par value of total debt outstanding beyond 2030 is \$6,132MM.
(d) Excludes certain charges. Average capital employed is a statistical mean of the combined values of debt and shareholders' equity for the beginning and end of the period. Adjusted ROCE is calculated as: "Adjusted operating profit, net of taxes" divided by "Adjusted average capital employed." Adjusted ROCE is a non-GAAP measure; see slide 28 for reconciliation of our Net Income to Return on Capital Employed and Adjusted Return on Capital Employed.
(e) See slide 27 for reconciliation of Cash Flows from Operating Activities to Free Cash Flow.

Reconciliation of Cash Flows from Operating Activities to Free Cash Flow

(\$millions)	2021	2022	2023	2024
Total cash flows provided by operating activities	\$1,911	\$2,242	\$3,458	\$3,865
Capital expenditures	(799)	(1,011)	(1,379)	(1,442)
Proceeds from sales of property, plant, and equipment	257	200	195	223
Free cash flow (a)	\$1,369	\$1,431	\$2,274	\$2,646

- (a) Free Cash Flow is a non-GAAP financial measure which is calculated as “Total cash flows provided by operating activities” less “Capital expenditures” plus “Proceeds from sales of property, plant, and equipment.” Management believes that Free Cash Flow is a key measure to assess liquidity of the business and is consistent with the disclosures of Halliburton's direct, large-cap competitors.

Reconciliation of Net Income to ROCE and Adjusted ROCE

(\$millions)	2020	2021	2022	2023	2024
Net income (loss) attributable to company	(\$2,945)	\$1,457	\$1,572	\$2,638	\$2,501
Interest expense, net of taxes	650	407	404	378	350
Operating profit (loss), net of taxes (b)	(\$2,295)	\$1,864	\$1,976	\$3,016	\$2,851
Adjustments, net of taxes (d)	3,521	(492)	384	189	143
Adjusted operating profit, net of taxes (d)	\$1,226	\$1,372	\$2,360	\$3,205	\$2,993
Average capital employed (c)	\$16,571	\$15,320	\$15,858	\$16,451	\$17,537
Average adjustments, net of taxes (e)	2,868	1,515	(54)	287	166
Adjusted average capital employed (e)	\$19,439	\$16,835	\$15,804	\$16,738	\$17,703
ROCE (a)	(14%)	12%	12%	18%	16%
Adjusted ROCE (f)	6%	8%	15%	19%	17%

- (a) Management believes that net income (loss) attributable to the company adjusted for "Interest expense, net of taxes" is useful to investors to assess and understand operating performance, especially when comparing results with previous and subsequent periods or forecasting performance for future periods, primarily because management views this expense to be outside of the company's normal operating results. Management analyzes net income (loss) without the impact of this expense as an indicator of performance, to identify underlying trends in the business, and to establish operational goals. Return on capital employed (ROCE) is a non-GAAP financial measure Halliburton uses to determine how efficiently it uses capital to generate profits. ROCE is calculated as: "Operating profit (loss), net of taxes" divided by "Average capital employed."
- (b) Operating profit (loss), net of taxes is calculated as: "Net income (loss) attributable to company" plus "Interest expense, net of taxes."
- (c) Average capital employed is a statistical mean of the combined values of debt and shareholders' equity for the beginning and end of the period.
- (d) Adjusted operating profit, net of taxes is calculated as: "Operating profit (loss), net of taxes" plus "Adjustments, net of taxes." "Adjustments, net of taxes" are items comprising impairments and other charges, please see our year end earnings release for details on the adjustments for each period.
- (e) Adjusted average capital employed is calculated as "Average capital employed" plus "Average Adjustments, net of taxes." "Average adjustments, net of taxes" is calculated as the sum of the average of "Adjustments, net of taxes" at the beginning and end of the respective period.
- (f) Adjusted ROCE is calculated as: "Adjusted operating profit, net of taxes" divided by "Adjusted average capital employed."

Capital Returns

Shareholder Returns

Announced Capital Return Framework

At Least
50%

of Annual Free Cash Flow^a returned to
shareholders going forward

Form of Distribution

Dividends

- Increased dividend to \$0.17 / share in Q1 2024

Share Repurchases

- Repurchased ~\$800M of securities in 2023^b
- Repurchased ~\$1B of securities in 2024^c
- ~\$3.0 billion repurchase authorization remaining^d

a) See slide 27 for reconciliation of Cash Flows from Operating Activities to Free Cash Flow.

b) Repurchased ~22.7M shares.

c) Repurchased ~30.5M shares.

d) As of December 31st, 2024.

Why Halliburton

Only integrated services company with a strong presence in both North America and International markets

Strong culture of execution

Differentiated technology to drive efficiency

Financial outperformance

Advancing a sustainable energy future

THANK YOU
