While hazardous waste handling operations at Xiangshui NU have been halted during the Reporting Year, its environmental and social data is still included in the reporting scope. As such, there are no major changes with the reporting boundary when compared with that for the period from 1 January 2023 to 31 December 2023 (the “**Last Reporting Period**”).

儘管在本報告年度內，響水新宇的危險廢物處理業務已停止，但其環境及社會數據仍包括在報告範圍內。因此，匯報範圍與二零二三年一月一日至二零二三年十二月三十一日期間(「**上個報告期間**」)相比並無重大變化。

* Industrial waste, regulated medical waste, and other hazardous waste, hereinafter “solid waste”, refers to hazardous waste treated by Zhenjiang New Universe, Yancheng NUHF, Xiangshui NU, and Suqian New Universe, together as the “solid waste treatment operations”.

* 工業廢物、受管制醫療廢物及其他危險廢物，以下簡稱「**固體廢物**」，是指由鎮江新宇、鹽城新宇輝豐、響水新宇及宿遷宇新所處理的危險廢物，統稱「**固體廢物處理業務**」。

^ Industrial wastewater and industrial sludge, hereinafter “wastewater”, refers to electroplating wastewater discharged from manufacturing clients within the Eco-plating Specialised Zone and treated by the Group-operated centralised sewage and sludge treatment plant in the Zone.

^ 工業廢水及工業污泥，以下簡稱「**廢水**」，指環保電鍍專區內製造業客戶排放的電鍍廢水，並由本集團在園區內營運的集中式污水及污泥處理廠處置。

+ While treatment volume of wastewater has increased, treatment volume of sludge has reduced significantly in 2024. This is due to stricter regulations on pollutant content of wastewater at the source, thus leading to reduced generation of industrial sludge from the increased treatment volume of industrial wastewater.

+ 儘管廢水處理量增加，但二零二四年的污泥處理量大幅減少。此乃由於源頭對廢水污染物含量的規定更為嚴格，從而導致工業廢水處理量增加而產生的工業污泥減少。

The treatment volume of wastewater in 2022 was reduced significantly as affected by the overall economic situation.

受整體經濟形勢的影響，廢水的處理量於二零二二年大幅減少。

6 ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT 2024 二零二四年環境、社會及管治報告

At the economic level, the Group is committed to enhancing investment returns and safeguarding shareholder interests, while also focusing on long-term value creation to avoid the detrimental effects of short-term profit-seeking behaviours on sustainable development. On the environmental front, the Group will continue to increase investments in environmental protection, ensure compliance in hazardous waste management, promote energy conservation and emission reduction, and actively explore the use of renewable energy to minimize negative environmental impacts. In social aspects, the Group is dedicated to protecting employee rights, providing a positive work environment and development opportunities, actively participating in community building, and fulfilling its social responsibilities.

Sustainability Governance Structure

The board of directors (the “**Board**”) provides strategic direction on material ESG issues and oversees their implementation at the operation level. The management of ESG and climate-related issues has been integrated into the Group’s existing board committees and personnel. To facilitate an effective governance of ESG issues, the Group has set up the ESG Committee as of 18 May 2023.

The Chairman of the Audit Committee serves as the Chairman of the ESG Committee, which the Group believes shall allow for better correlation of ESG KPIs with financial KPIs. In addition, the ESG Committee also consists of directors, officers and employees of the Group from various disciplines, including, but not limited to human resources and communications, finance, legal, waste treatment and disposal management of all key project companies operating in Mainland China and environmental management of the Eco-plating Specialised Zone in the Jiangsu Province. The ESG Committee holds meetings at least once a year and at other times as determined by the chair of the ESG Committee.

Furthermore, senior management has implemented various monitoring measures through the Company’s subsidiaries, including a greenhouse gas emission monitoring system to track carbon emissions across business operations in real time, and an energy management system to monitor energy efficiency. These measures are integrated with other internal functions, such as collaborating with the finance department to incorporate climate-related costs (e.g., carbon emission fines, energy-saving investments) into financial planning, and working with operations to optimize production processes and supply chain management based on climate risk assessments.

在經濟層面上，本集團致力於提高投資回報，維護股東利益，同時注重長期價值創造，避免短期逐利行為對可持續發展造成不利影響。在環境方面，本集團將繼續加大環保投入，確保危險廢物管理合規，推動節能減排，並積極探索使用可再生能源，將對環境的負面影響減至最低。在社會方面，本集團致力於保障僱員權益，提供良好的工作環境和發展機會，積極參與社區建設，履行社會責任。

可持續管治架構

董事會（「**董事會**」）就重大的環境、社會及管治事宜提供戰略指導，並監督其在運營層面的實施。對環境、社會及管治和氣候相關問題的管理已被納入本集團現有的董事會委員會及人員。為促進對環境、社會及管治問題的有效治理，本集團已於截至二零二三年五月十八日成立ESG委員會。

審核委員會主席兼任ESG委員會主席，本集團認為此有助於連結環境、社會及管治關鍵績效指標與財務關鍵績效指標。此外，ESG委員會亦包括本集團各部門的董事、高級職員及員工，包括（但不限於）人力資源及溝通、財務、法律、在中國內地運營的所有主要項目公司的廢物處理及處置管理以及江蘇省環保電鍍專區的環境管理。ESG委員會每年至少舉行一次會議，而其他開會時間由ESG委員會主席決定。

此外，高級管理人員透過本公司的附屬公司實施各種監控措施，包括實時追蹤各業務運作的碳排放量的溫室氣體排放監控系統，以及監控能源效率的能源管理系統。這些措施與其他內部功能相結合，例如與財務部門合作，將與氣候相關的成本（如碳排放罰款、節能投資）納入財務規劃，並與營運部門合作，根據氣候風險評估優化生產流程和供應鏈管理。

During the Reporting Period, the job duties of the ESG Committee include assisting the senior management and the Board in:

- Skills and Competency Assessment:

The Board of Directors conducts regular internal self-assessments and collaborates with external professional institutions to evaluate the current board members' expertise in areas such as climate science, risk management, and sustainable finance. Additionally, through specialized personnel at the domestic project management company in Zhenjiang, the Board stays informed about industry trends and regulatory changes. A long-term talent development plan has been established, which includes inviting industry experts for training and encouraging board members to participate in relevant seminars and courses. This ensures that the Board is equipped to address evolving climate-related risks and opportunities in the future.

- Information Access:

The Board receives a monthly written briefing from the Group, summarizing updates on environmental and sustainability developments within the Group. Daily news digests from public relations firms are also provided to board members and senior executives, highlighting the latest climate-related risks and opportunities in the industry, including policy changes and research findings. A quarterly business review is conducted by the domestic management company, during which department heads provide detailed reports on climate-related risks. External experts are invited biannually for in-depth discussions and knowledge-sharing sessions. Furthermore, board members regularly attend industry summits and forums to stay updated on the latest developments.

- Considerations in Decision-Making:

When overseeing the strategies, major transaction decisions, and risk management procedures of the listed company, the Board incorporates climate-related risks and opportunities as key considerations. For new investment projects, an assessment of climate risks in the project's region is required, including the potential impact of extreme weather on project facilities and the long-term profitability implications of transition risks. In evaluating projects, the Board considers economic, environmental, and social benefits to ensure that projects achieve economic goals while effectively addressing climate-related risks.

在報告期間，ESG委員會的工作職責包括協助高級管理層和董事會進行以下工作：

- 技能和能力評估：

董事會定期進行內部自我評估，並與外部專業機構合作，以評估現任董事會成員在氣候科學、風險管理和可持續金融等領域的專業能力。此外，透過鎮江國內項目管理公司的專業人員，董事會持續了解產業趨勢與法規變更。我們制定了長期人才發展計劃，包括邀請行業專家進行培訓，並鼓勵董事會成員參加相關研討會和課程。這可確保董事會在未來有能力應對不斷變化的氣候相關風險和機遇。

- 資訊獲取：

董事會每月會收到本集團的書面簡報，總結本集團內環境和可持續發展的最新情況。董事會成員及高級主管也會收到由公關公司提供的每日新聞摘要，重點介紹業界最新的氣候相關風險與機會，包括政策變更與研究結果。國內管理公司每季會進行業務回顧，期間各部門主管會提供氣候相關風險的詳細報告。每半年邀請外部專家進行深入討論和知識分享。此外，董事會成員定期參加產業高峰會和論壇，以掌握最新發展。

- 決策考量：

董事會在監督上市公司的策略、重大交易決策及風險管理程序時，會將與氣候相關的風險及機遇列入重要考量。對於新投資項目，必須評估項目所在區域的氣候風險，包括極端天氣對項目設施的潛在影響，以及過渡風險對長期獲利能力的影響。在評估項目時，董事會會考慮經濟、環境及社會效益，以確保項目在達成經濟目標的同時，能有效解決氣候相關風險。

8 ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT 2024 二零二四年環境、社會及管治報告

- Goal Setting and Progress Monitoring:

Based on industry best practices and the Group's sustainable development strategy, the Board sets goals related to climate risks and opportunities. A target has been established to reduce the Group's overall greenhouse gas emission intensity by a certain percentage over the next five years. Progress toward these goals is monitored through quarterly reports from management on goal implementation, as well as through occasional on-site inspections and research. If progress lags, the Board promptly requests management to adjust strategies and action plans.

- Adjusting Supervision Focus and Resource Allocation:

The Group has been in a loss-making position in both Last Reporting Period and the Reporting Year. To maintain financial stability, the Board and the ESG Committee have implemented strategies such as limiting staff expansion and delaying production capacity increases. Priority is given to overseeing critical climate risk mitigation measures, while the frequency of supervision for some non-core businesses has been temporarily reduced. Under ongoing financial pressure, talent development plans have been adjusted to focus on cultivating climate experts closely aligned with core business operations.

Apart from the annual report of its performance and recommendations to the Board, the ESG Committee will evaluate its fulfilment of its responsibilities under the terms and references of the ESG Committee on an annual basis and report the findings to the Board.

The Board Statement

The Board of the Group holds both individual and collective responsibility for overseeing ESG matters, assessing ESG-related risks, and ensuring the implementation of effective risk management and internal control systems across the organization. To support its ESG initiatives, the Group collaborates with third-party consultants who provide guidance and assist in the development of ESG strategies. During the annual Board Meeting, the Board evaluates and prioritizes key ESG issues.

The management office of the Key Operations conducts monthly reviews of daily operations and communicates updates to the Board through bi-annual or quarterly meetings. These meetings include an evaluation of the Group's overall performance, with a particular focus on ESG performance and associated risks, followed by the development of actionable plans. The Board places a strong emphasis on accountability, compliance, internal controls, and corrective measures in addressing ESG concerns.

- 目標設定與進度監控：

董事會根據業界最佳實務與本集團的可持續發展策略，設定與氣候風險與機遇相關的目標，並訂定在未來五年內將本集團整體溫室氣體排放強度降低某個百分比的目標。這些目標的進度是透過管理層每季的目標執行報告，以及不定期的現場檢查和研究來監控。如果進度落後，董事會會立即要求管理層調整策略和行動計劃。

- 調整監督重點與資源分配：

本集團在上個報告期及本報告年度均處於虧損狀態。為維持財務穩定，董事會與ESG委員會已實施限制僱員擴張、延遲產能提升等策略。優先監督重要的氣候風險緩解措施，同時暫時減少對部分非核心業務的監督頻率。在持續的財務壓力下，已調整人才發展計劃，著重培養與核心業務運作密切相關的氣候專家。

除向董事會提交年度績效報告及建議外，ESG委員會亦將每年評估其在ESG委員會條款及職權範圍內的職責履行情況，並向董事會報告。

董事會聲明

本集團董事會個別及集體監督ESG事宜、評估ESG相關風險以及確保本集團內的風險管理及內部控制系統有效。為了支援其ESG計劃，本集團與第三方顧問合作，由他們提供指導並協助制定ESG策略。於年度董事會會議，董事會對主要ESG事宜進行評估並優先排序。

主要業務運作的管理辦公室每月審查日常業務運作，並通過半年或季度會議向董事會傳達最新消息。這些會議包括評估本集團的整體表現，尤其著重於ESG表現和相關風險，隨後制定可行計劃。董事會強調問責、合規、內部控制和整改，以解決ESG問題。

In alignment with sustainability principles, the Board embraces the Confucian philosophy of “family, nation, and the world”. In the context of sustainability, this translates to the Group’s commitment to fostering a safe and healthy working environment for its employees, advancing industrial practices to reduce emissions, and generating corporate value that contributes to the community in line with national environmental protection goals. The Board aspires to achieve its mission of promoting peace and prosperity through the collective efforts of the entire Group.

Additionally, the Group believes that the most practical approach to safeguarding public health involves the decomposition of substances harmful to human health and the treatment of hazardous materials in locations distant from densely populated urban areas. This strategy reflects the Group’s dedication to protecting citizens and upholding environmental responsibility.

The Group mainly invests in the collection and treatment of hazardous wastes, electroplating chemicals and wastewater. The Group’s investment in the environmental industry aligns with the national approach in achieving carbon peak and carbon neutrality. The Group also aims to achieve carbon neutrality by utilising renewable energy, researching for technological improvements for its treatment processes, and exploring means for carbon absorption and compensation.

Due to the overabundance and subsequently lower prices of waste treatment services, the Group continued to face tougher competition and business environments during the Reporting Year, and thus its business and turnover have dropped from the Last Reporting Period. Nevertheless, the Group recognises that sustainability is the key to resilience in difficult times, and endeavours to maintain its commitment to ESG performance. In its operations, the Group aims to strengthen remote decision-making management for its subsidiaries, proactively adapt to market changes, optimise business processes, and enhance operational efficiency. The Group shall continue monitoring its ESG KPIs, while also upgrading its equipment, minimising its energy waste, improving its technology, and lowering its emissions.

The Group continues to engage professionals in the fields of sustainability, risk management and auditing to perform annual evaluation and provide advice on the industrial trends. Performance review is conducted based on the KPIs and the ESG disclosures to the public. The Key Operations have set targets in emission, energy, water and waste reduction, which have been set separately since their client portfolios are diverse. The Board reviews the targets that were set, and monitors tracked performance to achieve continuous improvement in ESG performance.

為了與可持續發展原則保持一致，董事會奉行儒家的「齊家、治國、平天下」的理念。在可持續發展的前提下，本集團致力於為僱員創造安全健康的工作環境、推進工業減排，並按照國家環保目標創造企業價值以貢獻社會。董事會希望通過整個集團的群策群力，實現促進和平與繁榮的使命。

此外，本集團認為保障公眾健康最實際的方法是在遠離人口稠密的城市地區分解對人體健康有害的物質和處理有害物質。此策略反映了本集團致力於保護公民和維護環境責任的決心。

本集團主要投資於收集和處理危險廢物、電鍍化學品及廢水。本集團在環保行業的投資與國家實現碳峰值和碳中和的方針一致。本集團亦旨在通過利用可再生能源、研究處理過程的技術改進和探索碳吸收及補償的手段，實現碳中和。

由於廢物處理服務過剩及隨之而來的價格下降，本集團於報告年度持續面對更嚴峻的競爭及經營環境，故其業務及營業額較上個報告期間有所下降。儘管如此，本集團意識到可持續發展為於困難時期保持韌性的關鍵，並致力保持對環境、社會及管治表現的承諾。在營運方面，本集團的目標是加強附屬公司的遠端決策管理，主動適應市場變化，優化業務流程，提高營運效率。本集團將持續監控其環境、社會及管治關鍵績效指標，同時更新設備、減少能源浪費、改善技術及降低排放。

本集團繼續聘請可持續發展、風險管理及審計領域的專業人士進行年度評估，並就行業趨勢提供建議。績效評估乃根據關鍵績效指標及對公眾披露環境、社會及管治事宜。主要業務運作已制定減排、節能、節水及減廢方面的目標。由於主要業務運作的客戶組合各不相同，其分別定立獨立目標。董事會對所設定的目標進行審查，並對所追蹤的績效進行監測，以實現環境、社會及管治績效的持續改善。

10 ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT 2024 二零二四年環境、社會及管治報告

In recent years, Jiangsu Province of the People's Republic of China ("PRC"), where the Group's main business is located, has focused on pollution control and carbon reduction, green transformation of economic and social development, and improving the quality of the ecological environment. The Group's primary goal is to:

1. ensure that the Key Operations adhere to the national environmental protection policy;
2. bring together internal and external human resources to improve the Group's treatment technology and its management's capabilities; and
3. in addition to meeting profit targets, allocate more resources on environmental protection, occupational health and safety, and the contribution to the society.

To achieve these goals, the Group has formulated the following strategies. In terms of risk management, the Board will enhance the ESG risk identification and assessment mechanisms and develop contingency plans. In policy formulation, the Board will stay abreast of environmental regulations and continuously refine internal environmental, social, and governance policies. Regarding financial planning, the Board will establish a dedicated fund to support environmental projects and technology research and development, optimize resource allocation, and ensure that financial investments align with the ESG strategy.

This statement represents the collective opinion of the Board and aims to guide the Group toward sustainable development.

Stakeholder Engagement and Materiality

Stakeholder Engagement

2. 彙集內部及外部的人力資源，提高本集團的處理技術及管理能力；及
3. 在完成利潤目標之餘，在環保、職安健及對社會貢獻方面分配更多資源。

為達成上述目標，本集團已制定下列策略。在風險管理方面，董事會將強化ESG風險識別與評估機制，並制定應變計劃。在政策制定方面，董事會將緊貼環保法規，持續完善內部環境、社會及治理政策。在財務規劃方面，董事會將設立專用基金，支援環保項目與技術研發，優化資源配置，確保財務投資符合ESG策略。

本聲明代表董事會的集體意見，旨在引導本集團朝可持續發展的方向邁進。

Through treating hazardous waste, the Group takes a role in lessening the burden of the industrial and medical industry on the environment. Local governments and surrounding communities are assisted by the Group in vigorously handling and treating waste that would otherwise pose threats to the environment. During the Reporting Year, the Group helped treat over 105,000 tonnes of hazardous medical and industrial solid waste, and over 501,000 m³ of wastewater and sludge. Contributing to the alleviation of hazardous waste stress in a responsible way, thus, is how the Group helps reduce environmental impacts.

Having said that, the operations of the Group may still impose risks on the environment or public health if the Group is not rigorous enough in handling such waste. For example, water bodies, lands, and the air may be contaminated if there is leakage of wastewater, air pollutants, chemical or other hazardous wastes. Thus, to minimise the Key Operations' impacts on the environment and natural resources, environmental management objectives and targets are annually updated in accordance with the latest environmental laws and regulations. Implementation of management systems on personnel responsibility on pollution prevention and monitoring system on material environmental factors and activities are also regularly reviewed. Apart from avoiding leakage of hazardous wastes, the Group also actively pays effort in controlling its flue gas emission. It carries out round the clock online measures of its emissions at chimneys and takes immediate action in case the emissions level reaches an alarming level. This minimises the negative impacts that the operations could cause to the environment and makes the emissions far lower than the national standard.

As at the end of the Reporting Year, the Environmental Protection Bureau, China, had licensed the solid waste treatment operations to treat and handle about 39 categories of industrial and medical waste categorised as national hazardous waste. The annual capacity permitted was as follows:

本集團藉著處理危險廢物，擔當減輕工業及醫療行業對環境所造成負擔的角色。本集團協助地方政府及週邊社區嚴格處理及處置會對環境造成威脅的廢物。於報告年度內，本集團協助處理超過105,000噸的危險醫療及工業固體廢物，以及超過501,000立方米的廢水及污泥。因此，以負責任的方式在緩解危險廢物壓力方面作出貢獻，是本集團幫助降低環境影響的方法。

然而，倘本集團在處理廢物時未夠嚴格，則本集團的業務仍可能對環境或公共健康帶來風險。例如，倘廢水、空氣污染物、化學或其他危險廢物洩漏，水體、土地及空氣可能會被污染。因此，為盡量減低主要業務運作對環境及天然資源的影響，本集團每年根據最新的環保法律及規例更新其環境管理宗旨及目標，並定期檢討人員防止污染責任管理體系及重大環境因素及活動監測系統的執行情況。除避免危險廢物洩漏外，本集團亦積極努力控制煙氣的排放。本集團進行全天候在線測量煙肉的廢氣排放量，並在排放量達到警誡水平的情况下即時採取行動。此舉減低制營運可能對環境造成的不利影響，並使本集團的排放量遠低於國家標準。

於報告年度末，中國環境保護部頒發固定廢物處理的經營許可證，可處置及處理約39種歸類為國家危險廢物類別的工業及醫療廢物。本集團獲許可的年處置能力如下：

18 ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT 2024 二零二四年環境、社會及管治報告

Since January 2012, Zhenjiang Sinotech has signed a solar power supply contract with a solar power supplier to provide on-site area for installation of photovoltaic panels and purchase solar energy generated for public facilities at the Eco-Plating Specialised Zone. The solar energy was used to power up public lightings, firefighting systems and the lifts at the Eco-Plating Specialised Zone. During the Reporting Year, 608,913 kWh of solar energy was purchased by Zhenjiang Sinotech, which accounted for 21% of its total electricity consumption.

自二零一二年一月以來，鎮江華科與一家太陽能供應商簽訂太陽能供電合同，提供現場安裝光伏板，並購買所產生的太陽能用於環保電鍍專區的公共設施。太陽能用作環保電鍍專區的公共照明、消防系統和電梯供電。在報告年度，鎮江華科購買608,913千瓦時太陽能，佔總耗電量21%。

Waste Handling and Reduction

The Key Operations continue to adopt various measure in order to properly handle and reduce waste.

廢物處理及減排

主要業務運作繼續採取各種措施，以妥善處理及減廢。

Hazardous Waste <ul style="list-style-type: none">• Collects, stores, and handles waste by their categories to ensure that there is no cross contamination• 3 core principles to reduce waste: source reduction, toxicity elimination, and recycling	危險廢物 <ul style="list-style-type: none">• 按類別收集、儲存及處理廢物，以確保杜絕交叉污染• 減少廢物的3個核心原則：源頭減廢、毒性消除及循環利用

During the Reporting Year, the following targets have been reviewed by the Board and the management. 於報告年度內，董事會及管理層已審閱下列目標。

TARGET INDICATOR 目標指標	BASELINE 基準線	TARGET 目標	PROGRESS REVIEW 進度檢討	TARGET STATUS 目標狀況
HAZARDOUS WASTE GENERATION 危險廢物產量	6,381.41 tonnes (Baseline data in 2021) 6,381.41噸(二零二一年基線數據)	Achieve 5% hazardous waste reduction at Zhenjiang New Universe 鎮江新宇實現危險廢物減排5%	The hazardous waste generated during the Reporting Year was 8,239.53 tonnes, which increased by 29% when compared to baseline data. 報告年度內產生的危險廢物為8,239.53噸，與基線數據相比增加29%。	Not achieved in 2024 due to an increased treatment volume and change of composition of the wastes treated 由於處理量的增加及所處理廢物成分改變而未能於二零二四年達成

WASTEWATER POLLUTANTS 廢水污染物	10.54 tonnes (Baseline data in 2022) 10.54噸(二零二二年基線數據)	Reduce pollutants within wastewater discharge at Zhenjiang Sinotech by 34% 鎮江華科的廢水排放中的污染物減少34%	The Group generated 9.89 tonnes of wastewater pollutants at Zhenjiang Sinotech during the Reporting Year, or a 6% reduction. 本集團於報告年度內在鎮江華科產生的廢水污染物為9.89噸，減少6%。	Not achieved in 2024 due to an increased treatment volume, however all wastewater pollutants are well below regulatory limits 由於處理量增加而未能於二零二四年達成，但所有廢水污染物均遠低於法規限制

[#] The solid waste at the Eco-Plating Specialised Zone within this target refers to the sludge generation. [#] 本目標所述之環保電鍍專區固體廢物指污泥產量。

In general, the targets have all been achieved except for the hazardous waste generation target set by Zhenjiang New Universe. The reason for not achieving the target was mainly due to the increased treatment volume and the change of composition of the wastes treated. They both contributed to an increase of hazardous waste generated by Zhenjiang New Universe during the Reporting Year when compared to baseline data.

As the Group has missed its hazardous waste generation reduction target for Zhenjiang New Universe over consecutive years, it has decided to revise the reduction target to better reflect the effectiveness of the Group’s waste reduction measures. Going forward, the Group shall aim to achieve 5% reduction in hazardous waste intensity at Zhenjiang New Universe in terms of kg hazardous waste per kWh energy consumption by 2030, using 2024 as the baseline year.

Energy Use Efficiency

The Key Operations of the Group regularly promote energy-saving initiatives throughout operating areas, enforcing good practices in terms of maintenance of plants and equipment for better efficiency and productivity. The principles of reduction, replacement, and recovery are upheld for efficiency improvement.

總括而言，除了鎮江新宇設定的危險廢物產生量目標，其他目標都已經達成。並未達成目標的原因主要是由於處理量的增加及所處理廢物成分改變。與基線數據相比，這兩方面均導致鎮江新宇在報告年度內產生的危險廢物增加。

由於本集團連續多年未能達到鎮江新宇的危險廢物產生量減量目標，故決定修訂減量目標，以更好地反映本集團減廢措施的成效。展望未來，本集團的目標是以二零二四年為基準年，於二零三零年前將鎮江新宇的危險廢物密度（以每千瓦時能源消耗產生的危險廢物公斤數計算）減少5%。

能源使用效率

本集團的主要業務運作定期於整個營運區域推廣節能措施，致力為機械及設備進行日常保養，從而提高效率及生產力。堅持減少、替換、回收的原則為改善效益。

The energy consumption target of Zhenjiang Sinotech has lagged behind progress due to a higher treatment volume during the Reporting Year. Zhenjiang Sinotech will continue to review the performance and discuss the necessity for adjusting the target in the next reporting year.

Water Use Efficiency

Water was mainly supplied by private water supply companies or industrial parks where the Key Operations of the Group are situated. There was no issue in sourcing water fit for purpose. Even though some of the Key Operations are situated in saline-alkaline areas, groundwater that comes from industrial parks' upper streams must first be treated to ensure compliance with standards before being used in the Key Operations. The Key Operations have provided clear instructions on water saving practice and shall continue to enforce water conservation measures in every major aspect in operations.

At all operations, water is reused whenever possible to maintain efficiency. For example, water used for cooling, steaming, and spraying would be recycled or recollected for repeated usage across facilities to help reduce freshwater consumption. Employees of the Group are also reminded to adopt water-saving practices. As stipulated in the latest environmental impact assessment, Zhenjiang Sinotech will reuse at least 30% of water to enhance water use efficiency and reduce wastage throughout all operation.

由於報告年度處理量增加，鎮江華科的能源消耗目標落後進度。鎮江華科將在下個報告年度繼續審查能源消耗表現並討論調整目標的必要性。

水資源使用效率

水主要由私營供水公司或本集團主要業務運作所在的工業園提供。並無求取適用水源的問題。儘管若干主要業務運作位於鹽鹼地，但來自工業園上游的地下水必須先經過處理，以確保符合標準，方能用於主要業務運作。主要業務運作已提供清晰的指示如何實踐節約用水，並將繼續於每個主要的營運環節落實節水措施。

所有業務盡可能重覆使用水資源以維持效率。例如，用於冷卻、蒸汽及噴灑的水會回收或再收集供不同設施重覆使用，以助減少消耗食水。本集團亦提醒僱員實踐節約用水理念。如最近的環境影響評估，鎮江華科將重用最少30%用水，以增強水資源使用效率，並減少所有業務產生的廢水。

To monitor the impacts of activities on the environment and natural resources, the Key Operations of the Group regularly engage qualified professionals to conduct environmental assessment and provide monitoring reports. Data measured include, surface water quality, groundwater quality, drinking water quality, soil quality, waste gas emission, wastewater discharge, residue content from incineration, and noise pollution, to ensure compliance with standards and emission limits.

Types of Emissions

During the Reporting Year, nitrogen oxides (“NO_x”), sulphur oxides (“SO_x”), and particulate matter (“PM”) were emitted from incinerators that consumed natural gas and Group-owned vehicles that consumed petrol and diesel (such as passenger cars, light goods vehicles, and other mobile machinery). The Group will continue taking steps in further decreasing the dependence on fossil fuels and reduce air emissions.

為監測業務對環境及天然資源造成的影響，本集團的主要業務運作定期聘請合資格專業人士進行環境評估及提交監測報告。測量的數據包括地表水質、地下水水質、飲用水水質、土壤質素、廢氣排放量、廢水排放量、焚燒殘渣成份及噪音污染量，以確保符合標準及排放限值。

排放物的種類

於報告年度內，消耗天然氣的焚燒設施及集團消耗汽油及柴油的自有車輛（例如載客車輛、輕型貨車及其他移動機械）排放出氮氧化物、硫氧化物及可吸入懸浮顆粒。本集團將繼續採取步驟進一步減低對化石燃料的依賴及減少廢氣排放。

大部分非危險廢物由合資格的廢物收集商收集，並送往附近的供應商進行焚化或填埋；其餘則送回本集團的廢物處理設施進行焚化。

Wastewater Discharge

The Group is aware of the environmental impacts of improper wastewater treatment and discharge. The Key Operations make sure their pipelines and facilities are protected with seepage and leakage prevention work, alongside regular monitoring over working procedures and relevant facilities, to prevent wastewater from negatively impacting the environment.

廢水排放

本集團知悉廢水處理及排放不當會造成環境影響。主要業務運作藉防滲防漏工作保護管道及設施，並對工作程序及相關設施進行定期監控，以防止廢水對環境造成負面影響。

Figure 5 Seepage and leakage prevention work at waste treatment facility located at Yancheng NUHF
圖5 鹽城新宇輝豐廢水處理設施防滲防漏工作

To minimise the potential risks associated with discharge of wastewater, all solid waste treatment plants are equipped with on-site treatment facilities to carry out pre-treatment prior to sending them off to qualified downstream treatment plants. As for the Eco-Plating Specialised Zone, which is a wastewater treatment site for manufacturing clients, it stringently complies with all national requirements before discharging treated water. Heavy metal and biochemical pollutants are two of the parameters that are strictly monitored during the process. Regular technical improvement works are carried out in order to maintain a stable and effective capacity to serve the growing demand from clients within the zone. In addition to the existing technologies on real-time monitoring of wastewater discharges and effective removal of chemical oxygen demand (“COD”) and heavy metals, the Group makes use of the technology of reverse osmosis to further enhance the quality of treated wastewater and reduce the amount of sludge produced.

為盡量減低廢水排放涉及的潛在風險，所有固體廢物處理廠均配置現場處理設施預先處理廢水，然後才將廢水送往合資格的下游處理廠。至於環保電鍍專區作為製造業客戶的廢水處理場，在排放經處理廢水之前，嚴格遵守國家的各項規定。重金屬與生化污染物是處理過程中嚴格監控的其中兩個參數。本集團定期進行技術升級工程，以保持穩定及有效的產能，務求滿足園區內客戶日益殷切的需求。除現有實時監測的廢水排放及有效去除化學需氧量（「COD」）及重金屬的技術外，本集團利用反滲透技術，以進一步提高處理後的廢水品質，減少污泥的產生。

	CLIMATE RISKS 氣候風險	TIME HORIZON 時間範圍	TREND 趨勢	POTENTIAL IMPACT ON BUSINESS 潛在業務影響	POTENTIAL IMPACT ON VALUE CHAIN 潛在價值鏈影響
PHYSICAL RISKS 物理風險	Acute 急性	Short term, medium term, and long term 短期、中期及長期	Increase 增加	Extreme weather events with increased severity during cyclones, hurricanes, storm surges and floods can cause damage to the Key Operations and its machinery, and human resources disruption. 在氣旋、颱風、風暴潮及洪水期間，極端天氣事件的嚴重性增加，可能會對主要業務運作及其機械造成損害，並造成人力資源的中斷。	Short term: May cause transportation disruptions, affecting the collection and disposal of hazardous waste. 短期：可能導致運輸中斷，影響危險廢物的收集和處置。 Long term: May lead to adjustments in cooperation strategies among supply chain partners, impacting the stability of the entire value chain. 長期：可能導致供應鏈合作夥伴調整合作策略，影響整個價值鏈的穩定性。
	Chronic 慢性	Medium term and long term 中期及長期	Increase 增加	Longer-term changes in climate patterns could have an impact on landfill layering, rates of decomposition, and trash stabilization, elevating the expense of operating landfills. With more rain and rising sea levels, the Eco-plating Specialised Zone will consequently be more at risk of flooding or contamination. Generally, the alteration in climate patterns increases the cost of capital, operating costs, the cost of human resources, the cost of insurance premiums, and the potential for reduced availability of insurance on assets in locations with high exposure to natural disasters. 氣候模式的長期變化會對填埋場的分層、分解率及垃圾的穩定性產生影響，提高填埋場的運營費用。隨著雨水增多及海平面上升，環保電鍍專區將因而面對更多洪水或污染風險。一般而言，氣候模式的改變會增加資本成本、運營成本、人力資源成本、保險費成本，以及在自然災害高發地區的資產保險可能會減少供應。	Longer-term changes in climate patterns may affect the stability of raw material supply, which might encourage companies across the value chain to jointly seek climate change adaptation solutions. 較長期的氣候模式變化可能會影響原材料供應的穩定性，這可能會鼓勵整個價值鏈上的公司共同尋求氣候變化適應解決方案。

TRANSITION RISKS 過渡風險	Policy and Legal 政策及法律	Short term, medium term, and long term 短期、中期及長期	Increase 增加	Upon implementation of tightened environmental laws and the carbon pricing system, the Group will expect increased operating costs, increased costs resulting from fines and legal proceedings if non-compliance with newly implemented regulations occurs, and supply chain disruption or supply shortage if the carbon pricing system affects the chemical markets. 在實施更嚴格的环境法及碳定價制度後，本集團預期運營成本會增加，如發生不遵守新實施法規，罰款及法律訴訟會導致成本增加，如碳定價制度影響到化學品市場，供應鏈會中斷或出現供應短缺。	Short term: May impact the cooperative relationships between upstream and downstream enterprises. 短期：可能影響上下游企業間的合作關係。 Long term: May drive the entire value chain toward a green and low-carbon transformation. 長期：可能推動整個價值鏈朝綠色低碳的方向轉型。
	Technology 技術	Short term, medium term, and long term 短期、中期及長期	Increase 增加	During the transitional period, the Group expects increased research and development and/or procurement expenditures to introduce new and alternative technologies, and additional cost of adopting new practices and processes. 於過渡期內，本集團預計將增加研發及／或採購支出，以引進新的及替代技術，以及因為採納新的實踐方法與程序引致額外成本。	Short term: May prompt companies in the value chain to jointly pursue technological upgrades. 短期：可能促使價值鏈上的公司共同追求技術升級。 Long term: May alter the competitive landscape of the value chain. 長期：可能改變價值鏈的競爭格局。

	Reputation 信譽	Short term, medium term, and long term 短期、中 期及長期	Increase 增加	<p>Stakeholders' concerns and negative news on climate-related issues might dampen the investment sentiment of investors, impacting the stock price and market capitalisation of the Group, and hence increasing the liquidity risk.</p> <p>利益相關者的關注及氣候相關事宜的負面消息可能會抑制投資者的投資情緒，影響本集團股價及市值，從而增加流動性風險。</p>	<p>Short term: May undermine the confidence of partners.</p> <p>短期：可能損害合作夥伴的信心。</p> <p>Long term: May encourage companies in the value chain to collectively enhance their environmental image.</p> <p>長期：可能鼓勵價值鏈中的公司共同提升環境形象。</p>

Taking the time horizon of the above-mentioned risks into consideration, the Group has organised its strategic decision making into three phases:

考慮到上述風險的時間範圍，本集團將戰略決策分為三個階段：

• Short-term (1 – 2 years):

This phase focuses on climate-related risks and opportunities that may arise in the near future, such as the impact of upcoming environmental regulations on existing operations and the short-term application opportunities for low-carbon technologies. The Group’s strategic planning will emphasize optimizing and adjusting current business processes to quickly adapt to short-term changes.

• Medium-term (3 – 5 years):

The medium-term focus is on the impact of climate-related factors on the Group’s business model and market competitiveness in line with industry trends. For example, the pace of low-carbon transformation within the industry may affect the Group’s market share. Strategic planning will revolve around adjusting business layouts, developing and applying new technologies, and enhancing medium-term competitiveness.

• Long-term (5+ years):

The long-term perspective centers on the impact of global climate change trends on the Group’s sustainable development, such as the potential threat of rising sea levels to project facilities in coastal areas. Strategic planning will involve adjustments to strategic direction, exploration of new markets, and the setting of long-term low-carbon development goals to ensure the Group’s climate resilience over the long term.

Risk Management

An ESG risk assessment was conducted based on assessing the possibility and impact of each identified risk. Risks are then prioritised and classified into three risk levels: high, medium and low. The overall risk level was determined depending on the possibility and impact of the risks.

• 短期(1-2年)：

此階段著重於短期內可能出現的氣候相關風險與機會，例如即將實施的環保法規對現有營運的影響，以及低碳技術的短期應用機會。本集團的戰略規劃將強調優化和調整目前的業務流程，以快速適應短期變化。

• 中期(3-5年)：

中期重點在於氣候相關因素對本集團業務模式及市場競爭力的影響，以符合產業趨勢。例如，行業內的低碳轉型步伐可能會影響本集團的市場份額。戰略規劃將圍繞調整業務佈局、開發應用新技術、提升中期競爭力等方面進行。

• 長期(5年以上)：

長期展望的重點在於全球氣候變遷趨勢對本集團可持續發展的影響，例如海平面上升對沿海地區項目設施的潛在威脅。戰略規劃將涉及戰略方向的調整、新市場的開拓、長期低碳發展目標的設定等，以確保本集團對氣候的長期適應能力。

風險管理

環境、社會及管治風險評估乃建基於每個經確定風險的可能性及影響。然後對風險進行優先排序，並將其分為高中低三個風險級別。整體風險級別乃根據風險的可能性及影響而釐定。

Risk levels 風險水平	Definition of the overall risk levels 整體風險級別之定義
High 高	Risks at this level may have serious consequences. It is highly likely that there will be some impacts to the Group and hindrance for the Group to achieve strategic goals. 本風險級別可能會產生嚴重的後果。極有可能對本集團造成若干影響，妨礙本集團實現策略目標。
Medium 中	Risks at this level may have serious consequences, but they are less likely to occur. Conversely, the consequences could be minor in nature, but the probability of occurrence is higher 本風險級別可能有嚴重的後果，但發生的可能性較低。反之，後果可能屬輕微，但發生概率較高。
Low 低	Risks at this level have limited harm and consequences for the Group to achieve its strategic goals, and the probability of occurrence is low. 本風險級別對本集團實現策略目標的危害及後果有限，發生概率較低。

The major climate physical and transition risks identified, their overall risk levels and the Group’s management approach and mitigation measures are shown below. The Group will prioritise resources to manage climate risks with high risk levels.

經確定主要氣候物理及過渡風險、其整體風險水平及本集團管理方針和緩解措施 見下文。本集團將優先安排資源來管理高風險水平的氣候風險。

To minimise the risk associated with engaging with new suppliers, the Group has given priority to suppliers who have worked with the Group before, given that they have passed the annual assessments and provided satisfactory products and services in the previous years. If a new supplier is engaged, the respective provider's past performance and products would be audited to make sure that there is no non-compliance and risks involved. All of these make sure that the supplies provided are of best quality available, and that they will not put any negative effect onto the Group's operations, leading to notoriety of any kind.

聘請供應商的慣例

所有此等供應商均經過嚴格篩選及挑選，以確保彼等夠給予主要業務運作最佳協助。例如，當進行新採購時，本集團必須向至少四名供應商取得報價，基於質量、價格及聲譽方面作出比較。為盡量降低聘請新供應商涉及的風險，若曾與本集團合作的供應商於過往年度提供稱心的產品及服務並通過年度考核，本集團將優先聘用彼等。如聘請新供應商，本集團會對相關供應商過去表現及產品進行審核，以確保不會涉及違規及風險。以上種種措施均確保獲供應的用品質量為目前最佳，且不會對本集團的營運造成任何不利影響，導致聲譽受損。

Practices Used to Identify ESG Risks

Site visits are carried out to inspect potential suppliers' operations and determine if there are any ESG risks. Documents such as operation permits, certifications, environmental impact assessment, emission records would be checked and verified to ensure that the suppliers are compliant with environmental, labour, and other relevant laws, and not involved in ESG issues that may negatively affect the Group. The Group reviews validity of operation permits once a year. Certifications, other assessments and records are reviewed regularly to ensure their validity.

Practices Used to Promote Environmentally Preferable Products and Services

When the Eco-Plating Specialised Zone engages suppliers, it asks them to sign an agreement where they pledge to adopt environmentally friendly practices. Facilities and machines should be procured from well-reputed brands with industrially recognised or energy efficient certifications, if applicable, to minimise any possible environmental harm incurred.

The Group continuously extends these practices to Group level and strengthen its environmental and social performance requirements for suppliers. It hopes these policies and practices would make ESG issues more important in wider society.

The Key Operations have no specific policies for quality assurance since their operation processes follow strictly the work process as set out in their operating licenses.
