# MATERIAL UNCERTAINTY RELATED TO GOING CONCERN

We draw attention to Note 2.1.1 to the consolidated financial statements, which indicates that the Group incurred a net loss attributable to owners of the Company of approximately RMB34 million and the cash outflow of approximately RMB7 million during the year ended 31 December 2024. As at 31 December 2024, the Group's current liabilities exceeded its current assets by approximately RMB236 million and as of the same date, the Group had cash and cash equivalents of approximately RMB43 million and a total of RMB558 million in bank borrowings, of which RMB331 million were current bank borrowing in the PRC. Furthermore, since November 2023. a subsidiary of the Group failed to repay a secured bank loan of RMB254 million which was included the current bank borrowings. These conditions, along with other matters as set forth in Note 2.1.1 to the consolidated financial statements, indicate that a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

### **KEY AUDIT MATTERS**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the Material Uncertainty Related to Going Concern section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matters identified in our audit is related to valuation of investment properties.

### 關鍵審計事項

The Group's investment properties were measured at fair value of approximately RMB1,660 million as at 31 December 2024, with a fair value loss of approximately RMB139 million charged to profit or loss for the year then ended.

### How our audit addressed the Key Audit Matter 我們的審計如何處理關鍵審計事項

We focused on the area because the estimation of valuation of investment properties is subject to high degree of estimation uncertainty. The inherent risk in relation to the valuation of investment properties is considered significant due to complexity of the methods, subjectivity of significant assumptions used, and significant judgements involved in selecting data. Given the significant balance of investment properties and the involvement of significant judgements and assumptions, the valuation of investment properties is considered a key audit matter.

由於投資物業的估值估算受限於高程度的估算不確定 性,因此我們重點關注該領域。涉及投資物業估值的 固有風險視為重大,因方法複雜、所用的重大假設具 主觀性,以及選擇數據時涉及重大判斷。鑒於投資物 業年額重大,且涉及重大判斷和假設,故投資物業的 估值視為關鍵審計事項。

### **INDEPENDENT AUDITOR'S REPORT** 獨立核數師報告

In preparing the consolidated financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Group's financial reporting process.

### AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. We report our opinion solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

在擬備綜合財務報表時,董事負責評估 貴 集團持續經營的能力,並在適用情況下披露 與持續經營有關的事項,以及使用持續經營 為會計基礎,除非董事有意將 貴集團清盤 或停止經營,或別無其他實際的替代方案。

獨立核數師報告

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

在根據《國際審計準則》進行審計的過程中, 我們運用了專業判斷,保持了專業懷疑態 度。我們亦:

- 識別和評估由於欺詐或錯誤而導致綜合 財務報表存在重大錯誤陳述的風險,設 計及執行審計程序以應對這些風險,以 及獲取充足和適當的審計憑證,作為我 們意見的基礎。由於欺詐可能涉及串 謀、偽造、蓄意遺漏、虛假陳述,或凌 駕於內部控制之上,因此未能發現因欺 詐而導致的重大錯誤陳述的風險高於未 能發現因錯誤而導致的重大錯誤陳述的 風險。
- 了解與審計相關的內部控制,以設計適 當的審計程序,但目的並非對 貴集團 內部控制的有效性發表意見。
- 評價董事所採用會計政策的恰當性及作 出會計估計和相關披露的合理性。
- 對董事採用持續經營會計基礎的恰當性 作出結論。根據所獲取的審計憑證,確 定是否存在與事項或情況有關的重大不 確定性,從而可能導致對 貴集團的持 續經營能力產生重大疑慮。如果我們認 為存在重大不確定性,則有必要在核數 師報告中提請使用者注意綜合財務報表 中的相關披露。假若有關的披露不足, 則我們應當發表非無保留意見。我們的 結論是基於核數師報告日止所取得的審 計憑證。然而,未來事項或情況可能導 致 貴集團不能持續經營。

### INDEPENDENT AUDITOR'S REPORT 獨立核數師報告

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Au Chi Ho.

In November 2023, a subsidiary of the Group (the "Subsidiary") failed to repay a secured bank loan of RMB254 million (the "Bank Loan"). Such Bank Loan is secured by a property held for sale (the "Secured **Property**") that owned by the Subsidiary and secured by guarantee provided by certain third-parties, who were the previous owners of the Secured Property. As at 31 December 2024, the principal of the bank loan was RMB254 million and accrued interest and penalties were RMB26 million. The Group intended to sell the Secured Property to repay the Bank Loan but has not yet been able to identify a buyer due to the property market condition. A court case in the PRC was filed by the bank on 8 April 2024 and the final judgement issued by the Zhuhai Intermediate People's Court on 16 December 2024 was concluded as follows:

- the Subsidiary, which is a limited company established in the PRC, is required to repay to the bank the amount due together with the interests and penalties;
- the bank has the priority right to receive compensation from the proceeds from the disposal of or auction sale of the Secure Property;
- (iii) the bank may also request the third party guarantors of Bank Loan to settle the amount due under the final judgement on a joint and several basis.

  - (c) 持續經營基礎(續)

於2023年11月,本集 團一家附屬公司(「**附屬** 公司」)未能償還一筆 人民幣254百萬元的抵 押銀行貸款(「銀行貸 **款**」)。該筆銀行貸款由 附屬公司所持有的待出 售物業(「抵押物業」) 作為抵押, 並由若干第 三方提供擔保,其為抵 押物業的前擁有人。截 至2024年12月31日, 銀行貸款本金為人民幣 254百萬元及應計利息 及罰款為人民幣26百 萬元。本集團計劃出售 抵押物業以償還銀行貸 款,但由於房地產市場 狀況,尚未確定買家。 於2024年4月8日,銀 行向中國法院提出訴 訟,及珠海市中級法院 於2024年12月16日已 作出如下的最終判決:

- (i) 附屬公司為一家 在中國成立的有 限公司,需向銀 行支付應付款項 以及利息和罰款;
- (ii) 銀行有權就處置
   或拍賣抵押物業
   所得的款項優先

2.1 Summary of material accounting policies (continued)

### **2.1.1 Basis of preparation** (continued)

(c) Going concern basis *(continued)* 

The above conditions indicated the existence of a material uncertainty which may cast a significant doubt on the Group's ability to continue as a going concern.

In view of such circumstances, the directors of the Company (the "Directors") have given careful consideration to the future liquidity and operating performance of the Group and its available sources of financing to assess whether the Group will have sufficient financial resources to fulfil its financial obligations to continue as a going concern. The following plans and measures have been taken to mitigate the liquidity pressure and to improve its financial position, including but not limited to those described below:

(i) Given the fact that there is no guarantee provided by the Group to the Bank Loan, based on the legal opinion provided by a PRC legal adviser to the Company, the Directors are of the view that the default in repayment would not have material adverse impact on the business operations of the Group as a whole. The Board is also of the view that the Subsidiary can dispose of the Secured Property to generate sufficient amount of fund for the settlement of the Bank Loan:

- 2.1.1 編製基準(續)
  - (c) 持續經營基礎(續)

上述情況表明存在重大 不確定性,可能對本集 團持續經營的能力產生 重大疑慮。

鑒於本集團未對 (i) 銀行貸款提供擔 保,根據本公司 一名中國法律顧 問提供的法律意 見,董事們認為 此次未能償還貸 款不會對本集團 整體的業務運營 產生重大不利影 響。董事會亦認 為附屬公司可處 置該抵押物業籌 集足夠的資金以 償還銀行貸款;

### 2. 會計政策概要(續)

2.1 Summary of material accounting policies (continued)

### **2.1.1 Basis of preparation** (continued)

- (c) Going concern basis *(continued)* 
  - the Group will continue to implement plans and measures to improve the operation performance of the department store business to generate operating cash inflow; and
  - the Group believes that the (iii) existing available facilities of RMB49 million together with the Group's ability to obtain new banking facilities with the Group's assets which are available to be pledged as security will provide sufficient funding to the Group's operation, as and when needed. The Group will also consider to further dispose of other assets to generate more cash inflows, as and when needed.

The Directors have reviewed the Group's cash flow projections, which cover a period not less than 12 months from 31 December 2024. In the opinion of the Directors, in light of the above and taking into account the anticipated cash flows to be generated from the Group's operations as well as the above plans and measures, the Group will have sufficient financial resources to satisfy its future working capital requirements in the 12 months immediately after 31 December 2024. Accordingly, the Directors consider that it is appropriate to prepare the consolidated financial statements on a going concern basis.

Notwithstanding the above, a material uncertainty exists as to whether the Group is able to achieve its plans and measures as described above. Whether the Group will be able to continue as a going concern would depend upon the Group's ability to generate adequate cash flows through:

- Successful disposal of the Secured Property, and collection of sales proceeds to satisfy the repayment of the Bank Loan;
- Successful implementation of the plans and measures to improve the operation performance of the department store business to generate operating cash inflow;
- (iii) Success in obtaining new banking facilities and/or generate cash inflow from disposal of the Group's assets, as and when needed.

- (i) 成功出售抵押物

   所得款項以償還

Should the Group be unable to achieve the above plans and measures such that it would not be able to operate as a going concern, adjustments would have to be made to write down the carrying values of the Group's assets to their recoverable amounts, to recognize further financial liabilities which might arise with higher interest rate, and to reclassify non-current assets and non-current liabilities as current assets and current liabilities, respectively. (e) New and amended standards not yet adopted *(continued)* 

The above new standards and amendments to existing standards are effective for annual periods beginning after 1 January 2025 and have not been applied in preparing these consolidated financial statements. The Group has already commenced an assessment of the impact of these new or revised standards and amendments, certain of which are relevant to the Group's operations. According to the preliminary assessment made by the directors, no significant impact on the financial performance and positions of the Group is expected when they become effective.

## 2.1.2 Principles of consolidation and equity accounting

(a) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for business combinations by the Group (note 2.1.3).

Intra-group transactions, balances and unrealized gains on transactions between group companies are eliminated. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit or loss, statement of comprehensive income, statement of changes in equity and balance sheet respectively.

#### (b) Associates

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting (see (d) below), after initially being recognized at cost.

Dividends received or receivable from the equityaccounted investments are recognized as a reduction in the carrying amount of the equityaccounted investments.

(e) Changes in ownership interests in subsidiaries without change of control

> Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

(f) Disposal of subsidiaries

When the Group ceases to have control, any retained interest in the entity is re-measured to its fair value at the date when control is lost, with the change in carrying amount recognized in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. It means the amounts previously recognized in other comprehensive income are reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable IFRS Accounting Standards.

#### 2.1.3 Business combinations

The Group applies the acquisition method to account for business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree, the equity interest issued by the Group, the fair value of any asset or liability resulting from a contingent consideration arrangement and fair value of any preexisting equity interest in the subsidiary. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognizes any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net identifiable assets.

The excess of the consideration transferred, the amount of any noncontrolling interests in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net assets of the business acquired in the case of a bargain purchase, the difference is recognized in profit or loss.

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. They are deferred in equity if they relate to qualifying cash flow hedges and qualifying net investment hedges or are attributable to part of the net investment in a foreign operation.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equities held at fair value through profit or loss are recognized in profit or loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equities classified as fair value through other comprehensive income are recognized in other comprehensive income.

#### 2.1.7 Impairment of non-financial assets

Assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

(a) Classification

The Group classifies its financial assets in the following categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss), and
- those to be measured at amortized cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

(c) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at FVPL, transaction costs that are directly attributable to the acquisition of the financial asset. Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classifies its debt instruments:

Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognized directly in profit or loss and presented in other losses together with foreign exchange gains and losses. The impairment methodology applied depends on whether there has been a significant increase in credit risk. For trade receivables, the Group applies the simplified approach permitted by IFRS Accounting Standards 9, which requires expected lifetime losses to be recognized from initial recognition of the receivables, see note 3.1(b) for further details.

The combination of those rights and performance obligations gives rise to a net asset or a net liability depending on the relationship between the remaining rights and the performance obligations. The contract is an asset and recognized as contract assets if the measure of the remaining rights exceeds the measure of the remaining performance obligations. Conversely, the contract is a liability and recognized as contract liabilities if the measure of the remaining performance obligations exceeds the measure of the remaining rights.

Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss as finance costs.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the end of the reporting period.

The income tax expense for the year is the tax payable on the current year's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Current and deferred tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

(a) Current income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the reporting period in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognized if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax liability in relation to investment property that is measured at fair value is determined assuming the property will be recovered entirely through sale.

### 2.1.18 Provisions

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognized for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present value of the obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

#### 2.1.19 Revenue recognition

Revenues are recognized when or as performance obligations are satisfied by transferring control of a promised good or service to a customer. Depending on the terms of the contract and the laws that apply to the contract, control of the asset may transfer over time or at a point in time. Control of the asset is transferred over time if the Group's performance:

- provides all of the benefits received and consumed simultaneously by the customer; or
- creates or enhances an asset that the customer controls as the Group performs; or
- does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

If control of the asset transfers over time, revenue is recognized over the period of the contract by reference to the progress towards complete satisfaction of that performance obligation. Otherwise, revenue is recognized at a point in time when the customer obtains control of the asset.

The progress towards complete satisfaction of the performance obligation is measured based on the Group's efforts or inputs to the satisfaction of the performance obligation that best depict the Group's performance in satisfying the performance obligation.

Interest income from financial assets at FVPL is included in the net fair value gains/(losses) on these assets, see note 8 below.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit-impaired. For creditimpaired financial assets the effective interest rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

#### 2.1.21 Leases

Leases are recognized as a right-ofuse asset (for self-occupation), an investment property (for subleased-out under operating leases), a receivable (for subleased-out under finance leases) and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

#### 2.1.21 Leases (continued)

Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of properties for which the Group is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including insubstance fixed payments), less any lease incentives receivable;
- variable lease payment that are based on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the Group under residual value guarantees;
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option; and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

#### 2.1.21 Leases (continued)

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Group, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Group:

- where possible, uses recent thirdparty financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received;
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by the Group, which does not have recent third party financing; and
- makes adjustments specific to the lease, e.g. term, country, currency and security.

#### (a) Market risk (continued)

(ii) Cash flow and fair value interest rate risk

The Group's interest rate risk arises from restricted bank deposits, cash and cash equivalents and borrowings. Restricted bank deposits issued at fixed rates exposed the Group to fair value interest rate risk. Other financial instruments issued at variable rates exposed the Group to cash flow interest rate risk.

The Group does not anticipate significant impact to cash and cash equivalents and restricted bank deposits because the interest rates of these assets are not expected to change significantly.

The interest rates and terms of repayment of borrowings of the Group are disclosed in note 32. The Group does not carry out any hedging activities to manage its interest rate exposure.

As at 31 December 2024, if interest rates on bank balances at variable rates had been 50 basis points higher/lower with all other variables held constant, loss before tax for the year ended 31 December 2024 would have been approximately RMB215,000 (2023: RMB251,000) lower/higher.

A default on a financial asset is when the counterparty fails to make contractual payments when they fall due. To assess whether there is a significant increase in credit risk, the Group compares risk of a default occurring on the assets with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forwarding-looking information. Especially the following indicators are incorporated:

- actual or expected significant adverse changes in business, financial and economic conditions that are expected to cause a significant change to the third party debtor's ability to meet its obligations;

To measure the expected credit losses, trade receivables from operating leases have been assessed on individual basis or grouped based on shared credit risk characteristics and the days past due.

Except for certain receivables from tenants with specific credit risk the Group adopts an individual impairment assessment approach, the Group uses roll-rate method to calculate ECLs for receivables from operating leases. The roll rates for each bucket are based on the past due days for groupings of various tenants' segments that have similar patterns. The expected loss rates are based on the corresponding historical credit loss rates and adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the tenants to settle the receivables. The Group has identified the Real GDP Growth, Fiscal Balance, Consumer Price Index ("CPI") and M2 Growth Rate of the countries in which it sells its goods and services to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors.

The ECL is the discounted product of the Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD). These three components are multiplied together. This effectively calculates an ECL for each future year, which is then discounted back to the reporting date and summed. The discount rate used in the ECL calculation is the effective interest.

EAD is based on the amounts the Group expects to be owed at the time of default, over the remaining lifetime. The PD represents the likelihood of a borrower defaulting on its financial obligation, over the remaining lifetime (Lifetime PD) of the obligation. LGD represents the Group's expectation of the extent of loss on a defaulted exposure.

The calculation of ECL incorporate forward-looking information. The Group has performed historical analysis and identified the predict China real GDP growth in which it provides its services to be the most relevant factors as the key economic variables impacting credit risk and the expected credit loss.

As with any economic forecasts, the projections and likelihoods of occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different to those projected. The Group considers these forecasts to represent its best estimate of the possible outcomes to establish that the chosen scenarios are appropriately representative of the range of possible scenarios.

Judgment of significant increase in credit risk ("**SICR**")

Under IFRS Accounting Standards 9, when considering the impairment stages for financial assets, the Group evaluates the credit risk at initial recognition and also whether there is any significant increase in credit risk for each reporting period. The Group considers various reasonable supporting information to judge if there is significant increase in credit risk when determining the ECL staging for financial assets. Major factors being considered include overdue status, solvency and operational capabilities. The Group could base on individual financial instruments or portfolios of financial instruments with similar credit risk characteristics to determine ECL staging by comparing the credit risks of the financial instruments at the reporting date with those at initial recognition.

The Group reviews the related party's financial information and assesses the related party's financial position to judge whether the credit risk has SICR after initial recognition. The judgment criteria mainly include the PD changes of the debtors, changes of credit risk categories and other indicators of SICR, etc.

The definition of credit-impaired assets

Under IFRS Accounting Standards 9, in order to determine whether credit impairment occurs, the defined standards adopted by the Group are consistent with the internal credit risk management objectives for relevant financial assets, while considering quantitative and qualitative indicators. When the Group assesses whether the debtor has credit impairment, the following factors are mainly considered:

- The debt has overdue after the contract payment date;
- The lender gives the debtor concessions for economic or contractual reasons due to the debtor's financial difficulties, where such concessions are normally reluctant to be made by the lender;

- The debtor has significant financial difficulties;

- The credit impairment of financial assets may be caused by the joint effects of multiple events and may not be caused by separately identifiable events.

As with any economic forecasts, the projections and likelihoods of occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different to those projected. The Group considers these forecasts to represent its best estimate of the possible outcomes to establish that the chosen scenarios are appropriately representative of the range of possible scenarios.

The Group applies the IFRS Accounting Standards 9 threestage approach to measuring ECL. The Group's other receivables mainly include interest receivables, receivables from finance leases and lease deposits for the leases of rightof-use assets. These three types of other receivables were categorized in stage 1, and the credit risk is low, therefore the impact of loss allowance is immaterial.

The Group's objectives when managing capital are to

- Safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders; and
- Maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with industry practice, the Group monitors its capital structure on the basis of debt-to-equity ratio. For this purpose, the Group defines debt as total borrowings and equity as total equity attributable to owners of the Company.

The debt-to-equity ratios at 31 December 2024 and 2023 were as follows:

Level 2: The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

**Level 3:** If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities.

## (b) Valuation techniques used to determine fair values

Specific valuation techniques used to value FVPL include:

- The use of quoted market prices or dealer quotes for similar instruments; and
- For other financial instruments discounted cash flow analysis

### 4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires the use of accounting estimates which, by definition, will seldom equal the actual results. Management also needs to exercise judgement in applying the Group's accounting policies.

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

The estimates and judgements that may have a significant effect on the carrying amounts of assets and liabilities within the next financial year as discussed below.

#### (a) Income taxes

The Group is subject to income taxes in the PRC. Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain. The Group recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made.

Deferred tax assets relating to certain temporary differences and tax losses are recognized when management considers to be probable that future taxable profit will be available against which the temporary differences or tax losses can be utilized. The outcome of their actual utilization may be different. Details of the deferred income tax are disclosed in note 19.

## 4. 重大會計估計及判斷

編製財務報表須使用會計估計,而根據 定義,其極少等於實際結果。管理層亦 須於應用本集團的會計政策過程中作出 判斷。

估計及判斷將獲持續評估。其根據過往 經驗及其他因素,包括可能對該實體造 成財務影響及於有關情況下相信為合理 之對未來事件之估計。

誠如下文所討論,估計及判斷可能對資 產及負債的賬面值於下一財政年度有重 大影響。

#### (a) 所得税

本集團須在中國繳納所得税。在釐 定所得税撥備時,需要作出重大判 斷。有多項交易和計算涉及之最終 税務釐定均為不確定。本集團根據 對是否需要繳付額外税款之估計, 就預期税務審計專案確認負債。倘 此等事件的最終税務結果與最初記 錄之金額不同,則此等差額將影響 作出有關釐定期間的本期及遞延所 得税資產及負債。

倘管理層認為未來應課税溢利可用 於抵銷暫時差額或税項損失時,則 會確認與若干暫時差額及税項損失 有關的遞延税項資產。其實際動用 之結果或許有所不同。遞延所得税 之詳情披露於附註19。

For the year ended 31 December 2024 截至2024年12月31日止年度

### 4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

(continued)

#### (b) Fair value of investment properties

The fair value of investment properties is determined by using valuation technique. Details of the judgment and assumptions have been disclosed in note 14. If the market rents of investment properties had been 5% higher/ lower, loss before income tax for the year ended 31 December 2024 would have been approximately RMB83,021,000 lower/higher.

## (c) Impairment of receivables from operating leases

Except for certain receivables from tenants with specific credit risk the Group adopts an individual impairment assessment approach, the Group uses a provision matrix to calculate ECLs for receivables from operating leases. The provision rates are based on the past due days for groupings of various tenants' segments that have similar patterns. The expected loss rates are based on the corresponding historical credit losses and adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the tenants to settle the receivables.

Significant judgement and estimation are required in determining the ECLs of receivables from operating leases. The amount of ECLs is sensitive to changes in circumstances and forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of tenant's actual default in the future.

### 4. 重大會計估計及判斷(續)

#### (b) 投資物業的公平值

投資物業的公平值按估值技術釐 定。判斷及假設之詳情已於附註 14所披露。倘投資物業之公平 值增加/減少5%,則截至2024 年12月31日止年度之除所得税 前虧損將減少/增加約人民幣 83,021,000元。

#### (c) 經營租賃應收款項的減值

除部分具有特定信用風險的租戶之 應收款項外,本集團會採用個別減 值評估方去外,本集團以撥備矩陣 計算經營租賃應收款項的預期信用 虧損。撥備比率乃按以具有類似 時 一子而定。預期信用虧損乃按相應 過往的信用虧損及經過調整,以反 映當前及前瞻性的宏觀經濟因素資 料,該等因素影響客戶結算應收款 項的能力。

釐定經營賃應收款項的預期信用虧 損時須下重大判斷和估計。預期信 用虧損的金額對週遭情況及預計經 濟狀況敏感。本集團過往信用虧損 經驗和對經濟狀況的預測,式未能 代表租戶日後實際違約的情況。

### **14. INVESTMENT PROPERTIES** (continued)

#### Valuation techniques

#### Valuations are based on:

Direct comparison approach assuming sale of each of these properties in its existing state with the benefit of vacant possession. By making reference to sales transactions as available in the relevant market, comparable properties in close proximity have been selected and adjustments have been made to account for the difference in factors such as locations and property size; and

Income approach which using discounted cash flow ("**DCF**") projections taking into account the current rents of the property interests and the reversionary potentials of the tenancies, term yield and reversionary yield are then applied respectively to derive the market value of the property as significant unobservable inputs and showed as below:

Term yields	Reflecting current market assessments of the uncertainty in the amount and timing of cash flows
Reversionary yields	Based on current and expected future market conditions after expiry of any current lease
Market rents	Based on location, type and quality of the properties and supported by the terms of any existence lease, other contracts and external evidence such as current market rents for similar properties

### 14. 投資物業(續)

#### 估值方法

#### 估值乃按照以下基準進行:

採用直接比較法,假設該等物業各自按 現況交吉出售。經參考有關市場的可資 比較銷售交易,選擇鄰近地區的可資比 較物業並就位置及物業規模等因素的差 異作出調整;及

採用收益法使用折現現金流(「**折現現金 流**」)預測,並考慮到物業的當前租金, 然後分別應用利息和租賃的複歸潛力、 期限收益率和復歸收益率來得出該物業 的市場價值作為重大不可觀察輸入值, 如下所示:

- 定期收益率 反映當前市場對現金流量 和時間不確定性的評估
- 回歸收益率 基於任何當前租約到期後 的當前和預期未來市場狀 況
- 市場租金 基於物業的位置、類型和 質量,並得到任何現有租 賃條款、其他合約和外部 證據的支持(例如類似物 業的當前市場租金)

Description 描述	Unobservable inputs 不可觀察輸入值	Range of unobservable inputs 不可觀察輸入值範圍	Relationship of unobservable inputs to fair value 不可觀察輸入值與公平值的關係
Owned shopping malls and leased ones as ROU 自有購物中心和	Term yields 定期收益率	4.7%-6.6% (2023: 4.5%-6.5%)	The higher the term yields, the lower the fair value 期限收益率越高,公平值越低
租賃物業以使用權 形式	Reversionary yields 回歸收益率	5%-7% (2023: 5%-7%)	The higher the reversionary yields, the lower the fair value 回歸收益率越高,公平值越低
	Market rents (RMB/ Square meter/month) 市場租金 (元/平方米/月)	22-292 (2023: 33-294)	The higher the market rents, the higher the fair value 市場租金越高,公平值越高

These unobservable inputs correlate to each other. Term yields are typically lower than reversionary yield given the lower cashflow risk and market uncertainties. Reversionary yield should theoretically tie with market rents, if an above-market market rent adopted, the reversionary yield should be higher as well to reflect the cashflow realization risks. 這些不可觀察的輸入相互關聯。鑑於現 金流風險較低和市場不確定性,期限收 益率通常低於回歸收益率。理論上,回 歸收益率應該與市場租金掛鉤,如果採 用高於市場的市場租金,回歸收益率也 應該更高,以反映現金流變現風險。

### 19. DEFERRED INCOME TAX (continued)

Pursuant to the Corporate Income Tax Law in the PRC, 10% withholding tax is levied on foreign investors (5% for foreign investors who are registered in Hong Kong provided they meet certain criteria) in respect of dividend distributions arising from a foreign investment enterprise's profit earned after 1 January 2008. The Group does not have any plan to require its PRC subsidiaries to distribute their retained earnings and intends to retain them to operate and expand its business in the PRC. Accordingly, no deferred income tax liability was accrued as at the end of each reporting period.

As at 31 December 2024, certain subsidiaries of the Group have not recognized deferred tax assets in respect of cumulative tax losses carried forward of RMB326,795,000 (2023: RMB456,158,000) which will expire within 5 years under the current tax regulation. The cumulative tax losses have not been recognized as a deferred tax asset as it is not probable that future taxable profits against which the losses can be utilized will be available in the relevant tax jurisdiction and entity.

### 19. 遞延所得税(續)

據中國企業所得税法,外國投資者須就 外資企業於2008年1月1日後賺取的溢利 所產生的股息分派繳付10%預扣税(就 香港登記的外國投資者而言,倘符合若 干準則,須繳付5%)。本集團並無計劃 要求其中國附屬公司分配其保留盈餘, 並有意保留其在中國經營及擴展其業 務。因此,於各申報期末並無產生遞延 所得税負債。

於2024年12月31日,本集團若干附 屬公司並未就根據現行税務法規將於 5年內到期之累計税項虧損結轉人民 幣326,795,000元(2023年:人民幣 456,158,000元)確認遞延税項資產。 由於日後不大可能於相關税務司法權區 及實體有未來應課税溢利可用以抵銷虧 損,故並無確認累計税項虧損為遞延税 項資產。
