Definition of Overdue Ratios

The Company defines "M1+ overdue ratio" as (i) exposure at risk relating to financing transactions for which any installment payment is 30 to 179 calendar days past due as of a specified date, divided by (ii) exposure at risk relating to all financing transactions which remain outstanding as of such date, excluding amounts of outstanding principal that are 180 calendar days or more past due.

The Company defines "M3+ overdue ratio" as (i) exposure at risk relating to financing transactions for which any installment payment is 90 to 179 calendar days past due as of a specified date, divided by (ii) exposure at risk relating to all financing transactions which remain outstanding as of such date, excluding amounts of outstanding principal that are 180 calendar days or more past due.

Use of Non-GAAP Financial Measure

As part of our review of business performance, we present adjusted EBITDA as Non-GAAP financial measure to help assess our core operating results. Adjusted EBITDA is defined as net income before interest, taxes, depreciation, and amortization, and further excludes share-based compensation expenses and other non-operating income advepenses. We believe Adjusted EBITDA can be an important financial measure because it allows management, investors, and our board of directors to evaluate and compare our operating results, including our return on capital and operating efficiency from period-to-period by making such adjustments.

While adjusted EBITDA is not a measure defined under U.S. GAAP, management uses it to evaluate performance, make strategic decisions, and set operating plans. Management believes it also helps investors gain a clearer understanding of our underlying performance by excluding certain costs and expenses that management believes are not indicative of its core operating results. The presentation of these non-GAAP financial measures is not meant to be considered in isolation or as a substitute for results or guidance prepared and presented in accordance with U.S. GAAP.

The Company compensates for these limitations by reconciling the Non-GAAP financial measure to the nearest U.S. GAAP performance measure, all of which should be considered when evaluating the Company's performance. The Company encourages you to review its financial information in its entirety and not rely on a single financial measure.

Reconciliations of Cango's Non-GAAP financial measure to the most comparable U.S. GAAP measure are included at the end of this press release.
