(a) Movements reported under retained earnings include put options for the acquisition of non-controlling interests.

(b) Reduction in share capital, see Note 17.1.

(c) Other movements in Other reserves relate to cash flow hedge transactions. Other movements in Retained earnings relate mainly to other equity movements in associates and joint ventures explained further in Note 14 in the table of movement of carrying amount of associates and joint ventures.

1. Accounting policies

Accounting convention and accounting standards

The Consolidated Financial Statements comply with IFRS Accounting Standards issued by the International Accounting Standards Board (IASB) and with Swiss law.

They have been prepared on a historical cost basis, unless stated otherwise. All significant consolidated companies, joint arrangements and associates have a December 31 accounting year-end.

The Consolidated Financial Statements 2024 were approved for issue by the Board of Directors on February 12, 2025, and are subject to approval by the Annual General Meeting on April 16, 2025.

Accounting policies

Accounting policies are included in the relevant Notes to the Consolidated Financial Statements and are presented as text highlighted with a grey background. The accounting policies below are applied throughout the Consolidated Financial Statements.

Key accounting judgments, estimates and assumptions

The preparation of the Consolidated Financial Statements requires Group Management to exercise judgment and to make estimates and assumptions that affect the application of policies, reported amounts of revenues, expenses, assets and liabilities as well as disclosures. Estimated climate impacts, current and probable stated regulatory changes and Nestlé's environmental commitments have been taken into account. These estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. The estimates and underlying assumptions are reviewed on an ongoing basis. Information about potential impacts under alternative scenarios (including, among others, the policies aligned with the Paris ambition and Nestlé's environmental commitments) on the medium and long term, aligned with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD), has been considered. Management believes that the Financial Statements as at December 31, 2024 reflect the most reasonable view of the value of the assets and liabilities at this date. The implications for the Group and the global economy of the war in Ukraine (described in Note 2) as well as potential escalations are highly uncertain, and remain difficult to predict or quantify. Actual results and outcomes could differ from the judgments and estimates taken into account in these Consolidated Financial Statements.

Those areas that involved a higher degree of judgment or uncertainty are explained further in the relevant Notes, including:

- assessment of control and estimation of the fair value of net assets acquired in business combinations and the fair value of considerations received with regard to disposal of businesses (see Note 2);
- recognition and estimation of revenue (see Note 3);
- presentation of additional line items and subtotals in the income statement (see Note 4);
- identification of leases and determination of lease term (see Note 8);
- identification of cash generating units (CGUs) and estimation of recoverable amount for impairment tests (see Note 9);
- assessment of useful lives of intangible assets, including assessment as finite or indefinite (see Note 9);
- measurement of employee benefit obligations (see Note 10);
- recognition and measurement of provisions (see Note 11); and
- estimation of current and deferred taxes, including uncertain tax positions (see Note 13).

Foreign currencies

The functional currency of the Group's entities is the currency of their primary economic environment.

In individual companies, transactions in foreign currencies are recorded at the rate of exchange at the date of the transaction. Monetary assets and liabilities in foreign currencies are translated at year-end rates. Any resulting exchange differences are taken to the income statement, except when deferred in other comprehensive income as qualifying cash flow hedges.

On consolidation, assets and liabilities of foreign operations reported in their functional currencies are translated into Swiss Francs, the Group's presentation currency, at year-end exchange rates. Income and expense are translated into Swiss Francs at the annual average rates of exchange or at the rate on the date of the transaction for significant items.

Differences arising from the retranslation of opening net assets of foreign operations, together with differences arising from the translation of the net results for the year of foreign operations, are recognized in other comprehensive income.

When there is a loss of control or partial disposal of a foreign operation, exchange differences that were recorded in equity are recognized in the income statement as part of the gain or loss on disposal.

Hyperinflationary economies

Several factors are considered when evaluating whether an economy is hyperinflationary, including the cumulative three-year inflation, and the degree to which the population's behaviors and government policies are consistent with such a condition.

The balance sheet and results of subsidiaries operating in hyperinflationary economies are restated for the changes in the general purchasing power of the local currency, using official indices at the balance sheet date, before translation into Swiss Francs and, as a result, are stated in terms of the measuring unit current at the balance sheet date. The hyperinflationary economies in which the Group operates are listed in Note 20.

Other revenue

Other revenue are primarily sales-based royalties and license fees from third parties (including associates and joint ventures) which have been earned during the period.

Expenses

Operating expenses are presented in the income statement using the function of expense method, as this is the method used by management to analyze performance and is commonly used in the consumer goods industry, and thus provides more relevant information.

Cost of goods sold is determined on the basis of the cost of purchase or of production (comprised of the costs of raw and packaging material, direct labor, energy, manufacturing overheads and depreciation of factory assets, which are allocated to products using activity-based drivers), adjusted for the variation of inventories. It includes the cost of royalties due to third-party licensors for the use of their intellectual property, which are accrued in accordance with the respective agreement. Cost of goods sold also includes amortization of intangible assets related to acquired licenses to sell products or to use technology, as well as maintenance and depreciation of equipment used in the sales process like coffee machines and water coolers.

All other expenses, including those in respect of advertising and promotions, are recognized when the Group receives the risks and rewards of ownership of the goods or when it receives the services. Government grants that are not related to assets are credited to the income statement as a deduction of the related expense when they are received, if there is reasonable assurance that the terms of the grant will be met.

Distribution expenses encompass the costs of storing products and transporting products between factories, warehouses and customer locations. It includes the costs

of outsourced transportation services, salaries and wages of drivers, warehouse employees and customer service staff, as well as depreciation and running costs of warehouses and related storage, transportation and handling equipment.

Marketing and administration expenses include the costs of advertising and consumer promotion activities, merchandising, sales teams and head office functions such as finance, human resources, legal, information technology, supply chain and general management. It is primarily comprised of salaries, depreciation and maintenance of real estate, and the costs of third-party services.

Additional details of research and development, other trading income and expenses and other operating income and expenses are provided in the respective Notes.

Changes in IFRS Accounting Standards

In May 2023, the IASB issued Supplier Finance Arrangements (Amendments to IAS 7 and IFRS 7). The Group has made the required disclosures in the full year 2024 Consolidated Financial Statements (see Note 7.2) in accordance with the amendment.

Several other amendments apply for the first time in 2024 including, among others, Non-current Liabilities with Covenants (Amendments to IAS 1), and Lease Liability in a Sale and Leaseback (Amendments to IFRS 16). None of these had a material impact on the Group's Financial Statements.

Changes in IFRS Accounting Standards that may affect the Group after December 31, 2024

In April 2024, the IASB issued IFRS 18 Presentation and Disclosure in Financial Statements. This standard sets out requirements for the presentation and disclosure of information in financial statements. IFRS 18 is effective for reporting periods beginning on or after January 1, 2027 and will apply retrospectively. The Group is currently evaluating all impacts this new standard will have on the presentation of the income statement and the notes to the consolidated financial statements. It is too early to assess whether this standard will have a material impact on the financial statements.

The following amendments have been issued and will become effective after December 31, 2024: Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7, Annual Improvements to IFRS Accounting Standards – Volume 11, and Lack of Exchangeability (Amendments to IAS 21). The Group is currently evaluating the effects of these new amendments; they are not expected to have a material impact on the Group's Financial Statements in the period of initial adoption, based on the analysis so far.

2. Scope of consolidation, acquisitions and disposals of businesses

Scope of consolidation

The Consolidated Financial Statements comprise those of Nestlé S.A. and of its subsidiaries (the Group).

Companies which the Group controls are fully consolidated from the date at which the Group obtains control. The Group controls a company when it is exposed to, or has rights to, variable returns from its involvement with the company and has the ability to affect those returns through its power over the company. Though the Group generally holds a majority of voting rights in the companies which are controlled, this applies irrespective of the percentage of interest in the share capital if control is obtained through agreements with other shareholders.

The war in Ukraine and the related sanctions imposed on Russia, Belarus and certain regions in Ukraine still continue to limit the freedom of Nestlé Russia Region businesses to operate. In accordance with the accounting policy described above, the Group has re-assessed and confirmed that the changes in the legal and operating environment of Russia and Ukraine have not impacted the ability to exercise control over the Group entities in these countries.

As part of the Consolidated Financial Statements, the list of the principal subsidiaries is provided in the section Companies of the Nestlé Group, joint arrangements and associates after Note 21.

2.1 Change of scope of consolidation

Acquisitions

There were no significant acquisitions in 2024 nor in 2023.

In 2024, among several other non-significant acquisitions, in March, the Group closed the acquisition of Grupo CRM, a premium chocolate player in Brazil, and end of September the acquisition of the global rights of the VOWST business from Seres Therapeutics, Inc. Previously Nestlé Health Science held the rights to the commercialization of the VOWST business in the USA under a license with Seres Therapeutics, Inc., accounted for as an operating right intangible asset, which has been subsumed following the acquisition of the global rights to the full VOWST business.

Disposals

In 2024, there were no significant disposals.

In 2023, among several non-significant disposals, the European frozen pizza business was contributed in September to a newly created joint venture company European Pizza Group (see Note 14). In addition, in September as well, the Group disposed of *Palforzia*, its peanut allergy treatment business, for future royalty and milestone payments dependent on the achievement of sales targets. The disposal transaction has an insignificant income statement impact, as impairment charges had been recorded in 2022.

2.2 Acquisitions of businesses

The major classes of assets acquired and liabilities assumed at the acquisition date are:

In millions of CHF		
	2024	2023
Inventories	93	20
Other assets	64	25
Property, plant and equipment	93	32
Intangible assets ^(a)	289	19
Financial debt	(100)	(5)
Other liabilities	(97)	(11)
Deferred taxes	—	3
Fair value of identifiable net assets/(liabilities)	342	83

(a) Mainly intellectual property rights, customer lists, trademarks and trade names as well as franchise relationships, composed of CHF 152 million (2023: CHF 14 million) of finite life, and of CHF 137 million (2023: CHF 5 million) of indefinite life intangible assets.

Since the valuation of the assets and liabilities of acquired businesses is still in process, the values are determined provisionally.

The goodwill arising on acquisitions and the cash outflow are:

In millions of CHF		
	2024	2023
Fair value of consideration transferred	1 043	203
Fair value of identifiable net (assets)/liabilities	(342)	(83)
Goodwill	701	120

In millions of CHF		
	2024	2023
Fair value of consideration transferred	1 043	203
Cash and cash equivalents acquired	(29)	(4)
Consideration payable	(229)	(7)
Payment of consideration payable on prior-year acquisitions	24	19
Cash outflow on acquisitions	809	211

The consideration transferred consists of payments made in cash with some consideration remaining payable.

Acquisition-related costs

Acquisition-related costs have been recognized under Other operating expenses in the income statement (see Note 4.2) for an amount of CHF 17 million (2023: CHF 27 million).

2.3 Disposals of businesses

There were no significant disposals of business during the year 2024 nor during the year 2023.

In millions of CHF		
	2024	2023
Cash, cash equivalents and short-term investments	24	20
Inventories	34	72
Trade and other receivables, prepayments and other assets	10	74
Deferred tax assets	2	19
Property, plant and equipment	42	150
Goodwill and intangible assets	20	231
Financial liabilities	(10)	(15)
Trade and other payables, accruals and other liabilities	(19)	(90)
Employee benefits and provisions	(2)	(5)
Deferred tax liabilities	—	(7)
Non-controlling interests	—	(22)
Net assets disposed of	101	427

3. Analyses by segment

Nestlé is organized into five geographic Zones as well as Globally Managed Businesses. The Company manufactures and distributes food and beverage products in the following categories: powdered and liquid beverages, water, milk products and ice cream, nutrition products, prepared dishes and cooking aids, confectionery and petcare. Nestlé also manufactures and distributes nutritional science products through its globally managed business Nestlé Health Science. The Group has factories in 75 countries and sales in 185 countries and employs around 277 000 people.

Segment reporting

Basis for segmentation

Operating segments reflect the Group's management structure and the way financial information is regularly reviewed by the Group's chief operating decision maker (CODM), which is defined as the Executive Board.

The CODM considers the business from both a geographic and product perspective, through geographic Zones as well as Globally Managed Businesses (GMB). Zones and GMBs that meet the quantitative threshold of 10% of total sales, trading operating profit or assets for all operating segments are presented on a stand-alone basis as reportable segments. Even though it does not meet the reporting threshold, Nespresso is voluntarily reported separately considering its financial contribution to the Group.

The Group is organized into five Zones and two significant GMBs. Therefore, the Group's reportable segments are:

- Zone North America (NA);
- Zone Europe (EUR);
- Zone Asia, Oceania and Africa (AOA);
- Zone Latin America (LATAM);
- Zone Greater China (GC);
- Nestlé Health Science; and
- Nespresso.

Other business activities and operating segments are combined and presented in Other businesses.

As most operating segments represent geographic Zones, information by product is also disclosed. The seven product groups that are disclosed represent the highest categories of products that are followed internally.

Revenue and results by segment

Segment results (Trading operating profit) represent the contribution of the different segments to central overheads, unallocated research and development costs and the trading operating profit of the Group. Specific corporate expenses are allocated to the corresponding segments. In addition to the Trading operating profit, Underlying trading operating profit is shown on a voluntary basis because it is one of the key metrics used by Group Management to monitor the performance of the Group.

Depreciation and amortization include depreciation of property, plant and equipment (including right-of-use assets under leases) and amortization of intangible assets.

Invested capital and other information by segment

No segment assets and liabilities are regularly provided to the CODM to assess segment performance or to allocate resources, and therefore segment assets and liabilities are not disclosed. However, the Group discloses the invested capital, goodwill and intangible assets by segment and by product on a voluntary basis, and uses the assets directly allocated to the segments to determine if a segment is reportable.

Invested capital comprises property, plant and equipment, trade receivables and some other receivables, assets held for sale, inventories, prepayments, less trade payables, accruals and some other payables, liabilities directly associated with assets held for sale and non-current other payables.

Goodwill and intangible assets are not included in invested capital since the amounts recognized are not comparable between segments due to differences in the intensity of acquisition activity and changes in the accounting standards that were applicable at various points in time when the Group undertook significant acquisitions. Nevertheless, allocations of goodwill and intangible assets by segment and product and the related impairment expenses are provided.

Inter-segment eliminations represent inter-company balances between the different segments.

Invested capital and goodwill and intangible assets by segment represent the situation at the end of the year, while the figures by product represent the annual average, as this provides a better indication of the level of invested capital.

Capital additions represent the total cost incurred to acquire property, plant and equipment (including right-of-use assets under leases), intangible assets and goodwill, including those arising from business combinations.

Unallocated items

Unallocated items represent items whose allocation to a segment or product would be arbitrary. They mainly comprise:

- corporate expenses and related assets/liabilities;
- research and development costs and related assets/liabilities; and
- some goodwill and intangible assets.

Revenue

Sales represent amounts received and receivable from third parties for goods supplied to the customers and for services rendered. Sales are recognized when control of the goods has transferred to the customer, which is mainly upon arrival at the customer.

Revenue is measured as the amount of consideration which the Group expects to receive, based on the list price applicable to a given distribution channel after deduction of returns, sales taxes, pricing allowances, other trade discounts and couponing and price promotions to consumers. The level of discounts, allowances and promotional rebates is recognized as a deduction from revenue at the time that the related sales are recognized or when the rebate is offered to the customer (or consumer if applicable). They are estimated using judgments based on historical experience and the specific terms of the agreements with the customers. Payments made to customers for commercial services received are expensed. The Group has a range of credit terms which are typically short term, in line with market practice and without any financing component.

The Group does not generally accept sales returns, except in limited cases mainly in the Infant Nutrition business. Historical experience is used to estimate such returns at the time of sale. No asset is recognized for products to be recoverable from these returns, as they are not anticipated to be resold.

Trade assets (mainly coffee machines and water coolers) may be sold or leased separately to customers.

Arrangements where the Group transfers substantially all the risks and rewards incidental to ownership to the customer are treated as finance lease arrangements. Operating lease revenue is recognized on a straight-line basis over the lease term.

Sales are disaggregated by product group and geography in Notes 3.2 and 3.4.

3.5 Geography

Sales and non-current assets in Switzerland and countries which individually represent at least 10% of Group sales or 10% of Group non-current assets are disclosed separately.

The analysis of sales is stated by customer location.

Non-current assets relate to property, plant and equipment (including right-of-use assets under leases), intangible assets and goodwill. Property, plant and equipment and intangible assets are attributed to the country of their legal owner. Goodwill is attributed to the countries generating the cash flows supporting the goodwill.

In millions of CHF

3.6 Customers

There is no single customer accounting for 10% or more of Group revenues.

4. Net other trading and operating income/(expenses)

Other trading income/(expenses)

These comprise restructuring costs, impairment of property, plant and equipment and intangible assets (other than goodwill and non-commercialized intangible assets), litigations and onerous contracts, results on disposals of property, plant and equipment, and specific other income and expenses that fall within the control of operating segments.

Restructuring costs are restricted to dismissal indemnities and employee benefits paid to terminated employees upon the reorganization of a business or function.

Other operating income/(expenses)

These comprise impairment of goodwill and non-commercialized intangible assets, results on disposals of businesses (including impairment and subsequent remeasurement of businesses classified as held-for-sale, as well as other directly related disposal costs like restructuring costs directly linked to businesses disposed of and legal, advisory and other professional fees), acquisition-related costs, the effect of hyperinflation accounting, and income and expenses that fall beyond the control of operating segments or relate to events such as wars and natural disasters including extreme weather events linked to climate change, as well as expropriation of assets.

4. Net other trading and operating income/(expenses)

(b) Miscellaneous operating expenses include, among others, expenses of transitional services provided to disposed businesses and natural disasters.

5. Net financial income/(expense)

Net financial income/(expense) includes net financing cost of net financial debt and net interest income/(expense) on defined benefit plans.

Net financing cost comprises the interest income earned on cash and cash equivalents and short-term investments, as well as the interest expense on financial debt (including leases), collectively termed "net financial debt" (see Note 16.5). These headings also include other income and expenses such as exchange differences on net financial debt and results on related foreign currency and interest rate hedging instruments. Certain borrowing costs are capitalized as explained in the Note on Property, plant and equipment (see Note 8).

In millions of CHF

	Notes	2024	2023

Net interest income/(expense) on defined benefit plans	10	(52)	(51)
Other financial income/(expense)		(2)	(1)
Net financial income/(expense)		(1 485)	(1 360)

6. Inventories

Raw materials are valued at the lower of purchase cost calculated using the FIFO (first-in, first-out) method and net realizable value. Work in progress, sundry supplies and finished goods are valued at the lower of their weighted average cost (including an allocation of factory overheads and depreciation) and net realizable value. The cost of inventories includes the gains/losses on cash flow hedges for the purchase of raw materials and finished goods.

In millions of CHF

	2024	2023
Raw materials, work in progress and sundry supplies	6 557	5 725
Finished goods	7 103	6 509
Allowance for write-down to net realizable value	(400)	(338)
	13 260	11 896

Inventories amounting to CHF 299 million (2023: CHF 251 million) are pledged as security for financial liabilities.

Inventories amounting to CHF 46 295 million (2023: CHF 48 336 million) were recognized as an expense during the year and included in Cost of goods sold.

7. Trade and other receivables/payables

7.1 Trade and other receivables

Recognition and measurement

Trade and other receivables are recognized initially at their transaction price and subsequently measured at amortized cost less loss allowances. Other receivables are comprised mainly of receivables for indirect taxes.

Expected credit losses

The Group applies the IFRS 9 simplified approach to measuring expected credit losses (ECLs) for trade receivables at an amount equal to lifetime ECLs. The ECLs on trade receivables are calculated based on actual credit loss experience over the preceding three to five years on the total balance of non-credit impaired trade receivables, adjusted for forward-looking information where relevant (such as a significant deterioration in the economic environment). The Group's credit loss experience has shown that aging of receivable balances is primarily due to negotiations about variable consideration.

The Group considers a trade receivable to be credit impaired when one or more detrimental events have occurred such as:

- significant financial difficulty of the customer; or
- it is becoming probable that the customer will enter bankruptcy or other financial reorganization.

Impairment losses related to trade and other receivables are not presented separately in the consolidated income statement but are reported under the heading Marketing and administration expenses.

In millions of CHF

	2024			2023		
	Gross carrying amount	Expected credit loss allowance	Total	Gross carrying amount	Expected credit loss allowance	Total
Trade receivables (not credit impaired)	9 514	(100)	9 414	9 092	(100)	8 992
Other receivables (not credit impaired)	1 838	(6)	1 832	2 002	(8)	1 994
Credit impaired trade and other receivables	188	(183)	5	179	(170)	9
Total	11 540	(289)	11 251	11 273	(278)	10 995

The top five major customers represent 16% (2023: 15%) of trade and other receivables, none of them individually exceeding 7% (2023: 6%).

Based on the historic trend and expected performance of the customers, the Group believes that the above expected credit loss allowance sufficiently covers the risk of default.

7.2 Trade and other payables

Recognition and measurement

Trade and other payables are recognized initially at their transaction price and subsequently measured at amortized cost.

Supplier finance arrangements

The Group participates in supplier finance arrangements (SFA) with the following standard terms and conditions:

- The Group enters into invoice processing services and paying agency agreements with financial institutions or technology providers for the settlement of some trade and other payables to suppliers.
- By virtue of commercial agreements with suppliers, the Group remains obligated to settle invoices at the contractually agreed payment terms. The invoice processing services and paying agency agreements do not change these contractual obligations.
- No extension of payment terms beyond those agreed with suppliers is offered to the Group by the financial institutions or technology providers nor is such extension sought by the Group.
- Only received and approved invoices for goods or services are eligible for settlement through supplier finance arrangements. Where goods or services have been received without an invoice, the resulting liability is not eligible for settlement through supplier finance arrangements until the invoice is received and approved.
- The suppliers may elect to join the arrangements and at their discretion can enter into receivable purchase programs or equivalent with the providers of supplier finance arrangements. The Group is not a party to these receivable purchase programs and does not control nor have ongoing/systematic visibility on the timing of any receivable purchases. The commercial terms and conditions negotiated between the suppliers, who are part of supplier finance arrangements, and Nestlé are not impacted by whether or not the suppliers decide to obtain early financing from the financial institutions. There is no recharge from the financial institutions to Nestlé in case the suppliers obtain early financing.
- No collateral or other securities are deposited or pledged for the benefit of the financial institutions or technology providers.

The arrangements avoid concentration and liquidity risk, since:

- Supplier finance arrangements are implemented by Nestlé affiliates with a large number of financial institutions located in more than 50 geographies. The largest Group affiliates operate supplier finance arrangements with multiple financial institutions.
- None of the arrangements with financial institutions include conditions that would force Nestlé to prepay some aggregated amount earlier than the maturity dates of each individual invoice loaded to the programs.
- The Group's commercial contracts with suppliers take into account several factors when determining payment terms. These include market conditions, supplier's financials, origins of sourcing, and the ability of the suppliers to obtain early financing, for example through supplier finance arrangements or direct arrangements with financial institutions. These factors lead to a diversity of payment terms throughout the Group, avoiding concentration of payment terms. These terms are compliant with the applicable regulations. They remain consistent with the normal operating cycle of Nestlé business, which exceeds 120 days from acquisition of goods to realization in cash through finished goods sales, reflecting long supply chains.

7. Trade and other receivables/payables

The Group presents invoices to be settled through these programs as Trade and other payables considering that the original liability is neither legally released nor substantially modified on entering into such arrangements. Related payments are included within operating cash flows because they remain operational in nature. There were no significant non-cash changes in the carrying amount of the trade payables included in the Group's supplier finance arrangements. These arrangements are not used for the settlement of transactions with employees, authorities, or M&A transactions.

In millions of CHF

	2024	2023
Due within one year		
Trade payables	16 685	14 195
Social security and sundry taxes and levies	1 692	1 665
Other payables	3 430	3 344
	21 807	19 204
Of which invoices from suppliers of goods and services in Supplier finance arrangements ^(a)	6 211	4 681

(a) Includes approximately CHF 4817 million for which suppliers have already received payment from the financial institutions as of December 31, 2024 according to information communicated by the financial institutions with limited liability and disclaimer provisions. The Group is not party to the decisions, including timing, about whether suppliers are paid before the due date of the invoice and does not systematically receive this information for operational purposes.

The ranges of contractually agreed payment terms for invoices from suppliers in supplier finance arrangements and comparable suppliers not in supplier finance arrangements are the following:

In millions of CHF

	2024	
	Invoices from suppliers in SFA ^(a)	Invoices from suppliers not in SFA
Ranges of contractually agreed payment terms		
Less than 60 days	228	3 573
From 61 to 120 days	2 593	3 392
From 121 to 180 days	3 300	73
More than 180 days	90	74
	6 211	7 112

(a) The amount of unsettled invoices with suppliers in SFA outstanding for more than 90 days as at December 31, 2024 is estimated at CHF 1.5 billion.

8. Property, plant and equipment

Property, plant and equipment comprise owned and leased assets.

In millions of CHF			
	Notes	2024	2023
Property, plant and equipment – owned	8.1	31 083	27 888
Right-of-use assets – leased	8.2b	2 623	2 579
		33 706	30 467

8.1 Owned assets

Owned property, plant and equipment are shown on the balance sheet at their historical cost.

Depreciation is assessed on components that have homogeneous useful lives by using the straight-line method to depreciate the initial cost down to the residual value over the estimated useful lives. The residual values are 30% on head offices and nil for all other asset types. The useful lives are as follows:

Buildings	20–40 years
Machinery and equipment	10–25 years
Tools, furniture, information technology and sundry equipment	3–15 years
Vehicles	3–10 years

Land is not depreciated.

Useful lives, components and residual amounts are reviewed annually. Such a review takes into consideration the nature of the assets, their intended use, including but not limited to the closure of facilities, the evolution of technology and competitive pressures.

Depreciation of property, plant and equipment is allocated to the appropriate headings of expenses by function in the income statement.

Borrowing costs incurred during the course of construction are capitalized if the assets under construction are significant and if their construction requires a substantial period to complete (typically more than one year). The capitalization rate is determined on the basis of the short-term borrowing rate for the period of construction.

Government grants are recognized as deferred income which is released to the income statement over the useful life of the related assets.

Accumulated depreciation and impairments	(6 058)	(16 991)	(4 761)	(171)	—	(27 981)

(a) Including borrowing costs.

As at December 31, 2024, net property, plant and equipment of CHF 92 million are pledged as security for financial liabilities (2023: CHF 88 million).

As at December 31, 2024, the Group was committed to expenditure amounting to CHF 2107 million (2023: CHF 2829 million).

Impairment of property, plant and equipment

Reviews of the carrying amount of the Group's property, plant and equipment are performed when there is an indication of impairment. An indicator could be technological obsolescence, unfavorable development of a business under competitive pressures or severe economic slowdown in a given market as well as reorganization of the operations to leverage their scale. Earlier than planned retirement of property, plant and equipment due to a transition to a low carbon economy, Nestlé's commitments regarding recyclable or reusable packaging, reduction of virgin plastic and Nestlé's Net Zero Roadmap on greenhouse gas emissions are also considered as triggers for impairment.

In assessing value in use, the estimated future cash flows are discounted to their present value, based on the time value of money and the risks specific to the country where the assets are located. The risks specific to the asset are included in the determination of the cash flows.

Impairment of property, plant and equipment arises mainly from plans to optimize industrial manufacturing capacities by closing or selling inefficient production facilities and underperforming businesses. The majority of Nestlé's emissions are classified as Scope 3 (i.e. indirect emissions that occur across Nestlé's value chain and outside of Nestlé's direct control), and the property, plant and equipment are geographically widespread. Therefore, property, plant and equipment are not materially exposed to climate transition risks nor to physical climate risks, and no significant climate-related triggers for impairment have been identified.

8.2 Leases – Group as a lessee

The Group assesses whether a contract is or contains a lease at inception of the contract. This assessment involves the exercise of judgment about whether it depends on a specified asset, whether the Group obtains substantially all the economic benefits from the use of that asset, and whether the Group has the right to the direct use of the asset.

The Group recognizes a right-of-use (ROU) asset and a lease liability at the lease commencement date, except for short-term leases of 12 months or less which are expensed in the income statement on a straight-line basis over the lease term.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease. If this rate cannot be readily determined, the Group uses an incremental borrowing rate specific to the country, term and currency of the contract. Lease payments can include fixed payments, variable payments that depend on an index or rate known at the commencement date, and extension option payments or purchase options which the Group is reasonably certain to exercise. The lease liability is subsequently measured at amortized cost using the effective interest rate method and remeasured (with a corresponding adjustment to the related ROU asset) when there is a change in future lease payments in case of renegotiation, changes of an index or rate, or in case of reassessment of options.

At inception, the ROU asset comprises the initial lease liability, initial direct costs and the obligation to refurbish the asset, less any incentives granted by the lessors. The ROU asset is depreciated over the shorter of the lease term or the useful life of the underlying

asset. The ROU asset is subject to testing for impairment if there is an indicator for impairment, as for owned assets.

ROU assets are included in the heading Property, plant and equipment, and the lease liability is included in the headings current and non-current financial debt.

8.2a Description of lease activities

Real estate leases

The Group leases land and buildings for its office and warehouse space and retail stores. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. Leases are typically made for a fixed period of 5–15 years and may include extension options which provide operational flexibility. If the Group exercised all extension options not currently included in the lease liability, the additional payments would amount to CHF 0.9 billion (undiscounted) as at December 31, 2024 (2023: CHF 0.9 billion (undiscounted)).

Vehicle leases

The Group leases trucks for distribution in specific businesses and cars for management and sales functions. The average contract duration is 6 years for trucks and 3 years for cars.

Other leases

The Group also leases machinery and equipment, and tools, furniture and other equipment that are each insignificant to the total leased asset portfolio.

8.2c Other lease disclosures

A maturity analysis of lease liabilities is shown in Note 12.2b.

The Group incurred interest expense on lease liabilities of CHF 99 million (2023: CHF 86 million). The expense relating to short-term leases and variable lease payments not included in the measurement of lease liabilities is not significant. The total cash outflow for leases amounted to CHF 1057 million (2023: CHF 930 million).

There are no significant lease commitments for leases not commenced at year-end.

9. Goodwill and intangible assets

Goodwill

Goodwill is initially recognized during a business combination (see Note 2). Subsequently it is measured at cost less impairment.

Intangible assets

This heading includes intangible assets that are internally generated or acquired, either separately or in a business combination, when they are identifiable and can be reliably measured. Internally generated intangible assets (mainly management information system software) are capitalized, provided that there is an identifiable asset that will be useful in generating future benefits in terms of savings, economies of scale, etc. Payments made to third parties in order to in-license or acquire intellectual property rights, compounds and products are capitalized as non-commercialized intangible assets, as they are separately identifiable and are expected to generate future benefits.

Non-commercialized intangible assets are not amortized, but tested for impairment (see Impairment of goodwill and intangible assets below). Any impairment charge is recorded in the consolidated income statement under Other operating expenses. They are reclassified as commercialized intangible assets once development is complete, usually when approval for sales has been granted by the relevant regulatory authority.

Commercialized indefinite life intangible assets mainly comprise certain brands, trademarks, operating rights and intellectual property rights which can be renewed without significant cost and are supported by ongoing marketing activities. They are not amortized but are tested for impairment annually or more frequently if an impairment indicator is present. Any impairment charge is recorded in the consolidated income statement under Other trading expenses. The assessment of the classification of intangible assets as indefinite is reviewed annually.

Finite life intangible assets are amortized over the shorter of their contractual or useful economic lives. They comprise mainly management information systems and commercialized patents and rights to carry on an activity (e.g. exclusive rights to sell products or to perform a supply activity). They are amortized assuming a zero residual value on a straight-line basis. Useful lives are as follows: management information systems over 3 to 8 years; other finite intangible assets over the shorter of the estimated useful life or the related contractual period, from 5 to 25 years. Useful lives and residual values are reviewed annually. Amortization of finite life intangible assets starts when they are available for use and is allocated to the appropriate headings of expenses by function in the income statement. Any impairment charge is recorded in the consolidated income statement under Other trading expenses.

Research and development

Internal research costs are charged to the income statement in the year in which they are incurred. Development costs are only recognized as assets on the balance sheet if all the recognition criteria set by IAS 38 – Intangible Assets are met before the products are launched on the market. Development costs are generally charged to the income statement in the year in which they are incurred due to uncertainties inherent in the development of new products because the expected future economic benefits cannot be reliably determined. As long as the products have not reached the market place (or obtained regulatory approval if necessary), there is no reliable evidence that positive future cash flows would be obtained.

Capitalized development costs are subsequently accounted for as described in the section Intangible assets above.

Accumulated amortization and impairments	(3 377)	(1 716)	(766)	(4 362)	(6 844)	(4 064)

(a) Of which CHF 32 million of non-commercialized intangible assets (2023: CHF 45 million).

(b) Of which CHF 241 million reclassified from Operating rights and others to Brands and intellectual property rights related to the legacy VOWST license which has been subsumed following the acquisition of the full VOWST business (see Note 2.1).

(c) Of which CHF 4277 million (2023: CHF 4019 million) are perpetual rights to market, sell and distribute certain Starbucks consumer and food service products globally, classified under the caption Operating rights and others.

In addition to the above, the Group has entered into long-term agreements to in-license or acquire intellectual property or operating rights from third parties. If agreed objectives or performance targets are achieved, these agreements would require potential milestone payments and other payments by the Group, which may be capitalized as intangible assets (see accounting policy in Note 9 – Intangible assets).

As at December 31, 2024, the Group's committed payments (undiscounted and not risk-adjusted) and their estimated timing are:

In millions of CHF

	2024			2023		
	Unconditional commitments	Potential milestone payments	Total	Unconditional commitments	Potential milestone payments	Total
Within one year	—	3	3	—	30	30
In the second year	—	4	4	—	20	20
In the third and fourth years	—	26	26	—	85	85
Thereafter	—	32	32	—	862	862
Total (a)	—	65	65	—	997	997

(a) The decrease of the committed payments is primarily due to the acquisition of global rights to the full VOWST business (see Note 2.1).

Impairment of goodwill and intangible assets (including non-commercialized intangible assets)

Goodwill and intangible assets with an indefinite life or not yet available for use are tested for impairment at least annually and whenever there is an indication of impairment. Finite life intangible assets are tested when there is an indication of impairment.

The annual impairment tests are performed at the same time each year and at the cash generating unit (CGU) level. The Group defines its groups of CGUs for goodwill impairment testing based on the way that it monitors and derives economic benefits from the acquired goodwill. The CGUs are generally defined at the level of a grouping of product categories per Zone, or at the level of the GMB if the products are managed on a global basis.

For indefinite life intangible assets, the Group performs the test at the level of the smallest identifiable assets or group of assets that generate cash inflows that are largely independent of the cash inflows from other assets or groups of assets. Finally, non-commercialized intangible assets are tested at the level of the intangible asset itself.

The impairment tests are performed by comparing the carrying amount of the assets of these CGUs with their recoverable amount, usually based on their fair value less costs of disposal, but occasionally on their value in use.

An impairment loss in respect of goodwill is never subsequently reversed.

9.1 Impairment

9.1.1 Impairment charge during the year

The 2024 and 2023 impairment charge relate to various impairments of intangible assets. None of them are individually significant.

9.1.2 Annual impairment tests

Goodwill impairment reviews have been conducted for more than 30 Cash Generating Units (CGU). Impairment reviews on intangible assets with indefinite useful life "IAIUL" were performed at the level of the smallest identifiable assets or group of assets.

The following table sets out the key assumptions for CGUs that have significant goodwill or IAIUL allocated to them.

	Goodwill carrying amount ^(a)	IAIUL carrying amount ^(a)	Period of cash flow projections	Average annual sales growth	Annual margin evolution	Terminal growth rate	Discount rate

Total	28 693	15 732					

(a) In millions of CHF

For each significant CGU, the recoverable amount is higher than its carrying amount. The recoverable amount has been determined based upon a fair value less costs of disposal calculation. Generally, no directly observable market inputs are available to assess the fair value less costs of disposal. Therefore, the calculation is based on net present value techniques (fair value measurements categorized within Level 3 of the fair value hierarchy). Cash flows are projected over 5 years. They are extrapolated using a steady or declining terminal growth rate.

Finally, the following are taken into account in the impairment tests:

- The cash flows are discounted at post-tax weighted average rates. The discount rates are computed based on external sources of information and reflect the time value of money and country-specific risk.
- The cash flows are based upon financial plans approved by Group Management which are consistent with the Group's approved strategy for this period. They are based on past performance and current initiatives. The business risk is included in the determination of the cash flows.
- Climate change risks, including transition and physical risks, over the medium to longer term are taken into account in assessing the risks of the cash flows. Impacts on the underlying assumptions on future forecasts of CGUs and their portfolio strategy are considered. Sales growth, margin evolution and terminal growth are adjusted if necessary, considering the resilience of the CGUs to climate change risks as well as Nestlé's commitments to tackle climate change (including the Group's "Net Zero Roadmap"). In addition, the headroom of the CGUs is compared to information obtained from Nestlé's climate scenario modeling prepared in accordance with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). The outcomes of the scenarios analyzed (selected high, intermediate and low emissions scenarios) are probability weighted and proportionally allocated and compared to the headroom of each CGU. The process did not lead to any impairment charges.
- The terminal growth rates are determined to reflect the long-term view of the nominal evolution of the business taking into account the latest outlook for long-term inflation.
- The cash flows, discount rates and terminal growth rates include inflation.

The Group assesses the uncertainty of these estimates by performing sensitivity analyses. Management believes that no reasonably possible change in any of the above key assumptions would cause the CGU's recoverable amount to fall below its carrying amount except for the CGU Nestlé Health Science, mainly related to the performance of The Bountiful Company (TBCo) business. For this CGU, changes in the key assumptions greater than the amounts below (most likely for the annual margin evolution) would lead to the fair value less costs of disposal being less than the carrying amount:

	Nestlé Health Science Sensitivity
Average annual sales growth	Decrease by 430 basis points
Annual margin evolution	Decrease by 260 basis points
Terminal growth rate	Decrease by 120 basis points
Discount rate	Increase by 90 basis points

10. Employee benefits

10.1 Employee remuneration

The Group's salary expenses of CHF 10 368 million (2023: CHF 10 399 million) and welfare expenses of CHF 4085 million (2023: CHF 3938 million) represent a total of CHF 14 453 million (2023: CHF 14 337 million). In addition, certain Group employees are eligible for long-term incentives in the form of equity compensation plans, for which the cost amounts to CHF 147 million (2023: CHF 207 million). Employee remuneration is allocated to the appropriate headings of expenses by function (see Note 1, section Expenses).

10.2 Post-employment benefits

The liabilities of the Group arising from defined benefit obligations, and the related current service cost, are determined using the projected unit credit method. Actuarial advice is provided both by external consultants and by actuaries employed by the Group. The actuarial assumptions used to calculate the defined benefit obligations vary according to the economic conditions of the country in which the plan is located. Such plans are either funded or unfunded. The deficit or excess of the fair value of plan assets over the present value of the defined benefit obligations is recognized as a liability or an asset on the balance sheet.

Pension costs charged to the income statement consist of service cost (current and past service cost, gains and losses arising from curtailment and settlement) and administration costs (other than costs of managing plan assets), which are allocated to the appropriate heading by function, and net interest expense or income, which is presented as part of net financial income/(expense). The actual return less interest income on plan assets, changes in actuarial assumptions, and differences between actuarial assumptions and what has actually occurred are reported in other comprehensive income. Some benefits are also provided by defined contribution plans. Contributions to such plans are charged to the income statement as incurred.

Certain disclosures are presented by geographic area. The five regions disclosed are North America (NA), Europe (EUR), Asia, Oceania and Africa including Middle East (AOA), Latin America (LATAM) and Greater China (GC). Each region includes the corresponding Zones as well as the portion of the GMB activity in that region.

Pensions and retirement benefits

Apart from legally required social security arrangements, the majority of Group employees are eligible for benefits through pension plans in case of retirement, death in service, disability and resignation. Those plans are either defined contribution plans or defined benefit plans based on pensionable remuneration and length of service.

The Group manages its pension plans by geographic area and the major plans, classified as defined benefit plans under IAS 19, are located in EUR (Switzerland, United Kingdom and Germany) and in NA (USA). In accordance with applicable legal frameworks, these plans have governing bodies which have a fiduciary responsibility to oversee the management of the plans. The Group oversees the pension plans through the Group Corporate Pension Board.

In Switzerland, Nestlé's pension plan is a cash balance plan where contributions are expressed as a percentage of the pensionable salary. The pension plan guarantees the amount accrued on members' savings accounts, as well as a minimum interest on those savings accounts. At retirement date, the savings accounts are converted into pensions. However, members may opt to receive part of the pension as a lump sum. Increases of pensions in payment are granted on a discretionary basis by the Board of Trustees, subject to the financial situation of the plan. Following a decrease in conversion rates applicable since July 1, 2018, the Group has committed to make additional contributions and has contributed CHF 251 million as at December 31, 2024. CHF 34 million is still expected to be paid until 2038.

In the United Kingdom, Nestlé's pension plan is a hybrid arrangement combining a defined benefit career average section plus a defined contribution section. The defined benefit section was closed to new entrants during 2016. In the defined benefit section, from August 2017 onwards, members accrue a pension defined on their capped salary each year, plus defined contribution provision above the capped salary. Accrued pensions are automatically revalued according to inflation, subject to caps. Similarly, pensions in payment are increased annually in line with inflation, subject to caps as applicable. At retirement, there is a lump sum option. Finally, the funding of the Nestlé UK Pension Fund is defined on the basis of a triennial independent actuarial valuation in accordance with local regulations. Based on the last triennial valuation as at December 31, 2021, no deficit contributions are payable under the current schedule of contributions. The results of the triennial valuation as at December 31, 2024 should be available by March 2026, which corresponds to the statutory completion date.

In Germany, there are cash balance plans, where members benefit from a guarantee on their savings accounts. Contributions to the plans are expressed as a percentage of the pensionable salary. Increases to pensions in payment are granted in accordance with legal requirements. There is also a heritage plan, based on final pensionable salary, which has been closed to new entrants since 2006.

In the USA, Nestlé's primary pension plan is a pension equity design, under which members earn pension credits each year based on a schedule related to the sum of their age and service with Nestlé. A member's benefit is the sum of the annual pension credits earned, multiplied by an average earning payable as a lump sum. However, in lieu of the lump sum, members have the option of converting the benefit to a monthly pension annuity. The plan does not provide for automatic pension increases and members do not contribute to the plan. This plan was closed to new entrants at the end of 2015 and replaced by a defined contribution scheme.

Post-employment medical benefits and other employee benefits

Subsidiaries, principally in NA and LATAM, maintain medical benefit plans, classified as defined benefit plans under IAS 19, which cover eligible retired employees. The obligations for other employee benefits consist mainly of end-of-service indemnities, which do not have the character of pensions.

Risks related to defined benefit plans

The main risks to which the Group is exposed in relation to operating defined benefit plans are:

- market and liquidity risks: these are the risks that the investments do not meet the expected returns over the medium to long term. This also encompasses the mismatch between assets and liabilities. In order to minimize the risks, the structure of the portfolios is reviewed and asset-liability matching analyses are performed on a regular basis when relevant.
- mortality risk: the assumptions adopted by the Group make allowance for future improvements in life expectancy. However, if life expectancy improves at a faster rate than assumed, this would generally result in greater payments from the plans and consequent increases in the plans' liabilities. In order to minimize this risk, mortality assumptions are reviewed on a regular basis.

As certain of the Group's pension arrangements permit benefits to be adjusted in the case that downside risks emerge, the Group does not always have full exposure to the risks described above.

Plan amendments and restructuring events

Plans within the Group are regularly reviewed as to whether they are aligned with market practice in the local context. Should a review indicate that a plan needs to be changed, prior agreement with the local governing body, the regulator and, if applicable, the members is sought before implementing plan changes.

In 2024, as in 2023, there were plan amendments and restructuring activities (among others risk transfer transactions related to medical and retirement liabilities of pensioners) leading to curtailments and settlements, individually not significant, amounting to a net income of CHF 1 million (2023: CHF 23 million net cost).

Asset-liability management and funding arrangement

Governing bodies are responsible for determining the mix of asset classes and target allocations of Nestlé's plans with the support of investment advisors and/or local asset management firms. Periodic reviews of the asset mix are made by external parties to assess the adequacy of the portfolio's structure. Such analyses aim at dynamically comparing the fair value of the assets and liabilities in order to determine the most adequate strategic asset allocation.

The overall investment policy and strategy for the Group's funded defined benefit plans are guided by the objective of achieving an investment return which, together with the contributions paid, is sufficient to maintain reasonable control over the various funding risks of the plans. To the extent possible, the risks are shared equally amongst the different stakeholders. As those risks evolve with the development of capital markets and asset management activities, the Group addresses the assessment and control process of the major investment pension risks. In order to protect the Group's defined benefit plans funding ratio and to mitigate the financial risks, protective measures on the investment strategies are in force. Risks pertaining to sustainability, social and climate factors are also taken into consideration. The Group has a policy guiding the pension plan governing bodies to review the impact of climate risk on their investment portfolios and apply TCFD recommendations in case it is required by local pension legislation.

10.2a Reconciliation of assets and liabilities recognized in the balance sheet

In millions of CHF

Classification (to)/from held-for-sale and change of scope of consolidation, net	—	—	—	8	—	8
Transfer (from)/to defined contribution plans	—	—	—	—	—	—
As at December 31	(18 700)	(138)	(18 838)	(18 158)	(129)	(18 287)

The major classes of plan assets as a percentage of total plan assets of the Group's defined benefit plans are as follows:

	2024	2023
Equities ^(a)	21%	19%
of which US equities	4%	4%
of which European equities	13%	12%
of which other equities	4%	3%
Debts	55%	51%
of which government debts ^(a)	34%	35%
of which corporate debts ^(b)	21%	16%
Real estate ^(b)	13%	12%
Alternative investments ^(b)	9%	9%
of which hedge funds	2%	2%
of which private equities	6%	6%
of which infrastructure	1%	1%
Cash/deposits	2%	9%

(a) Almost all have a quoted market price in an active market.

(b) Almost all are either not quoted or are quoted in a market which is not active.

Equities and government debts represent 55% (2023: 54%) of the plan assets. Almost all of them are quoted in an active market. Corporate debts, real estate, hedge funds, private equities and infrastructure represent 43% (2023: 37%) of the plan assets. Almost all of them are either not quoted or quoted in a market which is not active.

The plan assets of funded defined benefit plans include property occupied by subsidiaries with a fair value of CHF 3 million (2023: CHF 8 million). Furthermore, funded defined benefit plans may invest in Nestlé S.A. (or related) shares. The Group's investment management principles allow such investment only when the position in Nestlé S.A. (or related) shares is passive, i.e. in line with the weighting in the underlying benchmark. There was no direct active investment as at the end of 2024 and 2023.

The Group expects to contribute CHF 466 million to its funded defined benefit plans in 2025.

10.2e Unrecognized assets

Movements of unrecognized assets and fair value of plan assets including asset ceiling are as follows:

10.2h Principal financial actuarial assumptions

The principal financial actuarial assumptions are presented by geographic area. Each item is a weighted average in relation to the relevant underlying component.

	2024						2023					
	EUR	NA	AOA	LATAM	GC	Total	EUR	NA	AOA	LATAM	GC	Total
Discount rates	2.5%	5.5%	5.7%	10.0%	2.8%	3.4%	2.6%	5.0%	5.8%	8.7%	3.0%	3.5%
Expected rates of salary increases	2.0%	3.6%	4.7%	4.1%	3.5%	2.6%	2.0%	3.6%	4.7%	4.4%	3.1%	2.6%
Expected rates of pension adjustments	1.0%	0.0%	1.6%	1.8%	0.0%	0.9%	1.0%	0.0%	1.7%	2.1%	0.0%	0.9%
Medical cost trend rates ^(a)		6.8%		6.6%		6.7%		6.3%		6.6%		6.4%

(a) Medical cost trend rates represent the expected medical cost trend rates for next year. For plans in USA and Canada, the medical cost trend rate is assumed to decrease to 4.5% by 2035 and 4% by 2040. As for the largest plan in LATAM, the related medical cost trend of 6.6% corresponds to an estimated long-term average increase. Some non-material post-employment medical plans in EUR and AOA have not been included in the average.

10.2i Mortality tables and life expectancies by geographic area for the Group's major defined benefit pension plans

Expressed in years

		2024	2023	2024	2023
		Life expectancy at age 65 for a male member currently aged 65		Life expectancy at age 65 for a female member currently aged 65	
Country	Mortality table				
EUR					
Switzerland	LPP 2020	21.9	21.9	23.7	23.6
United Kingdom	S4NA	20.6	20.6	22.4	23.3
Germany	Heubeck Richttafeln 2018	21.6	21.4	23.9	23.8
NA					
USA	Pri-2012	20.7	20.7	22.7	22.6

Life expectancy is reflected in the defined benefit obligations by using the best estimate of the mortality of plan members. When appropriate, base tables are adjusted to take into consideration expected changes in mortality, e.g. allowing for future longevity improvements.

10.2j Sensitivity analyses on present value of defined benefit obligations by geographic area

The table below gives the present value of the defined benefit obligations when major assumptions are changed.

11. Provisions and contingencies

Provisions

Provisions comprise liabilities of uncertain timing or amount that arise from restructuring plans, environmental, litigation and other risks. Provisions are recognized when a legal or constructive obligation stemming from a past event exists and when the future cash outflows can be reliably estimated. Provisions are measured at the present value of the expenditures unless the impact of discounting is immaterial. Obligations arising from restructuring plans are recognized when detailed formal plans have been established and when there is a valid expectation that such plans will be carried out by either starting to implement them or announcing their main features. Obligations under litigation reflect Group Management's best estimate of the outcome based on the facts known at the balance sheet date.

Contingent assets and liabilities

Contingent assets and liabilities are possible rights and obligations that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not fully within the control of the Group.

11.1 Provisions

of which expected to be settled within 12 months					675

(a) Including discounting of provisions.

Restructuring

Restructuring provisions arise from a number of projects across the Group. These include plans to optimize production, sales and administration structures, mainly allocated to Zone EUR and Zone GC. Restructuring provisions are expected to result in future cash outflows when implementing the plans (usually over one to three years).

Legal and indirect tax

Legal provisions have been established to cover legal and administrative settlements that arise in the course of business. Indirect tax provisions include disputes and uncertainties on non-income taxes (mainly VAT and sales taxes). They cover numerous separate cases whose detailed disclosure could be detrimental to the Group's interests. The Group does not believe that any of these cases will have a material adverse impact on its financial position. The timing of outflows is uncertain as it depends upon the outcome of the cases. Group Management does not believe it is possible to make assumptions on the evolution of these cases beyond the balance sheet date.

Other

Other provisions are mainly constituted by onerous contracts and various damage claims that occurred during the year but were not covered by insurance companies. Onerous contracts result from the termination of contracts or supply agreements above market prices in which the unavoidable costs of meeting the obligations under the contracts exceed the economic benefits expected to be received or for which no benefits are expected to be received.

11.2 Contingencies

The Group is exposed to contingent liabilities amounting to a maximum possible payment of CHF 2195 million (2023: CHF 2405 million) representing possible payments for litigations of CHF 2194 million (2023: CHF 2401 million) and payments for other items of CHF 1 million (2023: CHF 4 million). Possible payments for litigations relate mainly to various investigations as well as labor, civil and tax litigations in LATAM.

With food safety as a primary goal, operating practices at some of Nestlé's natural mineral water production sites may not be in line with the applicable regulatory framework. The Group has not identified material liabilities as at the balance sheet date related to these practices. In this context, no material provisions were recognized nor were material contingent liabilities identified.

Contingent assets for litigation claims in favor of the Group amount to a probable recoverable amount of CHF 18 million (2023: CHF 18 million), mainly in LATAM.

12. Financial instruments

Financial assets – classes and categories

The classification of financial assets is generally based on the business model in which a financial asset is managed as well as its contractual cash flow characteristics. The Group classifies financial assets in the following categories:

- measured at amortized cost;
- measured at fair value through the income statement (abbreviated as FVTPL, fair value through profit or loss); and
- measured at fair value through Other comprehensive income (abbreviated as FVOCI).

For an equity investment that is not held for trading, the Group may irrevocably elect to classify it as measured at FVOCI. This election is made at initial recognition on an investment by investment basis.

Financial assets – recognition and derecognition

The settlement date is used for initial recognition and derecognition of financial assets, as these transactions are generally under contracts whose terms require delivery within the time frame established by regulation or convention in the market place (regular-way purchase or sale). Financial assets are derecognized when substantially all of the Group's rights to cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

Financial assets – measurement

Financial assets are initially recognized at fair value plus directly attributable transaction costs. However, when a financial asset measured at FVTPL is recognized, the transaction costs are expensed immediately. Subsequent remeasurement of financial assets is determined by their category, which is revisited at each reporting date.

Commercial paper and time deposits are held by the Group's treasury unit in a separate portfolio in order to mitigate the credit risk exposure of the Group and provide interest income. The Group considers that these investments are held within a business model whose objective is achieved by collecting contractual cash flows. The contractual terms of these financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. These assets have therefore been classified as measured at amortized cost.

Investments in equities, debt funds, equity funds as well as other financial assets not giving rise on specified dates to cash flows that are solely payments of principal and interest are classified at FVTPL. These investments are mainly related to liquidity management and self-insurance activities.

Financial assets – impairment

The Group assesses whether its financial assets carried at amortized cost and FVOCI are impaired on the basis of expected credit losses (ECL). This analysis requires the identification of significant increases in the credit risk of the counterparties. Considering that the majority of the Group's financial assets are trade receivables, the analysis also integrates statistical data reflecting the past experience of losses incurred due to default, as well as any relevant forward-looking information. See Note 7.1 for impairments related to trade receivables.

The Group measures loss allowances for investments in debt securities and time deposits that are determined to have low credit risk at the reporting date at an amount equal to 12 months' expected credit losses. The Group considers a debt security to have low credit risk when the credit rating is 'investment grade' according to internationally recognized rating agencies.

To assess whether there is a significant increase in credit risk since initial recognition, the Group considers available reasonable and supportive information, such as changes in the credit rating of the counterparty. If there is a significant increase in credit risk, the loss allowance is measured at an amount equal to lifetime expected losses.

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls due to a credit default event of the counterparty (i.e. the difference between the cash flows in accordance with the contract and the cash flows that the Group expects to receive).

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets. For debt securities at FVOCI, the loss allowance is recognized in Other comprehensive income, instead of reducing the carrying amount of the asset.

Impairment losses on other financial assets related to treasury activities are presented under Financial expenses.

The model and some of the assumptions used in calculating these ECLs are key sources of estimation uncertainty.

Financial liabilities at amortized cost

Financial liabilities are initially recognized at fair value, net of transaction costs incurred.

Subsequent to initial measurement, financial liabilities are recognized at amortized cost. The difference between the initial carrying amount of the financial liabilities and their redemption value is recognized in the income statement over the contractual term, using the effective interest rate method. This category includes the following classes of financial liabilities: trade and other payables, commercial papers, bonds, lease liabilities and other financial liabilities.

Financial liabilities at amortized cost are classified as current or non-current, depending on whether they are due within 12 months after the balance sheet date or beyond.

Financial liabilities are derecognized (in full or partly) when either the Group is discharged from its obligation, they expire, they are cancelled or they are replaced by a new liability with substantially modified terms.

(a) Carrying amount of these instruments is a reasonable approximation of their fair value. For bonds included in financial debt, see Note 12.1d.

(b) Liquid assets are composed of cash and cash equivalents and short-term investments.

(c) Include derivatives held in hedge relationships and those that are undesignated (categorized as held-for-trading), see Note 12.2d.

12.1b Fair value hierarchy of financial instruments

The Group classifies the fair value of its financial instruments in the following hierarchy, based on the inputs used in their valuation:

- Level 1: the fair value of financial instruments quoted in active markets is based on their quoted closing price at the balance sheet date. Examples include exchange-traded commodity derivatives and financial assets such as investments in equity and debt securities.
- Level 2: the fair value of financial instruments that are not traded in an active market is determined by using valuation techniques based on observable market data. Such valuation techniques include discounted cash flows, standard valuation models based on market parameters for interest rates, yield curves or foreign exchange rates, dealer quotes for similar instruments and comparable arm's length transactions. For example, the fair value of forward exchange contracts, currency swaps and interest rate swaps is determined by discounting estimated future cash flows.
- Level 3: the fair value of financial instruments that are measured on the basis of entity specific valuations using inputs that are not based on observable market data (unobservable inputs). When the fair value of unquoted instruments cannot be measured with sufficient reliability, the Group carries such instruments at cost less impairment, if applicable.

(a) Subject to an interest rate and currency swap that creates a liability at fixed rates in the currency of the issuer.

(b) Sold in the United States only to qualified institutional buyers and outside the United States to non-US persons.

12.2 Financial risks

In the course of its business, the Group is exposed to a number of financial risks: credit risk, liquidity risk, market risk (including foreign currency risk and interest rate risk, commodity price risk and equity price risk). This Note presents the Group's objectives, policies and processes for managing its financial risk and capital.

Financial risk management is an integral part of the way the Group is managed. The Board of Directors determines the financial control principles as well as the principles of financial planning. The Chief Executive Officer organizes, manages and monitors all financial risks, including asset and liability matters.

The Asset and Liability Management Committee (ALMC) chaired by the Chief Financial Officer, is the governing body for the establishment and subsequent execution of the Nestlé Group's Financial Asset and Liability Management Policy. It ensures implementation of strategies and achievement of objectives of the Group's financial asset and liabilities management, which are executed by the Center Treasury, the Regional Treasury Centers and, in specific local circumstances, by the subsidiaries. Approved treasury management guidelines define and classify risks as well as determine, by category of transaction, specific approval, execution and monitoring procedures. The activities of the Center Treasury and of the Regional Treasury Centers are monitored by an independent Middle Office, which verifies the compliance of the strategies and/or operations with the approved guidelines and decisions taken by the ALMC.

12.2a Credit risk

Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. Credit risk arises on financial assets (liquid, non-current and derivatives) and on trade and other receivables.

The Group aims to minimize the credit risk of liquid assets, non-current financial assets and derivative assets through the application of risk management policies. Credit limits are set based on each counterparty's size and risk of default. The methodology used to set the credit limit considers the counterparty's balance sheet, credit ratings, risk ratios and default probabilities. Counterparties are monitored regularly, taking into consideration the evolution of the above parameters, as well as their share prices and credit default swaps. As a result of this review, changes on credit limits and risk allocation are carried out. The Group avoids the concentration of credit risk on its liquid assets by spreading them over several institutions and sectors.

Trade receivables are subject to credit limits, control and approval procedures in all the subsidiaries. Due to its large geographic base and number of customers, the Group is not exposed to material concentrations of credit risk on its trade receivables (see Note 7.1). Nevertheless, commercial counterparties are constantly monitored in accordance with the same methodology used for financial counterparties.

The maximum exposure to credit risk resulting from financial activities, without considering netting agreements and without taking into account any collateral held or other credit enhancements, is equal to the carrying amount of the Group's financial assets.

Credit rating of financial assets

This includes liquid assets, non-current financial assets and derivative assets. The credit risk of the financial assets is assessed based on the risk of the counterparties, including the associated country risk. The Group uses an internationally recognized credit scale to present the information. The Group deals mainly with financial institutions located in Switzerland, the European Union and North America.

12.2b Liquidity risk

Liquidity risk management

Liquidity risk is the risk that a company may encounter difficulties in meeting its obligations associated with financial liabilities that are settled by delivering cash or other financial assets. Such risk may result from inadequate market depth or disruption or refinancing problems. The Group's objective is to manage this risk by limiting exposures to financial instruments that may be affected by liquidity problems and by maintaining sufficient back-up facilities. The Group does not expect any refinancing issues and in October 2024 successfully extended the term of both its revolving credit facilities:

- A USD 3.1 billion and EUR 3.7 billion revolving credit facility with an initial maturity date of October 2025. The Group has the ability to convert the facility into a one-year term loan.
- A USD 2.2 billion and EUR 2.3 billion revolving credit facility with a new maturity date of October 2029.

The facilities serve primarily as a backstop to the Group's short-term debt.

(b) The periods when the cash flow hedges affect the income statement do not differ significantly from the maturities disclosed above.

12.2c Market risk

The Group is exposed to risk from movements in foreign currency exchange rates, interest rates and market prices that affect its assets, liabilities and future transactions.

Foreign currency risk

The Group is exposed to foreign currency risk from transactions and translation.

Transactional exposures arise from transactions in foreign currency. They are managed within a prudent and systematic hedging policy in accordance with the Group's specific business needs through the use of currency forwards, futures, swaps and options.

Exchange differences recorded in the income statement represented a loss of CHF 198 million in 2024 (2023: loss of CHF 452 million). They are allocated to the appropriate headings of expenses by function.

Translation exposure arises from the consolidation of the financial statements of foreign operations in Swiss Francs, which can be subject to hedge.

Value at Risk (VaR) based on historic data for a 250-day period and a confidence level of 95% results in a potential one-day loss for currency risk of less than CHF 2 million in 2024 (2023: less than CHF 10 million).

The Group cannot predict future movements in exchange rates, therefore the above VaR neither represents actual losses nor considers the effects of favorable movements in underlying variables. Accordingly, the VaR may only be considered indicative of future movements to the extent that historic market patterns repeat in the future.

Interest rate risk

The Group is exposed primarily to fluctuations in USD and EUR interest rates. Interest rate risk on financial debt is managed based on duration and interest management targets set by the ALMC through the use of fixed-rate debt and interest rate swaps.

Taking into account the impact of interest derivatives, the proportion of financial debt subject to fixed interest rates for a period longer than one year represents 81% (2023: 83%).

Based on the level of Liquid assets and Debt exposed to floating interest rates at year-end, an increase in interest rates of 100 basis points would cause an increase in Net financing cost of CHF 18 million on an annualized basis (2023: an increase in Net financing cost of CHF 12 million).

Price risk

Commodity price risk

Commodity price risk arises from transactions on the world commodity markets to secure supplies of green coffee, cocoa beans, cereals and grains and other commodities necessary for the manufacture of some of the Group's products.

The Group's objective is to minimize the impact of commodity price fluctuations and this exposure is hedged in accordance with the Nestlé Group's policy on commodity price risk management. The Global Procurement Organization is responsible for managing commodity price risk based on internal directives and centrally determined limits, generally using exchange-traded commodity derivatives. The commodity price risk exposure of future purchases is managed using a combination of derivatives (mainly futures and options) and executory contracts. This activity is monitored by an independent Middle Office. Given the short product business cycle of the Group, the majority of the anticipated future raw material transactions outstanding at the balance sheet date are expected to occur in the next year.

Equity price risk

The Group is exposed to equity price risk on investments. To manage the price risk arising from these investments, the Group diversifies its portfolios in accordance with the guidelines set by the Board of Directors.

12.2d Derivative assets and liabilities and hedge accounting

Derivative financial instruments

The Group's derivatives mainly consist of currency forwards, options and swaps; commodity futures and options and interest rate swaps. Derivatives are mainly used to manage exposures to foreign exchange, interest rate and commodity price risk as described in Note 12.2c Market risk.

Derivatives are initially recognized at fair value at the trade date. They are subsequently remeasured at fair value on a regular basis and at each reporting date as a minimum. The Group applies hedge accounting to hedging relationships that meet the qualifying criteria.

Hedge accounting

The Group designates and documents the use of certain derivatives and other financial assets or financial liabilities as hedging instruments against changes in fair value of recognized assets and liabilities (fair value hedges) and highly probable forecast transactions (cash flow hedges), and against the effects of the translation of net investments in foreign operations (net investment hedges). The effectiveness of such hedges is assessed at inception and verified at regular intervals and at least on a quarterly basis to ensure that an economic relationship exists between the hedged item and the hedging instrument.

The Group generally excludes from the designation of the hedging relationship the hedging cost element. Subsequently, this cost element impacts the income statement at the same time as the underlying hedged item.

For the designation of hedging relationships on commodities, the Group applies the component hedging model when the hedged item is separately identifiable and measurable in the contract to purchase the materials.

Fair value hedges

The Group uses fair value hedges to mitigate foreign currency and interest rate risks of its recognized assets and liabilities, being mostly financial debt.

Changes in fair value of hedging instruments designated as fair value hedges and the adjustments for the risks being hedged in the carrying amounts of the underlying transactions are recognized in the income statement.

Cash flow hedges

The Group uses cash flow hedges to mitigate a particular risk associated with a recognized asset or liability or highly probable forecast transactions, such as anticipated future export sales, purchases of equipment and goods, as well as the variability of expected interest payments and receipts.

The effective part of the changes in fair value of hedging instruments is recognized in Other comprehensive income, while any ineffective part is recognized immediately in the income statement. Ineffectiveness for hedges of foreign currency and commodity price risk may result from changes in the timing of the forecast transactions. When the hedged item results in the recognition of a non-financial asset or liability, including acquired businesses, the gains or losses previously recognized in Other comprehensive income are included in the measurement of the cost of the asset or of the liability. Otherwise the gains or losses previously recognized in Other comprehensive income are recognized in the income statement at the same time as the hedged transaction.

Net investment hedges

The Group uses net investment hedges to mitigate translation exposure on its net investments in subsidiaries.

The effective changes in fair values of hedging instruments are transferred directly to other comprehensive income together with gains or losses on the foreign currency translation of the hedged net investments in the foreign operations. The effective results of net investment hedges are recycled to the income statement when the hedged foreign operation is disposed of.

Undesignated derivatives

Derivatives which are not designated in a hedging relationship are classified as undesignated derivatives. They are used in the framework of approved risk management policies.

(a) The carrying amount of the hedged item recognized in the statement of financial position is approximately equal to the notional amounts of the hedging instruments.

(b) Represent amounts that would be offset in case of default, insolvency or bankruptcy of counterparties.

A description of the types of hedging instruments by risk category is included in Note 12.2c Market risk.

The majority of hedge relationships is established to ensure a hedge ratio of 1:1.

Impact on the income statement of fair value hedges

The majority of fair value hedges are related to financing activities and are included in Net financing cost.

In millions of CHF

	2024	2023
on hedged items	314	(20)
on hedging instruments	(314)	15

Ineffective results of cash flow and net investment hedges are not significant.

12.2e Capital risk management

The Group's capital risk management is driven by the impact on shareholders of the level of total capital employed. It is the Group's policy to maintain a sound capital base to support the continued development of its business.

The Board of Directors seeks to maintain a prudent balance between different components of the Group's capital. The ALMC monitors the capital structure and net financial debt by currency (see Note 16.5 for the definition of net financial debt).

The operating cash flow-to-net financial debt ratio highlights the ability of a business to repay its debts. As at December 31, 2024, the ratio was 29.8% (2023: 32.1%). The Group's subsidiaries have complied with local statutory capital requirements as appropriate.

13. Taxes

The Group is subject to taxes in different countries all over the world. Taxes and fiscal risks recognized in the Consolidated Financial Statements reflect Group Management's best estimate of the outcome based on the facts known at the balance sheet date in each individual country. These facts may include but are not limited to changes in tax laws and interpretation thereof in the various jurisdictions where the Group operates. They may have an impact on the income tax as well as the resulting assets and liabilities. Any differences between tax estimates and final tax assessments are charged to the income statement in the period in which they are incurred, unless anticipated.

Taxes include current and deferred taxes on profit as well as actual or potential withholding taxes on current and expected transfers of income from subsidiaries and tax adjustments relating to prior years. Income tax is recognized in the income statement, except to the extent that it relates to items directly taken to equity or other comprehensive income, in which case it is recognized against equity or other comprehensive income.

Deferred taxes are based on the temporary differences that arise when taxation authorities recognize and measure assets and liabilities with rules that differ from the principles of the Consolidated Financial Statements. They also arise on temporary differences stemming from tax losses carried forward and tax credits.

Deferred taxes are calculated under the liability method at the rates of tax expected to prevail when the temporary differences reverse, subject to such rates being substantially enacted at the balance sheet date. Any changes in the tax rates are recognized in the income statement unless related to items directly recognized against equity or other comprehensive income. Deferred tax liabilities are recognized on all taxable temporary differences excluding non-deductible goodwill. Deferred tax assets are recognized on all deductible temporary differences provided that it is probable that future taxable income will be available. The Group has applied the exception to recognizing and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes.

13.1 Components of taxes recognized in the income statement

In millions of CHF

	2024	2023
Current taxes ^(a)	(2 627)	(2 891)
Deferred taxes	(809)	784
Taxes reclassified to other comprehensive income	234	(215)
Taxes reclassified to equity	(112)	8
Total taxes	(3 314)	(2 314)

(a) Current taxes relating to prior years include a tax income of CHF 120 million (2023: tax income of CHF 8 million).

13.2 Reconciliation of taxes recognized in the income statement

In millions of CHF

		2024		2023
Profit before taxes		13 239		12 703
Expected tax expense at average applicable tax rate ^(a)	19.6%	(2 601)	19.3%	(2 455)
Tax effect of permanent differences on disposal of businesses	0.0%	(3)	0.1%	(13)
Tax effect of other permanent differences	(0.5%)	70	(1.0%)	131
Prior-year taxes ^(b)	(0.5%)	71	(1.6%)	201
Transfers to unrecognized deferred tax assets	2.6%	(348)	1.2%	(151)
Transfers from unrecognized deferred tax assets	(0.2%)	27	(0.2%)	24
Changes in tax rate and similar on deferred taxes	0.1%	(15)	(3.2%)	413
Withholding tax on transfers of income	3.5%	(461)	3.4%	(437)
Other	0.4%	(54)	0.2%	(27)
Tax expense at effective tax rate	25.0%	(3 314)	18.2%	(2 314)

(a) The weighted average applicable tax rate in 2024 increased compared to 2023 as a result of a change in the geographical mix of profits.

(b) In 2023, the prior-year tax credits include a revision of prior-year tax exposure due to progress on resolving audits and agreeing the tax treatment of major intercompany transactions with the tax authorities in certain jurisdictions.

The expected tax expense at the weighted average applicable tax rate is the result from applying the domestic statutory tax rates to profits before taxes of each entity in the country in which it operates. For the Group, the weighted average applicable tax rate varies from one year to the other depending on the relative weight of the profit of each individual entity in the Group's profit as well as changes to the statutory tax rates.

13.3 Reconciliation of deferred taxes by type of temporary differences recognized in the balance sheet

Deferred tax assets	995	1 181
Deferred tax liabilities	(3 767)	(2 886)
Net assets/(liabilities)	(2 772)	(1 705)

13.4 Unrecognized deferred taxes

As at December 31, 2024, the unrecognized deferred tax assets amount to CHF 1273 million (2023: CHF 1108 million).

The deductible temporary differences as well as the unused tax losses and tax credits for which no deferred tax assets are recognized expire as follows:

In millions of CHF		
	2024	2023
Within one year	81	30
Between one and five years	429	444
More than five years	4 277	3 406
	4 787	3 880

In addition, the Group has unremitted earnings that are either considered indefinitely reinvested in foreign subsidiaries or not. For the component of unremitted earnings which is expected to be repatriated in the foreseeable future and which is subject to withholding and other taxes on remittance, a deferred tax liability has been recorded. The unrecognized deferred tax liability on unremitted earnings that are considered indefinitely reinvested is not significant for the Group as the major part of these earnings is not subject to withholding and other taxes on remittance.

13.5 Developments in international taxation

The Organisation for Economic Co-operation and Development (OECD) initiative to combat base erosion and profit shifting (BEPS) has led to the development of a number of measures which countries have already introduced or plan to introduce. These include the Pillar Two initiative, focused on the introduction of a minimum corporate tax rate, with the possibility of top-up taxes being introduced in cases where jurisdictions do not have the minimum tax rate. Pillar Two legislation has been enacted or substantively enacted in Switzerland and in other jurisdictions where the Group operates. The legislation came into effect for the Group's fiscal year commencing on January 1, 2024. Certain jurisdictions fall within the scope of the enacted or substantively enacted legislation and the Group has performed an assessment of the exposure to Pillar Two income taxes.

The assessment of Pillar Two income taxes is based on the latest available information concerning the financial performance of the constituent entities within the Nestlé Group. Based on this assessment, the Pillar Two effective tax rates in the majority of the relevant jurisdictions in which the Group operates exceeds 15%. However, there are a limited number of jurisdictions where the transitional safe harbor relief does not apply and the Pillar Two effective tax rate is projected to be below 15%. The jurisdictions where the anticipated Pillar Two effective tax rate falls below the minimum rate of 15% are not material for the Group and related top-up taxes had no material impact on the Group.

14. Associates and joint ventures

Associates are companies where the Group has the power to exercise a significant influence but does not exercise control. Significant influence is the power to participate in the financial and operating policy decisions of the investee, and the determination of whether the Group has significant influence requires the exercise of judgment. It may be evidenced when the Group has 20% or more of the voting rights in the investee or has obtained representation on the Board of Directors or otherwise participates in the policy-making process of the investee.

Joint ventures are contractual arrangements over which the Group exercises joint control with partners and where the parties have rights to the net assets of the arrangement.

Associates and joint ventures are accounted for using the equity method. The interest in the associate or joint venture also includes loans which are in substance extensions of the Group's investment in the associate or joint venture. Share of results includes the interest income related to those loans. The net assets and results are adjusted to comply with the Group's accounting policies. The carrying amount of goodwill arising from the acquisition of associates and joint ventures is included in the carrying amount of Investments in associates and joint ventures.

In millions of CHF

	2024				2023

As at December 31	8 701	3 394	2 231	14 326	7 840	3 278	1 970	13 088

(a) Other movements of carrying amount of associates and joint ventures relate mainly to the Group's share in other movements included in the associates and joint ventures statement of changes in equity.

In 2024, the increase in investments of Other associates is mainly related to participation on fund raising of IVC Evidensia of CHF 271 million, and to investment into solar energy related partnership in the USA of CHF 161 million. In 2024, the decrease of investments in Other associates relates mainly to reclassifications of participations in associates to financial investments, and non-cash distributions of assets by an associate.

In 2023, the increase in investments of Joint ventures is mainly related to the creation with private equity firm PAI Partners of a joint venture for the European frozen pizza business (see Note 2.1).

In 2023, the increase in investments of Other associates is mainly related to the investment of CHF 212 million into 49.95% shares of YFOOD, a Germany-based company offering ready-to-drink meals across Europe, and to the participation on fund raising of IVC Evidensia of CHF 200 million proportional to our current stake.

As part of the carrying amount of the investment, the value for Associates and joint ventures as at December 31, 2024 includes loans granted by the Group to Associates and joint ventures of CHF 1699 million (2023: CHF 1535 million). In addition, as at December 31, 2024, the Group has potential commitments to acquire other parties' ownership interests in some associates through put mechanisms, which are exercisable in the future, and in one case, dependent on certain performance conditions.

14.3 Joint ventures

The Group holds participation in a number of joint ventures operating in the food and beverage sectors. These joint ventures are individually not significant to the Group, the main ones being Froneri, Cereal Partners Worldwide and European Pizza Group.

14.4 Other information

In 2024, the Group earned CHF 270 million (2023: CHF 266 million) in royalties from joint ventures and associates (see Note 18.2) for the use of its brands, trademarks and other intellectual property.

A list of the principal joint ventures and associates is provided in the section Companies of the Nestlé Group, joint arrangements and associates.

17. Equity

17.1 Share capital issued

The ordinary share capital of Nestlé S.A. issued and fully paid is composed of 2 620 000 000 registered shares with a nominal value of CHF 0.10 each (2023: 2 670 000 000 registered shares). Each share confers the right to one vote. No shareholder may be registered with the right to vote for shares which it holds, directly or indirectly, in excess of 5% of the share capital. Shareholders have the right to receive dividends.

The most recent share buyback program of CHF 20 billion started on January 3, 2022 and was completed on December 23, 2024. The share capital changed in 2024 and 2023 as a consequence of this share buyback program. The cancellations of shares were approved at the Annual General Meetings on April 18, 2024 and April 20, 2023. The share capital was reduced by 50 000 000 shares from CHF 267 million to CHF 262 million in 2024 and by 80 000 000 shares from CHF 275 million to CHF 267 million in 2023. The cancellation of the remaining 43 480 000 shares will be submitted to the shareholders' approval at the Annual General Meeting on April 16, 2025.

17.2 Conditional share capital

The conditional capital of Nestlé S.A. amounts to CHF 10 million as in the preceding year. It confers the right to increase the ordinary share capital, through the exercise of conversion or option rights granted in connection with convertible debentures or debentures with option rights or other financial market instruments, by the issue of a maximum of 100 000 000 registered shares with a nominal value of CHF 0.10 each. Thus, the Board of Directors has at its disposal a flexible instrument enabling it, if necessary, to finance the activities of the Company through convertible debentures.

17.3 Treasury shares

Number of shares in millions of units

	2024	2023
Purpose of holding		
Share buyback program	43.5	44.7
Long-term incentive plans	3.8	4.0
	47.3	48.7

As at December 31, 2024, the treasury shares held by the Group represent 1.8% of the share capital (2023: 1.8%). Their market value amounts to CHF 3541 million (2023: CHF 4748 million).

17.4 Number of shares outstanding

17.5 Translation reserve and other reserves

The translation reserve and other reserves represent the cumulative amount attributable to shareholders of the parent of items that may be subsequently reclassified to the income statement.

The translation reserve comprises the cumulative gains and losses arising from translating the financial statements of foreign operations that use functional currencies other than Swiss Francs. It also includes the changes in the fair value of hedging instruments used for net investments in foreign operations.

The other reserves mainly comprise the Group's share in the items that may be reclassified subsequently to the income statement by the associates and joint ventures (equity reserves accounted for).

The other reserves also comprise the hedging reserve of the subsidiaries. The hedging reserve consists of the effective portion of the gains and losses on hedging instruments related to hedged transactions that have not yet occurred.

17.6 Retained earnings

Retained earnings represent the cumulative profits as well as remeasurement of defined benefit plans attributable to shareholders of the parent.

17.7 Non-controlling interests

The non-controlling interests comprise the portion of equity of subsidiaries that are not owned, directly or indirectly, by Nestlé S.A. These non-controlling interests are individually not material for the Group.

17.10 Dividend

In accordance with Swiss law, the dividend is treated as an appropriation of profit in the year in which it is approved at the Annual General Meeting and subsequently paid.

The dividend relating to 2023 was paid on April 24, 2024, in accordance with the decision taken at the Annual General Meeting on April 18, 2024. Shareholders approved the proposed dividend of CHF 3.00 per share, resulting in a total dividend of CHF 7816 million.

Dividend payable is not accounted for until it has been ratified at the Annual General Meeting. At the Annual General Meeting on April 16, 2025, a dividend of CHF 3.05 per share will be proposed, resulting in an estimated total dividend of CHF 7991 million. For further details, refer to the Financial Statements of Nestlé S.A.

The Consolidated Financial Statements for the year ended December 31, 2024, do not reflect this proposed distribution, which will be treated as an appropriation of profit in the year ending December 31, 2025.

18. Transactions with related parties

18.1 Compensation of the Board of Directors and the Executive Board

Board of Directors

Members of the Board of Directors receive an annual compensation that varies with the Board and the Committee responsibilities as follows:

- Board members: CHF 280 000;
- members of the Chair's and Corporate Governance Committee: additional CHF 200 000 (Chair: CHF 300 000);
- members of the Compensation Committee, the Nomination Committee and the Sustainability Committee: additional CHF 70 000 (Chair: CHF 150 000); and
- members of the Audit Committee: additional CHF 100 000 (Chair: CHF 150 000).

The fees for the Chair of the Board and the CEO are included in their total compensation.

Half of the compensation is paid through the granting of Nestlé S.A. shares at the ex-dividend closing price. These shares are subject to a three-year blocking period.

The full compensation is paid in arrears.

With the exception of the Chair and the CEO, members of the Board of Directors also receive an annual expense allowance of CHF 15 000 each. This allowance covers travel and hotel accommodation in Switzerland, as well as sundry out-of-pocket expenses. For Board members from outside Europe, the Company reimburses additionally their airline tickets. When the Board meets outside of Switzerland, all expenses are borne and paid directly by the Company.

The Chair of the Board is entitled to Nestlé S.A. shares which are blocked for three years.

In millions of CHF

	2024	2023
Chair's compensation	3	3
Other Board members		
Remuneration – cash	3	4
Shares	3	3
Total (a)	9	10

(a) For the detailed disclosures regarding the remunerations of the Board of Directors that are required by Swiss law, refer to the Compensation report of Nestlé S.A. with the audited sections highlighted with a blue bar.

Executive Board

The total annual remuneration of the members of the Executive Board comprises a salary, a bonus (based on the achievement of the Group's objectives, the business and functional objectives as well as the Environmental, Social and Governance (ESG) objectives), equity compensation and other benefits. Members of the Executive Board can choose to receive part or all of their bonus in Nestlé S.A. shares* at the average closing price of the last ten trading days of January of the year of the payment of the bonus. The CEO has to take a minimum of 50% in shares. These shares are subject to a three-year blocking period.

In millions of CHF

	2024	2023

Bonus – cash	15	16
Bonus – shares *	2	5
Equity compensation plans ^(a)	28	17
Pension	4	3
Total ^(b)	69	60

(a) Equity compensation plans are equity-settled share-based payment transactions whose cost is recognized over the vesting period as required by IFRS 2 and for 2024 include replacement grants.

(b) For the detailed disclosures regarding the remunerations of the Executive Board that are required by Swiss law, refer to the Compensation report of Nestlé S.A. with the audited sections highlighted with a blue bar.

* or American Depositary Receipts.

18.2 Transactions with associates and joint ventures

The main transactions with associates and joint ventures are:

- royalties received on brand licensing (see Note 14.4);
- dividends and interest received as well as loans granted (see Note 14);
- purchases and sales of finished and unfinished goods.

18.3 Other transactions

- Group's pension plans considered as related parties, refer to Note 10 Employee benefits;
- Directors of the Group: no personal interest in any transaction of significance for the business of the Group.

19. Guarantees

As at December 31, 2024 and December 31, 2023, the Group has no significant guarantees given to third parties.

20. Effects of hyperinflation

The 2024 and 2023 figures include the following countries considered as hyperinflationary economies:

- Argentina;
- Iran;
- Lebanon;
- Syria;
- Türkiye;
- Venezuela;
- Zimbabwe; and
- Ghana.

None of them has a significant impact on the Group accounts as a result of the application of hyperinflation accounting.

21. Events after the balance sheet date

The values of assets and liabilities at the balance sheet date are adjusted if there is evidence that subsequent adjusting events warrant a modification of these values. These adjustments are made up to the date of approval of the Consolidated Financial Statements by the Board of Directors.

At February 12, 2025, the date of approval for issue of the Consolidated Financial Statements by the Board of Directors, the Group has no subsequent events which either warrant a modification of the value of its assets and liabilities, or any additional disclosures.

As previously announced, Nestlé implemented a new Zone structure as of January 1, 2025. This change in organization will impact the 2025 Financial Statements.

Companies of the Nestlé Group, joint arrangements and associates

In the context of the SIX Swiss Exchange Directive on Information relating to Corporate Governance, the principal affiliated companies are disclosed if they meet at least two of the following three disclosure criteria:

- 1) The amount exceeds **CHF 40 million or equivalent** on:
 - total sales/services for operating companies;
 - financial/property income for sub-holding, financial and property companies;
 - the share held by the Group in their profit for joint ventures and associates; and/or
- 2) The amount exceeds **CHF 20 million or equivalent** on:
 - the total balance sheet for affiliated companies;
 - the Group's investment for joint ventures and associates; and/or
- 3) The average number of employees during the financial year is **equal or greater than 250 FTE.**

Entities directly held by Nestlé S.A. that fall below the disclosure criteria are listed with a °.

A main operating entity in a given country that falls below the disclosure criteria is listed with a ^{NiM}.

All companies listed below are fully consolidated except for:

- 1) Joint ventures accounted for using the equity method;
- 2) Joint operations accounted for in proportion to the Nestlé contractual specified share (usually 50%);
- 3) Associates accounted for using the equity method.

Countries within the continents are listed according to the alphabetical order of the country names.

The percentage of capital shareholding corresponds to voting powers unless stated otherwise.

Technical assistance, research and development units

All scientific research and technological development is undertaken in a number of dedicated centres, specialized as follows:

Technical Assistance centre	TA
Development centres	D
Research centres	R
Research & Development centres	R&D
Product Technology centres	PTC

The Technical Assistance centre is Société des Produits Nestlé S.A. (SPN), a technical, scientific, commercial and business assistance company. The units of SPN, specialized in all areas of the business, supply permanent know-how and assistance to operating companies in the Group within the framework of licence and equivalent contracts. SPN is also responsible for all scientific research and technological development, which it undertakes itself or through affiliated companies.

The centres involved are listed below:

City of operations				
Switzerland				
Nestlé Research	Ecublens			R
Nestlé Product Technology Centre Coffee	Orbe			PTC
Nestlé Product Technology Centre Nutrition	Konolfingen			PTC

To the General Meeting of
Nestlé S.A., Cham & Vevey

Lausanne, 12 February 2025

Report of the statutory auditor

Report on the audit of the consolidated financial statements

Opinion

We have audited the consolidated financial statements of Nestlé S.A. and its subsidiaries (the Group), which comprise the consolidated balance sheet as at 31 December 2024, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated cash flow statement and the consolidated statement of changes in equity for the year then ended, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the consolidated financial statements (pages 80 to 176) give a true and fair view of the consolidated financial position of the Group as at 31 December 2024, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with IFRS Accounting Standards and comply with Swiss law.

Basis for opinion

We conducted our audit in accordance with Swiss law, International Standards on Auditing (ISA) and Swiss Standards on Auditing (SA-CH). Our responsibilities under those provisions and standards are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements" section of our report. We are independent of the Group in accordance with the provisions of Swiss law, together with the requirements of the Swiss audit profession, as well as those of the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the “Auditor’s responsibilities for the audit of the consolidated financial statements” section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the consolidated financial statements.

Measurement of revenue as it relates to trade spend

Risk

As described in Notes 1 and 3 of the consolidated financial statements, revenue from the sale of goods is recognized when control of the goods has transferred to the customer and is measured net of discounts, allowances and promotional rebates (collectively ‘trade spend’). For certain trade spend arrangements settled retrospectively, Management estimates the level of trade spend using judgments based on historical experience and the specific terms of the agreements with the customers. The measurement of revenue, therefore, involves estimates related to various arrangements with a broad customer base across different countries.

Organic growth, which represents sales growth after removing the impact of acquisitions and divestitures and exchange rate movements, is an important component in the determination of measurable financial objectives linked to management incentive schemes. There is a risk of revenue being misstated, through error, misinterpretation or misapplication of accounting standards and policies or intentional manipulation, as a result of the pressure that local management may feel to achieve organic growth targets. The nature of the misstatements may include management bias in determining the estimated accrual and related income statement impact and unrecorded accruals resulting in understatement of liability/expense.

We deemed the measurement of trade spend to be a key audit matter due to the materiality and complexity in estimating the amount of trade spend that is ultimately claimed by customers. The estimates require the use of assumptions that are complex, given the high volume and diversity of trade spend arrangements as well as the uncertainty related to future outcomes, including changes in buying patterns resulting from the current economic environment.

Our audit response Our audit procedures included the following:

Accounting policies: We assessed the Group's revenue recognition accounting policies, including the recognition and classification criteria for trade spend.

Processes and controls: We gained an understanding of the types of arrangements, processes, systems and internal controls related to trade spend.

- We tested the integrity of the general IT control environment relating to the most significant IT systems relevant to revenue recognition and tested selected IT application controls.
- We tested selected internal controls in some markets related to measuring and accounting for trade spend.

Data analytics: We evaluated quarterly trends of sales and trade spend. We performed relationship analysis focused on the change in trade spend as a percentage of sales to assess the level of trade spend by category, and by customer, in the context of the local markets. For a sample of trade spend, we considered if those items were classified according to the Group's accounting policies.

Test of details: For a sample of trade spend arrangements, we reconciled key inputs and assumptions used in the estimates with internal and external sources of information, such as the contracts with the relevant customers or other third-party support. We recalculated the accrual and income statement amounts to test mathematical accuracy.

We reviewed manual journal entries impacting trade spend to identify significant or unusual items and obtained underlying documentation.

We assessed the ageing of trade spend accruals. We tested transactions with customers recorded after the reporting date to assess the completeness of accruals and whether recorded in the correct period.

Assessing disclosure: We assessed the disclosure provided in Note 1 and Note 3 of the consolidated financial statements in relation to the relevant accounting standards.

Our results: Our audit procedures did not lead to any reservations concerning the trade spend accrual and related net revenue recognized.

Carrying value of goodwill and indefinite useful life intangibles assets

Risk

As described in Notes 1 and 9 of the consolidated financial statements, the Company has CHF 30.6 billion of goodwill and CHF 16.7 billion of indefinite useful life intangible assets, the sum of which represents 34% of total assets and 129% of equity. For all cash generating units (CGUs) with goodwill and for indefinite useful life intangible assets, indicators of impairment are assessed at each reporting date and an impairment test is performed at least annually.

In 2024, due to increased sensitivity, management has placed additional focus on the Nestlé Health Science CGU, mainly related to the performance of The Bountiful Company (TBCo) business. The sensitivity analysis is disclosed in the Note 9 of the consolidated financial statements.

The assessment of indicators of impairment and impairment testing are subjective in nature. The recoverability of goodwill and indefinite useful life intangible assets is assessed using forecasted financial information within a discounted cash flow model. The recoverable amount is sensitive to changes in key assumptions, including sales growth, operating margins, discount and terminal growth rates. The inputs, including the impacts that climate risks and environmental commitments may have on future cashflows, as well as allocation of assets to CGUs, are subject to management judgment.

Our audit response Our audit procedures included the following:

Determination of cash generating units (CGUs): We gained an understanding of management's judgements with respect to the determination of CGUs. We gained an understanding of the judgements and inputs applied in the allocation of assets to CGUs and recalculated key inputs. We assessed the determination of CGUs and the allocation of assets to those CGUs.

Process and controls: We gained an understanding of the impairment process and confirmed the existence of key controls.

Historical comparisons and current context: We obtained an understanding of the current macro-economic context on forecasted financial information and the outlook for each CGU through both external research and discussions with selected stakeholders within the Group. We compared the forecasted financial information (sales growth and operating margins) with historical data. Where the forecasted financial information differed from our expectations given the current context and historical data, we obtained supporting explanations.

We obtained an understanding of how management considered climate change risks, including transition and physical risks, in the future cashflows of its CGUs. With assistance from our sustainability specialists, we challenged management's assessment and the consistency of potential climate risks across the CGUs as it related to sales growth and operating margin evolution. We evaluated any adjustments made to sales growth, annual operating margin evolution, and terminal growth rates in the impairment models and performed additional sensitivities over these assumptions where needed. Additionally, we gained an understanding of how management used information prepared in accordance with the Taskforce on Climate-related Financial Disclosure (TCFD) framework (as described in Note 9). We assessed the consistency of information used, including the scenario's analyzed and the probability weighting used and recalculated the allocation of the potential climate transition risk.

Personnel interviews: Forecasted financial information (sales growth and operating margins) is forecasted bottom-up and reviewed centrally. We compared judgments made and information obtained both at the local level and at Group level for consistency. We assessed and challenged assumptions with reference to information from market research and perspectives from product category, Zone and Globally Managed Business leadership.

Assessment of methodology: With the assistance of our valuation specialists, we replicated management's impairment models and tested the mathematical accuracy. Further, we assessed the appropriateness of the methodology used and the consistent application thereof to the CGUs tested.

Evaluation of technical parameters: We independently derived a range of weighted average cost of capital (WACC) and terminal growth rates, with the assistance of our valuation specialists, compared these to those calculated by the Group and identified differences in assumptions between the two calculations. We challenged the Group on such differences and assessed the discount rates in relation to other key inputs, including whether the uncertainty with respect to future cashflows is adequately considered.

Sensitivity analysis: Using data analytics, we performed sensitivity analysis around the key assumptions such as sales growth rate, operating margin, terminal growth rate, and WACC. We focused on those assumptions and CGUs that were most sensitive and judgmental.

Assessing indicators of impairment: We obtained management's assessment regarding indicators of impairment and challenged selected indicators based on our knowledge of internal and external factors.

Assessing disclosure: We assessed the adequacy of the disclosure provided in Note 1 and Note 9 of the consolidated financial statements in relation to the relevant accounting standards.

Our results: Our audit procedures did not lead to any reservations concerning the valuation, presentation and disclosure of goodwill or indefinite useful life intangible assets.

Completeness and valuation of uncertain tax positions

Risk

Nestlé's global footprint results in significant complexity as its worldwide operations are subject to a diversity of international tax regulations. The cross-border activity and scrutiny of the transfer pricing applied to intercompany transactions vary by tax jurisdiction. In addition to the complexity of its tax environment, there is a level of unpredictability of tax authority's assessment of Nestlé's tax filings, which inherently results in the application of management judgment in ascertaining reasonable estimates, which may lead to liabilities for uncertain tax positions being understated or overstated.

The identification and valuation of uncertain tax positions is a key audit matter because of the significant level of judgment and expertise required to interpret local country tax legislation and corresponding risks. Nestlé's policy on uncertain tax position can be found in Notes 1 and 13 of the consolidated financial statements.

Our audit response

Our audit procedures included the following:

Processes and controls: We gained an understanding of the processes for identifying, measuring, and recognizing uncertain tax positions both centrally and locally, and confirmed the existence of controls in the process.

Historical comparisons and current context: We obtained an understanding of the current macro-economic context that may affect uncertain tax positions which are recognized or unrecognized. We validated our understanding of the current environment in relation to other key areas of the audit. Furthermore, our tax specialists, including transfer pricing specialists, considered impacts of changes in tax legislation or business operations in the identification, measurement and recognition of uncertain tax positions. We reviewed available information related to significant on-going tax audits. We reviewed the recognized and unrecognized positions in comparison to tax audits' outcomes, when available, and gained an understanding if there were any deviations in the outcome compared to amounts recognized.

Personnel interviews: Through interviews in the local markets and at Group level, we compared judgments made and information obtained for consistency.

Methodology implementation: We assessed the application of the relevant standards, including but not limited to IFRIC 23, Uncertainty over Income Tax Treatments, in the identification, measurement and recognition of uncertain tax positions. With the assistance of our tax specialists, including transfer pricing specialists, we assessed the intercompany transfer pricing models for compliance with applicable laws, regulations and transfer pricing guidelines and evaluated management's judgment regarding tax risks. We reperformed management's calculations of uncertain tax positions.

Key assumptions: In reviewing the calculations, we identified the key assumptions of identified risk provisions, whether recognized or unrecognized, and tested the validity of these assumptions with our tax specialists. The key assumptions include, but are not limited to, number of years for which the risk occurs, use of generally accepted benchmarks, business models within the Group and availability of mutual agreement procedures in the case of disputes related to profit allocation across the Group to reduce double taxation. We focused our attention on those assumptions and inputs that were most sensitive and judgmental.

Our results: Our audit procedures did not lead to any reservations concerning the completeness and valuation of uncertain tax positions.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated financial statements, the stand-alone financial statements, the Compensation Report and our auditor's reports thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Board of Directors' responsibilities for the consolidated financial statements

The Board of Directors is responsible for the preparation of the consolidated financial statements, which give a true and fair view in accordance with IFRS Accounting Standards and the provisions of Swiss law, and for such internal control as the Board of Directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Board of Directors is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law, ISA and SA-CH will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

A further description of our responsibilities for the audit of the consolidated financial statements is located on EXPERTsuisse's website at: <https://www.expertsuisse.ch/en/audit-report>. This description forms an integral part of our report.

Report on other legal and regulatory requirements

In accordance with Art. 728a para. 1 item 3 CO and PS-CH 890, we confirm that an internal control system exists, which has been designed for the preparation of the consolidated financial statements according to the instructions of the Board of Directors.

We recommend that the consolidated financial statements submitted to you be approved.

Notes to the annual accounts

1. Accounting policies

General

Nestlé S.A. (the Company) is the ultimate holding company of the Nestlé Group, domiciled in Cham and Vevey, which comprises subsidiaries, associated companies and joint ventures throughout the world.

The accounts are prepared in accordance with accounting principles required by Swiss law (32nd chapter of the Swiss Code of Obligations). They are prepared under the historical cost convention and on an accrual basis. Where not prescribed by law, the significant accounting and valuation principles applied are described below.

Foreign currency translation

Transactions in foreign currencies are recorded at the rate of exchange at the date of the transaction or, if hedged forward, at the rate of exchange under the related forward contract. Non-monetary assets and liabilities are carried at historical rates. Monetary assets and liabilities in foreign currencies are translated at year-end rates. Any resulting exchange differences are included in the respective income statement captions depending upon the nature of the underlying transactions. The aggregate unrealized exchange difference is calculated by reference to original transaction date exchange rates and includes hedging transactions. Where this gives rise to a net loss, it is charged to the income statement whilst a net gain is deferred.

Hedging

The Company can use forward foreign exchange contracts, options and currency swaps to hedge foreign currency flows and positions. Unrealized foreign exchange differences on hedging instruments are matched and accounted for with those on the underlying asset or liability. Long-term loans, in foreign currencies, used to finance investments in shareholdings are generally not hedged.

The Company also uses interest rate swaps to manage interest rate risk. The swaps are accounted for at fair value at each balance sheet date and changes in the market price are recorded in the income statement.

The positive fair values of forward exchange contracts and interest rate swaps are included in prepayments and accrued income. The negative fair values of forward exchange contracts and interest rate swaps are included in accruals and deferred income.

Income statement

In accordance with Swiss law dividends are treated as an appropriation of profit in the year in which they are ratified at the Annual General Meeting rather than as an appropriation of profit in the year to which they relate.

Taxes

This caption includes taxes on profit, capital and withholding taxes on transfers from Group companies.

Financial assets and shareholdings

The carrying amount of financial assets and shareholdings comprises the cost of investment, excluding the incidental costs of acquisition, less any write-downs.

Financial assets and shareholdings are written down on a conservative basis, taking into account the profitability of the company concerned.

Property, plant and equipment

The Company owns land and buildings which have been depreciated in the past. Office furniture and equipment are fully depreciated on acquisition.

Provisions

Provisions include present obligations as well as contingencies. Provisions for Swiss taxes are made on the basis of the Company's taxable capital, reserves and profit for the year.

Additional information

The Company is integrated within the operations of the Nestlé Group, which presents its consolidated financial statements under IFRS Accounting Standards. In line with art. 961d of the Swiss Code of Obligations, the Company decided to forego presenting the additional information in the notes, the cash flow statement and the management report.

2. Income from Group companies

This represents dividends and other income from Group companies.

3. Profit on disposal and revaluation of assets

This represents mainly the net gains realized on the sale of shareholdings and financial assets.

According to article 5 of the Company's Articles of Association, no person or entity shall be registered with voting rights for more than 5% of the share capital as recorded in the commercial register. This limitation on registration also applies to persons who hold some or all of their shares through nominees pursuant to this article. In addition, article 11 provides that no person may exercise, directly or indirectly, voting rights, with respect to own shares or shares represented by proxy, in excess of 5% of the share capital as recorded in the commercial register. Apart from UBS Fund Management (Switzerland) AG, which disclosed holding 5.547% on May 7, 2024 and BlackRock, Inc., which disclosed holding 5.04% on January 3, 2022, the Company was not aware of any shareholder holding, directly or indirectly, 5% or more of the share capital.

	47 284 961	4 283	48 693 709	5 155

The share capital has been reduced by 50 000 000 shares from CHF 267 million to CHF 262 million through the cancellation of shares purchased as part of the share buyback program. The purchase value of those cancelled shares amounts to CHF 5265 million.

During the year, 48 761 724 shares were purchased as part of the share buyback program for CHF 4429 million.

The Company held 3 804 961 shares to cover long-term incentive plans. During the year, 1 643 323 shares were delivered as part of the Nestlé Group remuneration plans for a total value of CHF 151 million. All treasury shares are valued at acquisition cost.

The total of own shares of 47 284 961 held by Nestlé S.A. as at December 31, 2024 represents 1.8% of the Nestlé S.A. share capital (48 693 709 own shares held as at December 31, 2023 by Nestlé S.A. representing 1.8% of the Nestlé S.A. share capital).

17. Contingencies

As at December 31, 2024, the total of the guarantees mainly for credit facilities granted to Group companies, bonds and commercial paper programs, together with the buyback agreements relating to notes issued, amounted to a maximum of CHF 102 464 million (2023: CHF 95 478 million).

18. Performance Share Units, Restricted Stock Units, Phantom Shares and Shares granted

In millions of CHF

	2024		2023	
	Number	Amount	Number	Amount
Performance Share Units, Restricted Stock Units and Phantom Shares granted to Nestlé S.A. employees ^(a)	288 827	27	184 130	20
Share plan for short-term bonus Executive Board ^(b)	94 057	9	41 683	5
Share plan for Board members ^(c)	—	6	—	6
	382 884	42	225 813	31

(a) Performance Shares and Restricted Stock Units are valued at the average closing price of the first ten trading days, after the publication of the annual results (for the Grant in March) and of the last ten trading days of September (for the Grant in October), corresponding to CHF 93.07 (Grant in March) and CHF 84.58 (Grant in October). Includes 252 530 Performance Share Units granted to Executive Board by Nestlé S.A. (2023: 161 202) and 6958 Phantom Shares (2023: 0). Note that Performance Share Units and Phantom Shares allocated and revoked in the same year are not disclosed.

(b) Nestlé S.A. shares received as part of the short-term bonus are valued at the average closing price of the last ten trading days of January. For 2024 this amount includes replacement grants with an allocation price of CHF 91.76.

(c) The Board is paid in arrears (25% in October 2024 and 75% in April 2025). The Nestlé S.A. shares equivalent to 50% of the annual remuneration will be delivered at the end of the Board year in April 2025. They will be valued at the closing price of the share on the SIX Swiss Exchange on the ex-dividend date 2025. The actual number of shares delivered will be published in the Nestlé S.A. 2025 Financial Statements. In 2024, 68 737 shares were delivered to the Board.

19. Full-time equivalents

For Nestlé S.A., the annual average number of full-time equivalents for the reporting year, as well as the previous year, did not exceed 250.

20. Events after the balance sheet date

There are no subsequent events which either warrant a modification of the value of the assets and liabilities or any additional disclosure.

Proposed appropriation of available earnings

In CHF	2024	2023
Retained earnings		
Profit brought forward	12 012 895 538	16 204 510 328
Dividends on own shares not distributed ^(a)	193 602 975	283 919 753
Cancellation of 50 000 000 shares (share buyback program) (2023: cancellation of 80 000 000 shares)	(5 264 652 067)	(9 136 617 465)
Profit for the year	10 596 079 783	12 671 082 922
	17 537 926 229	20 022 895 538
We propose the following appropriation:		
Dividend for 2024, CHF 3.05 per share on 2 620 000 000 shares ^(b) (2023: CHF 3.00 on 2 670 000 000 shares)	7 991 000 000	8 010 000 000
	7 991 000 000	8 010 000 000
Retained earnings to be carried forward	9 546 926 229	12 012 895 538

(a) The amount of CHF 8 010 000 000 proposed to be distributed as dividend for 2023 was reduced by CHF 193 602 975 due to 64 534 325 treasury shares held by the Nestlé Group at the dividend payment date.

(b) Depending on the number of shares issued as of the last trading day with entitlement to receive the dividend (April 17, 2025). No dividend is paid on treasury shares held by the Nestlé Group.

Provided that the proposal of the Board of Directors is approved by the Annual General Meeting, the gross dividend will amount to CHF 3.05 per share, representing a net amount of CHF 1.9825 per share after payment of the Swiss withholding tax of 35%. The last trading day with entitlement to receive the dividend is April 17, 2025. The shares will be traded ex-dividend as of April 22, 2025. The net dividend will be payable as from April 24, 2025.

The Board of Directors

Cham and Vevey, February 12, 2025

To the General Meeting of
Nestlé S.A., Cham & Vevey

Lausanne, 12 February 2025

Report of the statutory auditor

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Nestlé S.A. (the Company), which comprise the balance sheet as at 31 December 2024, the income statement for the year ended, and notes to the annual accounts (page 193 to 201, including a summary of significant accounting policies).

In our opinion, the financial statements comply with Swiss law and the Company's articles of association.

Basis for opinion

We conducted our audit in accordance with Swiss law and Swiss Standards on Auditing (SA-CH). Our responsibilities under those provisions and standards are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We are independent of the Company in accordance with the provisions of Swiss law and the requirements of the Swiss audit profession, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

We have determined that there are no key audit matters to be communicated in our report.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated financial statements, the stand-alone financial statements, the Compensation Report and our auditor's reports thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Board of Directors' responsibilities for the financial statements

The Board of Directors is responsible for the preparation of the financial statements in accordance with the provisions of Swiss law and the Company's articles of incorporation, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law and SA-CH will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on EXPERTsuisse's website at: <https://www.expertsuisse.ch/en/audit-report>. This description forms an integral part of our report.

Report on other legal and regulatory requirements

In accordance with Art. 728a para. 1 item 3 CO and PS-CH 890, we confirm that an internal control system exists, which has been designed for the preparation of the financial statements according to the instructions of the Board of Directors.

Based on our audit in accordance with Art. 728a para. 1 item 2 CO, we confirm that the proposal of the Board of Directors complies with Swiss law and the Company's articles of association. We recommend that the financial statements submitted to you be approved.
