Forward looking statements

Certain statements contained herein are "forward-looking statements" within the meaning of applicable securities laws and regulations. These forward-looking statements can generally be identified by the use of words such as "outlook," "guidance," "anticipate," "enable," "expect," "believe," "could," "confident," "feel," "forecast," "intend," "designed," "may," "on path," "on track," "plan," "positioned," "potential," "project," "should," "target," "will," "would," and similar words. Forward-looking statements by their nature address matters that are, to different degrees, uncertain. These statements are based on the current expectations of our management, are not predictions of actual performance, and actual results may differ materially.

Forward-looking statements are subject to a number of risks and uncertainties and actual results may differ materially. These risks and uncertainties include, but are not limited to, global economic uncertainty or economic downturns, tariffs or the imposition of new tariffs, trade wars, barriers or restrictions, or threats of such actions and related uncertainty; the possibility that we are unable to successfully integrate GHOST Lifestyle LLC into our business; disruption of our manufacturing and distribution operations or supply chain; our operating in intensely competitive categories; our ability to effectively respond to changing consumer preferences and shopping behavior; concerns about the safety, quality or health effects of our products; damage to our reputation or brand image; our ability to successfully manage our acquisitions and investments in new businesses or brands; our ability to realize benefits or successfully manage the potential negative consequences of our productivity initiatives; requirements for substantial investment and upgrading of our facilities and operations; our dependence on key information systems, and our exposure to business disruptions due to our use of information technology; substantial disruption at our manufacturing and distribution facilities; infringement of intellectual property rights, and adverse events regarding licensed intellectual property; our ability to attract, retain, develop and motivate a highly skilled and diverse workforce, and our ability to effectively manage changes in our workforce; our ability to renew collective bargaining agreements on satisfactory terms, or union activity; increases in our cost of employee benefits; reductions in our payment terms with our suppliers; the consummation of our share repurchase program or the effectiveness of such program to enhance long-term stockholder value; significant impairments of the value of our goodwill and other indefinite-lived intangible assets; our dependence on third-party bottling and distribution companies for a significant portion of our business; changes in the retail landscape or in sales to any key customer; our ability to maintain strategic relationships with brand owners and private label brands; management of our equity method investments by parties who may have different interests than we do; exposure to business disruptions or other negative impacts from the use of information technology by our third-party commercial partners and service providers; our reliance on the performance of a limited number of suppliers and manufacturers for our brewers, and a limited number of order fulfillment companies for our brewers, beverage concentrates and syrups; recession, financial and credit market disruptions and other political, social or economic conditions; impacts of U.S. and international laws and regulations; exposure to significant liabilities and damage to our reputation resulting from litigation or legal proceedings; increased concerns related to the use or disposal of plastics or other packaging materials; significant additional labeling or warning requirements or limitations on the marketing or sale of our products; our exposure to cybersecurity breaches and other business disruptions due to our use of information technology and third party service providers; our ability to comply with personal data protection and privacy laws; climate change or related legislation; water scarcity and quality; and fluctuations in our effective tax rate. These risks and uncertainties, as well as others, are more fully discussed in the Company's filings with the SEC, including our Annual Report on Form 10-K filed with the SEC on February 25, 2025. While the lists of risk factors presented here and in our public filings are considered representative, no such list should be considered to be a complete statement of all potential risks and uncertainties. Any forward-looking statement made herein speaks only as of the date of this document. We are under no obligation to, and expressly disclaim any obligation to, update, revise or withdraw any forward-looking statements, whether as a result of new information, subsequent events or otherwise, except as required by applicable laws or regulations.

NON-GAAP FINANCIAL MEASURES

This presentation includes certain non-GAAP financial measures, including Adjusted operating income, Adjusted operating margin, Adjusted diluted EPS, Adjusted gross margin, free cash flow and financial metrics presented on a constant currency basis, which differ from results using U.S. Generally Accepted Accounting Principles (GAAP). These non-GAAP financial measures should be considered as supplements to the GAAP reported measures, should not be considered replacements for, or superior to, the GAAP measures and may not be comparable to similarly named measures used by other companies. Non-GAAP financial measures typically exclude certain charges, including one-time costs that are not expected to occur routinely in future periods. The Company uses non-GAAP financial measures internally to focus management on performance excluding these special charges to gauge our business operating performance. Management believes this information is helpful to investors because it increases transparency and assists investors in understanding the underlying performance of the Company and in the analysis of ongoing operating trends. Additionally, management believes that non-GAAP financial measures are frequently used by analysts and investors in their evaluation of companies, and their continued inclusion provides consistency in financial reporting and enables analysts and investors to perform meaningful comparisons of past, present and future operating results. The most directly comparable GAAP financial measures and reconciliations to non-GAAP financial measures are set forth in the Appendix to this presentation and included in the Company's filings with the SEC which are available at www.keurigdrpepper.com.

For reconciliations of reported to adjusted basis and constant currency adjusted basis in the presentation, refer to pages A5-A17 of the earnings release.
