MESSAGE FROM THE CHAIRMAN

Dear employees, shareholders, partners and clients,

The second quarter of 2025 was marked by the announcement of the merger of BRF's business with Marfrig, creating MBRF, one of the largest food companies in the world, with consolidated net revenue of R\$ 152 billion. The deal will result in a single, more agile and diversified listed company with a strong global presence.

The broad approval of the transaction at the shareholders' meeting held in August, with the validation of the majority of minority shareholders, reinforces investor confidence in our value creation proposal. Once the transaction is completed, we will have a truly multi-protein company, with iconic brands and an integrated portfolio, with 38% of sales volume coming from high value-added processed products.

Our increasingly complementary management and exchange of best practices have already contributed to a company focused on operational excellence and consistent results, as demonstrated by BRF's record EBITDA in the first half of this year.

Every day, we are strengthening joint initiatives, intensifying the use of our brands, expanding our market reach, and reducing expenses. Once all conditions precedent have been fully met, we will begin the most intense phase of capturing synergies and reinforcing our competitive advantages. We will remain focused on consolidating a culture of efficiency and high performance, unlocking value and promoting economic, social, and environmental development.

I would like to thank our shareholders for their continued trust, our employees for their commitment and dedication, and our suppliers and customers for their partnership. We will continue to work together, growing stronger, building a company committed to feeding the future with quality and excellence, of which our families and all of us will continue to be proud.

Marcos Antonio Molina dos Santos
Chairman of the Board of Directors

MESSAGE FROM MANAGEMENT

Dear Mr./Madam,

BRF reaches the middle of 2025 reporting the best first half of its history, with EBITDA of R\$5.3 billion and net profit of R\$1.9 billion. The results highlight the Company's operational excellence, strategic vision, and financial discipline, as well as its ability to react in adverse scenarios such as that faced in the second quarter, marked by restrictions on Brazilian chicken exports.

Focused on its path of efficiency and value creation, in the second quarter the company reported net revenue of R\$15.4 billion, EBITDA of R\$2.5 billion and free cash flow of R\$842 million, reflecting the lowest leverage ever recorded in the Company's history (0.43x).

The Brazil segment recorded the highest volume and net operating revenue for a second quarter, driven by the increase in the customer base, which now exceeds 330,000, and by the consumption in the domestic market. During the period, we also strengthened the connection between our brands and consumers by renewing strategic sponsorships and expanding our portfolio through innovations in value-added products, especially the Sadia/Bassi and Perdigão/Montana burgers, and Perdigão's entry into the ready-to-eat snack category.

In the international segment, the Company continued its strategy of diversifying destinations, obtaining 11 new authorizations to export in the quarter, 23 in the year to date, and a total of 198 since 2022. In the Halal market, the company continues to consolidate its leadership and strong presence with the launch of the Sadia Fresh line of chilled chicken produced in Saudi Arabia, further strengthening its strategic partnership with the Kingdom. In addition, we recorded growth in the market share of processed products in GCC countries.

On the operational efficiency front, BRF+ continues to optimize our results with actions aimed at the continuous improvement of operational indicators. These initiatives enabled operating gains of R\$208 million, highlighting the importance of a high-performance culture with increasingly consistent deliveries.

This quarter, we made progress on our ESG agenda, starting with valuing teams. In the last 12 months, we have filled 72% of leadership positions through internal recruitment. The brand Qualy received the Carbon Free seal for the first time for neutralizing 100% of the emissions from its advertising campaign. In the social dimension, with the “Educação para o Futuro” (Education for the Future) initiative, the BRF Institute has benefited more than 5,000 people directly, mobilizing volunteers in all our operations.

We remain optimistic about our sustainable growth path, driven by a solid strategy, innovation and operational excellence. We reaffirm our commitment to quality, safety, and integrity in producing and marketing our products and iconic brands, bringing excellence to clients and consumers worldwide and generating a positive impact on society.

We would like to conclude by thanking our chairman and controller Marcos Molina for his support and strategic direction, the Board of Directors for their assistance, our shareholders for their trust, our integrated producers, customers, suppliers and the communities where we operate for their partnership and our more than 100,000 employees for their dedication and daily work. The result achieved by BRF is the sum of everyone's dedication and commitment.

Miguel Gularte

BRAZIL SEGMENT

Brazil Segment (Million R\$)	2Q25	2Q24	Chg. % y/y	1Q25	Chg. % q/q
Net Operating Revenues	8,080	6,872	17.6%	7,435	8.7%

Adjusted EBITDA Margin (%)	16.4%	15.7%	0.7 p.p.	17.1%	(0.7) p.p.

In the second quarter of 2025, we achieved an EBITDA of R\$1,324 million in Brazil, and a margin of 16.4%, which represented an increase of 0.7 p.p. compared to the second quarter of 2024 and a retraction of 0.7 p.p. compared to the last quarter. The maintenance of our commercial performance indicators at good levels contributed to achieving record sales volume for a second quarter and surpassing the 330,000 customer mark (332,500 clients in 2Q25), while increasing the number of items sold per client. This result, coupled with the resilience of food consumption in the domestic market, allowed us to increase sales both year-on-year and quarter-on-quarter, with the performance of processed foods standing out with sales volume growth of 7.4% y/y and 7.0% q/q, in addition to the contribution of the in natura category to the segment's margins.

Regarding unit costs, we observed an increase of 7.8% y/y and stability in the quarterly comparison. The year-on-year variation is mainly explained by the increase in the cost of the consumption of grains and oils, the inflationary effects on goods and services, the higher volume of raw material purchases from third parties to attend the demand for processed products and the mix of products sold in the period, effects partially mitigated by the captures of the efficiency program, BRF+.

This quarter, we kept FIFO discounts at a historic low level, highlighting the assertiveness of demand planning, supply chain dimensioning, and production plans.

In Brazil, economic indicators related to employment and income reached record highs in June. The unemployment rate reached 5.8%¹, the lowest level in the historical series, with the total number of employees with a formal contract also reaching the highest level ever recorded. This result was reflected in the income mass², also a record high, and in average earnings, which rose 3.3% y/y and 1.1% q/q³. The performance of the aforementioned indicators reflects signs of increased demand and tends to boost sales of our processed products in particular.

BRAND HIGHLIGHTS

Sadia started the second quarter with its Mother's Day campaign. Starring Olympic medalist and ambassador Rebeca Andrade and her mother, Rosa Santos, the campaign valued the maternal role and highlighted the brand's positioning as a partner at all times through the “Linha Fácil Sadia”, a portfolio of proteins that go from the freezer to the oven, offering flavor and practicality.

Following its strategy of connecting with young audiences, Sadia sponsored the NBA for the fifth consecutive year and communicated its range of breaded meats, sausages and pizzas. In addition, Sadia was the first frozen food brand to invest in the gamer universe with its sponsorship of LTA Sul, where it promoted its portfolio of ready meals, snacks and the relaunch of Hot Pocket ready meals.

Sadia ended the quarter with the launch of the Pop Dog sausage, ideal for airfrying, made with beef and providing a snack bar experience at home.

Perdigão, which for the 5th consecutive year is the food brand most chosen by Brazilians⁴, maintained its presence on the sports platform as a sponsor of the Northeast Cup, with its Core line, and in the broadcasts of the Brazil Cup on Globo and Brasileirão on Globo and Record, with the Perdigão Na Brasa line.

The extension of Perdigão's Ouro portfolio, which is the leader in smoked mortadella⁵ and now includes smoked salami and chicken breast, was presented in the high-impact campaign “Se é Ouro, é Perdigão” (If it's Ouro, it's Perdigão). In June, Perdigão, the leader in sausages⁶, sponsored and was present with its ambassador Ivete Sangalo at São João de Caruaru, reinforcing its sausage portfolio.

Perdigão has expanded its product range and entered the ready-to-eat snack category with three new Perdigão Montana items: Cheeseburger, Churrasburguer and Toscanaburguer. The brand has also entered the ready-to-eat pies category by launching chicken pie with bacon and pepperoni pie with cream cheese.

In margarines, Qualy, the category's leading brand⁷, continued its strategy of communicating the versatility of the brand's products with the launch of the webseries “Passa Lá em Casa” (Come By My House), starring ambassador Eliana and with the participation of real consumers. Deline, the Northeast's regional leader in margarines⁸, was present at the traditional São João festival in Caruaru, as well as highlighting the Deline Milho special edition, the only corn-flavored margarine on the market.

In a quarter full of campaigns and innovations, BRF increased its leadership in the processed food and margarine market⁹, with Sadia being recognized as the strongest and most valuable food brand in Brazil by Brand Finance¹⁰.

In 2Q25, we achieved adjusted EBITDA of R\$ 1,168 million, with a margin of 17.3%, maintaining a healthy level of profitability despite temporary bans on Brazilian chicken exports as a result of avian flu, which led to a decline in sales volumes. During the quarter, several important destinations for Brazilian chicken exports, such as the countries of the European Union, China, Saudi Arabia, South Korea, Mexico and Chile, were totally or partially blocked, with some blockades persisting until today. Once again, the strategy of diversifying markets by gaining new authorizations to export has allowed us to expand the destinations for our products despite the restrictions imposed. Since 2022, we have obtained 198 new export permits, 11 of which were obtained this quarter, with destinations such as Argentina and Canada standing out.

Despite the avian flu scenario, we saw an evolution in the price in dollars of various poultry and pork cuts, however, the appreciation of the real against the dollar resulted in stable prices in reais in the period (average ptax 2Q25 at R\$ 5.67 versus R\$ 5.85 in 1Q25¹¹).

The 10.7% increase in unit costs year-on-year and 1.4% quarter-on-quarter is mainly explained by the increase in the cost of consuming grains and oils, the mix of products sold in the period, the increase in the cost of production at our platform in Türkiye and the inflationary effects on supplies and services, partially offset by the positive effects of BRF+.

In the GCC¹², we highlight our portfolio of value-added products, which, through assertive innovations aligned with the local culture, continues to contribute to stable margins. We continue to operate with high occupancy at our plants in the region (Dammam in Saudi Arabia and Kezad in the United Arab Emirates), which are dedicated to the production of processed products to meet local demand and global accounts, including gains in market share in important categories such as hamburgers and chicken sausage¹³. In July, we launched the Sadia brand in the chilled chicken category, with production in Saudi Arabia, as a result of the acquisition of 26% of Addoha Poultry Company, a chicken slaughtering company, through BRF Arabia (a joint venture between BRF and Halal Products Development Company, a wholly-owned subsidiary of the Saudi sovereign wealth fund PIF).

In Türkiye, we continued to increase the share of processed products in total sales, which helped mitigate the effects of the increase in the local supply of fresh products, with repercussions on price dynamics, in addition to the inflationary scenario that continues to challenge family income and the company's cost structure.

In the Asian market, we observed a recovery in prices in dollars, especially for pork protein. In the Americas, we highlight the profitability of turkey breast and pork exports and the portfolio of value-added products, mainly through the Sadia brand in countries such as Argentina, Chile, Uruguay and Paraguay. In Europe, exports to the United Kingdom, resulting from new authorizations obtained in recent years, continue to contribute to the expansion of consolidated profitability.

BRAND HIGHLIGHTS

In the GCC countries, we remained market leaders in the second quarter, with a 36.2%¹⁴ share, maintaining the journey of growth in the processed category, in line with the long-term strategy for the region.

In May, BRF took part in the Saudi Food Show 2025, the largest event in the food and beverage sector in Saudi Arabia, held in Riyadh, the country's capital. Participating in the Saudi Food Show was a valuable opportunity for BRF to strengthen its presence in an increasingly relevant market. We were there with a 168m² stand, where we presented our brands, portfolio and innovations. Visitors were also able to taste various locally produced products, including the Breaded line, Sadia Beef and the convenient Easy & Juicy line. Showcasing the variety and quality of our products reaffirms our commitment to expanding our global operations and strengthening our commercial relations in the region.

In addition, our communication in the second quarter focused on boosting the growth of our breaded range, with the support of online and in-store activations in GCC markets. The campaign reached 11.4 million people, with high levels of engagement driven by influencer marketing.

Also, in July we launched the first line of chilled chicken produced locally in the Kingdom of Saudi Arabia (KSA): Sadia Fresh. As well as meeting local consumer demand, the new line reinforces BRF's commitment to food safety in the Kingdom. As the market share leader in the chicken category, the launch of the line is a strategic move to maintain the brand's leadership in the Saudi market.

In Türkiye, in the second quarter, we proudly maintained our leading position in the Ipsos Brand Health survey as the preferred brand - well ahead of our closest competitor.

As part of our “Smart Kids' Table” project, we proudly inaugurated the Banvit Sustainable Food Center at KidZania - an interactive learning space for children - with a special event attended by members of the media and influencers. There, the children learn how to avoid food waste and store it properly.

We also continue to support sport by becoming the main sponsor of the Kyzikos Ultra Marathon, held in our hometown of Bandırma. The event brought together around 1,500 athletes, and we offered tastings of our products to the participants and the local community.

For the Southern Cone¹⁵, international marketing initiatives were very prominent, especially in Chile. The second phase of the “Tu Día Pide Sadia” campaign was officially launched, focusing on presenting the new packaging to Chilean consumers. The action was conducted through a 360° strategy, with the largest investment in communication ever made by the brand in the country. As a result, there was an increase in volume in every week of broadcasting. There were also significant increases in market share¹⁶, especially in the nuggets, IQF chicken and lasagne categories.

For the rest of the world, we launched 30 new SKUs in the quarter, enabling the diversification of the portfolio and contributing to the flexibility and profitability of commodity products. Among them, 9 SKUs are value-added products, such as processed and IQF, reinforcing our strategy of growing in these categories. In value-added items, we highlight the debut in the ready meals category in Argentina, with 4 SKUs of Sadia lasagna and empanadas in Singapore.

Finally, we announced the production of the beef portfolio using the Sadia brand with the first shipments to China in customized boxes. The initiative marks the transition of the entire GJ brand portfolio to Sadia, capitalizing on synergies with Marfrig through brand strength and portfolio optimization.

In Ingredients, as a result of the progress of the efficiency program, BRF+, we continue to see a reduced supply of products for this business segment. In the quarter, BRF Ingredients reached new markets with the conclusion of the first sale of heparin to China and Hong Kong, maximizing the profitability of the pharmaceuticals segment.

Also noteworthy was the start-up of the new breeding flour line at the Toledo, Paraná plant, allowing the Ingredients segment to expand its product portfolio.

In Pet Food, we increased our active clients base by 8% y/y, which enabled us to increase the volumes sold in the quarter and, consequently, the segment's revenue. We completed the implementation and unification of the ERP system (SAP), making significant progress in the areas of integration and value generation, with a strategic focus on supplies, industrial operations and logistics. In addition, during the quarter, we highlighted the relevance of our feline portfolio of our main brands, increasing visibility and exposure for this sub-segment of products, which boosts consolidated profitability.

During the second quarter of 2025, the Company carried out one-off arbitrage, operations involving the sale of grains between regions as a result of its more active role in identifying market opportunities to reduce origination costs. These operations contributed to the absolute result of the Other Business Segments.

BRAND HIGHLIGHTS

Pet: In the second quarter of the year, the BRF Pet brands continued their visibility plan, with a digital communication campaign for the **GranPlus** (Special Premium) and **Biofresh** (Super Premium Natural) brands, reinforcing their flavor credentials and high inclusion of fresh ingredients, respectively. To strengthen its relationship with veterinarians, the company sponsored the Cat Congress, the largest feline-focused congress in the country, with a prominent space for the **GranPlus**, **Guabi Natural** and **Biofresh** brands, showcasing portfolio solutions that meet the needs of cats for their healthy development.

Gross Profit	0	(107)	n.m.	(1)	119.4%
Adjusted EBITDA	(42)	(28)	(53.0%)	(22)	(91.7%)

The adjusted EBITDA of this segment is explained, among other effects, by the result on the sale and write-off of fixed assets and investments and by the reversal/provision of tax and civil contingencies. Further details on the result are available in Explanatory Note 24 to the Interim Financial Information.

The negative gross profit of R\$107 million in 2Q24 refers to the impact on COGS of the weather events in Rio Grande do Sul. The costs and expenses associated with these events were allocated to the Corporate segment due to their non-recurring nature and because they are not directly related to the markets. For more details of these impacts, see Explanatory Note 1.2 to the Financial Statements.

CONSOLIDATED PERFORMANCE

1. NET OPERATING REVENUE

NOR (Million R\$)	2Q25	2Q24	Chg. % y/y	1Q25	Chg. % q/q
Volume (Thousand Tons)	1,228	1,244	(1.3%)	1,243	(1.2%)

Average Price (NOR)	12.51	12.00	4.2%	12.48	0.2%

In 2Q25, we observed net revenue increase by 2.9% y/y, mainly due to the 4.2% y/y increase in the average price, influenced, among other factors, by the evolution of prices and volumes in the domestic market in all segments and in exports of pork and turkey proteins, as well as the exchange rate impact on the International segment's revenue (average 2Q24 ptax of R\$5.21 versus R\$5.67 in 2Q25¹⁷), which helped mitigate the reduction in sales volumes associated with the suspension of chicken meat exports due to the outbreaks of avian flu. In the quarterly comparison, the 1.0% drop in revenue is also explained by the reduction in volumes sold as a result of the temporary blockades on the export of chicken protein to various markets.

From a managerial perspective, where we exclude the effects of Türkiye's hyperinflation in all periods, our net revenue reached R\$15,464 million in 2Q25 versus R\$14,672 million in 2Q24 and R\$15,573 in 1Q25, a variation of 5.4% y/y and -0.7% q/q.

Operating Income Protection Strategy - hedge accounting

The effects of financial instruments for exchange rate hedging on the result totaled R\$91.785 million in 2Q25, according to Explanatory Note 23.2 of the Interim Financial Information, and are due to the positions settled in the quarter, which were contracted over the 12 months prior to their settlement. In the consolidated figures for the year to date, the effects of the instruments totaled R\$55.015 million.

The company may contract additional cash flow protection, as provided for in its Financial Risk Management Policy, always backed by future export revenues, as their probability evolves and assuming a defined time horizon of up to 12 months. For the purposes of cash flow hedging, we emphasize that its objective is to protect the operating result and reduce volatility, and under no circumstances may derivative financial instruments be contracted for speculative purposes.

2. COSTS, EXPENSES E OTHER OPERATING RESULTS

Costs of Good Sold (COGS)

COGS (Million R\$)	2Q25	2Q24	Chg. % y/y	1Q25	Chg. % q/q
Cost of Goods Sold	(11,271)	(11,000)	2.5%	(11,459)	(1.6%)
COGS/kg	(9.18)	(8.84)	3.8%	(9.22)	(0.5%)
Cost of Goods Sold (Managerial)	(11,311)	(10,799)	4.7%	(11,477)	(1.5%)
COGS/kg (Managerial)	(9.21)	(8.68)	6.1%	(9.24)	(0.3%)

In the year-on-year comparison, we observed an increase of 3.8% in unit costs in the accounting view, and 6.1% in the managerial view, in which we eliminated the effects of Türkiye's hyperinflation:

- i) the increase in the cost of consumption of grains and oils (corn +27.7% y/y and soybean oil +28.6% y/y¹⁸);
- ii) the increase in production costs on the Turkish platform, with effects mainly related to the inflationary environment, union readjustments and grain consumption;
- iii) the effects of inflation on supplies and services (IPCA +5.35%¹⁹);

iv) the effect of the sales mix and the greater volume of raw material purchases from third parties to meet the growing demand for processed products.

The impacts described above were partially mitigated by the BRF+ efficiency program savings.

In the quarterly comparison, we can see a reduction of 0.5% in unit cost in the accounting view and 0.3% in the managerial view, mainly due to the sales mix between markets during the second quarter.

We observed a reduction in the sector's cost of production in June when analyzing the ICP Embrapa²⁰ theoretical cost index , mainly influenced by the reduction in the cost of grains at current prices. Despite this improvement in costs, there was a decrease in the profitability of chicken producers and an increase in the profitability of swine producers²¹, both driven by the price level of in natura proteins.

*Includes impairment of accounts receivable of -R\$1.4 million in 2Q25 (R\$20.9 million in 2Q24 and R\$4.8 million in 1Q25)

In 2Q25, the percentage indicator of operating expenses over net revenue in the year-on-year comparison varied by +0.8 p.p. in the accounting view and +0.7 p.p. in the managerial view, explained by higher disbursements i) with marketing and trade marketing actions, to boost sales, such as the Mother's Day campaigns in Brazil and hamburgers in Chile, both by Sadia, ii) with logistics expenses, mainly warehousing, iii) with personnel, as a result of salary readjustments, to compensate inflation, and a higher headcount, to support the significant increase in sales volume and active clients, iv) with exchange rate variations due to the devaluation of the real against the dollar, and v) with provisions for variable remuneration as a result of achieving targets.

In the quarterly comparison, there was a variation of +1.5 p.p. in the accounting view and +1.4 p.p. in the managerial view. This result is mainly influenced by higher spending on marketing and trade marketing, warehousing logistics costs and provisions for variable remuneration as a result of achieving targets.

For further details on this item, see Explanatory Note 26 to the Interim Financial Information.

% of the NOR	(0.8%)	(0.1%)	(0.7) p.p.	(0.0%)	(0.7) p.p.

This performance is mainly explained by civil and tax contingencies (mainly related to adherence to the REFIS of the state of Minas Gerais to settle a contingency with an impact of R\$93 million) and net losses on the disposal and write-off of fixed assets and investments, partially offset by the recovery of expenses, among other net effects. Exchange variation on monetary assets and liabilities and derivatives	(82)	258	(131.9%)	39	(313.4%)

The main components of the net financial result have been grouped into the following categories:

Financial Revenues

Total Financial Revenues in 2Q25 amounted to R\$373 million, R\$99 million higher than in 2Q24. The combination of the higher cash position and the rise in the CDI rate in the period (CDI 3.3% in 2Q25 vs. 2.5% in 2Q24²²) contributed to the increase in interest income on cash and investments in the period. This increase, however, is mitigated by the reduction in interest on taxes to be recovered.

Financial Expenses

They derive from the effect of the following accounts:

Interest on loans and financing: Interest expenses increased by R\$13 million in 2Q25 compared to 2Q24. The effect of the rise in the CDI rate on interest (CDI 3.3% in 2Q25 vs. 2.5% in 2Q24²³) was mitigated by the amortization of bilateral debts, which reduced charges.

Adjustment to present value (AVP): The increase in 2Q25 compared to 2Q24 is mainly due to the increase in the balance of accounts payable throughout the year, driven by greater investments in capex and the increase in the cost of the DI futures curve. The AVP refers to the financial charge associated with the payment terms of customer and supplier accounts, with a corresponding entry in gross profit.

Interest on contingencies and leases: Higher expenses of R\$9 million in 2Q25 compared to the same period last year, mainly due to higher interest on tax and lease contingencies.

Other financial expenses: Includes bank fees, expenses with assignment and credit insurance, taxes on financial income, provision for discount of tax credits, among other effects. The R\$13 million reduction in expenses in 2Q25 compared to 2Q24 was mainly due to the positive effect of the fair value of restricted shares of R\$28 million, mitigated by higher expenses with provisions for tax credit write-offs of R\$9 million and with taxes on financial income of R\$8 million.

Monetary and Exchange Variations and Results of Derivatives:

The Company has financial assets and liabilities denominated in foreign currencies, whose exchange rate variations affect the financial result. The Company contracts derivative financial instruments to hedge this net foreign exchange exposure, as per Explanatory Note 23.2.1 to the Interim Financial Information.

In 2Q25, the net effect of exchange rate variations on monetary assets and liabilities and derivatives to hedge the balance sheet's exchange rate exposure totaled -R\$82 million and monetary gains related to Türkiye's hyperinflation had a total impact of +R\$45 million.

4. NET INCOME (LOSS)

Net Income (Million R\$)	2Q25	2Q24	Chg. % y/y	1Q25	Chg. % q/q

Net Margin (%)	4.8%	7.3%	(2.5) p.p.	7.6%	(2.9) p.p.

The Company reported a net profit of R\$735 million in 2Q25 versus R\$1,094 million in the same period of the previous year, essentially reflecting the increase in operating and financial expenses.

Free Cash Flow

Free cash flow reached R\$842 million in 2Q25, R\$886 million less than in the same period of the previous year. Disregarding disbursements with M&A and exchange rate effects, the amount would have reached R\$1,281 million, representing a cash conversion of 51%. Below is a breakdown of the components of the free cash flow.

*Amount referring to the acquisition of the factory in Henan, China, represented by fixed assets, cash and taxes to be recovered.

Operating Cash Flow and Cash Conversion Cycle

Operating cash generation totaled R\$2,542 million in 2Q25, a result driven by solid operating performance and the shortening of the financial cycle, which favored more efficient cash conversion. The amount shows an increase of R\$128 million compared to 2Q24, a variation that was partially offset by the higher disbursement with variable remuneration in 2Q25.

The company's cash conversion cycle ended 2Q25 at -13.3 days, down 18.5 days on 2Q24. The maintenance of a negative financial cycle has been favored by the higher balance payable to suppliers, longer terms for Capex and good efficiency in inventory turnover despite the challenges posed by market restrictions associated with avian flu.

Investment Cash Flow

Cash flow from investments totaled R\$1,301 million in 2Q25, an increase of R\$545 million compared to the same period last year due to higher Capex disbursements of R\$ 297 million and the acquisition of the plant in Henan (China).

In the quarter, R\$449 million was earmarked for growth, efficiency and support; R\$ 394 million for biological assets and R\$239 million for leasing and others, as shown in the table below:

CAPEX (Million R\$)	2Q25	2Q24	Chg. % y/y	1Q25	Chg. % q/q

Total - CAPEX + M&A and sales of assets	(1,301)	(756)	72.2%	(1,484)	(12.4%)

Among the main projects in 2Q25 are the following:

Growth

- Strategic investments in production units are underway, according to the established schedules, with a focus on market diversification, commercial flexibility and expanding the supply of processed products. These initiatives are aimed at both domestic and foreign markets, with the Kezad (United Arab Emirates), Concórdia (SC), Lucas do Rio Verde (MT) and Videira (SC) units standing out.

Efficiency

- Improved agricultural efficiency and reduced costs at feed mills, especially at the Toledo - PR, Arroio do Meio - RS and Francisco Beltrão - PR units;
- Projects in poultry factories to improve the yield of raw materials and the implementation of dynamic weighing systems and post-evisceration washing cabins, especially at the production units in Toledo - PR, Capinzal - SC and Dourados - MS;
- Projects at pork factories to improve the yield of raw materials, especially at the production units in Toledo - PR, Rio Verde - MT and Uberlândia - MG;
- Projects in industrialized products factories to improve the yield of finished products, especially at the production units in Tatuí - SP, Concórdia - PR and Toledo - PR;
- Progress in the digital journey with tools for efficient management in logistics, sales and planning processes; and
- Efficiency of energy resources at the Chapecó - SC and Toledo - PR plants.

Support

- Adaptation of units and offices to standards and legislation, renewal of operating licenses, replacement of depreciated assets, recovery of damaged assets and improvements in working conditions, in particular investments in the following units: Uberlândia - MG, Carambeí - PR, Concórdia - SC, Videira - SC, Toledo - PR, Serafina Correia - RS and Lajeado - RS.
- Continued renewal of licenses needed to maintain the Company's activities and update management and operational support resources related to Information Technology; and
- Maintenance of forestry and poultry transport operations.

Financial Cash Flow

In 2Q25, net interest expenses and financial expenses with a cash effect showed a reduction of R\$135 million compared to 2Q24, driven mainly by the higher liquidity position between periods and the drop in interest paid, reflecting the lower exposure of debt indexed to the CDI, in addition to the amortization of bilateral debts concentrated in the second half of 2024. This gain was mitigated by the increase in the adjustment to present value of the balance payable to suppliers. When incorporating the exchange rate effects of balance sheet hedging derivatives and the Exchange Variation in Cash and Cash Equivalents, the financial cash flow had a cash consumption of R\$400 million in 2Q25, R\$469 million lower than in the same period of the previous year.

Amortizations for the quarter totaled R\$317 million, allocated to (i) bilateral lines - R\$287 million; and (ii) working capital lines - R\$31 million. Borrowings in 2Q25 totaled R\$1,325 million, mainly due to the issue of R\$1.25 billion in Agribusiness Receivables Certificates - CRA in April 2025 and working capital lines of R\$0.5 billion. The average term of debt ended 2Q25 at 8.2 years, an increase of 0.1 year compared to 1Q25.

Net debt totaled R\$4,735 million in 2Q25, a reduction of R\$1,247 million compared to 1Q25. The company's net leverage, measured by the ratio of net debt to Adjusted EBITDA over the last twelve months, reached 0.43x in 2Q25 versus 0.54x in 1Q25 (equivalent leverage in USD reached 0.53x in 2Q25 versus 0.69x in 1Q25).

After the end of the quarter, on August 5, 2025, the company concluded its seventh issue of simple, non-convertible, unsecured debentures, in up to 5 series, for private placement, in the total amount of R\$2,000 million, with series maturing in 4, 7, 10, 15 and 20 years. The debentures were privately placed with ECO Securitizadora de Direitos Creditórios do Agronegócio S.A. ("Securitizadora"), within the scope of its 403rd issue of agribusiness receivables certificates ("CRA"), backed by agribusiness credit rights, for distribution to the general public. This transaction is in line with the company's debt profile management strategy, optimizing the term/cost ratio of its debt instruments. The proforma calculation of the average debt maturity, considering this new issue, is 8.3 years.

In the normal course of business, the Company may consider, from time to time, the repurchase of any of its senior unsecured notes (bonds), debentures or CRA, subject to market conditions, as an alternative to reduce the cost of capital and better equalize the exchange rate indexation of the debt profile. Such repurchases can also take place, through open market transactions. In accordance with applicable laws, such transactions may be carried out at any time and the Company has no obligation to acquire any specific amount of the aforementioned securities.

The Company reiterates that it has no financial leverage restrictive covenants and reaffirms its commitment to disciplined management of its capital structure, liquidity, and leverage.

ESG HIGHLIGHTS

Climate Change

Recognition on the 2024 “List A” of Supplier Engagement by the CDP - Carbon Disclosure Project - demonstrating the company's leadership in the management of greenhouse gas (GHG) emissions.

Waste and Packaging

Qualy offsets the emissions from the “Tudo de Qualy Pra Você” digital campaign and receives the Carbon Free seal for the first time, in line with the brand's strategy, which already recycles the equivalent of 100% of the plastic used in its packaging.

Social Responsibility

In April, the BRF Institute promoted the “Educação para o Futuro” (Education for the Future) volunteering campaign. The initiative directly benefited more than 5,000 people through the revitalization of educational spaces and dynamics with young people about their professional future and the job market.

Governance

Publication of the 5th Transparency and Integrity Report, highlighting the commitment to ethics and compliance.

1.2. Incident at the plant in Carambeí - PR

On August 1st, 2024, the Company informed its shareholders and the market in general that a fire had occurred in part of its Carambeí - PR unit. There were no fatalities and all employees were safe. In the same month, the Company was able to gradually resume operations at the unit.

Due to the fire, the Company recognized in its results for the period expenses mainly related to losses in the production process, expenses for structural and equipment recovery, as well as partial reimbursement of the claim received from insurers, generating a practically neutral impact for the period ended on June 30, 2025.

The Company has insurance policies for events of this nature and continue in the process of regulating this claim in Carambeí - PR.

1.3. Acquisition of stake in Addoha Poultry Company

On October 31, 2024, BRF Arabia Holding Company (“BRF Arabia”), joint venture 70% owned by BRF and 30% by Halal Products Development Company, a wholly owned subsidiary of the Public Investment Fund da Arabia Saudita (“PIF”), has entered into a binding agreement to acquire 26% da Addoha Poultry Company, a company that operates in the slaughtering of poultry in the Kingdom of Saudi Arabia.

On January 14, 2025, a shareholders' agreement was signed between BRF Arabia and the current shareholders of Addoha, ensuring effective participation in the company's management and allowing the know-how of BRF and HPDC to contribute to maximizing synergies between the entities. On this date, the acquisition was concluded, and of its total value of SAR316,200 (equivalent to R\$511,105), R\$188,351 was recorded as investment and R\$322,754 was recorded as goodwill for future profitability expectations.

Since Addoha is an associate of BRF Arabia, and due to the significant influence in this associate, the investment was accounted for using the equity method.

1.4. Acquisition of processed foods factory in Henan Province in China

On November 20, 2024, BRF GmbH, a wholly owned subsidiary of the Company, has signed a binding agreement with Henan Best Foods Co. Ltd., a subsidiary of the OSI Group, a U.S.-based company specializing in food processing, to acquire a processed foods factory in Henan Province, China.

On April 30, 2025, the transaction was closed for a total amount of USD 44,986 (equivalent to BRL 254,630 on that date), using funds previously recorded as Restricted Cash. This did not constitute a business combination, as it involved only an asset acquisition. On June 23, 2025, BRF GmbH carried out a capital increase of CNY 70,000 (equivalent to BRL 53,816) to support the expansion of this new operation.

The factory has two food processing lines with an annual capacity of 28,000 tons and the potential to expand to two additional lines. The acquisition solidifies the company's presence in the Chinese market and consolidates its ability to serve customers in the region.

1.5. Term sheet Gelprime

On December 17, 2024, MBR Investimentos Ltda. (“MBR”), a company wholly controlled by BRF, signed a term sheet with Viposa Participações Ltda., Indústria e Comércio de Couros Britali Ltda., and Vanz Holding Ltda., current holders of 100% of the capital stock of Gelprime Indústria e Comércio de Produtos Alimentícios Ltda. (“Gelprime”), a company engaged in the production, commercialization, and distribution of gelatin and collagen through the processing of animal-origin raw materials.

The term sheet sets forth the main terms and conditions for the acquisition, by MBR, of a 50% equity interest in Gelprime (“Acquisition”) for R\$312,500, subject to potential adjustments.

Following the term sheet, on March 14, 2025, an Investment Agreement was executed, additionally providing that the acquisition will be structured through a combination of share subscription and purchase and sale transactions, which may be subject to adjustments. Depending on Gelprime's performance over the next three years, the purchase price may be increased by up to USD13,600, equivalent to R\$78,082 on the date of the Investment Agreement. On the same date, BRF made an advance for future capital increase (AFAC) to MBR in the amount of R\$60,000 (note 12.1), which was used to make an initial advance for the full acquisition amount.

The acquisition was approved without reservations by the Administrative Council for Economic Defense (“CADE”) on June 23, 2025. Completion of the transaction is subject to the fulfillment of certain customary conditions precedent, including the conversion of Gelprime into a joint stock company.

On August 1, 2025, the First Amendment to the Investment Agreement was signed, through which MBR subscribed one hundred new shares of Gelprime (already converted into a joint stock company) as a capital increase, in the amount of R\$3, and made a payment of R\$100,457 as an AFAC, which will be converted into capital stock on the acquisition closing date.

1.6. Factory in Jeddah/Saudi Arabia

On April 21, 2025, the Board of Directors approved an investment of approximately USD 160,000, equivalent to R\$919,840, for the construction of a new processed products factory in Jeddah, Saudi Arabia. The investment will be made by BRF Arabia Holding Company, a subsidiary of the Company and the vehicle for the joint venture with Halal Products Development Company, a wholly owned subsidiary of the Public Investment Fund (PIF). On June 17, 2025, BRF Arabia Holding Company carried out a capital increase of SAR 150,000 (equivalent to R\$218,940 on that date) in BRF Arabia Food Industry Ltd., the subsidiary that will own the new factory, thereby continuing the Company’s expansion process in the Halal market.

The new factory will have a production capacity of approximately 40,000 tons per year of processed poultry and beef products. The project will allow BRF to increase its local production from 17,000 to up to 57,000 tons per year, capturing the growing demand in the regional market and from global accounts, as well as solidifying its strategic partnership with Saudi Arabia.

1.7. Merger of Shares between Marfrig and BRF

On May 15, 2025, Marfrig and BRF (together, the “Companies”) announced to their shareholders and the market in general the execution and approval, in meetings held by the Boards of Directors of both Companies, of the “Protocol and Justification for the Merger of Shares Issued by BRF S.A. by Marfrig Global Foods S.A.” (the “Protocol”), which sets forth the terms and conditions applicable to the merger of shares issued by BRF by Marfrig (the “Transaction”).

On June 17 and July 11, 2025, BRF informed its shareholders and the market in general that the Brazilian Securities and Exchange Commission (“CVM”), in response to requests for interruption and postponement of the Extraordinary General Meeting (“EGM”) initially scheduled for June 18, 2025 and rescheduled for July 14, 2025, granted postponement requests for a period of 21 days from the date of availability of the additional information requested. Accordingly, BRF made the requested additional information available and convened the EGM for August 5, 2025, to deliberate on the Transaction.

On August 5, 2025, as disclosed in a Joint Material Fact, through EGMs held on the same date, the shareholders of Marfrig and BRF approved, among other matters, the merger of shares issued by BRF by Marfrig. With this step completed, the 30-day legal period for exercising the Right of Withdrawal begins, applicable to shareholders of both Companies. The conclusion of the Transaction remains subject to final approval by CADE.

1.8. Seasonality

During the months of November and December of each year, the Company is impacted by seasonality in the Brazil operating segment due to Christmas and New Year's Celebrations. The products that are relevant contributors are: Türkiye, Chester®, ham and pork cuts (hind leg/pork loin).

In the International operating segment, seasonality is due to Ramadan, which is the holy month of the Muslim calendar. The beginning of Ramadan depends on the beginning of the moon cycle and, in 2025, occurred between February 28, 2025, and March 29, 2025.

2. Basis of preparation and presentation of interim financial information

The Parent Company's and Consolidated interim financial information were prepared in accordance with i) the accounting practices adopted in Brazil, which include those included in Brazilian corporate legislation and the pronouncements, guidelines, and technical interpretations issued by the Accounting Pronouncements Committee ("CPC") and approved by the Federal Accounting Council ("CFC") and the Securities and Exchange Commission ("CVM"), in accordance with CPC 21 (R1) – Interim Financial Statements, and ii) international financial reporting standards ("IFRS"), IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board ("IASB"). IFRS comprises International Accounting Standards, interpretations by the International Financial Reporting Interpretations Committee (IFRIC) and the Standing Interpretations Committee (SIC).

In accordance with OCPC 07 - Disclosure in General Purpose Accounting and Financial Reports, all relevant information specific to the financial statements, and only that information, is being disclosed, and corresponds to that used by Management in its management.

The Parent Company's and Consolidated interim financial information are expressed in thousands of Brazilian Reais ("R\$"), unless otherwise stated. For disclosures of amounts in other currencies, the values are also expressed in thousands, unless otherwise stated.

The preparation of the Parent Company's and Consolidated interim financial information requires management to make judgments, use estimates, and adopt assumptions that affect the reported amounts of revenues, expenses, assets, and liabilities, as well as the disclosures of contingent liabilities. The uncertainty inherent to these judgments, assumptions, and estimates could result in material adjustments to the carrying amount of certain assets and liabilities in future periods.

Any judgments, estimates, and assumptions are reviewed at each reporting period.

The Parent Company's and Consolidated interim financial information were prepared based on the recoverable historical cost, except for the items maintained at fair value as described in note 3.4 of the Financial Statements for the year ended on December 31, 2024.

The Company prepared its Parent Company's and Consolidated interim financial information under the going concern assumption and disclosed all relevant information in its explanatory notes, in order to clarify and complement the accounting basis adopted.

3. Summary of material accounting policies

The individual and consolidated interim financial information, in this case, interim financial information, is intended to provide an update based on the latest complete annual financial statements. Therefore, it focuses on new activities, events, and circumstances and does not repeat previously disclosed information, except when management deems it relevant to maintain certain information.

The interim financial information presented here was prepared based on the material accounting policies and methods of calculating estimates adopted in the preparation of the annual financial statements for the year ended December 31, 2024, in a uniform manner for all entities of the group and consistent across all periods presented.

The material accounting policies applied in the preparation of this interim financial information have been included in the respective explanatory notes and are consistent across all periods presented.

3.1. Hyperinflationary Economies

The Company has subsidiaries in Argentina and Türkiye, countries considered to have hyperinflationary economies.

For the Turkish subsidiary, the inflation rate for the period ended June 30, 2025 was 16.7%. In the consolidated information for the period ended June 30, 2025, the hyperinflation adjustment impacted the Income (Loss) before Financial Results in R\$(119,112) (R\$(22,244) in the same period of the previous year), and a revenue was recognized that impacted the Financial Result in R\$98,212 (R\$98,223 in the period ended June 30, 2024) and the Net Income (Loss) in R\$30,972 (R\$57,125 in the same period of the previous year).

For the Argentine subsidiary, the inflation rate for the period ended June 30, 2025 was 15,0%, and the hyperinflation adjustment impacted the Income (Loss) before Financial Results in R\$222 (R\$(383) in the same period of the previous year), the Financial Result in R\$5,166 (R\$(2,842) in the period ended June 30, 2024) and the Net Income (Loss) in R\$(2,391) (R\$(7,714) in the same period of the previous year).

3.2. Standards issued but not yet effective

The following amendments to standards have been issued and approved by the IASB and CVM but are not yet effective for the fiscal year 2025:

- CVM Resolution No. 193/23, with amendments introduced by CVM Resolution No. 219/24 and CVM Resolution No. 227/25 - Provides for the preparation and disclosure of the sustainability-related financial information report, based on the international standard issued by the International Sustainability Standards Board ("ISSB") – Implementation on January 1, 2026;
- Amendments to IFRS 18: Presentation and Disclosure in Financial Statements – Implementation on January 1, 2027;
- Amendments to IFRS 19: Subsidiaries without Public Accountability: Disclosures – Implementation on January 1, 2027;

- **Tax reform (Complementary Law No. 214/2025)** – As a result of Constitutional Amendment No. 132/2023, which changed the National Tax System, Complementary Law No. 214/2025 was enacted, introducing the regulation of the Tax Reform on Consumption. The new legislation establishes the CBS, IBS, and IS taxes, with the progressive replacement of the current PIS, COFINS, ICMS, and ISS taxes by 2033. The transition schedule provides for the replacement of PIS and COFINS by CBS in 2027 and the beginning of the replacement of ICMS and ISS by IBS in 2029.

The main impacts relate to the elimination of tax benefits and the introduction of full non-cumulative taxation, allowing for the full appropriation of credits on purchases of goods and services, without the limitations of the current tax system. Given this scenario, a multidisciplinary technical group was formed with a focus on:

- Assess fiscal impacts on costs, expenses, and pricing;
- Map operational, systemic, and contractual adjustments;
- Ensure compliance with new legislation;
- Identify opportunities for tax and strategic efficiency.

The group's proactive approach aims to ensure a safe and competitive transition, in line with the Company's governance and sustainability guidelines.

The Company and its subsidiaries are monitoring potential impacts that these new standards may bring to the Group and do not expect significant effects, except for IFRS 18 and CVM Resolution No. 193/23.

9.1 ICMS – tax on movement of goods and services and VAT – value added taxes

As result of the activity, the Company generates recoverable ICMS balances that are offset against ICMS payables arising from sales in the domestic market or that are transferred to third parties.

The Company has recoverable ICMS balances in the States of Paraná, Santa Catarina, Mato Grosso do Sul, Minas Gerais and Amazonas, which will be realized in the short and long term, based on the recoverability study reviewed and approved by the Management.

In other jurisdictions outside Brazil, value added taxes (VAT) are due in regular operations of the Company with goods and services, with expectations of achievement in the short and long term.

On June 20, 2024, the Company entered into an agreement to purchase ICMS credits from Marfrig, in the state of São Paulo, in the amount of R\$113,000, with a discount applied in line with market conditions. Additionally, on October 16, 2024, an agreement was signed for the additional acquisition of up to R\$350,000 in credits for the same tax and calculated in the same state, also with a discount applied in line with the market. The use will be made according to the Company's monthly calculation in the state, with total compensation expected by October 2025. As of June 30, 2025, a total of R\$375,000 had been transferred (R\$256,000 on December 31, 2024), and the Company offset the amount of R\$308,123 related to these credits (R\$178,076 on December 31, 2024).

9.2 PIS and COFINS – social integration plan and contribution for social security

The accumulated recoverable PIS and COFINS balances arise from taxes on raw material purchases subsequently used in the production of exported products or products for which sale is not taxed, as well as recoverable taxes on commercial and labor expenses. The realization of these balances usually occurs through the offsetting with taxes payable on sales of taxed products in the domestic market, with other federal taxes and social security contributions payable, or even, if necessary, through refund or reimbursement requests.

As described in note 13, the Company re-opted for the treatment of PIS and COFINS credits on fixed assets and, therefore, reclassified the amount of R\$219,884 from that group of accounts to the group of Taxes Recoverable.

As of June 30, 2025, the updated balance of the processes related to the exclusion of ICMS from the PIS and COFINS calculation basis recognized by the Company is R\$1,625,527 (R\$1,720,431 as of December 31, 2024). The monetary update of balances is recognized against Net financial income (expenses).

9.3 IPI – industrialized product tax

The Company has recognized tax assets as a result of gains from lawsuits related to IPI, especially “*crédito prêmio*”. The balance referring to these assets in the Parent Company and Consolidated on June 30, 2025, is R\$1,224,081 (R\$1,185,146 on December 31, 2024), of which R\$1,162,991 (R\$1,162,991 on December 31, 2024) is recorded as Recoverable Taxes and the remainder, referring to cases in which the government will reimburse in cash, recorded under other current assets in the amount of R\$38,935 and non-current assets in the amount of R\$22,155 (R\$22,155 on December 31, 2024). The monetary update of balances is recognized against Net financial income (expenses).

9.4 Income taxes

The accumulated recoverable income taxes mainly arise, from withholding taxes on securities, interest and prepayments of income tax and social contribution in Brazil. These amounts are realized through the offset with federal taxes and contributions payable.

9.5 Realization of Brazilian federal tax credits

The Company used recoverable balances of PIS, COFINS, IPI, and Other to offset federal taxes payable such as INSS, Income Taxes, and Other in the amount of R\$619,041 for the period ended on June 30, 2025 (R\$728,107 for the year ended on December 31, 2024), preserving its liquidity and optimizing its capital structure.

The maturity schedule of the loans and borrowings is presented on note 23.1.

On June 30, 2025 and on December 31, 2024, the Company did not have any financial covenant clauses related to its loans and borrowings agreements.

15.1 Guarantees

On June 30, 2025, the amount of bank guarantees contracted by the Company was R\$190,327 (R\$195,798 as of December 31, 2024) which were offered mainly in litigations involving the Company's use of tax credits. These guarantees carry an average cost of 1.62% p.a. (1.63% p.a. as of December 31, 2024).

15.2 Issuance of debentures

On April 23, 2025, the Company settled its sixth issuance of simple, non-convertible into shares, unsecured debentures, in four series for private placement, in the total amount of R\$1,250,000.

The debentures were subject to Private Placement with ECO Securitizadora de Direitos Creditórios do Agronegócio S.A. ("Securitization Company"), in the context of its 390th issuance of agribusiness receivables certificates, in four series, backed by agribusiness credit rights arising from the debentures, for public distribution.

The Company has partnerships with several financial institutions that allow suppliers to anticipate their receivables and, therefore, transfer the right to receive invoices with financial institutions (“Supply Chain Finance” or “Program”). Suppliers are free to choose whether or not to anticipate their receivables and with which financial institution, without any involvement from BRF.

The Program can generate benefits in the commercial relations of BRF and its suppliers, such as preference and priority of supply in cases of restricted supply, better commercial conditions, among others, without modifying the commercial essence of the relationship.

Invoices included in the Program are paid according to the same price and term conditions negotiated with its suppliers, without incurring any charge to the Company, so that there are no changes in commercial conditions after negotiation and invoicing of goods or services.

The balances of invoices included in the Supply Chain Finance are R\$4,117,544 in the Parent Company and R\$4,388,557 in the Consolidated on June 30, 2025 (R\$4,735,503 in the Parent Company and R\$4,942,713 in the Consolidated on December 31, 2024). The average payment term agreed with suppliers who choose to participate in the Program is substantially similar to that agreed with non-participating suppliers.

The Company measures and discriminates the adjustment to present value for all its commercial operations carried out in installments, specifying financial and operational items.

17. Leases

The Company is lessee in several lease agreements for forest lands, offices, distribution centers, outgrowers, vehicles, among others. Some contracts have a renewal option for an additional period at the end of the agreement, established by contractual amendments. Automatic renewals or renewals for undetermined periods are not allowed.

The contract clauses mentioned, with respect to renewal, readjustment and purchase option, are contracted according to market practices. In addition, there are no clauses of contingent payments or restrictions on dividends distribution, payments of interest on shareholders’ equity or obtaining debt.

17.1 Right-of-use assets

The right-of-use assets as set forth below are part of the balance of property, plant and equipment (note 13).

23. Financial instruments and risk management

23.1 Overview

In the ordinary course of business, the Company is exposed to credit, liquidity and market risks, which are actively managed in compliance with the Financial Risk Management Policy ("Risk Policy") and internal guidelines and strategic documents subject to such policy. The Risk Policy was approved by the Board of Directors on December 17, 2024, valid for one year and is available on the Company's website.

The Company's risk management strategy, guided by the Risk Policy, has as main objectives:

- » To protect the Company's operating and financial results, as well as its equity from adverse changes in the market prices, particularly commodities, foreign exchange and interests;
- » To protect the Company against counterparty risks in existing financial operations as well as to establish guidelines for sustaining the necessary liquidity to fulfil its financial commitments;
- » To protect the cash of Company against price volatility, adverse conditions in the markets in which the Company acts and adverse conditions in its production chain.

The Risk Policy defines the governance of the bodies responsible for the execution, tracking and approval of the risk management strategies, as well as the limits and instruments that can be used.

Additionally, the Management of the Company approved the following policies on November 10, 2021, which are available at the Company's website:

- » Financial Policy, which aims to: (i) establish guidelines for the management of the Company's financial debt and capital structure; and (ii) guide the Company's decision-making in connection with cash management (financial investments).
- » Profit Allocation Policy, which aims to establish the practices adopted by the Company regarding the allocation of its profits, providing, among others, the periodicity of payment of dividends and the baseline used to establish the respective amount.

i) Indebtedness

The ideal capital structure definition at BRF is essentially associated with: (i) strong cash position as a tolerance factor for liquidity shocks, which includes minimum cash analysis; (ii) net indebtedness; and (iii) minimization of the capital opportunity cost.

On June 30, 2025, the non-current consolidated gross debt, as presented below, represented 91.22% (92.63% as of December 31, 2024) of the total gross debt, which has an average term of 8.2 years.

23.2 Market risk management

23.2.1 Foreign exchange risk

The risk is the one that may cause unexpected losses to the Company resulting from volatility of the FX rates, reducing its assets and revenues or increasing its liabilities and costs. The Company's exposure is managed in three dimensions: statement of financial position exposure, operating income exposure and investments exposure.

i) Statement of financial position exposure

The Risk Policy regarding statement of financial position exposure has the objective to balance assets and liabilities denominated in foreign currencies, hedging the Company's statement of financial position by using natural hedges, over-the-counter derivatives and exchange traded futures.

Assets and liabilities denominated in foreign currency for which the exchange variations are recognized in the Financial Results are as follows, summarized in Brazilian Reais:

	Consolidated	
	06.30.25	12.31.24
Cash and cash equivalents	4,243,603	4,276,065
Trade accounts receivable	6,122,088	6,238,093
Trade accounts payable	(2,389,206)	(1,377,169)
Loans and borrowings	(9,376,723)	(9,726,343)
Other assets and liabilities, net	2,659,368	1,570,012
Exposure of assets and liabilities in foreign currencies	1,259,130	980,658
Derivative financial instruments (hedge)	(385,380)	(773,197)
Exposure in result, net	873,750	207,461

The net exposure in Reais is mainly composed of the following currencies:

Net Exposure (1)	Consolidated	
	06.30.25	12.31.24
U.S. Dollars (USD)	295,396	(2,052,569)
Euros (EUR)	343,490	1,879,079
Yen (JPY)	(829)	(1,501)
Angolan kwanza (AOA)	(17,432)	36,366
Turkish Liras (TRY)	136,824	267,834
Argentinian Peso (ARS)	(2,385)	(2,125)
Chilean Pesos (CLP)	118,686	80,377
Total	873,750	207,461

(1) The Company is exposed to other currencies, although they have been grouped in the currencies above due to its high correlation or for not being individually significant.

The Company holds more financial liabilities in foreign currencies than assets and, therefore, holds derivative financial instruments to reduce such exposure.

As a result of this protection strategy, the Company recognized under Financial Expenses in the Consolidated an income from foreign exchange derivatives of R\$1,068 for the six-month period ending on June 30, 2025 (revenue of R\$203,921 for the same period last year), and for the three-month period ending on June 30, 2025, an expense of R\$49,779 (revenue of R\$130,736 for the same period last year).

The exchange rate variation and price variation of monetary assets and liabilities in the Consolidated Financial Statements resulted in an expense of R\$44,888 in the six-month period ended June 30, 2025 (income of R\$48,165 in the same period of the previous year) and for the three-month period ended June 30, 2025, it was an expense of R\$32,694 (income of R\$127,376 in the same period of the previous year).

The derivative financial instruments acquired to hedge the foreign currency statement of financial position exposure on June 30, 2025 and are set forth below:

Derivative instruments not designated	06.30.25					
	Asset	Liability	Maturity	Notional	Exercise rate	Fair value (R\$)
Parent Company and Consolidated						
Non-deliverable forward	USD	CLP	3th Qtr. 2025	CLP	25,000	956.3368 (3,562)
Non-deliverable forward	USD	EUR	3th Qtr. 2025	EUR	(175,000)	1.0924 (91,897)
Non-deliverable forward	BRL	EUR	3th Qtr. 2025	EUR	(60,000)	6.4966 (2,994)
Futures - B3	BRL/USD	USD/BRL	3th Qtr. 2025	USD	-	5.5626 326
					(210,000)	(98,127)

ii) Operating income exposure

The Risk Policy regarding operating income exposure aims to hedge revenues and costs denominated in foreign currencies. The Company relies on internal models to measure and monitor these risks, and utilizes financial instruments designated as cash flow hedges to mitigate them. The Company has more sales in foreign currency than expenditures and, therefore, holds derivative financial instruments to reduce such exposure.

As a result of this protection strategy, the Company recognized revenue of R\$55,015 under Consolidated Net Revenue for the six-month period ended June 30, 2025 (compared to revenue of R\$6,618 for the same period last year), and revenue of R\$91,785 for the three-month period ended June 30, 2025 (compared to expenses of R\$40,819 for the same period last year).

The derivative financial instruments designated as cash flow hedges for foreign exchange operating income exposure on June 30, 2025 are set forth below:

Cash flow hedge - Derivative instruments	Hedged object	06.30.25

866,000							344,322	

(1) Correspond to the not realized portion of the hedge which is registered in Other comprehensive income.

iii) Investments exposure

The Company holds both investments (net assets) and loans (financial liabilities) denominated in foreign currency. To balance the accounting effects of such exposures, some non-derivative financial liabilities are designated as hedging instruments for the investments exposure.

As a result of this strategy, the Company recognized revenue of R\$142,507, net of income tax, under Other comprehensive income for the six-month period ended June 30, 2025 (expense of R\$180,118 in the same period of the previous year) and for the three-month period ended June 30, 2025, revenue of R\$39,436 (expense of R\$141,238 in the same period of the previous year).

The non-derivative financial instruments designated as net investment hedge instruments on June 30, 2025 are set forth below:

Net investment hedge - Non-derivative instruments	Object (Investment)	06.30.25

(1) Corresponds to the effective portion of the hedge result accumulated in Other Comprehensive Income.

(2) Designated on August 1st, 2019.

(3) Designated on November 9, 2022.

*On February 1, 2025, BRF Foods GmbH was merged into BRF GmbH and the hedge relationship was discontinued.

23.2.2 Commodities price risk

The Company uses commodities as production inputs and is exposed to commodities price risk arising from future purchases. The management of such risk is performed through physical inventories, future purchases at fixed price and through derivative financial instruments.

The Risk Policy establishes coverage limits to the flow of purchases of corn, meal and soy, soybeans and soybean oil with the purpose of reducing the impact due to a price increase of these raw materials. The hedge may be reached using derivatives or by inventory management.

As a result of this protection strategy, the Company recognized under Consolidated Cost of Goods Sold an expense of R\$12,567 for the six-month period ended June 30, 2025 (expense of R\$133,128 for the same period in the prior year), and for the three-month period ended June 30, 2025, a revenue of R\$608 (expense of R\$12,385 for the same period in the prior year).

The Company performs purchases at variable prices in future and spot markets and, to hedge such exposure, it holds derivative financial instruments in long position (buy) to fix these prices in advance.

The financial instruments designated as cash flow hedges for the variable commodities price exposure on June 30, 2025, are set forth below:

Cash flow hedge - Derivative instruments	Hedged object	06.30.25				
		Index	Maturity	Quantity	Exercise price (1)	Fair value

314,614					(13,209)	

(1) Base price of each commodity in USD/ton, except for Corn – B3 denominated in R\$/ton.

In certain cases, the Company performs futures purchases at fixed prices and, to hedge such exposure, it holds derivative financial instruments in short position (sell) to keep these prices at market value.

The financial instruments designated as fair value hedges for the fixed commodities price exposure on June 30, 2025, are set forth below:

Fair value hedge - Derivative instruments	Hedged object	06.30.25				
		Index	Maturity	Quantity	Exercise price (1)	Fair value
Parent Company and Consolidated						
Non-deliverable forward - sell	Soybean purchase - fixed price	Soybean - CBOT	1st Qtr. 2026	27,460 ton	384.78	(405)

Corn future - sell	Corn purchase - fixed price	Corn - B3	3rd Qtr. 2026	3,105 ton	1,203.33	7
300,314					5,214	

(1) price of each commodity in USD/ton, except for Corn – B3 denominated in R\$/ton.

The Company assessed that part of its cost, future physical purchases of commodities in dollars, also generates foreign exchange exposure and therefore contracted the following derivatives and designated them as fair value hedges:

Fair value hedge - Derivative instruments	Hedged object	06.30.25						
		Assets	Liabilities	Maturity	Notional	Exercise price	Fair value	
Parent Company and consolidated								
Non-deliverable forward - buy	Cost in USD	BRL	USD	1st Qtr. 2026	USD	27,316	6.0798	8,428
Non-deliverable forward - buy	Cost in USD	BRL	USD	3rd Qtr. 2026	USD	925	6.1999	160
Non-deliverable forward - buy	Cost in USD	BRL	USD	2nd Qtr. 2026	USD	185	6.1991	61
						28,426		8,649

The outstanding and settled derivative instruments of commodity risk hedging strategies represent effects on the balance sheet of: i) the Inventories item in the Consolidated in the credit amount of R\$45,061 on June 30, 2025 (R\$28,811 debit on December 31, 2024); ii) the Other Comprehensive Income item in the debit amount of R\$1,554 on June 30, 2025 (R\$29,447 credit on December 31, 2024).

23.2.3 Interest rate risk

The interest rate risk may cause economic losses to the Company resulting from volatility in interest rates that affect its assets and liabilities.

The Company's Risk Policy does not restrict exposure to different interest rates, nor does it establishes limits for fixed or floating rates. However, the Company continually monitors the market interest rates to evaluate any need to enter into hedging transactions to protect them from the volatility of such rates and manage the mismatch between its financial assets and liabilities.

As a result of this protection strategy, the Company recognized under Financial Income and Expenses an income of R\$232,198 for the six-month period ended June 30, 2025 (expense of R\$197,723 in the same period of the previous year), and for the three-month period ended June 30, 2025, an income of R\$112,431 (expense of R\$92,348 in the same period of the previous year).

The derivative financial instruments used to hedge the exposure to interest rates as of June 30, 2025 are presented in the table below:

(1) Corresponds to the accumulated amount of fair value hedge adjustments on the hedged items, included in the carrying amount of the debentures.

23.3 Credit risk management

The Company is exposed to the credit risk related to the financial assets held: trade and non-trade accounts receivable, marketable securities, derivative instruments and cash and equivalents. The Company's credit risk exposure can be assessed in notes 4, 5 and 6.

23.3.1 Credit risk in accounts receivable

The credit risk associated with trade accounts receivable is actively managed through specific systems and is supported by internal policies for credit analysis. The significant level of diversification and geographical dispersion of the customer portfolio significantly reduces the risk. However, the Company chooses to complement the risk management by contracting insurance policies for specific markets. The impairment of these financial assets is carried out based on expected credit losses.

23.3.2 Counterparty credit risk

The credit risk associated with marketable securities, cash and cash equivalents and derivative instruments in general is directed to counterparties with Investment Grade ratings. The maintenance of assets with counterparty risk is constantly assessed according to credit ratings and the Company's portfolio concentration, aligned with the applicable impairment requisites.

23.4 Capital management and liquidity risk

The Company is exposed to liquidity risk as far as it needs cash or other financial assets to settle its obligations in the respective terms. The Company's cash and liquidity strategy takes into consideration historical volatility scenarios of results as well as simulations of sectorial and systemic crisis. It is grounded on allowing resilience in scenarios of capital restriction.

23.5 Sensitivity analysis

Management believes that the most relevant risks that may affect the Company's results, for which it uses derivative financial instruments to protect, are the volatility of commodities prices, foreign exchange rates and interest rates.

For the probable scenario of commodities, Management uses as a reference the future value of assets on June 30, 2025 and therefore understands that there will be no changes in the results of operations. As for the exchange rate, Management uses the Focus report for the American Dollar as a reference inserting the quotes for the current and subsequent years. The likely scenario for other currencies is determined based on the US Dollar parity.

In the possible and remote scenarios, both positive and negative variations of 15% and 30% respectively were considered in both cases from the probable scenario. Such sensitivity scenarios originate from information and assumptions used by Management in monitoring the previously mentioned risks.

The information used in the preparation of the analysis is based on the position as of June 30, 2025, which has been described in the items above. The estimated values may differ significantly to numbers and results that will be effectively registered by the Company. Positive values indicate gains and negative values indicate losses.

(2) The part of the loans and borrowings that is object in a fair value hedge is classified as Fair value through profit and loss. The rest of the loans and borrowings balance is classified as amortized cost and those designated as cash flow or net investment hedge accounting instruments have their gains and losses also affecting Equity.

(3) FVTOCI: Fair Value Through Other Comprehensive Income.

23.7 Fair value of financial instruments

The fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Depending on the inputs used for measurement, the financial instruments at fair value may be classified into 3 hierarchy levels:

- » Level 1 - Uses quoted prices (unadjusted) for identical instruments in active markets. In this category are classified investments in stocks, savings accounts, overnights, term deposits, Financial Treasury Bills (“LFT”) and investment funds;
- » Level 2 - Uses prices quoted in active markets for similar instruments, prices quoted for identical or similar instruments in non-active markets and evaluation models for which inputs are observable. In this level are classified the investments in Bank Deposit Certificates (“CDB”) and derivatives, which are measured by well-known pricing models: discounted cash flows and Black-Scholes. The observable inputs are interest rates and curves, volatility factors and foreign exchange rates;
- » Level 3 - Instruments for which significant inputs are non-observable. The Company does not have financial instruments in this category.

The table below presents the classification of financial instruments recorded at fair value by measurement hierarchy. Throughout the period ended June 30, 2025, there were no changes among the 3 levels of hierarchy.

24. Segment Information

The operating segments are reported consistently with the management reports provided to the main strategic and operational decision makers for assessing the performance of each segment and allocation of resources. The operating segments information is prepared considering three reportable segments, being: Brazil, International and Other segments.

The operating segments include the sales of all distribution channels and are subdivided according to the nature of the products, for which the characteristics are described below:

- » **In-natura**: production and sale of whole poultry and cuts and pork and other cuts;
- » **Semi-processed**: production and marketing of in-natura cooked and smoked foods;
- » **Processed**: production and sale of processed food, frozen and processed products derived from poultry, pork and beef, margarine, vegetables and soybean-based products;
- » **Other sales**: sales of flour for food service and others.

Other segments are comprised of commercialization and development of animal nutrition ingredients, human nutrition, plant nutrition (fertilizers), healthcare (health and wellness), pet food, as well as commercialization of agricultural products.

The items not allocated to the segments are presented as Corporate and refer to relevant events not attributable to the operating segments.

The net sales by nature for each reportable operating segment is set forth below:

INDEPENDENT AUDITORS' REPORT ON INDIVIDUAL AND CONSOLIDATED FINANCIAL STATEMENTS

To the Shareholders, Board of Directors and Management of

BRF S.A.

Itajaí – SC

Introduction

We have reviewed the accompanying individual and consolidated interim financial information of BRF S.A. (the Company), comprised in the Quarterly Information Form for the quarter ended June 30, 2025, comprising the balance sheet as of June 30, 2025 and the respective statements of income and comprehensive income for the periods of three and six months then ended, and changes in shareholders' equity and cash flows for the period of six months then ended, including the explanatory notes.

Management is responsible for the preparation of the individual and consolidated interim financial information in accordance with NBC TG 21 – Interim Financial Reporting and with the international standard IAS 34 – Interim Financial Reporting, as issued by the International Accounting Standards Board (IASB), such as for the presentation of these information in accordance with the standards issued by the Brazilian Securities and Exchange Commission, applicable to the preparation of interim financial information. Our responsibility is to express a conclusion on this interim financial information based on our review.

Review scope

We conducted our review in accordance with the Brazilian and International standards on reviews of interim information (NBC TR 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). The review of interim information consists of making inquiries, primarily of persons responsible for the financial and accounting matters and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the individual and consolidated interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the individual and consolidated interim financial information included in the quarterly information form referred to above has not been prepared, in all material respects, in accordance with NBC TG 21 and IAS 34 applicable to the preparation of interim financial information and presented in accordance with the standards issued by the Brazilian Securities and Exchange Commission.

Other matters

Statements of value added

The quarterly information referred to above includes the individual and consolidated statements of value added for the period of six months ended June 30, 2025, prepared under the responsibility of the Company's management and presented as supplementary information for the purposes of IAS 34. These statements were submitted to the same review procedures in conjunction with the review of the Company's interim financial information to conclude they are reconciliated to the interim financial information and to the accounting records, as applicable, and whether the structure and content are in accordance with the criteria established in the NBC TG 09 – Statement of Value Added standard. Based on our review, nothing has come to our attention that causes us to believe that the accompanying statements of value added were not prepared, in all material respects, in accordance to the criteria defined in that standard and consistently in relation to the individual and consolidated interim financial information taken as a whole.
