III. General Information of the Company

1. Company overview

The predecessor of Shandong Chenming Paper Holdings Limited (hereinafter referred to as the "Company", a joint-stock company incorporated in Shouguang City, Shandong Province) was Shandong Shouguang Paper Mill Corporation, which was changed as a joint stock company with limited liability through offering to specific investors in May 1993. In December 1996, with approval by Lu Gai Zi [1996] No. 270 issued by the People's Government of Shandong Province and Zheng Wei [1996] No. 59 of the Securities Committee of the State Council, the Company was changed as a joint stock company with limited liability established by share offer. The Company's headquarters is located at No. 2199 Nongsheng East Road, Shouguang City, Shandong Province.

In May 1997, with approval by Zheng Wei Fa [1997] No. 26 issued by the Securities Committee of the State Council, the Company issued 115,000,000 domestic listed foreign shares (B shares) under public offering, which were listed and traded on Shenzhen Stock Exchange from 26 May 1997.

In September 2000, with approval by Zheng Jian Gong Si Zi [2000] No. 151 issued by the China Securities Regulatory Commission, the Company issued additional 70,000,000 RMB ordinary shares (A shares), which were listed and traded on Shenzhen Stock Exchange from 20 November 2000.

In June 2008, with approval by the Stock Exchange of Hong Kong Limited, the Company issued 355,700,000 H shares. At the same time, 35,570,000 H shares were allocated to the National Council for Social Security Fund by our relevant state-owned shareholder and converted into overseas listed foreign shares (H shares) for the purpose of reducing the number of state-owned shares. The additionally issued H shares were listed and traded on Hong Kong Stock Exchange on 18 June 2008.

As at 30 June 2025, the total share capital of the Company was 2,934,556,200 shares. For details, please refer to Note VII. 40.

Principal business activities: the Company is principally engaged in, among other things, processing and sale of paper products (including machine-made paper and paper board), paper making raw materials, machinery and chemicals; generation and sale of electric power and thermal power; forestry, saplings growing, processing and sale of timber and construction materials; manufacturing, processing and sale of wood products; and hotel service, and equipment financial and operating leasing, investment properties and property service etc.

The financial statements and notes thereto were approved at the fourteenth meeting of the tenth session of the board of directors of the Company (the "Board") on 29 August 2025.

2. Scope of consolidation

Subsidiaries of the Company included in the scope of consolidation in 2025 totalled 77. For details, please refer to Note X "Interest in other entities". The scope of consolidation of the Company during the year had two more companies included and one company less compared to the prior year. For details, please refer to Note IX "Change in scope of consolidation".

IV. Basis of Preparation of the Financial Statements

1. Basis of preparation

These financial statements are prepared in accordance with the accounting standards for business enterprises, the application guidelines thereof, interpretations and other related rules (collectively referred to as "ASBEs") promulgated by the Ministry of Finance. In addition, the Company also discloses relevant financial information in accordance with the "Preparation Rules for Information Disclosure by Companies Offering Securities to the Public No. 15 – General Provisions on Financial Reports" (revised in 2023) of the CSRC.

The financial statements are presented on a going concern.

2. Going concern

No facts or circumstances comprise a material uncertainty about the Company's going concern basis within 12 months since the end of the reporting period.

V. Significant Accounting Policies and Accounting Estimates

Specific accounting policies and accounting estimates are indicated as follows:

The Company and its subsidiaries are engaged in the business of machine-made paper, electricity and heat, building materials, paper chemicals, hotel management, etc. The Company and its subsidiaries have formulated a number of specific accounting policies and accounting estimates for transactions and matters such as revenue recognition, determination of performance progress, and R&D expenses based on their actual production and operation characteristics in accordance with the requirements of the relevant ASBEs. For details, please refer to the descriptions under Note V.30 "Revenue". For an explanation of the critical accounting judgments and estimates made by the management, please refer to Note 39 "Critical accounting judgments and estimates".

1. Statement of compliance with the Accounting Standards for Business Enterprises

These financial statements have been prepared in conformity with the ASBEs, which truly and fully reflect the financial position of the consolidated entity and the Company as at 30 June 2025 and relevant information such as the operating results and cash flows of the consolidated entity and the Company for the first half of 2025.

2. Accounting period

The accounting period of the Company is from 1 January to 31 December of each calendar year.

3. Operating cycle

The operating cycle of the Company lasts for 12 months.

Significant Accounting Policies and Accounting Estimates (Cont'd)

Functional currency

The functional currency of the Company and its domestic subsidiaries is Renminbi ("RMB"). Overseas subsidiaries of the Company recognise U.S. dollar ("USD" or "US\$"), Japanese yen ("JPY"), Euro ("EUR") and South Korean Won ("KRW") as their respective functional currency according to the general economic environment in which these subsidiaries operate. The Company prepares the financial statements in RMB.

5. Determination method and selection basis of importance standards

Item	Importance standards
Significant accounts receivable with single provision for bad debt provisions	Overdue accounts receivable and the amount of a single receivable exceeds 0.5% of total assets
Write-off of significant accounts receivable during the period	The amount of a single write-off exceeds 0.5% of net assets
Significant prepayments aged more than one year	Aged more than one year and the single amount exceeds 0.5% of total assets
Significant receipts in advance aged more than one year	Aged more than one year and the single amount exceeds 0.5% of total assets
Significant other payables aged more than one year	Aged more than one year and the single amount exceeds 0.5% of total assets
Significant accounts payable aged more than one year	Aged more than one year and the single amount exceeds 0.5% of total assets
Bad debt provisions with significant amounts reversed or recovered during the current period	Individually identified or classified into the third stage, the amount transferred or recovered exceeds 0.5% of total assets
Significant construction in progress	Projects with budgets exceeding 0.5% of total assets
Significant non-wholly owned subsidiaries	The total assets of the subsidiary exceed 10% of the Company on a consolidated basis and the revenue or pre-tax profit exceeds 10%
Significant investing activities	Investment amount exceeds 0.5% of total assets
Significant joint ventures and associates	The joint venture or associate operates normally with an accounting amount exceeding 0.5% of total assets
Significant debt restructuring	The restructuring amount exceeds 0.5% of total assets

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

6. Accounting treatment of business combinations under common control and not under common control

(1) Business combination under common control

For the business combination involving entities under common control, the assets and liabilities of the party being merged that are obtained in the business combination by the absorbing party shall be measured at the carrying amounts as recorded by the ultimate controlling party in the consolidated financial statements at the combination date. The difference between the carrying amount of the consideration paid for the combination and the carrying amount of the net assets obtained in the combination is charged to the capital reserve. If the capital reserve is not sufficient to absorb the difference, any excess shall be adjusted against retained earnings.

Business combinations involving entities under common control and achieved in stages

The assets and liabilities of the party being merged that are obtained at the combination by the absorbing party shall be measured at the carrying value as recorded by the ultimate controlling party in the consolidated financial statements at combination date. The difference between the sum of the carrying value from original shareholding portion and the new investment cost incurred at combination date and the carrying value of net assets obtained at combination date shall be adjusted to capital reserve (share premium/capital premium), if the balance of capital reserve is not sufficient to absorb the differences, any excess is adjusted to retained earnings. The long-term investment prior to the absorbing party obtaining the control of the party being merged, the recognised profit or loss, comprehensive income and other change of owners' equity at the closer date of the acquisition date and combination date under common control shall separately offset the opening balance of retained earnings and profit or loss during comparative statements.

(2) Business combination not under common control

For business combinations involving entities not under common control, the cost for each combination is measured at the aggregate fair value at acquisition date, of assets given, liabilities incurred or assumed, and equity securities issued by the acquirer in exchange for control of the acquiree. At acquisition date, the acquired assets, liabilities or contingent liabilities of acquiree are measured at their fair value.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

- 6. Accounting treatment of business combinations under common control and not under common control (Cont'd)
 - (2) Business combination not under common control (Cont'd)

Where the cost of combination exceeds the acquirer's interest in the fair value of the acquiree's identifiable net assets, the difference is recognised as goodwill, and subsequently measured on the basis of its cost minus accumulative impairment provision; Where the cost of combination is less than the acquirer's interest in the fair value of the acquiree's identifiable net assets, the difference is recognised in profit or loss for the current period after reassessment.

Business combinations involving entities not under common control and achieved in stages

The combination cost is the sum of consideration paid at acquisition date and fair value of the acquiree's equity investment held prior to acquisition date. The cost of equity of the acquiree held prior to acquisition date shall be remeasured at the fair value at acquisition date, and the difference between the fair value and carrying amount shall be recognised as investment income or loss for the current period. Other comprehensive income and changes of other owners' equity related with acquiree's equity held prior to acquisition date shall be transferred to investment profit or loss for current period at acquisition date, except for the other comprehensive income incurred by the changes of net assets or net liabilities due to the remeasurement of defined benefit plans and the other comprehensive income related to investments in non-trading equity instruments that were previously designated as at fair value through other comprehensive income.

(3) Transaction fees attribution during business combination

The audit, legal, valuation advisory and other intermediary fees and other relevant administrative expenses arising from business combinations are recognised in profit or loss when incurred. Transaction costs of equity or debt securities issued as the considerations of business combination are included in the initial recognition amounts.

7. Judgment criteria for control and preparation of consolidated financial statements

(1) Judgment criteria for control

The scope of consolidation of the consolidated financial statements is determined on the basis of control. The term "control" refers to the fact that the Company has power over the investee and is entitled to variable returns from its involvement with the investee and the ability to use its power over the investee to affect the amount of those returns. The Company will reassess when changes in relevant facts and circumstances result in changes in the relevant elements involved in the definition of control.

When judging whether to include a structured entity into the scope of consolidation, the Company comprehensively considers all facts and circumstances, including assessing the purpose and design of the structured entity, identifying the types of variable returns, and assessing whether to control the structured entity on the basis of whether it bears part or all of the return variability by participating in its related activities.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

7. Judgment criteria for control and preparation of consolidated financial statements (Cont'd)

(2) Basis for preparation of the consolidated financial statements

The consolidated financial statements are prepared by the Company based on the financial statements of the Company and its subsidiaries and other relevant information. In preparing the consolidated financial statements, the accounting policies and accounting periods of the Company and its subsidiaries shall be consistent, and intracompany significant transactions and balances are eliminated.

A subsidiary and its business acquired through a business combination involving entities under common control during the reporting period shall be included in the scope of the consolidation of the Company from the date of being controlled by the ultimate controlling party, and its operating results and cash flows from the date of being controlled by the ultimate controlling party are included in the consolidated income statement and the consolidated cash flow statement, respectively.

For a subsidiary and its business acquired through a business combination involving entities not under common control during the reporting period, its income, expenses and profits are included in the consolidated income statement, and cash flows are included in the consolidated cash flow statement from the acquisition date to the end of the reporting period.

The shareholders' equity of the subsidiaries that is not attributable to the Company is presented under shareholders' equity in the consolidated balance sheet as minority interest. The portion of net profit or loss of subsidiaries for the period attributable to minority interest is presented in the consolidated income statement under the "profit or loss of minority interest". When the amount of loss attributable to the minority shareholders of a subsidiary exceeds the minority shareholders' portion of the opening balance of owners' equity of the subsidiary, the excess amount shall be allocated against minority interest.

(3) Acquisition of non-controlling interests in subsidiaries

The difference between the long-term equity investments costs acquired by the acquisition of non-controlling interests and the share of the net assets from subsidiaries from the date of acquisition or the date of combination based on the new shareholding ratio, as well as the difference between the proceeds from the partial disposal of the equity investment without losing control over its subsidiary and the disposal of the long-term equity investment corresponding to the share of the net assets of the subsidiaries from the date of acquisition or the date of combination, is adjusted to the capital reserve. If the capital reserve is not sufficient, any excess is adjusted to retained earnings.

(4) Accounting treatment for loss of control over subsidiaries

For the loss of control over a subsidiary due to disposal of a portion of the equity investment or other reasons, the remaining equity is measured at fair value on the date when the control is lost. The difference arising from the sum of consideration received for disposal of equity interest and the fair value of remaining equity interest over the sum of the share of the carrying amount of net assets of the former subsidiary calculated continuously from the purchase date based on the shareholding percentage before disposal and the goodwill is recognised as investment income in the period when the control is lost.

Other comprehensive income related to equity investment in the former subsidiary shall be accounted for on the same basis as the former subsidiary's direct disposal of relevant assets or liabilities when the control is lost. Other changes in owners' equity related to the former subsidiary that are accounted for using the equity method shall be transferred to current profit or loss at the time when the control is lost.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

8. Classification of joint arrangements and accounting treatment for joint operations

A joint arrangement refers to an arrangement of two or more parties have joint control. The joint arrangements of the Company comprise joint operations and joint ventures.

(1) Joint operations

Joint operations refer to a joint arrangement during which the Company is entitled to relevant assets and obligations of this arrangement.

The Company recognises the following items in relation to its interest in a joint operation and accounts for them in accordance with the relevant ASBEs:

- A. the assets held solely by it and assets held jointly according to its share;
- B. the liabilities assumed solely by it and liabilities assumed jointly according to its share;
- C. the revenue from sale of output from joint operations;
- D. the revenue from sale of output from joint operations according to its share;
- E. the fees solely incurred by it and fees incurred from joint operations according to its share.

(2) Joint ventures

Joint ventures refer to a joint arrangement during which the Company only is entitled to net assets of this arrangement.

The Company accounts for its investments in joint ventures in accordance with the requirements relating to accounting treatment using equity method for long-term equity investments.

9. Standards for recognising cash and cash equivalents

Cash refers to cash on hand and deposits readily available for payment purpose. Cash equivalents refer to short-term and highly liquid investments held by the Company which are readily convertible into known amount of cash and which are subject to insignificant risk of value change.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

10. Foreign currency operations and translation of statements denominated in foreign currency

(1) Foreign currency operations

The foreign currency operations of the Company are translated into the functional currency at the prevailing spot exchange rate on the date of exchange.

On the balance sheet date, foreign currency monetary items shall be translated at the spot exchange rate on the balance sheet date. The exchange difference arising from the difference between the spot exchange rate on the balance sheet date and the spot exchange rate upon initial recognition or the last balance sheet date will be recognised in profit or loss for the period. The foreign currency non-monetary items measured at historical cost shall still be measured by the functional currency translated at the spot exchange rate on the date of the transaction. Foreign currency non-monetary items measured at fair value are translated at the spot exchange rate on the date of determination of the fair value. The difference between the amounts of the functional currency before and after the translation will be recognised in profit or loss or other comprehensive income for the period based on the nature of the non-monetary items.

(2) Translation of financial statements denominated in foreign currency

When translating the financial statements denominated in foreign currency of overseas subsidiaries, assets and liabilities on the balance sheet are translated at the spot exchange rate prevailing at the balance sheet date; owner's equity items except for "retained profit" are translated at the spot exchange rates at the dates on which such items arose.

Income and expenses items in the income statement are translated at the prevailing spot exchange rate on the transaction date.

All items in the cash flow statements shall be translated at the prevailing spot exchange rate on the date that the cash flow transaction occurred. Effects arising from changes of exchange rate on cash shall be presented separately as the "effect of foreign exchange rate changes on cash and cash equivalents" item in the cash flow statements.

The differences arising from translation of financial statements shall be included in the "other comprehensive income" item in owners' equity in the balance sheet.

On disposal of foreign operations and loss of control, exchange differences arising from the translation of financial statements denominated in foreign currencies related to the disposed foreign operations which has been included in shareholders' equity in the balance sheet, shall be transferred to profit or loss in whole or in proportionate share in the period in which the disposal took place.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

11. Financial instruments

A financial instrument is a contract that gives rise to a financial asset of one party and a financial liability or equity instrument of another party.

(1) Recognition and derecognition of financial instruments

Financial asset or financial liability will be recognised when the Company became one of the parties under a financial instrument contract.

Financial asset that satisfied any of the following criteria shall be derecognised:

- ① the contract right to receive the cash flows of the financial asset has terminated;
- 2 the financial asset has been transferred and meets the derecognition criteria for the transfer of financial asset as described below.

A financial liability (or a part thereof) is derecognised only when the present obligation is discharged in full or in part. If an agreement is entered between the Company (debtor) and a creditor to replace the existing financial liabilities with new financial liabilities, and the contractual terms of the new financial liabilities are substantially different from those of the existing financial liabilities, the existing financial liabilities shall be derecognised and the new financial liabilities shall be recognised.

Conventionally traded financial assets shall be recognised and derecognised at the trading date.

(2) Classification and measurement of financial assets

The Company classifies the financial assets according to the business model for managing the financial assets and characteristics of the contractual cash flows as follows: financial assets measured at amortised cost, financial assets measured at fair value through other comprehensive income, and financial assets measured at fair value through profit or loss.

Financial assets are measured at fair value upon initial recognition. For financial assets measured at fair value through profit or loss, relevant transaction costs are directly recognised in profit or loss for the current period. For other categories of financial assets, relevant transaction costs are included in the amount initially recognised. Accounts receivable arising from sales of goods or rendering services, without significant financing component, are initially recognised based on the transaction price expected to be entitled by the Company.

Financial assets measured at amortised cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated at fair value through profit or loss:

- The Company's business model for managing such financial assets is to collect contractual cash flows;
- The contractual terms of the financial asset stipulate that cash flows generated on specific dates are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, such financial assets are measured at amortised cost using the effective interest method. A gain or loss on a financial asset that is measured at amortised cost and is not part of a hedging relationship shall be recognised in profit or loss for the current period when the financial asset is derecognised, amortised using the effective interest method or with impairment recognised.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

11. Financial instruments (Cont'd)

(2) Classification and measurement of financial assets (Cont'd)

Financial assets measured at fair value through other comprehensive income

A financial asset is classified as measured at fair value through other comprehensive income if it meets both of the following conditions and is not designated at fair value through profit or loss:

- The Company's business model for managing such financial assets is achieved both by collecting collect contractual cash flows and selling such financial assets;
- The contractual terms of the financial asset stipulate that cash flows generated on specific dates are solely
 payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, such financial assets are subsequently measured at fair value. Interest calculated using the effective interest method, impairment losses or gains and foreign exchange gains and losses are recognised in profit or loss for the current period, and other gains or losses are recognised in other comprehensive income. On derecognition, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from other comprehensive income to profit or loss.

Financial assets measured at fair value through profit or loss

The Company classifies the financial assets other than those measured at amortised cost and measured at fair value through other comprehensive income as financial assets measured at fair value through profit or loss. Upon initial recognition, the Company irrevocably designates certain financial assets that are required to be measured at amortised cost or at fair value through other comprehensive income as financial assets measured at fair value through profit or loss in order to eliminate or significantly reduce accounting mismatch.

Upon initial recognition, such financial assets are measured at fair value. Except for those held for hedging purposes, gains or losses (including interests and dividend income) arising from such financial assets are recognised in the profit or loss for the current period.

The business model for managing financial assets refers to how the Company manages its financial assets in order to generate cash flows. That is, the Company's business model determines whether cash flows will result from collecting contractual cash flows, selling financial assets or both. The Company determines the business model for managing financial assets on the basis of objective facts and specific business objectives for managing financial assets determined by key management personnel.

The Company assesses the characteristics of the contractual cash flows of financial assets to determine whether the contractual cash flows generated by the relevant financial assets on a specific date are solely payments of principal and interest on the principal amount outstanding. The principal refers to the fair value of the financial assets at the initial recognition. Interest includes consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks, costs and profits. In addition, the Company evaluates the contractual terms that may result in a change in the time distribution or amount of contractual cash flows from a financial asset to determine whether it meets the requirements of the above contractual cash flow characteristics.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

11. Financial instruments (Cont'd)

(2) Classification and measurement of financial assets (Cont'd)

Financial assets measured at fair value through profit or loss (Cont'd)

All affected financial assets are reclassified on the first day of the first reporting period following the change in the business model where the Company changes its business model for managing financial assets; otherwise, financial assets shall not be reclassified after initial recognition.

(3) Classification and measurement of financial liabilities

At initial recognition, financial liabilities of the Company are classified as financial liabilities measured at fair value through profit or loss and financial liabilities measured at amortised cost. For financial liabilities not classified as measured at fair value through profit or loss, relevant transaction costs are included in the amount initially recognised.

Financial liabilities measured at fair value through profit or loss

Financial liabilities measured at fair value through profit or loss comprise held-for-trading financial liabilities and financial liabilities designated at fair value through profit or loss upon initial recognition. Such financial liabilities are subsequently measured at fair value, and the gains or losses from the change in fair value and the dividend or interest expenses related to the financial liabilities are included in the profit or loss of the current period.

Financial liabilities measured at amortised cost

Other financial liabilities are subsequently measured at amortised cost using the effective interest rate method, and the gains or losses arising from derecognition or amortisation are recognised in profit or loss for the current period.

Classification between financial liabilities and equity instruments

A financial liability is a liability if:

- it has a contractual obligation to pay in cash or other financial assets to other parties.
- ② it has a contractual obligation to exchange financial assets or financial liabilities under potential adverse condition with other parties.
- 3 it is a non-derivative instrument contract which will or may be settled with the entity's own equity instruments, and the entity will deliver a variable number of its own equity instruments according to such contract.
- 4 it is a derivative instrument contract which will or may be settled with the entity's own equity instruments, except for a derivative instrument contract that exchanges a fixed amount of cash or other financial asset with a fixed number of its own equity instruments.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

11. Financial instruments (Cont'd)

(3) Classification and measurement of financial liabilities (Cont'd)

Classification between financial liabilities and equity instruments (Cont'd)

Equity instruments are any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

If the Company cannot unconditionally avoid the performance of a contractual obligation by paying cash or delivering other financial assets, the contractual obligation meets the definition of financial liabilities.

Where a financial instrument must or may be settled with the Company's own equity instruments, the Company's own equity instruments used to settle such instrument should be considered as to whether it is as a substitute for cash or other financial assets or for the purpose of enabling the holder of the instrument to be entitled to the remaining interest in the assets of the issuer after deducting all of its liabilities. For the former, it is a financial liability of the Company; for the latter, it is the Company's own equity instruments.

(4) Fair value of financial instruments

The methods for determining the fair value of the financial assets or financial liabilities are set out in Note V. 12.

(5) Impairment of financial assets

The Company makes provision for impairment based on expected credit losses (ECLs) on the following items:

- Financial assets measured at amortised cost;
- Receivables and investment in debt instruments measured at fair value through other comprehensive income;
- Contract assets as defined in the Accounting Standards for Business Enterprises No. 14 Revenue;
- Lease receivables;
- Financial guarantee contracts (except those measured at fair value through profit or loss or formed by continuing involvement of transferred financial assets or the transfer does not qualify for derecognition).

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

11. Financial instruments (Cont'd)

(5) Impairment of financial assets (Cont'd)

Measurement of ECLs

ECLs are the weighted average of credit losses of financial instruments weighted by the risk of default. Credit losses refer to the difference between all contractual cash flows receivable according to the contract and discounted according to the original effective interest rate and all cash flows expected to be received, i.e. the present value of all cash shortages.

The Company takes into account reasonable and well-founded information such as past events, current conditions and forecasts of future economic conditions, and calculates the probability-weighted amount of the present value of the difference between the cash flows receivable from the contract and the cash flows expected to be received weighted by the risk of default.

The Company measures ECLs of financial instruments at different stages. If the credit risk of the financial instrument did not increase significantly upon initial recognition, it is at the first stage, and the Company makes provision for impairment based on the ECLs within the next 12 months; if the credit risk of a financial instrument increased significantly upon initial recognition but has not yet incurred credit impairment, it is at the second stage, and the Company makes provision for impairment based on the lifetime ECLs of the instrument; if the financial instrument incurred credit impairment upon initial recognition, it is at the third stage, and the Company makes provision for impairment based on the lifetime ECLs of the instrument.

For financial instruments with low credit risk on the balance sheet date, the Company assumes that the credit risk did not increase significantly upon initial recognition, and makes provision for impairment based on the ECLs within the next 12 months.

Lifetime ECLs represent the ECLs resulting from all possible default events over the expected life of a financial instrument. The 12-month ECLs are the ECLs resulting from possible default events on a financial instrument within 12 months (or a shorter period if the expected life of the financial instrument is less than 12 months) after the balance sheet date, and is a portion of lifetime ECLs.

The maximum period to be considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk, including renewal options.

For the financial instruments at the first and second stages and with low credit risks, the Company calculates the interest income based on the book balance and the effective interest rate before deducting the impairment provisions. For financial instruments at the third stage, interest income is calculated based on the amortised cost after deducting impairment provisions made from the book balance and the effective interest rate.

For receivables such as bills receivable, accounts receivable, accounts receivable financing, and other receivables, if the credit risk characteristics of a customer are significantly different from other customers in the portfolio, or the credit risk characteristics of such customer change significantly, the Company will make a separate provision for bad debts for such receivables. In addition to the receivables for which bad debt provisions are made individually, the Company divides the receivables into portfolios based on credit risk characteristics and calculates bad debt provisions on a combined basis.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

11. Financial instruments (Cont'd)

(5) Impairment of financial assets (Cont'd)

Bills receivable and accounts receivable

For bills receivable, accounts receivable and contract assets, regardless of whether there is a significant financing component, the Company always makes provision for impairment at an amount equal to lifetime ECLs.

When the Company is unable to assess the information of ECLs for an individual financial asset or contract assets at a reasonable cost, it classifies bills receivable, accounts receivable and contract assets into portfolios based on the credit risk characteristics, and calculates the ECLs on a portfolio basis. The basis for determining the portfolios is as follows:

A. Bills receivable

- Bills receivable portfolio 1: Bank acceptance bills
- Bills receivable portfolio 2: Commercial acceptance bills

B. Accounts receivable

- Accounts receivable portfolio 1: Due from related party customers
- Accounts receivable portfolio 2: Due from non-related party customers
- Accounts receivable portfolio 3: Factoring receivables

For bills receivable classified as a portfolio, the Company refers to the historical credit loss experience, combined with the current situation and the forecast of future economic conditions, to calculate the ECLs based on default risk exposure and lifetime ECL rate.

For accounts receivable classified as a portfolio, the Company refers to the historical credit loss experience, combined with the current situation and the forecast of future economic conditions, to prepare a comparison table of the ageing of accounts receivable and the lifetime ECL rate to calculate the ECLs. The aging of accounts receivable is calculated from the date of recognition.

Other receivables

The Company classifies other receivables into portfolios based on credit risk characteristics, and calculates the ECLs on a portfolio basis. The basis for determining the portfolios is as follows:

- Other receivables portfolio 1: Amount due from government authorities
- Other receivables portfolio 2: Amount due from related parties
- Other receivables portfolio 3: Other receivables

For other receivables classified as a portfolio, the Company calculates the ECLs based on default risk exposure and the ECL rate over the next 12 months or the entire lifetime. For other receivables grouped by aging, the aging is calculated from the date of recognition.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

11. Financial instruments (Cont'd)

(5) Impairment of financial assets (Cont'd)

Long-term receivables

The Company's long-term receivables include finance lease receivables and deposits receivable.

The Company classifies the finance lease receivables and deposits receivable into portfolios based on the credit risk characteristics, and calculates the ECLs on a portfolio basis. The basis for determining the portfolios is as follows:

A. Finance lease receivables

- Finance lease receivables portfolio 1: Receivables not past due
- Finance lease receivables portfolio 2: Overdue receivables

B. Other long-term receivables

- Other long-term receivables portfolio 1: Deposits receivable
- Other long-term receivables portfolio 2: Other receivables

For accounts receivable financing and deposits receivable, the Company refers to the historical credit loss experience, combined with the current situation and the forecast of future economic conditions, and calculates the ECLs based on default risk exposure and lifetime ECL rate.

Except for those of finance lease receivables and deposits receivable, the ECLs of other receivables and long-term receivables classified as a portfolio are measured based on default risk exposure and ECL rate over the next 12 months or the entire lifetime.

Debt investments and other debt investments

For debt investments and other debt investments, the Company measures the ECLs based on the nature of the investment, the types of counterparty and risk exposure, and default risk exposure and ECL rate within the next 12 months or the entire lifetime.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

11. Financial instruments (Cont'd)

(5) Impairment of financial assets (Cont'd)

Assessment of significant increase in credit risk

In assessing whether the credit risk of a financial instrument has increased significantly upon initial recognition, the Company compares the risk of default of the financial instrument at the balance sheet date with that at the date of initial recognition to determine the relative change in risk of default within the expected lifetime of the financial instrument.

In determining whether the credit risk has increased significantly upon initial recognition, the Company considers reasonable and well-founded information, including forward-looking information, which can be obtained without unnecessary extra costs or efforts. Information considered by the Company includes:

- The debtor's failure to make payments of principal and interest on their contractually due dates;
- An actual or expected significant deterioration in a financial instrument's external or internal credit rating (if any);
- An actual or expected significant deterioration in the operating results of the debtor;
- Existing or expected changes in the technological, market, economic or legal environment that have a significant adverse effect on the debtor's ability to meet its obligation to the Company.

Depending on the nature of the financial instruments, the Company assesses whether there has been a significant increase in credit risk on either an individual basis or a collective basis. When the assessment is performed on a collective basis, the financial instruments are grouped based on their common credit risk characteristics, such as past due information and credit risk ratings.

The Company determines that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

Credit-impaired financial assets

At balance sheet date, the Company assesses whether financial assets measured at amortised cost and debt investments measured at fair value through other comprehensive income are credit-impaired. A financial asset is credit-impaired when one or more events that have an adverse effect on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable events:

- Significant financial difficulty of the issuer or debtor;
- A breach of contract by the debtor, such as a default or delinquency in interest or principal payments;
- For economic or contractual reasons relating to the debtor's financial difficulty, the Company having granted to the debtor a concession that would not otherwise consider;
- It becoming probable that the debtor will enter bankruptcy or other financial reorganisation;
- The disappearance of an active market for that financial asset because of financial difficulties of the issuer or debtor.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

11. Financial instruments (Cont'd)

(5) Impairment of financial assets (Cont'd)

Presentation of provisions for ECLs

ECLs are remeasured at each balance sheet date to reflect changes in the financial instrument's credit risk upon initial recognition. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss for the current period. For financial assets measured at amortised cost, the provisions of impairment is deducted from the carrying amount of the financial assets presented in the balance sheet; for debt investments at fair value through other comprehensive income, the Company makes provisions of impairment in other comprehensive income without reducing the carrying amount of the financial asset.

Write-offs

The book balance of a financial asset is directly written off to the extent that there is no realistic prospect of recovery of the contractual cash flows of the financial asset (either partially or in full). Such write-off constitutes derecognition of such financial asset. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

If a write-off of financial assets is subsequently recovered, the recovery is credited to profit or loss in the period in which the recovery occurs.

(6) Transfer of financial assets

Transfer of financial assets refers to the transfer or delivery of financial assets to another party other than the issuer of such financial assets (the transferee).

If the Company transfers substantially all the risks and rewards of ownership of the financial asset to the transferee, the financial asset shall be derecognised. If the Company retains substantially all the risks and rewards of ownership of a financial asset, the financial asset shall not be derecognised.

If the Company neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset, it accounts for the transaction as follows: if the Company does not retain control, it derecognises the financial asset and recognises any resulting assets or liabilities; if the control over the financial asset is not waived, the relevant financial asset is recognised according to the extent of its continuing involvement in the transferred financial asset and the relevant liability is recognised accordingly.

(7) Offset of financial assets and financial liabilities

If the Company owns the legitimate rights of offsetting the recognised financial assets and financial liabilities, which are enforceable currently, and the Company plans to realise the financial assets or to clear off the financial liabilities on a net amount basis or simultaneously, the net amount of financial assets and financial liabilities shall be presented in the balance sheet upon offsetting. Otherwise, financial assets and financial liabilities are presented separately in the balance sheet without offsetting.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

12. Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Company measures the relevant asset and liability at fair value, based on the presumption that the orderly transaction to sell the asset or transfer the liability takes place either in the principal market for the relevant asset or liability, or in the absence of a principal market, in the most advantageous market for relevant the asset or liability. The principal or the most advantageous market must be a trading market accessible by the Company at the measurement date. The Company adopts the presumption that market participants would use when pricing the asset or liability in their best economic interest.

If there exists an active market for a financial asset or financial liability, the Company uses the quotation on the active market as its fair value. If the market for a financial instrument is inactive, the Company uses valuation technique to recognise its fair value.

Fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its best use or by selling it to another market participant that would use the asset in its best use.

The Company adopts valuation techniques that are appropriate in the current circumstance and for which sufficient data and other information are available, prioritises the use of relevant observable inputs and uses unobservable inputs only under the circumstances where such relevant observable inputs cannot be obtained or practicably obtained.

Assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy based on the lowest level input that is significant to the fair value measurement as a whole. Level 1: based on quoted prices (unadjusted) in active markets for identical assets or liabilities obtainable at the measurement date. Level 2: observable inputs for the relevant asset or liability, either directly or indirectly, except for Level 1 input. Level 3: unobservable inputs for the relevant assets or liability.

At each balance sheet date, the Company reassesses assets and liabilities measured at fair value that are recognised in the financial statements on a recurring basis to determine whether transfers have occurred between fair value measurement hierarchy levels.

13. Inventories

(1) Classification of inventories

Inventories of the Company mainly include raw materials, work in progress, goods in stock, development products and consumable biological assets, etc.

(2) Pricing of inventories dispatched

Inventories of the Company are measured at their actual cost when obtained. Cost of raw materials, goods in stock and others will be calculated with weighted average method when being dispatched.

Consumable biological assets refer to biological assets held-for-sale which include growing timber. Consumable biological assets without a stock are stated at historical cost at initial recognition, and subsequently measured at fair value when there is a stock. Changes in fair values shall be recognised as profit or loss in the current period. The cost of self-planting, self-cultivating consumable biological assets is the necessary expenses directly attributable to such assets prior to canopy closure, including borrowing costs eligible for capitalisation. Subsequent expenses such as maintenance cost incurred after canopy closure shall be included in profit or loss for the current period.

The cost of consumable biological assets shall, at the time of harvest or disposal, be carried forward at carrying amount using the stock volume proportion method.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

13. Inventories (Cont'd)

(3) Recognition of and provision for inventory impairment

At the balance sheet date, inventories are measured at the lower of cost and net realisable value. If the net realisable value is below the cost of inventories, a provision for inventory impairment is made.

Net realisable value refers to the amount of the estimated price of inventories less the estimated cost incurred upon completion, estimated sales expenses and taxes and levies. The realisable value of inventories shall be determined on the basis of definite evidence, purpose of holding the inventories and effect of after-balance-sheet-date events.

The Company usually makes provisions for inventory impairment on the basis of individual inventory items; however, for inventories with large quantities and lower unit prices, these inventories are accrued impairment according to inventory categories.

(4) Inventory stock taking system

The Company implements permanent inventory system as its inventory stock taking system.

(5) Amortisation of low-value consumables and packaging materials

The low-value consumables of the Company are amortised when issued for use.

Packaging materials for turnover are amortised when issued for use.

14. Long-term equity investments

Long-term equity investments include the equity investments in subsidiaries, joint ventures and associates. Associates of the Company are those investees that the Company imposes significant influence over.

(1) Determination of initial investment cost

Long-term equity investments acquired through business combinations: for a long-term equity investment acquired through a business combination involving enterprises under common control, the investment cost shall be the absorbing party's share of the carrying amount of the owners' equity under the consolidated financial statements of the ultimate controlling party on the date of combination. For a long-term equity investment acquired through a business combination involving enterprises not under common control, the investment cost of the long-term equity investment shall be the cost of combination.

Long-term equity investments acquired through other means: for a long-term equity investment acquired by cash payment, the initial investment cost shall be the purchase cost actually paid; for a long-term equity investment acquired by issuing equity securities, the initial investment cost shall be the fair value of equity securities issued.

(2) Subsequent measurement and method for profit or loss recognition

Investments in subsidiaries shall be accounted for using the cost method. Except for the investments which meet the conditions of holding for sale, investments in associates and joint ventures shall be accounted for using the equity method.

For a long-term equity investment accounted for using the cost method, the cash dividends or profits declared by the investees for distribution shall be recognised as investment gains and included in profit or loss for the current period, except the case of receiving the actual consideration paid for the investment or the declared but not yet distributed cash dividends or profits which is included in the consideration.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

- 14. Long-term equity investments (Cont'd)
 - (2) Subsequent measurement and method for profit or loss recognition (Cont'd)

For a long-term equity investment accounted for using the equity method, where the initial investment cost exceeds the investor's interest in the fair value of the investee's identifiable net assets at the acquisition date, no adjustment shall be made to the investment cost of the long-term equity investment. Where the initial investment cost is less than the investor's interest in the fair value of the investee's identifiable net assets at the acquisition date, adjustment shall be made to the carrying amount of the long-term equity investment, and the difference shall be charged to profit or loss for the current period.

Under the equity method, investment gain and other comprehensive income shall be recognised based on the Company's share of the net profits or losses and other comprehensive income made by the investee, respectively. Meanwhile, the carrying amount of long-term equity investment shall be adjusted. The carrying amount of long-term equity investment shall be reduced based on the Group's share of profit or cash dividend distributed by the investee. In respect of the other movement of net profit or loss, other comprehensive income and profit distribution of investee, the carrying amount of long-term equity investment shall be adjusted and included in the capital reserves (other capital reserves). The Group shall recognise its share of the investee's net profits or losses based on the fair values of the investee's individual separately identifiable assets at the time of acquisition, after making appropriate adjustments thereto according to the accounting policies and accounting periods of the Company.

For additional equity investment made in order to obtain significant influence or common control over investee without resulted in control, the initial investment cost under the equity method shall be the aggregate of fair value of previously held equity investment and additional investment cost on the date of transfer. For investments in non-trading equity instruments that were previously classified as at fair value through other comprehensive income, the cumulative fair value changes associated with them that were previously included in other comprehensive income are transferred to retained earnings upon the change to the equity method of accounting.

In the event of loss of common control or significant influence over investee due to partial disposal of equity investment, the remaining equity interest after disposal shall be accounted for according to the Accounting Standard for Business Enterprises No. 22 – Recognition and measurement of Financial Instruments. The difference between its fair value and carrying amount shall be included in profit or loss for the current period. In respect of other comprehensive income recognised under previous equity investment using equity method, it shall be accounted for in accordance with the same accounting treatment for direct disposal of relevant asset or liability by investee at the time when equity method was ceased to be used. Movement of other owners' equity related to the previous equity investment shall be transferred to profit or loss for the current period.

In the event of loss of control over investee due to partial disposal of equity investment, the remaining equity interest which can apply common control or impose significant influence over the investee after disposal shall be accounted for using equity method. Such remaining equity interest shall be treated as accounting for using equity method since it is obtained and adjustment was made accordingly. For the remaining equity interest which cannot apply common control or impose significant influence over the investee after disposal, it shall be accounted for using the Accounting Standard for Business Enterprises No. 22 – Recognition and measurement of Financial Instruments. The difference between its fair value and carrying amount as at the date of losing control shall be included in profit or loss for the current period.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

14. Long-term equity investments (Cont'd)

(2) Subsequent measurement and method for profit or loss recognition (Cont'd)

If the shareholding ratio of the Company is reduced due to the capital increase of other investors, and as a result, the Company loses the control of but still can apply common control or impose significant influence over the investee, the net asset increase due to the capital increase of the investee attributable to the Company shall be recognised according to the new shareholding ratio, and the difference with the original carrying amount of the long-term equity investment corresponding to the shareholding ratio reduction part that should be carried forward shall be recorded in the profit or loss for the current period; and then it shall be adjusted according to the new shareholding ratio as if equity method is used for accounting when acquiring the investment.

In respect of the transactions between the Company and its associates and joint ventures, the share of unrealised gain or loss arising from internal transactions shall be eliminated by the portion attributable to the Company. Investment gain or loss shall be recognised accordingly. However, any unrealised loss arising from internal transactions between the Company and an investee is not eliminated to the extent that the loss is impairment loss of the transferred assets.

(3) Basis for determining the common control and significant influence on the investee

Common control is the contractually agreed sharing of control over an arrangement, which relevant activities of such arrangement must be decided by unanimously agreement from parties who share control. When determining if there is any common control, it should first be identified if the arrangement is controlled by all the participants or the group consisting of the participants, and then determined if the decision on the arranged activity can be made only with the unanimous consent of the participants sharing the control. If all the participants or a group of participants can only decide the relevant activities of certain arrangement through concerted action, it can be considered that all the participants or a group of participants share common control on the arrangement. If there are two or more participant groups that can collectively control certain arrangement, it does not constitute common control. When determining if there is any common control, the relevant protection rights will not be taken into account.

Significant influence is the power of the investor to participate in the financial and operating policy decisions of an investee, but to fail to control or joint control the formulation of such policies together with other parties. When determining if there is any significant influence on the investee, the influence of the voting shares of the investee held by the investor directly and indirectly and the potential voting rights held by the investor and other parties which are exercisable in the current period and converted to the equity of the investee, including the warrants, stock options and convertible bonds that are issued by the investee and can be converted in the current period, shall be taken into account.

When the Company holds directly or indirectly through the subsidiary 20% (inclusive) to 50% of the voting shares of the investee, it is generally considered to have significant influence on the investee, unless there is concrete evidence to prove that it cannot participate in the production and operation decision-making of the investee and cannot pose significant influence in this situation. When the Company owns less than 20% (exclusive) of the voting shares of the investee, it is generally considered that it has not significantly influenced on the investee, unless there is concrete evidence to prove that it can participate in the production and operation decision-making of the investee and can impose significant influence in this situation.

(4) Impairment test method and impairment provision

For the method for making impairment provision for the investment in subsidiaries, associates and joint ventures, please refer to Note V. 23.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

15. Investment property

Investment property refers to real estate held to earn rentals or for capital appreciation, or both. The investment property of the Company includes leased land use rights, land use rights held for sale after appreciation, and leased buildings.

The investment property of the Company is measured initially at cost upon acquisition, and subject to depreciation or amortisation in the relevant periods according to the relevant provisions on fixed assets or intangible assets.

For the method for making impairment provision for the investment property adopted cost method for subsequent measurement, please refer to Note V. 23.

When an investment property is sold, transferred, retired or damaged, the amount of proceeds on disposal of the property net of the carrying amount and related tax and surcharges is recognised in profit or loss for the current period.

16. Fixed assets

(1) Conditions for recognition of fixed assets

Fixed assets represent the tangible assets held by the Company using in the production of goods, rendering of services and for operation and administrative purposes with useful life over one year.

Fixed assets are recognised when it is probable that the related economic benefits will flow to the Company and the costs can be reliably measured.

The Company's fixed assets are initially measured at the actual cost at the time of acquisition.

Subsequent expenditures incurred for a fixed asset are included in the cost of the fixed asset when it is probable that the associated economic benefits will flow to the Company and the related cost can be reliably measured. The cost of routine repairs of fixed assets that do not qualify as capitalised subsequent expenditure is charged to current profit or loss or included in the cost of the related assets in accordance with the beneficiary object when incurred. The carrying amount of the replaced part is derecognised.

(2) Depreciation method of fixed assets

The Company adopts the straight-line method for depreciation. Provision for depreciation will be started when the fixed asset reaches its expected usable state, and stopped when the fixed asset is derecognised or classified as a non-current asset held for sale. Without regard to the depreciation provision, the Company determines the annual depreciation rate by category, estimated useful lives and estimated residual value of the fixed assets as below:

	Year of	Estimated residual	Annual depreciation
Category	depreciation (year)	value (%)	rate (%)
Housing and building structure	20-40	5-10	2.25-4.75
Machinery and equipment	8-20	5-10	4.50-11.88
Transportation equipment	5-8	5-10	11.25-19.00
Electronic equipment and others	5	5-10	18.00-19.00

Where, for the fixed assets for which impairment provision is made, to determine the depreciation rate, the accumulated amount of the fixed asset impairment provision that has been made shall be deducted.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

16. Fixed assets (Cont'd)

- (3) The impairment test method and impairment provision method of the fixed assets are set out in Note V. 23.
- (4) The Company will review the useful lives, estimated net residual value and depreciation method of the fixed assets at the end of each year.

When there is any difference between the useful lives estimate and the originally estimated value, the useful lives of the fixed asset shall be adjusted. When there is any difference between the estimated net residual value estimate and the originally estimated value, the estimated net residual value shall be adjusted.

(5) Disposal of fixed assets

A fixed asset is derecognised on disposal or when it is expected that there shall be no economic benefit arising from using or after disposal. Where the fixed assets are sold, transferred, retired or damaged, the income received after disposal after deducting the carrying amount and related taxes are recognised in profit or loss for the current period.

17. Construction in progress

Construction in progress of the Company is recognised based on the actual construction cost, including all necessary expenditures incurred for construction projects, capitalised borrowing costs for the construction in progress before it has reached the working condition for its intended use, and other related expenses during the construction period.

A construction in progress is reclassified to fixed assets when it has reached the working condition for its intended use. For technological transformation or new machine-made paper projects, the projects will be put into trial operation for a period of time (usually three months) upon completion of construction. After the internal acceptance is completed during the trial operation period, the construction in progress will be transferred to fixed assets.

The method for impairment provision of construction in progress is set out in Note V. 23.

18. Materials for project

The materials for project of the Group refer to various materials prepared for construction in progress, including construction materials, equipment not yet installed and tools for production.

The purchased materials for project are measured at cost, and the planning materials for project are transferred to construction in progress. After the completion of the project, the remaining materials for project are transferred to inventory.

The method for impairment provision of materials for project is set out in Note V. 23.

The closing balance of materials for project is presented as "construction in progress" item in the balance sheet.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

19. Borrowing costs

(1) Recognition principle for the capitalisation of the borrowing costs

The borrowing costs incurred by the Company directly attributable to the acquisition, construction or production of a qualifying asset will be capitalised and included in the cost of relevant asset. Other borrowing costs will be recognised as expenses when incurred according to the incurred amount, and included in the profit or loss for the current period. When the borrowing costs meet all the following conditions, capitalisation shall be started:

- The capital expenditure has been incurred, which includes the expenditure incurred by paying cash, transferring non-cash assets or undertaking interest-bearing liabilities for acquiring, constructing or producing the qualifying assets;
- 2 the borrowing costs have been incurred; and
- 3 the acquisition, construction or production activity necessary for the asset to be ready for its intended use or sale has been started.

(2) Capitalisation period of borrowing costs

When a qualifying asset acquired, constructed or produced by the Company is ready for its intended use or sale, the capitalisation of the borrowing costs shall discontinue. The borrowing costs incurred after a qualifying asset is ready for its intended use or sale shall be recognised as expenses when incurred according to the incurred amount, and included in the profit or loss for the current period.

Capitalisation of borrowing costs shall be suspended during periods in which the acquisition, construction or production of a qualifying asset is interrupted abnormally, when the interruption is for a continuous period of more than 3 months. The capitalisation of the borrowing costs shall be continued in the normal interruption period.

(3) Calculation methods for capitalisation rate and capitalised amount of the borrowing costs

Where funds are borrowed for a specific purpose, the amount of interest to be capitalised shall be the actual interest expense incurred on that borrowing for the period less any bank interest earned from depositing the borrowed funds before being used into banks or any investment income on the temporary investment of those funds. Where funds are borrowed for general purpose, the Company shall determine the amount of interest to be capitalised on such borrowings by applying a capitalisation rate to the weighted average of the excess amounts of cumulative expenditures on the asset over and above the amounts of specific-purpose borrowings. The capitalisation rate shall be the weighted average of the interest rates applicable to the general-purpose borrowings.

During the capitalisation period, exchange differences on a specific purpose borrowing denominated in foreign currency shall be capitalised. Exchange differences related to general-purpose borrowings denominated in foreign currency shall be included in profit or loss for the current period.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

20. Bearer biological assets

(1) Standards for recognising bearer biological assets

Bearer biological assets refer to biological assets held for the purpose of producing agricultural products, providing labour services or renting. The Company's bearer biological assets are mainly tea trees. Bearer biological assets are initially measured at cost. The cost of a planted or propagated bearer biological asset includes the expenses directly attributable to the asset and necessarily incurred before the asset is ready for its intended production and operation, including the borrowing costs that are eligible for capitalisation.

The management, protection and feeding costs of a biological asset subsequent to crown closure or after the asset is ready for its intended production and operation are expensed and recognised in profit or loss as incurred. According to experience, the tea trees grown by the Company generally take 7 years to reach the crown closure stage.

Depreciation of bearer biological assets is calculated using the straight-line method over the estimated useful life of each biological asset less its residual value as follows:

		Estimated residual	Annual depreciation
Type of bearer biological assets	Useful life (year)	value (%)	rate (%)
Tea tree	20		5.00

The Company reviews the useful life and estimated net residual value of a bearer biological asset and the depreciation method applied at least at each financial year-end. A change in the useful life or estimated net residual value of a fixed asset or the depreciation method used shall be accounted for as a change in accounting estimate.

The difference between the disposal income of the sale, loss, death or damage of a bearer biological asset, net of its carrying amount and related taxes, is recognised in profit or loss for the current period.

(2) Treatment of impairment of bearer biological assets

The method for impairment provision of bearer biological assets is set out in Note V. 23.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

21. Intangible assets

The intangible assets of the Company include land use rights, software, patents and certificates of third party right.

The intangible asset is initially measured at cost, and its useful life is determined upon acquisition. If the useful life is finite, the intangible asset will be amortised over the estimated useful life using the amortisation method that can reflect the estimated realisation of the economic benefits related to the asset, starting from the time when it is available for use. If it is unable to reliably determine the estimated realisation, straight-line method shall be adopted for amortisation. The intangible assets with uncertain useful life will not be amortised.

The amortisation methods for the intangible assets with finite useful life are as follows:

		The basis for determining	Method of	
Category	Useful life	useful life	amortisation	Remark
Land use rights	50-70	Years of certificate	Straight-line method	
Software	5-10	Estimated years for	Straight-line method	
		software replacement		
Patents	5-20	Useful life of purchase	Straight-line method	
Certificates of third party right	3	Useful life of purchase	Straight-line method	

The Company reviews the useful life and amortisation method of the intangible assets with finite useful life at the end of each year. If it is different from the previous estimates, the original estimates will be adjusted, and will be treated as a change in accounting estimate.

If it is estimated on the balance sheet date that certain intangible asset can no longer bring future economic benefit to the company, the carrying amount of the intangible asset will be entirely transferred into the profit or loss for the current period.

The impairment method for the intangible assets is set out in Note V. 23.

22. R&D expenses

The R&D expenses of the Company are expenses directly related to the R&D activities of the Company, including the wages R&D staff, direct investment costs, depreciation expenses and long-term prepaid expenses, design expenses, equipment testing expenses, amortisation expenses of intangible assets, and outsourced R&D expenses, and other expenses. Among them, the wages of R&D staff are included in R&D expenses based on working hours of related projects. Equipment, production lines, and sites shared between R&D activities and other production and operation activities are included in R&D expenses according to the proportion of working hours and the proportion of area.

The Company divides the expenses on internal R&D projects into expenses in the research phase and expenses in the development phase. All R&D expenses of the Company are included in the current profits and losses when incurred.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

23. Asset impairment

Impairment of long-term equity investments in subsidiaries, associates and joint ventures, asset impairment on investment property, fixed assets, construction in progress, bearer biological assets measured at cost, right-of-use assets, intangible assets, goodwill and others (excluding inventories, deferred tax assets and financial assets) subsequently measured at cost is determined as follows:

The Company determines if there is any indication of asset impairment as at the balance sheet date. If there is any evidence indicating that an asset may be impaired, recoverable amount shall be estimated for impairment test. Goodwill arising from business combinations, intangible assets with an indefinite useful life and intangible assets not ready for intended use will be tested for impairment annually, regardless of whether there is any indication of impairment.

The recoverable amount of an asset is the higher of its fair value less costs of disposal and the present value of the future cash flows expected to be derived from the asset. The Company estimates the recoverable amount of an individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the Company shall determine the recoverable amount of the asset group to which the asset belongs. The determination of an asset group is based on whether major cash inflows generated by the asset group are independent of the cash inflows from other assets or asset groups.

When the recoverable amount of an asset or an asset group is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction amount is charged to profit or loss and an impairment provision is made accordingly.

For the purpose of impairment test of goodwill, the carrying amount of goodwill acquired in a business combination is allocated to the relevant asset groups on a reasonable basis from the acquisition date; where it is difficult to allocate to the related asset groups, it is allocated to the combination of related asset groups. The related asset groups or combination of asset groups are those which can benefit from the synergies of the business combination and are not larger than the reportable segments identified by the Company.

In the impairment test, if there is any indication that an asset group or a combination of asset groups related to goodwill may be impaired, the Company first tests the asset group or set of asset groups excluding goodwill for impairment, calculates the recoverable amount and recognises the corresponding impairment loss. An impairment test is then carried out on the asset group or combination of asset groups containing goodwill by comparing its carrying amount with its recoverable amount. If the recoverable amount is lower than the carrying amount, an impairment loss is recognised for goodwill.

An impairment loss recognised shall not be reversed in a subsequent period.

24. Long-term prepaid expenses

The long-term prepaid expenses incurred by the Company shall be recognised based on the actual cost, and evenly amortised over the estimated benefit period. For the long-term prepaid expense that cannot benefit the subsequent accounting periods, its value after amortisation shall be entirely included in the profit or loss for the current period.

25. Contract liabilities

A contract liability represents the Company's obligation to transfer goods to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If the customer has already paid the contract consideration before the Company transfers goods to the customer or the Company has obtained the unconditional collection right, the Company will recognise such amount received or receivable as contract liabilities at earlier of the actual payment by the customer or the amount payable becoming due. Contract assets and contract liabilities under the same contract are presented on a net basis, and contract assets and contract liabilities under different contracts are not offset.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

26. Employee benefits

(1) Scope of employee benefits

Employee benefits are all forms of considerations or compensation given by an entity in exchange for services rendered by employees or for the termination of employment. Employee benefits include short-term staff remuneration, post-employment benefits, termination benefits and other long-term employee benefits. Employee benefits include benefits provided to employees' spouses, children, other dependants, survivors of the deceased employees or other beneficiaries.

Employee benefits are presented as "employee benefits payable" and "long-term employee benefits payable" in the balance sheet, respectively, according to liquidity.

(2) Short-term staff remuneration

Employee wages or salaries actually incurred, bonuses, and social insurance contributions such as medical insurance, work injury insurance, maternity insurance, and housing fund, contributed at the applicable benchmarks and rates, are recognised as a liability as the employees provide services, with a corresponding charge to profit or loss or included in the cost of assets where appropriate.

(3) Post-employment benefits

Post-employment benefit plans include defined contribution plans and defined benefit plans. A defined contribution plan is a post-employment benefit plan under which the Company pays fixed contributions into a separate fund and the Company has no further obligations for payment. A defined benefit plan is a post-employment benefit plan other than a defined contribution plan.

Defined contribution plans

Defined contribution plans include basic pension insurance, unemployment insurance and enterprise annuity plan (if any).

During the accounting period in which an employee provides service, the amount payable calculated according to the defined contribution plan is recognised as a liability and included in the profit or loss for the current period or the cost of relevant assets.

(4) Termination benefits

When the Company provides termination benefits to employees, employee benefits liabilities arising from termination benefits are recognised in profit or loss for the current period at the earlier of the following dates: when the Company cannot revoke unilaterally compensation for dismissal due to the cancellation of labour relationship plans and employee redundant proposals; the Company recognises cost and expenses related to payment of compensation for dismissal and restructuring.

For the early retirement plans, economic compensations before the actual retirement date were classified as termination benefits. During the period from the date of cease of render of services to the actual retirement date, relevant wages and contribution to social insurance for the employees proposed to be paid are recognised in profit or loss on a one-off basis. Economic compensation after the official retirement date, such as normal pension, is accounted for as post-employment benefits.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

26. Employee benefits (Cont'd)

(5) Other long-term benefits

Other long-term employee benefits provided by the Group to employees that meet the conditions for defined contribution plans are accounted for in accordance with the relevant provisions relating to defined contribution plans as stated above. If the conditions for defined benefit plans are met, the benefits shall accounted for in accordance with the relevant provisions relating to defined benefit plans, but the "changes arising from the remeasurement of net liabilities or net assets of defined benefit plans" in the relevant employee benefits shall be included in the current profit and loss or the relevant costs of assets.

27. Provisions

Obligations pertinent to the contingencies which satisfy the following conditions are recognised by the Company as provisions:

- (1) the obligation is a current obligation borne by the Company;
- (2) it is likely that an outflow of economic benefits from the Company will be resulted from the performance of the obligation;
- (3) the amount of the obligation can be reliably measured.

The provisions shall be initially measured based on the best estimate for the expenditure required for the performance of the current obligation, after taking into account relevant risks, uncertainties, time value of money and other factors pertinent to the contingencies. If the time value of money has significant influence, the best estimates shall be determined after discounting the relevant future cash outflow. The Company reviews the carrying amount of the provisions on the balance sheet date and adjust the carrying amount to reflect the current best estimates.

If all or some expenses incurred for settlement of recognised provisions are expected to be borne by the third party, the compensation amount shall, on a recoverable basis, be recognised as asset separately, and compensation amount recognised shall not be more than the carrying amount of provisions.

28. Share-based payments and equity instruments

(1) Category of share-based payment

The Company's share-based payment is either equity-settled or cash-settled.

(2) Determination of fair value of equity instruments

For the existence of an active market for options and other equity instruments granted by the Company, the fair value is determined at the quoted price in the active market. For options and other equity instruments with no active market, option pricing model shall be used to estimate the fair value of the equity instruments. The following factors shall be taken into account using option pricing models: A. the exercise price of the option; B. the validity period of the option; C. the current market price of the share; D. the expected volatility of the share price; E. predicted dividend of the share; and F. risk-free rate of the option within the validity period.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

28. Share-based payments and equity instruments (Cont'd)

(3) Recognition of vesting of equity instruments based on the best estimate

On each balance sheet date within the vesting period, the estimated number of equity instruments expected to vest is revised based on the best estimate made by the Company according to the latest available subsequent information as to changes in the number of employees with exercisable rights. On the vesting date, the final estimated number of equity instruments expected to vest should equal the actual number of equity instruments expected to vest.

(4) Accounting treatment of implementation, modification and termination of share-based payment

Equity-settled share-based payment shall be measured at the fair value of the equity instruments granted to employees. For those may immediately vest after the grant, the fair value of equity instrument at the grant date shall be included in the relevant costs or expenses, and the capital reserve shall be increased accordingly. If the right may not be exercised until the vesting period comes to an end or until the specified performance conditions are met, on each balance sheet date within the vesting period, the services obtained in the current period shall, based on the best estimate of the number of vested equity instruments, be included in the relevant costs or expenses and the capital reserve at the fair value of the equity instrument at the grant date. After the vesting period, relevant costs or expenses and total shareholders' equity which have been recognised will not be adjusted.

Cash-settled share-based payment shall be measured in accordance with the fair value of liability calculated and recognised based on the shares or other equity instruments undertaken by the Company. For those may immediately vest after the grant, the fair value of the liability undertaken by the Company shall, on the date of the grant, be included in the relevant costs or expenses, and the liabilities shall be increased accordingly. If the right may not be exercised until the vesting period comes to an end or until the specified performance conditions are met, on each balance sheet date within the vesting period, the services obtained in the current period shall, based on the best estimate of the information about the exercisable right, be included in the relevant costs or expenses and the corresponding liabilities at the fair value of the liability undertaken by the Company. For each of the balance sheet date and settlement date before the settlement of the relevant liabilities, fair value of the liabilities shall be remeasured and the changes will be included in the profit or loss for the current period.

When there are changes in Company's share-based payment plans, if the modification increases the fair value of the equity instruments granted, corresponding recognition of service increase in accordance with the increase in the fair value of the equity instruments; if the modification increases the number of equity instruments granted, the increase in fair value of the equity instruments is recognised as a corresponding increase in service achieved. An increase in the fair value of equity instruments refers to the difference between the fair values of the modified date. If the modification reduces the total fair value of shares paid or not conductive to the use of other employees share-based payment plans to modify the terms and conditions of service, it will continue to be accounted for in the accounting treatment, as if the change had not occurred, unless the Company cancelled some or all of the equity instruments granted.

During the vesting period, if the cancelled equity instruments (except for failure to meet the conditions of the non-market vesting conditions) granted by the Company to cancel the equity instruments granted amount treated as accelerated vesting of the remaining period should be recognised immediately in profit or loss, while recognising capital reserves. If employees or other parties can choose to meet non-vesting conditions but they are not met in the vesting period, the Company will treat them as cancelled equity instruments granted.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

28. Share-based payments and equity instruments (Cont'd)

(5) Restricted shares

If the Company grants the restricted shares to incentive participants under an equity incentive plan, the incentive participants shall subscribe for the shares first. If the unlocking conditions stipulated in the equity incentive plan cannot be fulfilled subsequently, the Company repurchase the shares at the predetermined price. If the registration and other capital increase procedures for the restricted shares issued to employees are completed in accordance with relevant regulations, the Company recognises share capital and capital reserve (or capital premium) based on the subscription money received from the employees on the grant date; and recognises treasury shares and other payables for repurchase obligation.

29. Other financial instruments such as preference shares and Perpetual Bonds

(1) Classification of financial liabilities and equity instruments

Financial instruments issued by the Company are classified into financial assets, financial liabilities or equity instruments on the basis of the substance of the contractual arrangements and the economic nature not only its legal form, together with the definition of financial asset, financial liability and equity instruments on initial recognition.

(2) Accounting treatment of other financial instruments such as preference shares and Perpetual Bonds

Financial instruments issued by the Company are initially recognised and measured in accordance with the financial instrument standards; thereafter, interest or dividends are accrued on each balance sheet date and accounted for in accordance with relevant specific ASBEs, i.e. to determine the accounting treatment for interest expenditure or dividend distribution of the instrument based on the classification of the financial instrument issued. For financial instruments classified as equity instruments, their interest expenses or dividend distributions are treated as profit distribution of the Company, and their repurchases and cancellations are treated as changes in equity; for financial instruments classified as financial liabilities, their interest expenses or dividend distribution are in principle accounted for with reference to borrowing costs, and the gains or losses arising from their repurchases or redemption are included in the profit or loss for the current period.

For the transaction costs such as fees and commissions incurred by the Company for issuing financial instruments, if such financial instruments are classified as debt instruments and measured at amortised cost, they are included in the initial measured amount of the instruments issued; if such financial instruments are classified as equity instruments, they are deducted from equity.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

30. Revenue

(1) General principles

The Company recognises revenue when it satisfies a performance obligation in the contract, i.e. when the customer obtains control of the relevant goods or services.

Where a contract has two or more performance obligations, the Company allocates the transaction price to each performance obligation based on the percentage of respective unit price of goods or services guaranteed by each performance obligation, and recognises as revenue based on the transaction price that is allocated to each performance obligation.

If one of the following conditions is fulfilled, the Company performs its performance obligation within a certain period; otherwise, it performs its performance obligation at a point of time:

- when the customer simultaneously receives and consumes the benefits provided by the Company when the Company performs its obligations under the contract;
- when the customer is able to control the goods in progress in the course of performance by the Company under the contract;
- When the goods produced by the Company under the contract are irreplaceable and the Company has the right to payment for performance completed to date during the whole contract term.

For performance obligations performed within a certain period, the Company recognises revenue by measuring the progress towards complete of that performance obligation within that certain period. When the progress of performance cannot be reasonably determined, if the costs incurred by the Company are expected to be compensated, the revenue shall be recognised at the amount of costs incurred until the progress of performance can be reasonably determined.

For performance obligation performed at a point of time, the Company recognises revenue at the point of time at which the customer obtains control of relevant goods or services. To determine whether a customer has obtained control of goods or services, the Company considers the following indications:

- The Company has the current right to receive payment for the goods, which is when the customer has the current payment obligations for the goods.
- ② The Company has transferred the legal title of the goods to the customer, which is when the client possesses the legal title of the goods.
- The Company has transferred the physical possession of goods to the customer, which is when the customer obtains physical possession of the goods.
- The Company has transferred all of the substantial risks and rewards of ownership of the goods to the customer, which is when the customer obtain all of the substantial risks and rewards of ownership of the goods to the customer.
- ⑤ The customer has accepted the goods or services.
- 6 Other information indicates that the customer has obtained control of the goods.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

30. Revenue (Cont'd)

(2) Specific methods

The Company's revenue mainly comes from the following types of business: sales of goods, provision of hotel and property services, and provision of financial leasing and factoring services.

Sales of goods

The Company produces and sells machine-made paper and raw materials, electricity and steam, construction materials, papermaking chemicals, plastic automobile accessories, moulds and other products.

In terms of domestic sales, revenue is recognised at a point in time when the control over the goods is transferred after the Company has delivered the goods (other than electricity and steam) sold to the location as specified in the contract and the customer has accepted the goods.

In terms of overseas sales, revenue is recognised on the day when the goods (other than electricity and steam) sold are loaded on board and declared.

The sales of electricity and steam by the Company are performance obligations performed within a certain period. For sales of electricity, the Company recognises revenue from sales of electricity based on the quantity of electricity delivered to customers every month at a price agreed in the contract. For sales of steam, the Company recognises revenue from sales of steam based on the amount of steam delivered to customers every month at a price agreed in the contract.

The credit periods granted by the Company to customers in various industries are consistent with the practices of various industries, therefore, there is no significant financing component.

The Company provides product quality assurance for the sales of products and recognises corresponding provisions. The Company does not provide any additional services or additional quality assurance, so the product quality assurance does not constitute a separate fulfilment obligation.

The Company's cooperation model with distributors is outright sales, and the recognition of sales revenue under the distribution model is consistent with the direct sales model.

Certain contracts between the Company and its customers contain arrangements on sales rebates which will give rise to variable consideration. Where a contract contains variable consideration, the Company determines the best estimates on the variable consideration based on expected values or the most probable amount, provided that transaction prices including variable consideration shall not exceed the cumulative amount of recognised revenue upon the removal of relevant uncertainties in connection with which a significant reversal is highly unlikely.

For sales of machine-made paper with sales return clauses, the revenue recognised is subject to the cumulative amount of recognised revenue in connection with which a significant reversal is highly unlikely. The Company recognises the liabilities according to the expected amount of refund, and recognises the carrying amount of the goods returned at the time of transfer deducting the estimated cost of recovering the goods as an asset (including the loss of the value of the returned goods).

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

30. Revenue (Cont'd)

(2) Specific methods (Cont'd)

Provision of hotel and property services

The Company provides hotel and property services to external parties. Since the customers obtain and consume the economic benefits brought by the Company's performance of the contract while the Company performs the contract, the Company recognises revenue according to the progress of the contract performance. Since the performance progress occurs evenly, the Company recognises revenue by amortising on a straight-line basis over the service period.

Provision of financial leasing and factoring services

The Company recognises revenue from external financial leasing and factoring services according to the effective interest rate.

For assets that have not experienced credit impairment, the Company determines its interest income based on the amount of the book balance of the financial asset (i.e. without considering the impact of impairment) multiplied by the effective interest rate.

There are two cases for financial assets with credit impairment:

For financial assets that are not credit-impaired when purchased or originated, but are credit-impaired in subsequent periods, the Company shall, in the subsequent periods when impairment occurs, determine its income based on the amount of the amortised cost of the financial asset (i.e. the book balance minus the accrued impairment) multiplied by the effective interest rate (the effective interest rate determined at the time of initial recognition, which does not change due to the occurrence of impairment).

For financial assets that are credit-impaired when purchased or originated, the Company shall, upon initial recognition, determines its income based on the amount of the amortised cost of the financial asset multiplied by the credit-adjusted effective interest rate (i.e. the interest rate at which the projected future cash flows after impairment are discounted to the amortised cost at the time of purchase or origination).

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

31. Contract costs

Contract costs are either the incremental costs of obtaining a contract with a customer or the costs to fulfil a contract with a customer.

Incremental costs of obtaining a contract are those costs that the Company incurs to obtain a contract with a customer that it would not have incurred if the contract had not been obtained e.g. sales commission. The Company recognises the incremental costs of obtaining a contract with a customer as an asset if it expects to recover those costs. Other costs of obtaining a contract, other than incremental costs that are expected to be recovered, are recognised in profit or loss in the period in which they are incurred.

If the costs to fulfil a contract with a customer are not within the scope of inventories or other ASBEs, the Company recognises an asset from the costs incurred to fulfil a contract only if those costs meet all of the following criteria:

- ① the costs relate directly to an existing contract or to a specifically identifiable anticipated contract, including direct labour, direct materials, allocations of overheads (or similar costs), costs that are explicitly chargeable to the customer and other costs that are incurred only because the Company entered into the contract;
- 2 the costs generate or enhance resources of the Company that will be used in satisfying (or in continuing to satisfy) performance obligations in the future;
- 3 the costs are expected to be recovered.

Assets recognised for the incremental costs of obtaining a contract and assets recognised for the costs to fulfil a contract (the "assets related to contract costs") are amortised on a systematic basis that is consistent with the transfer to the customer of the goods or services to which the assets relate and recognised in profit or loss for the current period. If the amortisation period does not exceed one year, it shall be recognised in profit or loss for the current period.

The Company recognises an impairment loss in profit or loss to the extent that the carrying amount of an asset related to contract costs exceeds:

- Temaining amount of consideration that the Company expects to receive in exchange for the goods or services to which the asset relates;
- ② the cost estimated to be happened for the transfer of related goods or services.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

32. Government grants

A government grant is recognised when the grant will be received and that the Company will comply with the conditions attaching to the grant.

If a government grant is in the form of a monetary asset, it is measured at the amount received or receivable. If a government grant is in the form of non-monetary asset, it is measured at fair value; if the fair value cannot be obtained in a reliable way, it is measured at the nominal amount of RMB1.

Government grants obtained for acquisition or construction of long-term assets or other forms of long-term asset formation are classified as government grants related to assets, while the remaining government grants are classified as government grants related to revenue.

Regarding the government grant not clearly defined in the official documents and can form long-term assets, the part of government grant which can be referred to the value of the assets is classified as government grant related to assets and the remaining part is government grant related to revenue. For the government grant that is difficult to distinguish, the entire government grant is classified as government grant related to revenue.

A government grant related to an asset shall be recognised as deferred income, and evenly amortised to profit or loss over the useful life of the asset in a reasonable and systematic manner. For a government grant related to revenue, if the grant is a compensation for related costs, expenses or losses incurred, the grant shall be recognised in profit or loss for the current period or used to offset related costs; if the grant is a compensation for related costs, expenses or losses to be incurred in subsequent periods, the grant shall be recognised as deferred income, and recognised in profit or loss over the periods in which the related costs, expenses or losses are recognised, or used to offset related costs. A government grant measured at nominal amount is directly included in profit or loss for the current period. The Company adopts a consistent approach to the same or similar government grants.

A government grant related to daily activities is recognised in other gains or used to offset related costs relying on the essence of economic business; otherwise, recognised in non-operating income or used to offset non-operating expenses.

For the repayment of a government grant already recognised, if the carrying amount of relevant assets was written off at initial recognition, the carrying amount of the assets shall be adjusted; if there is any related deferred income, the repayment shall be offset against the carrying amount of the deferred income, and any excess shall be recognised in profit or loss for the current period; otherwise, the repayment shall be recognised immediately in profit or loss for the current period.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

33. Deferred income tax assets/deferred income tax liabilities

Income tax comprises current income tax expense and deferred income tax expense, which are included in profit or loss for the current period as income tax expenses, except for deferred tax related to transactions or events that are directly recognised in owners' equity which are recognised in owners' equity, and deferred tax arising from a business combination, which is adjusted against the carrying amount of goodwill.

Temporary differences arising from the difference between the carrying amount of an asset or liability and its tax base at the balance sheet date of the Company shall be recognised as deferred income tax using the balance sheet liability method.

All the taxable temporary differences are recognised as deferred income tax liabilities except for those incurred in the following transactions:

- (1) The initial recognition of goodwill, and the initial recognition of an asset or liability in a transaction which is neither a business combination nor affects accounting profit or taxable profit (or deductible loss) when the transaction occurs (other than a single transaction that the initially recognised assets and liabilities result in an equal amount of taxable temporary differences and deductible temporary differences);
- (2) The taxable temporary differences associated with investments in subsidiaries, associates and joint ventures, and the Company is able to control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The Company recognises a deferred income tax asset for the carry forward of deductible temporary differences, deductible losses and tax credits to subsequent periods, to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences, deductible losses and tax credits can be utilised, except for those incurred in the following transactions:

- (1) The transaction is neither a business combination nor affects accounting profit or taxable profit (or deductible loss) when the transaction occurs (other than a single transaction that the initially recognised assets and liabilities result in an equal amount of taxable temporary differences and deductible temporary differences);
- (2) The deductible temporary differences associated with investments in subsidiaries, associates and joint ventures, the corresponding deferred income tax asset is recognised when both of the following conditions are satisfied: it is probable that the temporary difference will reverse in the foreseeable future, and it is probable that taxable profits will be available in the future, against which the temporary difference can be utilised.

At the balance sheet date, deferred income tax assets and deferred income tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, and their tax effect is reflected accordingly.

At the balance sheet date, the Company reviews the carrying amount of a deferred income tax asset. If it is probable that sufficient taxable profits will not be available in future periods to allow the benefit of the deferred tax asset to be utilised, the carrying amount of the deferred tax asset is reduced. Any such reduction in amount is reversed when it becomes probable that sufficient taxable profits will be available.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

33. Deferred income tax assets/deferred income tax liabilities (Cont'd)

At the balance sheet date, deferred income tax assets and deferred income tax liabilities are presented as the net amount after offsetting when the following conditions are met at the same time:

- (1) The tax payer within the Company has the legal right to settle current income tax assets and current income tax liabilities on a net basis:
- (2) Deferred income tax assets and deferred income tax liabilities are related to income taxes levied by the same tax collection and administration authority on the same taxpayer within the Company.

34. Leases

(1) Identification of leases

On the beginning date of the contract, the Company (as a lessee or lessor) assesses whether the customer in the contract has the right to obtain substantially all of the economic benefits from use of the identified asset throughout the period of use and has the right to direct the use of the identified asset throughout the period of use. If a contract conveys the right to control the use of an identified asset and multiple identified assets for a period of time in exchange for consideration, the Company identifies such contract is, or contains, a lease.

(2) The Company as lessee

On the beginning date of the lease, the Company recognises right-of-use assets and lease liabilities for all leases, except for short-term lease and low-value asset lease with simplified approach.

The accounting policy for right-of-use assets is set out in Note V. 35.

The lease liability is initially measured at the present value of the lease payments that are not paid at the beginning date of the lease using the interest rate implicit in the lease. Where the interest rate implicit in the lease cannot be determined, the incremental borrowing rate is used as the discount rate. Lease payments include fixed payments and in-substance fixed payments, less any lease incentives receivable; variable lease payments that are based on an index or a rate; the exercise price of a purchase option if the lessee is reasonably certain to exercise that option; payments for terminating the lease, if the lease term reflects the lessee exercising that option of terminating; and amounts expected to be payable by the lessee under residual value guarantees. Subsequently, the interest expense on the lease liability for each period during the lease term is calculated using a constant periodic rate of interest and is recognised in profit or loss for the current period. Variable lease payments not included in the measurement of lease liabilities are recognised in profit or loss for the period in which they actually arise.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

34. Leases (Cont'd)

(2) The Company as lessee (Cont'd)

Short-term lease

Short-term leases refer to leases with a lease term of less than 12 months from the commencement date, except for those with a purchase option.

Lease payments on short-term leases are recognised in the cost of related assets or current profit or loss on a straight-line basis over the lease term.

For short-term leases, the Company chooses to adopt the above simplified approach for the following types of assets that meet the conditions of short-term lease according to the classification of leased assets.

- Low-value equipment
- Transportation vehicles

Low-value asset lease

A low-value asset lease is a lease that the value of a single leased asset is below RMB40,000 when it is a new asset.

Lease payments on low-value asset leases are recognised on a straight-line basis over the lease term, and either included in the cost of the related asset or charged to profit or loss for the current period.

For a low-value asset lease, the Company chooses the above simplified approach based on the specific circumstances of each lease.

Lease modification

The Company accounts for a lease modification as a separate lease when the modification occurs and the following conditions are met: ① the lease modification expands the scope of lease by adding the right to use one or more of the leased assets; and ② the increase in consideration is equivalent to the separate price for the expanded scope of lease adjusted for that contractual situation.

Where a lease modification is not accounted for as a separate lease, at the effective date of the lease modification, the Company reallocates the consideration of the modified contract, redetermines the lease term and remeasures the lease liability based on the present value of the lease payments after the modification and the revised discount rate.

If a lease modification results in a reduction in the scope of the lease or a shortening of the lease term, the Company reduces the carrying amount of the right-of-use asset accordingly and includes in the profit or loss for the period the gain or loss associated with the partial or complete termination of the lease.

Where other lease modifications result in a remeasurement of the lease liability, the Company adjusts the carrying amount of the right-of-use asset accordingly.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

34. Leases (Cont'd)

(3) The Company as lessor

When the Company is a lessor, a lease is classified as a finance lease whenever the terms of the lease transfer substantially all the risks and rewards of asset ownership to the lessee. All leases other than financial leases are classified as operating leases.

Finance leases

Under finance leases, the Company accounts for finance lease receivables at the beginning of the lease term at the net lease investment, which is the sum of the unsecured residual value and the present value of the lease receipts outstanding at the commencement date of the lease, discounted at the interest rate implicit in the lease. The Company as lessor calculates and recognises interest income for each period of the lease term based on a fixed periodic interest rate. Variable lease payments acquired by the Company as lessor that are not included in the net measurement of lease investments are included in profit or loss for the period when they are actually incurred.

Derecognition and impairment of finance lease receivables are accounted for in accordance with the requirements under the Accounting Standard for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments and the Accounting Standards for Business Enterprises No. 23 – Transfer of Financial Assets.

Operating lease

Lease payments on short-term leases are recognised in the cost of related assets or current profit or loss on a straight-line basis over the lease term. Lease payments under operating leases are recognised in profit or loss on a straight-line basis over the lease term. Initial direct costs incurred in relation to operating leases are capitalised and amortised over the lease term on the same basis as rental income and recognised in profit or loss for the current period. The variable lease payments obtained in relation to operating leases that are not included in the lease payments are recognised in profit or loss in the period in which they actually incurred.

Lease modification

The Company accounts for a modification in an operating lease as a new lease from the effective date of the modification and the amount of lease receipts received in advance or receivable in respect of the lease prior to the modification is treated as a receipt under the new lease.

The Company accounts for a modification in a finance lease as a separate lease when the change occurs and the following conditions are met: ① the modification expands the scope of lease by adding the right to use one or more of the leased assets; and ② the increase in consideration is equivalent to the separate price for the expanded scope of lease adjusted for that contractual situation.

Where a finance lease is modified and not accounted for as a separate lease, the Company accounts for the modified lease in the following circumstances: ① If the modification takes effect on the lease commencement date, the lease will be classified as an operating lease, the Company will account for it as a new lease from the effective date of the lease modification, and use the net lease investment before the effective date of the lease modification; ② If the modification takes effect on the lease commencement date, the lease will be classified as a finance lease, and the Company will conduct accounting treatment in accordance with the Accounting Standards for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments on modifying or renegotiating contracts.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

34. Leases (Cont'd)

(4) Sublease

When the Company is an intermediate lessor, the sublease is classified with reference to the right-of-use assets arising from the head lease. If the head lease is a short-term lease for which the Company adopts a simplified approach, then the Company classifies the sublease as an operating lease.

(5) Sale and leaseback

The lessee and the lessor shall assess and determine whether the transfer of assets in a sale and leaseback transaction is a sale in accordance with the requirements of the Accounting Standard for Business Enterprises No. 14 – Revenue.

Where asset transfer under the sale and leaseback transactions is a sale, the lessee shall measure the right-of-use assets created by the sale and leaseback based on the portion of carrying amount of the original assets related to right of use obtained upon leaseback, and only recognise relevant profit or loss for the right transferred to the lessor. The lessor shall account for the purchase of assets in accordance with other applicable ASBEs and account for the lease of assets in accordance with this standard.

Where asset transfer under the sale and leaseback transactions is not a sale, the lessee shall continue to recognise the transferred assets while recognising a financial liability equal to the transfer income and account for such liability according to the Accounting Standard for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments; or not to recognise the transferred assets but recognise a financial asset equal to the transfer income and account for such asset according to the Accounting Standard for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments.

35. Right-of-use assets

Conditions for recognition of right-of-use assets

Right-of-use assets are defined as the right of underlying assets in the lease term for the Company as a lessee.

Right-of-use assets are initially measured at cost at the commencement date of the lease. The cost includes the amount of the initial measurement of lease liability; lease payments made at or before the inception of the lease less any lease incentives enjoyed; initial direct costs incurred by the Company as lessee; costs to be incurred in dismantling and removing the underlying assets, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease incurred by the Company as lessee. As a lessee, the Company recognises and measures the costs of dismantling and restoration in accordance with the Accounting Standard for Business Enterprises No. 13 – Contingencies. Subsequently, the lease liability is adjusted for any remeasurement of the lease liability.

(2) Depreciation method of right-of-use assets

The Company uses the straight-line method for depreciation. Where the Company, as a lessee, is reasonably certain to obtain ownership of the leased asset at the end of the lease term, such asset is depreciated over the remaining useful life of the leased asset. Where ownership of the lease assets during the lease term cannot be reasonably determined, right-of-use assets are depreciated over the lease term or the remainder of useful lives of the lease assets, whichever is shorter.

(3) For the methods of impairment test and impairment provision of right-of-use assets, please refer to Note V. 23.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

36. Production safety expenses and maintenance costs

According to relevant provisions, the Company makes provisions for production safety expenses based on the revenue of the power plant in the previous year and the prescribed percentages. The specific provisions are as follows: ① if the revenue of the previous year exceeded RMB10 million, provisions would be made at 3%; ② if the revenue of the previous year exceeded RMB10 million but did not exceed RMB100 million, provisions would be made at 1.5%; ③ if the revenue of the previous year exceeded RMB100 million but did not exceed RMB1,000 million, provisions would be made at 1%; ④ if the revenue of the previous year exceeded RMB1,000 million but did not exceed RMB5,000 million, provisions would be made at 0.8%; ⑤ if the revenue of the previous year exceeded RMB5,000 million but did not exceed RMB10,000 million, provisions would be made at 0.6%; ⑥ if the revenue of the previous year exceeded RMB10,000 million, provisions would be made at 0.2%.

Provisions for production safety expenses are included in the cost of related products or profit or loss of the current period and included in "special reserves" correspondingly.

When the provisions for production safety expenses and maintenance costs are utilised within the prescribed scope, if such production safety expenses are applied and related to revenue expenditures, specific reserve is directly offset. When fixed assets are incurred, they are included in the "construction in progress" item and transferred to fixed assets when the status of the assets is ready for intended use. They are then offset against specific reserve based on the amount included in fixed assets while corresponding amount is recognised in accumulated depreciation. Such fixed assets are no longer depreciated in subsequent periods.

37. Repurchase of shares

Prior to cancellation or transfer of shares repurchased, the Company recognises all expenditures arising from share repurchase as cost of treasury shares in the treasury share account. Considerations and transaction fee incurred from the repurchase of shares shall lead to the elimination of owners' equity and does not recognise profit or loss when shares of the Company are repurchased, transferred or cancelled.

The difference between the actual amount received and the carrying amount of the treasury shares are recognised as capital reserve when the treasury shares are transferred, if the capital reserve is not sufficient to be offset, the excess amount shall be recognised to offset surplus reserve and retained profit. When the treasury shares are cancelled, the capital shall be eliminated according to the number of shares and par value of cancelled shares, the difference between the actual amount received and the carrying amount of the treasury shares are recognised as capital reserve, if the capital reserve is not sufficient to be offset, the excess amount shall be recognised to offset surplus reserve and retained profit.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

38. Debt restructuring

(1) The Company as the debtor

The debt is derecognised when the current obligation of the debt is discharged. Specifically, when the uncertainty about the execution process and results of the debt restructuring agreement is eliminated, the gains and losses related to the debt restructuring are recognised.

If debt restructuring is carried out by repaying debts with assets, the Company shall derecognise the relevant assets and the debts paid off when they meet the conditions for derecognition, and the difference between the book value of the debts paid off and the book value of the transferred assets shall be included in the current profit and loss.

If the debt is converted into equity instruments for debt restructuring, the Company shall derecognise the debts paid off when they meet the conditions for derecognition. When the Company initially recognises an equity instrument, it is measured based on the fair value of the equity instrument. If the fair value of the equity instrument cannot be measured reliably, it is measured based on the fair value of the debt paid off. The difference between the book value of the debts paid off and the recognised amount of the equity instrument shall be included in the current profit and loss.

When a debt restructuring involves the modification of other terms of a debt, the Company shall recognise and measure the restructured debts in accordance with the Accounting Standards for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments and the Accounting Standards for Business Enterprises No. 37 – Presentation of Financial Instruments.

When a debt is settled by multiple assets or combination of various methods in a debt restructuring, the Company shall recognise and measure the equity instruments and restructured debts in accordance with the aforementioned methods, and the difference between the book value of the debts paid off and the sum of the book value of the transferred assets and the recognised amount of the equity instruments and restructured debts shall be included in the current profit and loss.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

38. Debt restructuring (Cont'd)

(2) The Company as the creditor

The debt receivable are derecognised when the contractual rights to receive the cash flows under the debt receivable expire. Specifically, when the uncertainty about the execution process and results of the debt restructuring agreement is eliminated, the gains and losses related to the debt restructuring are recognised.

If debt restructuring is carried out by repaying debts with assets, the Company shall initially recognise assets other than the transferred financial assets at cost. In particular, the cost of inventories includes the fair value of the debt receivable and any directly attributable expenditure, including taxes, transportation costs, handling costs, insurance and other costs, for bringing the assets to the current position and condition; the cost of investment in associates or joint ventures includes the fair value of the debt receivable and any directly attributable taxes and other costs; the cost of investment property includes the fair value of the debt receivable and any directly attributable taxes and other costs; the cost of fixed assets includes the fair value of the debt receivable and any directly attributable expenditure, including taxes, transportation costs, handling costs, installation costs, professional service fees and other costs, for bringing the assets to the status for intended use; the cost of intangible assets includes the fair value of the debt receivable and any directly attributable expenditure, including taxes, for bringing the assets to the status for intended use. The difference between the fair value and the book value of the debt receivable is included in the current profit and loss.

When the debt restructuring causes the Company to convert the debt receivable to an equity investment of joint ventures or associates, the Company shall measure the equity investment based on the sum of the fair value of debt receivable, and any directly attributable taxes and other costs of the investment. The difference between the fair value and the book value of the debt receivable is included in the current profit and loss.

When a debt restructuring involves the modification of other terms of a debt, the Company recognises and measures the restructured debt receivable in accordance with the Accounting Standards for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments.

When a debt is settled by multiple assets or combination of various methods in a debt restructuring, the Company first recognises and measures the financial assets received and restructured debt receivable in accordance with the Accounting Standards for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments, and then allocates the net value, which is the fair value of the debt receivable deducted by the recognised amount of financial assets received and restructured debt receivable, to the costs of nonfinancial assets received based on their relative fair value. The difference between the fair value and the book value of the debt receivable is included in the current profit and loss.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

39. Critical accounting judgments and estimates

The Company gives continuous assessment on, among other things, the reasonable expectations of future events and the critical accounting estimates and key assumptions adopted according to its historical experience and other factors. The critical accounting estimates and key assumptions that are likely to lead to significant adjustment risks of the carrying amount of assets and liabilities for the next financial year are listed as follows:

Deferred income tax assets

Deferred income tax assets are recognised for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred income tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

Classification of financial assets

Significant judgements involved in determining the classification of financial assets include the analysis of business models and contractual cash flow characteristics.

Factors considered by the Company in determining the business model for a group of financial assets include how the asset's performance is evaluated and reported to key management personnel, how risks are assessed and managed and how the relevant management personnel are compensated.

When the Company assesses whether the contractual cash flows of the financial assets are consistent with basic lending arrangements, the main judgements are described as below: whether the principal amount may change over the life of the financial asset (for example, if there are repayments of principal); whether the interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin and cost. For example, whether the amount repaid in advance reflects only the outstanding principal and interest thereon, as well as reasonable compensation paid for early termination of the contract.

Measurement of the ECLs of accounts receivable

The Company calculates the ECLs of accounts receivable using the exposure to default risk and ECL rate of accounts receivable, and determines the ECL rate based on default probability and default loss rate. When determining the ECL rate, the Company adjusts its historical data by referring to information such as historical credit loss experience as well as current situation and forward-looking information. When considering the forward-looking information, indicators used by the Company include the risk of economic downturn, external market environment, technology environment and changes in customers. The assumptions relating to the ECL calculation are monitored and reviewed by the Company on a regularly basis.

Measurement of past due credit losses on finance lease receivables

The Company calculates the ECLs of financial lease receivables using the exposure to default risk and ECL rate of financial lease receivables, and determines the ECL rate based on default probability and default loss rate. When determining the ECL rate, the Company takes into account the current status and repayment ability of the counterparty while considering the value of collateral, guarantees and other credit enhancement measures related to the lease receivables.

V. Significant Accounting Policies and Accounting Estimates (Cont'd)

39. Critical accounting judgments and estimates (Cont'd)

Deferred income tax assets

Deferred income tax assets are recognised for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred income tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

Impairment of goodwill

The Company assesses the impairment of goodwill at least annually, which requires estimates of the use value of asset groups allocated with goodwill. When estimating the use value, the Company is required to estimate the future cash flows from such asset groups while selecting the appropriate discount rate to calculate the present value of future cash flows.

Impairment of inventories

On the balance sheet date, the Company determines the net realisable value of its inventories based on the estimated selling prices of the inventories, less costs estimated to be incurred upon completion, estimated selling expenses and related taxes. The realisable value of inventories shall be determined on the basis of definite evidence, purpose of holding the inventories and effect of after-balance-sheet-date events. If the net realisable value is below the cost of inventories, a provision for inventory impairment is made.

Impairment of fixed assets and long-term equity investments

The Company assesses the impairment of fixed assets and long-term equity investments at least annually. When any event or change in circumstances indicates that the carrying amount may not be recoverable, the carrying amount of such project is reviewed for impairment. If the carrying amount of an asset exceeds its recoverable amount, impairment loss is recognised for the difference. The recoverable amount is determined as the higher of the asset's fair value less costs of disposal and the present value of the asset's estimated future cash flows. A number of assumptions are made in estimating the recoverable amount of assets, including future cash flows and discount rates relating to non-current assets. If future events differ from these assumptions, the recoverable amount shall be revised, which may have an impact on the operations or financial position of the Company.

2. Tax incentives

(1) Enterprise income tax

On 7 December 2024, the Company received a high and new technology enterprise certificate with a certification number of GR202437001530. Pursuant to the requirements under the Law of the People's Republic of China on Enterprise Income Tax and the relevant policies, the Company is subject to a corporate income tax rate of 15% of taxable income, and is entitled to the preferential treatment from 2024 to 2026.

Shouguang Meilun Paper Co., Ltd., a subsidiary of the Company, received a high and new technology enterprise certificate with a certification number of GR202437000114 on 7 December 2024. Pursuant to the requirements under the Law of the People's Republic of China on Enterprise Income Tax and the relevant policies, Shouguang Meilun is subject to an enterprise income tax rate of 15% of taxable income, and is entitled to the preferential treatment from 2024 to 2026.

VI. Taxation (Cont'd)

2. Tax incentives (Cont'd)

Enterprise income tax (Cont'd)

Jilin Chenming Paper Co., Ltd., a subsidiary of the Company, has been handling the renewal procedures for its high and new technology enterprise certificate during the year as the certificate has expired at the end of 2024. The renewal is expected to be completed in October, and Jilin Chenming is still subject to an enterprise income tax rate of 15% of taxable income for the period.

Jiangxi Chenming Paper Co., Ltd., a subsidiary of the Company, has been handling the renewal procedures for its high and new technology enterprise certificate during the year as the certificate has expired at the end of 2024. The renewal is expected to be completed in December, and Jiangxi Chenming is still subject to an enterprise income tax rate of 15% of taxable income for the period.

Zhanjiang Chenming Pulp & Paper Co., Ltd., a subsidiary of the Company, received a high and new technology enterprise certificate with a certification number of GR202444002840 on 19 November 2024. Pursuant to the requirements under the Law of the People's Republic of China on Enterprise Income Tax and the relevant policies, Zhanjiang Chenming is subject to an enterprise income tax rate of 15% of taxable income, and is entitled to the preferential treatment from 2024 to 2026.

Huanggang Chenming Pulp & Paper Co., Ltd., a subsidiary of the Company, received a high and new technology enterprise certificate with a certification number of GR202342003128 on 5 December 2023. Pursuant to the requirements under the Law of the People's Republic of China on Enterprise Income Tax and the relevant policies, Huanggang Chenming is subject to an enterprise income tax rate of 15% of taxable income, and is entitled to the preferential treatment from 2023 to 2025.

Pursuant to the requirements of Rule 27(1) of Law of the People's Republic of China on Enterprise Income Tax and Rule 86(1) of regulations for the Implementation of Law of the People's Republic of China on Enterprise Income Tax, Zhanjiang Chenming Arboriculture Development Co., Ltd., Yangjiang Chenming Arboriculture Development Co., Ltd., Nanchang Chenming Arboriculture Development Co., Ltd. and Chenming Arboriculture Co., Ltd., which are the subsidiaries of the Company, have completed the filings for EIT reduction for exemption from EIT.

Shouguang Xinyuan Coal Co., Ltd. and Shouguang Chenming Papermaking Machine Co., Ltd., which are subsidiaries of the Company, are small and micro enterprises. Pursuant to the Announcement of the Ministry of Finance and the State Administration of Taxation on Further Implementation of Preferential Income Tax Policies for Small and Micro Enterprises (Cai Shui [2022] No. 13) and the Announcement of the Ministry of Finance and the State Administration of Taxation on the Implementation of Preferential Income Tax Policies for Small and Micro Enterprises and Individual Industrial and Commercial Business (Cai Shui [2023] No. 6), the annual taxable income of a small low-profit enterprise that is less than RMB3 million shall be included in its taxable income at a reduced rate of 25%, with the applicable enterprise income tax rate of 20%.

(2) Value-added Tax ("VAT")

Pursuant to Rule 10 of the Interim Regulation of the People's Republic of China on Value Added Tax, Zhanjiang Chenming Arboriculture Development Co., Ltd., Yangjiang Chenming Arboriculture Development Co., Ltd., Nanchang Chenming Arboriculture Development Co., Ltd. and Chenming Arboriculture Co., Ltd., which are subsidiaries of the Company, are exempt from VAT, and have completed the filings for VAT reduction for exemption from VAT.

VII. Notes to items of the consolidated financial statements

1. Monetary funds

Unit: RMB

Item	Closing balance	Opening balance
Treasury cash	2,394,083.00	1,363,319.76
Bank deposit	60,585,255.05	150,579,926.55
Other monetary funds	875,404,665.38	5,728,747,806.12
Interest accrued on deposits	15,277,493.17	29,188,759.75
Total	953,661,496.60	5,909,879,812.18
Including: Total deposits in overseas banks	25,556,854.12	90,613,912.87

Other explanations:

- ① Other monetary funds of RMB202,153,506.60 were the guarantee deposit for the application for acceptance bills by the Company, of which RMB2,153,506.60 was locked-up.
- ② Other monetary funds of RMB607,004,754.05 were the guarantee deposit for the application for letter of credit with the banks by the Company, of which RMB78,478,176.11 was locked-up.
- ③ Other monetary funds of RMB7,615,777.01 were the guarantee deposit for the application for loans with the banks by the Company.
- ④ Other monetary funds of RMB58,630,627.72 were locked-up due to reasons such as litigations or being unused for a long time, resulting in restriction on the use of that account's balance.

2. Financial assets held for trading

Unit: RMB

Item	Closing balance	Opening balance
Financial assets measured at fair value through profit or loss	36,692,409.73	37,259,325.70

3. Bills receivable (Cont'd)

(3) Bills receivable endorsed or discounted by the Company but not yet due as at the balance sheet date

Unit: RMB

	Amount derecognised as at the end	Amount not yet derecognised as at the end
Item	of the period	of the period
Bank acceptance bills		746,520,575.24
Total		746,520,575.24

4. Accounts receivable

(1) Disclosure by ageing

Unit: RMB

	Closing book	Opening book
Ageing	balance	balance
Within 1 year (including 1 year)	639,549,718.94	929,046,115.66
1 to 2 years	132,077,444.26	274,913,099.67
2 to 3 years	367,993,588.74	352,196,765.13
Over 3 years	1,132,302,980.26	1,112,205,999.57
Subtotal	2,271,923,732.20	2,668,361,980.03
Less: Bad debts provision	1,341,192,229.68	1,284,071,666.33
Total	930,731,502.52	1,384,290,313.70

The basis used by the ageing analysis of the accounts receivable of the Company: the ageing of accounts receivable is the length of time of the Company's outstanding accounts receivable based on invoice date. The closing balance is recognised one by one from the end of the period onwards until the amounts add up to the balance. It is also broken up by intervals of within 1 year, 1-2 years, 2-3 years and over 3 years.

5. Accounts receivable financing

(1) Accounts receivable financing by category

Unit: RMB

Item	Closing balance	Opening balance
Bank acceptance bills	92,166,113.62	100,730,797.32
Total	92,166,113.62	100,730,797.32

Explanation: All the accounts receivable financing of the Company were bank acceptance bills. Since the terms of the bank acceptance bills did not exceed one year, and both parties to the endorsement of the bills agreed to offset equal amounts of accounts receivable and payable based on the face value of the bills, fair value equalled amortised cost.

Certain subsidiaries of the Company discount and endorse part of the bank acceptance bills based on their daily capital management needs. Therefore, the bank acceptance bills of the subsidiaries are classified as financial assets measured at fair value through other comprehensive income.

The Company has no bank acceptance bill assessed individually for impairment provision. At the end of the period, the Company believed that there was no significant credit risk in the bank acceptance bills held and no major losses would be incurred due to default of banks.

(2) Disclosure by bad debt provision method

Unit: RMB

			Closing balance					Opening balance

Bank acceptance bills	92,166,113.62					
Total	92,166,113.62					

VII. Notes to items of the consolidated financial statements (Cont'd)

- 5. Accounts receivable financing (Cont'd)
 - (3) Accounts receivable financing endorsed or discounted but not yet due as at the balance sheet date

Unit: RMB

	Amount derecognised as at the end	Amount not yet derecognised as at the end
Item	of the period	of the period
Bank acceptance bills	616,041,951.77	
Total	616,041,951.77	

Explanation: The credit risk and deferred payment risk of bank acceptance bills used for discounting were very small, and the interest rate risk related to the bills had been transferred to the banks. It was determined that the major risks and rewards of the ownership of the bills had been transferred, so these bills were derecognised.

Other receivables

Unit: RMB

Item	Closing balance	Opening balance

 - (2) Other receivables
 - 1) Classification of other receivables by nature

Unit: RMB

Nature	Closing book balance	Opening book balance
Open credit	2,465,026,126.24	2,522,792,110.64
Guarantee deposit and deposit	18,719,780.93	14,874,445.09
Reserve and borrowings	13,597,076.99	16,114,760.18
Others	8,676,751.74	7,975,085.22
Subtotal	2,506,019,735.90	2,561,756,401.13
Bad debts provision	1,679,526,638.54	1,499,763,680.00
Total	826,493,097.36	1,061,992,721.13

2) Disclosure by ageing

Unit: RMB

Ageing	Closing book balance	Opening book balance
Within 1 year (including 1 year)	535,306,086.74	680,590,285.93
1 to 2 years	492,014,742.91	409,320,986.47
2 to 3 years	156,121,767.11	198,957,834.50
Over 3 years	1,322,577,139.14	1,272,887,294.23
Subtotal	2,506,019,735.90	2,561,756,401.13
Bad debts provision	1,679,526,638.54	1,499,763,680.00
Total	826,493,097.36	1,061,992,721.13

The basis used by the ageing analysis: the ageing of other receivables is the length of time of the Company's outstanding other receivables based on invoice date. The closing balance is recognised one by one from the end of the period onwards until the amounts add up to the balance. It is also broken up by intervals of within 1 year, 1-2 years, 2-3 years and over 3 years.

Other explanation:

As at 30 June 2025, housing, building structure and equipment with the carrying amount of RMB19,712,891,634.14 (31 December 2024: carrying amount of RMB20,001,586,415.43), investment properties with the carrying amount of RMB5,195,027,744.73 (31 December 2024: carrying amount of RMB5,433,525,500.09) and intangible assets with the carrying amount of RMB1,328,582,983.12 (31 December 2024: carrying amount of RMB1,312,981,381.52) were pledged as collateral for long-term borrowings of RMB2,970,922,783.69 (31 December 2024: RMB3,669,467,809.18), short-term borrowings of RMB2,134,928,749.43 (31 December 2024: RMB1,375,200,404.98) and long-term payables of RMB3,434,953,627.32 (31 December 2024: RMB3,600,767,587.75).

VII. Notes to items of the consolidated financial statements (Cont'd)

25. Short-term borrowings

(1) Classification of short-term borrowings

Unit: RMB

Item	Closing balance	Opening balance
Credit borrowings	11,776,210,057.84	8,179,010,348.64
Guaranteed borrowings	8,654,559,071.44	8,087,802,486.06
Mortgage borrowings	2,134,928,749.43	1,375,200,404.98
Discounted borrowings	760,520,575.24	8,292,279,333.33
Pledged borrowings		846,066,236.10
Total	23,326,218,453.95	26,780,358,809.11

Explanation of the classification of short-term borrowings:

- ① For classification and amount of mortgage borrowings and mortgage assets, please see 1. Monetary funds and 24. Assets with restricted ownerships or right to use in Note VII.
- ② Short-term borrowings included accrued interest of RMB64,501,511.68.
- Mortgage borrowings of RMB1,880,000,000.00 and discounted borrowings of RMB14,000,000.00 were also guaranteed by related parties.

(2) Overdue outstanding short-term borrowings

At the end of the period, the overdue debts of the Company totalled RMB3,972,836,482.31, of which overdue short-term borrowings amounted to RMB905,650,183.88, and in accordance with Interpretation No. 17, the liabilities transferred to short-term borrowings totalled RMB3,067,186,298.43, including overdue bank acceptance bills of RMB1,145,186,298.43, overdue long-term borrowings of RMB1,652,000,000.00, and non-current liabilities due within one year – bank loans of RMB270,000,000.00.

26. Bills payable

Unit: RMB

Category	Closing balance Opening b	alance
Commercial acceptance bills	107,370,000.00 1,213,818,	112.99
Bank acceptance bills	210,100,	000.00
Total	107,370,000.00 1,423,918,	112.99

Explanation: Total outstanding bills payable due as at the end of the period amounted to RMB2,561,992,199.27, which was classified and presented as accounts payable, other payables and short-term borrowings.

VII. Notes to items of the consolidated financial statements (Cont'd)

27. Accounts payable

(1) Particulars of accounts payable

Unit: RMB

Item	Closing balance	Opening balance
Payment for goods	8,010,998,632.51	7,272,978,630.96
Payment for engineering	212,032,090.10	217,322,928.02
Payment for equipment	116,657,952.68	117,822,089.47
Service fees	2,903,764.11	2,163,435.99
Others	84,309,631.91	98,680,322.03
Total	8,426,902,071.31	7,708,967,406.47

(2) Disclosure by ageing

Unit: RMB

		Reason for outstanding
Item	Closing balance	or not transfer
Within 1 year (including 1 year)	7,684,419,134.32	As agreed in the contract and the
William Fyear (mercaning Fyear)	7,00 1, 770,70 1102	liquidity shortage of the Company
1 to 2 years	490,738,853.69	As agreed in the contract and the liquidity shortage of the Company
2 to 3 years	40,164,091.58	As agreed in the contract and the liquidity shortage of the Company
Over 3 years	211,579,991.72	As agreed in the contract and the
		liquidity shortage of the Company
Total	8,426,902,071.31	

The basis used by the ageing analysis of the accounts payable of the Company: the ageing of accounts payable is the length of time of the Company's outstanding accounts payable based on invoice date. The closing balance is recognised one by one from the end of the period onwards until the amounts add up to the balance. It is also broken up by intervals of within 1 year, 1-2 years, 2-3 years and over 3 years.

Total	844,340,067.04	2,680,562,600.58

VII. Notes to items of the consolidated financial statements (Cont'd)

35. Long-term borrowings

(1) Types of long-term borrowings

Unit: RMB

Item	Closing balance	Opening balance
Mortgage borrowings	2,970,922,783.69	3,669,467,809.18
Credit borrowings	1,618,568,495.96	1,221,043,391.30
Guaranteed borrowings	1,187,334,452.57	1,080,907,277.70
Subtotal	5,776,825,732.22	5,971,418,478.18
Less: Long-term borrowings due within one year	2,074,899,052.38	1,207,756,283.94
Total	3,701,926,679.84	4,763,662,194.24

Other explanation:

- ① For classification and amount of mortgage borrowings and mortgage assets, please see 1. Monetary funds and 24. Assets with restricted ownerships or right to use in Note VII.
- ② In accordance with Interpretation No. 17 of Accounting Standards for Business Enterprises, the Company reclassified long-term payables that were past due and non-current liabilities that were previously reported as due within one year. The loan agreement stipulates that in the event of a loan overdue, the creditor shall require the borrower to immediately repay the full amount of the loan. Since the above debts had triggered the default clause in the contract and no extension agreement had been reached with the creditors on the balance sheet date, based on the characteristics of liquidity risk and the immediacy of repayment obligations, the Company adjusted the full amount of the book balance to the "other current liabilities" account.
- 3 Among mortgage borrowings, borrowings of RMB2,865,831,101.20 have been guaranteed by related parties.
- 4 Long-term borrowings included accrued interest of RMB2,254,042.96.

36. Lease liabilities

Item	Closing balance	Opening balance	
Lease payments payable	51,846,485.65	52,866,869.42

47. Revenue and operating costs (Cont'd)

Information related to performance obligations:

ltem	Time for fulfilment of performance obligations	Significant terms of payment	Nature of goods that the Company undertakes to transfer	Whether the person is the primary person in charge	Company's commitments expected to be refunded to customers	Types of quality assurance offered by the Company and related obligations
Machine-made paper	Domestic sales on the day of delivery to the customer; foreign sales on the day of customs clearance	Domestic sales tend to be provided on an invoice basis; foreign sales tend to be prepaid	Produces easily distinguishable	Yes	None	Guaranteed quality assurance, should there be objections to product quality within 7 days of arrival, the products can be returned and exchanged

Other explanations: The Company's performance obligations for sales of machine-made paper are generally less than one year, and the Company takes advance payments or provides credit terms depending on the customer. When the Company is the primary responsible party for a sale, it generally obtains the unconditional right to receive payment when control of the merchandise is transferred to the customer either at the time of shipment or upon delivery to the destination specified by the customer.

Information related to the transaction price allocated to residual performance obligations:

As at the end of the reporting period, the amount of revenue with signed contracts but unfulfilled or uncompleted performance obligation was RMB189,324,752.36, in which RMB189,324,752.36 was expected to be recognised in 2025.

3. Interest in joint ventures or associates

(1) Major joint ventures and associates

Name of joint venture and associate	Principle place of business	Place of	Nature of business	Sharehold Direct	ing (%)	method for investment in joint ventures or associates
INAME OF JOHN VEHILURE AND ASSOCIATE	Of busiless	incorporation	Dusiness	Direct	munect	associates
Shouguang Jintou Industrial Investment Partnership (Limited Partnership)	Shouguang	Shouguang	Investment		49.57	Equity method
Guangdong Nanyue Bank Co., Ltd.	Guangdong	Guangdong	Bank		4.46	Equity method

Explanation on shareholding in joint venture or associate differs from corresponding proportion of voting rights:

The basis for holding less than 20% of the voting power but having significant influence, or the basis for holding 20% or more of the voting power but not having significant influence:

The Company holds 4.46% equity interest in Guangdong Nanyue Bank Co., Ltd. but is the second largest shareholder and is able to exercise significant influence over Guangdong Nanyue Bank Co., Ltd. by appointing one director to the board of directors (out of a total of nine directors on the board of directors).

XII. Risk relating to financial instruments

Main financial instruments of the Company include monetary funds, bills receivable, accounts receivable, accounts receivables, non-current assets due within one year, other current assets, financial assets held for trading, other non-current financial assets, long-term receivables, bills payable, accounts payable, other payables, short-term borrowings, financial liabilities held for trading, non-current liabilities due within one year, long-term borrowings, lease liabilities and long-term payables. Details of financial instruments refer to related notes. The risks associated with these financial instruments and the risk management policies adopted by the Company to mitigate these risks are described below. The management of the Company manages and monitors these exposures to ensure that the above risks are controlled in a limited extent.

1. Various risks from financial instruments

The Company aims to seek the appropriate balance between the risks and benefits in order to mitigate the adverse effects on the Company's financial performance from financial risk. Based on such risk management objectives, the Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and devise corresponding internal control procedures, and to monitor risks faced by the Company. Such risk management policies and internal control systems are reviewed regularly to adapt to changes in market conditions and the Company's activities. The internal audit department of the Company undertakes both regular and ad-hoc reviews of risk management controls and procedures.

Risks associated with the financial instrument of the Company mainly include credit risk, liquidity risk, market risk (including exchange rate risk, interest rate risk and commodity price risk).

The board of directors is responsible to plan and establish the Company's risk management structure, make risk management policies and related guidelines, and supervise the implementation of risk management. The Company has already made risk management risks to identify and analyse risks that the Company face. These policies mentioned specific risks, covering market, credit risk and liquidity risk etc. The Company regularly assesses market environment and the operation of the Company changes to determine if to make alteration to risk management policy and systems. The Company's risk management is implemented by Risk Management Committee according to the approval of the board of directors. The Risk Management Committee works closely with other business department of the Company to identify, evaluating and avoiding certain risks. The Company's internal audit department will audit the risk management control and procedures regularly and report the result to audit committee of the Company.

The Company spreads risks through diverse investment and business lines, and through making risk management policy to reduce risks of single industry, specific area and counterparty.

(1) Credit risk

Credit risk refers to risk associated with the default of contract obligation of a transaction counterparty resulting in financial losses to the Company.

The Company manages credit risk based category. Credit risks mainly arose from bank deposit, bills receivable, accounts receivable, other receivables and long-term receivables etc.

The Company's bank deposit mainly deposits in state-owned banks and other large and medium-sized listed banks. The Company anticipated that the bank deposit does not have significant credit risk.

XII. Risk relating to financial instruments (Cont'd)

1. Various risks from financial instruments (Cont'd)

(1) Credit risk (Cont'd)

For accounts receivables, other receivables and long-term receivables, the Company set related policies to control exposure of credit risks. The Company evaluates client's credit quality and set related credit period based on the client's financial status, credit records and other factors such as current market situation etc. The Company keeps monitor the client's credit record and for client with deteriorate credit records, the Company will ensure the credit risk is under control in whole by means of written notice of payment collection, shorten or cancel credit period.

The Company's debtor spread over different industry and area. The Company continued to assess the credit evaluation to receivables and purchase credit guarantee insurance if necessary.

The biggest credit risk exposure of the Company is the carrying amount of each financial asset in the balance sheet. The Company did not provide financial guarantee which resulted in credit risks.

The amount of top 5 accounts receivable of the Company accounted for 45.60% (2024: 39.64%) of the Company's total accounts receivables. The amount of top 5 other receivable of the Company accounted for 64.89% (2024: 66.28%) of the Company's total other receivables.

(2) Liquidity risk

Liquidity risk refers to the risks that the Company will not be able to meet its obligations associated with its financial liabilities that are settled by delivering cash or other financial assets.

To manage the liquidity risk, the Company monitors and maintains a level of cash and cash equivalents to finance the Company's operations and mitigate the effects of fluctuations in cash flows. The management of the Company monitors the usage of bank borrowings and ensures compliance with the borrowing agreements. In the meantime, we obtain commitments from major financial institutions to provide sufficient standby funds to meet short-term and long-term funding needs.

Operating cash of the Company was generated from capital and bank and other borrowings. As at 30 June 2025, the Company's unused bank loan credit was RMB0.00 million (31 December 2024: RMB11,176.9188 million, which has been completely frozen and cannot be used). The closing balance of financial assets of the Company due within one year amounted to RMB12,188.7747 million, while the closing balance of financial liabilities due within one year amounted to RMB38,621.2220 million. The financial assets due within one year was less than that of financial liabilities.

XII. Risk relating to financial instruments (Cont'd)

- 1. Various risks from financial instruments (Cont'd)
 - (2) Liquidity risk (Cont'd)

As at the end of the period, the financial assets, financial liabilities and off balance sheet guarantee held by the Company are analysed by their maturity date as below at their remaining undiscounted contractual cash flows (in RMB'0,000):

01------

The financial liabilities disclosed above are based on cash flows that are not discounted and may differ from the carrying amount of the line items of the balance sheet.

Maximum guarantee amount for signed guarantee contracts does not represent the amount to be paid.

XII. Risk relating to financial instruments (Cont'd)

1. Various risks from financial instruments (Cont'd)

(3) Market risk

Market risk for financial instrument refers to the risk that the fair value or future cash flow of a financial instrument will be fluctuated due to the changes in market price, and includes interest rate risk, exchange rate risk and other price risk.

Interest rate risk

Interest rate risk refers to the risk that the fair value or future cash flow of a financial instrument will be fluctuated due to the floating rate. Interest rate risk arises from recognised interest-bearing financial instrument and unrecognised financial instrument (e.g. loan commitments).

The Company's interest rate risk arises from long-term interest-bearing liabilities including long-term borrowing and bonds payable. Financial liabilities issued at floating rate expose the Company to cash flow interest rate risk. Financial liabilities issued at fixed rate expose the Company to fair value interest rate risk. The Company determines the relative proportions of its fixed rate and floating rate contracts depending on the prevailing market conditions and to maintain an appropriate combination of financial instruments at fixed rate and floating rate through regular reviews and monitors.

The Company closely monitors the interest rate position of the Company. The Company did not enter into any interest rate hedging arrangements. However, the management is responsible to monitor the risks of interest rate and consider to hedge significant interest risk if necessary. Increase in interest rates will increase the cost of new borrowing and the interest expenses with respect to the Company's outstanding floating rate interest-bearing borrowings, and therefore could have a material adverse effect on the Company's financial result. The management will make adjustments with reference to the latest market conditions. These adjustments may include enter into interest swap agreement to mitigate its exposure to the interest rate risk.

Interest bearing financial instrument held by the Company are as follows (in RMB'0,000):

Item	Amount for	Amount for
Item	the period	the prior period
Financial instrument with fixed interest rate		
Financial liabilities		
Including: Short-term borrowings	2,326,171.69	2,675,234.73
Long-term borrowings	369,967.26	476,188.52
Long-term borrowings due within one year	205,873.05	120,435.06
Total	2,902,012.00	3,271,858.31
Financial instrument with float interest rate		
Financial assets		
Including: Monetary funds	93,598.99	587,932.77
Total	93,598.99	587,932.77

XII. Risk relating to financial instruments (Cont'd)

- 1. Various risks from financial instruments (Cont'd)
 - (3) Market risk (Cont'd)

Interest rate risk (Cont'd)

The financial instruments held by the Company at the reporting date expose the Company to fair value interest rate risk. This sensitivity analysis as above has been determined assuming that the change in interest rates had occurred at the reporting date and arisen from the recalculation of the above financial instrument issued at new interest rates. The non-derivative tools issued at floating interest rate held by the Company at the reporting date expose the Company to cash flow interest rate risk. The effect to the net profit and shareholder's equity illustrated in the sensitivity analysis as above is arisen from the effect to the annual estimate amount of interest expenses or revenue at the floating interest rate. The analysis is performed on the same basis for prior year.

Exchange rate risk

Exchange risk refers to the risk that the fair value or future cash flows of a financial instrument will be fluctuated due to the changes in foreign currency rates. Foreign currency risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

The principal business of the Company is situated within the PRC and is denominated in RMB. However, foreign exchange risks still exist for the assets and liabilities in foreign currencies and future foreign currency transactions as recognised by the Company (assets and liabilities in foreign currencies and foreign currency transactions are mainly denominated in US dollar, Euro, Hong Kong dollar and Japanese yen).

The following table details the financial assets and liabilities held by the Company which denominated in foreign currencies and amounted to RMB as at 30 June 2025 are as follows (in RMB'0,000):

	Liabilities denominate	ed in foreign currency	Assets denominated in foreign currency		
		Balance as at the		Balance as at the	
Item	Closing balance	end of the prior year	Closing balance	end of the prior year	
USD	58,597.43	66,705.08	7,419.38	42,042.69	
EUR	3,468.36	3,838.45	817.06	1,044.24	
HKD			2.33	143.97	
JPY	1.04		727.81	677.92	
SGD				2.12	
GBP			1.75	1.61	
£ / 2 2 3 3 3 3					
Total	62,066.83	70,543.53	8,968.33	43,912.55	

The Company continuously monitors the size of the Group's foreign currency transactions and foreign currency assets and liabilities to minimise the foreign exchange risks it faces, and for this reason the Company may aim to avoid foreign exchange risk by signing forward foreign exchange contracts or currency swap contracts.

XII. Risk relating to financial instruments (Cont'd)

- 1. Various risks from financial instruments (Cont'd)
 - (3) Market risk (Cont'd)

Exchange rate risk (Cont'd)

With other variables unchanged, the after-tax effect of the possible reasonable changes in the exchange rate of foreign currency to RMB on the current profit and loss of the Company is as follows (in RMB'0,000):

Increase (decrease) in after-tax profits	Amount for the period		Amount for the prior period	
Increase in exchange rate of USD	5%	-2,558.90	5%	1,096.52
Decrease in exchange rate of USD	-5%	2,558.90	-5%	-1,096.52
Increase in exchange rate of Euro	5%	-132.57	5%	-137.52
Decrease in exchange rate of Euro	-5%	132.57	-5%	137.52

Other price risks

Other price risks refer to the risk of fluctuations caused by changes in market prices other than exchange rate risks and interest rate risks, whether arising from factors related to a single financial instrument or its issuer, or from factors related to all similar financial instruments traded on the market. Other price risks can stem from changes in commodity prices, stock market indexes, equity instrument prices, and other risk variables.

Listed equity instrument investments held by the Company classified as financial assets held for trading, other non-current financial assets and other equity instrument investments are measured at fair value on the balance sheet date. Therefore, the Company is subject to the risk of changes in the securities market.

The Company monitors closely the impact of price changes on the price risk of the Company's investment in equity securities. Currently, the Company has not taken any measures to avoid other price risks. However, the management is responsible for monitoring other price risks, and will consider holding multiple equity securities portfolios to reduce the price risk of equity securities investment when necessary.

With other variables unchanged, the after-tax effect of the change of -1.52% (prior year: -15.33%) in equity securities investment prices on the Company's current profit and loss and other comprehensive income is as follows (unit: RMB'0,000):

	AND THE RESERVE AND THE PERSON NAMED IN COLUMN TWO IS NOT THE PERSON NAMED IN COLUMN TO THE PERS	decrease) in ax profits	Increase (decrease) in other comprehensive income		
Item	Balance for the period	Balance for the prior period	Balance for the period	Balance for the prior period	
Due to the rise in the price of equity securities investment					
Due to the decline in the price of equity securities investment	-56.69	-709.69			

XII. Risk relating to financial instruments (Cont'd)

2. Capital management

The objective of the Company's capital risk management is to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Company may adjust its financing methods, adjust the number of dividends paid to shareholders, return capital to shareholders, issue new shares and other equity instruments or disposes assets to reduce its liabilities.

The Company monitors capital on the basis of the gearing ratio. This ratio is calculated as net liabilities divided by total capital. As at 30 June 2025, the Company's gearing ratio is 85.93% (31 December 2024: 79.79%).

The ultimate controller of the Company is Shouguang State-owned Assets Supervision and Administration Office.

Other description: During the reporting period, Shandong Shouguang Jinxin Investment Development Holdings Group Limited, the controlling Shareholder of Chenming Holdings, transferred its 45.2151% equity interests in Chenming Holdings to Shouguang Shengming Investment Co., Ltd., a wholly-owned subsidiary of Shouguang State-owned Assets Supervision and Administration Office, at nil consideration. Upon such change, Shandong Shouguang Jinxin Investment Development Holdings Group Limited no long held any equity interest in Chenming Holdings, and Shouguang Shengming Investment Co., Ltd. held 45.2151% equity interests in Chenming Holdings. There is no change in controlling shareholder and beneficial controller of the Company.

2. Subsidiaries of the Company

For details of the Company's subsidiaries, please refer to Note X. 1.

3. Joint ventures and associates of the Company

For details of material joint ventures and associates of the Company, please refer to Note X. 3.

Balance of related party transaction between the Company and its joint ventures or associates during the period or prior periods are as follows:

Name of joint ventures or associates	Relation		
Weifang Port Wood Chip Wharf Co., Ltd.	A joint venture of the Company		
Shouguang Meite Environmental Technology Co., Ltd.	A joint venture of the Company		
Weifang Xingxing United Chemical Co., Ltd.	A joint venture of the Company		
Shouguang Chenming Huisen New-style	A joint venture of the Company		
Construction Materials Co., Ltd.			
Wuhan Chenming Qianneng Electric Power Co., Ltd.	A subsidiary of an associate of the Company		
Wuhan Chenming Hanyang Paper Holdings Co., Ltd.	An associate of the Company		
Chenming (Qingdao) Asset Management Co., Ltd.	An associate of the Company		
Guangdong Nanyue Bank Co., Ltd.	An associate of the Company		
Xuchang Chenming Paper Co., Ltd.	An associate of the Company		

XIV. Related parties and related party transactions (Cont'd)

4. Other related parties

Name of other related parties	Relation
Shouguang Huixin Construction Materials Co., Ltd.	A subsidiary of a company invested by the Directors and Senior Management of the Company
Lide Technology Co., Ltd.	A subsidiary of a company invested by the Directors and Senior Management of the Company
Shouguang Chenming Guangyuan Real Property Company Limited	A subsidiary of a company invested by the Directors and Senior Management of the Company
Hu Changqing, Li Xingchun, Li Weixian, Li Feng, Han Tingde, Li Chuanxuan, Li Zhihui, Sun Jianfei, Yin Meiqun, Yang Biao, Li Kang, Pan Ailing, Zhang Hong, Qiu Lanju, Sang Ailing, Li Zhenzhong, Li Mingtang, Ge Guangming, Dong Lianming, Yuan Xikun and Zhu Hanliang	Key management personnel of the Company

5. Related party transactions

(1) Purchase and sales of goods and rendering and receiving services

Table on purchase of goods/receiving of services

Unit: RMB

Related party	Subject matter of the related party transactions	Amount for the period	Transaction facility approved	Whether the transaction facility is exceeded	Amount for the prior period

XVII.Other Material Matters

1. Debt restructuring

The Company will take the initiative to communicate with its creditors for extension of loan terms and reduction of interest rates, so as to alleviating the pressure on loan repayment in the short term. Provincial debt committees were established to agree on no loan cancellations or delays and further negotiate new credit facilities in the form of a syndicated loan specifically for resumption of operation and production, and interest rate reductions and extensions of debts to ensure sufficient liquidity for operations and production resumption of the Company.

2. Segment information

(1) Basis for determination and accounting policies

According to the Company's internal organisational structure, management requirements and internal reporting system, the Company's operating business is divided into 4 reporting segments. These report segments are determined based on the financial information required by the company's daily internal management. The management of the Group regularly evaluates the operating results of these reporting segments to determine the allocation of resources to them and evaluate their performance.

The Company's reporting segments include:

- (1) Machine paper segment, which is responsible for production and sales of machine paper;
- (2) Financial services segment, which provides financial services;
- (3) Hotels and property rentals segment, which is responsible for hotel services and property rental;
- (4) Other segments, which is responsible for the above segments otherwise.

The transfer prices of the transfer transactions between the Company's segments are based on market prices.

Segment report information is disclosed in accordance with the accounting policies and measurement standards adopted by each segment when reporting to management. These accounting policies and measurement basis are consistent with the accounting policies and measurement basis used in preparing the financial statements.

XVII.Other Material Matters (Cont'd)

3. Others

(1) In the case of the equity financing business dispute between Chenming Holdings (Hong Kong) Limited (hereinafter referred to as "Chenming Holdings (Hong Kong)"),a wholly-owned subsidiary of Chenming Holdings Company Limited (hereinafter referred to as "Chenming Holdings"), and three overseas institutions (hereinafter referred to as "Lenders") over the Company's 210.72 million B shares (representing 7.16% of the total share capital of the Company) and 153.41 million H shares (representing 5.22% of the total share capital of the Company), Chenming Holdings (Hong Kong) had appointed counsel to take litigation and arbitration measures in the courts of the relevant jurisdictions.

On 28 June 2024, Chenming Holdings (Hong Kong) filed a complaint with the New York Court of the United States. On 29 October 2024, the New York Court of the United States held a pre-trial conference and ordered that the plaintiffs and the defendant must complete two rounds of cross-examinations before 28 February 2025.

On 22 November 2024, Chenming Holdings (Hong Kong) filed an amended complaint with the US court; and on 15 February 2025, it filed a reply to the defendant's defence, pending further instructions from the court on subsequent procedures.

As of the date of this announcement, Chenming Holdings is actively safeguarding its legitimate rights and interests via legal means

There is a risk that the shares involved may not be returned, which may result in a decrease in the percentage of shareholding of Chenming Holdings in the Company, but will have no impact on the status of Chenming Holdings as the largest shareholder and will have no impact on the control of the Company.

(2) On 14 June 2022, the Hong Kong Court of Final Appeal handed down its judgment in the case of H-share liquidation filed by ArjowigginsHKK2Limited ("HKK2 Company") in relation to the Company's Joint Venture dispute and the Company has paid the relevant amount of compensation.

On 25 October 2022, the Company instructed its legal adviser in Hong Kong to apply to the Court of First Instance to seek the dismissal or adjournment of the winding-up petition filed by HKK2 against the Company On 25 July 2023, the Court of First Instance held a hearing on the said application.

On 10 August 2023, the Company received a judgment from the judge of the Court of First Instance, Mr. Justice Harris, which ruled that the winding-up petition be stayed, given that the Company's arbitration petition filed in the Hong Kong International Arbitration Centre in June 2022 against the Joint Venture Contracts formed the basis of the Company's cross claim against HKK2 in the winding-up proceedings. The relevant arbitration hearing was heard at the Hong Kong International Arbitration Centre in May 2024. At present, the parties have reached a settlement, and the case has been concluded.

Information related to performance obligations:

	Time for fulfilment of	Significant	Nature of goods that the Company	Whether the person	Company's commitments expected to be	Types of quality assurance offered by the
	performance	terms	undertakes	is the primary	refunded to	Company and
Item	obligations	of payment	to transfer	person in charge	customers	related obligations
Machine-made paper	Domestic sales on the day of delivery to the customer; foreign sales on the day of customs clearance	Domestic sales tend to be provided on an invoice basis; foreign sales tend to be prepaid	Produces easily distinguishable	Yes	No	Guaranteed quality assurance, should there be objections to product quality within 7 days of arrival, the products can be returned and exchanged

Other explanations: The Company's performance obligations for sales of machine-made paper are generally less than one year, and the Company takes advance payments or provides credit terms depending on the customer. When the Company is the primary responsible party for a sale, it generally obtains the unconditional right to receive payment when control of the merchandise is transferred to the customer either at the time of shipment or upon delivery to the destination specified by the customer.

Information related to the transaction price allocated to residual performance obligations:

At the end of the reporting period, the amount of revenue with signed contracts but unfulfilled or uncompleted performance obligation was RMB708,458,794.41, in which RMB708,458,794.41 was expected to be recognised in 2025.
