### I. INDUSTRY OVERVIEW

#### China's Power Market:

In the first half of 2025, China's economy maintained an overall positive trajectory, with accelerated development of its modern industrial system and stronger leadership from technological innovation. The ongoing optimization and upgrading of economic structures have placed higher demands on the quality and efficiency of energy and power supply. However, persistent geopolitical tensions, the rise of trade protectionism, and other factors continued to pose uncertainties, potentially impacting global energy supply-demand dynamics and price volatility.

During the first half of 2025, China intensified its efforts to deliver on the "dual-carbon" objectives, accelerating the transition towards green and low-carbon energy solutions. The sector witnessed continuous technological advancements, increasingly robust market competition, and sustained breakthroughs in renewable energy capacity installation.

#### 1. Strengthen power supply reliability and accelerate energy structure optimization

China has maintained its position as the global leader in both total installed capacity and annual electricity output, with continuous improvements in power supply reliability. From January to June 2025, the national newly installed capacity for wind and photovoltaic power reached 51.4 GW and 211.6 GW, respectively, representing a year-on-year increase of 98.9% and 106.5%. The sustained high-speed expansion of newly installed capacity demonstrated the continued positive fundamentals of industrial development. By the end of June 2025, the national total installed power generation capacity reached approximately 3,648 GW, with clean energy accounting for approximately 60% of the total installed capacity. Among them, the sum of wind power and photovoltaic power exceeded 1,600 GW, comprising 573 GW of wind power and 1,100 GW of photovoltaic power.

### 一. 行業概覽

#### 中國電力市場：

2025年上半年，中國經濟總體保持向好態勢，現代化產業體系建設加速，科技創新引領作用增強，經濟結構優化升級對能源、電力供給的質效提出更高要求。同時，地緣政治緊張、貿易保護主義抬頭等因素持續構成不確定性風險，對全球能源供需格局與價格波動帶來潛在影響。

2025年上半年，國家聚焦落實「雙碳」目標任務，加快推進能源綠色低碳轉型，行業技術不斷進步，市場競爭更加充分，新能源裝機規模持續取得突破。

#### 1. 電力供應保障能力顯著增強，能源結構加速優化

中國發電裝機總量與年發電量長期穩居世界首位，電力供應保障能力持續提升。2025年1至6月，全國風電、光伏新增裝機分別為51.4吉瓦、211.6吉瓦，同比增長98.9%、106.5%，新增裝機保持高速增長態勢，行業發展基本面持續向好。截至2025年6月底，全國發電裝機總容量達到約3,648吉瓦，清潔能源裝機佔比約60%。其中，風電和光伏發電之和突破1,600吉瓦，包括風電573吉瓦、光伏1,100吉瓦。

### 2. Deepen power market reform while embracing opportunities and challenges in high-quality renewable energy development

In February 2025, the NDRC and the NEA jointly issued the "Notice on Deepening Market-Oriented Reform of New Energy Feed-in Tariffs to Promote High-Quality Development of New Energy" (《關於深化新能源上網電價市場化改革 促進新能源高質量發展的通知》). The document stipulates that: (1) new energy projects shall in principle feed all their electricity generation into the power market, with tariffs determined through market transactions; (2) spot market price limits be appropriately relaxed, where the upper limit shall take into account factors such as current peak tariffs for industrial and commercial users in respective regions, while the lower limit shall account for alternative revenues available to new energy outside the power market; (3) a mechanism for price differential settlement shall be established outside the market. The electricity tariff level, electricity volume scale, implementation period, and other aspects of new energy incorporated into this mechanism shall be clearly defined by the provincial-level price regulatory authorities in conjunction with the provincial-level energy regulatory authorities, electricity operation regulatory authorities, and other relevant departments; (4) for legacy new energy projects commissioned before 1 June 2025, the electricity volume scale shall be properly aligned by each region with the existing guaranteed policies related to electricity volume. Within the designated scale, new energy projects may independently determine the proportion of electricity subject to the execution mechanism each year, but it must not exceed the level of the previous year. The mechanism electricity tariff shall follow current pricing policies and must not exceed the local benchmark price for coal-fired power. For solar thermal power projects and offshore wind power projects that have undergone competitive allocation, the current local policies shall apply; (5) for new energy incremental projects commissioned from 1 June 2025: the annual scale of electricity volume newly incorporated into the mechanism shall be determined by each region based on factors such as the fulfillment status of the annual non-hydro renewable energy consumption obligation assigned by the state, and the end-user affordability. For those exceeding renewable consumption targets, the subsequent year's electricity volume incorporated into the mechanism may be appropriately reduced; for those failing to meet targets, the same shall be correspondingly increased; (6) unreasonable cost allocation to new energy projects and mandatory energy storage requirements as preconditions for project approval, grid connection or access to the grid shall be prohibited.

### 2. 電力市場改革深入推進，新能源高質量發展機遇與挑戰並存

### 5. Accelerate the construction of a new electric power system, encourage the integrated development of new energy, and launch pilot projects for multiple important business models

In April 2025, ten ministries including the Ministry of Transport, the NDRC, and the NEA jointly issued the "Guidelines on Promoting Integrated Development of Transportation and Energy" (《關於推動交通運輸與能源融合發展的指導意見》). Such guidelines outline 25 key tasks across 8 aspects, including transportation infrastructure, transport equipment, fuel supply, industrial development and elements safeguarding, which are expected to accelerate the integration of transportation and energy. The guidelines propose that by 2027, the proportion of electricity in terminal energy consumption in the transportation sector should reach 10%. The installed capacity of non-fossil energy power generation along transportation infrastructure should not be less than 5 GW, with the proportion of local and on-site digestion and consumption steadily increasing. By 2035, the transportation and new energy systems will be fully integrated and interactive, with the proportion of electricity in the transportation industry's terminal energy consumption remaining at a high level, and green electricity developed through transportation infrastructure will be primarily digested and consumed locally and on-site. The guidelines clarify that, firstly, to promote the integrated planning and design of transportation and energy infrastructure, and promote the shared use of resources such as channels, ducts and towers between transportation and energy infrastructure. Secondly, to innovate the development and management models for clean energy development in transportation infrastructure. Synchronized development and investment promotion of transportation and clean energy infrastructure will be encouraged. For clean energy development projects undertaken by the same investment entity based on the same transportation infrastructure, approval (filing) procedures may be carried out in a unified manner in accordance with the law. Thirdly, integrated construction of transportation and energy infrastructure will be promoted. Clean energy development and utilization in infrastructure such as railways, highways, ports and waterways, as well as hub and terminals will be fully advanced. Fourthly, to promote the efficient and stable operation of transportation and energy infrastructure. Encourage transportation infrastructures to develop local digestion and consumption of new energy within road areas, optimize the allocation of flexible adjustment resources such as new energy storage and flexible hydrogen production, and accelerate the demonstration and application of technologies, equipment, and new models such as flexible integration and connection of new energy, smart microgrids, multi-source conversion and multi-energy complementarity, vehicle-grid interaction and virtual power plants. Fifthly, to promote new energy and clean energy transportation equipment. Accelerate the promotion of new energy vehicles. Support the application of photovoltaic power generation technology in inland waterway vessels and actively promote the use of clean energy sources such as electricity, liquefied natural gas (LNG), biodiesel, green methanol, green ammonia, and green hydrogen in vessels.

In June 2025, the NEA issued the “Notice on Organising the First Batch of Pilot Projects for the Construction of a New Power System” (《關於組織開展新型電力系統建設第一批試點工作的通知》), which includes single-direction pilots and multi-direction comprehensive pilots. Single-direction pilots will be carried out through typical projects, while multi-direction comprehensive pilots will be conducted in selected model cities. With a focus on key breakthroughs, the initial phase will concentrate on seven areas including grid-forming technology, system-friendly renewable energy power stations, smart microgrids, computing-power-electricity coordination, virtual power plants, large-scale high-proportion renewable energy transmission, and next-generation coal-fired power generation.

In June 2025, the NEA issued the “Notice on Organising Hydrogen Energy Pilot Projects in the Energy Sector” (《關於組織開展能源領域氫能試點工作的通知》), which includes project-based and regional pilot programs, totaling 11 pilot directions with specific targets, primarily including: (1) the direction of large-scale hydrogen production and integrated development. The proportion of electricity from complementary renewable energy projects connected to the grid shall not exceed 20%, and in principle, no system regulation resources shall be occupied. The installed capacity of hydrogen electrolysis cells shall not be less than 100 MW (or gasification capacity not less than 20,000 standard cubic meters per hour), and the load regulation capacity of electrolysis cells shall not be less than 50%-100%; (2) the direction of large-scale, long-distance transportation. Single-unit liquefaction capacity of liquid hydrogen plants shall not be less than 5 tons per day; single-vehicle transportation capacity shall not be less than 600 kilograms; pipeline length shall not be less than 100 kilometers; (3) the direction of green replacement of refining and coal-to-oil and gas processes. The scale of hydrogen production from renewable energy shall not be less than 1,000 tons per year; (4) the direction of hydrogen-ammonia fuel power supply. Gas turbine projects shall have a scale of no less than 10 MW, with a hydrogen/ammonia blending ratio of no less than 15%; coal-fired boiler projects shall have a scale of no less than 300 MW, with a hydrogen/ammonia blending ratio of no less than 10%; (5) long-term and efficient hydrogen energy storage direction. The power generation capacity of hydrogen energy storage projects shall not be less than 1 MW, with a continuous power generation duration of no less than 4 hours at full capacity; (6) comprehensive application in the energy sector. The installed capacity of fuel cells in relevant projects shall not be less than 0.5 MW.

### Korea's Power Market:

As the Korea's power market is undergoing a transformation of energy structure, it is expected that there would be an increase in the use of renewable energy and more natural gas power plants in the future. As the operation of new power plants would intensify the competition in the power market, the profitability of Korean gas-fired power generation companies might be hindered. However, gas-fired power plants can respond quickly to the intermittency of power generation of renewable energy. Therefore, as renewable energy develops, the importance of gas-fired power plants also increases. Also, the hydrogen power generation bidding market has been opened in Korea, and gas-fired power plants can participate in this market through the conversion of co-firing with hydrogen to increase the revenue sources as well.

2025年6月，國家能源局發佈《關於組織開展新型電力系統建設第一批試點工作的通知》，包括單一方向試點與多方向綜合試點。依託典型項目開展單一方向試點，依託典型城市開展多方向綜合試點。堅持重點突破，先期圍繞構網型技術、系統友好型新能源電站、智能微電網、算力與電力協同、虛擬電廠、大規模高比例新能源外送、新一代煤電等七個方向開展試點工作。

2025年6月，國家能源局發佈《關於組織開展能源領域氫能試點工作的通知》，包括項目試點與區域試點，共11個試點方向並明確具體指標，主要包括：(1)規模化制氫及一體化方向。配套可再生能源項目上網電量比例不超過20%，原則上不佔用系統調節資源，制氫電解槽裝機規模不低於100兆瓦（或氣化產能不低於20,000標方／時），電解槽運行負荷調節能力不低於50%-100%水平。(2)規模化、長距離輸送方向。液氫工廠單套設備液化能力不低於5噸／天；單車運輸能力不低於600千克；管道長度不少於100公里。(3)煉油及煤製油氣綠色替代方向。可再生能源製氫替代規模不低於1,000噸／年。(4)氫氨燃料供電供能方向。燃機類項目規模不低於10兆瓦，摻氫／摻氨比例不低於15%；燃煤鍋爐類項目規模不低於300兆瓦，摻氫／摻氨比例不低於10%。(5)氫儲能長時長效運行方向。氫儲能項目發電側容量不低於1兆瓦，滿功率連續發電時長不低於4小時。(6)能源領域綜合應用。相關項目燃料電池裝機不低於0.5兆瓦。

### 韓國電力市場：

韓國電力市場方面，其正在進行能源結構轉型，預計未來可再生能源以及天然氣發電站會增加。隨著新發電廠的投產使電力市場競爭加劇，韓國燃氣發電企業的盈利能力可能會受到影響。然而，燃氣電廠對於可再生能源發電的間歇性響應迅速，因此，隨著可再生能源發展，燃氣電廠的重要性亦隨之增加。此外，韓國已開放氫能發電招標市場，通過氫氣共燒轉換，燃氣發電廠亦可參與該市場，增加收入來源。

### Korea Projects

The decrease in profit for the period from US\$53.5 million to US\$23.6 million was mainly attributable to the decrease in tariff and decrease in power generation mainly because of the maintenance and decrease in the load of power grid dispatch for Korea gas-fired projects, as well as the decrease in compensation income from fuel cell project.

### PRC Coal-fired, Cogen and Gas-fired Projects

The increase in profit for the period from US\$11.0 million to US\$34.2 million was mainly attributable to the gain on disposal of a PRC cogen project amounted to US\$23.8 million.

### PRC Wind Projects

The power generation from PRC wind projects slightly increased during the period, while the tariff slightly decreased due to keen market competition. The profit for the period remained stable at US\$146.0 million.

### PRC Solar Projects

Starting from the second half of 2024, the Group's newly commissioned attributable installed capacity amounted to 898.0 MW. Given the tariff of the solar projects decreased due to keen market competition and the solar projects located in Qinghai province have suffered from power curtailment due to maintenance by the power grid company as well as one-off disposal loss of property, plant and equipment of US\$3.3 million due to technical upgrades, the profit for the period dropped by US\$13.0 million to US\$11.6 million.

### 韓國項目

期內溢利由53.5百萬美元減少至23.6百萬美元，主要歸因於電價下跌和韓國燃氣項目進行維修及電網調度負荷減少而導致發電量下降，以及燃料電池項目補償收入減少。

### 中國燃煤、熱電聯產及燃氣項目

期內溢利由11.0百萬美元增加至34.2百萬美元，主要歸因於出售一個中國熱電聯產項目所得收益23.8百萬美元。

### 中國風電項目

期內，中國風電項目的發電量輕微上升，電價在激烈的市場競爭下輕微下跌。期內溢利維持於146.0百萬美元的穩定水平。

### 中國太陽能項目

自2024年下半年起，本集團新增的權益裝機容量為898.0兆瓦。由於市場競爭激烈導致太陽能項目電價下跌，以及位於青海省太陽能項目因電網公司進行維修而遭受限電影響，並因技術改造產生物業、廠房及設備的一次性報廢損失3.3百萬美元，期內溢利下跌13.0百萬美元至11.6百萬美元。

|----------------------------------|-------------|
| PRC Wind Projects                | 中國風電項目      |
| PRC Solar Projects               | 中國太陽能項目     |
| PRC Cogen and Gas-fired Projects | 中國熱電聯產及燃氣項目 |
| PRC Hydro Projects               | 中國水電項目      |
| Korea Projects                   | 韓國項目        |
| <b>Total</b>                     | <b>總計</b>   |

In 2025, the Company has always adhered to the reliable power supply as the key objective, continuously strengthened work safety management, and comprehensively guaranteed power supply reliability through improving the quality of equipment with lean operation and maintenance and firmly building a cybersecurity prevention system, laying a solid foundation for achieving the Company's annual power generation targets and providing robust support for stable electricity provision. For the six months ended 30 June 2025, the electricity generated by the Group's consolidated power generation projects amounted to 9,575.5 GWh, representing a decrease of 0.9% from 9,660.4 GWh for the six months ended 30 June 2024, remaining basically flat from the same period of last year.

The power generation from PRC wind projects during the reporting period reached 5,506.7 GWh, representing a year-on-year increase of 4.1%, which was mainly due to a year-on-year improvement in grid curtailment in the areas where some of the Group's project were located and the increase in the equipment utilization rate.

The power generation from PRC solar projects during the reporting period reached 1,154.5 GWh, representing a year-on-year increase of 11.5%, which was mainly due to a year-on-year increase in the capacity of solar energy projects.

The power generation from PRC cogen and gas-fired projects during the reporting period reached 78.9 GWh, representing a year-on-year decrease of 56.3%, which was mainly due to the completion of the transfer of equity interests in the Group's cogen project in Jiangsu Province in the first half of 2025, coupled with reduced dispatch capacity and spring maintenance shutdowns at the Group's gas-fired project in Hubei Province, which collectively contributed to the lower power generation in the first half of 2025.

The power generation from PRC hydro projects during the reporting period reached 84.0 GWh, representing a year-on-year decrease of 28.4%, mainly due to a decrease in water inflow in the first half of 2025 compared to the same period of last year.

2025年，本公司始終堅持以電力可靠供應為重點目標，持續強化安全生產管理，以精益化運維實現設備質量穩步提升，築牢網信安全預防體系等方式為主要手段，全面保障電力可靠供應，為完成公司年度發電量目標打下堅實基礎，為電力穩定供應提供堅強保障。截至2025年6月30日止六個月，本集團綜合發電項目的發電量達9,575.5吉瓦時，較截至2024年6月30日止六個月的9,660.4吉瓦時減少0.9%，與去年同期基本持平。

報告期內中國風電項目發電量為5,506.7吉瓦時，同比增加4.1%，主要由於本集團部分項目所在區域的限電情況同比改善，以及設備利用率的提升。

報告期內中國太陽能項目發電量為1,154.5吉瓦時，同比增加11.5%，主要由於太陽能項目容量同比增加。

報告期內中國熱電聯產及燃氣項目發電量為78.9吉瓦時，同比減少56.3%，主要由於本集團於2025年上半年已完成轉讓江蘇省熱電聯產項目的公司股權，且本集團位於湖北省的燃氣項目受2025年上半年調度容量減少及停機進行春季檢修影響，導致2025年上半年發電量同比下降。

報告期內中國水電項目發電量為84.0吉瓦時，同比減少28.4%，主要由於2025年上半年來水較去年同期減少。

The power generation from Korea projects during the reporting period reached 2,751.4 GWh, mainly from gas-fired and biomass projects, representing a decrease of 9.4% as compared with the same period in 2024, which was mainly due to the maintenance and decrease in the load of power grid dispatch in Korea gas-fired projects in the first half of 2025.

The total volume of steam sold by the Group during the reporting period amounted to 460,000 tonnes, representing a decrease of 71.0% as compared with the six months ended 30 June 2024, which was mainly due to the completion of the transfer of equity interests in the Group's cogen project in Jiangsu Province in the first half of 2025.

The following table sets out the average utilization hours applicable to the Group's power projects:

### Employees and Remuneration Policy

As at 30 June 2025, the Group had about 1,998 full-time employees, the majority of them were based in China. The Group provides its employees with salaries and bonuses, as well as employee benefits, including retirement schemes, medical and life insurance schemes.

Employees located in China are covered by the mandatory social security schemes required by relevant rules and regulations of the PRC, which are essentially defined contribution schemes. The Group is required by the PRC law to contribute a certain percentage of the average salaries of the employees to various schemes in accordance with the regulatory requirements in the locations of the entities and the Group's policies. The PRC government is directly responsible for the payment of the benefits to these employees.

In Hong Kong, the Group participates in a mandatory provident fund scheme established under the Mandatory Provident Fund Schemes Ordinance (Chapter 485 of the Laws of Hong Kong). Employees contribute 5.0% of their relevant income to the mandatory provident fund scheme subject to a cap of monthly relevant income of HK\$30,000 and the Group contributes 10.0% of each employee's monthly base salary.

In Korea, the Group is required by law to contribute 4.5% of the employees' monthly average salaries for the national pension, 3.545% for national health insurance (12.95% of the national health insurance contribution for long term care insurance), 0.9% for unemployment insurance, 0.86% (Seoul Office)/0.62% (Yulchon)/0.647% (Daesan) for the industrial accident compensation insurance and 0.06% for a wage claim guarantee fund.

## IV. RISK FACTORS AND RISK MANAGEMENT

### Risks Relating to the Industry

Our power projects are located in the PRC and Korea, both of which have undergone, and may continue to undergo, regulatory changes. Governmental regulations affect all aspects of our power project operations, including the amount and timing of electricity generation, the setting of tariffs, compliance with power grid controls, dispatch directives and environmental protection. Regulatory changes in the PRC and Korea may affect, among other things, dispatch policies, clean and renewable energy and environmental compliance policies and tariffs, and may result in a change of tariff setting procedures or mandatory installation of costly equipment and technologies to reduce environmental pollutants.

In addition, the solar power projects are highly dependent on solar illumination conditions, and the wind power projects are dependent particularly on wind conditions. Extreme wind or weather conditions could lead to downtime of the wind power projects. Solar illumination conditions and wind conditions vary across seasons and locations, and could be unpredictable and are out of our control.

## 四. 風險因素及風險管理

### 行業風險

本集團的電力項目位於中國及韓國，均已經歷且可能繼續經歷監管制度變動。政府法規影響我們電力項目營運的各個方面，包括發電量及發電時間、設定電價、電網監控合規、調度指令及環境保護。中國及韓國的監管制度變動可能影響（其中包括）調度政策、清潔及可再生能源及環境合規政策及電價，並可能導致更改設定電價程序或強制安裝昂貴設備及技術以減少環境污染物。

此外，太陽能項目高度依賴於太陽照度情況，而風電項目尤其依賴於風力情況。極端的風力或天氣情況可能導致風電項目停工。不同季節及地理位置太陽照度情況及風力情況不同，且可能無法預知及無法控制。

### Risk Relating to Fuel Cost

The non-renewable energy power projects of the Group require supplies of coal, oil and gas as fuel. Fuel costs represent a significant portion of our operating expenses and the operating expenses of our associates. The extent to which our profit is ultimately affected by the cost of fuel depends on our ability to pass through fuel costs to our customers as set out under the relevant regulatory guidelines and the terms of our power purchase agreement for a particular project, as we currently do not take any measures to hedge our exposure to fuel price fluctuations. Our fuel costs are also affected by the volume of electricity generated because the coal consumption rate of coal-fired power projects decreases when we generate more electricity as a result of economies of scale. In the PRC, government tariff regulations limit our ability to pass through changes in fuel costs. In Korea, our Yulchon I Power Project is able to pass through our exposure to fuel price fluctuations through fuel cost pass-through provisions in the tariff formula. Our Yulchon II Power Project and Daesan I Power Project receive payments based on the system marginal price (SMP), which is influenced based on gas price and the efficiency of power plants. Therefore, in general situation, SMP can cover fuel cost. In few special situations, for example, the mandatory dispatch order with high cost and low efficiency, SMP may not fully cover the power plants' fuel cost. Our Yulchon I Power Project in Korea has completed its life extension retrofit and has been converted to the same business model as the Yulchon II and Daesan I Power Projects from 1 July 2025 onwards. Korea has a system called Renewable Portfolio Standards (RPS), which helps renewable energy plants cover some of the additional power generation costs including fixed cost such as investment and operations and maintenance. Therefore, the biomass power plant, a kind of renewable energy, can respond to changes in fuel costs through SMP and revenue from Renewable Energy Green Certificate sales under RPS system. Our diversified generation portfolio enables us to diversify the risks that we would face to utilize a single resource for electricity generation. In particular, our exposure to several fuel types mitigates risks such as price increases in or the availability of any particular fuel source.

### Interest Rate Risk

We are exposed to interest rate risk resulting from fluctuations in interest rates on our debt with floating interest rates based on market prevailing rates. We undertake debt obligations to support asset acquisition and general corporate purposes including capital expenditures and working capital needs. Certain amount of our indebtedness is calculated in accordance with floating interest rate or interest rate that are subject to adjustment by our lenders. We periodically review the ratio of debt with floating interest rates to debt with fixed rates, taking into account the potential impact on our profit, interest coverage and cash flows.

### Foreign Exchange Risk

The functional currency of the Company is US dollars, and our reportable profit is affected by fluctuations in foreign currency exchange rates. We collect most of our revenue from our projects in RMB and KRW, some of which are converted into foreign currencies to (1) purchase foreign-made equipment and parts for repair and maintenance; (2) make investments in certain joint ventures or acquire interests from other companies; (3) pay out dividends to our shareholders; and (4) repay our outstanding debt. By managing and monitoring the risks of foreign currency, we ensure that appropriate measures are adopted effectively in a timely manner.

### 燃料成本風險

本集團的非再生能源電力項目需要煤、石油及天然氣供應作為燃料。燃料成本佔我們的經營開支以及聯營公司的經營開支的一大部分。由於我們目前並無對沖燃料價格波動風險的舉措，我們的利潤最終受燃料成本影響的程度視乎我們轉嫁燃料成本予客戶的能力（如相關規管指引及我們就特定項目的購電協議條款所載）。燃料成本亦受發電量影響，原因是我們因規模經濟產生更多電量時燃煤項目的煤炭消耗率下降。於中國，政府電價規定限制我們轉嫁燃料成本變動的能力。於韓國，我們的栗村一期電力項目可通過電價方案的燃料成本轉嫁條文將燃料價格波動風險轉嫁，栗村二期電力項目及大山一期電力項目按系統邊際價格收取費用，而系統邊際價格的變化是基於燃氣價格及各電廠發電效率。因此，通常情況下，系統邊際價格可以覆蓋燃料成本。僅在少數特殊情況下，如對高成本或低效率電廠的強制調度命令，會使得系統邊際價格無法完全覆蓋燃料成本。韓國栗村一期電力項目已完成延壽改造，已於2025年7月1日起轉為與栗村二期及大山一期電力項目相同的商業模式。韓國的「可再生能源投資組合標準」制度可協助可再生能源電廠支付投資、營運及維護等固定費用等部分額外發電費用。因此，生物質能發電廠作為一種可再生能源，在可再生能源投資組合標準制度下，可通過系統邊際價格及可再生能源綠證銷售收入應對燃料成本的變化。我們的多元化發電組合有助我們分散所面對使用單一發電來源的風險，特別是，我們的業務涉及多類燃料，可減低因個別燃料來源價格上漲或供應的風險。

### 利率風險

根據當前市場利率計算，我們以浮動利率計息的債務使我們面臨利率波動產生的利率風險。我們承擔債務責任以支持收購資產及一般公司用途，包括資本開支及營運資金需求。我們的一部分債務款項按浮動利率或可由貸方調整的利率計息。我們定期檢討浮息債務與定息債務之比率，並考慮到對溢利、利息覆蓋及現金流的潛在影響。

### 匯率風險

本公司的功能貨幣為美元，而我們的可呈報利潤受外幣匯率波動影響。我們主要以人民幣及韓元收取大部分來自我們項目的收入，其中部分兌換為外幣以（1）購買外國製造的設備及零件以用於維修及保養；（2）對若干合營公司進行投資或收購其他公司權益；（3）向我們的股東支付股息；及（4）償還未償還的債務。我們管理及監察外幣的風險，以確保及時且有效地採取適當措施。

# Review Report 審閱報告

**Review report to the board of directors of  
CGN New Energy Holdings Co., Ltd.**  
(Incorporated in Bermuda with limited liability)

## INTRODUCTION

We have reviewed the interim financial report set out on pages 45 to 72 which comprises the consolidated statement of financial position of CGN New Energy Holdings Co., Ltd. (the **"Company"**) and its subsidiaries (collectively referred to as the **"Group"**) as of 30 June 2025 and the related consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and condensed consolidated cash flow statement for the six-month period then ended and explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of an interim financial report to be in compliance with the relevant provisions thereof and International Accounting Standard 34, *Interim Financial Reporting* (**"IAS 34"**) issued by the International Accounting Standards Board. The directors are responsible for the preparation and presentation of the interim financial report in accordance with IAS 34.

Our responsibility is to express a conclusion, based on our review, on the interim financial report and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

## SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*, issued by the Hong Kong Institute of Certified Public Accountants. A review of the interim financial report consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

## CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim financial report as at 30 June 2025 is not prepared, in all material respects, in accordance with IAS 34.

## 未經審核中期財務報告附註

For the six months ended 30 June 2025 截至2025年6月30日止六個月

### 1. BASIS OF PREPARATION

This interim financial report has been prepared in accordance with International Accounting Standard ("IAS") 34, *Interim Financial Reporting* issued by the International Accounting Standards Board ("IASB") as well as with the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "**Stock Exchange**"). It was authorized for issue on 19 August 2025.

The Company is a public limited company incorporated in Bermuda and its shares are listed on the Stock Exchange.

As at 30 June 2025, the Company's ultimate and immediate holding companies are China General Nuclear Power Corporation ("**CGN**") and CGN Energy International Holdings Co., Limited ("**CGN Energy International**") respectively.

The preparation of the interim financial report in conformity with IAS 34 requires management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities, income and expenses on a year to date basis. Actual results may differ from these estimates.

The interim financial report has been prepared in accordance with the same accounting policies adopted in the 2024 annual financial statements, except for the accounting policy changes that are expected to be reflected in the 2025 annual financial statements. Details of any changes in accounting policies are set out in Note 2.

This interim financial report contains consolidated financial statements and selected explanatory notes. The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Company and its subsidiaries (collectively referred to as the "**Group**") since the 2024 annual financial statements. The consolidated interim financial statements and notes thereon do not include all of the information required for a full set of financial statements prepared in accordance with IFRS Accounting Standards.

The interim financial report is unaudited, but has been reviewed by KPMG in accordance with Hong Kong Standard on Review Engagements 2410, *Review of interim financial information performed by the independent auditor of the entity*, issued by the Hong Kong Institute of Certified Public Accountants ("**HKICPA**"). KPMG's review report to the Board of Directors is included on page 44.

The Group had net current liabilities of approximately US\$966,045,000 as at 30 June 2025. Taking into account the financial resources of the Group, the Group has unutilized general facilities of US\$1,340,782,000 as at 30 June 2025 for over the next twelve months from the end of the reporting period. In addition, the directors of the Company have reviewed the Group's cash flow projections prepared by the management of the Group. The cash flow projections cover a period not less than twelve months from the end of the reporting period.

Taking into account the above-mentioned considerations, the directors of the Company are of the opinion that the Group has sufficient working capital to meet in full its financial obligations as they fall due for at least the next twelve months from the end of the reporting period and accordingly, this interim financial report has been prepared on a going concern basis.

### 4. INCOME TAX (continued)

The Company is exempted from taxation in Bermuda.

Current tax provision represents provision for the PRC Enterprise Income Tax, Hong Kong Profits Tax and Korean Corporate Income Tax ("KCIT").

Under the Law of the People's Republic of China on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rate of PRC subsidiaries is 25% from 1 January 2008 onwards, except for those subsidiaries described below.

Certain subsidiaries of the Group in the PRC are under the Western China Development Plan and a preferential tax rate of 15% is granted for an extended period from 2021 to 2030. As a result, the tax rate of 15% is used to calculate the amount of current taxation.

Pursuant to KCIT law, the statutory income tax of the Group's Korean subsidiaries was calculated at a rate of 23.1% of the estimated assessable profit for the six months ended 30 June 2025 and 2024.

Pursuant to Hong Kong tax law, the statutory income tax was calculated at a rate of 16.5% of the estimated assessable profit for the six months ended 30 June 2025 and 2024. Pursuant to the tax laws in Republic of Malta and in Mauritius, the statutory income tax was calculated at a rate of 35% and 15%, respectively, for the six months ended 30 June 2025 and 2024. However, subsidiaries of the Group operating in these jurisdictions had not generated taxable income during both periods and therefore, no tax provision had been made by the Group in relation to these subsidiaries.

The Group's subsidiaries and associates that are tax residents in the PRC are subject to the PRC dividend withholding tax ranging from 5% to 10% for those non-PRC tax resident immediate holding companies incorporated in Hong Kong and other jurisdictions when and if undistributed earnings are declared and to be paid as dividends out of profits that arose on or after 1 January 2008.

The Group's subsidiaries that are tax residents in Korea are subject to a 10% Korean dividend withholding tax for the immediate holding company incorporated in the Republic of Malta when and if undistributed earnings are declared and to be paid to a non-Korea tax resident as dividends out of profits.

Deferred tax has not been provided for in the interim financial report in respect of the temporary differences attributable to the profit for the current period of the Group's Korean subsidiaries and certain PRC subsidiaries as the Group is able to control the timing of the reversal of the temporary differences and it is probable that the temporary differences will not be reversed in the foreseeable future.

From 1 January 2025, the Group is also liable to Pillar Two income taxes under the Hong Kong Inland Revenue (Amendment) (Minimum Tax for Multinational Enterprise Groups) Ordinance 2025 for its earnings in the Hong Kong SAR and certain other jurisdictions where a domestic minimum top-up tax has not been implemented, including the Mainland China.

### 4. 所得稅 (續)

本公司獲豁免繳納百慕達稅項。

本期稅項撥備指中國企業所得稅、香港利得稅及韓國企業所得稅（「韓國企業所得稅」）撥備。

根據中華人民共和國企業所得稅法（「企業所得稅法」）及企業所得稅法實施條例，自2008年1月1日起，中國附屬公司的稅率為25%，惟下文所述的附屬公司除外。

本集團在中國經營的若干附屬公司從屬西部大開發計劃，可享受15%之優惠稅率由2021年延長至2030年。因此，計算本期稅項時採用15%之稅率。

根據韓國企業所得稅法，截至2025年及2024年6月30日止六個月，本集團之韓國附屬公司的法定所得稅乃按估計應課稅溢利的23.1%計算。

根據香港稅法，截至2025年及2024年6月30日止六個月之法定所得稅乃按估計應課稅溢利的16.5%計算。根據馬耳他共和國及毛里求斯的稅法，截至2025年及2024年6月30日止六個月的法定所得稅分別按35%及15%的稅率計算。然而，本集團在該等司法權區經營之附屬公司於該兩個期間並無產生應課稅收入，故本集團並無就該等附屬公司作出稅項撥備。

倘宣佈將於2008年1月1日或之後產生的溢利當中的未分派溢利作為股息派付予在香港及其他司法權區註冊成立的該等非中國稅務居民直接控股公司，作為中國稅務居民的本集團的附屬公司及聯營公司須繳納5%至10%不等的中國股息預扣稅。

倘宣佈將溢利中的未分派溢利作為股息派付予在馬耳他共和國註冊成立的非韓國稅收居民直接控股公司，作為韓國稅務居民的本集團附屬公司須繳納10%的韓國股息預扣稅。

由於本集團能控制撥回暫時差額的時間，且暫時差額於可預見將來可能不會撥回，因此並無於本中期財務報告內就本集團韓國及若干中國附屬公司本期間溢利應佔的暫時差額作出遞延稅項撥備。

根據香港《2025年稅務（修訂）（跨國企業集團的最低稅）條例》規定，自2025年1月1日起，本集團須就其在香港特別行政區及尚未實施本地最低補足稅的若干其他司法管轄區（包括中國內地）的盈利繳納支柱二所得稅。

### 6. EARNINGS PER SHARE

The calculation of the basic and diluted earnings per share attributable to ordinary equity shareholders of the Company is based on the following data.

|   |                                     |
|---|-------------------------------------|
| Earnings:   | 盈利：                                 |

| Number of shares:  | 股份數目：               |
| Number of ordinary shares for the purposes of calculating basic and diluted earnings per share | 用於計算每股基本及攤薄盈利的普通股數目 |

There were no dilutive potential ordinary shares during the six months ended 30 June 2025 and 2024, and therefore, diluted earnings per share are the same as basic earnings per share.

### 6. 每股盈利

### 7. PROPERTY, PLANT AND EQUIPMENT, RIGHT-OF-USE ASSETS AND GOODWILL

For the six months ended 30 June 2025, the Group acquired plant and equipment with aggregated cost of US\$387,136,000 (30 June 2024: US\$369,326,000).

For the six months ended 30 June 2025, the Group disposed of certain plant and equipment with aggregated carrying amount of US\$3,962,000 (30 June 2024: US\$1,830,000) for cash proceeds of US\$636,000 (30 June 2024: US\$1,705,000), resulting in a loss on disposal of US\$3,326,000 (30 June 2024: US\$125,000).

During the current interim period, the Group entered into the new lease agreements for the use of land and buildings, residential units and other premises for 2 to 20 years (30 June 2024: 1 to 26 years). On lease commencement, the Group recognized right-of-use assets of US\$33,347,000 (30 June 2024: US\$19,056,000) and lease liabilities of US\$22,198,000 (30 June 2024: US\$11,035,000).

During the current interim period, an impairment loss of US\$4,368,000 (30 June 2024: US\$2,456,000) was recorded in "Other gains and losses" in relation to a solar energy subsidiary, CGN Solar Energy (Dachaidan) Development Co., Ltd (中廣核太陽能(大柴旦)開發有限公司), due to a decrease in electricity generation volume adopted in the projected cash flow. Consequently, carrying amount of this cash-generating unit has been reduced to its recoverable amount of US\$23,269,000 (30 June 2024: US\$28,215,000) and any adverse change in the assumptions used in the calculation of recoverable amount would result in further impairment losses.

### 8. TRADE RECEIVABLES

Trade receivables

Less: allowance for credit losses

貿易應收賬款  
– 客戶合約  
減：信貸虧損撥備

### 7. 物業、廠房及設備、使用權資產及商譽

截至2025年6月30日止六個月，本集團收購總成本387,136,000美元（2024年6月30日：369,326,000美元）之廠房及設備。

截至2025年6月30日止六個月，本集團出售賬面總值3,962,000美元（2024年6月30日：1,830,000美元）之若干廠房及設備，現金所得款項為636,000美元（2024年6月30日：1,705,000美元），導致出售虧損3,326,000美元（2024年6月30日：125,000美元）。

於本中期間，本集團就土地及樓宇、住宅單位及其他物業的使用權訂立新租賃協議，為期2至20年（2024年6月30日：1至26年）。於租賃開始時，本集團確認33,347,000美元（2024年6月30日：19,056,000美元）的使用權資產及22,198,000美元（2024年6月30日：11,035,000美元）的租賃負債。

於本中期間，由於預計現金流中採納的發電量減少，本集團就一間太陽能附屬公司中廣核太陽能（大柴旦）開發有限公司於「其他收益及虧損」項下錄得減值虧損4,368,000美元（2024年6月30日：2,456,000美元）。因此，該現金產生單位的賬面值已減至其可收回金額23,269,000美元（2024年6月30日：28,215,000美元），而用於計算可收回金額的假設出現任何不利變動均將導致進一步減值虧損。

### 8. TRADE RECEIVABLES (continued)

The following is an aging analysis of trade receivables net of allowance for credit losses presented based on the invoice date at the end of the reporting period, which approximated the revenue recognition dates.

|               |         |

| 61 – 90 days  | 61至90日  |
| 91 – 180 days | 91至180日 |
| Over 180 days | 180日以上  |

As at 30 June 2025, the Group's trade receivables balances included receivables with aggregate carrying amount of US\$104,283,000 (31 December 2024: US\$137,145,000) from the sales of electricity and other services, which are due within 20 to 90 days from the date of billing.

As at 30 June 2025, the Group's trade receivables balances included receivables with aggregate carrying amount of US\$882,714,000 (31 December 2024: US\$749,493,000) from the tariff income receivables. These receivables are tariff income receivables from relevant government authorities pursuant to Cai Jian [2020] No.5 Notice on the Measures for Administration of Subsidy Funds for Tariff of Renewable Energy. The collection of tariff income receivables is subject to settlement by state grid companies upon finalization of the allocation of funds by relevant PRC government authorities to the state grid companies. As a result, the tariff income receivables are not considered as overdue or in default.

The Group measures loss allowance for trade receivables and contract assets at an amount equal to lifetime ECLs, which is measured as the present value of all expected cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive).

The Group does not hold any collateral over the trade receivables balances.

### 8. 貿易應收賬款 (續)

本集團按相等於全期預期信貸虧損的金額計量貿易應收賬款及合同資產的虧損撥備，預期信貸虧損乃按所有預期現金短缺(即根據合同應付本集團的現金流量與本集團預期收到的現金流量之間的差額)的現值計量。

本集團並無就貿易應收賬款結餘持有任何抵押品。

### 17. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS

#### (a) Financial assets and liabilities measured at fair value

In estimating the fair value of an asset or a liability, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group will engage an independent valuer to perform the valuation and to determine the appropriate valuation techniques and inputs to the model. The findings of the valuation would be reported to the board of directors of the Company to explain the cause of fluctuations in the fair value of the assets and liabilities regularly. Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities is disclosed below.

#### Fair value measurements for financial instruments measured at fair value on a recurring basis

Some of the Group's financial assets are measured at fair value at the end of the reporting period. The following table gives information about how the fair values of these instruments are determined:

#### Financial assets 金融資產

Financial assets designated at fair value through other comprehensive income  
指定為以公允價值計量且變動計入其他全面收益的金融資產

Derivative financial instruments  
– Forward exchange contracts  
衍生金融工具  
– 遠期外匯合同

### 17. 金融工具的公允價值計量

#### (a) 按公允價值計量的金融資產及負債

於估計資產或負債的公允價值時，本集團在其可獲得的範圍內使用市場可觀察數據。倘未能獲得第一級輸入數據，本集團將委聘獨立估值師進行估值，並釐定適當的估值方法及模型的輸入數據。有關估值結果會定期向本公司董事會匯報，以闡釋資產及負債公允價值波動的原因。有關釐定多項資產及負債公允價值所用的估值方法及輸入數據的資料於下文披露。

#### 按經常性基準的公允價值計量的金融工具的公允價值計量

本集團的部分金融資產按報告期末的公允價值計量。下表載列有關如何釐定該等工具公允價值的資料：

|  | Fair value as at<br>於以下日期的公允價值   |  | Fair value<br>hierarchy<br>公允價值層級 |

### 17. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS (continued)

#### (a) Financial assets and liabilities measured at fair value (continued)

##### Fair value hierarchy

IFRS 13, *Fair value measurement* categorizes fair value measurements into a three-level hierarchy. The level into which fair value measurement is classified is determined with reference to the observability and significance of the inputs used in the valuation technique as follows:

- Level 1 valuations: Fair value measured using only Level 1 inputs i.e. unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date
- Level 2 valuations: Fair value measured using Level 2 inputs i.e. observable inputs which fail to meet Level 1, and not using significant unobservable inputs. Unobservable inputs are inputs for which market data are not available
- Level 3 valuations: Fair value measured using significant unobservable inputs

The fair value of financial assets designated at fair value through other comprehensive income in Level 3 is determined by using the adjusted net assets method of the financial assets.

#### (b) Financial assets and liabilities carried at amortized cost

The directors of the Company consider that the carrying amounts of financial assets and financial liabilities carried at amortized cost approximate their fair values.

### 18. CAPITAL COMMITMENTS

Capital commitments as at 30 June 2025 and 31 December 2024 not provided for in the financial statements were as follows:

|                                   |         |
|-----------------------------------|---------|
| Contracted for                    | 已訂約     |
| Authorized but not contracted for | 已授權但未訂約 |

### 17. 金融工具的公允價值計量 (續)

#### (a) 按公允價值計量的金融資產及負債 (續)

##### 公允價值層級

國際財務報告準則第13號，*公允價值計量*將公允價值計量之架構分為三個等級。公允價值計量劃分的層級乃參考估值技術所使用輸入數據的可觀察性及重要性釐定如下：

- 第一級估值：公允價值僅使用第一級輸入數據，即相同資產或負債於計量日期在活躍市場的未經調整報價
- 第二級估值：公允價值使用第二級輸入數據計量，即不符合第一級的可觀察輸入數據且並無使用重大不可觀察輸入數據。不可觀察輸入數據為於市場數據不可用的輸入數據
- 第三級估值：使用重大不可觀察輸入數據計量的公允價值

屬於第三級的指定按公允價值計量且變動計入其他全面收益的金融資產之公允價值乃使用金融資產的經調整資產淨值法釐定。

#### (b) 按攤銷成本列賬之金融資產及負債

本公司董事認為，按攤銷成本列賬之金融資產及金融負債之賬面值與彼等之公允價值相若。

### 18. 資本承擔

於2025年6月30日及2024年12月31日，尚未在財務報表計提撥備的資本承擔如下：
