# MESSAGE FROM THE BOARD

## 董事會的話

The Board of Directors (the “Board”) of Lam Soon (Hong Kong) Limited (the “Company” or “Lam Soon”, together with its subsidiaries the “Group”) is pleased to present our Environmental, Social and Governance (“ESG”) Report of the Group for the financial year ended 30 June 2025.

While the intensified climate events over the past years have caused disruptions to the ecosystem, it has also served as a catalyst for change, prompting the reassessment of impacts of climate change and spurring actions across the world. In light of this, and as the regulatory landscape continues to evolve, we firmly believe in our duty to contribute to the collective efforts of our country and region, including the pursuit of the “30-60 dual carbon goals” and “Hong Kong’s Climate Action Plan 2050” to strive for a net-zero future. The Group remains committed to our contribution towards decarbonisation.

This year, we took a major step forward by establishing a comprehensive suite of realistic and attainable 2029/30 targets. We conducted a bottom-up analysis and engaging directly with business units to understand their unique challenges and opportunities to ensure that each target is grounded in operational reality. Central to this progress is the introduction of our first-ever social targets, marking a significant expansion beyond our environmental commitments. These social targets focus specifically on employee development and well-being, as well as product quality control. To ensure these ambitions translate into tangible results, we have tailored internal targets for each business units, and we will continue to systematically monitor, track, and report on our business units’ various targets and performance, while the Board reviews and assesses the Group’s ESG programmes and progress on a regular basis.

Additionally, we have conducted scenario analysis to identify potential climate risks, evaluating their impact on our operations, which has enabled us to develop robust strategies to enhance resilience.

In 2025, in line with the enhanced requirements on climate-related disclosures promulgated by HKEX, we have diligently sought to acquaint ourselves with the new disclosure requirements and International Financial Reporting Standards, setting plans and timetable to prepare for eventual climate reporting in accordance with the Hong Kong Financial Reporting Standards Sustainability Disclosure Standards, which is to be fully adopted by 2028. This would guide us on our journey in navigating the risks and capitalise on opportunities that arise from the intricacies of climate change dynamics.

We would like to thank our staff, partners, customers and other stakeholders who share our vision, and we value their comments and contributions on our ESG journey. Going forward, we remain steadfast in our commitment to creating positive impacts to society and pursuing our social and environmental targets, as we embark upon the transformative voyage towards enhanced sustainability.

南順(香港)有限公司(「本公司」或「南順」，連同其附屬公司統稱「本集團」)董事會(「董事會」)欣然提呈本集團截至二零二五年六月三十日止財政年度的環境、社會及管治(「環境、社會及管治」)報告。

儘管過去幾年氣候事件加劇對生態系統造成的影響，惟亦成為推動改變的催化劑，促使全球重新評估氣候變遷的影響並採取行動。有鑒於此，且隨著監管環境的不斷發展，我們堅信我們有責任為國家及地區的共同努力作出貢獻，包括追隨「30-60雙碳目標」及「香港氣候行動藍圖2050」，努力實現淨零排放未來。本集團繼續致力於為脫碳作出貢獻。

今年，我們邁出重要一步，制定一系列全面及切實可行的二零二九／三零年目標。我們進行從下而上的分析，直接與業務部門溝通，了解彼等所面對的獨特挑戰及機遇，以確保各目標都以實際營運為基礎。該進展的重點是我們首次引入社會目標，標誌著我們在環境承諾方面之外的重大拓展。該等社會目標著重僱員發展及福祉，以及產品質素控制。為確保該等目標轉化為實際成果，我們制定切合各業務部門的內部目標，並將持續有系統地監察、追蹤和報告各業務部門的各個目標及績效，同時董事會將定期檢討及評估本集團的環境、社會及管治計劃及進度。

此外，我們已進行情境分析，以識別潛在氣候風險，評估其對我們營運的影響，令我們可制定穩健的策略以加強抵禦能力。

於二零二五年，為配合港交所頒佈的氣候相關披露的進一步要求，我們努力熟悉新的披露要求及國際財務報告準則，並根據最終將於二零二八年全面實施的香港財務報告準則可持續披露準則制定計劃及時間表，為氣候報告作好準備。此舉將引領我們在複雜的氣候變化動態中應對風險並把握機遇。

我們僅此感謝與我們有共同願景的員工、合作夥伴、客戶及其他持份者，我們重視彼等對我們環境、社會及管治方面的意見及貢獻。展望未來，我們將堅定不移地致力於為社會創造正面影響，並實現我們的社會及環境目標，踏上提高可持續發展的改革之旅。

### Sustainability Management *(continued)*

#### Sustainability Governance *(continued)*

The Group established a process to track progress of targets and KPI performance during the Reporting Period, and the results will be presented to the BARMC and the Board regularly to facilitate their oversight of the ESG progress and issues.

The Group also incorporates ESG and major climate-related risks into its Enterprise Risk Management (“ERM”) Framework, where the process for controls and risk management have been embedded into its daily operations and decision-making processes. The BARMC regularly reviews the Group’s risk registers and risk profile reports, including the major climate-related risks in the ERM Framework. Under the Group’s ERM Framework, a structured approach was employed on an ongoing basis to identify, assess, treat, monitor and report on the key risks affecting the sustainability of the Group’s business. During the Reporting Period, we have identified, assessed, and prioritised physical risk and transition risk as our climate-related risks within our ERM Framework, with actions to manage these risks within the Group’s overall risk appetite to enhance business resilience. Also, we have conducted a scenario analysis to evaluate the potential impacts of material climate risks across short-, medium- and long-term, to provide us with insight to prioritise and tailor our mitigation strategies in the next step.

### Materiality and Stakeholder Engagement *(continued)*

#### Materiality Analysis

The Group previously conducted a comprehensive stakeholder engagement which involved over 100 stakeholders via surveys to collect their feedback and recommendation on our ESG performance in various topics, in which we asked stakeholders to rank the relative importance of each sustainability issue to the Group on a scale of 1 to 5 (with “1” being not important at all and “5” being very important). Based on the industry trend and benchmarks, we identified a total of 17 sustainability issues (as shown in table below). During the Reporting Period, we have reviewed the material topics.

A materiality matrix was developed from the results of the stakeholder engagement exercise conducted with internal and external stakeholders through an online survey. ESG Issues for disclosure in this Report were identified by considering the relevance of each ESG Issue to the operations and stakeholders of the Group.

Upon analysing the survey results and adjusted by peers’ materiality, 12 issues were identified within the “Priority” area, while the remaining 5 issues were identified within the “Significant” and “Moderate” areas of the materiality matrix. Among all issues, “product quality and safety”, “business ethics and compliance” and “climate change mitigation and adaptation” were the top three material sustainability issues. The results in the materiality analysis were reviewed and endorsed by the Board.

### 重要性及持份者參與 *(續)*

#### 重要性分析

本集團較早前曾全面進行持份者參與活動，通過問卷調查接觸超過100名持份者，以收集其對我們在各議題下的環境、社會及管治表現的反饋和建議。我們要求持份者以1至5分制（1分代表完全不重要，5分代表極為重要）評定各項可持續議題對本集團的相對重要性。基於行業趨勢及基準，我們共識別出17項可持續議題（詳見下表）。於報告期內，我們對重大議題進行了審閱。

根據通過在線調查與內部及外部持份者進行的持份者參與活動的結果，我們已制定重要性矩陣。通過考慮各環境、社會及管治議題與本集團運營及持份者的相關性，我們確定了本報告中需要披露的環境、社會及管治議題。

對調查結果進行分析並根據同行的重要性進行調整後，12個議題被確定屬於重要性矩陣中的「優先」領域，而其餘5個議題則被確定屬於「重要」及「中等」領域。在所有議題中，「產品質量與安全」、「商業道德及合規」及「氣候變化緩解及適應」為三大重要可持續性議題。重要性分析的結果已獲董事會審閱及認可。

### Climate Change Mitigation and Adaptation

Climate change is a significant threat to the sustainability of businesses and communities worldwide. To lessen the impact of potential climate-related risks, we have established our Climate Risk Management Policy. The policy outlines our commitment to mitigate the negative impacts of climate change via mitigation, adaptation, monitoring and reporting. Guidance set forth in the Task Force on Climate-related Financial Disclosures was incorporated to strengthen our process in assessing relating climate-related risks and opportunities, enhancing our evaluation and disclosure. We will continue to fortify our climate risk management practices to drive business sustainability and positive environmental impact.

#### Governance

The Board, with support from the BARMC, holds ultimate accountability for the Group's ESG strategy, encompassing the identification and management of climate-related risks and opportunities. The BARMC conducts regular review of the Climate Risk Management Policy to support Lam Soon's evolving climate approach. Climate change risk is being actively monitored within the Group's ERM Framework while the business units and departments of the Group are responsible for establishing and implementing relevant risk management actions to mitigate climate risks to an acceptable level. The monitoring and oversight of the execution and performance outcome are undertaken by the ESG Task Force. Regular updates on climate change matters, new disclosure requirements, emission targets progress, and action plans are provided at the Board meetings held every quarterly. To equip the Directors' ESG knowledge and awareness, ESG-focused training is organised from time to time. During the Reporting Period, a dedicated climate-related training session was arranged to provide latest update on the climate change disclosure standards and requirements, as well as the future plan to address the relevant requirements.

Please refer to the section of "Sustainability Governance Structure at Lam Soon" in this ESG Report for more information.

## Climate Change Mitigation and Adaptation *(continued)*

### Strategy *(continued)*

#### Mitigation and Adaptation

The International Organisation for Standardisation ("ISO") 14001 Environmental Management System has been adopted across most of the Group's operation sites. The system, with its effective and timely emergency mechanism, is in place in case of severe environmental incidents. It also keeps track of the Group's energy efficiency and emission reduction targets.

To enhance our emergency response capability on extreme climate event, we have formulated a Flood Prevention Contingency Plan. The Plan specifies the role and responsibility of each personnel when flooding is expected. It helps minimise any casualties and economic loss due to natural disaster.

Since 2013, the Group has appointed qualified third-party institutions to verify its GHG emission, as part of the commitment to the PRC Government's Emission Trading Scheme. In particular, the flour mill in Shekou is audited annually to ensure that their GHG emission quantification and reporting meet the requirements set out in the Specification with Guidance for Quantification and Reporting of the Organisation's GHG Emissions (SZDB/Z 69-2018).

Electricity consumption, which accounted for over 96% of the Group's total GHG emission, remains the largest source of GHG emissions of the Group during the Reporting Period. To demonstrate its determination to lower the overall energy consumption, the Group has phased out certain old equipment, upgraded lighting system and participated in the clean energy initiative of CLP Power Hong Kong Limited ("CLP") to optimise energy efficiency, aiming to reduce electricity consumption and align with the practices in the regions where it operates. For further information, please refer to the "Carbon Emissions and Energy Efficiency" section.

### 策略 *(續)*

#### 緩解及適應

本集團的大部分營運地點均採用國際標準化組織("ISO")14001環境管理體系。該體系乃我們於發生嚴重環境事故時的有效及適時的應急機制，並能夠掌握本集團的能源效益及減排目標動向。

為提高應對極端氣候事件的應急能力，我們已制定防汛應急預案。該預案明確預計發生洪水時每名人員的職責，有助最大限度減少任何自然災害造成的傷亡及經濟損失。

自二零一三年起，本集團已委聘合資格第三方機構核查溫室氣體排放以響應中國政府的排放交易計劃。尤其是蛇口麵粉廠每年接受審核以確保其溫室氣體排放的量化及報告符合《組織的溫室氣體排放量化和報告規範及指南》(SZDB/Z 69-2018)。

電力消耗佔本集團溫室氣體總排放量的96%以上，仍是本集團於報告期間最大的溫室氣體排放源。為展示降低總體能耗的決心，本集團已淘汰若干舊設備、升級照明系統並參加了中華電力有限公司("中電")優化能源效率的清潔能源計劃，旨在減少電力消耗，並與其經營所在地區的慣常做法保持一致。有關進一步資料，請參閱「碳排放及能源效益」章節。

#### Risk Management

We engaged an independent consultant to identify material sustainability issues via stakeholder survey and materiality assessments. "Climate change mitigation and adaptation" was evaluated as one of the most material topics to the Group.

The Group has incorporated major climate-related risks into its ERM Framework, embedding the process for controls and risk management into daily operations and decision-making processes. The BARMC regularly reviews the major climate-related risks in the ERM Framework.

As a next step, the Group will rank the climate-related risks and opportunities to facilitate efficient allocation of resources and to prioritise our actions to develop preparedness and implement adaptation and mitigation initiatives effectively.

#### Metrics and Target

We annually disclose our energy and GHG performance, providing transparent information about our fuel consumption and Scope 1, 2 and 3 GHG emissions. To effectively monitor and manage climate-related risks and opportunities, during the Reporting Period, we have set new electricity and GHG emission reduction targets with target year of 2029/30. For details of our Scope 1, 2 and 3 emissions, targets and progress, please refer to the "Carbon Emissions and Energy Efficiency" section in this ESG Report.

#### 風險管理

我們已委聘一名獨立顧問，透過持份者調查及重要性評估以識別重大可持續性議題。「緩解及適應氣候變化」被評估為本集團最重大的議題之一。

本集團已將重大氣候相關風險納入企業風險管理框架，將控制及風險管理流程嵌入日常營運及決策流程中。審核及風險管理委員會定期審閱框架中的重大氣候相關風險。

下一步，本集團將對氣候相關風險及機遇進行排序，以促進高效的資源配置，並優先採取行動以建立準備，有效實施適應及緩解措施。

#### 指標及目標

我們每年披露我們的能源及溫室氣體表現，為我們的燃油消耗以及範疇1、2及3溫室氣體排放提供具有透明度的資料。為有效監察及管理氣候相關風險及機遇，於報告期內我們已設定新的電力及溫室氣體減排目標，目標年份為二零二九／二零三零年。有關我們的範疇1、2及3排放、目標及進度，請參閱本環境、社會及管治報告中「碳排放及能源效益」章節。

# PILLAR 1: "TOWARDS A GREENER FUTURE"

## 支柱一：「邁向更環保未來」

### Carbon Emissions and Energy Efficiency

#### Driving Operational Efficiency and Decarbonisation

The Group has been implementing various initiatives and policies persistently to increase energy efficiency and reduce GHG emissions. The edible oil plant in Shekou has established the Energy Resource Management Procedure to enhance the management of the power system, ensuring a reliable supply of electricity for production and office facilities. Additionally, this procedure encourages a safe and rational use of energy while considering the environmental impact. The specialty fats plant has implemented the Energy Resource Management Control Programme to enhance energy and resources management and encourage conservation while reducing waste. Electricity Management Regulation for the home care product plant is also in place to raise the awareness among employees regarding their electricity consumption to ensure efficient utilisation.

During the Reporting Period, the Group's business operations resulted in GHG emissions of 36,249.85 tonnes of carbon dioxide equivalent ("tCO<sub>2</sub>e"), mainly carbon dioxide, methane, nitrous oxide and hydro fluorocarbons. The overall intensity of the GHG emissions for the Group was 0.05 tCO<sub>2</sub>e/tonne of production volume. The major sources of GHG emissions for the Group came from production activities, canteen operations and motor vehicles. The GHG reported arose from the following activities and scopes:

- Direct (Scope 1) GHG emissions from the combustion of various fuels in stationary and mobile sources, and release of refrigerants;
- Energy Indirect (Scope 2) GHG emissions from purchased electricity; and
- Other Indirect (Scope 3) GHG emissions from business air travel, freshwater and sewage processing, and paper waste disposal at landfills.

### 碳排放及能源效益

#### 促進營運效率和脫碳

本集團一直堅持實施各項舉措及政策，以提高能源效率並減少溫室氣體排放。食用油廠已建立《能源綜合利用控制程序》，以提升電力系統管理，確保生產及辦公設施的供電可靠性。此外，該程序鼓勵安全合理使用能源，同時考慮對環境的影響。特種油脂廠已實施《能源資源管理控制程序》，以提升能源及資源管理，並鼓勵節約資源，同時減少浪費。家居護理用品廠亦設有《用電管理規定》，以提高員工的用電意識，確保有效利用能源。

於報告期間，本集團的業務營運導致溫室氣體排放量為36,249.85噸二氧化碳當量（「噸二氧化碳當量」），主要為二氧化碳、甲烷、氧化亞氮和氫氟碳化物。本集團的溫室氣體排放整體強度為每噸產量0.05噸二氧化碳當量。本集團的溫室氣體排放主要來自其生產活動、食堂營運和流動車輛。所報告之溫室氣體乃來自以下活動及範疇：

- 固定及流動來源中各種燃料的燃燒以及製冷劑的釋放導致的直接（範疇1）溫室氣體排放；
- 購電產生的間接能源（範疇2）溫室氣體排放；及
- 來自本集團商務差旅、淡水及廢水處理以及在堆填區處置的廢紙所產生的其他間接（範疇3）溫室氣體排放。

To reduce Scope 1 GHG emissions, refrigerants with lower Global Warming Potential were chosen. The Group has planned to replace three chillers in Lam Soon Building in Hong Kong, substituting the use of R22 refrigerant with R134a refrigerant. The first chiller replacement was completed in June 2024 and partially funded by the CLP Eco Building Fund. The first replacement has saved approximately 95,000 kWh of energy in 2024/25 compared to that before the replacement in 2023/24. The second replacement is scheduled for completion in 2026/27. For Scope 2 GHG emissions, the electricity consumed by the Group for the Reporting Period was 56,994,178.93 Kilowatt-hour ("kWh") against 58,562,116.00 kWh last year. Overall energy intensity was 80.00 kWh/per tonne of production volume. Types of energy consumed included electricity, natural gas, liquefied petroleum gas ("LPG"), petrol and diesel.

為減少範疇1溫室氣體排放，本集團選擇全球暖化潛勢單位較低的製冷劑。本集團已計劃更換香港南順大廈內三台冷水機組，以R134a製冷劑取代R22製冷劑。首台冷水機組更換工程已於二零二四年六月完成，部分經費由中電環保建築基金資助。與二零二三／二四年更換前的用電量相比，二零二四／二五年首台冷水機組更換工程節省了約95,000千瓦時的能源。第二次更換預計於二零二六／二七年完成。就範疇2溫室氣體排放而言，本集團於報告期間的耗電量為56,994,178.93千瓦時（「千瓦時」），而去年為58,562,116.00千瓦時。整體能源強度為每噸產量80.00千瓦時。能源消耗種類包括電力、天然氣、液化石油氣、汽油及柴油。

To support the use of clean energy, the Group has an internal guideline on the purchase of hybrid electric vehicles aiming at further reducing fuel consumption and GHG emission. In addition, the Group took part in the Renewable Energy Feed-in Tariff Scheme of CLP by installing 542 pieces of 220-kW solar photovoltaic ("PV") module on the rooftop of Lam Soon Building in Hong Kong. The solar PV system commenced operation in November 2019 and supplied electricity to CLP's power grid. In Mainland China, a 0.7 MW solar PV system was installed in the flour mill in Jintan. At the flour mill in Shekou, a groundbreaking solar power project is in progress, set to deliver a generation capacity of 400 kW and an average annual generation of 400,000 kWh. These projects aim to provide sufficient electricity supply to avoid operation disruption during peak demand in electricity and also achieve carbon reduction across the operation processes. Our flour mill in Yixing plans to establish solar PV system for the warehouse in 2026/2027.

為支持清潔能源的使用，本集團設有混合動力汽車採購內部指引，旨在進一步減少燃料消耗及溫室氣體排放。另外，本集團參加中電的「可再生能源上網電價計劃」，在香港南順大廈的屋頂安裝了542塊220千瓦的太陽能光伏（「太陽能光伏」）組件。太陽能光伏於二零一九年十一月開始運作，向中電電網供應電力。於中國大陸，本集團在金壇麵粉廠安裝0.7兆瓦的太陽能光伏系統。蛇口麵粉廠正在建造一項開創性的太陽能發電項目，預計發電量為400千瓦，年均發電量為40萬千瓦時。這些項目旨在提供充足的電力供應，避免在用電高峰期影響生產，並在整個生產過程中實現碳減排。我們位於宜興的麵粉廠計劃於二零二六／二七年為倉庫安裝太陽能光伏系統。

<sup>3</sup> Significant increase in natural gas consumption was due to an increase in production volume.

<sup>4</sup> Significant decrease in petrol consumption was due to the sale of company vehicle fleet.

<sup>5</sup> Significant decrease in refrigerants was due to our refrigeration system's low loss design, which consumes refrigerant only during repair and maintenance activities. Since no such activities were conducted this year, consumption was minimised.

##### *Greenhouse gas emissions and energy consumption data of all business operations (continued)*

We tracked our GHG emission and energy consumption reduction progress against targets to reduce electricity-led carbon intensity (Scope 2) by 8% and electricity consumption intensity by 7% by 2024/25 from a 2018/19 baseline. We had challenges meeting the aforesaid targets primarily for the reason that the baseline was set during an abnormal period under the impact of the COVID-19 pandemic and lower production. Also, the implementation of upgraded production processes to enhance product quality increased electricity and carbon intensity.

To address this, during the Reporting Period, we have set new targets tailored to each of our business divisions<sup>9</sup>, reinforcing our commitment to reducing GHG emissions and electricity consumption. To ensure the new targets are both realistic and attainable, food division and home care product division targets are based on the stable operational data of the base year 2023/24 and 2024/25<sup>10</sup> respectively, combined with projections of future production and consumption taking into account the key ESG action plans to be undertaken.

我們就降低溫室氣體排放與能源消耗兩項目標追蹤進度，以實現二零二四／二五年將電力主導的碳強度(範圍2)和電力消耗強度較二零一八／一九年的基準線水平降低8%和7%。我們就達成上述目標遇上挑戰，主要由於該基準線設定於受新冠疫情影響的異常時期，生產亦有所減少。此外，為提升產品品質而實施的生產工藝升級，亦增加用電強度與碳強度。

為此，在報告期內，我們針對各業務分部<sup>9</sup>制定新目標，加強我們對降低溫室氣體排放量與電力消耗的承諾。為確保新目標切實可行，食品分部及家居護理分部的目標分別基於二零二三／二四及二零二四／二五<sup>10</sup>基準年的穩定營運數據，並融入未來生產量和消耗量的預測，同時把將要實施的關鍵環境、社會及管治行動計劃納入考量。

<sup>9</sup> The 2029/30 GHG emission and electricity consumption intensity targets of the food division cover five flour mills in Shekou, Yixing, Jintan, Qionglai and Qingzhou, the specialty fats plant in Jintan in the PRC, and the edible oil plant in Shekou in the PRC and Hong Kong. The 2029/30 GHG emission and electricity intensity targets for the home care product division cover the home care product plant in Guangzhou in the PRC.

<sup>10</sup> The 2024/25 base year for the home care product division reflects fundamental operational changes in production model taken place since 2024/25 to handle production of increased product categories with a higher frequency of line changeovers and increase in production shifts.

<sup>9</sup> 食品分部二零二九／三零年的溫室氣體排放及用電強度目標涵蓋位於蛇口、宜興、金壇、邛崃及青州的五家麵粉廠，位於中國金壇的特種油脂廠，以及位於中國蛇口與香港的食用油廠。家居護理用品分部二零二九／三零年的溫室氣體排放及用電強度目標涵蓋位於中國廣州的家居護理用品廠。

<sup>10</sup> 家居護理用品分部的二零二四／二五基準年反映了自二零二四／二五年以來生產模式發生的根本性運營變化，以處理更多產品類別的生產，並提高生產線轉換頻率和增加生產批次。

To drive electricity and GHG emission targets, Lam Soon has developed a comprehensive approach. Our key action plans for the coming years include:

- Replacing old motors and roots blower systems with new and energy-efficient alternatives
- Purchasing green electricity
- Discontinuing the use of natural gas
- Establishing a new solar PV system

For the home care product division, a new Conghua plant is scheduled to commence operations in 2026/27. We have developed internal projections for its electricity consumption, GHG emissions and production to establish an initial intensity benchmark. These projections will serve as a reference during the plant's initial operational phase, and we will formally consolidate the data and revise the final targets for the home care product division once actual baseline data becomes available.

Recognising the growing expectations for decarbonisation and the disclosure of Scope 3 emissions, we have taken a significant step by disclosing our Scope 3 emissions data. Moving forward, we are dedicated to enhancing the accuracy and comprehensiveness of our Scope 3 data collection process, enabling us to make informed decisions when responding to sustainability challenges in the value chain.

為了推動電力和溫室氣體減量目標，南順制定一套全面的方案。我們未來幾年的主要行動計劃包括：

- 用新型節能替代品取代舊馬達和羅茨鼓風機系統
- 購買綠色電力
- 停止使用天然氣
- 建立新的太陽能光伏系統

對於家居護理用品分部，新從化工廠計劃於二零二六／二七年投入營運。我們已對其用电量、溫室氣體排放和產量進行了內部預測，以建立初始強度基準。這些預測將在工廠營運初期作為參考，一旦獲得實際基準數據，我們將正式整合數據並修訂家居護理用品分部的最終目標。

鑑於對脫碳及範圍3排放披露的期望日益增長，我們邁出了重要一步，並公開了範圍3排放數據。未來，我們致力於提升範圍3資料收集流程的準確性和全面性，使我們能夠在應對價值鏈中的可持續發展挑戰時做出明智的決策。

#### Pollution Control

All air-borne emissions are strictly monitored by the Ministry of Environmental Protection of the PRC. All sampling results from our plants were within permissible levels stated by various emission standards, including the Determination of Toxic Substances in Workplace Air – Chloride (GB Z/T160.37-2004). The specialty fats plant also meets the requirements under the Determination of Toxic Substances in Workplace Air Part 73: Chloromethane, Dichloromethane, Chloroform and Carbon Tetrachloride Standard (GBZ/T 300.73-2017).

Specifically, the home care product plant has established the "Environmental Protection Control Procedures for New Project", which focuses on minimising pollution caused by construction and renovation activities.

The Group has made relentless efforts on air pollution reduction through various initiatives at our operational sites. The flour mills are equipped with dust collector systems for collection and removal of airborne dust generated during the flour production processes. When the air passes through the filter, the flour dust contained is captured and circulated back to the production processes. Then the filtered air is released into the atmosphere via exhaust pipes mounted on the building's walls or roof. The filters and exhaust pipes are constantly being monitored by the production team. Our operational sites have invested to upgrade all forklift trucks to electric-powered models, resulting in lower fuel consumption and reduced emission. The staff canteen uses electricity rather than LPG to reduce air pollution caused by catering service. Fume exhaust generated from canteen operations in other plants is purified by electrostatic precipitator before releasing into the atmosphere.

#### 污染管理

所有空氣傳播的排放均受到中國環保部的嚴格監控。所有由我們廠房採樣的結果均在各種排放標準規定的允許水平內，包括《工作場所空氣有毒物質測定氯化物》(GBZ/T160.37-2004)。特種油脂廠亦符合《工作場所空氣有毒物質測定第73部分：氯甲烷、二氯甲烷、三氯甲烷和四氯化碳》(GBZ/T300.73-2017)。

具體來說，家居護理用品廠已建立新政策《新項目環境保護控制程序》，重點在於將建設及裝修活動造成的環境污染降至最低。

本集團通過各種舉措和政策為減排作出了不懈努力。麵粉廠配備了集塵器系統，用於收集和清除麵粉生產過程中產生的揚塵。當含有麵粉粉塵的空氣通過過濾時，含有麵粉之粉塵會被收集，並循環至生產過程，隨後經過濾空氣通過安裝在建築物牆壁或屋頂的排氣管排放至大氣中。生產團隊不斷監測過濾器及排氣管。我們於營運地點已投資升級所有叉車為電動型號，從而降低燃料消耗及減少排放。員工食堂使用電力而非液化石油氣，以減少餐飲服務所造成的空氣污染。在其他工廠的食堂營運中產生的煙氣先用靜電除塵器淨化後方會排放至大氣中。

### Water and Effluent Management

The Group has established regulations on water management to regulate water consumption practices of employees, such as the Water Management Regulations, to ensure the effective protection and sustainable utilisation of water resources through standardising employees' practices regarding water usage.

The Group consumes water for its production and domestic activities. Water consumed by its Hong Kong operations was supplied by the Water Supplies Department in Hong Kong, whilst water consumed by its Mainland China operations was sourced from the municipal water supply system in their respective locations. There was no issue identified in sourcing water that was fit for purpose. The plants have water tanks in place to store water for emergency use. During the Reporting Period, the Group consumed 175,895.00 m<sup>3</sup> of freshwater, with a water consumption intensity of 0.23 m<sup>3</sup>/tonne of production volume, approximately 12% improvement compared to 0.24 m<sup>3</sup>/tonne of production of last year. All discharges from production and domestic activities are pre-treated on-site through regularly maintained grease traps and septic tanks. On-site wastewater treatment facilities are installed in some of our operational sites for advanced sewage treatments<sup>12</sup>. 40% of the wastewater in the home care product plant is treated and reused for flushing, cleaning and landscaping, while the majority of the pre-treated wastewater enters the sewage collection system and discharges to a nearby municipal sewage pipe network system.

The treated effluent discharged by our operational sites fulfilled the requirements of permitted discharge limits set by the Discharge Limits of Water Pollutants (DB44/26-2001). The home care product plant monitors chemical oxygen demand ("COD") in real time.

### 用水及污水管理

本集團已訂立有關用水管理的規章以規範僱員的用水習慣，例如於報告期間經修訂的《用水管理規定》，透過規範員工用水行為，確保水資源的有效保護與可持續利用。

本集團的生產及日常活動均需要用水。香港營運的用水由香港水務署供應，而中國大陸營運的用水則來自各地的市政供水系統。在取得合適水源方面並無發現問題。廠房亦建有水箱以儲存水作緊急用途。於報告期間，本集團消耗175,895.00立方米淡水，用水強度為每噸產量0.23立方米，與去年用水強度每噸產量0.24立方米相比，改善約12%。生產及日常活動中的所有排放物均通過定期維護的隔油池及化糞池進行現場預先處理。我們部分的營運場地安裝了現場廢水處理設施<sup>12</sup>，以進行污水深度處理。家居護理用品廠中40%的污水經處理後重新用作沖洗、清潔及園林綠化用途，大部分經過預先處理的污水將通過污水收集系統進入並排放至附近的市政污水管網系統。

我們的營運場地排放的經處理廢水符合《水污染物排放限值》(DB44/26-2001)中規定的允許排放限值。家居護理用品廠實時監測化學需氧量(「COD」)。

<sup>12</sup> Since the flour mills did not generate industrial wastewater, and the wastewater generated by the edible oil plant in Hong Kong was minimal, there were no on-site wastewater treatment facilities provided in these plants.

<sup>12</sup> 由於麵粉廠不產生工業廢水，並且香港食用油廠產生的廢水極少，因此該等工廠並無安裝現場廢水處理設施。

### Water and Effluent Management

(continued)

During the Reporting Period, the home care product plant engaged third-party testing organisation to measure COD twice, with results of 13 mg/L and 40 mg/L, which were all well-below than the discharge limit of 500 mg/L. The Mainland China's third-level emission standards were met. The specialty fats plant adheres to the guidelines set forth in the Wastewater Quality Standards for Discharge to Municipal Sewers (CJ343-2010), as well as other relevant national industrial pollutant discharge standards and urban domestic sewage treatment system acceptance standards. The edible oil plant in Shekou performs regular third-party wastewater testing and the sampling results of COD, pH value, total suspended solids, and oil and grease were all within the relevant permissible levels during the Reporting Period.

The Group persistently reduces water loss by maintaining and upgrading its water supply pipeline system, reducing water consumption through upgrading water-saving devices and reusing wastewater whenever possible. Some Group-level water-saving initiatives include:

- (i) Using cooling water recirculation system for cooling towers;
- (ii) Installing automatic faucets;
- (iii) Re-using purified reverse osmosis ("RO") water for toilet flushing and greening of plant areas;
- (iv) Inspecting regularly and promptly repairing leaking water pipes and faucets;
- (v) Recycling steam condensate for oil heating; and
- (vi) Installing flow-regulating toilets and water-saving toilets.

### 用水及污水管理(續)

於報告期間，家居護理用品廠委託第三方檢測機構檢測了兩次COD值，結果分別為每升13毫克及每升40毫克，遠低於排放限值每升500毫克。COD值達到中國大陸三級排放標準。特種油脂廠執行《污水排入城市下水道水質標準》(CJ343-2010)以及國家其他相關工業污染物排放標準和城鎮生活污水處理系統驗收標準。於報告期間，蛇口食用油廠定期進行第三方廢水測試，並且COD、pH值、總懸浮固體及油脂的採樣結果均於允許水平內。

本集團通過維護及升級其供水管道系統來持續減少水量損失，升級節水設備及在可行情況下再利用廢水，從而減少耗水。部分節水措施包括：

- (i) 冷卻塔使用循環冷卻水系統；
- (ii) 安裝自動感應水龍頭；
- (iii) 再使用反滲透淨化(「RO」)廢水於沖廁及廠區綠化；
- (iv) 定期檢查、及時修復漏水的水管、水龍頭；
- (v) 回收蒸汽冷凝水用於油加熱；及
- (vi) 安裝流量調節馬桶和節水馬桶。

## Water and Effluent Management

(continued)

We tracked our water-saving progress against a target to reduce water consumption intensity by 3% by 2024/25 from a 2018/19 baseline. We had challenges meeting the aforesaid target primarily due to being the composition of our water consumption usage and the baseline set during an abnormal period. Lower production volume throughout the five-year abnormal target period caused by the COVID-19 pandemic with a significant volume of water use remaining constant had directly led to a higher water consumption intensity.

To drive meaningful water conservation without disrupting operations, during the Reporting Period, we have set new water consumption intensity targets tailored to each of our business divisions<sup>13</sup>. To ensure the new targets are both realistic and attainable, food division and home care product division targets are based on the stable operational data of the base year 2023/24 and 2024/25<sup>10</sup> respectively, combined with projections of future production and consumption taking into account the key ESG action plans to be undertaken.

## 用水及污水管理(續)

我們就節約用水的目標追蹤進度，目標是把用水強度從二零一八／一九年為基準年度水平到二零二四／二五年降低3%。我們就達成以上目標遇上挑戰，主要由於我們的用水結構特性，設定基線於異常期間。新冠疫情導致該五年目標時期情況異常，生產量普遍下降，然而大部份之用水量維持固定，以至強度上升。

為推動實質節水而不影響營運，於報告期間，我們針對各業務分部<sup>13</sup>制定新的用水強度目標。為確保新目標切實可行，食品分部及家居護理用品分部的目標分別基於二零二三／二四及二零二四／二五<sup>10</sup>基準年的穩定營運數據，並融入未來生產量及消耗量的預測，同時把將要實施的關鍵環境、社會及管治行動計劃納入考量。

Base Year 基準年	Target Year 目標年份	Division 分部	Target Detail 目標細節	Base Year Performance 基準年表現
2023/24 二零二三／二四年	2029/30 二零二九／三零年	Food division 食品分部	To reduce water consumption intensity by 5% 用水強度降低5%	0.13 m <sup>3</sup> /tonne of production volume 每噸產量0.13立方米
2024/25 <sup>10</sup> 二零二四／二五年 <sup>10</sup>	2029/30 二零二九／三零年	Home care product division 家居護理用品分部	To reduce water consumption intensity by 2% 用水強度降低2%	1.47 m <sup>3</sup> /tonne of production volume 每噸產量1.47立方米

<sup>10</sup> The 2024/25 base year for the home care product division reflects fundamental operational changes in production model taken place since 2024/25 to handle production of increased product categories with a higher frequency of line changeovers and increase in production shifts.

<sup>13</sup> The 2029/30 water consumption intensity target of the food division cover five flour mills in Shekou, Yixing, Jintan, Qionglai and Qingzhou, the specialty fats plant in Jintan in the PRC, and the edible oil plant in Shekou in the PRC and Hong Kong. The target also covers our Hong Kong office, as it shares one master water meter with the Hong Kong edible oil plant located in the same building. The 2029/30 water consumption intensity target for the home care product division cover the home care product plant in Guangzhou in the PRC.

<sup>10</sup> 家居護理用品分部的二零二四／二五基準年反映了自二零二四／二五年以來生產模式發生的根本性運營變化，以處理更多產品類別的生產，並提高生產線轉換頻率和增加生產批次。

<sup>13</sup> 食品分部二零二九／三零年的用水強度目標涵蓋位於蛇口、宜興、金壇、邛崃和青州的五家麵粉廠、位於中國金壇的特種油脂廠以及位於中國蛇口和香港的食用油廠。該目標也涵蓋我們的香港辦事處，因為它與位於同一棟建築物的香港食用油廠共用一個主水錶。家居護理用品分部二零二九／三零年的用水強度目標涵蓋位於中國廣州的家居護理用品廠。

### Water and Effluent Management

(continued)

To drive the water targets, Lam Soon has developed a comprehensive approach. Our key action plans for the coming years include:

- Redesigning production plan to produce products with common fragrance ingredients to minimise the water needed for changeover cleaning
- Collaborating with HR to educate and promote behavioural change in water conservation

For the home care product division, a new Conghua plant is scheduled to commence operations in 2026/27. We have developed internal projections for its water usage and production to establish an initial intensity benchmark. These projections will serve as a reference during the new plant's initial operational phase, and we will formally consolidate the data and revise the final targets for the home care product division once actual baseline data becomes available.

### 用水及污水管理(續)

南順已制定全面策略，推動節水目標達成。未來數年的關鍵行動計劃包括：

- 重新設計生產計劃，集中生產含共通香氛成分的產品，以減少換線清潔所需用水
- 與人力資源部門協作，推動節水教育，推廣節水行為變化

對於家居護理用品分部，新的從化工廠計劃於二零二六／二七年投入營運。我們已製定了該工廠用水量和生產量的內部預測，以建立初始強度基準。這些預測將作為新工廠初期運作階段的參考。一旦獲得實際基線數據，我們將正式整合數據並修訂家居護理用品分部的最終目標。

### Waste Management

The Group has established multiple policies to facilitate waste management. Our edible oil plant has implemented the Waste Management Procedure to ensure proper waste control, disposal, and mitigate pollution and personal hazards associated with waste, while the flour mills and the home care product plant have established the Waste Control Program to maintain ecological balance, reduce waste pollution to the surrounding environment, and effectively manage the disposal of various waste materials generated by the Company. Waste Management Control Program has been implemented in the specialty fats plant to assist proper waste management and mitigate pollution to the surrounding ecological environment.

The Group generated an approximate total of 42,608.05 kg of hazardous waste with an intensity of 0.06 kg/tonne of production volume and 1,071,540.47 kg of non-hazardous waste with an intensity of 1.39 kg/tonne of production volume during the Reporting Period. Hazardous wastes generated include waste with organic solvent, waste with mineral oil, waste with dye and coating, selenium and mercury-containing wastes, pesticide wastes and other wastes (i.e. waste containers, capacitors and oil wipes). Non-hazardous wastes generated comprised of food, paper, plastic, scrap metal, sludge and commercial wastes.

The Group is committed to reducing waste generated in our manufacturing plants and offices and ensuring that both hazardous and non-hazardous wastes are well-managed.

### 廢物管理

本集團已建立多項政策促進廢物管理。我們的食用油廠已實施《廢棄物控制程序》，以確保妥善控制、處置及減少廢物以及降低與廢物相關的污染及人身危害，同時麵粉廠及家居護理用品廠已建立《廢棄物控制／管理程序》，以維持生態平衡、減少廢物對周圍環境的污染以及對本公司產生的各類廢物的處置進行有效管理。特種油脂廠已實施《廢棄物管理控制程序》，以協助妥善廢物管理及減少對周圍生態環境的污染。

本集團於報告期間共產生約42,608.05千克有害廢棄物，強度為每噸產量0.06千克，以及1,071,540.47千克無害廢棄物，強度為每噸產量1.39千克。所產生的有害廢棄物包括含有機溶劑、含礦物油、含染料及塗料的廢棄物、含硒及汞的廢棄物、農藥廢棄物以及其他廢棄物（即廢棄容器、電容器及擦油布）。所產生的無害廢棄物包括廚餘、紙張、塑料、廢金屬、污泥及商業廢棄物。

本集團致力於減少我們的生產廠房及辦公室產生的廢物，並確保有害及無害廢棄物得到妥善管理。

### Waste Management *(continued)*

To prevent potential harm to human health through contamination of soil, air and water resources, the Group is committed to implementing proper and immediate treatment of hazardous wastes and wastes that require strict control by engaging qualified service providers for collection and further handling. For hazardous wastes, we have appointed licensed operators/applied industry standard to collect and handle hazardous wastes prior to disposal. For non-hazardous wastes, centralised waste collection, storage and transfer facilities for on-site solid wastes are available in accordance with national standards to maximise recycling rates. Hazardous wastes are collected by registered waste collectors for proper disposal. Commercial wastes are transferred to designated collection points; other recyclables, including scrap metals and waste paper, are collected and repurposed by qualified recyclers.

Additionally, for offices, waste recycling bins are installed in the offices to encourage paper recycling. Waste Separation Bins was placed at lobby of Lam Soon Building for collection of paper, plastic bottles and metals.

Our manufacturing plants have established the following initiatives to reduce waste generation:

- Recycles the empty chemical containers by the raw material suppliers;
- Establishes the "Waste Management Procedure" and sets up various recycling stations, to facilitate better classification of wastes for storage and disposal;
- Generates economic benefits from non-hazardous wastes, by selling them to recognised recycling companies; and
- Turns waste into energy through food waste collection.

During the Reporting Period, Lam Soon has established collaboration and innovative initiatives to reduce waste. In collaboration with the Environmental Protection Department ("EPD"), we have implemented a food waste collection program aimed at converting waste into energy. Since 1 June 2023, we have arranged for the collection of food waste in our canteen. The EPD's appointed service provider collects the food waste on a daily basis and transports it for further treatment, ultimately transforming it into energy. As of 30 June 2025, approximately 14,000 kg of food waste has been collected in total.

### 廢物管理 *(續)*

為避免受污染的泥土、空氣及水資源損害人體健康，本集團透過委聘合資格的服務提供者收集及進一步處理廢物，致力妥善及即時處理有害廢物及需要嚴格控制的廢物。在有害廢棄物方面，本集團已委任持牌運營商／應用的行業標準來收集和處理有害廢棄物，然後進行處置。在無害廢棄物方面，我們根據國家標準使用集中式廢物收集、存儲和轉移現場固體廢物的設施，以最大程度提高回收率。有害廢棄物由註冊廢物收集商收集，以確保作出適當處理。商業廢物被轉移到指定的收集點，其他可回收材料(包括廢棄金屬及廢紙)由合資格的回收商收集並重新利用。

此外，辦公室方面，辦公室內設有廢棄物回收箱，鼓勵紙張回收。南順大樓大廳設有廢棄物分類箱，用於收集紙張、膠瓶和金屬。

我們的生產廠房已制定以下舉措減少廢棄物產生：

- 原材料供應商回收空化學容器；
- 建立《廢棄物管理程序》並設立多個回收站，以促進對廢物進行更好分類以便儲存及處置；
- 通過將無害廢物出售予認可的回收公司，從中獲經濟利益；及
- 通過廚餘收集將廢物轉化為能源。

於報告期內，南順積極開展合作，並採取創新舉措，以減少浪費。我們與環境保護署(「環保署」)合作，實施了廚餘收集計劃，旨在將廢物轉化為能源。自二零二三年六月一日起，我們已安排在食堂收集廚餘。環保署指定的服務供應商每日收集廚餘，並將其運送至進一步處理，最終轉化為能源。截至二零二五年六月三十日，一共已收集廚餘約14,000千克。

<sup>14</sup> According to advice of Shenzhen Ecological Environment Bureau, flour mills plant in Shekou have re-organised the type of hazardous waste of one hazardous waste from "other waste" to "pesticide wastes".

<sup>15</sup> Significant decrease in wastes with organic solvent was due to enhanced testing proficiency, reducing the number of tests per sample.

<sup>16</sup> Significant decrease in wastes with mineral oil was because they are only produced during machinery repair and maintenance activities. Since no such activities were conducted this year, the generation of these wastes was reduced.

<sup>17</sup> Significant decrease in mercury-containing wastes was due to a decrease in using the traditional light tubes and replacement by the light-emitting diode ("LED") fixtures.

<sup>18</sup> Significant decrease in wastes with dye and coating was due to a decrease in painting workload, with painting projects that required much less paint this year.

<sup>19</sup> Significant decrease in selenium-containing waste was due to reduced usage of cartridge printers following the discontinuation of the bag printing workshop.

<sup>20</sup> Significant increase in scrap metal produced was due to the discontinuation of the bag printing workshop, leading to the production of scrap metal racks.

<sup>21</sup> Significant increase in sludge produced was due to transferring Hong Kong product manufacturing to the Guangzhou plant. This move necessitated more frequent and intensive cleaning, which increased the volume and concentration of sewage. Consequently, chemical treatment usage rose, resulting in greater sludge yield.

<sup>14</sup> 根據深圳市生態環境局的建議，蛇口麵粉廠已將一種有害廢棄物的類別由「其他廢棄物」重新分類為「農藥廢棄物」。

<sup>15</sup> 含有有機溶劑的廢物顯著減少乃由於測試能力的提高，減少了每個樣本的測試次數。

<sup>16</sup> 含礦物油的廢棄物顯著減少，因這些廢棄物僅於機械維修和保養活動期間產生。由於今年沒有進行此類活動，因此減少了這些廢棄物的產生。

<sup>17</sup> 含汞廢物的大幅減少乃由於減少使用傳統燈管，並由發光二極管(「LED」)燈具取代。

<sup>18</sup> 染料和塗料廢棄物大幅減少乃由於塗裝工作量減少，今年塗裝工程所需油漆量明顯減少。

<sup>19</sup> 含硒廢棄物的大幅減少乃由於停止袋子印刷車間生產後墨盒印表機的使用減少。

<sup>20</sup> 廢金屬產生量大幅增加乃由於處理了印袋車間的鐵架，並更換及清理了損壞的機器部件及破裂的管道。

<sup>21</sup> 污泥產量大幅增加乃由於產品製造從香港轉移至廣州廠房。此舉需要更頻繁、更密集的清潔工作，使污水量及濃度增加。因此，化學處理劑使用量上升，導致污泥產量增加。

## Waste Management *(continued)*

We tracked our waste management progress against targets to achieve 100% diversion rate for non-hazardous waste and maintain 100% recycling rate for hazardous waste by 2024/25 from a 2018/19 baseline. These targets expired during the Reporting Period. While Lam Soon has achieved the hazardous waste target, we have challenges meeting our non-hazardous waste target. It was primarily due to the fact that Hong Kong's recycling infrastructure does not support handling of all types of wastes.

To address this, during the Reporting Period, we have set new waste intensity targets tailored to each of our business divisions<sup>22</sup>, designed to adapt to the regional waste diversion restrictions and to enhance our commitment to source reduction. To ensure the new targets are both realistic and attainable, food division and home care product division targets are based on the stable operational data of the base year 2023/24 and 2024/25<sup>10</sup> respectively, combined with projections of future production and consumption taking into account the key ESG action plans to be undertaken.

## 廢物管理 *(續)*

我們就廢物管理的目標追蹤進度，我們以二零一八／一九年為基準年，目標在二零二四／二五年實現100%無害廢棄物分流率，並保持有害廢棄物100%的回收率。這些目標已在報告期內屆滿。儘管南順已實現有害廢棄物之目標，惟在實現無害廢棄物目標方面遭遇挑戰，主要源於香港的回收基礎設施並未支援處理所有類型的廢棄物。

為此，於報告期間，我們針對各業務分部<sup>22</sup>訂立新的廢棄物強度目標，旨在適應區域廢棄物分流限制並加強我們對源頭減廢的承諾。為確保新目標切實可行，食品分部及家居護理用品分部的目標分別基於二零二三／二四及二零二四／二五<sup>10</sup>基準年的穩定營運數據，並融入未來生產量和消耗量的預測，同時把將要實施的關鍵環境、社會及管治行動計劃納入考量。

Base Year 基準年	Target Year 目標年	Division 分部	Target Detail 目標詳情	Base Year Performance 基準年表現
2023/24 二零二三／二四年	2029/30 二零二九／三零年	Food division 食品分部	To reduce waste intensity by 6% 廢棄物強度降低6%	0.72 kg/tonne of production volume 每噸產量0.72千克

### Waste Management *(continued)*

To drive the waste targets, Lam Soon has developed a comprehensive approach. Our key action plans for the coming years include:

- Developing partnerships with recycling specialists to transform cleaning materials into raw materials for other companies, diverting them from waste streams;
- Engaging suppliers to negotiate a closed-loop system for the recovery and recycling of raw material packaging;
- Collaborating with the Research and Development and Quality departments to optimise production changeover processes through technical adjustments to reduce wastewater and sludge volumes.

For the home care product division, a new Conghua plant is scheduled to commence operations in 2026/27. We have developed internal projections for its waste and production to establish an initial intensity benchmark. These projections will serve as a reference during the new plant's initial operational phase, and we will formally consolidate the data and revise the final targets for the home care product division once actual baseline data becomes available.

### 廢物管理 *(續)*

為推動廢棄物目標，南順已制定全面方針。我們於未來幾年的主要行動計劃包括：

- 與回收專家建立合作夥伴關係，將清潔材料轉化為其他公司的原材料，將其從廢棄物流中分流出來；
- 與供應商磋商建立原材料包裝回收再利用的閉環系統；
- 與研發和品質部門合作，透過技術調整優化生產轉換流程，減少廢水和污泥量。

對於家居護理用品分部，新的從化工廠計劃於二零二六／二七年投入營運。我們已製定了該工廠廢物量和生產量的內部預測，以建立初始強度基準。這些預測將作為新工廠初期運作階段的參考。一旦獲得實際基線數據，我們將正式整合數據並修訂家居護理用品分部的最終目標。

### Sustainable Packaging

The Group has established multiple policies in manufacturing plants to monitor and regulate the use of sustainable packaging, detailed specifications and testing requirements for packaging materials such as PET oil bottles, paper boxes, labelling to ensure compliance with sustainability standards.

Packaging materials consumed by the Group were mainly recyclable materials including plastic, cotton bags and paper. Packaging materials were sourced from external suppliers, with constant inspection on quality, particularly on their safety and hygiene performances. During the Reporting Period, a total of 15,727.55 tonnes of packaging materials have been consumed for protection of finished products, representing a consumption intensity of 0.02 tonne/tonne of production volume.

The Group has been proactively exploring ways to reduce the use of packaging materials and promoting products with replaceable packaging to reduce the consumption of plastic pumps. Additionally, we offer customers the option to purchase refill pouches and products with refill available to minimise the use of packaging.

Furthermore, the edible oil plant in Shekou adopted nitrogen filling technology to address the issue of sunflower oil bottle deformation and reduce bottle weight. During the Reporting Period, this technology was put into operation for several production lines. The weight of sunflower oil bottles has been reduced by 15g per bottle. It is expected to produce about 1.2 million bottles of sunflower oil per year, saving 18 tons of PET annually.

The following practices were implemented by our manufacturing plants to minimise packaging materials:

- Offer bulk delivery and light packaging to reduce the consumption of packaging materials;
- Evaluate packaging suppliers annually for compliance assurance;
- Reduce the use of non-recyclable resources for packaging;

### 可持續包裝

本集團於生產廠房制定了多項政策來監控及規範可持續包裝的使用，並對PET油瓶、紙盒、標籤等包裝材料製定詳細規格和測試要求，以確保符合可持續標準。

本集團消耗的包裝材料主要為可回收材料，包括塑料、布袋及紙張。包裝材料乃購自外部供應商，但本集團定期監察質量，特別是在安全及衛生方面的表現。於報告期間，我們為產品保護共消耗15,727.55噸包裝材料，消耗強度為每噸產量0.02噸。

本集團一直積極探索減少包裝材料使用的方法，並推廣可更換包裝的產品，以減少塑膠泵的消耗。此外，我們也為顧客提供購買補充裝和可補充裝產品的選擇，以最大限度地減少包裝的使用。

此外，蛇口的食用油廠採用了充氮技術，以解決葵花籽油瓶變形的問題並減輕瓶身重量。於報告期內，該技術已在多條生產線上投入使用。葵花籽油瓶的重量每瓶減少了15克。預計年產約120萬瓶葵花籽油，每年可節省18噸PET塑膠。

我們的生產廠房已實施以下措施以減少包裝材料：

- 提供大批交付及輕包裝減少包裝材料的消耗；
- 每年評估包裝供應商以確保合規性；
- 減少使用不可回收資源製作包裝；

# PILLAR 1: "TOWARDS A GREENER FUTURE" 支柱一：「邁向更環保未來」

## Sustainable Packaging *(continued)*

- Apply various re-using and recycling methods to non-food packaging materials, such as re-using as turnover box, or recycling by recognised handlers;
- Adopt recyclable labelling materials, such as replacing polyvinyl chloride ("PVC") based labelling materials with those made of PET;
- Offer package products with crates which can be reused; and
- Require packaging material suppliers to reduce packaging weight.

## 可持續包裝 *(續)*

- 對非食品包裝材料採用多種再利用和回收方法，例如作為周轉箱重複使用，或由認可的處理方進行回收；
- 採用可回收標籤材料，例如以PET代替以聚氯乙烯(「PVC」)生產的標籤材料；
- 用可重複使用的板條箱包裝產品；及
- 要求包裝材料供應商減輕包裝重量。

### Employee Welfare, Health and Safety and Engagement

#### Health and Safety

The safety and wellbeing of employees is a core concern of the Group. As such, the Group takes a strict approach to implement measures to foster compliance with applicable laws and regulations in relation to occupational health and safety ("OHS"), including but not limited to the Law of the PRC on the Prevention and Control of Occupational Diseases, the Hong Kong Occupational Safety and Health Ordinance (Chapter 509 of the Laws of Hong Kong), and Hong Kong Employees' Compensation Ordinance (Chapter 282 of the Laws of Hong Kong). The Group also has OHS systems and policies in place to manage occupational health and safety issues across the entire business operations.

To enhance overall workplace wellness and demonstrate our commitment to protecting our workforce, during the Reporting Period, we have set new targets aimed at maintaining a safe work environment, as shown in the table below.

Base Year 基準年	Target Year 目標年	Target Detail 目標詳情	Base Year Performance 基準年表現
2023/24 二零二三／二四年	2029/30 二零二九／三零年	To reduce lost time injury rate by 40% 將損失工時工傷率降低40%	19.63%

#### Health and Safety *(continued)*

Apart from mandatory health check-up before employment, annual or biennial check-ups are also offered to employees based on their employment categories and nature. Frontline workers in the PRC undergo end of term check-ups. Employees exposed to high occupational health risks are offered occupational health checks in accordance with the statutory requirements. Appropriate personal protective equipment (“PPE”) is provided to employees based on their duties performed.

To control workplace safety hazards, our flour mill in Shekou conducted annual testing and detection of occupational hazard factors in the workplace to ensure that we provide our employees a safe working environment. Furthermore, we perform monthly Environmental, Health and Safety (“EHS”) and fire safety investigations at our operational sites to proactively identify and address potential hazards. In addition, offices and canteens are assessed by qualified institutions to ensure that they meet applicable national standards regarding indoor environmental pollution control.

To mitigate occupational disease risks and safeguard workers’ health rights, we implemented an annual occupational health training system. In addition to the foundational training, a three-tier safety access education mechanism is established for new hires, emphasising awareness of job-specific safety protocols. During the Reporting Period, to reinforce employees’ awareness on OHS, the flour mill in Shekou conducted the dust explosion emergency drill, and the edible oil plant in Shekou conducted a fire safety and emergency drill, and organised an annual “Fire Safety Re-education Training” and “Occupational Health Training”, involving a total of 142 participants.

When purchasing office furniture, the Group prioritises formaldehyde-free products and wood products from FSC-certified forests to ensure that its employees work in a safe environment.

為控制工作場所的安全隱患，我們位於蛇口的麵粉廠每年對工作場所的職業危害因素進行測試及檢測，以確保我們為僱員提供安全的工作環境。此外，我們每月在營運地點進行環境、健康與安全（「環境、健康與安全」）及消防安全調查，以主動識別及解決潛在隱患。另外，合資格機構會評估辦公室及食堂環境，以確保其符合有關室內環境污染控制的適用國家標準。

為降低職業病風險及保障勞工健康權益，我們實施年度職業健康培訓制度。除基礎培訓外，亦為新入職員工建立三級安全准入教育機制，強調對特定工作安全協議的認知。於報告期間，為加強僱員對職安健的意識，蛇口麵粉廠進行粉塵爆炸綜合應急演練，而蛇口食用油廠進行消防安全應急演練，及舉辦年度「消防安全再教育培訓」及「職業健康培訓」，合共有142名人士參與。

採購辦公家具時，集團優先考慮無甲醛產品和來自FSC認證森林的木製品，以確保員工在安全的環境中工作。

Noise reduction devices have been installed in the equipment such as exhaust fans, air compressors and grinders in accordance with the requirements of the Environmental Impact Assessment Report conducted by the Group's appointed agencies. Furthermore, we utilise handheld noise monitoring equipment to assess noise level in work areas and engage third-party organisation to conduct noise assessment annually in home care product plant.

The risk of developing respiratory diseases is high for employees working inside the flour mills, especially if they are not properly protected with adequate PPE. To reduce workers' exposure to flour dust, effective dust collection devices are installed at all flour mills to ensure that the airborne dust concentration does not exceed regulatory exposure standards. The collected flour dust is filtered through a pulse dust collector, and the filtered air is discharged through a 15-meter-high exhaust stack. Annual assessments are conducted on the occupational environmental factors. To minimise explosion hazard, the flour mills have deployed various explosion protection systems which passed regular inspection from the State Administration of Work Safety (e.g. explosion-proof lighting system, flameless vent installations on dust collectors). Our plants have obtained relevant explosion-proof certifications, ISO 9001, ISO 14001, ISO 22000, Hazard Analysis and Critical Control Point ("HACCP"), FSSC 22000 certification and China Environmental Labelling Products Certification. Meanwhile we have maintained compliance with the following regulatory requirements, which include:

- Safety Regulations for Dust Explosion Prevention and Protection (GB15577-2018);
- Safety Regulations for the Protection of Dust Explosion for Grain Processing (GB17440-2008);
- Guide for Pressure Venting of Dust Explosions (GBT15605-2008); and

根據本集團委聘之機構進行的《環境影響評估報告》所要求，本集團已於排氣扇、空氣壓縮機及磨床等設備上安裝降噪裝置。此外，我們利用手持式噪音監測設備評估工作區域的噪音水平，並聘請第三方機構每年對家居護理用品廠進行噪音評估。

在麵粉廠工作的僱員患呼吸道相關疾病的風險較高，特別是如果僱員未有獲得適當的個人保護設備的保護。為減少工人接觸麵粉粉塵，所有麵粉廠均已安裝有效的集塵裝置，以確保空氣中的粉塵濃度不超過規定的暴露標準。收集到的麵粉粉塵經由脈衝除塵器過濾，過濾後的空氣經由15米高的排氣管排出。我們每年對職業環境因素進行評估。為減少爆炸危險，麵粉廠已安裝各種通過國家安全生產監督管理總局定期檢查的防爆系統（例如防爆照明系統、集塵器上的無焰通風裝置）。我們的廠房已取得相關防爆認證、ISO 9001、ISO 14001、ISO 22000、危害分析與關鍵控制點（「HACCP」）、FSSC 22000及中國環境標誌產品認證。同時，我們一直遵守以下監管規定，其中包括：
