Through the annual performance appraisal system, our management regularly assesses employee performance and remuneration. This process is designed to recognise and motivate employees based on their contributions and performances, facilitating their career progression within the Group. The performance appraisal system also acts as a platform for employees to communicate their personal and career development aspirations to the Company. It proves advantageous for the Group by providing insights into the potential of various employees, gathering feedback, and informing future recruitment or training strategies.

Service Quality Control

As a leading provider of financial trading software solutions, the Group delivers flexible, scalable, and budget-friendly online frontend trading and back-office systems for trading global financial products to banks and brokerage firms in Hong Kong.

To meet the elevated service standards expected by our customers, we have established a quality assurance team, dedicated to fostering sustainable performance and continual improvement. Following a standardised checklist, the quality assurance team conducts diverse tests on the Securities and Futures Back Office System. The objective is to ensure that the Group's systems meet all customer requirements without any deficiencies. For the Securities and Futures Front Office System, the Group assists its customers in the market rehearsal arranged by the Hong Kong Exchanges and Clearing Limited to conduct testing on server and system connectivity.

For modification/customisation of the Securities and Futures Front Office System, testing works are handled by the development team. Firstly, the Group conducts tests on an individual basis. Then the Group carries out an integration test of the software systems in case the modification/customisation works affect parts of the software systems. For systems like the Forex and Bullion Front and Back Office Systems that are not connected to any exchange, products are tested internally before being delivered to the Group's customers. Products found to have defects during the testing process are returned to the development team for rectification. After the installation of products by the Group's customers, user acceptance tests are performed to ensure that the products meet their expectations. Customers are required to sign a user acceptance test form to acknowledge that the software system meets their functional specifications and performance requirements.

The Group provides comprehensive customer service and values suggestions from its customers for continuous improvement on its products and services. During the Year, customers did not file any significant complaints, and we did not recall any products for safety and health reasons. For any bugs identified after the installation, the Group's customer service department is responsible for recording these complaints and issues. They diligently follow up with each complaint to ensure that the product development team properly resolves these issues.

As the products and services provided by the Group do not raise significant health and safety, advertising and labelling concerns, the related policies are not disclosed in the ESG Report. Moreover, the Group was not made aware of any violation of related laws and regulations in relation to health and safety, advertising and labelling of the services and products and methods of redress that have a material impact on the Group's business performance during the Year.

- 本集團辦公室使用節能燈泡、LED 照明及其他節能電器；及
- 鼓勵僱員在通勤或與客戶會面時乘坐公共交通工具或步行而非駕駛私家車。

於本年度，本集團的能源消耗主要來自營運活動中的日常用電，且本集團不使用固定來源或車輛的燃油，從而體現我們對減少環境影響的承諾。

本集團的能源消耗呈列如下：

	2025 二零二五年	2024 二零二四年
Purchased electricity 外購電力	95,977.00	99,099.00
Total energy consumption 能源消耗總量	95,977.00	99,099.00

Water Consumption

As the property management company has complete control over water supply and discharge, the installation of an independent water sub-meter by the Group to measure individual water consumption is deemed impractical. Consequently, there is a lack of available data on water consumption for disclosure. Despite this limitation, our commitment to water conservation remains unwavering, with continuous emphasis on water-saving practices in our day-to-day operations. The Group actively encourages employees to participate in water conservation efforts within the office, highlighting the significance of securely turning off water taps and prioritising the use of water-saving products.

Given our restricted control over water consumption and the current inability to quantify water usage, setting a water efficiency target is presently not viable. However, we remain open to reassessing this possibility should there be any changes in the circumstances of the water supply. Importantly, the Group encountered no challenges in sourcing water during the Year.

Wastes

The Group actively fosters a culture of resource conservation and waste reduction, urging employees to proactively contribute by cultivating habits that minimise waste generation and promote effective recycling. To substantiate these efforts, the Group has implemented the following practices to actively reduce waste:

- Announcement, event reporting, soliciting recommendation and feedbacks are communicated using electronic means if possible;
 - Environmentally friendly paper materials such as the elemental chlorine-free papers are widely promoted within the Group;
 - Double-sided printing/copying is used whenever possible;
 - The attitude of “think before you copy” is encouraged, such as sharing documents with co-workers or printing only the number of copies required;
 - Employees should separate their recyclable wastes according to the 3-coloured waste separation bins;
 - Toner cartridges from printers are collected by an authorised recycling company for proper handling; and
 - Office stationaries such as envelopes, document clips and paper bags are encouraged to be reused if possible.
- 以電子方式發佈公告、活動報告、徵求建議及反饋(倘可能)；
 - 本集團廣泛推廣環保紙，例如無氯紙；
 - 盡可能使用雙面打印／複印；
 - 鼓勵「打印前思考」的態度，例如與同事共享文件或僅打印所需的份數；
 - 僱員應按三色廢物分類箱將可回收廢物分類；
 - 打印機的碳粉盒交由認可回收公司收集，以便妥善處理；及
 - 鼓勵於可行的情況下重複使用辦公文具，例如信封、文件夾及紙袋。

用水

由於用水供應及排放均完全由物業管理公司控制，故本集團安裝獨立的用水分錶以計量其單獨用水難以實現。因此，缺乏可供披露的用水資料。儘管存在這種限制，但我們仍堅持承諾節約用水，並在日常營運中一直強調節約用水。本集團積極鼓勵僱員在辦公室內節約用水，強調安全關閉水龍頭及優先使用節水產品的重要性。

鑑於我們對用水的控制受限，且目前無法量化用水量，因此目前設定用水效率目標不可行。然而，我們會在供水情況出現變化時重新評估此種可能性。重要的是，於本年度，本集團在求取水源上並無遇到任何困難。

廢棄物

本集團積極培養節約資源及減少廢棄物的文化，敦促僱員養成盡量減少廢棄物產生及促進有效回收利用的習慣，從而積極做出貢獻。為此，本集團已採取以下措施，積極減少廢棄物：

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

環境、社會及管治報告

The Group addresses two main categories of waste in its commitment to environmental responsibility. Firstly, the primary non-hazardous waste produced is paper waste. To mitigate the environmental impact of this waste in our business operations, we actively promote eco-friendly practices among our employees. This involves encouraging them to adopt practices such as printing internal documents on both sides and cultivating a habit of environmentally conscious photocopying. In addition to these source reduction efforts for paper waste, the Group actively advocates for paper recycling, aiming to enhance employee awareness of paper conservation.

While the Group's electronic waste production is not substantial, we are aware of the need to handle such waste responsibly. Electronic wastes are efficiently managed through the involvement of eligible third parties participating in the Producer Responsibility Scheme on Waste Electrical and Electronic Equipment implemented by the Government of the Hong Kong Special Administrative Region.

Looking ahead, our strategic goals include the implementation of digital management systems and a continual effort to minimise waste and reduce paper consumption over the coming years.

The following table outlines the amount of non-hazardous wastes produced by the Group:

Non-hazardous Wastes 無害廢棄物	Unit 單位	2025 二零二五年	2024 二零二四年
Paper wastes 廢紙	Tonnes 噸	0.22	0.08
Total non-hazardous wastes produced 已產生無害廢棄物總量	Tonnes 噸	0.22	0.08
Total non-hazardous wastes disposed 已處理無害廢棄物總量	Tonnes 噸	-	-
Total non-hazardous wastes recycled 已回收無害廢棄物總量	Tonnes 噸	0.22	0.08
Non-hazardous wastes intensity 無害廢棄物密度	Tonnes/employee 噸／僱員	0.003	0.001

During the Year, the Group was not aware of any material noncompliance with the Waste Disposal Ordinance (Cap. 354 of the Laws of Hong Kong) and other applicable laws and regulations related to discharges into water and land, and generation of hazardous and non-hazardous wastes.

本集團在履行環保責任時主要處理兩類廢物。首先，產生的主要無害廢棄物為廢紙。為減輕業務運營中產生的該廢棄物對環境的影響，我們積極向僱員推廣環保做法，包括鼓勵僱員雙面打印內部文件及養成環保的複印習慣等做法。在減少廢紙的同時，本集團亦積極宣導紙張回收，以提高僱員的節紙意識。

儘管本集團產生的電子廢物不多，但我們意識到有必要以負責任的方式處理該等廢物。電子廢物由參加香港特別行政區政府實施的廢電器電子產品生產者責任計劃的合格第三方進行有效管理。

展望未來，我們的戰略目標包括實施數碼化管理系統，並於未來數年繼續努力最大限度地減少廢棄物及紙張消耗。

下表概述本集團產生的無害廢棄物數量：

於本年度，本集團並不知悉任何嚴重違反廢物處置條例（香港法例第354章）及其他有關向水及土地排污以及有害及無害廢棄物的產生的適用法例法規的情況。

Strategies are then formulated to effectively manage the identified risks. The table below outlines specific risks pertinent to the Group and the corresponding measures implemented to mitigate their impact.
