BOARD STATEMENT

董事會聲明

To deeply integrate sustainability principles into the corporate governance framework, the Company has established an ESG Working Group under the direct leadership of the Board of Directors to coordinate and oversee all sustainability-related matters. The core responsibilities of this group include formulating sustainability strategies, objectives, and management mechanisms, as well as appropriately allocating the resources required to achieve such objectives. Concurrently, this group monitors the implementation of strategies and objectives on an ongoing basis, assesses progress towards their achievement, supervises relevant actions, and rigorously executes the Board approval and publication procedures for the annual sustainability report.

The relevant units of the Company's departments and subsidiaries will collaborate with the ESG Working Group to implement specific execution plans, including formulating relevant policies and standards, establishing management systems, and regularly reporting progress and effectiveness to the ESG Working Group. The ESG Working Group will integrate the information and submit an annual report to the Board of Directors to form a bottom-up communication mechanism. In addition, the Board of Directors, as the top-level decision-making body, evaluates and authorizes the strategies and guidelines proposed by the ESG Working Group. The ESG Working Group guides, supervises and evaluates each department. The Company has engaged Riskory Consultancy Limited as a professional ESG consultant to provide sustainability consulting services, assist in managing ESG risks and advance sustainability work, while continuously tracking international sustainability trends and improving performance through industry standard benchmarking. Hence, the Board reviews ESG-related matters at least annually and receives regular updates from the ESG Working Group. Material ESG risks and performance indicators are incorporated into the Group's overall risk management framework and business strategy planning process.

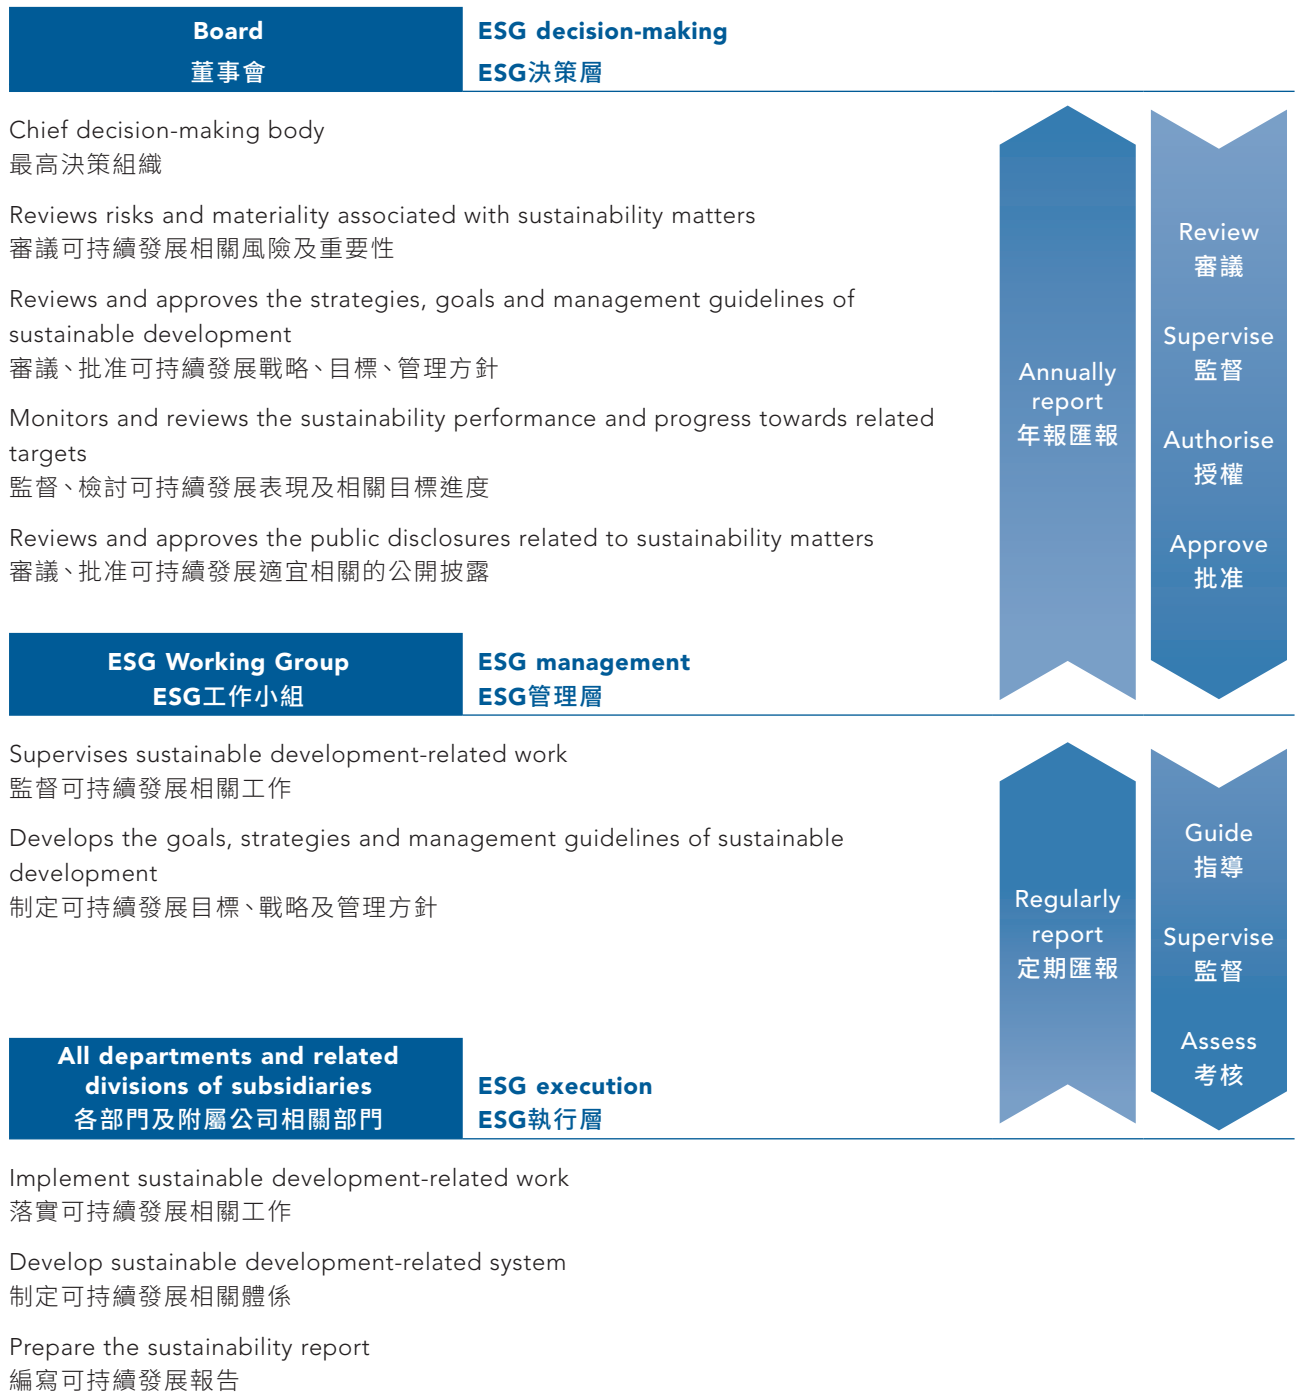

The Group understands stakeholder expectations and demands through regularly held diverse communication activities to identify and evaluate key ESG issues and submit them for board discussion. The Board of Directors identifies environmental, social and corporate governance risks and opportunities based on the external environment and corporate strategy, and makes decisions on annual ESG priorities and projects. During the Reporting Period, we have identified the risks and opportunities of climate change for the Company's future operations, assessed their relevance and impact, and developed strategies to address them. In addition, we have set environmental targets and actively promoted various green and low-carbon initiatives to support the country's "dual carbon" strategy. We will continuously monitor the progress of achieving our goals and adjust and strengthen related work in accordance with global sustainability trends.

為將可持續發展理念深度嵌入公司治理框架，本公司設立由董事會直接領航之ESG專責小組，統籌並全面統籌及監督可持續發展相關事務。該小組之核心職責包括擬訂可持續發展策略、目標與管理機制，並適切配置達標所需資源。同時，持續關注策略與目標之落實情況，評估達成進度並對相關行動加以監督，並嚴謹執行年度可持續發展報告之董事會審批與發布程序。

本公司各部門及附屬公司相關單位將與ESG工作小組協作，落實具體執行方案，包括制定相關政策、標準，建立管理體系，並定期向ESG工作小組匯報進度及成效。ESG工作小組將資訊整合後向董事會提出年度報告，形成自下而上的溝通機制。此外，董事會作為頂層決策機構，對ESG工作小組提出的策略和方針進行評估和授權。ESG小組則對各部門實施指導、監督和評估。本公司亦委任Riskory Consultancy Limited為專業ESG顧問，提供可持續發展諮詢服務，協助管理ESG風險及推進可持續發展工作，並持續追蹤國際可持續發展趨勢，透過對標行業標準以提升績效表現。因此，董事會每年至少檢討一次與ESG相關的事宜，並定期接收由ESG工作小組提供的最新匯報。重大ESG風險及績效指標亦已納入本集團的整體風險管理框架及業務策略規劃流程中。

本集團透過定期舉辦多元溝通活動了解持份者的期望與訴求，從而識別及評估ESG重要議題，並提呈董事會討論。董事會會根據外部環境和公司戰略來識別環境、社會和公司治理方面的風險和機會，並對年度ESG重點工作和項目做出決策。在報告期間，我們已經辨認出氣候變化對公司未來運營的風險和機會，評估了它們的相關性和影響程度，並針對性地制定了應對策略。此外，我們設定了環境目標，積極推動各項綠色低碳舉措，以支援國家的「雙碳」戰略。我們將持續監察目標實現進度，並因應全球可持續發展趨勢適時調整及強化相關工作。

CHAPTER 1 OPTIMIZED GOVERNANCE

第一章 精益管治

The Group prioritizes sustainability, continuously drives transformation and innovation, and aspires to become an industry benchmark. Our core business encompasses the trading of petrochemical products and commodities such as soybeans, as well as petrochemical products storage. In order to effectively identify and manage ESG risks across diverse business areas, we have established an ESG Working Group led by the General Manager, which collaborates with the Safety Committee and other key departments to strengthen the overall management of ESG. In addition, the team is responsible for communicating with stakeholders, identifying and evaluating ESG risks related to business operations, integrating and analyzing relevant information, and regularly submitting reports to the Board of Directors on material ESG matters.

COMPLIANCE MANAGEMENT

The Group firmly believes that a sound corporate governance structure is an important cornerstone for the Company's long-term and steady development. We strictly implement laws and regulations such as the Company Law of the People's Republic of China, the Law on Anti-Corruption and Anti-Bribery of the People's Republic of China, the Law on State-Owned Assets in Enterprises of the People's Republic of China, and the Anti-Unfair Competition Law of the People's Republic of China, and are committed to internal risk management and control. In order to regulate the behavior of employees, the Company has formulated internal management regulations such as the "Anti-malpractice Management System", the "Internal Control System" and continuously optimized the "Staff Code" and other guidelines to ensure employees follow the highest professional ethical standards and strictly adhere to ethical and legal boundaries. The Group is committed to building an integrity culture and creating an honest and upright corporate environment.

To strengthen the robustness and orderliness of internal operations, the Group has established a rigorous and comprehensive "Internal Control System" as the foundation of our governance. We conduct internal audits on an annual basis: in addition to performing necessary audit procedures, we also carry out compliance reviews and effectiveness assessments of internal control mechanisms, and propose corrective and optimization measures for identified risk areas to ensure that our operations continuously comply with regulatory and contractual requirements. Furthermore, to embed business ethics at the core of governance and throughout corporate management, we actively conduct business ethics training and anti-fraud awareness programs, instilling anti-corruption values into employee codes of conduct and corporate culture.

本集團以可持續發展為核心議題，持續推動轉型創新，並立志成為行業標竿。我們的核心業務涉及買賣石化產品及大豆等產品的貿易業務，同時也包括石化產品的倉儲。為了有效識別和掌管跨多元營業範疇的ESG風險，我們已建立了一個由總經理領導的ESG工作小組，該小組與公司安全委員會及其他關鍵部門協作，加強ESG的整體管理。此外，小組還負責與利益相關者進行溝通，識別與評估與業務運作相關的ESG風險，整合和分析相關資訊，並定期就ESG重大事項向董事會提交報告。

合規管理

本集團堅信，完善的企業管治架構是公司長期穩健發展的重要基石。我們嚴格執行《中華人民共和國公司法》、《中華人民共和國反貪污賄賂法》、《中華人民共和國企業國有資產法》以及《中華人民共和國反不正當競爭法》等法律法規，並致力於內部風險管理與控制。為規範員工的行為，公司內部制定了《反舞弊管理制度》、《內控制度》等內部規章制度，並持續優化《員工守則》等指南，確保員工遵循最高職業道德標準，嚴守道德及法律底線。本集團致力建設廉潔文化，營造誠信正直的企業環境。

為強化內部營運之穩健度與秩序性，本集團以嚴謹完善的《內控制度》融入我們按年持續推動內部審計：除執行必要之稽核作業外，亦對內控機制進行合規審視與效能評估，並針對識別之風險環節提出修正與優化方案，以確保集團營運持續符合法規與合約要求。同時，為使商業道德內化為治理核心並滲透企業管理，我們積極開展商業道德培訓與反詐騙宣傳，將反貪腐之價值觀融入員工行為準則與企業文化。

The Group treats every reported case seriously and continues to improve its reporting mechanisms. In order to achieve this goal, we have developed a set of rules and regulations for reporting disciplinary violations and the protection of whistleblowers. By providing a variety of reporting channels such as letters, telephone and e-mail, we follow the core principles of “combining punishment with prevention and giving priority to precaution (懲防並舉、重在預防)” and “whistleblower protection and avoidance for investigation (舉報保護、調查回避)”, and promptly investigate and deal with employees’ corruption. To ensure safety and rights of whistleblowers, we have established a whistleblower protection mechanism to ensure that the identity of whistleblowers is kept confidential and that retaliation, including dismissal, suspension, threats, harassment, or any form of unfair treatment, is prohibited. In the event of a violation of the above commitments, we will take disciplinary actions in accordance with the Company’s policy, and may even refer the incident to the judicial authorities. The Group attaches great importance to anti-corruption education. We have provided professional materials compiled by the Hong Kong Independent Commission Against Corruption (ICAC) to the Board of Directors, and plan to expand relevant training to management and all employees to strengthen the corporate integrity culture.

During the Reporting Period, there were no concluded or pending corruption legal cases against the Company and our employees, nor were we aware of any violations of national or local anti-corruption laws.

本集團嚴肅處理每宗舉報個案，並持續完善舉報機制。為了達到這個目標，我們制定了一套違紀舉報和舉報者保護規章制度。通過提供書信、電話和電子郵件等多種舉報途徑，遵循「懲防並舉、重在預防」和「舉報保護、調查迴避」的核心原則，及時調查與處置員工的貪污行為。為確保舉報者的安全與權利，我們建立舉報者保護機制，保證保密舉報者身份，並禁止報復，包括解僱、停職、威脅、騷擾或任何形式的不公平對待。若有違反上述承諾的行為發生，我們將按照公司政策作出處分，甚至可能移交司法機關處理。本集團重視反貪污教育工作，已向董事會提供香港廉政公署編製的專業教材，並計劃將相關培訓擴展至管理層及全體員工，以強化企業廉潔文化。

在報告期間，集團並不知悉任何已結案或正在審理的員工貪污法律訴訟，也未發現任何違反國家或地方反貪污法律的行為。

Case Study: Specialized Rule-of-Law Seminar

案例：專題法治講座

Yancheng Port Group organizes compliance and rule-of-law promotion activities from time to time, using diversified training and legal education to continuously deepen the concept of governing the enterprise in accordance with the law and to strengthen its compliance culture, thereby enhancing employees' legal awareness and risk prevention capabilities. As a specific measure to safeguard employees' rights and interests, during the Reporting Period the Group Women's Federation, focusing on female employees' rule-of-law needs, organized a specialized seminar titled "Law Protects Women, Love Walks Alongside," with the aim of strengthening publicity on the legal protection of women's rights and improving female employees' ability to safeguard their rights in accordance with the law.

The seminar was held via video conference, with headquarters staff attending at the main venue and subsidiaries participating through (including controlled companies) parallel sub-venues, where more than 400 female employees joined the session. The Group specially invited the deputy director of the management committee of Beijing Yingke (Yancheng) Law Firm, to deliver the lecture, adopting a three-dimensional legal education model that combined thematic teaching, case-based explanation of laws, and interactive consultation. Taking common issues such as family disputes and marital property distribution as examples, she provided case analysis and offered a focused interpretation of the newly issued judicial interpretations on the Marriage and Family Book of the Civil Code, helping female employees grasp key practical points and essentials for protecting their rights.

The seminar enhanced employees' awareness and strengthened compliance culture within the Group. Participating female employees generally reported that it not only enhanced their knowledge of relevant laws, but also strengthened their awareness and capability to use legal means to safeguard their legitimate rights and interests, while further allowing them to feel the Group's care and concern for female staff. Going forward, the Yancheng Port Group will continue to focus on the actual needs of our employees, further intensify legal publicity efforts, and deepen the protection of employees' rights and interests through various forms, so as to enhance legal literacy and rights-protection capacity, and inject momentum into the Group's high-quality development.

鹽城港集團不定期舉辦合規與法治宣傳活動，透過多元培訓與普法教育，持續深化依法治企理念與合規文化建設，提升員工法律意識與風險防範能力。作為其中一項面向員工權益保障的具體舉措，報告期間，集團婦聯聚焦女職工法治需求，組織開展「法護巾幗愛心相伴」專題法治講座，旨在加強婦女權益保障法治宣傳，提升女職工依法維權能力。

活動以視訊會議形式舉行，總部員工於主會場出席，各附屬公司（包括控股公司）於分會場同步參與，共有逾400名女職員參加。講座特邀北京市盈科（鹽城）律師事務所管委會副主任授課，採取「專題講授+以案釋法+互動諮詢」的立體化普法模式，結合家庭糾紛、婚姻財產分配等常見議題進行案例解析，並就最新出臺的婚姻家庭編司法解釋作重點解讀，協助女職工掌握實務重點與權益保障要領。

此次講座提高了員工的法律意識，並進一步強化了本集團的合規文化。參與女職工普遍反映不僅增進相關法律知識，更強化了運用法律維護自身合法權益的意識與能力，同時也進一步感受到集團對女職工的關心關愛。未來，鹽城港集團將持續聚焦職工實際需求，進一步加大普法宣傳力度，以多元化推進職工權益保障，提升法律素養與維權能力，為集團高品質發展注入動能。

CHAPTER 2 LOW-CARBON DEVELOPMENT

第二章 低碳發展

To strengthen the management and control of exhaust emissions, during the Reporting Period, the Group commissioned a professional third-party organization to conduct comprehensive unorganized waste gas testing in accordance with the "Standard Operating Procedures and Technical Specifications for VOCs Leak Detection", obtaining detailed inspection reports. The inspection results show that the Group's storage facilities' unorganized waste gas emissions comply with national and local standards requirements.

We also engaged another third-party professional organization to conduct exhaust leak detection and maintenance, performing comprehensive inspections of sealing points to effectively identify and control potential environmental risks during the storage process. The test results demonstrate that the Group's petrochemical storage and transportation system has excellent seal performance, and the management of VOCs leakage risks has been remarkably effective.

In order to further control VOC emissions during oil loading and unloading, we have implemented the following measures:

- Strengthen the maintenance of equipment and facilities, and conduct high-frequency inspections of equipment, such as entrusting a third party to conduct leak detection and repair (LDAR) testing of equipment, so as to prevent the case of leakage;
- The oil and gas recovery device is put into use to recover the volatilized oil and gas from the storage tank, and the recovery efficiency reaches 95%;
- The loading platform tank truck is changed from the original top loading to a safer and more environmentally friendly bottom loading method, and the gas generated in the loading process is collected and connected to the oil and gas recovery device;
- Nitrogen sequestration facilities in storage tanks were used to reduce the fugitive volatilization of VOCs in pipelines;
- In summer, the tank body is cooled by water spray, and the volatility of the storage medium in the tank is reduced, so as to reduce the exhaust gas generated by the volatilization of the medium;
- The nitrogen valves have been recalibrated to reduce oil and gas emissions through nitrogen sealing;

為加強廢氣排放的管理與控制，報告期間本集團委託專業第三方機構按《VOCs無洩漏檢測標準操作流程及技術規範》開展無組織廢氣全面檢測，並得出詳細檢驗報告。檢查結果顯示，集團儲存設施的無組織廢氣排放符合國家及地方標準要求。

我們亦另聘第三方專業機構執行廢氣洩漏檢測及維修工作，對密封點進行全面檢查，有效識別及控制倉儲過程中的潛在環境風險。檢測結果表明，本集團石化儲運系統密封性能優良，VOCs洩漏風險管理成效顯著。

為進一步控制油品裝卸過程中的VOCs排放情況，我們實施了以下舉措：

- 加強設備設施的維護保養，並對設備進行高頻次的巡查，如委託第三方對設備進行洩漏檢測與修復(LDAR)檢測，以杜絕「跑冒滴漏」的現象發生；
- 投用油氣回收裝置，對儲罐揮發的油氣進行回收，回收效率達到95%；
- 裝車台槽罐車由原頂部裝車改為更安全、更環保的底部裝車方式，同時對裝車過程中產生的氣體進行收集，並接入油氣回收裝置中；
- 啟用儲罐的氮氣封存設施，減少管線中VOCs的無組織揮發；
- 夏季時通過水噴淋的方式對罐體進行降溫，降低罐體內儲存介質的揮發性，從而減少介質揮發產生的廢氣；
- 重新標定氮氣閥門，通過氮封減少油氣排放；

- Dust nets are added to the surrounding bulk cargo yards, and spray dust reduction measures are carried out regularly, which greatly reduces dust pollution; and
- Regular pressure tests are carried out on the hose to prevent leakage incidents.
- 對周邊散貨堆場增設防塵網，定期進行噴淋降塵措施，大大降低了揚塵污染；及
- 對軟管定期進行試壓杜絕洩漏事件的發生。

The Group is equipped with the “Dafeng Port’s Online Monitoring System for Oil Vapour Recovery” to continuously monitor the 24-hour emission data of VOCs. At the same time, according to the requirements of the environmental protection authorities, the air pollution control has been strengthened. According to the air pollution situation, measures such as stopping production and reducing production will be taken to further ensure that the inhalable suspended particulate (PM2.5) index meets the standard. Through online VOCs monitoring and emission monitoring, we can reduce the impact of emissions on the surrounding environment more effectively, and also make the Company’s production and operation more in line with the requirements of national air pollution prevention and control policies. Looking ahead, the Group will continuously optimize environmental monitoring technologies and pollution control facilities, striving to promote the development of a green and low-carbon industry.

Effluent Discharge Management

The Group strictly complies with the Water Pollution Prevention and Control Law of the People’s Republic of China and the Integrated Wastewater Discharge Standard of the People’s Republic of China, ensuring proper treatment of water pollutants and preventing pollutants such as oils, acidic substances, and alkaline solutions from being discharged directly into water bodies, thereby effectively protecting the aquatic ecological environment. In addition, we have established a comprehensive wastewater collection system to collect wastewater from ground cleaning, tank washing, oily water, and rainwater. The collected wastewater first undergoes preliminary treatment at our self-operated wastewater treatment facilities before being transferred to the industrial park’s wastewater treatment station for advanced purification until it meets the statutory discharge standards. As for wastewater from office areas, it is discharged directly into the municipal sewage network for treatment at the local municipal wastewater treatment plant. During the Reporting Period, the Group continued to conduct water quality monitoring in adjacent sea areas, carefully assessed the environmental impact on surrounding water bodies, and implemented timely and appropriate response measures for any emergency situations.

本集團配備《大豐港油氣回收在線監測系統》，持續監控VOCs的24小時排放數據。同時根據環保主管部門要求，加強了大氣污染管控力度。根據大氣污染情況，採取停產、減負荷生產等措施，進一步保證可吸入懸浮粒子(PM2.5)指標符合標準。通過VOCs在線監測和排放監控，我們能更有效地減低排放物對周邊環境造成的影響，也使本公司的生產運營更符合國家大氣污染防治政策要求。展望未來，本集團將不斷優化環境監測技術及污染治理設施，致力推動綠色低碳產業發展。

污水排放管理

集團嚴格遵循《中華人民共和國水污染防治法》及《中華人民共和國污水綜合排放標準》之規範，確保污水獲得適當處置，杜絕油類、酸性物質及鹼性溶液等污染源直接注入水域，從而有效維護水生生態環境。此外，我們設立了完善的污水收集系統，收集地面清洗、儲罐洗滌與油污水以及雨水。經收集之污水先於集團自營污水處理設施進行預處理程序，隨後輸送至園區污水處理站實施深度淨化，直至符合法定排放基準。至於辦公區的污水，則直接排入市政管網，交由當地市政污水處理廠負責處理。報告期間，集團持續開展鄰近海域水質監測工作，審慎評估對周邊水體之環境影響，並針對任何緊急狀況實施即時且妥善之應對措施。

In the process of risk identification, we adopt scientific quantitative assessment methods and have established a systematic risk assessment system based on the probability of an event and its possible consequences. The standard classifies risk into four levels: significant, large, average, and low, and sets appropriate control strategies and timeframes for each level.

In accordance with the Opinions on Deepening Efforts to Prevent and Defuse Major Risks in Production Safety of the Ministry of Transport, the Group conducted a comprehensive revision of the "Hierarchical Risk Control System for Production Safety" during the Reporting Period, clearly establishing the "Five Lists" framework for identifying major safety risks, which specifically covers control elements including basic information, responsibility allocation, preventive measures, supervision and inspection, and emergency response.

The Company strictly implements the provisions of the Law of the People's Republic of China on Work Safety, established and improved a complete set of dual prevention systems for safety risk classification management and hidden hazard investigation and management, and continuously optimizes the risk prevention and resolution mechanism, so as to comprehensively enhance the efficiency of safety production management and effectively ensure safe production. During the Reporting Period, we carried out the following work in accordance with the internal system document "Safety Inspection Management System":

SAFETY TRAINING

The Group recognizes that safety training is fundamental to sustainable development and has therefore institutionalized and systematized it within daily operations and management processes as part of routine management. We have formulated internal management documents such as the "Safety Training and Education Management System", the "Goals and Requirements for Safety Education and Training", and the "Safety and Health Training Programme" to ensure that safety education and training are carried out in an orderly manner throughout the year. In addition, six dimensions of safety education requirements are proposed: safety needs identification, safety awareness improvement, safety knowledge learning, safety skills mastery, compliance with rules and regulations, and emergency response capabilities, so as to improve the safety awareness of all employees and implement safety management measures. To ensure the effectiveness of training efforts, the Group has formulated the following annual key safety training objectives in accordance with established policies:

安全培訓

本集團深知安全培訓為可持續發展之基礎，遂將其以制度化與系統化方式融入日常營運與管理流程，作為常態化管理的一環。我們制定了《安全培訓教育管理制度》、《安全教育培訓目標和要求》，以及《安全健康培訓計劃》等內部管理文件，確保全年安全教育培訓有序地進行。此外提出了六大維度的安全教育工作要求：安全需求識別、安全意識提升、安全知識學習、安全技能掌握、遵守規章制度以及應急處理能力，以提高全體員工的安全意識，落實安全管理措施。為確保培訓工作切實有效，本集團按照既定方針制定了以下年度安全培訓重點目標：

1

The implementation rate of the annual safety training programme will be 100%
年度安全培訓計劃執行率為100%

2

We have established a safety training system centered on hierarchical and graded levels, aligned with job attributes and rank thresholds, with corresponding assessment and evaluation arrangements to ensure training effectiveness. New hires and employees reassigned due to position changes must complete and pass a three-level safety training certification before assuming their duties. For safety management roles, in addition to the above requirements, relevant professional qualifications or statutory occupational certificates are required for appointment.

To continuously enhance our safety management standards, we conducted diverse training activities during the Reporting Period, including safety production month initiatives, production safety knowledge contest and safety knowledge lecture. According to the business of each company and different personnel needs, each unit conducts safety production training for front-line employees once a month, and designs different training types and themes for different training units, such as drivers and team leaders, including safety operation procedures, hazardous chemical safety knowledge, typical accident analysis, first aid methods, traffic safety training, etc. All participants must pass both theoretical and practical assessments to verify training effectiveness.

We have deepened our comprehensive safety training system, conducting systematic training for frontline personnel, administrative staff, safety specialists, and special operations personnel, with training outcomes integrated into annual performance evaluations. To strengthen safety awareness and accountability, the Company has implemented an annual zero-accident incentive program for both units and individuals, while departments failing to complete planned training sessions are subject to penalties and warning measures.

我們建立以分層、分級為核心的安全訓練體系，並據以匹配各職務屬性與職級門檻，設計對應之評核與評鑑安排，以確保培訓成效。對於新入職者及因崗位變動而調整之人員，必須先完成並通過三級安全培訓認證，方能正式履職。至於安全管理類職位，除上述要求外，尚需具備相關之專業資質或法定職業資格證書，始得任用。

第五章 攜手共贏

COMMUNITY ENGAGEMENT

We have always valued symbiosis and shared prosperity with the community, recognizing that sustained, stable community support is an indispensable pillar of corporate sustainability. Accordingly, we continue to expand our business footprint, actively increase local employment, and enhance tax contributions to help improve residents' living standards and provide long-term positive momentum for social development.

During the Reporting Period, the Group did not incur direct monetary contributions to community projects. Although we did not launch new community investment or public welfare projects this year, our commitment to community investment has not changed. The Group will continue to monitor local needs, proactively identify and assess suitable opportunities for collaboration and investment, and take timely action when resources and timing permit, continuously creating substantive and long-term positive impact for society.

報告期間，本集團並無直接向社區項目作出金錢捐助。縱使我們本年度未開展新的社區投資或公益專案，但我們對社區投資的重視從未改變。本集團將持續關注在地需求，主動尋找並評估合適的合作與投入機會，在資源與時機允許時及時行動，持續為社會創造實質而長遠的正向影響。
