Responding Mechanism for the Whole Process of Major Cases

此外，基於明確重大案件全流程應對機制，在應對總包不配合竣工備案的案件時，我們採取政法雙線並行的策略。在取得政府支持的同時，於法律層面上完善證據支撐，旨在推動法院做出先予執行的裁定，從而降低因訴訟程序過長而導致的逾期交付等客戶投訴風險。在針對工程款類糾紛案件，本集團通過積極舉證為項目核減工程款支付。我們通過發送函件和緊急情況書面說明等方式，不斷加強與政府、政法委、住建局和法院的溝通，並全力爭取法院對解除總包合同、移交場地、配合竣工備案、提交竣工驗收備案相關資料等訴訟請求的先予執行¹。

Besides, for clarifying the responding mechanism for the whole process of major cases, we adopted the parallel political and legal lines to deal with the risk of general contractor not cooperating with the completion of the project, and improved the legal evidence support while obtaining government support, striving to make the court prioritize to enforce the ruling, thereby reducing the risk of customer complaints such as late deliveries due to lengthy litigation procedures. In cases of disputes over construction fees, the Group actively provided evidence to reduce the payment of construction fees for the project. Zhongliang Holdings continuously strengthened the communication with the government, the politics and law committee, the Housing and Urban-Rural Development Bureau as well as the court by explaining through written documents such as letters and emergency statements, striving for the court's advanced execution¹ of the claims for termination of the general contract, handover of the site, cooperation with the completion filing and submission of materials related to the completion and acceptance filing.

¹ 先予執行，是指人民法院在受理案件後、終審判決作出之前，根據一方當事人的申請，裁定對方當事人向申請一方當事人給付一定數額的金錢或其他財物，或者實施或停止某種行為，並立即付諸執行的一種程序。

¹ Advanced execution refers to a procedure whereby a people's court, upon accepting a case and before a final judgement is rendered, on the basis of an application by a party, rules that the other party shall pay a certain amount of money or other property to the party making the application or shall carry out or cease a certain act, and shall immediately put it into execution.

中梁控股針對已識別的氣候實體風險，採取了相應的措施以降低其影響。對於洪水、颱風等極端天氣，我們及時發佈《關於加強在建項目自然災害風險防範工作的通知》等相關通知，要求項目在惡劣天氣來臨前進行安全檢查和預防，確保風險降至最低。

Zhongliang Holdings has taken corresponding measures to reduce the impact of identified climate physical risks. For extreme weather such as flood and typhoon, we have timely issued the Notice on Strengthening the Prevention of Natural Disaster Risks for Projects under Construction and other relevant notices, requiring safety inspection and prevention carried out for projects before severe weather to ensure that risks are minimized.

在2025年，為了應對節假日以及諸如雨雪、颱風等惡劣天氣的挑戰，全集團鄭重發文，強調各項目必須嚴格執行安全大檢查。我們的目標是徹底排查並消除安全隱患，確保風險得到及時有效的控制，從而將惡劣天氣對項目的影響降至最低限度。2025年7月颱風丹娜絲和竹節草相繼登陸，在區域常務副總和事業總的帶領下，各區域負責人員到施工現場開展安全大檢查，重點排查施工安全、用電安全、洪澇安全及颱風防護安全。負責人要求各項目部門，做好颱風來臨前的檢查和準備工作，施工用電線路檢查，排水通道檢查等，對於存在安全隱患的，要求相關項目部門當天整改完畢。

In 2025, in order to cope with the challenges of holidays and severe weather such as rain, snow and typhoon, the Group as a whole solemnly issued a document to emphasize that all projects must strictly implement safety overhaul. Our goal is thorough identification and elimination of safety hazards to ensure that risks are controlled in a timely and effective manner, thereby minimizing the impact of severe weather on projects. In July 2025, in response to the successive landfalls of Typhoon Danas and Typhoon Co-May, led by the regional executive deputy general manager and the business head, the responsible personnel for each region carried out safety overhaul for the construction site, with focus on construction safety, electricity safety, flood safety, and typhoon resistance safety. The responsible personnel required each project department to conduct inspection and preparation work before typhoon, line inspection for construction electricity and drainage channel checking, etc. For the potential safety hazards, the project department was required to complete the rectification on the same day.

III. GREEN DEVELOPMENT

風險管理

我們持續關注企業的可持續發展，通過情景分析，來評估氣候變化為企業帶來的風險和機遇，致使能及時發現問題並實施有效的應對措施。

氣候情景分析是一種前瞻性評估方法，通過模擬不同經濟發展模式和能源使用情景下的未來演變路徑，幫助企業識別潛在的氣候風險和機遇。該方法為我們決策提供科學依據，能協助制定有效的氣候應對方案，增強企業應對氣候變化的韌性。

對實體風險評估，我們根據政府間氣候變化專門委員會（「IPCC」）並選擇 Representative Concentration Pathway（「RCP」）2.6與8.5作為基準情景。在RCP 2.6的情景下，是假設政府、各產業鏈和社會各界通過立法約束、全球碳定價等綜合措施，能推動生產和消費模式的根本性變革，大幅削減溫室氣體排放，令最終全球溫度上升控制在1.5°C以內；而在RCP 8.5的情境下，政府、各產業鏈及相關機構未能實施充分而有效的政策及措施，導致溫室氣體排放持續上升，使到2100年全球平均氣溫上升超過4°C或更多。

Risk Management

We pay continuous attention to our sustainable development, and assess the risks and opportunities that climate change presents to us by using scenario analysis. This enables us to identify issues promptly and implement effective response measures.

Climate scenario analysis is a forward-looking assessment approach that helps companies identify potential climate risks and opportunities by simulating future pathways under different economic development models and energy use scenarios. This approach provides a scientific basis for strategic decision-making, supporting the development of effective climate response solutions and enhancing our resilience to climate impacts.

For physical risks assessment, we refer to the Intergovernmental Panel on Climate Change (“IPCC”) and adopt Representative Concentration Pathway (“RCP”) 2.6 and 8.5 as the baseline scenarios. Under the RCP 2.6 scenario, it is assumed that comprehensive measures such as legislative constraints and global carbon pricing implemented by governments, various industry chains, and all sectors of society are expected to drive fundamental changes in production and consumption patterns, thereby significantly reducing greenhouse gas emissions, and ultimately limiting the global temperature rise to within 1.5°C. In contrast, under the RCP 8.5 scenario, governments, various industry chains, and related institutions fail to implement sufficient and effective policies and measures, which lead to continuously rising greenhouse gas emissions, resulting in an increase in the global average temperature of 4°C or more by 2100.

對轉型風險評估，我們採用國際能源署（「IEA」）的「2050年淨零排放情景」（「NZE 2050」）與「既定政策情景」（「IEA SPS」）作為基準分析框架。NZE 2050情景是模擬國際社會為實現1.5°C控制目標所採取的快速減碳路徑，預期全球能源系統將在2050年前達到淨零排放的目標；而IEA SPS情景是各國政府僅考慮當前已實施或公佈的具體政策所產生的影響，預期全球平均氣溫上升遠超過1.5°C的控制目標。

For transition risks assessment, we adopt the International Energy Agency (“IEA”)’s “Net Zero Emissions by 2050 Scenario” (“NZE 2050”) and “Stated Policies Scenario” (“IEA SPS”) as the benchmark analysis framework. The NZE 2050 scenario simulates the rapid decarbonization pathway adopted by the international community to achieve the 1.5°C temperature control goal, projecting that the global energy system will achieve the net-zero emissions goal by 2050. In contrast, the IEA SPS scenario considers only the impact of specific policies that governments have already implemented or announced. Under this scenario, the projected rise in global average temperature significantly exceeds the 1.5°C control goal.

指標及目標

中梁控股以2030年前實現碳達峰，以及2060年前實現碳中和的「雙碳」戰略目標。中梁控股意識到企業長遠發展，關鍵在於應對氣候變化的過程中能保持前瞻性與營運韌性。我們每年會對溫室氣體排放及能源消耗進行全面的數據統計與分析，為綠色發展提供科學依據，並考慮自身業務發展及氣候變化趨勢，評估氣候變化帶來的風險與機遇，從而制定短、中及長期減碳的策略與目標。為減少我們的碳足跡，我們會定期檢討應對氣候變化措施的有效性，並更新應對策略，從而持續加強我們應對氣候變化的韌性。

中梁控股已積極開展節能減排行動，減少在辦公和營運過程中的能源和資源消耗，從而減少溫室氣體排放及廢棄物的產生。我們持續監測與氣候相關風險的各項指標，包括直接溫室氣體排放(範圍1)、間接溫室氣體排放(範圍2)及其他間接溫室氣體排放(範圍3)等，為應對氣候變化提供實際數據支持。中梁控股會持續評估及監控其業務價值鏈中的溫室氣體排放，優化相關數據統計及分析，以確保符合監管及披露要求。

Indicators and Targets

Zhongliang Holdings is guided by the national “Dual Carbon” strategic goals of achieving peak carbon emissions by 2030 and carbon neutrality by 2060. It recognises that long-term business success hinges on maintaining foresight and operational resilience in the face of climate change. We conduct comprehensive annual data collection and analysis of greenhouse gas emissions and energy consumption, providing a scientific basis for green development. Considering our own business development and climate change trends, we assess the risks and opportunities presented by climate change to formulate short, medium, and long-term carbon reduction strategies and targets. To reduce our carbon footprint, we regularly review the effectiveness of our climate change response measures and update our strategies, thereby continuously strengthening our resilience to climate change.

Zhongliang Holdings has proactively implemented energy conservation and emission reduction initiatives to minimize energy and resource consumption during office operations and business processes, thereby reducing greenhouse gas emissions and waste generation. We continuously monitor key indicators related to climate-related risks, including direct greenhouse gas emissions (Scope 1), indirect greenhouse gas emissions (Scope 2), and other indirect greenhouse gas emissions (Scope 3), providing empirical data to support our climate change response efforts. Zhongliang Holdings will continue to assess and monitor greenhouse gas emissions across its business value chain, optimising relevant data collection and analysis to ensure compliance with regulatory and disclosure requirements.

能源管理

中梁控股始終恪守《中華人民共和國環境保護法》、《中華人民共和國環境影響評價法》及《中華人民共和國節約能源法》等多項法律法規的要求，支持低碳能源發展，以推動綠色低碳運營模式的全面實現。

我們始終秉持「人與自然和諧共生」的核心理念，在日常運營中倡導高效用能及綠色出行，營造低碳環保的綠色辦公氛圍。

中梁控股在施工建設方面採取外包模式。因此，該部分碳排放量並未納入本公司的統計範疇中。但是在工程項目招標時，我們明確要求施工單位在能源節約、施工效率提高等方面採取有效措施，並要求在投標文件中予以回應。報告期內集團許多項目正處於關鍵的交付階段，確保每個項目都能夠做到提前交付策劃、靈活的穿插施工及科學搶工策略。在實施過程中，基於節能減排及降本增效的原則，在計劃鋪排、方案制定、進場驗收、過程監控、人員治理、風險控制、整改閉環等方面嚴格管控。以施工機械設備管控為例：

As the construction of Zhongliang Holdings' projects are outsourced, the carbon emissions of the construction are not counted as part of the Group's scope. However, we explicitly requested the construction unit to adopt effective measures in terms of energy saving and construction efficiency enhancement when tendering for the projects, and requested it to provide corresponding solutions in the tender documents. During the Reporting Period, many of the Group's projects were at a critical stage of delivery to ensure that each project is capable of achieving early delivery planning, flexible interwoven construction, and scientifically optimized rush work strategies. During the construction, we strictly control the planning, plan formulation, site inspection and acceptance, process monitoring, personnel management, risk control and closed-loop rectification based on the principles of energy saving, cost reduction and efficiency enhancement. Taking the control of construction machinery and equipment as an example:

施工前 Pre-construction

- 做好工程策劃，確保施工機械、周轉材料進場時間與施工進度相互匹配，保障最大化利用施工機械和周轉材料，盡量減少不必要的窩工和台班浪費。
Properly prepare the project planning to ensure that construction machinery and working materials are available to the construction site in accordance with the construction schedule, so as to maximise the utilisation of construction machinery and working materials and minimise unnecessary downtime and working hour wastage.

施工過程中 Under construction

- 及時跟蹤施工進度和後續工作計劃，督促施工單位及時溝通材料設備供應商，確保進場時間精準。針對重大施工機械提前做好手續報備並取得許可，在相關人員進場後，盡快安排投入使用。
Track the construction progress and follow-up work plan in a timely manner, and urge the construction unit to communicate with suppliers of materials and equipment in a timely manner to ensure timely construction. In respect of major construction machinery, procedures are prepared in advance for reporting and obtaining permits, and commence the process as soon as the relevant personnel are available.

施工完畢後 Post-construction

- 盡快安排相關人員退場，投入到下一個項目施工，在節約資源、提高施工效率的同時還可降低施工成本。
Arrange the relevant personnel shift to the next project as soon as possible upon completion, so that resources can be saved and construction efficiency can be improved while reducing construction costs.

3.3 綠色運營

中梁控股恪守《中華人民共和國環境保護法》、《中華人民共和國環境影響評價法》及《中華人民共和國水污染防治法》等法律法規，堅持綠色發展，並注重水資源高效利用和減少污染物排放。我們將環保理念融入日常運營與施工過程中，採用雨水回用以及多種污染控制技術，推進綠色運營管理建設。

3.3 GREEN OPERATIONS

Abiding by the Environmental Protection Law of the People's Republic of China, the Environmental Impact Assessment Law of the People's Republic of China, the Water Pollution Prevention and Control Law of the People's Republic of China and other laws and regulations, Zhongliang Holdings upholds green development and focuses on the efficient utilisation of water resources and the reduction of pollutant emissions. We incorporate environmental protection concepts into our daily operations and construction processes, adopting rainwater reuse and a variety of pollution control technologies to promote the construction of green operations and management.

三、綠色共建 III. GREEN DEVELOPMENT

水資源管理

中梁控股注重水資源管理，針對不同項目類型造成的水資源浪費，制定響應的水資源管理措施。報告期內，我們採取了源頭管理、資源循環和節水宣貫三管齊下的策略，全面提升水資源使用效率，減少水資源浪費，提升用水效益。本集團的用水主要來自市政供水和雨水回用，不涉及求取水源。報告期內，本集團在尋求適用水源方面並未遇到任何困難。

Water resources management

Zhongliang Holdings attaches importance to the management of water resources and has formulated corresponding water resources management measures to address the wastage of water resources caused by different types of projects. During the Reporting Period, we adopted a three-pronged strategy (i.e. source management, resource recycling and promotion of water saving) to comprehensively enhance the efficiency of water resources utilisation, reduce wastage of water resources and improve the effectiveness of water use. The Group's water mainly comes from municipal water supply and rainwater reuse, and does not involve sourcing water. During the Reporting Period, the Group did not encounter any difficulties in sourcing water that is fit for purpose.

源頭管理 Water management at source

- 強化水資源管理，確保施工作業結束後斷水
Strengthen water management to ensure water is switched off at the end of the work
- 使用達到中國水效標識達到2級及以上的節水衛生器具，減少水資源使用
Use water-saving sanitary appliances that meet the China Water Efficiency Level 2 or above to reduce water resource usage
- 管道安裝報警設施避免故障導致的水浪費
Installation of alarms to prevent water waste due to equipment failure

資源循環 Resource recycling

- 在工地上設置完善的雨水收集系統，將自然降雨進行集中收集，隨後被引入沉淀池，通過自然沉降過程去除其中的泥沙、懸浮物和其他雜質，初步淨化。水流經過多層過濾系統，包括物理過濾和可能的基礎化學處理，以確保水質達到安全使用標準，並儲存於專用的蓄水池中備用。利用加壓泵站將處理後的水資源輸送至工地各個需求點，用於混凝土養護、道路沖洗、車輛清洗等日常作業，同時也可作為建築施工過程中的臨時用水來源，如攪拌砂漿或降塵等，提升水資源回用率
On-site, comprehensive rainwater collection systems have been installed to harvest natural precipitation. The collected rainwater is channeled into sedimentation tanks, where suspended solids, sediment, and other impurities are removed through natural settling. The water then passes through multi-stage filtration systems, incorporating physical filtration and basic chemical treatment where necessary, to ensure it meets safety standards before being stored in dedicated reservoirs. Booster pump stations deliver the treated water to various points of use across the site for daily operations such as concrete curing, road flushing, and vehicle cleaning. It also serves as a temporary water source for construction activities, including mortar mixing and dust suppression, thereby enhancing the water reuse rate

節水宣貫 Water conservation promotion

- 在辦公區域張貼節水提示宣傳標識，提升員工節水意識
Post water-saving reminders in the office to enhance employees' awareness of water conservation

合規排放

中梁控股遵循《中華人民共和國固體廢物污染環境防治法》、《中華人民共和國水污染防治法》及《中華人民共和國大氣污染防治法》等法律法規，採取了一系列嚴格、高效的措施，持續加強對自身生產運營過程中產生的廢水、廢氣、廢棄物的精細化管理，致力於減少三廢的產生。同時，積極推動集團向綠色發展方向邁進。

在廢水管理方面，我們根據項目所在地政府的環保法規，及時辦理污水排放許可證，確保施工污水的合法合規處置。在建築工地，我們設置了封閉式洗車設備等，通過該設施有效防止了洗車過程中污水的飛濺。此外，在臨時生活區，我們也對生活污水進行深度處理，以滿足環保要求。

Compliant Emission

In compliance with laws and regulations such as the Law of the People's Republic of China on the Prevention and Control of Environmental Pollution by Solid Waste, the Law of the People's Republic of China on the Prevention and Control of Water Pollution and the Law of the People's Republic of China on the Prevention and Control of Atmospheric Pollution, Zhongliang Holdings has taken a series of strict and efficient measures to continuously strengthen the refined management on waste water, waste gas and waste generated from operation, and was committed to reducing the discharge of waste water, waste gas and wastes, while actively promoting the Group towards to green development.

In terms of waste water, we have applied for waste water discharge permits in accordance with the environmental regulations of the local government where the project is located, ensuring the legal and compliant disposal of waste water. At the construction site, enclosed car washing facilities and other facilities are set to effectively prevent splashing of sewage. In addition, in the temporary living area, we also carry out advanced treatment of domestic sewage to meet environmental protection requirements.

三、綠色共建

III. GREEN DEVELOPMENT

在廢氣管理方面，我們實行了不定期巡檢制度，以全面評估各項目的排放狀況。針對存在潛在風險的施工場地，我們堅決進行整改，並確保整改措施形成閉環，有效消除隱患。

In terms of waste gas, we have implemented an irregular inspection system to comprehensively evaluate the emission of projects. We will resolutely carry out rectification measures for construction sites with potential risks to ensure that the rectification measures are in place to effectively eliminate hidden dangers.

在廢棄物管理方面，本集團始終遵循相關政策要求，將建築垃圾和生活垃圾分類清運、統一處理。對於燈管、電池等危險廢棄物交由專業第三方處理或回收。同時大力推行施工材料的循環利用，從源頭上減少廢棄物的產生。

For waste management, the Group adheres to the requirement of relevant policies to classify and transport construction waste and household waste for unified treatment. Hazardous waste such as lamps and batteries will be delivered by the Group to or collected by professional third parties. In addition, the Group vigorously promotes cyclic utilization of construction materials to reduce the generation of waste from the source.

- 在搶交付到完工的過程中，通過將廢料和餘料贈與有裝修需求的業主，提高廢料和餘料的利用率，實現資源再利用，並加強企業與業主之間的關係。

During the rush to delivery and completion, we improve scrap and leftover utilization by donating them to owners in need of renovation. This achieves resource reuse and strengthens the company-owner relationship.

- 項目需對廢舊鋼筋和型鋼進行統一收集，之後交付給專業的鋼材回收處理公司進行處理，在確保合規性與安全的基礎上，最大限度地實現資源的再生循環與經濟效益最大化。

Discarded steel bars and shapes of projects are collected in a unified manner, and then delivered to a professional steel recycling company for processing. This maximizes the recycling of resources and the optimization of economic benefits on the basis of ensuring compliance and safety.

- 針對木材資源，項目需根據實際施工需求進行合理調整與再利用。例如，在模板支撐系統中拆除的木方經檢驗無誤後，可投入下次工程重複使用，對長度不足的短木方，則通過專業設備進行接長加工，延長其使用壽命，降低新材採購成本。

We make reasonable adjustment and reuse for wood resources according to the actual construction demand. For example, wooden formwork removed from the formwork support system, after passing inspection, can be reused in the next project. Short wooden pieces are lengthened using professional equipment to extend their service life and reduce the cost of purchasing new materials.

- 不可周轉的材料，通過修整後再根據需要另做他用。對於過期的水泥、砂石、廢棄建築垃圾等，在符合工程質量和環保要求的前提下，將被用於項目場地回填、臨時道路路基鋪設或場地平整等，從而減少外運處置量及環境負擔。

For non-recyclable materials, we reuse them as required after trimming. Expired cement, sand, gravel, and waste construction materials, subject to meeting project quality and environmental protection requirements, are used for site backfilling, temporary road base paving, or site leveling. This reduces the volume of materials requiring off-site disposal and lessens the environmental burden.

三、綠色共建 III. GREEN DEVELOPMENT

此外，中梁控股切實關注文明施工的重要性，我們積極採取多項舉措對施工過程中的噪聲、揚塵、水土污染等問題加強管理，盡最大可能減少對周邊環境、社區居民生活的影響。

In addition, by recognizing the importance of civilized construction, Zhongliang Holdings takes active measures to manage noise, dust, soil and water pollution during the construction process, for the purpose of minimizing the impact on the surrounding environment and community residents.

噪聲控制 Noise Control

- 晝間施工保持噪音在限制內

- 夜間施工則需經過多重審批
Night construction must be approved before implementation
- 實施施工場地封閉管理，有效減少外界噪音影響
Implementing enclosed management of construction sites to effectively reduce the impact of external noise

揚塵控制 Fugitive Dust Control

五、供應鏈管理

V. SUPPLY CHAIN MANAGEMENT

綠色採購

中梁控股大力倡導綠色採購理念，我們將環境保護、資源節約、安全健康等因素充分融入招採過程，定期評估供應商存在的經營情況、安全質量、環境及社會風險，優先選擇ESG表現優異的供應商。

在供應商准入階段，我們堅決排除存在ESG風險的供應商。同時，我們進一步加強了對供應商履約情況的評估，對於那些在ESG方面有負面影響的供應商，合作履約表現不佳的供應商，我們將開展供應商問詢和評估，嚴重者將被淘汰。

中梁控股在採購過程中，優先選取綠色低碳的原材料。對於地板等產品的採購，我們嚴格篩選行業排名前十的品牌廠家，確保其產品能耗與不良氣體排放符合國家規範與標準。同時，在採購高能耗材料如水泥、鋼筋時，我們選擇與積極承擔社會責任感的企業合作，以最小化採購活動對生態環境的影響。

During the procurement process, Zhongliang Holdings prefers green and low-carbon raw materials. For the procurement of flooring products, we strictly select the top ten brand manufacturers in the industry to ensure that the energy consumption and harmful gas emission of their products comply with national regulations and standards.
