Hazardous and Non-hazardous Waste Treatment

Commodity packaging materials, food waste, unsalable goods and daily office waste are the main non-hazardous wastes generated by the Group during the Reporting Period. The Group strictly complies with the relevant waste treatment policies. It stores recyclable wastes, such as used newspapers, magazines, paper, glass, metal, plastics centrally at the collection point, and they are disposed of by a qualified recycler regularly and irregularly; and it hands over reusable and unsalable goods to civil groups for transferring to those in need. We also establish corresponding measures for non-recyclable waste. Our hazardous waste is mainly ink cartridges for office printers. Below is the data on waste generated by the Group during the Reporting Period:

Types of waste 廢棄物種類	Unit 單位	2025 2025年
Total hazardous waste 有害廢棄物總量	tonne 噸	0.03
Hazardous waste intensity 有害廢棄物密度	kilogram/RMB'000 revenue 千克/千元人民幣收入	0.00
Total non-hazardous waste 無害廢棄物總量	tonne 噸	144.31
Non-hazardous waste intensity 無害廢棄物密度	tonne/RMB'000 revenue 噸/千元人民幣收入	0.00

We have implemented a waste management system to provide adequate guidelines for solid waste disposal to properly dispose of waste and avoid pollution. We stipulate that a small amount of garbage can be dumped into the trash can, while a large amount of garbage is directly transported to the refuse area. The cleaning staff collects the garbage in the garbage bin at regular intervals and transports it to the garbage station in a centralized manner every day. The garbage in the refuse area is treated by dryness and wetness, classified and stored separately. The refuse area is equipped with a cleaning device and chemical agents are sprayed regularly to prevent pests, pollution and odour.

We require all departments to make full use of resources, maximize the efficiency of the resources, eliminate waste and advocate strengthening the use of renewable resources, in an effort to raise employees' awareness of resource conservation and thus effectively reduce energy waste. We have also established corresponding measures and objectives in our shopping centres, malls and offices:

The Environment and Natural Resources

As environment preservation and natural resources protection is a part of the corporate responsibility of the Group, we have incorporated the concept of sustainable development into our development strategy, strive to minimize the negative environmental impact of our business operations, support the construction of ecological civilization and create an environmental-friendly company.

Due to the business nature of the Group, we inevitably consume natural resources and generate pollutants and greenhouse gas emissions, therefore the Group adopts different initiatives to better utilize natural resources and minimize environmental impacts, including but not limited to air emissions, waste generation, resource consumption and greenhouse gas emissions, etc.

The products are designed, built, refurbished, and operated in an ecological and resource-efficient manner

產品均以生態及節約資源的方向設計、建造、翻新及營運

Apply green building and construction technologies, such as using more ecofriendly building materials and more efficient equipment

採用綠色建築及施工技術，例如選用較環保的建材及更高效的設備

Provide and increase greening zone and facilities in our projects

在項目中設有及增加綠化區及綠化設施

Moreover, we learn from past experience to actively promote best green practices in different business environments such as construction sites, hotels, investment properties and offices. For instance:

- Having bespoke water management guidance for different operations which is also applicable to our tenants and customers; and
- Closely managing and improving indoor air quality by installing ventilation systems and conducting regular maintenance.

While strengthening the implementation of environmental protection measures, we are also concerned about employees' awareness of environmental issues. We organize various employee activities to promote eco-friendly messages and improve employees' environmental awareness. For example, on Arbor Day, we organized employees to participate in the projects we managed to carry out soil loosening, tree planting and watering. We hope that by participating in Arbor Day activities in person, employees will enhance their awareness of afforestation and ecological protection.

環境及天然資源

環境保育及天然資源保護為本集團的企業責任之一，因此我們將可持續發展融入於發展策略中，盡力減低業務運營對環境的負面影響，大力支持生態文明建設，打造環境友好型的健康企業。

基於本集團的業務性質，我們不可避免地會消耗天然資源並造成污染物及溫室氣體的排放，因此本集團採取不同措施，以更好地使用天然資源及減少對環境的影響，包括但不限於廢氣排放、廢棄物產生、資源消耗及溫室氣體排放等。

此外，我們汲取過往的經驗，積極在工地、酒店、投資物業以及辦公室等不同業務環境中推行最佳環保實務。例如：

- 就不同業務有明確的用水管理指引，而指引亦適用於我們的租戶及客戶；以及
- 密切監管，並透過安裝及定期維修通風系統改善室內空氣質素。

在加強執行環保措施的同時，我們亦關注員工的環保意識。我們會組織多項員工活動，宣揚環保訊息，藉此提高員工的環保意識。例如於植樹節，我們組織員工前往旗下項目進行鬆土、植樹和澆水等，希望藉著親身參與植樹節活動，提高員工對植樹造林和保護生態環境的意識。

Climate Change

As climate change has resulted in impacts of varying extents to the world, the Group also pays close attention to the risks and opportunities that it may bring, so that we can respond to it as soon as possible to safeguard the Group's sustainable development and the interests of its stakeholders.

Climate change has increased the frequency and intensity of extreme weather such as typhoons and rainstorms, and may also cause sea level rise, threatening the safety of the Group's properties, especially those located in coastal areas, as well as employees and customers. In this regard, the Group has formulated a policy on extreme weather management to cope with work and customer contingency arrangements under extreme weather conditions, giving priority to protecting the personal safety of employees and customers. In addition, we will incorporate climate change-related risk assessment procedures into new acquisitions to reduce the risk of property damage and develop new opportunities.

Coping with global warming and climate change is a shared global responsibility. We also implement energy management and improve energy efficiency in our operations to reduce waste of resources in order to reduce our direct and indirect greenhouse gas emissions and contribute to slowing down the global temperature rise.

Governance

The duties of the Board of Directors are set out in the "Sustainability Governance" section of this report. To ensure the Board's oversight capability, Board members are committed to maintaining sufficient ESG knowledge and skills, and continuously enhancing their professional competence through regular participation in ESG and climate-related training and the establishment of a professional advisory mechanism. With respect to climate-related issues, the Board plans to implement a mechanism to hold at least one special meeting on climate issues each year to set targets for climate-related risks and opportunities, monitor their progress, and adjust strategies in a timely manner to address climate change.

Risk Management

The Group integrates climate-related risks and opportunities into our overarching risk management framework to ensure they are systematically identified, assessed, managed, and monitored.

On an annual basis, the Group conducts an Enterprise Risk Assessment covering Reporting Scope. We identify climate-related risks and opportunities by benchmarking against global sustainability trends, peer disclosures, and leading frameworks, including:

- SASB Standards and the MSCI ESG Industry Materiality Map;
- The World Economic Forum Global Risks Report 2025; and
- The Recommendations of the Task Force on Climate-related Financial Disclosures (TCFD).

Each identified risk is assessed based on its likelihood and potential impact, taking into account the Group's adaptive capacity and the resources required for recovery. For specific climate-related risks, including increased costs associated with carbon pricing, and rising electricity expenses, the Group has adopted scenario analysis to evaluate potential financial impacts. To prioritise these risks, a quantitative scoring model developed by external consultants is applied and subsequently reviewed and refined by senior management to ensure alignment with operational realities and business context.

The Group manages prioritized risks in accordance with our established risk appetite through four primary strategies: mitigation, transfer, acceptance, and control. We periodically review our risk management processes and methodology to ensure continued effectiveness. During the Reporting Period, there were no material changes to our risk management processes compared to the previous year.

Metrics and target

Greenhouse Gas (GHG) Emissions

The Group major source of emissions includes fuel and purchased electricity. Emissions are calculated according to the GHG Protocol Corporate Accounting and Reporting Standard (2004). The Group have adopted the operational control approach for our organizational boundary, as it provides the most direct access to primary data. During the Reporting Period, there have been no changes to the measurement methodology, data inputs, or underlying assumptions and the emission data is as follow:

風險管理

本集團將氣候相關風險與機遇納入整體的風險管理框架，以確保該等風險與機遇得到系統性的識別、評估、管理及監察。

本集團每年開展涵蓋報告範圍的企業風險評估。我們透過對標全球可持續發展趨勢、同業披露及領先框架，識別氣候相關風險與機遇，其中包括：

- 永續會計準則委員會 (SASB) 的準則及 MSCI ESG 行業重要性地圖；
- 世界經濟論壇《2025年 global 風險報告》；及
- 氣候相關財務披露工作小組 (TCFD) 的建議。

每個已識別的風險均基於其發生的可能性及潛在影響進行評估，同時考慮本集團的適應能力及復原所需之資源。針對特定的氣候相關風險，包括因碳定價相關的成本增加以及電費上升，本集團已採用情境分析來評估其潛在財務影響。為對該等風險進行優先排序，本集團應用了由外部顧問開發的量化評分模型，隨後由高級管理層進行檢討及完善，以確保其符合營運實際情況及業務背景。

本集團根據既定的風險偏好，透過四大主要策略（即緩解、轉移、接受及控制）來管理已排定優先次序的風險。我們定期檢討風險管理流程與方法，以確保其持續有效。報告期間，我們的風險管理流程與去年相比概無重大變動。

指標及目標

以下是本集團在報告期間的溫室氣體排放數據摘要：

Notes:

- The calculation standards and methodologies for greenhouse gas emissions are based on "Appendix 2: Reporting Guidance on Environmental KPIs" of the "How to Prepare an ESG Report" published by the Hong Kong Stock Exchange, as well as the Greenhouse Gas Protocol.
- Scope 1 emissions included direct GHG emissions from Emission Source: the combustion of fuels in stationary and mobile sources, and the use of refrigeration. The Emission Factors adopted are based on "Appendix 2: Reporting Guidance on Environmental KPIs" published by the HKEX and guidance from the U.S. Environmental Protection Agency. The Global Warming Potential ("GWP") rates from the Intergovernmental Panel on Climate Change ("IPCC") Sixth Assessment Report (AR6).
- Scope 2 emissions include indirect greenhouse gas emissions from the consumption of purchased electricity. The emission factors for the Group's operations in Chinese Mainland are based on the documents published by the Ministry of Ecology and Environment of the People's Republic of China.
- The Group's Scope 3 greenhouse gas emissions categories included in the measurement cover Category 6: Business travel (aviation) as defined under the Greenhouse Gas Protocol. The emission factors adopted are based on the "Environmental Reporting Guidelines: Including mandatory greenhouse gas emissions reporting guidance" published by the Department for Energy Security and Net Zero of the United Kingdom.

Looking forward, we will continue to identify business activities that may have an impact on the environment and formulate corresponding improvement measures to further reduce the potential negative impact of our operations on climate change.
