PREPARATION PROCEDURES OF THE REPORT

CONFIRMATION AND APPROVAL

The Report was confirmed by the management and approved by the board of directors on 27 March 2026.

截至2025年12月31日止年度，本集團實現收益人民幣33,416.9百萬元；年內虧損人民幣7,539.0百萬元，母公司擁有人應佔虧損人民幣6,829.8百萬元。綜合考量行業環境、集團經營現狀及債務化解與可持續發展的資金需求，董事會不建議派發截至2025年12月31日止年度的末期股息。

2025年，中國房地產行業步入風險加速出清、政策精準托底、市場緩慢修復的全新發展階段。年內全國房地產開發投資完成82788億元，同比下降17.2%，行業整體仍處於深度調整周期。與此同時，政策端持續發力托底市場，金融層面持續優化保障性住房再貸款政策、下調房貸利率至3.1%，有效提振市場剛性與改善性購房意願；疊加21家出險房企完成1.2萬億元債務化解，行業流動性風險逐步收斂，市場預期穩步改善。自2024年以來的「止跌回穩」政策效應持續釋放，各級政府通過差異化信貸、存量資產盤活等多維度舉措，推動行業向「新發展模式」平穩轉型，為正榮地產在內的房企經營修復創造了良好的政策環境。

回顧過去一年，在行業深度出清的大背景下，本集團的經營推進與債務化解工作面臨多重考驗。面對複雜嚴峻的市場形勢，正榮地產始終堅守經營底線，以「保交付、穩運營、化債務、提效能」為全年核心工作方針，攻堅克難推動各項舉措落地見效，實現企業經營基本面的穩步修復，推動部分重難點項目成功重啟，全集團生產建設工作有序推進。

本集團始終將「保交付」作為企業發展的生命線，將保障業主合法權益放在經營工作的首要位置。2025年，正榮地產穩步推進全國各項目的建設與交付工作，全年累計交付7817套房源，交付面積達99萬方，交付規模位列全國典型房企第

For the year ended 31 December 2025, the Group recorded revenue of RMB33,416.9 million; a loss for the year of RMB7,539.0 million, and a loss attributable to owners of the parent company of RMB6,829.8 million. After comprehensive consideration of the industry environment, the Group's current operating conditions, as well as the capital requirements for debt resolution and sustainable development, the Board of Directors does not recommend the distribution of a final dividend for the year ended 31 December 2025.

In 2025, China's real estate industry entered a new development stage featuring accelerated risk clearance, precise policy underpinning, and gradual market recovery. During the year, national real estate development investment reached RMB8,278.8 billion, down 17.2% year-on-year, and the industry as a whole remained in a deep adjustment cycle. At the same time, continuous policy efforts were made to underpin the market. On the financial front, the relending policy for affordable housing was continuously optimized, and mortgage interest rates were cut to 3.1%, which effectively boosted the market's willingness to purchase homes for rigid and improvement needs. Coupled with the completion of RMB1.2 trillion in debt resolution by 21 distressed real estate enterprises, liquidity risks in the industry gradually eased, and market expectations improved steadily. The policy effect of "stabilization after decline" that has emerged since 2024 continued to unfold. Governments at all levels adopted multi-dimensional measures such as differentiated credit policies and the revitalization of existing assets, to promote the smooth transition of the industry to a "new development model", creating a favorable policy environment for the operating recovery of real estate enterprises including Zhenro Properties.

Looking back over the past year, against the backdrop of in-depth industry risk clearance, the Group's business operations and debt resolution efforts faced multiple challenges. In the face of complex and severe market conditions, Zhenro Properties consistently upheld the bottom line of operations, took "ensuring delivery, stabilizing operations, resolving debts, and improving efficiency" as the core working guidelines for the whole year, overcame difficulties to push for the implementation and effectiveness of various measures, achieved a steady recovery of the Company's operating fundamentals, facilitated the successful restart of some key and difficult projects, and advanced production and construction work across the Group in an orderly manner.

The Group has always regarded "ensuring delivery" as the lifeline of the Company's development, and placed the protection of homeowners' legitimate rights and interests as the top priority of its operations. In 2025, Zhenro Properties steadily advanced the construction and delivery of projects nationwide, delivering a total of 7,817 housing units throughout the year, with a total delivered floor area of 990,000 square meters, ranking

36名，以實打實的交付成果築牢市場與客戶信心。

產品與服務品質是企業立足行業的根本。過去一年，本集團持續深耕產品打磨與服務升級，以高品質交付與精細化服務滿足客戶核心居住需求。憑借多年來在產品打造與客戶服務上的深厚積澱，正榮地產客戶滿意度持續保持行業領先水平，品牌口碑在行業深度調整期進一步夯實，為企業後續銷售去化與市場拓展奠定了堅實基礎。

展望2026年，中國房地產行業將進入風險化解收尾、經營回歸常態、轉型加速推進的關鍵階段。中央層面持續釋放「穩樓市、防風險、促轉型」的明確政策信號，金融支持房地產平穩健康發展的力度將持續加大，保障性住房建設、城中村改造、存量資產盤活等領域將成為行業發展新主線，行業整體將向高質量、可持續方向穩步前行。正榮地產將緊抓行業轉型契機，迎難而上、主動作為，在鞏固經營穩定的基礎上，加快債務化解落地與業務轉型突破，全力推動企業實現高質量可持續發展。

最後，本人謹代表董事會，向一直以來給予正榮地產信任與支持的各位股東、廣大客戶、合作夥伴及社會各界朋友，致以最誠摯的感謝。同時，也向堅守崗位、並肩前行的全體員工，致以最衷心的敬意。前路雖有挑戰，但我們始終心懷信念，將以更堅定的決心、更務實的行動，全力化解經營風險、穩步推進轉型發展，竭力為各位股東創造長遠價值。

36th among key national real estate enterprises in terms of delivery scale. These tangible delivery results have consolidated market and customer confidence.

Product and service quality is the cornerstone of the Company's foothold in the industry. Over the past year, the Group continued to focus on product refinement and service upgrading, and met customers' core residential needs through high-quality delivery and refined services. With profound accumulation over the years in product development and customer service, Zhenro Properties' customer satisfaction has consistently maintained an industry-leading level, and its brand reputation was further consolidated during the industry's in-depth adjustment period, laying a solid foundation for the Company's subsequent sales de-stocking and market expansion.

Looking ahead to 2026, China's real estate industry will enter a critical phase of concluding risk resolution, returning to normal operations, and accelerating transformation. At the central government level, clear policy signals of "stabilizing the property market, preventing risks, and promoting transformation" continue to be released. Financial support for the stable and healthy development of the real estate sector will continue to strengthen, and areas such as affordable housing construction, urban village renovation, and revitalization of existing assets will become the new mainlines of industry development. The industry as a whole will steadily advance toward high-quality and sustainable development. Zhenro Properties will seize the opportunities brought by industry transformation, face difficulties head-on and take proactive actions. On the basis of consolidating operational stability, we will accelerate the implementation of debt resolution and achieve breakthroughs in business transformation, to fully drive the Company's high-quality and sustainable development.

In closing, on behalf of the Board of Directors, I would like to extend our sincerest gratitude to all shareholders, valued customers, partners, and friends from all sectors of society who have long granted their trust and support to Zhenro Properties. Meanwhile, I would like to express our most heartfelt respect to all employees who have stood fast in their posts and marched forward alongside us. While there are still challenges ahead, we always hold firm to our conviction. With firmer resolve and more pragmatic actions, we will make every effort to resolve operational risks, steadily advance transformation and development, and strive to create long-term value for all shareholders.

GREEN FINANCE

To deeply implement the philosophy of green development, Zhenro Properties established the “Zhenro Properties Green Bond Framework” (for details, please see the Group’s website (www.zhenrodc.com), only available in English) in alignment with the International Capital Market Association Green Bond Principles (GBP) in August 2020. This framework simultaneously aligns with several core goals of the United Nations 2030 Agenda for Sustainable Development, including Climate Action, and Sustainable Cities and Communities. The Company obtained a second party opinion issued by Sustainalytics, an independent ESG rating agency, and an opinion report on the green financing framework issued by Standard & Poor’s respectively, representing a crucial step towards promoting green finance, respectively on August 2020 and April 2021. Both reports confirmed that the framework fully complies with relevant international green bond standards. The proceeds raised under the framework are specifically earmarked for the refinancing of the Group’s green projects, covering five key areas: Green Buildings, Energy Efficiency, Renewable Energy, Pollution Prevention and Control, and Sustainable Water Management. The relevant funds have been allocated to star-rated green building projects across multiple provinces and cities in China, supporting the Group’s low-carbon, energy-efficient green transformation and development.

RESPONSE TO CLIMATE CHANGE

The impact of global climate change is becoming increasingly severe. Proactively addressing climate-related risks and accelerating the low-carbon transition have become core topics for real estate enterprises in achieving high-quality sustainable development. Zhenro Properties has consistently placed great emphasis on the potential impact of climate change on its business operations, industry development, and the broader economy and society. Strictly adhering to the climate-related disclosure requirements in Part D of the Environmental, Social and Governance Reporting Code of The Stock Exchange of Hong Kong Limited, the Company has fully integrated climate-related management into its Group ESG governance, business development strategy, and full value chain operations. Anchored in the national “Dual Carbon” strategic goals, Zhenro Properties systematically identifies, assesses, and manages climate-related risks and opportunities, demonstrating its core value of “Building Prosperity with Integrity” through a steady low-carbon transition.

Governance

The Board of Directors bears ultimate responsibility for the management and disclosure of climate-related matters of the Group, serving as the highest decision-making body for the oversight and management of climate-related risks and opportunities. Climate-related governance has been fully integrated into the Group’s overall ESG governance framework and deeply embedded in the Company’s business development strategy.

(1) Board Oversight Roles and Responsibilities

The Board of Directors of the Group coordinates and oversees the entire process of managing climate-related risks and opportunities, incorporating the supervision of climate-related matters into the Board’s dedicated ESG management framework. The core oversight roles and responsibilities, along with their implementation actions, are as follows:

- 1) The Board mandates that the ESG Working Group, in coordination with the Audit Committee, undertake the day-to-day supervision and implementation of climate-related matters, ensuring that the management team possesses the professional expertise and competence to address climate-related risks and seize climate-related opportunities. The Board regularly organizes special discussions on climate-related policies, industry trends, and management tools, continuously enhancing the governance body’s capacity for decision-making and oversight on climate-related issues.
- 2) The Board receives quarterly special reports from the ESG Working Group on climate-related risks and opportunities, and conducts an annual review of the Group’s climate-related management strategies, target setting, and implementation progress, ensuring that oversight of climate-related matters is characterized by regular and full-cycle continuity.

3) 董事會在集團重大項目投資、業務模式調整、供應鏈管理、財務規劃等重大交易決策與風險管理程序中，將氣候相關風險與機遇作為核心評估維度，系統性考量相關事項的權衡影響，確保氣候相關管理要求全面融入集團核心經營決策。

(2) 管理層執行機制

本集團依託已搭建的三級可持續發展管治架構，建立權責清晰、層級聯動的氣候相關管理執行機制，確保氣候相關管理要求全面落地到經營全流程：

- 1) 跨部門組建的ESG工作小組作為氣候相關事宜的核心執行主體，成員覆蓋工程管理、研發設計、運營管理、成本採購、財務資本、品牌管理等核心職能條線，全面負責氣候相關管理策略的落地執行、風險識別評估、日常監控預警等工作，定期向董事會同步工作進展與執行成效。
- 2) 各職能部門與下屬子公司作為氣候相關管理要求的一線執行主體，負責將集團氣候相關管理規範、風險防控要求，全面落實到項目設計、施工、交付、運維的各個業務環節，同步向ESG工作小組反饋一線氣候相關風險與執行情況。
- 3) 集團將氣候相關管理監控程序與現有內部管控、內部審計體系全面整合，依託「兩橫四縱」運營管理體系，實現氣候相關風險的全鏈條、全維度管控，確保管理動作的有效性與可追溯性。

3) In its major transaction decisions and risk management procedures — such as significant project investments, business model adjustments, supply chain management, and financial planning — the Board incorporates climate-related risks and opportunities as a core assessment dimension. It systematically considers the trade-offs and impacts of these matters, ensuring that climate-related management requirements are fully integrated into the Group's core operational decisions.

(2) Management Execution Mechanism

The Group, leveraging its established three-tier sustainable governance structure, has developed a climate-related management execution mechanism with clearly defined responsibilities and interconnected levels, ensuring that climate-related management requirements are fully implemented across the entire operational process:

- 1) The cross-departmental ESG Working Group serves as the core execution body for climate-related matters. Its members cover core functional areas such as Engineering Management, R&D and Design, Operations Management, Cost and Procurement, Finance and Capital, and Brand Management. The Working Group is fully responsible for implementing climate-related management strategies, identifying and assessing risks, conducting daily monitoring and early warning, and regularly reporting work progress and implementation results to the Board of Directors.
- 2) Various functional departments and subsidiaries, as the frontline execution entities for climate-related management requirements, are responsible for fully integrating the Group's climate-related management standards and risk prevention and control requirements into all business stages, including project design, construction, delivery, and operation and maintenance. They also provide feedback to the ESG Working Group regarding frontline climate-related risks and implementation status.
- 3) The Group fully integrates climate-related management monitoring procedures with its existing internal control and internal audit systems. Relying on the “Two Horizontals, Four Verticals” operational management system, the Group achieves full-chain, multi-dimensional management of climate-related risks, ensuring the effectiveness and traceability of management actions.

策略

於本報告期內，我們參照全球認可的主流氣候情景，依據香港聯合交易所有限公司《ESG報告守則》D部分要求，對集團運營活動開展全面評估，以此衡量在多種未來氣候條件下本集團的業務韌性。

本次評估採納聯合國政府間氣候變化專門委員會(IPCC)及綠色金融體系網絡(NGFS)的權威數據與核心假設，選取兩種差異顯著的氣候情景開展分析。在不同時間框架下，上述情景既覆蓋了氣候變化直接引發的物理風險，也充分兼顧了經濟向低碳轉型過程中產生的轉型風險。

儘管分析結果已呈現出集團潛在的風險敞口，我們亦清晰認知到，當前氣候科學仍處於持續發展階段，可用數據存在一定局限性，預測的精準度也受諸多因素制約，上述情況均會帶來一定程度的不確定性。本次分析所採用的核心參數及假設概要詳見下表。

Strategy

During the Reporting Period, the Group conducted a comprehensive assessment of its operational activities by referencing globally recognized mainstream climate scenarios, in accordance with the requirements of Part D of the ESG Reporting Code of The Stock Exchange of Hong Kong Limited, in order to evaluate the Group's business resilience under various future climate conditions.

This assessment adopted authoritative data and core assumptions from the Intergovernmental Panel on Climate Change (IPCC) and the Network for Greening the Financial System (NGFS), selecting two distinct climate scenarios for analysis. Under different timeframes, these scenarios covered both physical risks directly triggered by climate change and transition risks arising from the economic shift toward low-carbon development.

Although the analysis results revealed the Group's potential risk exposure, we also clearly recognize that climate science remains in a state of continuous development, available data have certain limitations, and the accuracy of predictions is subject to various constraints — all of which introduce a degree of uncertainty. A summary of the core parameters and assumptions used in this analysis is presented in the table below.

Zhenro Properties has systematically evaluated the financial impacts of climate-related risks and opportunities based on the authoritative climate scenarios from the IPCC (Intergovernmental Panel on Climate Change) and NGFS (Network for Greening the Financial System), specifically the high-emission 3°C scenario and the low-emission 1.5°C scenario. Quantitative analysis results indicate that the annual financial impacts associated with climate-related risks and opportunities are primarily manifested in two categories: proactive capital and operational expenditures including the application of green construction technologies, green building certification and energy-saving retrofits of under-construction projects; and potential costs arising from extreme weather events such as project schedule adjustments and on-site asset maintenance. In 2025, the company focused on upgrading green and low-carbon construction for its under-construction projects. It invested a total of approximately RMB12.8 million in facility renovations covering the promotion of prefabricated buildings, recycling of construction wastewater, and dust and noise control. A strategic investment of around RMB8.6 million was allocated to R&D of green building technologies and optimization of the standard system, with emphasis on refining the design specifications for two-star and three-star green buildings and the technical guidelines for sponge city construction, thereby consolidating the low-carbon competitiveness of its products. Additionally, the company established a special emergency budget of RMB3.2 million to enhance on-site emergency response capabilities and project resilience against physical risks including heavy rains, typhoons and extreme high temperatures. In 2026, building on the foundation of consolidating operational stability, the company will moderately increase the proportion of climate-related special budgets. Funds will be prioritized for green construction management of under-construction projects, basic energy-saving retrofits of delivered communities, and upgrading of the extreme weather emergency system, to continuously strengthen operational resilience and climate risk response capabilities.

空氣質量管理

正榮地產將保持良好的室內空氣質量視為各項業務運營的首要任務。為達成這一目標，我們定期對空調系統開展監測、清潔與維護工作，並將相關要求納入系統全周期維護計劃。我們針對性制定專項管控舉措，重點防控氮氧化物（NO_x）、硫氧化物（SO_x）以及可吸入懸浮顆粒物等對人體健康與生態環境有害的污染物。我們在運輸環節及建築管理全流程中全面採用更清潔的設備設施，全力削減污染物排放，強化空氣質量全流程管理，保障住戶健康，確保各項舉措完全符合項目所在地的監管要求。

Air quality management

Zhenro Properties regards the maintenance of good indoor air quality as a top priority across all its business operations. To achieve this goal, we regularly monitor, clean, and maintain air conditioning systems, and incorporate the relevant requirements into the full-cycle maintenance plan for these systems. We have implemented targeted control measures, with a particular focus on preventing and controlling pollutants such as nitrogen oxides (NO_x), sulfur oxides (SO_x), and respirable suspended particulates, which are harmful to both human health and the ecological environment. We adopt cleaner equipment and facilities throughout transportation processes and the entire building management process, striving to reduce pollutant emissions and strengthen the comprehensive management of air quality. These efforts are designed to safeguard the health of residents and ensure full compliance with regulatory requirements in the regions where our projects are located.

在日常運營過程中，我們通過車隊電動化升級、優化採購策略等方式，全力降低交通相關污染物排放，持續改善項目所在地空氣質量。旗下項目已全面推廣電動通勤及運營車輛，實現運營區域零尾氣排放，從源頭削減運營場景的空氣污染物，助力集團整體脫碳目標落地。與此同時，採購團隊通過整合訂單、優先選擇本地供應商、精準規劃配送路線與頻次等舉措，進一步減少交通相關排放。上述舉措不僅有效降低了項目的碳足跡、提升了場地空氣質量，更推動了正榮地產整體可持續發展目標的落地實踐。

In the course of daily operations, we are committed to reducing transportation-related pollutant emissions and continuously improving the air quality in the areas where our projects are located through measures such as upgrading our fleet to electric vehicles and optimizing procurement strategies. Electric commuter and operational vehicles have been widely adopted across our projects, achieving zero tailpipe emissions in our operating regions and reducing air pollutants at the source, thereby supporting the Group's overall decarbonization goals. Meanwhile, our procurement team further reduces transportation-related emissions by consolidating orders, giving priority to local suppliers, and precisely planning delivery routes and frequencies. These initiatives not only effectively reduce the carbon footprint of our projects and enhance on-site air quality, but also contribute to the practical implementation of Zhenro Properties' overall sustainability objectives.

我們通過常態化監測與工程化管控措施，包括在各項目物業全覆蓋安裝空氣淨化與新風通風系統，持續管控並提升室內空氣質量。旗下住宅項目通過例行巡檢與常態化監測管控室內空氣質量，在餐廳、多功能廳、健身房等重點公共區域全面安裝空氣淨化設備，必要時加裝洗滌式排風罩，提升排風淨化效能；商業及辦公項目的停車場均設置自動化智能通風系統，確保二氧化碳濃度穩定控制在監管標準限值內，保障辦公區域室內空氣質量顯著優於室外環境。

報告期內，我們嚴格遵守項目運營所在地的空氣質量相關法律法規，密切關注政策法規更新動態，定期開展內部合規審查，確保全業務流程持續合規。

展望未來，我們將持續深耕室內空氣質量提升、污染物源頭減排、可持續交通推廣等核心工作，同時強化員工專項培訓、深化供應商協同參與，持續提升相關信息披露透明度。各業務單元將協同發力，為住戶、客戶、員工及項目所在社區，打造更健康、更宜居的生活與經營環境。

綠色建築

正榮地產長期以來積極推動綠色建築的發展，制定了《正榮地產綠色建築速選配置表設計指引》以及住宅和公建業態項目《正榮地產綠色建築速選配置表》、《裝配式建築設計控制標準》等，為綠色建築設計評級和運行評價提供了施工及運營驗收指引。

規劃初期，正榮地產優先考量項目對周邊環境的潛在影響，建築排布順應原生地形、嚴控土方開挖，踐行低碳開發，同步保護原生植被、留存原生大樹、修複裸露土地。

截至本報告期止，正榮地產累計獲得22個中國綠色建築二星或三星設計標準證書，綠色建築總建築面積達240萬平方米。

Through routine monitoring and engineering-based control measures, including the full installation of air purification and fresh air ventilation systems across all our properties, we continuously manage and improve indoor air quality. In our residential projects, we conduct routine inspections and regular monitoring to control indoor air quality. Air purification equipment has been fully installed in key public areas such as restaurants, multi-function halls, and gyms, and where necessary, washing exhaust hoods are added to enhance exhaust purification efficiency. For commercial and office projects, parking areas are equipped with automated intelligent ventilation systems to ensure that carbon dioxide concentrations are consistently maintained within regulatory limits, thereby ensuring that indoor air quality in office areas is significantly better than outdoor conditions.

During the Reporting Period, we strictly complied with all applicable air quality-related laws and regulations in the regions where our projects are located, closely monitored policy and regulatory updates, and conducted regular internal compliance reviews to ensure continuous compliance across all business processes.

Looking ahead, we will continue to deepen our efforts in improving indoor air quality, reducing pollutant emissions at the source, and promoting sustainable transportation. At the same time, we will strengthen specialized employee training, deepen collaborative engagement with suppliers, and continue to enhance transparency in relevant disclosures. Our business units will work in synergy to create a healthier and more livable environment for residents, customers, employees, and the communities in which our projects are located.

GREEN BUILDINGS

Zhenro Properties has actively promoted the development of green buildings for a long time. It has formulated the Design Guidelines of Quick Selection Configuration List for Green Construction of Zhenro Properties, the Quick Selection Configuration List for Green Construction of Zhenro Properties and the Control Standard for Fabricated Buildings for residential and public construction projects, etc., which provide guidance on the construction and operation acceptance for green building design rating and operation evaluation.

During the initial planning stage, Zhenro Properties prioritizes consideration of the potential impact of projects on the surrounding environment. The building layout follows the native terrain, strictly controls earthwork excavation, and practices low-carbon development, while simultaneously protecting native vegetation, preserving native trees, and restoring bare land.

As of the end of this Reporting Period, Zhenro Properties has obtained a total of 22 two-star or three-star design certifications under the China Green Building Standard, with the total gross floor area of green buildings reaching 2.4 million square meters.

交付前，本集團項目團隊會針對客戶重點關注的質量問題開展常態化專項查驗，第一時間排查並化解各類潛在質量風險，為業主提前築牢居家品質防線。為實現項目工期與質量的雙維全程管控，集團以全周期產品打磨實現「精研」目標，以多環節深度介入落實嚴抓「品控」要求，由客關係線聯動設計、工程、成本等核心部門，聯合編製《正榮地產項目全周期產品質量管控工作指引》，覆蓋64大核心管控節點。本集團始終堅守以客為本的核心原則，站在客戶視角，對項目從在建工程質量到交付大區品質開展全周期、無死角的監控督查。

PRODUCT QUALITY ASSURANCE AND MANAGEMENT

Zhenro Properties consistently upholds its core operating philosophy of “integrity and virtue build continuous prosperity”, placing product quality and engineering control at the highest priority in the Company’s business development. In terms of compliance, the Group strictly adheres to relevant laws and regulations related to quality management, including the Product Quality Law of the People’s Republic of China, and the Law of the People’s Republic of China on Urban Real Estate Administration, ensuring that all control measures are implemented within a compliant framework. In terms of system development, the Group has established a comprehensive quality management system through the formulation of a series of end-to-end quality management policies, including the Zhenro Properties Construction Project Management System, the Management Standard for Quarterly Self-inspection of Projects of Zhenro Properties and the Management Measures for Accountability for Risks in Projects of Zhenro Properties. Meanwhile, the Group adopts “pre-event control, during-event control and post-event summary” as the core principles of engineering quality management, achieving full lifecycle quality supervision from design and procurement through construction and delivery to operation and maintenance. This provides standardized and systematic institutional support for end-to-end quality control.

Prior to delivery, the Group’s project teams conduct regular special inspections focusing on quality issues of key concern to customers, promptly identifying and addressing potential quality risks, thereby proactively establishing a solid quality assurance foundation for property owners. To achieve dual-dimensional control over both project timelines and quality, the Group pursues the goal of “precision refinement” through full-cycle product development, and implements stringent “quality control” requirements through in-depth intervention at multiple stages. The Customer Relations function, in collaboration with core departments such as Design, Engineering, and Cost, jointly developed the “Zhenro Properties Project Quality Control Guidelines for the Entire Cycle,” which covers 64 key control nodes. The Group consistently adheres to the core principle of customer-centricity, conducting comprehensive, end-to-end monitoring and inspection from the quality of projects under construction to the quality of delivered developments, all from the customer’s perspective.

正榮地產通過不定期推送工地日常實拍小視頻、舉辦工地開放日等多元形式，向業主直觀展示項目現場建設進度；在此基礎上，更以固定化、常態化的信息公示機制，保障業主知情權。在房屋交付等待期內，集團每月通過區域官方微信公眾號發佈《正榮家書》，全面展示項目當月建設進度、現場建設實景照片等核心信息，讓業主實時掌握家的建設動態。

在項目管控層面，各區域嚴格遵照總部制度要求，每月對在建工程開展聯合檢查，工作內容包括但不限於三層會驗、樣板點評、交付前質量巡檢等。

產品標準化管理

正榮地產通過持續深化產品標準化建設，有效強化了產品快速落地的全流程管控與支撐，顯著提升了項目整體運營效率。這一成果的核心支撐，是集團持續落地的標準化模塊管理體系，其產品標準化工作覆蓋全產品鏈條，全面包含產品線及IP、平面/立面、示範區/售樓處、建築、精裝、景觀、地庫等核心板塊。

Zhenro Properties employs various methods — such as regularly sharing short videos of daily construction site activities and hosting site open days — to provide property owners with a transparent view of project progress. Building on this foundation, the Company has established a standardized and regular information disclosure mechanism to safeguard property owners' right to know. During the period leading up to property delivery, the Group publishes the “Zhenro Family Letter” each month via regional official WeChat accounts, providing a comprehensive update on project progress for the month, including on-site construction photos and other key information, enabling property owners to stay informed in real time about the development of their homes.

At the project management level, each region strictly follows the policy requirements set by the headquarters and conducts joint monthly inspections of projects under construction. The scope of these inspections includes, but is not limited to, three-tier joint inspection, model review, and pre-delivery quality inspection.

Product Standardization Management

By continuously deepening its product standardization efforts, Zhenro Properties has effectively strengthened end-to-end management and support for rapid product implementation, significantly enhancing overall project operational efficiency. The core foundation of this achievement lies in the Group's sustained implementation of a standardized modular management system. The Company's product standardization covers the entire product chain, comprehensively encompassing key areas such as product lines and IP, plans/facades, demonstration areas/sales offices, construction, fine decoration, landscape, and underground parking.

Strict Project Management Systems to Ensure Product Quality

Zhenro Properties engages third-party professional evaluation agencies to conduct regular process assessments, delivery assessments, and unannounced flight assessments on project construction quality, using professional external oversight to effectively drive continuous improvement in the quality of construction works and project management standards. 《正榮地產建設工程管理制度》全流程管理

Whole Process Management under the Zhenro Properties Construction Project Management System

正榮地產工程自檢管理體系

Engineering Self-inspection Management System of Zhenro Properties

為強化各項目工程質量、進度、安全全鏈條管控，防範經營等各類風險，本集團制定《正榮地產工程風險追責管理辦法》，通過過程管控與監督考核機制督促項目落實工程管控要求，最終實現工程質量目標。考核體系圍繞工程質量、工程進度、工程安全三大維度構建：工程質量依據第三方過程/交付評估綜合得分、飛行檢查結果開展考核；工程進度重點考核首開區開工、主體達預售條件、腳手架落架等重大節點完成情況；工程安全以有無人員傷亡為核心考核依據。嚴格的過程追責與監督考核機制，是正榮地產長期實現高質量交付的根本保障。

To strengthen the end-to-end management of project quality, schedule, and safety, as well as to mitigate various operational risks, the Group has formulated the Management Measures for Accountability for Risks in Projects of Zhenro Properties. Through process control and supervision assessment mechanisms, these measures ensure that project teams implement engineering management requirements, ultimately achieving project quality objectives. The assessment system is built around three core dimensions: engineering quality, engineering schedule, and engineering safety. Engineering quality is evaluated based on third-party process/delivery assessment scores and unannounced inspection results. Engineering schedule focuses on the completion of key milestones, such as the start of the first construction zone, the achievement of pre-sale conditions for the main structure, and the removal of scaffolding. Engineering safety is assessed with the presence or absence of casualties as the core criterion. A rigorous process accountability and supervision assessment mechanism serves as the fundamental guarantee for Zhenro Properties to consistently achieve high-quality project deliveries over the long term.

為及時高效處理交付期快修服務與質量保障需求，本集團工程維保工作嚴格恪守及時性原則、主導與分工協作原則、分級分類管理原則、信息歸口原則四大核心準則。為實現維保全流程標準化管控，集團專門制定《正榮地產工程維保管理規範》，對工程維保的工作執行標準、責任部門權責劃分、報事事項及時完結要求等核心內容作出了明確、統一的規範，為全鏈條維保服務提供剛性制度支撐。

二零二五年，正榮地產操盤的合作項目均全面參與第三方過程評估與交付評估，依託專業評估機構的高效服務與公平結果，將評估數據深度融入績效管理體系，強化評估結果對項目品質的倒逼作用，進一步夯實合作項目的質量管控底線。為破解合作各方在企業文化、制度流程、操盤思路及產品標準上的差異，可能導致的溝通效率不足、項目推進滯後等行業共性痛點，正榮地產將全維度質量保障措施，全面落實到各類合作項目的工程全生命周期管理中，結合數字化管控手段，從項目工程管控全流程分別明確操盤與非操盤項目的關鍵管控節點，持續提升合作項目的風險管控精細化水平，契合二零二五年房地產合作項目全周期風險防控的行業趨勢。

To promptly and efficiently address fast-repair services and quality assurance needs during the delivery period, the Group's engineering maintenance work strictly adheres to four core principles: the principle of timeliness, the principle of leadership and coordinated division of labor, the principle of tiered and categorized management, and the principle of centralized information management. To achieve standardized control throughout the entire maintenance process, the Group has specifically formulated the Management Standard for Project Maintenance of Zhenro Properties, which provide clear and unified specifications for core aspects such as engineering maintenance execution standards, division of responsibilities among relevant departments, and the timely completion requirements for reported issues. This establishes a robust institutional foundation for end-to-end maintenance services.

In 2025, all cooperative projects operated by Zhenro Properties fully participated in third-party process assessments and delivery assessments. Leveraging the efficient services and impartial results provided by professional assessment agencies, the Group deeply integrated assessment data into its performance management system, strengthening the role of assessment outcomes in driving project quality improvements and further reinforcing the quality control baseline for cooperative projects. To address common industry challenges in cooperative projects — such as insufficient communication efficiency and delays in project progress caused by differences in corporate culture, institutional processes, operational approaches, and product standards among partners — Zhenro Properties implemented comprehensive quality assurance measures throughout the full engineering lifecycle of all types of cooperative projects. By combining these measures with digital management tools, the Group clearly defined key control nodes for both operated and non-operated projects across the entire project management process. This approach continuously enhanced the precision of risk management and control in cooperative projects, aligning with the 2025 industry trend of full-cycle risk prevention and control for real estate cooperative projects.

Response to Demands

The Group has established diversified channels for customer feedback, including the “Home Life Research Institute” mini program, 400 hotline, on-site reporting at the housing repair center. To ensure closed-loop handling of customer feedback throughout the process, the Group has issued internal policies such as the Complaint Handling and Warning Mechanism, the Maintenance Order Processing and Upgrade Mechanism and the Measures on Work Order Management and Escalation, which clearly define the channels for receiving customer requests, responsible departments, classification standards, and handling procedures. Zhenro Properties firmly believes that the long-term development of an enterprise is rooted in deeply addressing and reflecting on every pain point of its customers — this is the core principle behind the establishment of our comprehensive customer feedback management system.

For customer requests that remain overdue and unresolved or involve repeated complaints, the Group escalates such cases to the regional platform and headquarters for dedicated follow-up, ensuring efficient resolution and full closed-loop handling of customer complaints. For mass customer complaint incidents, the Group has established a regular proactive early warning mechanism and a dedicated coordination framework, issuing specialized handling guidelines that standardize the entire process — including response time, handling procedures, and closure criteria — across all stages. For routine customer complaint handling, the Group adheres to the core “2157 Principle”, which requires: “response within 2 hours”, “development of a plan within 1 day”, “notification of the progress within 5 days” and “7-day complaint closed loop”. This principle is supported by a corresponding assessment system covering five major timeliness assessments, and handling procedures strictly follow the standardized “9-Step Method”, ensuring the highest efficiency in delivering satisfactory outcomes for customers.

Leveraging digital and information technology, Zhenro Properties continues to enhance its marketing risk control and quality management capabilities, mitigating various marketing risks at the source. To strengthen its risk prevention framework, the Group has comprehensively upgraded its internal risk control system across five dimensions: risk awareness cultivation, risk control management mechanisms, green channels for risk control, strict enforcement of rules, and accountability for violations. Building on this foundation, the Group has established a robust marketing risk control mechanism, conducting layered reviews throughout the entire chain through three lines of defense. By setting up 17 core audit checkpoints for channels, the mechanism achieves comprehensive coverage of potential risk points throughout the entire channel risk control process.

In 2025, Zhenro Properties revised and updated seven marketing management policies and operating procedures for its marketing system, with a focus on systematically optimizing policies related to marketing milestone management, supplier procurement, expense control, sales office management, and property-for-debt transactions. This ensured the orderly and efficient progress of marketing management functions. Among these, the revisions to core documents — including the Customer Incident Stability Maintenance Guidelines, the Marketing Site Management Rules, Marketing Expense Management System, Rules on Management of Suppliers under Marketing System and Tendering and Purchase, the System on Management of Mortgage of Properties by Partners and the Large Order Underwriting Management System, the Marketing Milestone Management and Performance Management Rules — effectively enabled the implementation of refined and standardized management at sales office sites.
