3.4. Materiality Assessment

The Group conducts material ESG issue assessments to identify potential ESG risks that may impact business operations and formulates corresponding response measures. The identification process consists of the following steps:

Step 1: Establishing the List of Issues

The Group refers to standards such as those set by the Hong Kong Stock Exchange, the Sustainability Accounting Standards Board (SASB), and the Global Reporting Initiative (GRI), while incorporating best practices from leading domestic and international industries. By aligning with industry trends and our business characteristics, we systematically identify and analyze 17 ESG issues of stakeholder concern.

Step 2: Determining Materiality

Through internal interviews, thematic discussions, and external expert consultations, we conduct an in-depth assessment of each issue based on two key dimensions: its financial materiality and impact materiality. We construct a materiality assessment matrix to quantify and accurately determine key issues and their prioritization.

3.4. 重要性議題分析

本集團通過ESG實質性議題調查，識別對業務運營可能產生影響的ESG風險，並制定相應應對措施。識別過程包括以下步驟：

第一步：建立議題清單

本公司參考香港交易所、永續會計準則委員會（SASB）及可持續發展報告標準（GRI）等標準，並借鑒國內外領先行業的最佳實踐，結合自身業務特點及行業趨勢，系統識別及分析持份者關注的17個ESG議題。

第二步：確定重要性

透過內部訪談、專題研討及外部專家諮詢等方式，從「財務重要性」及「影響重要性」兩大維度對各議題進行深入評估，構建實質性評估矩陣，以量化方式準確識別關鍵議題，並據此確定優先順序。

Step 3: Forming the Assessment Conclusion

Upon review and confirmation of the final assessment results by the management, the Group has identified key ESG issues and provided detailed disclosures in this report accordingly.

第三步：形成評估結論

經管理層審閱與確認最終評估結果，本集團確定關鍵議題，並於ESG報告中詳細披露相關內容。

4. ENVIRONMENTAL PROTECTION AND RESOURCE MANAGEMENT

4.1. Environmental Emissions and Pollution Control

4.1.1. Dust Emissions

The Group continues to strengthen the management of dust and particulate emissions arising from construction activities, with the aim of minimising the potential impact of its projects on the surrounding environment and local communities. Dust generated during construction activities primarily originates from excavation works, site formation, loading and transportation of construction materials, as well as metal processing operations. Without appropriate management, such emissions may adversely affect air quality and the construction environment.

To effectively control dust emissions, the Group has established corresponding management measures based on the characteristics of individual projects and on-site operational conditions. Control measures are implemented through source prevention, operational management and routine inspections. For materials and work areas that are prone to generating dust, the Group adopts measures such as covering, enclosure and enclosed storage to minimise the dispersion of dust. Water spraying is carried out on construction roads, excavation areas and material stockpiles, taking into account weather conditions and site circumstances, to suppress dust and maintain adequate surface moisture. In addition, transportation vehicles are required to properly cover transported materials and keep vehicle bodies and wheels clean to reduce the risk of dust generation during transportation.

Furthermore, the Group continuously strengthens site environmental management and conducts regular supervision and inspections. Scattered materials and construction waste are promptly removed to prevent the spread of dust, particularly during windy conditions. Through the implementation of these dust control measures, the Group strives to minimise the environmental impact of its construction activities and promote the coordinated development of project construction and environmental protection.

4. 環境保護與資源管理

4.1. 環境排放與污染防治

4.1.1. 粉塵排放

本集團持續加強施工過程中的揚塵及粉塵排放管理，致力減少工程活動對周邊環境及社區的潛在影響。施工期間產生的粉塵主要來自土方開挖、場地平整、建築材料裝卸與運輸，以及金屬加工等工序。若管理不當，相關排放可能對空氣質素及施工環境造成影響。

為有效控制粉塵排放，本集團根據工程特點及現場作業情況制定相應管理措施，從源頭預防、過程控制及日常巡查等方面加強管控。對於易產生揚塵的物料及作業區域，集團採取覆蓋、圍擋及密閉存放等措施，減少粉塵外逸；針對施工道路、土方作業面及物料堆放區，視天氣及現場情況適時進行灑水降塵，保持地面濕潤；同時要求運輸車輛妥善覆蓋車載物料，並保持車身及車輪清潔，降低運輸過程中的揚塵風險。

此外，本集團持續加強施工現場環境管理及日常監督檢查，及時清理散落物料及建築廢料，避免因大風天氣導致粉塵擴散。透過落實各項防塵措施，集團致力將施工活動對環境的影響降至最低，推動工程建設與環境保護協同發展。

4.1.2. Air Emissions

Given the nature of the Group's business, no industrial production activities are involved. During the Reporting Period, the Group did not operate any stationary combustion facilities or other significant sources of air emissions. Air emissions generated by the Group mainly arose from limited fuel consumption by vehicles and routine operational activities. The overall level of emissions remained relatively low and had a limited impact on the environment. To minimise air emissions, the Group continued to strengthen the routine maintenance and servicing of vehicles and equipment to ensure efficient operation and optimal fuel combustion performance. The Group also sought to reduce vehicle idling time and unnecessary fuel consumption through proper transportation route planning and effective scheduling of construction activities, thereby lowering the emission of air pollutants.

In addition, the Group encourages its operational teams to enhance resource utilisation efficiency and continues to explore opportunities for adopting energy-saving and emission-reduction technologies and management practices. Through these efforts, the Group strives to reduce the environmental impact of its operations and support sustainable development.

4.1.3. Waste Management

The Group places great importance on waste management throughout its operations and is committed to minimising the environmental impact of waste through source reduction, waste segregation, recycling and proper disposal practices. During the Reporting Period, the waste generated by the Group mainly comprised construction and renovation waste arising from project activities, general office waste, and a small quantity of chemical waste generated during maintenance and repair works.

4.1.2. 廢氣排放

本集團的業務性質不涉及工業生產活動，於報告期內並無固定燃燒設施或其他重大廢氣排放源。集團產生的廢氣排放主要來自少量車輛燃料消耗及日常營運過程，相關排放水平較低，對環境造成的影響有限。為減少廢氣排放，本集團持續加強車輛及設備的日常維護保養，確保其保持良好運行狀態及燃燒效率；同時合理規劃運輸路線及施工安排，減少車輛空轉及不必要的燃料消耗，從而降低大氣污染物排放。

集團亦鼓勵營運團隊提升資源使用效率，並持續關注節能減排相關技術及管理措施的應用機會。集團致力通過相關舉措，減少營運對環境的影響，助力可持續發展。

4.1.3. 廢棄物管理

本集團重視營運過程中的廢棄物管理，並致力透過源頭減量、分類回收及合規處置等措施，降低廢棄物對環境造成的影響。報告期內，本集團產生的廢棄物主要包括建築及裝修工程產生的建築廢料、一般辦公廢棄物，以及少量維修保養過程中產生的化學廢物。

To strengthen waste management, the Group has established waste segregation and collection facilities at project sites and encourages the sorting and recycling of recyclable materials. Different types of waste are properly stored and managed to prevent environmental pollution resulting from improper handling. Construction waste is collected and transported by qualified contractors to designated treatment facilities for disposal in accordance with applicable regulatory requirements. For chemical waste, the Group strictly complies with relevant laws and regulations and engages licensed waste collectors for the collection, transportation and treatment of such waste, ensuring that the entire disposal process is conducted in accordance with regulatory requirements. Through these measures, the Group seeks to enhance waste management performance, reduce environmental impacts associated with waste generation and disposal, and support sustainable business operations.

為加強廢棄物管理，本集團於各項目現場設置分類收集設施，鼓勵對可回收物料進行分類及回收利用，並妥善存放各類廢棄物，防止因管理不善而造成環境污染。對於建築廢料，本集團按照相關法規要求交由合資格承辦商收集及運送至指定處理設施進行處置；對於化學廢物，則嚴格遵守相關法例規定，由持牌收集商負責收集、運輸及處理，確保整個處置過程符合監管要求。透過這些措施，本集團旨在提升廢棄物管理績效，減少廢棄物產生和處置對環境的影響，並支持可持續的業務運營。

4.1.4. Environmental Noise Control

The Group places importance on noise management during both construction and operational activities and has implemented appropriate measures to minimise potential impacts on the surrounding environment and local communities. During the Reporting Period, the Group controlled noise generation through measures such as proper scheduling of construction activities, regular maintenance of machinery and equipment, and requiring construction personnel to comply with relevant operational procedures and requirements. In addition, the Group closely monitored site conditions and sought to minimise disturbances caused by high-noise activities to nearby residents and other stakeholders wherever practicable. Through ongoing noise management and monitoring efforts, the Group strives to reduce the environmental impact of its operations and maintain harmonious relationships with the communities in which it operates.

4.1.4. 環境噪音控制

本集團重視施工及營運過程中的噪音管理，並採取適當措施減少對周邊環境及社區的影響。報告期內，集團透過合理安排施工時間、定期維護機械設備及要求施工人員遵守相關作業規範等方式控制噪音產生。同時，集團密切關注施工現場情況，盡量減少高噪音工序對附近居民及其他持份者造成的滋擾。透過持續的噪音管理和監測工作，本集團致力於減少其營運對環境的影響，並與其營運所在社區維持和諧的關係。

4.2. Resource Use and Energy Management

4.2.1. Energy Consumption

The Group's energy consumption primarily arises from fuel usage associated with the transportation of construction materials and electricity consumption in office operations. As utilities at project sites, including electricity and water, are centrally managed by property owners or main contractors and are not within the Group's operational or financial control, the Group is unable to obtain the relevant consumption data for inclusion in its reporting scope.

Nevertheless, the Group places importance on energy efficiency and actively promotes energy-saving practices in its daily operations. Employees are encouraged to switch off lighting, computers and other office equipment when not in use to avoid unnecessary energy consumption. In addition, the Group seeks to improve resource utilisation efficiency and reduce energy consumption through the optimisation of transportation arrangements and operational processes. Through these measures, the Group remains committed to enhancing energy management performance and promoting the responsible use of resources in support of sustainable development.

4.2.2. Water Resource Management

The Group's water consumption is primarily associated with construction activities at project sites and daily office operations, including dust suppression, equipment cleaning and vehicle washing. As water supply and consumption at project sites are principally managed by property owners or main contractors, the relevant water consumption data are outside the Group's operational and financial control and are therefore not included within the reporting boundary of this Report.

4.2. 資源使用與能源管理

4.2.1. 能源使用

本集團的能源消耗主要來自建築材料運輸過程中的燃料使用，以及辦公場所的日常用電。由於項目地盤的水電資源由業主或總承建商統一管理，並不屬於本集團的營運或財務控制範圍，因此未能取得相關耗能數據並納入統計。

儘管如此，本集團重視能源使用效率，於日常營運中鼓勵員工養成節約能源習慣，包括在非使用時段關閉照明、電腦及其他辦公設備，減少不必要的能源消耗。同時，集團亦透過合理安排運輸及作業流程，提高資源使用效率，減少營運過程中的能源消耗。透過這些措施，本集團將持續致力於提升能源管理績效，並促進負責任地使用資源，以支持永續發展。

4.2.2. 水資源管理

本集團的用水主要與工程項目的施工活動及辦公室日常營運相關，其中包括工地除塵、設備及車輛清潔等用途。由於項目地盤的供水及用水管理主要由業主或總承建商統一負責，相關用水數據不屬於本集團營運或財務控制範圍，因此未納入本報告統計範圍。

In its daily operations, the Group places emphasis on the prudent use of water resources. Where applicable, water is used to support dust suppression and cleaning activities at project sites in order to minimise the environmental impact of construction works on surrounding areas. Within office premises, the Group encourages employees to develop water-saving habits and regularly inspects water supply facilities to ensure their proper operation, thereby preventing unnecessary water wastage resulting from equipment malfunction or leakage. Through these measures, the Group seeks to promote the efficient use of water resources and support environmentally responsible operations.

在日常營運中，本集團注重合理使用水資源，並於適用情況下配合工地灑水降塵及清潔作業安排，以減少施工活動對周邊環境的影響。在辦公場所方面，集團鼓勵員工養成節約用水習慣，定期檢查供水設施運行情況，避免因設備故障或滲漏而造成不必要的水資源浪費。透過這些措施，本集團力求促進水資源的有效利用，並支持對環境負責的運作。

Water Consumption 水資源使用	2026 二零二六年	2025 二零二五年	Unit 單位
Water consumption 水消耗量	0	13.00	Cubic metres 立方米
Intensity (by Employee) 強度（按僱員）	0	0.39	Cubic metres/Employee 立方米／僱員

4.2.3. Packaging Materials Consumption

Given the nature of the Group's business operations, the Group does not use packaging materials for finished products. Accordingly, the relevant key performance indicator is not applicable to the Group.

4.2.3. 包裝材料消耗

鑑於行業特性，本集團業務不涉及任何成品包裝材料的使用，因此相關關鍵績效指標不適用。

4.3. Environment and Natural Resources

The Group's business operations do not involve the extraction of natural resources. We adhere to the principles of sustainable development and are committed to promoting the sustainable use of resources, ensuring that our business growth aligns with environmental protection. Through the implementation of various environmental management measures, the Group continuously monitors and minimises the impact of its operational activities on the ecological environment, actively fulfilling its corporate environmental responsibility to maintain the harmonious development of the environment and society.

4.3. 環境及天然資源

本集團在業務運作過程中，並不涉及自然資源之開採行為。我們堅守可持續發展原則，致力於推動資源的永續利用，確保業務發展與環境保護協調一致。透過落實各項環保管理措施，本集團持續監控並精簡營運活動對生態環境的影響，積極履行企業環境責任，以維繫環境與社會的共融發展。

4.4. Climate Change Response

4.4.1. Governance

The Group places great emphasis on global climate change trends and their potential impact on the operating environment. To systematically address the relevant challenges, the Group has established a well-defined, multi-tiered climate change management framework. The Board of Directors, as the highest decision-making body for climate management, is responsible for overseeing and approving climate-related strategies and for integrating climate considerations fully into the Group's risk management system. Management is responsible for implementing the established policies, and for continuously monitoring and assessing extreme weather events, changes in policies and regulations, and market transition dynamics. The Group remains aligned with the framework of the Task Force on Climate-related Financial Disclosures (TCFD), strives to enhance transparency in climate-related disclosures, and embeds low-carbon operational principles into its day-to-day activities, thereby supporting the robust achievement of the Group's sustainable development goals.

4.4.2. Strategy

The Group has established a mechanism for identifying climate-related risks and opportunities, making it a core element of its strategy formulation, financial planning, and risk control. In terms of risk categorisation, the Group continuously monitors transition risks and physical risks. The former focuses on the policy, regulatory, technological, market, and reputational pressures arising from the global transition to a low-carbon and climate-resilient economic system; the latter addresses the impacts of rising global temperatures and extreme weather events, including acute risks such as typhoons and floods, as well as chronic risk factors such as rising temperatures and sea levels. Through close communication and collaboration with its various business units, the Group continues to enhance its climate risk impact assessments, ensuring that all business developments remain aligned with climate resilience.

4.4. 應對氣候變化

4.4.1. 管治

本集團高度重視全球氣候變化趨勢以及其對營運環境帶來的潛在影響。為系統性回應相關挑戰，集團構建了具備明確層次的氣候變化管理架構。董事會作為氣候管理最高決策機構，負責統籌審批氣候相關策略，並將氣候因素全面整合到集團風險管理體系中。管理層則負責執行既定方針，針對極端氣候現象、政策法規變更及市場轉型動態進行持續監測與評估。本集團持續對標氣候相關財務信息披露工作組（TCFD）框架，致力於提升氣候相關信息披露透明度，並在日常業務中貫徹低碳營運理念，以支持集團可持續發展目標的穩健落實。

The Group's business services primarily cover main contractors of infrastructure, commercial and residential building projects in Hong Kong, encompassing both public and private sectors. Based on operational capacity, project progress, resource allocation, cost effectiveness and engineering technical difficulty, the Group subcontracts certain processes to qualified local subcontractors.

To ensure the quality of supply chain management, the Group implements a rigorous admission, assessment and monitoring mechanism. All partners to be included in the approved list are subject to detailed evaluations and annual performance audits, with occupational safety performance being a key focus of the review. Partners are required to fully comply with applicable laws and regulations, contractual obligations and the Group's internal work rules. Should a partner fail to meet safety requirements or fulfil contractual obligations, the Group will take disciplinary action to ensure that the partner's conduct aligns with management standards.

Regarding the procurement of safety equipment, the Group operates an "Approved Supplier List" management system, which clearly specifies recommended procurement sources. All safety equipment procurements strictly follow the established list procedures; where special technical specifications are required, additional review procedures must be completed. 7. PRODUCT RESPONSIBILITY

7.1. Product Quality and Safety

The Group regards project quality control as a core pillar of its business operations. At the project bidding stage, we are typically invited by clients to participate in tenders and, prior to submission of tender documents, perform a rigorous preliminary assessment of the relevant terms and requirements. When a tender is accepted, the Group formally enters into a contract with the client, clearly defining the scope of rights and responsibilities. Depending on the scale and technical complexity of each project, the Group allocates a corresponding core project team to ensure that technical and management resources are precisely aligned with project needs.

During project execution, quality assurance is jointly overseen by the project team and the client's representatives, thereby ensuring that each process meets delivery standards. Acceptance is carried out only after testing and verification are completed, with no outstanding defects left unaddressed. Construction work is primarily performed by the Group's directly employed workers or rigorously screened subcontractors, and is subject to strict internal supervision throughout the entire process. Project managers regularly hold progress review meetings to ensure that clients are kept promptly informed of project milestones and material risk issues. The Group also continuously monitors various performance indicators and, through regular communication mechanisms, ensures that project management remains closely aligned with client expectations in order to maintain a high level of construction quality.

- 辦公室清潔及健康與安全作業

With respect to blasting operations, the Group strictly complies with the *Dangerous Goods Ordinance* and relevant regulatory requirements. All blasting works are carried out only after obtaining valid certificates, licences and permits issued by the Mining Division of the Civil Engineering and Development Department, and the Group rigorously verifies suppliers' and relevant departments' licences for the storage and transport of explosives to ensure compliant and safe operations.

針對炸藥作業，集團嚴格遵守《危險品條例》及相關法規要求。所有爆破工程均於取得土木工程拓展署礦務部核發之合法證書、執照及許可證後始行進行，並嚴格查核供應商與相關部門的爆炸品儲存及運輸牌照，確保作業過程合規安全。

8.3.3. Safety Information Communication and Promotion

The Group has established proactive information exchange platforms through notice boards placed in prominent locations at worksites, internal newsletters and suggestion boxes. Key information conveyed includes: the Group's integrated management policy statement, the latest revised safety procedures, minutes of Health and Safety Committee meetings, guidance documents issued by government authorities, accident statistics, and other health-related maintenance matters, all aimed at strengthening safety awareness among all personnel through transparent information flow. Before execution of any project, a comprehensive safety plan covering worksite activity identification, planning, execution, monitoring and auditing must be prepared, ensuring that health protection for construction personnel is implemented in compliance with legal requirements, industry standards and contractual obligations.

8.3.3. 安全資訊溝通與推廣

集團透過工地顯眼位置的告示板、內部快訊及意見箱，建立主動式的資訊交流平台。傳遞的關鍵內容包含：集團綜合管理政策聲明、最新修正的安全程序、健康與安全委員會會議紀錄、政府主管機關發布的指導文件、意外事故統計數據以及其他攸關健康的維護事項，旨在透過透明的資訊流通，強化全體人員的安全意識。所有項目在執行前，均需制定涵蓋工地作業識別、規劃、執行、監察及審核的完整安全計劃，確保在符合法例、行業規範及合約要求的前提下，落實對施工人員的健康保護。
