Purpose and Objective

Grand Ming Group Holdings Limited (“**Grand Ming**” or the “**Company**”, together with its subsidiaries the “**Group**” or “**We**”) is pleased to present the Environmental, Social and Governance (“**ESG**”) report (the “**Report**”) for the year ended 31 March 2026 (the “**Reporting Period**” or “**FY 2025/26**”) to our stakeholders. Reporting Standards

This Report has been prepared in accordance with the disclosure requirements applicable for FY 2025/26 under the Environmental, Social and Governance Reporting Code (the “**ESG Reporting Code**”) as set out in Appendix C2 to the Rules Governing the Listing of Securities (the “**Listing Rules**”) issued by The Stock Exchange of Hong Kong Limited (the “**Stock Exchange**”).

Materiality Assessment

To determine ESG issues that are the most relevant to our business and our stakeholders, in addition to the above regular communication channels, the Group performed a materiality assessment with the support of an independent sustainability consultant during the Reporting Period. The results of the materiality assessment and relevant ESG issues are regularly discussed and reviewed by our ESG Working Group and the Board.

The details of our materiality assessment are as follows:

Materiality Matrix

The materiality matrix presented below summarises the relative importance of the 24 ESG-related material issues to both stakeholders and the Group's business continuity and development. Occupational Health and Safety

We put the health and safety of our employees as a top priority and provide all employees with a safe working environment. As such, occupational health and safety management systems and policies have been implemented in both the building construction and data centre businesses and are certified to be in compliance with the requirements of ISO 45001:2018 standard.

In alignment with the principle of 'safety comes first', all construction workers undergo mandatory safety induction training prior to commencing on-site work, including fire hazards, safe production practice and proper equipment usage. Our project managers regularly organise specialised safety seminars tailored to specific work activities to enhance workforce safety awareness. The Group ensures all site workers are equipped with appropriate personal protective equipment, including safety helmets, protective eyewear, safety footwear, hearing protection, and respiratory equipment. Meanwhile, our safety officers maintain continuous oversight of all construction site operations, and are responsible for enforcing safety standards among the Group's and subcontractors' employees. Monthly on-site safety meetings are held for each construction project, where the project team and subcontractor representatives jointly review safety standard implementation and compliance status. To incentivise safety performance, the Group awards a discretionary bonus to our on-site staff and workers of the construction project if no summons are issued from government authorities for breach of laws, rules and regulation in relation to safety for that particular project.

The technical director of the construction segment conducts monthly safety inspections across all project sites, with any identified safety issues requiring immediate rectification.

At the corporate level, we have established a safety committee comprising the director, technical director and project manager of the construction segment, which convenes quarterly meetings to review safety policies, monitor safety system implementation, and assess its performance. Meanwhile, the technical director would report the findings of the above-mentioned site safety inspection and the project manager would report the measures taken to resolve the safety issue at the meeting.

職業健康與安全

我們始終將僱員的健康與安全放在首位，為所有僱員提供安全的工作環境。因此，我們的樓宇建造及數據中心業務已實施職業健康安全系統以及政策，該系統經認證符合ISO45001:2018標準的要求。

按照「安全第一」的原則，所有建築工人在開始現場施工前必須接受強制性安全入職培訓，內容涵蓋火災隱患、安全生產規範及設備正確使用方法。我們的項目經理定期針對特定工種舉辦專項安全研討會，以提高工人的安全意識。本集團確保所有現場工人配備適當的個人防護裝備，包括安全帽、護目鏡、安全鞋、聽力保護裝置及呼吸防護設備。同時，我們的安全主任持續監督所有施工現場作業，負責對本集團及分包商的僱員執行安全標準。每個建築項目每月均召開一次地盤安全會議，由項目團隊與分包商代表一起檢討安全標準的執行及遵守情況。為激勵安全表現，倘個別建築項目未因違反安全相關之法律、條例及法規而收到政府部門發出的傳票，本集團將發放酌情獎金予該項目之本公司地盤人員和工人。

建築分部技術總監對所有項目地盤進行每月安全巡查，發現的安全問題須立即糾正。

在公司層面，我們已成立由建築分部董事、技術總監及項目經理組成的安全委員會，委員會每季度召開會議，檢討安全政策、監督安全系統實施及評估其表現。同時，會上技術總監會匯報上述安全巡查之發現，而項目經理則會報告解決安全問題而採取的相應措施。

The Group strives to strictly abide by the relevant laws and regulations related to safety management in Hong Kong. We regard staff development as one of the most important drivers for the Group's long-term development. To support continuous learning and professional growth, the Group has established training policy that provides a structure framework for employee development and training opportunities. We encourage employees to study by themselves through pursuing degree-based academic education and attending various professional seminars and training courses, taking various professional qualification examinations so as to update their professional knowledge. The Group would in general reimburse employees part of the tuition fees.

Community Engagement

The Group is committed to fostering community spirit and supporting underprivileged groups. Our community engagement policy guides our approach to community involvement and charitable initiatives. Through donation drives, we aim to improve the daily lives of disadvantaged families, alleviate their financial burdens, and encourage those striving for a better future.

In alignment with our commitment to corporate social responsibility, the Group actively encourages our employees to engage in volunteer activities, serving as a positive force for the wider community and fostering continuous investment in its well-being.

During the Reporting Period, we cooperated with the Christian Family Service Centre ("CFSC") and collected unused or excess daily necessities (such as backpacks, mobile phones, stationery, casual clothes) from our employees. These daily necessities were then donated to families and people in need via CFSC.

Strategy

During the Reporting Period, we deepened the breadth and depth of our climate strategy planning, assessed both the financial and non-financial implications of climate change across our business operations, supply chain and market environment, thereby further enhancing our climate resilience.

The table below summarises the material climate-related risks and opportunities we have identified, their potential impacts on our business model and value chain, as well as our response actions and transition measures over three distinct time horizons. We continue to apply time horizons that are aligned with our strategic decision-making and planning, and global and/or national best practices. However, given that data availability and quantitative methodologies are still in a stage of continuous development and evolution, the Group will conduct ongoing monitoring and, to the extent feasible, disclose where climate-related risks and opportunities are concentrated in its business model and value chain. With the progressive advancement of relevant research and analytical approaches, the Group expects to enhance its understanding of climate risks and opportunities, thereby enabling a more comprehensive identification of such risks and opportunities involved in its core business operations.

Risk Management

The Board bears ultimate responsibility for formulating and implementing the risk management framework. Supervised by the Board and assisted by the ESG Working Group, we have conducted sustainability risk and opportunity assessments, including climate-related risks and opportunities, in addition to assessing their potential impacts and likelihood, and prioritise them accordingly. Based on the assessment results, the Group has developed corresponding mitigation measures to enhance our risk response capability and climate resilience.

Metrics and Targets

In support of Hong Kong's Climate Action Plan 2050, which is formulated in response to the goals of Paris Agreement, an international climate accord aimed at limiting global warming to 1.5°C above pre-industrial levels, the Group has formulated a clear decarbonisation pathway based on its business characteristics, steadily advancing its low-carbon transition. Within this framework, we established 2030 Climate Target⁶, prioritising direct emission reductions in our operations through energy efficiency measures and responsible resource management. For residual emissions that cannot be eliminated in the short term, we will consider using quality carbon credits and/or renewable energy certificate ("REC"), where appropriate, to address unabated emissions in a credible and transparent manner. The ESG Working Group reports to the Board on the progress of target implementation at least once a year, enabling continuous oversight and enhancement of our environmental performance.

風險管理

董事會對制定和實施風險管理框架承擔最終責任。在董事會監督和ESG工作組的協助下，我們進行了可持續發展風險和機遇評估，包括氣候相關風險和機遇，並評估了其潛在影響和可能性，並進行優先排列。根據評估結果，本集團制定了相應的緩解措施，以提高我們的風險應對能力和氣候抵禦力。

指標及目標

為了配合《香港氣候行動藍圖2050》（該藍圖是為響應《巴黎協定》的目標而制定，旨在將全球變暖目標限制在工業化前水平以上1.5°C以內），本集團已根據其業務特點制定了明確的減碳路徑，穩步推進低碳轉型。在此框架下，我們制定了2030氣候目標⁶，優先通過節能措施和負責任的資源管理減少日常營運中的直接排放。對於短期內無法消除的殘留排放，我們將在適當的情況下考慮使用優質碳信用及／或可再生能源證書（「REC」），以可信和透明的方式解決未減排的排放。ESG工作組每年至少向董事會匯報一次目標落實的進展，以便對我們的環境績效進行持續監督和提升。

Air and GHG Emissions Management

The Group's primary air and GHG emissions originate from generators, vehicles and electricity consumption.

We are committed to reducing air and GHG emissions to mitigate environmental impact. To this end, the Group has adopted various green practices in its daily operations. Key measures implemented to reduce air, and GHG emissions are outlined below:

空氣與溫室氣體排放管理

本集團的空氣及溫室氣體排放主要來自發電機、車輛及電力消耗。

我們致力減少空氣及溫室氣體排放，以減輕對環境的影響。為此，本集團在日常營運中採用多項綠色做法。為減少空氣及溫室氣體排放而實施的主要措施概述如下：

Energy Management

Electricity and fuel consumption account for the majority of energy usage across the Group's business operations. Diesel consumption varies according to the nature and scale of work undertaken at construction development projects. As such, annual energy consumption levels may fluctuate significantly from year to year. Nonetheless, the Group remains committed to managing energy consumption intensity, with the aim of preventing year-on-year increase.

As a responsible corporation, the Group is committed to optimising energy efficiency across all operations. To achieve this, we have implemented the following sustainable energy measures including installing energy-saving LED lights and T5 fluorescent tubes in the temporary lighting of the construction sites and in common areas of the data centre premises and encouraging our staff to switch off lights and electrical devices when not in use.

能源管理

電力及燃料消耗佔本集團業務營運中的大部分能源消耗。柴油消耗根據建築發展項目所從事工作的性質和規模而有所不同。因此，每年的年度能源消耗水平可能會大幅波動。儘管如此，本集團仍然致力於管理能源消耗強度，旨在防止同比增加。

作為負責任的企業，本集團致力於優化所有業務中的能源效率。為此，我們已實施以下可持續能源措施，包括建築工地的臨時照明及數據中心物業的公共區域採用LED節能燈及T5熒光燈管，並鼓勵我們的員工關閉未使用的照明及電器設備。

Water Resources Management

The Group's water consumption primarily stems from its construction operations. We actively promote water conservation among construction workers and on-site staff, encouraging responsible usage habits. Regular inspections of water pipes are carried out to prevent leakage and ensure efficient use. During the Reporting Period, the Group did not encounter any difficulties in sourcing water. Our efforts in water resource management are outlined below:

Water-Saving Measures

- Conduct regular checks on water pipes to prevent leakage
- Develop water conservation habits among all construction workers and on-site staff
- Report any water leakage or drip for prompt maintenance

水資源管理

本集團的用水主要來自其建築業務。我們積極在建築工人和工地人員中推廣節約用水，鼓勵負責任的使用習慣。定期檢查水管以防止漏水並確保有效使用。於報告期內，本集團求取水源並未遇到任何困難。我們在水資源管理方面的工作概述如下：

節水措施

- 定期檢查水管以防止漏水
- 培養所有建築工人和工地人員節約用水的習慣
- 報告任何漏水或滴水情況以便及時維護

Waste and Wastewater Management

The Group's construction operations inevitably generate construction waste and wastewater. To address this, we have established stringent waste and wastewater management procedures and strictly prohibit the illegal dumping of construction waste. Non-hazardous and non-recyclable construction waste is collected by licensed waste collectors and disposed of at designated landfills. In accordance with the government's Construction Waste Disposal Charging Scheme, the Group has registered billing accounts with the Environmental Protection Department to ensure proper payment for waste disposal charges.

Additionally, the Group is dedicated to reducing waste generation across all operations through sustainable innovation and process optimisation. By adopting circular economy principles in our operations, we actively reduce environmental impacts while maintaining operation efficiency. Detailed waste and wastewater management measures are outlined below:

廢棄物及廢水管理

本集團的建築業務無可避免產生建築廢棄物及廢水。為解決該問題，我們已制定嚴格的廢棄物及廢水管理程序，嚴禁非法傾倒建築廢棄物。不可回收的無害建築廢棄物由經許可廢棄物收集商收集並棄置於指定堆填區。根據政府的建築廢棄物處置收費計劃，本集團已於環境保護署註冊付款賬戶，以確保妥善支付廢棄物處置費用。

此外，本集團致力於透過可持續創新及流程優化在所有業務中減少廢棄物產生。透過在業務中採用循環經濟原則，我們於保持營運效率的同時積極減少對環境的影響。廢棄物和廢水管理措施的詳情概述如下：

Biodiversity and Natural Resources

Biodiversity sustains the health, resilience, and productivity of ecosystems, it is the foundation for long-term business success and thriving communities. We recognise that our building construction business has the potential to impact on the ecosystems surrounding our construction sites. Native species may be affected by construction as local habitats can be altered for development purposes. Proper environmental assessment and management can reduce these impacts and prevent them from being long-lasting or irreversible.

To that end, the Group strives to strictly comply with all contractual provisions for ecological protection within the construction site boundaries, with an aim of adhering to environmental protection requirements throughout the entire construction process.

生物多樣性與自然資源

生物多樣性維持著生態系統的健康、恢復力及生產力—這是長期商業成功及社區繁榮的基礎。我們認識到，我們的建築施工業務可能影響我們建築工地周圍的生態系統。當生態家園因發展目的而改變時，本土物種可能會受到施工的影響。適當的環境評估及管理可減少該等影響，防止其長期存在或不可逆轉。

為此，本集團致力於嚴格遵守施工現場範圍內的所有生態保護合約規定，旨在於在整個施工過程中符合環境保護要求。
