ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

環境、社會及管治報告

Aspect A1. Emissions

The Group is aware that emission reduction has increasingly become an important element for the global economy, and has hence integrated environmental management into the operational decisions and various processes of the Group.

The Group's construction machinery sector primarily engages in the leasing and sales of construction machinery. Despite not being the end user of the construction machinery, the Group has still acted in accordance with government policies and has taken measures to help end users achieve better emissions performance. The Group procured machinery that complies with the Environmental Protection Department's regulatory control on emissions of non-road mobile machinery. Older machinery would be progressively phased out. Most of the machinery complies with the standards imposed by the EU Stage IIIA or the Ministry of the Environment of Japan. Where technically feasible and permitted by market conditions, the Group endeavoured to introduce construction machinery with better emission performance. During the Reporting Year, the Group newly procured crawler cranes that comply with the newest regulatory control on emissions of non-road mobile machinery to help customers improve their environmental performance and reduce the impact on the environment. Meanwhile, the Group has also regularly serviced and maintained rental machinery to ensure that the operation and emission of machinery are in excellent condition. The Group always follows the policy requirements of the Environmental Protection Department and has phased out pre-Euro IV diesel vehicles to improve emission performance.

Regarding waste management, the Group has registered with the Environmental Protection Department as a producer of chemical wastes given that the Group produces waste oil when performing mechanical repairs. In strict compliance with the relevant requirements and guidelines, the Group has entrusted licensed chemical waste collectors to collect and dispose of all waste oil to ensure that the waste oil would be treated in an environmentally approved manner to prevent any impact on the environment. Non-hazardous waste produced by the Group in daily operation is classified and collected by respective property management companies.

層面A1. 排放物

本集團意識到減排降耗日漸成為環球經濟的重要元素，因此將環境管理納入本集團的營運決策以及各個流程當中。

本集團的建築機械板塊主要從事租賃及銷售建築機械，縱然本集團並非建築機械的最終使用者，但仍配合政府政策，並致力採取一系列措施協助最終使用者達到最佳的排放表現。本集團採購符合環境保護署管制非道路移動機械廢氣排放規例的機械，並繼續逐步淘汰較舊的機器，大部分機械均已符合歐盟IIIA期或日本環境省施加的標準，本集團更在技術上可行以及市場情況許可的情況下優先引入具有更佳排放表現的建築機械。本集團於報告年度新採購符合最新的非道路移動機械廢氣排放規例的新型履帶吊機，協助客戶提升環保表現，減低環境影響。本集團與此同時亦定期維修保養供出租的建築機械，確保機械的運作及排放表現優良。本集團一直遵循環境保護署的政策要求，淘汰歐盟四期以前的柴油車輛以持續改善排放表現。

而在廢物管理方面，鑑於本集團進行機械維修時會產生廢機油，本集團已向環境保護署登記成為化學廢物產生者，並且恪守相關要求及指引，委託持牌的化學廢物收集商收集及處理所有廢機油，以確保廢機油得以環保合規的方式處理，避免對環境構成影響。本集團於日常營運中產生的無害廢棄物已分類，並由相關物業管理公司收集。

ENVIRONMENTAL, SOCIAL AND GOVERNANCE REPORT

環境、社會及管治報告

The Group has strictly complied with the relevant environmental laws and regulations. During the Reporting Year, there were no cases of prosecution for violating environmental laws and regulations.

本集團嚴格遵行相關的環保法例，報告年度內並無因為違反與環保相關的法例而被檢控的個案。

To contribute to the global efforts of emissions reduction, the Group formulated a series of environmental targets aimed at reducing its operational impact on the environment. The Group took into consideration the industry's best practices and analysed its previous quantitative environmental data disclosed in past ESG reports to develop a set of appropriate environmental targets.

為全球減排工作作出貢獻，本集團設立一系列的環境目標，旨在減少其營運對環境的影響。本集團於制定一系列適當的環境目標時，考慮到行業的最佳做法，並分析其過往ESG報告中披露的環境量化數據。

Note 1: The intensity of emissions or waste produced was calculated by dividing the total amount of particular emissions or waste produced with the average number of employees during the Reporting Year.

Issue 事宜	Target 目標
GHG Emissions 溫室氣體總排放量	By 2030, reduce GHG emissions (Scope 1 and 2) intensity (by tCO ₂ e/employee) by 2% compared with the 2026 baseline. 與二零二六年的基準相比，到二零三零年，溫室氣體總排放量(範圍一及二)密度(以公噸二氧化碳當量／僱員計算)減少2%。
Waste 廢棄物總量	By 2030, reduce waste produced intensity (by per employee) by 2% compared with the 2026 baseline. 與二零二六年的基準相比，到二零三零年，廢棄物總量密度(以每名僱員計算)減少2%。

Aspect A2. Use of Resources

The Group recognises that earth's resources are limited, hence judicious use of resources must go hand in hand with emission reduction. Where feasible, the Group's construction machinery sector has prioritised purchasing construction machinery with better fuel efficiency, and choosing appliances labelled with grade 1 energy efficiency labels. With effective use of resources as the key principle, the Group's office has adopted natural ventilation and reduced the use of air conditioners as much as possible to help reduce energy consumption. The Group used recycled water for cleaning equipment and machinery, and encouraged employees to save and cherish water by advocating the concept of good use of water resources. By doing so, the Group aims to reduce energy and water consumption intensity by 2% by 2030 as compared with the 2026 baseline.

As paper usage in the office would impose burden on forestry resources, the Group has actively promoted the use of digital imaging and electronic file archives. The Group has implemented policies that promote paper conservation and encourage the use of electronic media, such as advocating double-sided printing and reusing paper, thereby achieving the goal of reducing the amount of paper used and ensuring substantive action for the protection of forest resources. The Group has also set up recycling containers to collect and recycle paper, aluminium cans and plastic waste, in order to make full use of available resources.

The products of the Group are mainly machinery, for which the delivery does not involve material use of packaging materials. Hence, the packaging materials used by the Group are immaterial.

層面A2. 資源使用

本集團明了地球的資源有限，慎用資源與減少排放必須相輔相承，本集團的建築機械板塊在可行的情況下優先引入具有更佳燃油效益的建築機械，又優先選用具有一級能源效益標籤的電器產品。本集團以有效使用資源為大原則，在辦公室盡量引入自然通風，減少使用空調，以期降低能源消耗。本集團又會以回收水清潔設備及機械，並鼓勵僱員節約及珍惜用水，宣揚善用水源的理念。藉此，與二零二六年的基準相比，本集團目標能夠於二零三零年前減少2%的能源及水的消耗密度。

有鑑於辦公室用紙會為林木資源帶來負荷，本集團推動數碼影像及電子文件檔案的使用。本集團已實施各項政策，以推動節約用紙並鼓勵使用電子媒介，例如提倡雙面列印、紙張再用，從而達到減少紙張用量的目的，為保護林木資源採取實質行動。本集團又設置回收箱分別回收廢紙、鋁罐及塑膠廢棄物，務求充分善用資源。

本集團的貨品主要為機械，其交付並不涉及使用大量包裝材料。因此，本集團所用的包裝材料微不足道。

Note 2: The intensity of consumption was calculated by dividing the total amount of particular resource consumption with the average number of employees during the reporting period.

附註2：耗用密度按特定資源耗用總量除以報告期間平均僱員人數計算。

Aspect A3. Environment and Natural Resources

The Group's construction machinery segment has regularly arranged its employees to attend seminars held by the Environmental Protection Department, followed up closely on policy and regulatory changes of relevant regulatory authorities, and updated its environmental management policies in a timely manner to comply with the latest legal requirements. The Group has strictly complied with the policy requirements for the control of non-road mobile machinery emissions, non-road vehicle emissions and the phase-out of pre-Euro IV diesel vehicles, to ensure that all users can achieve good emission performance and minimise the potential environmental impact on the air quality.

As for the Group's financial segment, the Group is aware that the future international capital market must invest large sums of money in promoting the transition of a traditional economy to a green economy. The market's awareness of green finance has also deepened day by day, therefore assets invested in green financial products and projects have rapidly increased. Governments have taken action to encourage the development of green finance. The Hong Kong Government would also strengthen Hong Kong's capital market by highlighting the conditions for Hong Kong to develop green financial products. The Group would also actively explore development opportunities in this trend and landscape.

By implementing environmental management policies, the Group did not have any significant environmental incidents during the Reporting Year.

層面A3. 環境及天然資源

本集團的建築機械板塊定期安排僱員出席環境保護署舉行的講座，密切跟進相關監管當局的政策及法規變動，適時更新公司的環境管理政策，以符合最新的法例要求。本集團嚴格遵守有關管制非道路移動機械廢氣排放、非道路車輛的廢氣排放及淘汰歐盟四期以前的柴油車輛的政策要求，確保各用戶都能達到良好的排放表現，將對空氣質素的潛在環境影響減至最低。

而本集團金融板塊方面，本集團知悉未來國際資本市場須投入大量資金推動傳統經濟過渡到綠色經濟。市場對綠色金融的認知亦日益加深，投資於綠色金融產品及項目的資產也因而迅速增加，各國政府紛紛採取行動鼓勵發展綠色金融，而香港政府亦會加強宣傳香港資本市場的優勢，突顯香港發展綠色金融產品的條件。本集團在此趨勢及背景下亦會積極探求發展機遇。

本集團透過施行環境管理政策，於報告年度未有重大的環境事故發生。

Part D Climate Change

Climate change has become an increasingly important sustainability issue for businesses. During the Reporting Year, the Group conducted a climate-related assessment to review the potential risks and opportunities relevant to its operations. Based on the assessment results, the Group considered that the identified climate-related risks and opportunities were not material to the Group. Nevertheless, the Group will continue to monitor climate-related developments and take appropriate actions where necessary.

The Group incorporates climate-related considerations into its ESG management, where appropriate. The Board maintains oversight of ESG matters, while the management monitors relevant operational, regulatory and market developments and implements appropriate measures to manage potential climate-related impacts.

D 部份 氣候變化

氣候變化已成為企業日益重要的可持續發展議題。於報告年度內，本集團進行一項氣候相關評估，以檢視其營運所涉及的潛在風險與機遇。根據評估結果，本集團認為所識別出的氣候相關風險與機遇對本集團而言並不具重大影響。儘管如此，本集團仍將持續關注氣候相關的發展動向，並於必要時採取適當行動。

本集團於適當情況下，將氣候相關考量納入其ESG管理之中。董事會負責監督ESG事宜，而管理層則密切關注相關的營運、監管及市場動態，並採取適當措施以應對潛在的氣候相關影響。
