APPENDIX 1

Summary

Events. The company reported its 2024 results with total revenue of RMB 7.47 billion, down 6.8% year-on-year, or RMB 8.62 billion under the pharmaceutical sales revenue definition, representing a 9.0% decline. Sales from the three products included in the national volume-based procurement (VBP) program totaled RMB 2.69 billion, down 28.8% year-on-year, while revenue from non-VBP exclusive and innovative products reached RMB 4.55 billion, up 4.1%. Gross margin declined by 3.6 percentage points to 72.6%, mainly due to price cuts associated with the inclusion of three products in VBP. R&D expenditure increased by 8.9% year-on-year to RMB 890 million, accounting for 11.9% of total revenue (+1.7 percentage points), while R&D expenses rose 69.1% to RMB 330 million (4.4% of revenue, +2.0 percentage points), driven by higher costs related to research and clinical trials. Selling expenses rose by 6.0% year-on-year to RMB 2.66 billion, representing 35.6% of total revenue (+4.3 percentage points), primarily due to increased investment in new product commercialization. Annual profit came in at RMB 1.61 billion, down 32.3%, and adjusted net profit stood at RMB 1.71 billion, down 36.7% year-on-year.

Comments. The company's 2024 results were in line with expectations, with the impact of volume-based procurement (VBP) on the existing portfolio largely digested. Under the pharmaceutical sales revenue definition, the cardiovascular and cerebrovascular product line recorded sales of RMB 4.09 billion (-18.8% YoY), accounting for 47.4% of total pharmaceutical revenue. The gastroenterology/autoimmune product line generated RMB 2.88 billion in sales (-6.7% YoY), representing 33.3%. Sales from the dermatology and aesthetic medicine line grew by 18.2% to RMB 670 million, accounting for 7.8%, while the ophthalmology segment posted robust growth of 24.3% to RMB 630 million, accounting for 7.3%. Other products contributed RMB 360 million in sales (+26.5% YoY), making up 4.2% of the total. In 2024, the three VBP products achieved revenue of RMB 2.69 billion, down 28.8% year-on-year, indicating that the short-term impact of centralized procurement has largely played out. Notably, the dermatology and ophthalmology product lines continued to deliver strong sales growth.

In the field of innovative drugs, the company has achieved significant progress, with five innovative products—LeMeBlue, Methotrexate Injection, Velphoro, ILUMETRI, and VALTOCO—already commercialized. Two additional assets, Desidustat tablets and Ruxolitinib cream (a potential RMB 5 billion blockbuster), have been submitted for NDA approval in China, with Ruxolitinib cream expected to be approved in the second half of 2025. Meanwhile, over ten clinical-stage innovative programs are progressing steadily, including Y-3 injection (Phase 3), a VEGFA+ANG2 tetravalent bispecific antibody for nAMD (in Phase 2), CMS-D002 (a GnRH receptor antagonist for endometriosis-related pain, in Phase 1), CMS-D001 (a highly selective TYK2 inhibitor for psoriasis and AD, IND approved in January 2025 and about to initiate Phase 1), and CMS-D005 (a dual GLP-1R/GCGR agonist for obesity, MASH, and type 2 diabetes, currently in Phase 1 preparation). In addition, four co-development programs—Povorcitinib (JAK1 inhibitor), ABP-671 (URAT1 inhibitor), ZUNVEYL, and MG-K10 (long-acting IL-4R α inhibitor)—have been newly added to further enrich the company's innovative pipeline.

Earnings Forecast and Valuation Recommendation. Considering the impact of volume-based procurement (VBP) has largely been priced in and the gradual launch of innovative drug products, we revise our 2025-26E revenue forecasts to RMB 8.37 billion and RMB 9.44 billion, respectively (previous 2025E forecast: RMB 9.19 billion), representing year-on-year growth of +11.5% and +13.3%. Taking into account the company's continued R&D investment in innovation and marketing expenses for newly launched drugs, we adjust our 2025-26E attributable net profit forecasts to RMB 1.67 billion and RMB 1.91 billion, respectively (previous 2025E forecast: RMB 2.07 billion), representing year-on-year growth of +3.2% and +14.0%.

Using comparable companies such as Huadong Medicine (18x), Sino Biopharmaceutical (23x), and CSPC Pharmaceutical Group (9x) as references, we maintain our target price of HKD 9.96 per share, corresponding to 14x 2025E PE. We reiterate our "Outperform" rating.

Risks. Risks related to new drug R&D, volume-based procurement (VBP) policy risks, regulatory risks in new drug review and approval, and commercialization risks of new drugs.
